PROCEEDINGS AND DEBATES OF THE 97th CONGRESS, FIRST SESSION

HOUSE OF REPRESENTATIVES—*Thursday, March 12, 1981*

The House met at 11 a.m. and was called to order by the Speaker pro tempore (Mr. WRIGHT).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, D.C.,
March 11, 1981.

I hereby designate the Honorable JIM WRIGHT to act as Speaker pro tempore on Thursday, March 12.

THOMAS P. O'NEILL, Jr.,
Speaker of the
House of Representatives.

PRAYER

The Reverend Grant R. Sherk, Jr., St. Dunstan's Church, McLean, Va., offered the following prayer:

Almighty God, our heavenly Father, we beseech You to guide all those to whom You have committed the Government of this Nation. More especially, we pray for those who represent our people in this House. Grant to them, in these difficult times, special gifts of knowledge and understanding, of wisdom and counsel, and the strength to uphold what is right and to follow what is true, so that they may obey Your holy will and help to fulfill Your divine purpose for our people and our country; through Jesus Christ our Lord. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

THE PRESIDENT'S BUDGET

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, I rise today to note receipt of the President's budget and to call for a spirit of careful cooperation as we contemplate the radical surgery that is being suggested. Before we act on anything with such potentially painful consequences and lasting side effects, I think it would be well to take time to get a second opinion on whether all these cuts are necessary.

I think we should cooperate with the President because everyone of us knows that there is substantial waste in Government spending. Each of us has been hearing from constituents demanding that frivolous programs be eliminated. We have heard the stories of people collecting benefits by bending or even ignoring the rules. Clearly something should be done about these situations. The President is right on that score.

But the changes recommended also deserve careful scrutiny. It would be inappropriate to ignore the requirements of the needy merely to punish the greedy. It would be extremely wasteful to dismantle programs now and then re-create them 1 year or 2 years hence when we came to realize that they were truly essential to our society.

Momentum is an important political force. Striking while the iron is hot is a valid strategy. But legislating in haste and subsequently having to repent and revise at length would be a disservice to all Americans.

FTC ANTITRUST ENFORCEMENT

(Mr. TAUKE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TAUKE. Mr. Speaker, I applaud the administration's apparent decision not to eliminate the antitrust authority of the Federal Trade Commission.

While cuts in the FTC budget are unquestionably in order, eliminating the antitrust function would have been a severe blow to the small business community in the United States. The Office of Competition, the antitrust division at the FTC, has made a significant contribution toward encouraging competition and regulating merger activity in this country.

The trends toward economic concentration are alarming. FTC statistics show that larger companies increased their share of after-tax profits during the 1960–76 period from 59 percent to 73 percent, all at the expense of small- and medium-sized businesses, which have seen their share of the profits decline from 41 to 27 percent.

Moreover, during the same period, almost 38,000 mergers and acquisitions took place in industries over which the FTC has jurisdiction. That figure excludes the communications, transportation, and banking sectors of the economy.

Only by reducing the negative effects of economic concentration can we provide incentives for greater economic growth and insure the excellence that comes from keen competition in the marketplace.

The FTC Office of Competition will help us achieve that end.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will announce that it is the purpose of the Chair at this time to recognize the gentleman from Michigan (Mr. FORD) for a unanimous-consent request, following which business the Chair will return then to the 1-minute speeches.

The Chair recognizes the gentleman from Michigan (Mr. FORD).

EXPRESSING SENSE OF THE HOUSE WITH RESPECT TO PAY RECOMMENDATIONS OF THE PRESIDENT

Mr. FORD of Michigan. Mr. Speaker, I offer a resolution (H. Res. 109) expressing the sense of the House with respect to the pay recommendations of the President, and ask unanimous consent for its immediate consideration.

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

The SPEAKER pro tempore. The Clerk will report the resolution.

The Clerk read the resolution, as follows:

H. RES. 109

Resolved, That, with respect to the recommendations which were transmitted to the Congress with the President's budget for fiscal year 1982 pursuant to section 225(h) of the Federal Salary Act of 1967 (2 U.S.C. 358), and in view of President Reagan's statements contained in his Fiscal Year 1982 Budget Revisions that:

"The President has concluded that the increases in Federal executive salaries proposed in the January budget should be deferred because current economic conditions require that substantial budget reductions be achieved. However, the President is deeply concerned about the diminishing ability of the Federal Government to attract and retain high caliber executives. The Administration will, therefore, work with the Congress in developing other ways to address this issue before the next report of the quadrennial Commission on Executive, Legislative, and Judicial Salaries, which is due in 1984.";

it is the sense of the House of Representatives that the approval of such recommendations would be inappropriate at this time.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

Mr. MICHEL. Reserving the right to object, Mr. Speaker, I do so, first, to inquire of the gentleman from Michigan whether or not he has had any consultation with the gentleman from Illinois (Mr. DERWINSKI), the minority member who would have to do with this subject matter.

Mr. FORD of Michigan. If the gentleman will yield, yes; I discussed it with him last evening, after I found out about it.

Mr. MICHEL. Did the gentleman advise him that this would be the first order of business today, so that he might be present and say whatever appropriate remarks he might want to make at this time?

Mr. FORD of Michigan. No; I did not tell him when it would come up today, just that it would be today, and I just left him a few moments ago in the committee where the Postmaster General is testifying. If the gentleman would like, I could withhold for a few minutes while he checks with him there.

The SPEAKER pro tempore. The Chair would like to give assurances to the distinguished minority leader that, upon granting of the unanimous-consent request, it would be in order to recognize the gentleman from Michigan (Mr. FORD) for 1 hour. The Chair knows that the gentleman from Michigan would share equally with the minority of such time as may be desired, and ample time would be provided for the gentleman from Illinois to be summoned, or any other Members who desire to express themselves.

Mr. MICHEL. Mr. Speaker, I withdraw my reservation of objection.

Mr. PEYSER. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Michigan this question: Does this resolution preclude the consideration within the next month or 2 months of the recommendations that have been made by the Presidential Commission dealing on pay raises? I would appreciate an explanation.

Mr. FORD of Michigan. If the gentleman will yield, it is my opinion that this disposes of the pending recommendations, as far as the House is concerned.

Mr. PEYSER. Mr. Speaker, further reserving the right to object, in other words, this would be considered the final action of the House dealing on the entire pay raise issue?

The SPEAKER pro tempore. May the Chair respond?

By the terms of the resolution, it would express the sense of the House, which ought to be sufficient, as a practical matter, for the present disposition of any such recommendation.

However, there is nothing in the resolution which arbitrarily binds the House now or deprives it for the next 4 years from any consideration that it might wish to give.

Mr. PEYSER. I thank the Chair for that explanation, because it would be my hope that the House will have an opportunity in this year of discussing on the floor of the House the whole issue of pay raises, not only for Members of Congress, but for others at the top executive levels who President Reagan was most anxious to support in getting pay raises just 2 months ago. I felt the President had a very good point at that time. As a matter of fact, I spoke to his adviser, who was urging that the House take all actions possible to see that the pay raise went through. And this was in December 1980.

So I would hope that the issue is not a dead issue. The President obviously needs a pay raise to help get people in the Federal Government, and the Members of Congress also need the help.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The SPEAKER pro tempore. The gentleman from Michigan (Mr. FORD) is recognized for 1 hour to use such time as he may use and to yield such time as he may yield.

Mr. FORD of Michigan. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I have a resolution at the desk and ask unanimous consent for its consideration.

Mr. Speaker, this resolution relates to the rates of pay for the executive, legislative, and judicial branches of Government, recommended by former President Carter, and originally endorsed by President Reagan, pursuant to the Federal Salary Act of 1967.

The 1967 act provides for the appointment of a nine-member Commission every 4 years. The members are private citizens, and they are charged with studying the salaries of top officials of all three branches of the Government, and recommending to the President the salary adjustments the Commission considers necessary.

Last year the Commission, upon completion of its study, recommended salary increases averaging roughly 40 percent. The Commission presented some alarming facts in support of its recommendation:

Since 1969, the CPI and the private sector hourly earnings index have risen by more than 130 percent, while top officials' salaries have increased by only 43 percent;

The retirement rate for "capped" employees ages 55 to 59 has increased fivefold to 74.6 percent;

Currently 33,000 employees in six layers of management are making the same "capped" rate and if no adjustment is made until the next Commission recommendations are received (1984) everyone GS-13 and above—140,000 employees—will be making the same rate of pay.

The Commission concluded that the country was facing a "quiet crisis" with respect to recruitment and retention of executives, and 5 days of hearings by our committee strongly confirm this.

Former President Carter modified the Commission's recommendations and submitted them with his January budget. In submitting that budget message, President Carter said, "President-elect Reagan has authorized me to say that he fully supports these recommendations."

Since then my committee has, through a special task force, held 5 days of hearings on the Quadrennial Commission pay recommendations. During the course of those hearings we were advised, by letter, by OMB Director David Stockman, that the administration did not feel that the full Commission recommendations were presently appropriate.

In my mind the record is clear: A pay raise now is justified and the minor cost involved—less than fourtenths of 1 percent of payroll—would be returned to the taxpayer many times over in terms of better management and more effective and efficient Government. But I am a practical person, and I recognize that the votes are not here to approve the Commission's or any other increases, particularly in view of President Reagan's reversal of his position in his budget revisions which we received 2 days ago.

Those revisions included the following statement:

The President has concluded that the increases in federal executive salaries proposed in the January budget should be deferred because current economic conditions require that substantial budget reductions be achieved. However, the President is deeply concerned about the diminishing ability of the Federal Government to attract and retain high caliber executives. The administration will, therefore, work with the Congress in developing other ways to address this issue before the next report of the Quadrennial Commission on executive, legislative, and judicial salaries, which is due in 1984.

Accordingly, the resolution now before the House provides that any adjustment now would be inappropriate. I assure Members that the committee will continue to study the overall problem, and work with the administration as suggested by President Reagan, with specific emphasis on the unusual procedures currently in the law relating to these pay adjustments.

The letter from Mr. Stockman is as follows:

OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C.

Hon. WILLIAM D. FORD,
House of Representatives, Rayburn House Office Building, Washington, D.C.

DEAR BILL: While the Administration understands and sympathizes with the extent of the problem of inadequate and compressed executive salaries, it is inappropriate, with other planned budget initiatives, to endorse the full recommendations of the Quadrennial Commission. Those would call for increases of around 40 percent.

President Carter's 1981 budget proposals on Federal executive, legislative, and judicial pay called for an increase of 16.8 percent over the 1977 pay cap. That proposal would simply bring payable salaries for Federal executives in line with their legal salary rates as established under Public Law 94-82.

The status of the economy requires that we concentrate our resources on achieving substantial budget reductions. Federal executives, the Congress and the Judiciary should forego salary increases at this time. Thus, the President has determined that we should not now seek an increase in Federal Executive salaries.

The President has expressed a deep concern with the diminishing ability of the Federal Government to attract and retain high caliber executives; therefore, we should develop other ways to address this issue before the next Quadrennial Commission Report due in 1984. We will be glad to work with the Congress in this endeavor.

Sincerely,

DAVID A. STOCKMAN,
Director.

□ 1115

Mr. PEYSER. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from New York.

Mr. PEYSER. I thank the gentleman for yielding.

I want to congratulate him for facing the situation realistically as it exists today and also for his statement of the continuing effort on the part of his committee to not set aside what is a genuine problem today in Government; and it is a problem that has been recognized by the leadership on both sides of this House who, in the past, have actively supported the proposals dealing with increasing pay of Federal officials at the top level, Members of Congress, and the judiciary in this country in the Federal courts about whom I wanted to ask the gentleman. I take it they are impacted just the same as anybody else under this. There is no separate agreement, or is there any, that affects the Federal courts in this country?

Mr. FORD of Michigan. I would be pleased to place in the RECORD at this point the communication from the Chief Justice. I am paraphrasing now, because I do not have the letter before me: He suggests that our failure to act at this time may permanently scar the governmental system of this country.

SUPREME COURT OF THE UNITED STATES,
Washington, D.C., February 18, 1981.

Hon. WILLIAM D. FORD,
Chairman, Post Office and Civil Service Committee, House of Representatives, Cannon House Office Building, Washington, D.C.

DEAR CONGRESSMAN FORD: I am very pleased to learn that the Post Office and Civil Service Committee is conducting hearings on the recommendations of the Quadrennial Salary Commission for increased salaries for high level government officials in all three branches of government.

Upward adjustments are sorely required by each of these groups since their purchasing power has been substantially cut as a result of previous freezes. The need to increase judicial salaries is a matter of particular importance in order to reflect cost of living increases which have been granted to other federal employees. The stark inequity resulting from the existing salary situation led me, over a year ago, to describe it as the judiciary's "most pressing problem", and it continues to be critical.

As you may know, twenty-seven Federal judges resigned in the 1970's, up from eight in the 1960's. In 1980, three judges left the bench. Two of our best judges have left since this Congress convened in January. I now have on my desk letters from two additional Federal judges advising me of their intent to resign in order to return to private law practice. I have asked them to talk to me first to see if I can talk them out of resigning. The rate of resignations is alarming. Not many years ago it was virtually unheard of for a Federal judge to leave the bench because of inadequate pay.

Those of us on the bench can only speculate on the effect inadequate compensation will have on the quality of new appointments. However, the Attorney General in the recent administration was quoted as saying that declinations were being received from many lawyers of the quality sought for Judicial appointment.

When judges appointed for life find it necessary to leave for financial reasons, the nation loses. When many of the best lawyers decline appointments, again, the nation loses.

If the public confidence merited and enjoyed by the members of the federal bench for so long is allowed to erode, the entire nation will suffer a grave and perhaps irreparable wound. It is important for Congress, whenever it is feasible to do so, to return to the unanimous salary recommendations of the 1980 Commission.

Also vitally important is the matter of amending the Quadrennial statute to provide for a review of compensation every two years as recommended in the Commission report. I hope the Committee will give serious consideration to this suggestion.

Cordially,

WARREN E. BURGER,
Chief Justice.

Mr. PEYSER. I thank the gentleman for that comment.

I would also simply like to say that this is a problem that realistically must be faced. When I hear nothing for 4 years, that would disturb me greatly, but with the assurances obviously of the gentleman that we are going to consider this program, and it may just be as a suggestion which I really am reluctant to make, that this Congress should act on this whole pay raise issue to affect the 98th Congress so that nobody here would be struck with the tag of having to vote for their own pay raises, to vote it for a new Congress. Because, having struggled through this issue for the last 10 years, it seems that that may be the only route we can go.

I appreciate the gentleman's willingness to consider this actively in his committee and for the good of our Federal Government today, I am hopeful something positive will come out of it.

I thank the gentleman.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Illinois, for the purpose of debate only.

Mr. MICHEL. I thank the gentleman for yielding.

I would first want to make the observation that Members are all aware that the whip notice for the action for this week did not include this particular resolution. Since there was practically nothing scheduled for this week, Members were on notice if they were not serving on one of the appropriate committees in the Congress, whether the Committee on the Budget, the Committee on Appropriations, or the Committee on Ways and Means, that there was very little for which they would need to be here on the floor.

I would hope that the disposition of this resolution therefore would be accomplished without a rollcall vote in deference to those Members who frankly were fully apprised that there was to be nothing practically scheduled for this week. I do not like the idea of blind-siding Members when we have given them assurance that the schedule was going to be such and such.

Now, I guess, first, I would have to make the observation that, so far as I know, there would not need to be any

kind of action taken by either this body or the other body to negate what the Quadrennial Commission had recommended. It is my understanding that we have to take an affirmative action to adopt any or all of those recommendations.

So, we are really kind of going through the motions here today, and for that reason, as I said, I would hope that we could move the resolution without putting some Members in an embarrassing position of not being here to vote on one on which they may very well have some strong feelings.

Having said that, may I also join in some measure piggybacking on the statement of the gentleman from New York, that the tenure of this resolution says that it should be deferred because current economic conditions require the substantial budget reductions to be achieved.

I have some feelings, too, that I would not be perfectly consistent with those of the gentleman from New York, but maybe not all at odds with him either.

The west front of this Capitol is deferred for the time being, but sometime we have to face up to the obligation of doing something with that crumbling west front.

I would agree with the gentleman, too, that with respect to pay raises for the executive branch people who are all caught in the squeeze with three and four levels bunched up at the same pay, that this is not an appropriate way of having good management in any kind of program. And I volunteer the observation that whether it is judiciary or Members of Congress, from time to time, the Constitution prescribes that we look at the subject and at least deal with it openly and above board and if it is justified, say so, and if not, say so at that given time.

I appreciate the gentleman yielding to the gentleman from Illinois for those observations.

Mr. LOTT. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Mississippi for purposes of debate only.

Mr. LOTT. I thank the gentleman for yielding.

I must say that I recognize that this action should be taken. I support what the gentleman from Michigan is asking for here today and certainly have no intention of objecting to it.

I must, though, express my concern about the way this has been brought up. As our distinguished leader was just saying, it was not on the agenda for this week. That is a matter that a lot of Members feel very strongly about. Some are for this pay raise and obviously others are very much opposed to it. But a lot of them who would like to maybe at least comment are not even here today, being unaware that this was going to come up. It was not on the agenda. I do not believe that the leadership on our side of the aisle even knew this matter was going to be brought up until yesterday.

While I support what the gentleman is doing, again I do not understand what all of a sudden was the haste to bring this up here today without any notice at all. So I raise that reservation and I certainly at this point, while I think probably we should have a vote on something like this, now, with many Members out across the country or in a position where they maybe could not get here, I would hate for us to have a recorded vote on something like this and the Members not even having been notified and with no opportunity to comment on it.

Mr. LUNGREN. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from California.

Mr. LUNGREN. I thank the gentleman for yielding.

I would like to pick up on one thing that was said by the gentleman from New York. It seems to me we come up with this issue—I have been here a little over 2 years—and we come up with it about every 6 months and we are not ever able to handle the issue. I think we ought to perhaps seriously look at the possibility of restructuring the manner in which we do it and that is facing the issue of voting for increases when we think they are necessary, but not have them go into effect until the people have had an opportunity to vote on whether we should return here. That way I think we can legitimately say we are voting to raise the salary for whoever comes.

Our opponent who wishes to use it in a campaign can use it and he will benefit by it if we go for a raise and we at least will be forced to go before the electorate and say we did not increase our salaries during the last 2-year contract.

We are coming before you for a renewal of that 2-year contract, you knowing full well that we have increased our stipend, and will you return us?

I know that in the past some people will think that seems to be finessing the issue. I think that is really the manner in which you face up to the issue and a manner in which a lot of Members would feel a lot more comfortable in recognizing that perhaps when that day comes when we have to vote for an increase, at least we give the people of our constituencies an opportunity to reflect their judgment on our opinion.

I hope the gentleman, in keeping with this resolution, will in fact look to that and perhaps we can have some sort of legislation on the floor. I know those bills abound in this Congress and have for some period of time.

The gentlewoman from New Jersey has had a bill. I cosponsored that. Members on both sides of the aisle have cosponsored it. I hope we seriously look at that so we can deal with this situation on a regular basis, rather than an ad hoc basis and in a way I think you will find more affirmative responses from Members of this institution.

Mr. FORD of Michigan. I thank the gentleman for his comments. I like the gentleman's spirit. I like the direction the gentleman is coming from.

I would simply observe that there is a Republican vacancy on my committee. The committee is the place where one cannot excape discussing these issues and being a target of every person in the media who wants to take a shot at us. I know that it is not, for that reason, a particularly desirable committee at this particular time, but we could use somebody with the gentleman's courage on the committee to help the gentleman from Illinois (Mr. DERWINSKI) and others cooperate with the President in addressing this issue at the earliest possible date.

I would welcome the gentleman with open arms as a member of our committee.

Mr. LUNGREN. I appreciate the gentleman's comments. It is the first time I have been invited to a committee by a Member on the other side of the aisle. I appreciate that.

Mr. FORD of Michigan. I hope that will not discourage the gentleman.

Mr. LUNGREN. I thank the gentleman.

Mr. FORD of Michigan. Mr. Speaker, I yield 5 minutes to the gentleman from Maryland (Mr. BARNES).

Mr. BARNES. I thank the gentleman for yielding.

First of all, I want to salute the chairman and the members of his committee for their leadership on these issues over a period of years because this is constantly a difficult and controversial question.

The chairman and his colleagues have provided important leadership and brought a sense of reality to a discussion that is more often than not, unfortunately, couched more in political rhetoric than in sensible discussion of what are important questions for our Nation.

I am constrained to rise to oppose the resolution, setting aside the issue of our pay, which I think can reasonably be set aside right now. The issue of what we are doing to the Federal Government by continuing to unreasonably hold down the salaries of the people we seek to have managed the programs that are initiated by the Congress is slowly—and maybe not as slowly as we would like to think—de-

stroying the efficiency of the Federal Government itself.

□ 1130

I represent, and it is no secret to my colleagues, an area where a large number of Federal managers live, so I am in close contact with the individuals who are subject to this resolution. When I go out to my town meetings or with my mobile office to shopping centers, it is inevitable that several high-ranking civil servants, public servants of this country, will come up to me and say, "MIKE, I have had it. I have not had a raise in 4 years, and with the inflation rate what it is, I have suffered a very substantial pay cut over that period. And, MIKE, I am quitting."

What we are doing is tragic really, because what we are doing is maximizing the inefficiency of Government. What we are doing is driving out the best people, because those are the people who can have the opportunities outside of Government; they are the ones who are being recruited by private industry. We are destroying the very Government we hope will be providing efficient and inexpensive services to the people of the United States.

I understand that the Chief Justice of the United States has indicated his judgment that we are destroying the judiciary of the United States because we continue to unreasonably restrain the salaries of top level members of our judiciary, the judges of the United States.

I just think it is terribly unfortunate that we find ourselves in a position in which, once again this year, those people who seek to serve the people of the United States are being called upon to make the most direct and immediate sacrifices, because they want to serve the public. But they want to do so in a way that permits dignity.

I was interested to see the report of the Quadrennial Commission which, as I recall—this is from my memory, but I think it is right—took the 450 top law firms of the United States, the largest law firms, and they found the average salary of a partner in the 450 largest law firms of the United States, if my memory is correct, is $86,000. That is the average salary. So that would even include somebody who was made a partner last week. To repeat, the average is $86,000 a year.

There are many Government lawyers who would walk out of Government service tomorrow and become partners in one of those law firms and increase their salary capacity dramatically, as could obviously all the judges, and as could obviously many others in Government.

I am told that in Canada top-level civil servants now are making about $100,000 a year, in a nation where they prize public servants and where they treat public servants with some degree of dignity.

I just think it is terribly unfortunate that we are doing what we are doing. We are going to make the statements we hear about democracy true. We hear today so often political statements about bureaucracy, that it is inefficient and inept and not able to provide the kind of services the American people demand, and we are going to make those statements true.

If there is any element of truth in them today, it is going to be very true 5 years from now when we have driven out of Government service all the most able people.

So I am forced, Mr. Speaker, to rise in opposition to the resolution. I think what we are doing today is once again a mistake. It is not in the best interests of the taxpayers, in fact just to the contrary; it is directly against the interests of the taxpayers.

Mr. FORD of Michigan. Mr. Speaker, I yield 5 minutes to the distinguished majority leader, the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Speaker, I rise in support of the resolution. I think it is timely. I think it is appropriate. I think it comes as a decent gesture on the part of the House to set an example at this particular moment when we are calling upon all of the agencies of Government for strict austerity.

At this particular moment when people are being asked to forgo privileges and benefits to which they feel themselves entitled in the name of governmental economy, surely it behooves us as Members of the U.S. House of Representatives to set an example.

I am convinced that a very good case can be made to the effect that Members of Congress, members of the judiciary, and the high-ranking members of administrative government deserve an equitable upward adjustment in their pay scales.

Somewhere in the Scriptures there is a verse which says, "A laborer is worthy of his hire." Certainly it is true that in the past decade the cost of living has sped ahead at a pace which is some 60 percent beyond the salary and pay levels of these highest grade administrative and legislative officials of our country. Surely the case can be made that compensation for all the professions and commensurate levels of work have gained at a pace much more rapidly than have these levels of governmental work, and certainly I would not be one to denigrate the value or the worth of governmental work and public service.

I do not think there is a single profession in which a Member devotes so much of his time, his interests, his heart, his soul as he does to public service. That is particularly true of Members of Congress. I do not believe that there are many Members of this House who, if they were to devote the same amount of intelligently directed time and effort and energy to any soundly conceived business or professional enterprise, could not make a great deal more money than they are making as Members of Congress.

And yet the other side of the coin—let us be honest about it, my colleagues—is that we would not work that hard nor give that much time and heart to any other enterprise. And is it not true, after all, that we did not get into this business for the purpose of getting rich in the first place?

Webster defines politics as "the science and art of government." It is an exalted undertaking.

I happen to agree with the statement that was made by Andrew Oliver in Boston perhaps 180 years ago when he said, "Politics is the noblest of all professions."

"There is not another," he said, "in which one may do such widespread good for his fellow creatures, nor is there another in which by a mere loss of nerve he might do such widespread harm. Nor," he continued, "is there another in which a positive and strict veracity is so difficult, nor yet another in which one might so easily lose his soul.

"But," he concluded, "with all the temptations and degradations that beset it, politics is still the noblest career that any man can choose."

I believe that. If I did not believe that, I would be in some other career.

But now let me ask the Members quite honestly, do you not believe that this resolution, expressing our willingness to forgo any salary increase, is the right thing for us to do at this particular moment? When we are calling upon all of the other agencies of Government for a strict accounting, for a belt tightening, for severe austerity, is it not right and proper for us to set the example?

I do not believe there is a person here in the House who, at a moment when food stamps are likely to be reduced, wants to vote to increase his own salary.

I do not think there is one of us, at a moment when an administrative recommendation is before the Congress to eliminate or severely reduce the Meals on Wheels programs for our elderly citizens, who would want at the same time to vote to increase his own salary. Let us face it, my colleagues, we are not starving.

I do not believe there is a Member here, at a moment when the President is asking that the student loan program be reduced to the point where students must begin to pay interest on those loans for the whole 4 years of their college education before they are ever even able to begin to pay them back—a measure which might reduce the number of students who could

attend college by an estimated 500,000—who would want at that moment to vote for a pay increase for ourselves.

When we are being asked to reduce the school milk program, the drug abuse program, and aid for dependent children, it clearly is not a time to accept an increase in our own salaries.

The SPEAKER pro tempore (Mr. BLANCHARD). The time of the gentleman from Texas (Mr. WRIGHT) has expired.

Mr. FORD of Michigan. Mr. Speaker, I yield 3 additional minutes to the distinguished majority leader.

Mr. WRIGHT. Mr. Speaker, I really do not think that there are any of us who would, under these severe circumstances, want to ask for a pay increase for ourselves.

And so, therefore, since we are attempting to do those things that will halt the inflation that rages through this country and since we are not, quite frankly, the most severely afflicted in society by that inflation, and inasmuch as we are suggesting that there be a social compact between labor and management which recognizes a relationship between wage increase and increases in productivity, does it not then behoove us to set a decent example? Is it not right to say that so long as we are asking others to forego benefits, and in some cases deserved increases, then we of all people should forego them?

For if the salt has lost its flavor, wherewith shall it be salted? And if the trumpet gives forth an uncertain sound, then who would come to battle?

Mr. FORD of Michigan. Mr. Speaker, may I inquire, how much time do I have remaining?

The SPEAKER pro tempore. The gentleman from Michigan (Mr. FORD) has 30 minutes remaining.

Mr. FORD of Michigan. Mr. Speaker, I yield 5 minutes to the gentleman from Indiana (Mr. JACOBS), for purposes of debate only.

Mr. JACOBS. Mr. Speaker, I thank the gentleman for yielding this time to me, and I take this time to support the resolution in opposition to the pay raises.

I think that the record ought to reflect some facts which, to my knowledge, have not yet been spread before us. I hear it said that the average income of a law partner in the United States is $86,000. Let it also be heard and said that the average income of all Americans, laborers, office workers, and those in all other pursuits, is $13,800 a year.

It was once said of a great revolutionary general much admired by the populous, "They say he eats the same rations as his men."

It was Montaigne who said, "Sit ye never so high upon the stool yet sit ye but upon your own tail." We are all individual human beings with the same dreams, the same desires, and the same appetite for material things of this life. And some of us are privileged to sit in the "councils of the mighty," in the words of the Scriptures. And yet sit we but upon our own tails, with the same human needs.

Let us see how those human needs were met, for Representatives, Mr. Speaker, back in 1947. In 1947 the pay for a Member of this body was set at $15,000. If we were to index for inflation precisely from 1947 to date, the congressional salary today would be $58,410. That would be an honest indexing from 1947 until now.

That means the congressional salary now overstates inflation since 1947 by $2,290.

Now, why do some argue that the cost of living has outstripped the current pay? Simple.

If you use an inflated base, then you are halfway home in demanding a higher salary now. The inflated base in this case is October 1969, a date which followed three pay increases which each exceeded cost-of-living increases. In March 1969, for example, there was a 41.6-percent pay increase against an increase in the cost of living of 16.2 percent.

Those are the facts with respect to this matter, and it seems to me that I should also say that not only is the bureaucracy spoken of by the populous as inefficient, not only is the bureaucracy spoken of by the populous as overmeddling, but it is also spoken of as living high on the hog.

□ 1145

So I would hope that the record would reflect this, that we all would reflect upon this, that we all would bear in mind that the better part of statecraft is modesty in public service, that we are the servants and the constituents are the employers, and a salary of $58,000, let alone $60,000, is in the highest 1 percent of income for any individual in the United States. This means that the servants in this House are earning more than 99 percent of their masters today.

So I would counsel my colleagues, without rancor and without undue emotion, to be modest.

I yield back the remainder of my time.

Mr. FORD of Michigan. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. PEYSER) for debate only.

Mr. PEYSER. Mr. Speaker, in the five terms that I have been privileged to serve in this Congress, I have continually taken the position that Members of Congress are entitled to a fair raise, as are other members in the executive branch and in the top levels of Government in Washington. I am going to agree with and I am going to vote today in support of this resolution as a temporary postponement of the consideration of this issue. Incidentally, this will be the first time I have ever voted this way. I have voted continually and very publicly for occasional and fair pay raises since I have been in the Congress, but I am going to support my chairman at this time for this particular delay until we can get a better look at the situation and the economics in this country.

However, I cannot let the opportunity pass without some observations. My good majority leader, who made I think a very telling point in his talk when he did state that no one came to this Congress to get rich, and I totally agree with this. Nor do I think anybody comes to this Congress to go broke, and yet that is what is happening to a tremendous number of Members in this Congress today who also have children in college and who maintain their residences.

My friend, the gentleman from Indiana (Mr. JACOBS) spoke here a few minutes ago in some confused way of stating that we should be getting $58,000 instead of $60,000 on an indexing system. I find it absolutely impossible to really believe that he is serious in thinking that the Congress is not entitled to a minimal pay raise. I believe that we must face the issue.

The way we have to face the issue is the way I said before, and that is addressing it to the next Congress, only voting it this year in 1981 and not in 1982 when again the Members will begin to feel the pressures. So I think that may be a solution which I will support.

I also think it is important to recognize that in this administration today we are talking about cutting aid to students, cutting basic programs that this Congress has been committed to, all of which will make it even more difficult for Members of Congress and others in the Federal Government who have been able to participate at least in these programs, which will now be eliminated from participation if the Reagan administration proposals were to go through—which I certainly hope is not going to be the case.

Mr. JACOBS. Mr. Speaker, will the gentleman yield?

Mr. PEYSER. I will be glad to yield.

The SPEAKER pro tempore (Mr. WRIGHT). The time of the gentleman has expired.

Mr. JACOBS. I ask the gentleman from Michigan to give 2 additional minutes to the gentleman from New York.

Mr. FORD of Michigan. I yield 2 additional minutes for debate only to the gentleman from Indiana.

Mr. JACOBS. I thank the gentleman.

I am sorry that the gentleman is having difficulty believing that I meant what I said. I did. And when I said that the $58,000 figure was an

index from the 1947 pay, the setting of the pay at $15,000 it should not be difficult to believe that. It is a matter of statistical record. The Library of Congress will give the gentleman the numbers. I think the numbers are something like a 290- or 286-percent increase in the cost of living and 310 percent or so in the payment to Members of Congress for their salaries. It is just as simple as that.

If the gentleman refers to these pay grabs that exceed the cost of living, once you get that under your belt and you go from there, then you are home free.

Mr. PEYSER. I will take back my time. I think we are dealing, and I am trying to deal, in a real world here and not in a statistical date game. The real world is that Members of Congress, like anybody else and top level members in this administration, are in financial binds. All right, we are facing an economic crisis today. The resolution before us says let us postpone this issue because of the problem facing us. As I say, I will vote for it today, but I think it is for today and not in the very near future that we have to look with realism on what we are facing. I know the leadership on both sides of the House have supported that and I am sure I will continue to support that.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. PEYSER. I will be glad to yield to my friend, the gentleman from Illinois.

Mr. MICHEL. I thank the gentleman for yielding. I just want to make the further point that the gentleman's basis on which he makes some of his projections on whether or not the Members of Congress are exceeding what they normally ought to be paid today does not take into consideration that in those days there were no limitations on outside income. One came down here to be a citizen-Member of Congress, and could practice law on weekends. He could come down here between Tuesday and Thursday, and he did that. But we have in recent years done an awful lot of things to ourselves to inhibit our being citizen-legislators and devoting full time here. It is a completely different situation that existed in those first years when I came to Washington and which the gentleman uses as a benchmark for today's figures.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. FORD of Michigan. I yield 1 additional minute to the gentleman from New York.

Mr. PEYSER. I thank the gentleman. I agree completely with my friend, the gentleman from Illinois (Mr. MICHEL), who just spoke. I want to ask him, going back into 1947 and that period there, was it not possible for Members of Congress to have members of families on payrolls and on staff?

Mr. MICHEL. There is no question about that and, of course, many Members did have. I am not suggesting that is right.

Mr. PEYSER. No, I am not either. In fact, I think it is a reform that was very important to eliminate the fact that no member of one's family or relative could serve on a congressional staff, on one's congressional staff, and I think that is correct. I think we have made a lot of limitations. But the problem is we have locked ourselves into a situation which is hurting all of us and the country, and I hope that we can combine our forces and reach a solution this year.

I thank the chairman for the indulgence he has had in yielding to me so often. I thank the gentleman.

Mr. FORD of Michigan. Mr. Speaker, I have no further requests for time.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Illinois.

Mr. MICHEL. I thank the gentleman for yielding. I ask for the time only to renew my request that in view of the fact that we have not scheduled this resolution for this week and this resolution was not scheduled in a whip notice to that effect, and Members who did have a committee assignment and a committee meeting, for example, on Budget or Appropriations or Ways and Means, that it would be rather unfair on a matter of this consequence to put the issue to a rollcall vote when so many Members did not otherwise plan on having to face the issue today. Whether it be on the gentleman's side of the aisle or ours, I think it incumbent on us to do our best to protect those Members. This is just a warning down the road through the balance of the session that if we are going to do business, the Members ought to be alerted to the fact that we are going to live up to the kind of schedule we lay out.

The SPEAKER pro tempore (Mr. WRIGHT). Let the Chair observe in response to the timely suggestion of the distinguished minority leader that the Chair does not consider the recognition of the gentleman from Michigan (Mr. FORD) for this unanimous-consent request today to constitute a breach of good faith. Let it be also observed that the Chair, or the present occupant of the Chair, most certainly the Speaker, and all Members of the leadership, will attempt to advise Members as best we can at the conclusion of each week—as we have in the past—what we anticipate to be the business of the coming week. But let it also be noted that on Tuesdays, Wednesdays, and Thurdays, there may be occasions when some legislation might be timely for consideration, and there is no immunity on those days, unless expressly stated, from legislation, legislation being our primary business.

The Chair merely wanted to make that observation.

The Chair recognizes the gentleman from Michigan (Mr. FORD).

Mr. FORD of Michigan. I yield such time as he may consume to the distinguished whip.

Mr. FOLEY. The distinguished chairman and Speaker pro tempore and majority leader have stated very clearly that we are going to attempt to work in cooperation with the gentleman on the schedule. I know that his intention along with that of the Republican leadership is to work as hard as possible to insure that the Members are informed. Obviously, we cannot at all times guarantee that the schedule will not be changed when necessary.

I think the issue before the House today which the distinguished gentleman from Michigan (Mr. FORD) has presented is a matter on which there is a very substantial consensus in the House. It was not our intention to request, or the intention of the gentleman from Michigan to request the yeas and nays.

Mr. MICHEL. Will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Illinois.

Mr. MICHEL. I thank the gentleman for yielding. I want to say that I take the admonishment of the Speaker pro tempore in good grace, because far be it for this Member to not always alert Members that this is a full-time job these days and they have got to expect from time to time that there will be those issues that will come up on the spur of the moment.

But, as I indicated, this might very well have been foreseen on such an important vote. A word to the wise, I think, is sufficient.

Mr. FOLEY. If the gentleman from Michigan would yield further, I think the record will show—and I think the distinguished minority leader along with my colleague from Mississippi, the Republican whip would agree with this—that we have had good cooperation between the leadership of both of the parties on scheduling so far this year. No doubt, there are going to be differences on substance, but so far I think no Congress in which I have participated has had stronger or better cooperation on scheduling matters than has existed so far. I hope we can continue that throughout the rest of the year.

Mr. MICHEL. I agree with the gentleman.

GENERAL LEAVE

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. FORD of Michigan. Mr. Speaker, I have no further requests for time. I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

NATURAL GAS PRICING: LEAVE WELL ENOUGH ALONE

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, the President is talking about immediately deregulating domestic natural gas prices. Speaking as a strong advocate of the phased deregulation policy embodied in the Natural Gas Policy Act and as a supporter of oil price decontrol, I trust the Congress will not go along with immediate deregulation. Our economy just cannot handle it right now.

To take natural gas price controls off all at once would result in an incredible short-term inflationary shock to our economy. At a time when we are making a concerted effort to cut Government spending and interest rates with the hope of bringing inflation under control, it just makes no sense at all to proceed with an action which we all know would have such a short-term significant inflationary impact.

The effect of such action would be to ratchet up costs everywhere in our economy, and would particularly hit our farmers very hard. Those increased costs of natural gas would undoubtedly lead to higher labor costs causing yet further inflation, because so many wage contracts have cost-of-living clauses which would be affected dramatically by immediate deregulation. And, as far as our efforts to cut back Government spending, we need to remember that we would see the various programs which are indexed to inflation—like social security—costing more. We would end up with an increase in the deficit we are trying to eliminate.

Based on classic economic theory, it can be argued that the controls on natural gas do result in that commodity being overused and underdeveloped as compared to decontrolled crude oil. I do not argue with the theory, but given the fact that we are now trying to bring inflation under control as our No. 1 priority, I am convinced that we should stick with the process of systematic, orderly deregulation that is now in place.

We also should impress upon the President that the natural gas pricing policy under which we are now operating is the result of extensive deliberation and compromise. The formula is working. We should leave well enough alone.

□ 1200

PRESIDENT REAGAN'S BUDGET

(Mr. ECKART asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ECKART. Mr. Speaker, with the delivery of President Reagan's budget to the House, the word now is that the budgetary ball is in our court, and public sentiment, accordingly, is being mobilized, with the placement of large, expensive, full-page ads by some of the most profitable corporations in America, urging our unqualified support for the President's tax package. What they are trying to tell the middle-income taxpayers in my district, that group which inflation has gripped so severely, is that a $600 tax cut for someone earning $20,000 a year is the same as a $12,000 tax cut for someone earning $200,000 a year.

Now, I am sure the middle-income taxpayers in my district would like to respond; however, they find it somewhat difficult to raise $17,382 to buy a full-page ad in the Washington Post to respond. I hope that the Congress will not be persuaded by this blatant use of corporate profits, enough money to give a $600 tax break to nearly 30 middle-income taxpayers.

This administration wants us to get going, and we will get going as soon as we have all of the elements of the package before us. This Congress stands ready to act upon the President's package as soon as it is clear what all of the elements of that package will be.

There already have been substantial changes between what the President proposed on February 18 and what he delivered on March 10.

Waterway user charges, urban development action grants, housing subsidies, all these have been changed in the last few days and we are told more are on the way.

Yet some of these proposals will require expert testimony from administration officials, some of whom are yet to be appointed, let alone confirmed. Even the Republicans on the Small Business Committee of which I am a member this very day asked us to delay any votes on the SBA budget because the new Administrator is not yet in place.

We are considering the most fundamental changes in the budgetary process of this country at this time, and, yes, the ball is now in the congressional court. We will not fumble and we will not stall. As long as we are given the opportunity to work with and to cooperate with this administration, this country can be sure that the ultimate goal will be reached.

LEGISLATION INTRODUCED TO END ABUSE OF ADMINISTRATIVE AUTHORITY

(Mr. WOLPE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WOLPE. Mr. Speaker, for the past 10 years, the Federal Trade Commission has been trying a case against the three major ready-to-eat cereal companies. The central argument of the FTC's case is that simply through the industry's structure alone, these three companies share a monopoly. The FTC's action, in my opinion, is a classic example of a bureaucracy attempting through the administrative law process to write new law that far exceeds congressional intent. Whether or not an industry's structure alone means that a given company is engaging in illegal or unlawful monopolistic practices is a very basic public policy question, and is a concept that represents a tremendous expansion of traditional antitrust law. It is an issue that should be resolved only by the U.S. Congress.

The ramifications of this case could indeed be great. One FTC economist has, in fact, stated that under the shared monopoly principle, up to one-third of the entire U.S. economy could be declared illegal.

Mr. Speaker, I am today introducing legislation with 46 of my House colleagues which seeks to bring an end to this abuse of administrative authority. The legislation would place a moratorium on decisions in any shared monopoly case being pursued by the FTC until such time as the Congress has determined what, in fact, constitutes a shared monopoly and whether or not it is illegal. I feel this legislation represents a sound and modest approach to a serious problem and I would urge my colleagues to support the bill.

TRADE ADJUSTMENT ASSISTANCE PROGRAM

(Mr. BLANCHARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BLANCHARD. Mr. Speaker, I am intrigued and curious about the White House recommendation that the trade adjustment assistance program be reformed. Intrigued because American workers are having a harder time than ever because of a flood of imported products. Curious because we have no specific recommendations on what is to be done.

The trade adjustment assistance program was created to deal with domestic labor dislocations caused by im-

ports in a way that did not sabotage our basic commitment to international trade. It was designed to give workers in impacted industries a chance to get back on their feet if they were put out of work by the popularity of an imported product.

Over the years we have heard reports of abuses in this program. We are told that it can be more generous than the unemployment compensation program. We have heard that the workers who need the aid often do not get it until they are placed on another job and their period of acute need has passed. Both these questions merit our attention.

Trade adjustment assistance is a complicated program that merits a comprehensive examination. If it is not working, we should fix it.

But a simple reduction in funding that does not speak to the program's particular problems would not serve anyone well. Making a commitment to accept the President's recommendations without seeing the specifics is the best way to insure that trade adjustment assistance will become a perennial problem.

LAW OF THE SEA NEGOTIATIONS

(Mr. BEDELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEDELL. Mr. Speaker, I was in New York on Tuesday at the United Nations, where the Law of the Sea negotiations are taking place at this time. I thought it proper that I should notify my colleagues as to what I found taking place there.

National delegations from all over the world have come to New York in order to conclude negotiations on the Law of the Sea Treaty, which has been going on for some 7 years. These people arrived to find that the U.S. delegation had been advised that they were not to negotiate at this session, advice which was purposefully made public.

I hope the Members can imagine the consternation which they felt as they found this to be the case. It is clearly understandable that the new administration would want to review these negotiations, but I submit that if we are going to have world order and if we are going to have a nation that is respected by other nations of the world, then we have to realize that commitments are commitments, and that with every change of administration we simply cannot throw everything out of the window and start all over again.

I detect that the damage we have done, not just to those people of the developing world, but to our friends as well, has been substantial, and I hope that the administration will seriously review its position.

STUDENT AID

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and to include extraneous material.)

Mr. PEYSER. Mr. Speaker, today, on the question of student aid, I would like to bring forth a letter from Morehead State University in Kentucky, in Congressman PERKINS' district, that indicates, based on the figures released by the administration yesterday, nearly 650 students, 25 percent of that institution's student body, will have to leave college this next year if we allow these cuts to go through.

I am introducing for the RECORD today, Mr. Speaker, that letter, and also a letter from Gallaudet College in Washington, D.C., in Congressman FAUNTROY's district, a letter from the Northeast Louisiana University, in Congressman HUCKABY's district, and a letter from the Kemper Military School and College in Congressman SKELTON's district in Missouri.

Mr. Speaker, we continue to be deluged with letters from all over the country that are indicating very plainly the implications and the impact, the disastrous impact, of the administration's recommendations on young men and women who are in college today.

The letters are as follows:

MOREHEAD STATE UNIVERSITY,
Morehead, Ky., March 9, 1981.

Hon. PETER A. PEYSER,
Cannon House Office Building,
Washington, D.C.

DEAR CONGRESSMAN PEYSER: We are of the opinion that if the changes in the B.E.O.G., N.D.S.L., G.S.L., and Social Security Programs that are proposed by the Reagan Administration are accepted, several hundred of Morehead State University students will face immediate difficulty in financing their college education.

A survey of recipients and the aid dollars awarded to students attending Morehead State University during 1980-81 has been completed. Also, we have made a projection of the number of students who will likely apply and qualify for aid during the 1981-82 award year. Below is an itemization of our findings.

Program	1980-81		1981-82 projections	
	Expenditures	Number of recipients	Expenditures	Number of recipients
B.E.O.G.	$1,937,789	2,434	$2,065,000	2,589
S.E.O.G.	225,000	632	225,000	625
N.D.S.L.	481,241	973	515,000	1,100
C.W.S.P.	1,030,466	1,925	1,200,000	2,000
G.S.L.	2,265,850	1,250	2,500,000	1,400
Social security	1,382,400	510	1,501,650	530

Please be informed that approximately 76 percent of the students attending M.S.U. and receiving funds under one or more of the college based programs (S.E.O.G., N.D.S.L., C.W.S.P.) come from families whose adjusted gross income is less than $12,000.

Therefore, we have projected that if the proposed cuts take place, approximately 650 to 700 students will not be able to enroll in Morehead for the 1981-82 Academic Year.

In view of the importance of this issue, appropriate action should be taken immediately, so the Education Department will have time to issue award letters, payment schedules, and etc., to institutions of higher learning. This will permit us to process applications and notify recipients this spring and early summer, regarding the amount and type of financial assistance they may expect to receive when they enroll for the 1981-82 Fall term.

We greatly appreciate your help and support in this matter and if additional information is needed, please let us know.

Sincerely,

MORRIS L. NORFLEET,
President,
Morehead State University.

GALLAUDET COLLEGE,
Washington, D.C., March 6, 1981.

Hon. PETER A. PEYSER,
Cannon House Office Building,
Washington, D.C.

DEAR CONGRESSMAN PEYSER: Thank you very much for your recent letter expressing concern over the administration's intent to reduce student loans and other federally funded educational programs.

Gallaudet College is the national college for deaf students in Washington, D.C. We respond to several federal laws assisting handicapped students at various age levels. The reduction of student loans would impact considerably on our student body. We have discovered, for example, that twice the number of students at Gallaudet College (deaf students) are from families whose economic condition is at the proverty level than the number of students at other colleges whose families are at this economic level.

We are also concerned that the funding of Gallaudet College and the National Institute for the Deaf at Rochester, New York continue because both institutions are national programs serving profoundly deaf students. Furthermore, the rubella epidemic of 1964 and 1965 have produced twice the number of deaf students who will want to enter postsecondary education in 1983 and 1984. These are conditions which concern us considerably and your interest and support is much appreciated.

Sincerely yours,

EDWARD C. MERRILL, Jr.

NORTHEAST LOUISIANA UNIVERSITY,
Monroe, La., March 4, 1981.

Hon. PETER A. PEYSER,
Member of Congress,
Cannon House Office Building,
Washington, D.C.

DEAR CONGRESSMAN PEYSER: Thank you for your letter of February 20. Attached is some information about the federal student aid programs at Northeast Louisiana University for Fiscal Year 1979-1980. As you can see, this university, with an enrollment of about 10,000 students, has a large number of students participating in federal student aid programs.

Approximately 20% of our students are black. Many of them will be unable to attend college if there is a reduction in federal aid programs. Because of the great need for financial aid, in addition to the federal

dollars, almost all the private gifts to the university are budgeted in the student aid department.

I plan to write to Congressmen from Louisiana about this matter. Thank you for your help.

Sincerely,

DWIGHT D. VINES,
President.

NORTHEAST LOUISIANA UNIVERSITY

[Federal student aid expenditures fiscal year 1979–80]

	Number of students	Total dollars
Basic educational opportunity grant	3,310	$2,796,832
Supplemental educational opportunity grant	543	127,800
Nursing grants	93	24,095
Law enforcement education program	65	10,747
National defense student loan	844	429,500
Pharmacy loan	119	85,374
Nursing loan	95	68,917
Work study	1,535	919,350
Total		4,462,615

(Note.—Some students receive more than one type of federal aid and therefore, are counted more than once.)

KEMPER MILITARY
SCHOOL AND COLLEGE,
Boonville, Mo., March 6, 1981.

REPRESENTATIVE PETER A. PEYSER,
Committee on Education and Labor, Cannon House Office Bldg., Washington, D.C.

DEAR REPRESENTATIVE PEYSER: I share your belief that the proposed cuts in the student loan program would seriously damage the higher education system of this country. Such cuts could be devastating and long lasting.

As you know, Kemper Military School and College is small with only 125 college students. Still, Kemper does commission more second lieutenants than any other school in the Army's entire second region. More that half of our college students receive some type of financial aid and most of these have some kind of educational loan. This year alone we have authorized $20,682 in National Direct Student Loans (NDSL) and $63,600 in Federally Insured Student Loans (FISL).

Cutting the educational loan program could seriously damage Kemper's enrollment; in fact, such cuts could also affect the defense of this nation.

Good luck in your efforts and if I can provide additional information do not hesitate to contact me.

Sincerely,

LOYD P. RHIDDLEHOOVER, Jr.,
Brigadier General, U.S.A., Retired, President.

EL SALVADOR: THE POLITICAL DIMENSION (IV)

(Mr. McHUGH asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. McHUGH. Mr. Speaker, the conflict in El Salvador, and American policy in relation to it, have become the subjects of increasing debate in our own country and in those south of our border.

The conflict in El Salvador is primarily a political one with military overtones, not a military confrontation in which the political questions are subsidiary. The fundamental issues in El Salvador relate to the legitimate concerns of the people for economic progress, a voice in their own government, and, most important of all, freedom from the threat of death at the hands of the left, the right or the government security forces.

To be effective, U.S. policy must recognize and relate to these fundamental issues. Moreover, it must do so primarily with political and economic initiatives, not military arms. This is understood by other governments in the region, and quite probably by President Duarte of El Salvador.

Because other countries in the region have at least as much interest as we in promoting stability in El Salvador, their governments are expressing their growing concerns and offering constructive options. Their plea is not for more military arms, but for peaceful, political initiatives. They are calling for negotiations, something the Reagan administration has thus far not emphasized in U.S. policy.

For example, in a newsstory that appeared in the New York Times yesterday, Alan Riding reports that both Mexico and Venezuela, which until recently supported the opposing sides in El Salvador, have been encouraging a negotiated solution. At the suggestion of the President of Costa Rica, the Organization of American States has also offered to mediate.

These are important developments, and should be encouraged. Whether the Reagan administration is prepared to do so remains in question. Thus, I would hope that our colleagues will encourage the administration to use its influence in a positive manner to support such initiatives.

Mr. Speaker, for the benefit of those Members who may not have seen the Times article, I am inserting a copy into the RECORD at this point.

[From the New York Times, Mar. 11, 1981]

THE SALVADOR STRATEGY

(By Alan Riding)

MEXICO CITY, March 10.—A year ago, the Carter Administration quietly resumed "nonlethal" military aid to El Salvador's junta, arguing that it would help the Salvadoran armed forces to respect human rights while combating leftist insurgents. But last year more than 13,000 people were killed in El Salvador, most of them reputedly by the security forces.

Last March, however, Washington also persuaded the junta to adopt a sweeping land redistribution program and other political measures aimed at neutralizing growing popular support for the left. And when the guerrillas opened their "final offensive" in January this year, they found few Salvadorans willing to join them in a general insurrection.

Now, with the Reagan Administration stepping up military aid to El Salvador, many officials in the region fear that the lessons of the past year have been forgotten. The junta has survived, they argue, because of its political measures, while emphasis on a military solution will merely keep the extreme left alive.

NEGOTIATED SOLUTION ASKED

As a result, the key governments in Latin America—Mexico, Venezuela, Brazil and Argentina—have responded to United States charges that the Soviet bloc is supplying weapons to the Salvadoran guerrillas with warnings against deeper United States military involvement in El Salvador. And with rare unanimity they have called for a negotiated solution to the simmering civil war.

"I don't see why it is any more legitimate for the United States to arm the junta than for the guerrillas to get weapons from wherever they can," a Mexican official noted. "At the moment, the junta has no more legitimacy than the guerrillas. That's why there must be a cease-fire and a genuine referendum."

Mexico's President, José López Portillo, noted last month: "The crisis that has its temporary epicenter in the Salvadoran conflict has become a spiral that threatens to involve all the states in the area. For this reason, it is necessary to avoid the internationalization of the crisis through a combined policy that has the objective of rigorously preserving the principles of self-determination and nonintervention."

Mexico and Venezuela, in particular, seem worried that further militarization of the Salvadoran conflict might polarize the entire isthmus, heightening the domestic crises in Guatemala, Honduras and Nicaragua and prompting regional governments to meddle openly in each others' affairs.

Already, El Salvador's leftists have charged the Guatemalan and Honduran armies with attacking guerrilla positions inside El Salvador. Guatemala's military regime has accused Nicaragua and Cuba of sending arms to leftist guerrillas in its territory. Nicaragua in turn asserts that Honduras tolerates the activities of supporters of the ousted Somoza regime who make regular incursions into Nicaragua.

In the region, Washington's decision to send "lethal" equipment accompanied by military advisers to El Salvador has revived memories not only of the United States role in Vietnam, but also of the pledge of the late Cuban revolutionary, Che Guevara, to create "one, two, three, many Vietnams" in Latin America. "The United States will not make the Vietnam syndrome disappear by repeating it," a well-placed Mexican observed.

The specter of prolonged instability and outside interference in Central America has led Mexico and Venezuela, which until recently supported opposing sides in El Salvador, to adopt a common position in favor of a political settlement, with Mexico urging the left to negotiate directly with the junta and Venezuela pressing the junta to court at least the non-Marxist sectors of the opposition.

Even Nicaragua's Sandinist Government, which has been accused by Washington of helping to funnel arms to the Salvadoran left, is now also pressing for talks between the two sides. "In El Salvador, the guerrillas could not defeat the army and the army could not defeat the guerrillas," Interior Minister Tomás Borge Martinez said in a recent interview. "Things cannot continue like this. It is convenient neither for the Government nor the guerrillas, neither for the United States, nor for us."

So far, however, while agreeing to provide the junta with $35 million in military aid

this year and studying requests for over $200 million in economic assistance, the Reagan Administration has refused to endorse any of several negotiation formulas currently circulating in the region, including a mediation effort backed by the Socialist International that would begin with talks between President Reagan and Willy Brandt, the former West German Chancellor, who now heads the worldwide Social Democratic Union.

In the short term, though, perhaps the greatest fear of the liberal regimes in the area—a fear apparently shared by José Napoleón Duarte, the Christian Democratic President of El Salvador's junta—is that United States policy will strengthen the political position of the Salvadoran Army high command and erode the power that civilian officials have accumulated over the last year.

RIGHTIST CALLS FOR COUP

Significantly, just as President Duarte was announcing plans to organize the first free elections in El Salvador in 50 years, a right-wing former army major with a considerable following in the armed forces, Roberto D'Aubuisson, last week called for a military coup. President Reagan quickly reiterated his support for the junta and noted that "we would have to view very seriously such an attempt and such a coup."

Nevertheless, eager to underline the dangers of military answers to deeply rooted political problems, many students of the region have pointed to the long-term results of Washington's response to Cuba's first effort to "export" revolution to Latin America in the early 1960's.

At the time, President Kennedy created the Alliance for Progress and committed huge resources to promoting development and social change in the continent in the hope of neutralizing the appeal of a Castroite revolution. But he twinned this political approach with increased funds for military and police training to strengthen the security apparatus of the area.

In the mid-1960's, though, as Washington turned its attention increasingly to Vietnam, economic support for the Alliance for Progress faltered and United States policy toward Latin America began to lean increasingly on the security pillar. By 1969, President Nixon had endorsed the rising tide of military dictatorships.

In several countries, however, while leftist guerrilla groups were dismantled, the social and economic problems that frequently inspired young radicals to take up arms remained untouched. And, particularly in Central America, heavy-handed repression seemed to accelerate the advent of a new surge of leftist insurgency.

In El Salvador, armed rebels did not appear until 1970, but, fed by fraudulent elections in 1972 and 1977, mounting repression and the refusal of the ruling army to accept even modest reforms, their appeal grew steadily until the civilian-military junta began responding to political unrest with political as well as military measures in mid-1980.

Western diplomats with experience in the region therefore argue that United States support for a military solution in El Salvador might not only lead to continuing bloodshed, but could also sow the seeds for a new cycle of leftist violence. They also fear that, unless the opposition can be accommodated in a political solution, leftist terrorism will continue and the country will remain ungovernable indefinitely.

INTRODUCING LEGISLATION FOR CLEANUP AT THREE MILE ISLAND

(Mr. ERTEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ERTEL. Mr. Speaker, nearly 2 years have passed since the accident at Three Mile Island, but we have barely started cleaning up the radioactive swamp inside the reactor building.

It is time we stop talking about the problem and put the gears into motion so that we can get on with the job. Every day that we delay, the public health and safety hazard at TMI worsens.

Today I am introducing legislation which will remove one of the major roadblocks for the cleanup at TMI. Just as importantly, this bill will insure that people living around future accident sites are not faced with the same dangers that inaction brings.

For 2 years we have wrung our hands. This legislation finally permits us to face up to the problem and deal with it square on. I hope this bill will be the vehicle to catalyze action rather than continue the present atrophy.

I have received assurances that the Interior Committee and the Energy and Commerce Committee are prepared to take up this legislation in the near future. The understanding of these committees for the need for action should be the model for all of us. I urge my colleagues to join with me to confront this serious failure to protect public health and safety.

PEACETIME REGISTRATION

(Mr. MONTGOMERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MONTGOMERY. Mr. Speaker, a letter to the President is being circulated for Members' signatures to ask President Reagan to slow down and stop peacetime registration.

Mr. Speaker, in my opinion this would be a very serious mistake to stop registration at this time. Registration is working well. Our young men are registering. They have come through for us and these young men realize they do have some obligation to this country.

The Selective Service System has become again an effective organization. It is out of the deep freeze. Information the Selective Service has gained by registering is invaluable to our Nation. In case of an emergency callup, our country would save 90 days by getting young men into uniform and by having them ready to learn a military skill.

Last Tuesday, Secretary of Defense Weinberger stated at our House Armed Services Committee: "I know of no plan to stop peacetime registration."

I intend to do all I can to make certain that the administration maintains this point of view now and in the future.

A PRIMER FOR BIG SPENDERS

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. MICHEL. Mr. Speaker, I want to bring to your attention a serious educational deficiency among some of our friends on your side of the aisle. I have been listening to their 1-minute speeches recently. It seems they have a learning disability. They have not learned the lesson of the election of 1980. They are criticizing the President's program and saying we do not need spending and tax cuts in many areas.

In order to offer them remedial help, let me give excerpts from what I call "Uncle Bob's Primer for Big Spenders," in the great tradition of the Dick and Jane readers of the primary grades.

See Big Spenders run in 1980.
See Big Spenders lose in 1980.
See Big Spenders favorite candidate Jimmy Carter run.
Run, Jimmy, run.
See Jimmy Carter criticize Ronald Reagan's tax and spending cuts.
Lose, Jimmy, lose.
See Big Spenders forgetting the lesson of 1980.
See Big Spenders run in 1982.
Lose, Big Spenders, lose.

Mr. Speaker, if that message is too complicated for our friends, let me suggest that you try to teach them. Someone has to.

COMMITTEE INVESTIGATIVE STAFF RATIO

(Mr. NELLIGAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NELLIGAN. Mr. Speaker, in the 96th Congress, the ratio of Republicans to Democrats in the House of Representatives was approximately 4 to 7.

Last November, however, the American people saw fit to change this ratio. Now there are approximately four Republicans for every five Democrats in the House.

I feel that if we apply this new ratio to committee investigative staff, we could conclude that the Democrats have ignored the mandate of November. Let us look at the figures.

The Republicans presently have 155 investigative committee staff. Therefore, under the 5-to-4 ratio, the Demo-

crats should have 94 investigative staff. They do not. They have 860 staff positions—an excess of 666 positions.

Moreover, if we cost out these extra Democratic staff in terms of salaries and administrative expenses, we arrive at a figure of $24 million.

Now, if the Democrats expect the Republicans to do their committee work with 155 investigative staffers—why should not the American people expect the Democrats to complete their committee work with 194 investigative staff?

In addition, I would ask: If President Reagan can do without 63,000 people in the nondefense bureaucracy—why cannot the Democrats do without some of these 666 positions, costing $24 million?

Now, I am not an unreasonable man, and I would not propose cutting the budget for investigative staff by a full $24 million, or 66 percent. Obviously, there are many legitimate committee needs. However, I do think my figures demonstrate the eminent reasonableness of seeking only a 10-percent cut in committee funding.

COMMITTEE FUNDING RESOLUTIONS

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, inspired by the speech of the last gentleman, I would just have to say that we ought to recognize that all cuts are not equal. We happened to read in the paper yesterday where, apparently, the Speaker has indicated that he will go along with a 10-percent cut, but a different 10-percent cut than many of us have been talking about in terms of committee funding resolutions.

It was suggested that there would be a 10-percent cut from the authorization from last year versus the 10-percent cut in actual expenditures from last year. The difference is tremendous. The first would give you no net loss in terms of spending over last year; in fact it would give us an increase. The other would give us an actual decrease in spending.

Mr. Speaker, I do not think we could reasonably be able to go to court and explain before a jury of our constituents and somehow convince them that they are understaffed in this place. It seems to me that the overwhelming evidence would be that we are overstaffed, and the one opportunity that we have to attack that is in the area of committee funding resolutions.

I hope that what I heard is not true, that we are going to have it all in one single package and only have one vote up and down on it. We ought to have an opportunity to look at all of the committees and make reasoned judgment on them.

□ 1215

ENDING THE DIFFERENCE IN INTEREST ON CONTRACT SALES

(Mr. EVANS of Iowa asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. EVANS of Iowa. Mr. Speaker, in an effort to end the inequity in minimum interest rates charged on contract sales of farms and business, I am introducing legislation today to require that the same rate be charged all individuals regardless of relationship to the seller.

The Internal Revenue Service has set a minimum level of imputed interest on contract sales—those financed by the seller over a long period of time. The problem is that the IRS has set a higher level for those buyers who are related to the seller. This is particularly tough on farmers who wish to sell their land to family members.

Under the current regulation, buyers who are not related to the seller must be charged a minimum interest rate of 6 to 7 percent while those who are related must be charged a rate of 9 to 10 percent. Those rates are scheduled to rise on July 1 to 8 to 9 percent and 11 to 12 percent respectively.

It is clearly unfair to require that those who have worked with parents or family members to build a farm or business should be charged a higher rate of interest when they have the chance to purchase the property. My bill would clear this up by requiring that the IRS maintain the same rate of imputed interest for all parties and not discriminate against those who have a relationship to the seller.

Outside interests should not get better treatment than whose who are related to the seller.

SACRIFICE BEGINS AT HOME

(Mr. FRENZEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FRENZEL. Mr. Speaker, the Speaker has publicly announced that the Democratic majority will support spending authorizations for our committees at a level 10 percent under last year's authorizations.

The Republican minority on the House Administration Committee which exposed gross increases and expansions of committee staffs ought to be pleased, because we have forced the Democrats to equalize to the Senate position. I suppose we should declare a victory of sorts, but matching a Senate performance on frugality is indeed a tiny victory. We Republicans will present our demands for a 10-percent cut from last year's spending level to give the people a real reduction. We believe sacrifice begins at home with a reduction in our own committee spending.

CONCERN EXPRESSED ON ADMINISTRATION'S POSITION ON LAW OF THE SEA TREATY

(Mr. GILMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and to include extraneous matter.)

Mr. GILMAN. Mr. Speaker, this week negotiations resumed in New York at the United Nations in an attempt to conclude a comprehensive Law in the Sea Treaty.

The United Nations Law of the Sea Conference spans a 7-year period with delegates from more than 130 nations seeking to regulate, in an equitable, forward-looking manner, the resources of the sea and the use of the oceans.

As a congressional adviser to the U.S. delegation to the Conference during the last several years, I have witnessed the hard work of our Nation's delegates to the Conference as they diligently worked to hammer out a treaty protecting our Nation's vital interests.

I am deeply concerned about our new administration's pronouncements concerning the Law of the Sea Treaty and the questions that have been raised that this treaty does not serve the best interests of our Nation.

Recently several of my colleagues joined with me in requesting the Secretary of State, Alexander Haig, to review our concerns about the administration's new law of the sea policy. I urge my colleagues to note the concerns we expressed in this letter which I am inserting at this point in the RECORD:

COMMITTEE ON FOREIGN AFFAIRS,
Washington, D.C., March 6, 1981.

HON. ALEXANDER HAIG,
Secretary of State,
Department of State, Washington, D.C.

DEAR MR. SECRETARY: As interested Members of Congress actively involved in the U.S. negotiations on the Third UN Conference on the Law of the Sea, we understand your prerogative to undertake a full-fledged review of U.S. policy in the Conference. However, since the draft convention was carefully considered and worded, we had hoped that this administration could go to the 10th session without such a review. In this regard, we would have preferred to have been consulted on your decision rather than learning about it through a Department press release and subsequent Washington Post and New York Times articles.

In undertaking your review, we believe that you will reach the conclusion that the present text, now referred to as the Draft Convention, is essentially the basis for a sound Treaty. The negotiations have been difficult, delicate, and prolonged. The present text has been worked on by three administrations and in a strictly bi-partisan

manner. It reflects a series of important political compromises that the majority of U.S. interest groups involved in the negotiations had agreed upon. The text stands at a point where U.S. national defense, security, economic and environmental and political-legal interests are effectively protected. It would be most unfortunate to see the work on this draft convention undone at this juncture due to the loud voice of only one of those domestic groups.

We have looked forward to the 10th session to bring resolution of the few remaining issues: preparatory investment protection, the participation of entities other than states and the creation of the Preparatory Commission that would, in turn, develop the rules and regulations under which U.S. and foreign companies would operate under the International Seabed Authority. We are concerned that the recent press articles may make the prospect of resolving these issues much more difficult.

Beyond this, we believe it would be a mistake for a U.S. policy review to result in reopening negotiations on the fundamental principles now reflected in the carefully balanced parts of the present text. These principles go to the heart of vital U.S. security interests, notably the freedom of navigation and overflight of international straits, a uniform breadth of the territorial seas, the optimum use and conservation of fisheries, the establishment and legal status of the economic resource zone, marine boundary delimitation, dispute settlement and marine environmental and scientific protection.

We respectfully request to consult with you or whomever you designate on the matter of U.S. policy in this Conference at your earliest convenience.

Sincerely yours,

Clement J. Zablocki, Chairman, Committee on Foreign Affairs; Jonathan B. Bingham, Chairman, Subcommittee on International Economic Policy and Trade; Berkley Bedell, Member of Congress; Don Bonker, Chairman, Subcommittee on Human Rights and International Organizations; Benjamin A. Gilman, Minority Member, Subcommittee on International Economic Policy and Trade; Joel Pritchard, Minority Member, Subcommittee on International Operations; Jim Leach, Ranking Minority Member, Subcommittee on Human Rights and International Organizations; Paul N. McCloskey, Jr., Ranking Minority Member, Subcommittee on Merchant Marine, House Merchant Marine and Fisheries Committee.

A WORLDWIDE "DEFENSE STAMPS" PROGRAM

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks and include extraneous matter.)

Mrs. SCHROEDER. Mr. Speaker, when it comes to exercising economies in the Federal budget, a more likely target does not present itself than the many defense umbrellas the United States has opened around the world.

We run one of history's largest, free, mercenary services. Consider Japan. We station almost 50,000 troops in Japan and Okinawa—excluding dependents. We spend several billion a year in operating, construction, procurement, and other defense costs related to our presence there.

We spend billions more annually guarding the Persian Gulf so that Japan and others will have a secure access to oil.

Meanwhile, between 1979 and 1980 Japanese defense spending decreased 11 percent.

In 1980 the United States spent eight times more on defense per capita than did Japan.

Meanwhile, Japan's GNP has grown to the third largest in the world.

Meanwhile, Americans are ravaged by inflation and unemployment, and told that the defense budget must be increased to support our many commitments. Upwards of half the entire U.S. defense budget can be attributed to defense umbrellas we have opened up over NATO, Japan, South Korea, and other countries. In some cases these commitments were originally viewed as temporary. In other cases contributions from the beneficiary countries have been lagging, or even decreasing.

What we have set up, in effect, is a worldwide "defense stamps" program. Since the Federal budget is coming in for a thorough keelhauling, we ought to spare no program from scrutiny.

Mr. Speaker, the March 9, 1981, issue of New York magazine has an article by Michael Kramer, "Should America Go to the Brink With NATO?" which details a number of instances where our NATO allies left us in the lurch.

For example, after the Russian invasion of Afghanistan, the United States cut back its trade with Russia—but the Europeans actually increased theirs.

The article follows:

[From the New York magazine, Mar. 9, 1981]

SHOULD AMERICA GO TO THE BRINK WITH NATO?

(By Michael Kramer)

When it comes to the Russians, there is no mistaking where Ronald Reagan stands. "Let's not delude ourselves," says the president. "The Soviet Union underlies all the unrest that is going on. If they weren't engaged in this game of dominoes, there wouldn't be any hot spots in the world."

No doubt many people agree with the president. Unfortunately, America's NATO allies don't seem to be among them. Or, if they are, they have found it in their best interests to look the other way. And, naturally, this has upset the United States no end.

With Margaret Thatcher's visit to Washington last week, the United States has had occasion to gear up for another round in the continuing debate over the future of the alliance—which in America's view, means the failure of the Europeans to pull their own weight. The frustration of Representative Gunn McKay, of Utah, is typical. The European NATO members, says McKay, "are trying to put it all on our backs. They are just like the governors and mayors and county commissioners in this country are about revenue sharing: 'Give us some of that free money. We are entitled to it, and don't ask us to raise any taxes [for it].'"

At every level, tempers are short. Mistrust is common, and the situation is deteriorating. Most recently, after it responded to the Soviet invasion of Afghanistan by boycotting the Moscow Olympics, the United States was flabbergasted when the Europeans wouldn't take a common stand on even so painless an action as the boycott.

For their part, the Europeans had their reasons, foremost among them their desire to preserve and expand the impressive web of contacts they have developed with the Eastern bloc in recent years. In fact, while America cut back its trade with the Soviets after Afghanistan, the Europeans actually increased theirs. For example, says James Chace, the managing editor of Foreign Affairs, "in the six months following the Soviet invasion . . . West Germany expanded its exports to Russia by 30 percent," and today the West Germans are far and away the Soviet Union's biggest trading partners.

As for France, its response to Afghanistan was to declare the invasion "unacceptable." Beyond that courageous act, the French foreign minister would say only that "the question is not to know if the departure of the Soviet forces will be easy to attain. It is to know if it is necessary."

In real terms, France simply lied. According to Chace, the French assured the United States that they would "not move in to fill any breaches created by suspension or cancellation of projects undertaken by American firms"—but, in fact, they went ahead and did just that.

Even the British, the most pro-American of the NATO allies, have indicated their unease about America's role as leader of the free world. When the time came to buy America's Trident missiles, Mrs. Thatcher told Jimmy Carter that while the Trident force would be assigned to NATO, it would remain under British control as an independent deterrent in case "supreme national interests are at stake." And no matter how much she might admire Ronald Reagan, British sources see little chance for a reversal of this position.

In its defense, Europe is only too willing to tout its litany—a tale of past American abandonment. In particular, France has apparently considered America an unreliable ally ever since the United States sided with the Soviets against them and the British and the Israelis during the Suez crisis of 1956.

Gaullism may have been born at Suez, but it has flourished only recently—not only in France but throughout most of Europe. This new west-European independence is directly traceable to the allies' having determined that their economic interests are paramount, and that those interests dictate their moving away from a stagnating United States toward new areas of opportunity, wherever they may be found.

Still, NATO continues. It may be only an "accidental array of forces in search of a mission," as Henry Kissinger has written, but it is a living alliance all the same. And while the Europeans may slap us in the face as they seek their profits elsewhere, they are quite content to permit the United States to continue bankrolling the lion's share of their defense—a not insignificant financial burden. In fiscal 1981, for example, over $80 billion, or more than half of America's defense budget, was earmarked for NATO, and this at a time when the United States most needs to redirect its mil-

itary resources to the world's newer hot spots, like the Persian Gulf.

Every American administration has bitched that the Europeans should do more for themselves. Ronald Reagan's government is no exception, and now the administration is torn between applying the carrot or the stick. Should the United States hold its tongue in the hope that the allies can be persuaded to reverse their burgeoning friendship with the East? Or would the same result be more easily achieved by threatening a withdrawal of the 334,705 American troops in Europe?

Those arguing for an American pullback—or, rather, a redeployment elsewhere—say that the ground defense of NATO is an impossibility anyway. The East's forces are so superior numerically that they could romp across Europe at will. NATO now hopes that by 1983 it will be capable, in the best of circumstances, of holding out for 30 days, but that's all. Of course, if that were all there was to it, a war would have begun long ago. Preventing that conflict, then and now, is the belief that a conventional war would rapidly escalate into a nuclear confrontation, possibly within hours. If this is so, if a withdrawal would do little to alter the true balance of terror, why shouldn't the president threaten to pull back as a way to bend Europe to America's will? Such a move would likely drive the Europeans berserk. They view America's ground force—and its almost certain annihilation in the event of war—as the only sure guarantee that the nuclear card would be played.

Perhaps, then, a substitute could be offered. The neutron bomb.

Technologically, the neutron bomb is the most advanced way to die yet devised. A shell explodes at 2,000 feet in the air, a mini-hydrogen bomb that produces little blast. But the fusion of its "super-hydrogen" releases a stream of neutrons that penetrates an enemy's tanks. Crewmen begin to vomit, and within minutes, those close to the explosion die of shock. Others linger, only to die shortly of radiation sickness.

One would think the Europeans would welcome such a weapon, a way to offset the Warsaw Pact's enormous tank advantage, a weapon that destroys people but not property, a way to wage World War III and still leave Europe habitable. But logic means little.

In fact, the Europeans' response ("a symbol of mental perversion," says the general secretary of Helmut Schmidt's Social Democratic party) is akin to Leonid Brezhnev's. "These are inhuman weapons of mass destruction," the Soviet leader wrote Jimmy Carter on January 5, 1978—just a few months before Carter shelved development of the bomb. "Their appearance will not diminish the likelihood of nuclear conflict but enhance it." Then Brezhnev hit it, warning that America couldn't escape such a European War. "Perhaps some entertain the hope to stay on the sidelines if and when the point is reached that neutron weapons are killing Europeans," he wrote. "This calculation is illusory in substance."

Illusory or not, Brezhnev's calculations seems to have spoken for America's allies rather eloquently. The Europeans feigned cooperation with Carter but worried, and still do, that the neutrons are weapons that might actually be used. "Europe wants a theatre nuclear posture that leaves the Soviet Union with absolutely no doubt that the weapons will be used in defense of NATO," says a French observer, "and the NATO members with absolutely no worry that they will ever have to be."

More, wrote Henry Kissinger after he left office, the Europeans' "secret hope, which they never dared to articulate, was that the defense of Europe would be conducted as an intercontinental nuclear exchange over their heads; to defend their own countries, America was invited to run the very risk of nuclear devastation from which they were shying away."

What to do? The Reagan administration seems ready to proceed with the bomb. Defense Secretary Caspar Weinberger says it can restore "some kind of balance to Europe." But the Europeans don't seem to want it—and even an American critic (the House Foreign Affairs Committee) worries that deploying the bomb "could increase Soviet propensities to initiate the use of nuclear weapons if they have decided to go to war."

In Europe's view, the best deterrent may still be a credible threat of massive retaliation. "Any nuclear attack on . . . France," says President Giscard (and here he seems to be speaking for the other NATO nations as well), "calls automatically for a strategic nuclear response." Ah, as George Bush likes to say, "the French, they are so, well, so French."

And in the meantime, before the attack? Well, again, in the meantime Europe's policy seems clear—buy, sell, and deal with the Soviets across as many fronts as possible without regard to Soviet aggression elsewhere. In other words, that's America's problem and Ronald Reagan can get tough all he wants—anywhere but in Europe. And the Europeans have clearly signaled that when he does get tough, he can't count on the allies for help. Détente may be dead for America. It is alive and well in Europe. In the Europeans' view, the balance Secretary Weinberger seeks to restore doesn't need restoring at all.

"We're not going to tolerate that attitude much longer," says a national-security adviser to President Reagan. Okay, Mr. President, let's see your stuff.

LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute.)

Mr. MICHEL. Mr. Speaker, I ask for this 1 minute for the purpose of inquiring of the distinguished majority whip what the program will be for next week.

Mr. FOLEY. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Washington.

Mr. FOLEY. I appreciate the distinguished Republican leader yielding.

It is our intention that at the close of business today we would not be scheduling any more business for this week. There will be a session of the House tomorrow, pro forma. It is also our intention to request unanimous consent that when the House adjourns tomorrow, it will adjourn until Tuesday next.

Mr. MICHEL. If I might interject a question, that will be at variance with what Members were originally alerted to, no session on Friday, but we do have the assurance that it will simply be a pro forma session tomorrow in order to qualify us to go over until Tuesday, is that not correct?

Mr. FOLEY. That is exactly right. The Republican leader is exactly right. I would say, too, that we are shifting the session tomorrow for the session that was otherwise going to be pro forma on Monday, so there is not any substantive difference.

It is just, as the gentleman knows, required in order to have the House meet on the next session coming up on Tuesday.

It is also going to be my intention to request that business in order for Calendar Wednesday be dispensed with.

I think that is our current plan for the next few days.

The House will meet on Tuesday and any further business, of course, following today will be announced.

Mr. MICHEL. Is it expected that the House will be in more or less pro forma session on Wednesday and Thursday next week?

Mr. FOLEY. That is expected, but I would not at this time want to absolutely guarantee that.

Mr. MICHEL. Would the gentleman be free to conjecture on a week from tomorrow, on Friday, whether or not there would be a session?

Mr. FOLEY. I think the very great likelihood is that there will be no session on Friday next.

Mr. MICHEL. Then there would be legislation of some sort the following week, committee resolutions?

Mr. FOLEY. I think the Members should definitely plan on legislation the following week.

Mr. MICHEL. I thank the distinguished whip and yield back the balance of my time.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore (Mr. GONZALEZ). Is there objection to the request of the gentleman from Washington?

There was no objection.

ADJOURNMENT FROM FRIDAY, MARCH 13, 1981, TO TUESDAY, MARCH 17, 1981

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns on Friday, March 13, 1981, it adjourn to meet on Tuesday, March 17, 1981.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

NEEDED: SERVICE TO THE NATION

(Mr. PANETTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. PANETTA. Mr. Speaker, I am today introducing legislation in concert with Senators TSONGAS and CRANSTON which would establish a Select Commission on Voluntary Service Opportunities. The bill is a revised version of legislation (H.R. 6868) which I introduced last year, along with Congressmen MCCLOSKEY and CAVANAUGH, to establish a Presidential Commission on National Service. That bill was approved by the House Education and Labor Committee on October 2, 1980 (H. Rept. 96-1450, part 1). In addition, Senators TSONGAS and CRANSTON sponsored a similar measure last year in the Senate which passed the full Senate as an amendment to the Domestic Violence Prevention and Services Act. I am pleased to introduce this revised version today together with Congressmen FROST, BONIOR, COELHO, BEILENSON, ADDABBO, BINGHAM, MCCLORY, FAZIO, SIMON, and MCCLOSKEY. I welcome the support of all my colleagues for this important bill.

The basic purpose of the bill is to establish a Select Commission to examine the issues associated with volunteer service in America. The Commission would be comprised of 21 Members, 11 of whom would be appointed by the President, 5 of whom would be appointed by the Speaker of the House in consultation with the minority leader of the House, and 5 of whom would be appointed by the majority leader of the Senate, in consultation with the minority leader of the Senate. The Commission would issue its final report to the President and the Congress within 15 months after its first meeting, and then the President would have 90 days to assemble the recommendations of all affected executive agencies and departments and submit an interim report to each House of the Congress, detailing the desirability, feasibility, and cost of implementing each of the Commission's recommendations. Within 90 days after submitting his interim report, the President is required by my bill to transmit to each House of the Congress a final report containing a detailed statement on any actions taken to implement the recommendations of the Commission, together with any further recommendations for legislation or administrative actions. The Commission would cease to exist 180 days after transmitting its final report. Its termination would, therefore, coincide with the transmittal of the President's final report to the Congress.

I believe such a Commission is long overdue. It is needed to focus national attention on the need for public and private voluntary service, on opportunities which exist for such service, and on alternative service programs which may help the United States to meet a broad range on national and local needs. Such a Commission is needed to explore and assess alternative methods for providing the people of the United States with opportunities and incentives to provide meaningful service to the community and the Nation.

Mr. Speaker, our Nation is not moving boldly into the 1980's. We are tiptoeing sheepishly and cautiously, as if on eggshells. We step with trepidation into the new decade as if the world were a disaster waiting to happen. The world's economy has been ravaged by soaring energy costs, and political unrest, wars, and terrorism have shaken the political structure of the world. The legacy of the past decade and a half of trauma and tragedy is a bruised American spirit. We have lost our traditional sense of optimism about the future. And most of all, we seem to have lost our confidence that anything can be done about providing jobs for youth, about conserving natural resources, about protecting the environment, about rebuilding the cities, about educating our people, about providing decent services for older Americans and the handicapped, and about meeting personnel requirements in a variety of Federal, State, and local programs and agencies. These are a few of the problems that worry Americans, and yet no answers are forthcoming.

I believe part of the answer lies in rekindling the spirit and activism which settled a vast continent, which landed the first man on the Moon, which built the richest and most powerful nation on Earth. I believe we need to foster a new activism, to resurrect a service ethic, if we are to overcome our present difficulties and we need to mobilize the vast and untapped resource of voluntary service if we are to meet the challenges which lie ahead. My legislation seeks to set that process in motion.

Mr. Speaker, at a time when the new administration and the Congress are searching for ways to pare back the size and the expense of the Federal Government, I believe it is imperative to begin to explore alternative and less expensive ways to provide important services. Voluntary service represents the most viable alternative to direct Federal spending in countless areas, and it has the added benefit of contributing directly to the education and personal development of individual volunteers. Meaningful voluntary service can help our young people during that difficult transition from adolescence to adulthood, from dependence to making an independent contribution to society, from being passive members of society to taking an active share of responsibility in and for society. Voluntary service can instill in our people, both young and old, a sense of pride and self-esteem. It can provide very useful on-the-job training, equipping young people with marketable skills. In this latter case, the volunteer programs I envision could at least partially offset federally funded jobs programs, such as CETA.

As part of the Commission's inquiry, I believe it is necessary to address the adequacy of voluntary approaches to service and to consider the relative cost and benefits of other forms of service. My preference is to devise a program of voluntary service on a national scale which would derive its vitality from free choice. However, I also recognize that mandatory approaches to service have certain points in their favor, primarily the fact that all individuals would share an equal obligation. Therefore, I believe the Commission should examine all options for national service.

While more details are needed in order to assess the potential impact of policy changes, there are many promising ways to provide incentives for voluntary service by using more creatively existing Federal programs. We could, for example, restrict the availability of Federal educational assistance to those students who have satisfactorily completed a period of approved service. Alternatively, students who have performed approved service could receive educational grants, while those who have not served could only receive loans. Or, those who have served could be given loans at more favorable rates of interest than those who have not served. In addition, food stamps, CETA jobs, and unemployment benefits would be tied to service programs so that our people will get the message that service to the country is at least expected, if not required, by the Government. The point in listing these examples is not to suggest that these are the answers; it is to suggest that there are innumerable alternative approaches to providing incentives and opportunities for service and that these ideas deserve very careful attention. Again, my legislation seeks to set that process in motion.

Finally, a word about the issue of citizenship responsibility. In recent years, our young people seem to have turned progressively inward for satisfaction rather than outward toward making a positive contribution to society. My view is that we have not done enough as a Nation to impress on young people the idea that they have a responsibility to serve. The commission could contribute immeasurably to our country simply by raising that

concept in the public mind and elevating the discussion about citizenship responsibility so that people will have an opportunity to think about the idea and to provide the Commission with their thoughts. Having a national debate on the issues of service could lay the foundation for a renaissance in American life, propelled by the voluntary contributions of our people, particularly young Americans.

For the convenience of my colleagues, I have reprinted below the full text of my bill. I hope that my colleagues will join me in urging early congressional approval of this legislation.

H.R. 2500

A bill to establish a select commission to examine the issues associated with voluntary service

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Select Commission on Voluntary Service Opportunities Act of 1981".

PURPOSE

SEC. 2. It is the purpose of this Act to establish a Select Commission to examine the issues associated with voluntary service and—

(1) to focus national attention on the need for voluntary service, on opportunities which exist for such service, and on alternative types of national service programs which may help the United States to meet the broad range of national and local needs;

(2) to explore and assess alternative methods for providing the people of the United States with the incentives and opportunities to provide useful service to the community and the United States; and

(3) to provide the President, the Congress, and the people of the United States with an overview and assessment of existing opportunities for voluntary service and a series of options for alternative types of national service programs designed to help the United States deal with a number of serious challenges in the areas of youth unemployment, conservation of natural resources, protection of the environment, rebuilding the inner cities, education, providing services for older Americans and handicapped individuals, and personnel requirements in a wide variety of Federal, State, and local programs and agencies.

FINDINGS

SEC. 3. The Congress finds that—

(1) voluntary service in a variety of areas represents a vast and essentially untapped resource which can and should be utilized to meet national and local needs;

(2) greater leadership is needed on the part of the Federal Government to encourage the people of the United States to serve and to encourage State and local authorities to provide opportunities for meaningful service;

(3) useful public service is very important for the educational and personal development of young people;

(4) the United States faces numerous challenges which can be better met if we draw upon the creative energies of young people and other individuals through a program of national service; and

(5) a high-level commission is needed to make recommendations to the President and the Congress about the effectiveness of existing voluntary service programs and the costs and benefits of alternative types of national service programs.

ESTABLISHMENT

SEC. 4. There is established a select commission to be known as the Select Commission on Voluntary Service Opportunities (hereafter in this Act referred to as the "Commission").

DUTIES

SEC. 5. The Commission shall—

(1) identify existing voluntary service opportunities in the public and private sectors of the United States and assess the effectiveness of these opportunities in meeting national and local needs, in building a sense of commitment to the community and the United States, and in instilling in the volunteers a sense of accomplishment and pride;

(2) identify incentives which attract, or which are needed to attract, voluntary service in the public and private sectors of the United States;

(3) examine and assess the need for and the desirability, feasibility, and cost of expanding existing service opportunities and incentives and establishing any of the alternative types of national service programs;

(4) identify and examine alternative types of national service programs and assess the relative costs and benefits of such national service programs;

(5) examine the impact of potential changes in the incentives for service, and of various alternative types of national service programs, on existing institutions (including educational institutions, labor organizations, private and public service programs, and Federal youth, jobs, and training programs);

(6) assess the cost effectiveness of both alternative and existing voluntary service programs and the feasibility and desirability of incorporating these programs into a comprehensive national service program;

(7) examine the role of all individuals (regardless of age, sex, income, and education) in existing service programs and in the alternative types national service programs;

(8) identify the way in which existing service programs and alternative types of national service programs will provide young individuals and other participants with a sense of accomplishment and pride and an opportunity to contribute to the welfare of the society by responding to unmet needs of the community and the United States; and

(9) conduct meetings, hearings, and conferences in various regions and localities in the United States to gather the opinions of a wide variety of individuals, particularly young individuals and those individuals and groups likely to be affected by any changes in existing service programs or the establishment of a program of national service.

MEMBERSHIP

SEC. 6. (a) The Commission shall be composed of 21 members as follows:

(1) 11 members appointed by the President from among individuals who are broadly representative of private volunteer organizations, secondary and higher education, business, organized labor, the military, social service and civil liberty organizations, minority group and ethnic organizations, Federal, State, and local governments, and groups with a primary interest in service opportunities for youth, handicapped individuals, and older Americans, of which not less than 3 of the members appointed by the President shall be individuals who are not less than 17 years of age and not more than 25 years of age on the date of their appointment to the Commission.

(2) 5 members appointed by the Speaker of the House of Representative in consultation with the minority leader of the House, of which 2 shall be Members of the House of Representatives and one shall be an individual who is not less than 17 years of age and not more than 25 years of age on the date of the individual's appointment to the Commission.

(3) 5 members appointed by the majority leader of the Senate in consultation with the minority leader of the Senate, of which 2 shall be Senators and one shall be an individual who is not less than 17 years of age and not more than 25 years of age on the date of the individual's appointment to the Commission.

(b) If any member of the Commission who was appointed to the Commission as a Member of the Congress leaves that office, he may continue as a member of the Commission until his successor is appointed.

(c) A vacancy in the Commission shall be filled in the manner in which the original appointment was made.

(d) Members of the Commission shall be appointed for the life of the Commission.

(e)(1) Except as provided in paragraph (2), members of the Commission shall each be paid at a rate equal to the daily equivalent of the maximum annual rate of basic pay in effect for grade GS-18 of the General Schedule for each day (including travel time) during which they are engaged in the actual performance of the duties of the Commission.

(2) Members of the Commission who are officers or employees of the United States or Members of the Congress shall receive no additional pay, allowances, or benefits by reason of their service on the Commission.

(f) 11 members of the Commission shall constitute a quorum but a lesser number may hold hearings.

(g) Not later than 45 days after the effective date of this Act, the President shall designate the Chairman of the Commission from among those individuals appointed by the President under subsection (a)(1).

(h) The first meeting of the Commission shall be held not later than 60 days after the designation of the Chairman under subsection (g). The Commission shall meet at least once each 3 months after its first meeting. The date and time of all meetings of the Commission shall be at the call of the Chairman or a majority of its members.

EXECUTIVE DIRECTOR AND STAFF

SEC. 7. (a) The Commission shall have an Executive Director who shall be appointed by the Chairman of the Commission and who shall be paid at a rate not to exceed the maximum rate of basic pay payable for GS-18 of the General Schedule.

(b) Subject to such rules as may be prescribed by the Commission, the Chairman of the Commission may appoint and fix the pay, at a rate not to exceed the maximum rate of basic pay payable for GS-18 of the General Schedule, of such additional personnel as the Chairman considers appropriate.

(c) The Executive Director and staff of the Commission may be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General

Schedule pay rates, except that no individual so appointed may receive pay in excess of the annual rate of basic pay payable for GS-18 of the General Schedule.

(d) Subject to such rules as may be prescribed by the Commission, the Chairman of the Commission may procure temporary and intermittent services under section 3109(b) of title 5 of the United States Code, but at rates for individuals not to exceed the daily equivalent of the maximum annual rate of basic pay payable for GS-18 of the General Schedule.

(e) Upon request of the Commission, the head of any Federal agency is authorized to detail, on a reimbursable basis, any of the personnel of such agency to the Commission to assist the Commission in carrying out its duties under this Act.

POWERS

SEC. 8. (a) The Commission may, for the purpose of carrying out this Act, hold such hearings and conferences, sit and act at such times and places, take such testimony, and receive such evidence, as the Commission considers appropriate.

(b) Any member or agent of the Commission may, if so authorized by the Commission, take any action which the Commission is authorized to take by this section.

(c) The Commission may secure directly from any department or agency of the United States information necessary to enable it to carry out this Act. Upon request of the Chairman of the Commission, the head of such department or agency shall furnish such information to the Commission.

(d) The Commission may accept, use, and dispose of gifts or donations of services or property.

(e) The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(f) The Administrator of General Services shall provide to the Commission on a reimbursable basis such administrative support services as the Commission may request.

(g) The Commission through its Chairman may enter into any contract which the Commission deems is necessary.

REPORTS

SEC. 9. (a) The Commission may transmit to the President and to each House of the Congress such interim reports as it considers appropriate and shall transmit a final report to the President and to each House of the Congress not later than 15 months after the first meeting of the Commission is held pursuant to section 6(h). The final report shall contain a detailed statement of the findings and conclusions of the Commission, together with its recommendations for such legislation and administrative actions as it considers appropriate.

(b)(1) After the final report is transmitted to the President and each House of Congress pursuant to subsection (a) each executive department and agency affected by the final report, as determined by the President, shall submit to the President recommendations for implementing the final report.

(2) Not later than 90 days after the final report is transmitted by the Commission to each House of the Congress pursuant to subsection (a) the President shall transmit to each House of the Congress an interim report containing a detailed statement on—

(A) the desirability, feasibility, and cost of implementing each of the Commission's recommendations, and the actions taken or planned with respect to the implementation; and

(B) recommendations with respect to any legislation proposed by the Commission and the need for any alternative or additional legislation to implement the Commission's recommendations.

(3) Not later than 90 days after the interim report is transmitted to each House of the Congress pursuant to paragraph (2) the President shall transmit to each House of the Congress a final report containing a detailed statement on any actions taken to implement the recommendations of the Commission, together with any further recommendations for legislation or administrative actions.

TERMINATION

SEC. 10. The commission shall cease to exist 180 days after its final report is transmitted to the President and each House of the Congress pursuant to section 9(a).

AUTHORIZATION OF APPROPRIATIONS

SEC. 11. There is authorized to be appropriated for the fiscal year ending on September 30, 1982, the sum of $3,100,000 to carry out this Act. Any sums appropriated under the authorization contained in this section shall remain available until expended.

EFFECTIVE DATE

SEC. 12. This Act shall take effect on October 1, 1981.

GENERAL LEAVE

Mr. LUNGREN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of the special order of the gentleman from Vermont (Mr. JEFFORDS) today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. BEDELL. Mr. Speaker, I ask unanimous consent to take my special order for today out of order and speak first.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

UNREASONABLE DOT REGULATIONS FOR THE HANDICAPPED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. BEDELL) is recognized for 5 minutes.

Mr. BEDELL. Mr. Speaker, one message that came through from the electorate in the last election was the demand that unnecessary and unreasonable regulations and requirements from Washington be curtailed. One example of these unreasonable regulations by the Federal bureaucracy has occurred in one of the cities in my district, Sioux City, Iowa.

Sioux City has a program of transportation for the handicapped in which a local firm provides door-to-door transportation for the handicapped. Because of our cold icy weather during the winter and the hilly terrain in cities like Sioux City, this service is much better for both the handicapped and the city than the service which would be required under Federal mandate to the city to install chair lifts on all city buses.

During the past administration, I escorted one of the Department of Transportation executives to Sioux City where representatives of the city government and the handicapped pointed out to him the folly of the Federal Government mandating that lifts be placed on city buses which would bring about the elimination of the present service, which is greatly preferred by all parties affected. DOT refused to change its position.

Mr. Speaker, in the last Congress, with frustration all across the land with the inflexibility at DOT, the House passed legislation mandating sufficient flexibility so that local communities and the handicapped could work together to best serve the needs of the handicapped without the Federal Government imposing unreasonable requirements which prevent such cooperation.

□ 1230

Unfortunately, adjournment came before the Senate was able to pass this legislation.

I am, therefore, introducing today legislation which is, for all intents and purposes, the same as the legislation which passed this House in the last session.

Specifically, my bill would allow local areas to pursue locally adopted alternative approaches for meeting the transportation needs of the handicapped. These programs must be approved by the Secretary of Transportation if they are: First, developed in consultation with members of the local handicapped community and elected local officials; second, serve the same areas and charge fares no greater than those charged the general public; and third, provide service within 24 hours in the first 2 years and within 6 hours in 4 years. In addition, congressional oversight is provided to insure that implementation is in accord with congressional intent and purpose. The legislation specifies that the regulations issued to carry out this requirement be held to an absolute minimum.

Mr. Speaker, it is time that we get the Federal Government off the backs of our citizenry and it is time to realize that these problems can best be worked out at the local level rather than at some desk in Washington. I urge my colleagues to support this legislation and start to get the Federal bureaucracy off the backs of the people, including the handicapped, who already have enough difficulty

without the Federal bureaucracy adding to their burdens.

HUMAN RIGHTS FOR NORTHERN IRELAND

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. GILMAN) is recognized for 60 minutes.

Mr. GILMAN. Mr. Speaker, on St. Patrick's Day, Americans will revel in the annual rituals of celebration, parades, and the singing of Irish ballads, and many of us will have occasion to commemorate the sacrifices and contributions of one of America's most generous ethnic groups, the Irish. And yet, on the other side of the ocean, in small towns and in the large city of Belfast, the north of Ireland smolders like a bomb: ready to detonate at the slightest provocation, ready to explode in a warlike fury.

The truth is that Northern Ireland has been in a state of war for years. During the last decade, we have witnessed the atmosphere in that land becoming more inflammatory with the passing days. The issues have been obliterated, and the catch-all phrase of "religious conflict" has been pinned on this tragedy as though such a phrase was sufficient to explain the ferocity of the turmoil, and the underlying reasons for the continuing struggle.

But no phrase could be further from the truth, less accurate than a "religious war." The struggle in the north of Ireland is no longer a religious war, if it ever was one; religions were pitted against each other in a political strategy by Great Britain to insure that they would have a majority of votes and support when the north was arbitrarily sectioned off.

To this day we are told by media, propagandists and the British that the war is religious—probably by way of minimizing its importance, by way of reducing its complexity—like characterizing the conflict in the Middle East as simply a religious issue. Both conflicts are similar in that the issues transcend religion and cut deeply into political, moral, and economic concerns.

As a Member of the House Committee on Foreign Affairs, and the ad hoc congressional Committee on Irish Affairs chaired by my esteemed colleague, the gentleman from New York (Mr. BIAGGI), I have had the opportunity to observe firsthand how our Nation's policy toward Northern Ireland differs from our policies toward other nations, and how, despite the best efforts to the contrary, Great Britain cannot be persuaded to allow the Irish to determine their future.

And distressingly enough, I have seen how the United States, through a program of economic subsidies to American corporations locating in Northern Ireland abets the continuation of violence and deprivation by encouraging them to locate in the British-Protestant sections of the north. This leaves the Catholic minority with few, if any, American jobs, little chance of advancement, poor educational and housing prospects, and a truly bleak future. Many American corporations are unaware of the fact that they are helping to foster the discrimination against the Catholic minority, and are unaware of the need to change their policies to rectify the situation.

I have requested that congressional hearings be held on this matter and that we examine the full extent of American involvement in the perpetration of discrimination in Northern Ireland.

Mr. Speaker, for the record I am inserting in the RECORD two newspaper articles which point up some of the most critical economic and discriminatory problems that are confronting Northern Ireland. One points to the injustices in the system used by the British to hire for positions in the North, and the other pertains to the severe economic crises facing Ulster.

[From the Irish People, Oct. 6, 1979]

NO COMPLAINTS UPHELD

One section of the Fair Employment Agency report is entitled "Investigation of Complaints." In the Agency's history findings have been made in twelve cases. (This gives some indication of the pitiful power of the agency's machinery or willingness to rectify discrimination.)

The Agency has numerous excuses: "The Agency has found, as it anticipated, that there is a considerable reluctance among members of the public to make complaints even when they feel they have suffered from unlawful discrimination . . .

"In certain districts people consider it would do them harm if it became known they had made a complaint. White collar employees, despite legislative provision outlawing victimization, worry in case making a complaint would be detrimental to their future employment and promotional prospects. Others believe, quite understandably, that discrimination is so difficult to prove, that there is no point in making a complaint."

Others of course do not wish to unnecessarily become involved with a British government body.

Some of the complaints the report explains away as (Catholic) fears over discrimination: "It must also be said that employers' past practices or present reputation frequently gave a complainant reason for making a complaint."

Also, "In three cases certificates were signed by Ministers of the Northern Ireland Office certifying, under Section 42 of the Act, that the act complained of were done to safeguard national security or to protect public order. In these circumstances the investigation must cease."

This provision—Section 42 of the Fair Employment Act—allows the British government to discriminate against those whom it considers politically objectionable.

In one case which came to the notice of the Fair Employment Agency, the Department of Environment turned down a job applicant (a Catholic) because of "some doubt about his security standing", appointed a Protestant, and then lied to the agency about the reason for the original non-appointment.

THE DORIS CASE

Out of all the complaints made in one case only did the agency make a finding that unlawful discrimination had occurred.

In 1977 Miss Susanna Doris, a twenty-three-year-old Catholic, complained that she had been discriminated against in the selection of a clerk in the Petty Sessions Office, Cookstown, on religious and political grounds (that her brother James was a former president of NICRA).

The qualifications demanded were five 'O' Levels and an ability to type (she had seven 'O' Levels, two 'A' Levels, a degree, a typing certificate and previous clerical experience). A seventeen-year-old Protestant girl got the job instead.

The two-man selection committee, Mr. Pollock (the Clerk of Cookstown Petty Sessions) and Mr. Rainey (the manager in the local social security office), denied discrimination, denied knowledge of the activities of her brother and denied knowledge of her religion. (All this ignorance despite the fact that her sister was employed at Mr. Rainey's social security office and her application form included the revealing information that she went to St. Joseph's school.)

The agency believed that unlawful discrimination had occurred and stated that Mr. Rainey was acquainted with her family background. "He specifically brought this matter to the attention of the other panel members at the conclusion of the Board."

Mr. Rainey stated that the reason why he thought Miss Doris was unsuitable for the job was that she was over-qualified! He stated that he was, in fact, doing her a favour by not selecting her and "it would have been a dis-service to appoint her."

Apparently this was the sole reason he did not favour her appointment. (Unlike his colleague he had no quarrel with her personality at all.)

Mr. Pollock argued that "over-qualification had not been a factor as far as he was concerned." He had found her "aggressive" and "abrasive" and therefore "totally unsuitable". (The agency remarks rather strangely at this point: "We are particularly conscious that for some people the personality of a member of another religious group can make an adverse impression on them.")

The civil service commission (responsible for the selection panel and the job appointment) appealed to the county court against the agency's finding of discrimination.

No better an Orangeman could have been found to sit in judgment. Former Stormont Minister of Home Affairs, Judge Topping, threw the discrimination case out.

"I found," he claimed, "the evidence of both Mr. Pollock and Mr. Rainey truthful and convincing. In particular I found Mr. Rainey a most helpful witness . . . I cannot help feeling that if there had ever been a breath of suspicion against his methods it would have been fully ventilated . . . The question then is did Mr. Pollock himself discriminate against Miss Doris. I think he was entitled to pay particular regard to her possible attitude to the public . . . I find it impossible to hold on the balance of probability that he discriminated against Miss Doris either on political or religious grounds . . . the Agency was unduly anxious to find discrimination."

Thus did the agency's one case of discrimination disappear.

[From the Christian Science Monitor, Nov. 6, 1980]

ULSTER ECONOMIC IMPROVEMENT SAID TO BE STILL A YEAR AWAY

(By Alf McCreary)

Ulster's bleak unemployment level, which is already twice that of Great Britain, may not improve until at least 1982, according to the Northern Ireland Economic Council.

In its annual report the council says that unemployment could top 100,000 by next July. Sir Charles Carter, chairman of the council, said: "The prospects for 1980-81 are deeply worrying."

The present figure of nearly 90,000 represents an unemployment rate of 15.6 percent. In the first 10 months of this year alone over 10,000 jobs have been lost.

One of the biggest blows recently was the announcement (Oct. 14) by the British industrial giant ICI that its plant at Kilroot, north of Belfast, was to close with the loss of 1,160 jobs. The company's decision was part of a restructuring program throughout its United Kingdom plants, where a total of 4,000 jobs will be lost. But Kilroot and another plant in West Scotland are the only two to be closed completely in a bid to stem the loss which ICI says has amounted to £38 million in the last six months.

This has been brought about by various factors including a world overcapacity in synthetic fibers production, escalating material and energy costs. U.S. imports, a high exchange rate, and high domestic inflation. The Kilroot redundancies have created despair in the nearest town of Carrickfergus which, ironically, is celebrating this year the 800th anniversary of its founding.

In the 1960s Carrickfergus was a "boom town," benefiting from the synthetic fiber industry centered on ICI and another major producer, Courtaulds. But over the past two years cutbacks and closures have led to more than 3,000 layoffs.

One of the more worrying aspects of the downward spiral is the way in which the larger companies have found themselves in difficulty. In early summer, the West German Grundig Company announced the closure of its factory at Dunmurry, south of Belfast, with the loss of 1,000 jobs. In September the American-based Du Pont company closed its Orlan plant at Londonderry and another 420 jobs were lost. The Belfast shipyard of Harland & Wolff, once the proud flagship of Ulster's engineering industry, has reduced its labor force by 1,000 in the past two years because of the decline in the world demand for shipping.

Equally worrying for Ulster is the loss of jobs in small firms. These are not as spectacular as the closure of a large multinational plant, but they add steadily to the numbers in the unemployment queue. The textile, linen, and shirt industries have been badly hit; and in one day in July three textile firms closed with the loss of 250 jobs.

The jobs crisis is now so bad that politicians and union leaders from the Roman Catholic and protestant communities have been trying to find some common ground from which to ameliorate the consequences. Prime Minister Margaret Thatcher has made it clear that she does not intend to do a U-turn in her economic policy, and high interest rates plus a strong pound sterling are likely to continue for the foreseeable future.

In Britain, the unemployment rate continues to rise. Usually the job situation then gets even worse in Northern Ireland, British politicians will argue rightly that Northern Ireland is already receiving preferential treatment economically within the U.K. But even if Britain's economy improves markedly, this in itself will not bring a dramatic upturn in Northern Ireland's fortunes. If there is to be any improvement in Northern Ireland's chronic unemployment figures even by 1982, extra-special measures will be required from the British on top of the help being given already.

Mr. Speaker, over the past few years, Americans have brought to world attention the need for a better focus on the problems of the Irish. The large number of Irish Americans in this Nation have pleaded with the U.S. Government to do or say something about the plight of the Irish in Ulster. But President Carter refused to go on public record on this issue, and we have had to content ourselves with the view that this is an uphill battle—one that will be hard fought and well worth the rewards. The Committee on Irish Affairs, and its chairman, Mr. BIAGGI, have worked tirelessly to bring this issue to the forefront of public and foreign relations discussions. And we have brought about some worthy accomplishments over the past years including the ban on the sale of American weapons to the Royal Ulster Constabulary (RUC) for use against the minority in the North. I was pleased that the President has agreed to continue this ban.

And our discussions on the peace forum to bring together elements from all sides of this continuing tragedy met with enthusiasm on all fronts. I am still very supportive of the idea of an early peace forum to allow discussions on the divergent points of view which continue to complicate the issue of the unification of the Irish State.

And while our committee has had some input into the concern for peace in Northern Ireland, we are still a long way off—and we must work together to accomplish our task. I am distressed to learn that the judicial system in Northern Ireland—notoriously unfair and coercive since the early Stormont days—has once again come under criticism since it has been learned that the British are now convicting suspects on the evidence of oral testimony alone. This is reprehensible to a nation which values so highly our own British-based judicial system, and I hope that we will soon see the abandonment of such coercive techniques.

The matter of Northern Ireland is far from resolved: 800 years of bloodshed, suffering, and injustice are unfortunately continuing this very day, scarring the children of that nation, bringing to bear thousands of family sufferings and personal tragedies. The hunger strike on the H-block last year, and renewed this year, with prisoners striving to attain political status, should not have to occur. We should be given the opportunity to work in concert with the British and the Irish to affect a long-term solution to this problem, as we did in the Middle East. And our role in this issue should not be minimized even though the British Government prefers that we not become involved.

Not only on St. Patrick's Day, but throughout the year, we should work toward the resolution of this heartbreaking issue. I urge my colleagues to remember our Irish brothers and sisters across the sea who have not been able to live in peace, and for whose children peace has been only a far-off dream.

● Mr. BIAGGI. Mr. Speaker, as chairman of the bipartisan, 122-member ad hoc congressional Committee for Irish Affairs, I am pleased to participate in our committee's special order on Northern Ireland.

On Tuesday all the eyes of the world will focus on the people of Ireland and on friends of Ireland around the world for March 17 is indeed St. Patrick's Day. Yet, one must temper the celebration when the situation affecting the six counties of Northern Ireland is considered.

One longs for the day when St. Patrick's Day will be celebrated against the backdrop of peace and freedom for Northern Ireland. It is to advance this goal that the ad hoc congressional Committee for Irish Affairs exists. It was established in September 1977 at the direct request of the Ancient Order of Hibernians—this Nation's oldest and largest Irish American organization. In our 3½-year history, we have succeeded in raising the entire Irish question from a position of relative obscurity to one which now commands national and internationl attention. We have made it an American issue.

As we evaluate the Irish situation in the year 1981, we see signs of hope and others which reflect a continuing stalemate. Prime Minister Thatcher is to be commended—and in fact I did so when I had the opportunity to meet her while she was in Washington, for the initiatives she has undertaken on behalf of peace in Ireland. Especially important have been her meetings with Ireland's Prime Minister Haughey. However, these talks have predictably failed because they have not advanced to involve other parties. I reiterate my position that Britain should embark on a peace initiative which involves all segments of political thought in Ireland.

The issue of peace in Northern Ireland enjoys bipartisan support in the Congress as evidenced by the makeup of the ad hoc committee. However, I am pleased to report that this spirit has been adopted by the Reagan administration. Immediately prior to President Reagan's meetings with British Prime Minister Thatcher, I

and 35 of my colleagues on the ad hoc committee contacted the President to urge that no change be made in U.S. policy which for 19 months has barred the sale or shipment of U.S. arms to the Royal Ulster Constabulary, the main police force in Northern Ireland.

In a March 5 letter Presidential Assistant Max L. Friedersdorf said:

> Please know that the President shares your concerns toward the achievement of a peaceful political solution in Northern Ireland. As the situation now stands, the Administration is holding to the policy of not approving licensing for sale of handguns to the RUC.

I commend the President for his significant and positive action. It is vital that this Nation take the lead in opposing all violence in Northern Ireland whether it be official or civilian. Our position against sending arms to the RUC is rooted in this principle—the Royal Ulster Constabulary has been cited on numerous occasions by such respected international organizations as the European Commission and Court of Human Rights, Amnesty International, and the British-appointed Bennett Commission for violating the human rights of prisoners and prison suspects under their control. Section 502(b) of the Foreign Assistance Act bars the sale or export of any U.S. weapons to nations or organizations with proven records of human rights violations. In January 1979, our State Department approved the sale of 3,500 rifles to the RUC—in conflict with the law. Thus, in July 1979, I offered an amendment to avert the future sale. This amendment led to the August 1979 decision by the State Department to impose an embargo on future sales. The Reagan administration letter confirms that position.

I extend to all of my colleagues a happy St. Patrick's Day and I hope that peace and freedom for Ireland can become a reality in the very near future.●

● Mr. LOWRY of Washington. Mr. Speaker, I join my colleagues in the Ad Hoc Congressional Committee for Irish Affairs today in support of a just and peaceful resolution of the conflict in Northern Ireland.

We are privileged to live in the greatest nation in the world. Our greatness lies in our commitment to the principles of liberty and human rights, which have made America an ideal for the rest of the world.

Our hearts reach out in anguish to Northern Ireland, where we see the same love of liberty caught up in the agony of violence and destruction.

We can try to explain the tragedy of Northern Ireland in many ways: religious, economic, historical, cultural. We can propose different solutions to this problem, and we can sympathize deeply with those who are suffering.

But if you are the victim of terror, it makes no difference whether you are Catholic or Protestant, rich or poor, or when your ancestors came to Northern Ireland. Even justice has no meaning when mothers and fathers are shot down in front of their children, and mercy has none when old men are murdered in their homes.

Without an end to this destruction, not even hope can survive. There is nothing more to be said: the violence must stop.●

● Mr. DORNAN of California. Mr. Speaker, I yield to no Member of this House in my desire to maintain and strengthen cordial relations with our NATO allies. At no time in the history of the Atlantic Alliance is the need for allied cooperation greater, especally cooperation with Great Britain. With the Soviet drive into Afghanistan and the continuing crisis in Poland, it is clear that the Western Nations must be politically united. It is with great reluctance, therefore, that I raise the issue of the current arms sales restrictions to the Royal Ulster Constabulary in Northern Ireland.

Mr. Speaker, I was glad to learn on March 5, 1981, that President Reagan has not seen fit to change U.S. policy on this delicate and difficult question. No Member of this House is unfamiliar with the long, traffic, and bloody history of English-Irish relations. The roots of the current conflict in Northern Ireland are very deep indeed; and no simple explanation in terms of religious difference, economic inequities, or social discrimination can suffice. As a broadcast journalist, I had the opportunity to visit Northern Ireland. In fact, I covered the unfolding tragedy in Northern Ireland four times. My most vivid memories go back to "Bloody Sunday," January 30, 1972. I was shot in the back with a British "rubber bullet"—a projectile 5 inches long and as hard as a rock. So, I think it is fair to say that I can speak with some authority on the nature of the current disorders.

I understand very well the problems confronting British Prime Minister Thatcher. The Irish Republican Army of 1981 is not the Irish Republican Army of 1916. The great and fearless leaders of the 1916 rebellion, who challenged the British Army, would be shocked by the outright acts of terrorism unleashed against innocent civilians in the name of political independenee and social justice. There is a real distinction between the conduct of irregular warfare against military opponents, and the acts of terrorism perpetrated against noncombants. There is, in other words, a real distinction between a patriot and a criminal; and the "Irish Republican Army" is, in the main, a band of criminals. I do not think there is any need to belabor the point. Terrorism or violence, from whatever quarter, for whatever reason, is worthy of the moral opprobrium of all civilized men and women, whatever their political or religious convictions.

With that said, I think we must learn to disabuse ourselves of the notion that all of the so-called peacekeeping forces in Northern Ireland are morally neutral defenders of law and order. I am not now referring to the British Army. I would call the attention of the House to the fact that, in every interview I had with enlisted Welsh, Scottish, and English soldiers assigned to duty in Northern Ireland, the general theme of their statements was always the same: "We don't want to be here. This is our Vietnam." The role of the British Army is a matter of another extended discussion. I am referring to the Royal Ulster Constabulary (the RUC).

I have little confidence that the RUC is an agency of disinterested justice. There have been serious allegations from many reputable sources, including the European Court of Human Rights, the European Commission on Human Rights, and Amnesty International, that this force is guilty of inhuman and degrading treatment of suspects. The British rule in Northern Ireland, whatever independent sentiments one may harbor about the legitimacy of that rule or the rightfulness of the British connection, has been unquestionably marred by serious human rights violations, including the use of torture against internees. Moreover, the British Government has, in fact, acknowledged such violations in the conduct of its own investigations into charges of brutality in Ulster. And while the British Government claims that it is no longer culpable of human rights violations, reports of such violations still surface with an unhappy frequency.

Current State Department policy is in accordance with U.S. law on the conditions for arms sales. It may very well be that the general law itself should be reviewed. But its application in Northern Ireland should be reviewed only after extensive hearings into the conditions in Northern Ireland. I would hope that the House Foreign Affairs Committee, on which I serve, could address this issue in an exhaustive fashion. In the meantime, whatever the United States might or could contribute to resolving the extremely difficult problems of Northern Ireland, certainly that contribution should include the shipment of additional weapons.

Mr. Speaker, as a strong supporter of President Reagan's foreign policy initiatives, I am heartened by the President's determination to support cooperative efforts to achieve a peaceful political solution to the tragic divisions in that unfortunate country—his ancestral homeland and mine.●

● Ms. FERRARO. Mr. Speaker, as you know, St. Patrick's Day is just 5 days

away. It would be presumptuous for a Ferraro to remind an O'Neill that this is a national holiday for the Irish people, a day of religious worship, a time of festivity. Unfortunately, for the people of the north of Ireland, it is not a time of peace.

Violence and terrorism are common occurrences in Northern Ireland. This terrorism is on both sides and is leaving scores of men, women, and children dead. As an attorney and a Member of Congress, I find terrorism appalling. This type of violence is particularly abhorrent. This violence prolongs suffering. This violence destroys the innocent. As Members of Congress, we should appeal to the people of Northern Ireland—Protestants and Catholics alike—to help end these senseless killings.

Exactly when all the troubles in Ireland began, no one really knows. I am certain, however, it is a result of the Irish having an alien government on their soil. The pages of history record the cruelty and persecution these noble people have suffered. This foreign occupation of Irish soil has made life virtually impossible for millions of Irish. In Northern Ireland alone, thousands of men and women have suffered gross violations of human rights. Many of these people saw the British Army entering their homes night after night, insulting the women with foul and degrading language, tearing down pictures from their walls, and making a mockery of their religion. They were personally searched, and tortured. Many had to suffer the full vigor of emergency laws, ill treatment, and unjust and unwarranted sentences. For many of these men and women their only crime was that of being born with Irish names.

The time has come for the British to give the Irish people, as a whole, the right of self-determination. Let England do what is morally right in Ireland—terminate its occupation and permit the Irish people to choose their own national destiny.

I hope and pray that the time will come when all the Irish people can live in peace and unity. I, therefore, ask my colleagues to pledge themselves toward the attainment of peace and justice in Ireland.●

● Mr. LENT. Mr. Speaker, it is an honor to participate in this effort to focus the attention of our Nation on the continuing tragedy of Northern Ireland. As a Member of Congress who has been strongly interested and active in the cause of human rights, I have been dismayed by the lack of attention being paid to the dire situation in Northern Ireland.

For more than a decade now, Northern Ireland has been subjected to the direct rule of Great Britain, in which human and civil rights have been violated. Hundreds of persons have died in violent incidents in Northern Ireland in that span of years.

The Ad Hoc Congressional Committee for Irish Affairs, of which I am a member, has firmly opposed all violence—civil or official—in Northern Ireland, and has worked diligently to try to restore peace to this unfortunate land.

Our efforts are directed toward increasing the visibility of the Northern Ireland issue in the United States. We are confident that a fair and peaceful solution to the problems of Northern Ireland is attainable. But it is essential that the U.S. Government become more active in seeking this fair and peaceful solution. The United States could exert considerable influence over the situation there, if the effort would be made. I urge the State Department and President Reagan to give full attention to this vital matter. Our country's traditional ties of friendship with the peoples of Ireland and Great Britain have worked to the great benefit of all three nations. Those ties could grow even stronger and closer if the United States could be successful in guiding Great Britain and Northern Ireland to a peaceful solution of their difficulties.

Mr. Speaker, I trust that the remarks of those of us joining in this special order today will assist in insuring that the United States will play a more active role in efforts to achieve peace in Northern Ireland.

The unhappy people of that divided land need all the help we can give them.●

● Mr. ZEFERETTI. Mr. Speaker, I join my colleagues in focusing congressional attention on the continuing struggle in the north of Ireland.

After centuries of British rule and after 11 years of British military occupation in those six counties of Ulster, the minority Catholic population remains the victim of civil and human rights violations. Officials of Great Britain have tried to convinced the world that their hard-line approach in the north is paying off. Yet the violence that has claimed more than 2,000 lives continues daily. British policy over the past decade, designed to crush the paramilitaries at all costs, has only led to a further polarization of the two communities. In the process, civil liberties that are the basis of any true democracy are severely restricted in Ulster.

In short, British policy has failed miserably in controlling the violence and in insuring the rights of Ulster's nationalist population. It is clear that London's effort to impose a military solution to a political problem is not the answer to the Ulster tragedy. While I remain adamantly opposed to all forms of violence as a means of achieving political change, it is obvious that the violence perpetrated by both factions in Ulster will not abate until the underlying political inequities that exist are corrected.

Earlier this week, I introduced a concurrent resolution, House Concurrent Resolution 89, recognizing the right of all of the people of Ireland, including the six counties known as Northern Ireland, to control their own political destiny. This measure is an expression of the American people's sincerity in pursuing a just and lasting peace for all of Ireland. It is the duty and responsibility of the U.S. Government to use its influence in seeking that peace.

The people of Ireland must be given the opportunity to pursue their own political destiny. In the words of the immortal Patrick Pearse, "Ireland unfree shall never be at peace."●

● Mr. McGRATH. Mr. Speaker, I rise to join my colleagues today in protest over the dreadful conditions which have been imposed on the people of Northern Ireland. As we approach St. Patrick's Day when many Americans join in celebration of their Irish heritage and observe proud Irish traditions, we should renew the call for a concerted effort by the British Government to seek a peaceful solution to the problems which have plagued Northern Ireland for decades.

A major step in this direction would be the restoration of civil rights such as jury trials and humane treatment of prisoners. The disregard for human rights can only lead to further violence, grief, and suffering for the people of Northern Ireland. We must urge President Reagan and officials of our State Department to continue the ban on arms sales to the Royal Ulster Constabulary which has repeatedly been cited for human rights violations by various international organizations and the European Commission and Court of Human Rights. This action will serve notice on British officials of our continued concern over the killings, bombings, and other acts of terror which have taken place.

True freedom and peace which we enjoy as Americans remain a dream for families in Northern Ireland who have been subjected to the constant threat of terrorism and many grave injustices. As the representative of thousands of Irish Americans in New York's Fifth Congressional District, I urge the Members of this body to join me in insisting on stronger action by the British Government to seek peace and observe human rights in Northern Ireland.●

● Mr. CARNEY. Mr. Speaker, with St. Patrick's Day quickly approaching, it is a good time for all Americans to reflect upon the tragic situation in Northern Ireland. Discrimination against much of the population continues in the areas of housing, employment, education, and the judicial system.

The British Government maintains a force of over 10,000 troops in the north of Ireland whose purpose is to keep peace. Even the most casual observer can see that this is not being done.

It is time for the British Government to realize that its presence in Northern Ireland unfortunately contributes to the terrorism. It does not prevent it. Certainly, the commitment to the presence of such a large military force has a financial impact and perhaps affects their ability to meet military commitments such as those to NATO.

On Tuesday, March 17, I ask all Americans to pray for peace, freedom, and justice for Northern Ireland.●

● Mr. VENTO. Mr. Speaker, this Tuesday, March 17, Americans of Irish and near Irish descent will be celebrating St. Patrick's Day with food, song, and drink. But while we are celebrating with parades and parties, the citizens of Northern Ireland will be celebrating another year of violence and fear.

When I first became a Member of this body in 1977, one of my first floor statements was to decry the violence in Northern Ireland and to urge a just settlement to that conflict. It is now 4 years later and no change has occurred in that country—except, perhaps, more senseless killings.

How long must this violence continue? The United States cannot continue to ignore the problems of Northern Ireland. Only the just and equitable treatment of all Northern Ireland's citizens will bring about a peaceful solution to this conflict.

The new administration now possesses an excellent opportunity to push for a resolution to that conflict. Using our close relationship with Great Britian, President Reagan can and should try to influence Britain's Northern Ireland policy. Our Nation must actively seek humane treatment for Northern Ireland's prisoners and a policy of basic equality for all Northern Ireland's citizens.

All to often our Nation's foreign policy is based on treating the symptoms of a disease rather than its causes. We would be better served seeking to resolve the causes of an oppressed group's complaints rather than supporting policies to maintain that oppression. We now have an opportunity to address that basic cause of that conflict in Northern Ireland. I urge the President to take that step.●

GENERAL LEAVE

Mr. GILMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

THE BEVERAGE CONTAINER REUSE AND RECYCLING ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Vermont (Mr. JEFFORDS) is recognized for 10 minutes.

● Mr. JEFFORDS. Mr. Speaker, today I am introducing along with 38 of my colleagues the Beverage Container Reuse and Recycling Act. Senators HATFIELD and PACKWOOD are introducing an identical measure in the other body. This uniform deposit legislation would create a system that is one of the most thoroughly studied public policy issue that Congress has ever considered. A partial list of those who have performed studies on this issue includes the General Accounting Office, the Environmental Protection Agency, the Resource Conservation Committee, and the Federal Energy Administration. At the State level we have reports from Oregon, Vermont, Maine, Michigan, Indiana, North Carolina, Massachusetts, New York, Connecticut, and others. By and large, they all draw the same conclusions—that deposit legislation would reduce litter and solid waste, conserve significant amounts of energy and material resources, save consumers money, stimulate recycling, and create a substantial number of new jobs. All of this can be accomplished with no cost to the taxpayer and with little Government activity.

Nevertheless, I recognize that practical experience with any proposal or policy is the key to determining its suitability as a national program. We have long experience in my State of Vermont and in Oregon with this system. For many years, critics have claimed that while the system may work in small States, it is not feasible in large, urban areas. In the last 5 years, Maine, Connecticut, Michigan, and Iowa have implemented deposit laws and now these claims can be put to rest.

In Michigan, long considered to be a crucial State for testing the feasibility of a national law, some initial problems have been overcome and the system has been widely deemed a success. A larger proportion of voters currently approve of the law than when the referendum passed in 1976. In Connecticut, another key State where the law has been in effect for a little over a year, positive results are beginning to be documented. Governor O'Neil, once an opponent of the bill, has now labeled it beneficial and called for a repeal of the State's litter tax. The legislature promptly complied.

Mr. Speaker, I do not claim that the deposit law is a cure-all for the problems I mentioned above. But it is a partial approach that is fully compatible with others. Beverage containers comprise 40 to 60 percent of a litter stream that is increasingly expensive to clean up. The new report by the General Accounting Office indicates that a national law would reduce beverage container litter by at least 80 percent. In Vermont, in a survey taken immediately after the law's implementation, total litter had been reduced by 35 percent. Since that time, return rates for containers have gone from about 83 to 95 percent, so this total litter has probably decreased even further. Furthermore, tax dollars for litter cleanup had dropped by 31.3 percent by 1978 even though labor rates had increased and the rates paid for equipment went up 90 percent.

In terms of solid waste, beverage containers make up about 5 percent of the municipal solid waste tonnage nationally. The GAO estimates that a deposit law would reduce total solid waste tonnage by 3 to 4 percent, a small but not insignificant amount given the growing problem of finding acceptable landfill space. This projection is borne out by current estimates that the deposit law has resulted in about a 6-percent reduction in solid waste in Michigan and Maine.

Another attractive feature of a national deposit law is its energy conservation potential. Admittedly, Vermont is a small State, but the energy savings made possible by the deposit legislation are substantial. Using the formula for computing energy impact from the Federal Energy Administration report, we have computed the savings in Vermont at the equivalent of 708 billion Btu's per year. That is the energy equivalent of over 5 million gallons of No. 2 fuel oil, or enough to provide for the home-heating needs of over 15,000 Vermonters—more than the population of the State's third largest city. National studies have projected that energy savings could run between 144 and 240 trillion Btu's and the GAO report concluded that energy use for manufacturing, processing, and transporting containers would be cut by about 30 percent, depending on the container mix between cans and bottles.

Economically, a deposit law does not have the harmful effects that some attribute to it. In a study done jointly by my office and the State agency of environmental conservation, we found that Vermonters realized a significant savings because of the law. Savings of up to 30 percent can be realized because a deposit system encourages the use of refillable bottles. As Mr. J. Lucian Smith, president of the Coca-Cola Co., testified before a House subcommittee.

> Coca-Cola sold in food stores in nonreturnable packages is priced, on the average, 33 percent higher than * * * in returnable bottles. The difference lies essentially in the different costs of packaging: the cost of re-

turnables is spread over many uses; the cost of nonreturnables is absorbed in one use.

By our calculations, the average Vermont family saved about $60 per year for the first 4 years of the law—precisely the time when the industry claims prices will have to go up because of the necessary adjustments.

Retailers stand to gain from this law, particularly because we have written a 2 cent handling charge into the bill for the first time this year. The Vermont Retail Grocer's Association was one of the staunchest early opponents of the bill in our State. Now, however, Executive Director Jim Holmes is a strong backer of the law and he estimates that about 95 percent of Vermont's grocers also support it.

In the employment area, the law has had positive effects in every State. The Maine AFL-CIO supports that State's law and has stated that none of the adverse impact that had been predicted have come to pass. In Vermont, increased business for stores and new redemption opportunities have created about 400 new jobs. In Michigan, according to the GAO report, the deposit law has been responsible for 4,648 jobs.

While there may be some initial cost to the beverage industry from this bill, these are quite manageable. A deposit law also creates revenues for the industry from the sale of recycled materials and from unclaimed deposits, about 10 percent of the total. The GAO report estimates that these revenues would cancel out the additional expenses.

It is rare that Congress has an opportunity to create such benefits at so little cost. A uniform system of container deposits is self-enforcing. It merely sets up a framework and the rest is carried out by the free enterprise system. In Vermont, the administration of the law is carried out by a single State official who has numerous other responsibilities and whose position existed before the deposit law went into effect.

Perhaps the bottom line on the issue of deposit legislation is public opinion. Statistics showing benefit do not mean anything to some one who simply does not like the law. Well, if a deposit law is going to have the disastrous effects that some have claimed it will have, why has it been so popular? In Vermont, acceptance has grown gradually to the point where it is now better than 90 percent. In every State that has the law, the deposit system is now more popular than when it first went into effect. Nationally, a poll commissioned by the FEA in 1975 showed that 73 percent of Americans support the idea of a deposit law.

Mr. Speaker, six States have implemented deposit laws and more than a dozen will consider the law this year. Momentum is clearly gaining and it seems to me that it is in the interest of everyone to enact a series of State laws that have slight differences and may therefore be inconvenient for industry. It is now time to recognize that this bill is a start on the road to increased efficiency in the use of our resources that we all can live with.

I appreciate the indulgence of my colleagues on this important issue and include the text of the bill in the RECORD following my statement:

H.R. 2498

A bill to require a refund value for certain beverage containers, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Beverage Container Reuse and Recycling Act".

FINDINGS AND PURPOSES

SEC. 2. Congress finds and declares that:

(1) The failure to reuse and recycle empty beverage containers represents a significant and unnecessary waste of important national energy and material resources.

(2) The littering of empty beverage containers constitutes a public nuisance, safety hazard, and esthetic blight and imposes upon public and private agencies unnecessary costs for the collection and removal of such containers.

(3) Empty beverage containers constitute a significant and rapidly growing proportion of municipal solid waste, disposal of which imposes a severe financial burden on local governments.

(4) The reuse and recycling of empty beverage containers would eliminate these unnecessary burdens on individuals, local governments, and the environment.

(5) A uniform national system for requiring a refund value on the sale of all beverage containers would result in a high level of reuse and recycling of such containers.

(6) A national system for requiring a refund value on the sale of all beverage containers would result in significant energy conservation and resource recovery.

(7) A national system for requiring a refund value on the sale of all beverage containers would be anti-inflationary and help create jobs in areas of commerce.

(8) A national system for requiring a refund value on the sale of all beverage containers would be inexpensive to administer because of its self-enforcing nature.

DEFINITIONS

SEC. 3. For the purposes of this Act the term:

(1) "beverage" means beer or other malt beverage, mineral water, soda water, or a carbonated soft drink of any variety in liquid form and intended for human consumption;

(2) "beverage container" means a container designed to contain a beverage under pressure of carbonation;

(3) "refundable beverage container" means a beverage container which has clearly, prominently, and securely affixed to, or printed on, it (in accordance with Section 4) a statement of the amount of the refund value of the container;

(4) "consumer" means a person who purchases a beverage in a beverage container for any use other than resale;

(5) "distributor" means a person who sells or offers for sale in commerce beverages in beverage containers for resale;

(6) "retailer" means a person who purchases from a distributor beverages in beverage containers for sale to a consumer or who sells or offers to sell in commerce beverages in beverage containers under pressure of carbonation to a consumer. The Administrator shall prescribe such regulations as may be necessary to establish what person is a retailer with respect to the sale of beverages in beverage containers under pressure of carbonation to consumers through beverage vending machines;

(7) "Administrator" means the Administrator of the Environmental Protection Agency;

(8) "commerce" means trade, traffic or transportation—

(A) between a place in a State and any place outside thereof,

(B) within the District of Columbia or any territory of the United States, or

(C) which affects trade, traffic, commerce, or transportation described in subparagraph (A) or (B); and

(9) "State" means a State, the District of Columbia, the Commonwealth of Puerto Rico, or any territory or possession of the United States.

REQUIRED BEVERAGE CONTAINER LABELING

SEC. 4. No distributor or retailer may sell or offer for sale a beverage in a beverage container under pressure of carbonation unless there is clearly, prominently and securely affixed to, or printed on, it (in accordance with regulations prescribed by the Administrator) a statement of the amount of the refund value of the container, such amount being not less than 5 cents.

RETURN OF REFUND VALUE OF BEVERAGE CONTAINERS

SEC. 5. (a)(1) If a consumer tenders for refund an empty and unbroken refundable beverage container to a retailer or distributor who sells (or has sold at any time during the period of three months ending on the date of such tender) a brand of beverage which was contained in the container, the retailer or distributor respectively shall promptly pay the consumer the amount of the refund value stated on the container.

(2) If a retailer tenders for refund an empty and unbroken refundable beverage container to a distributor who sells (or has sold at any time during the period of three months ending on the date of such tender) a brand of beverage which was contained in the container, the distributor shall promptly pay the retailer (A) the amount of the refund value stated on the container, plus (B) an amount equal to two cents (2¢) per container to help defray the retailer's cost for handling. This payment may be adjusted by the Administrator, following evaluation and public comment, to reflect the true cost of handling beverage containers.

(b) The opening of a refundable beverage container in a manner in which it was designed to be opened and the compression of a metal refundable beverage container shall not, for the purposes of this Section, constitute the breaking of the container if the statement of the amount of the refund value of the container is still readable.

RESTRICTION ON METAL BEVERAGE CONTAINERS WITH DETACHABLE OPENINGS

SEC. 6. No distributor or retailer may sell or offer for sale a beverage in a metal beverage container a part of which is designed to be detached in order to open such container.

PREEMPTION OF STATE AND LOCAL LAW

SEC. 7. (a) Except as otherwise provided in this Section, no State or political subdivi-

sion thereof may establish or continue in effect any law respecting a refund value of beverage containers sold with a beverage under the pressure of carbonation to the extent the Administrator determines the law is inconsistent with this Act.

(b) No State or political subdivision thereof may, for the purposes of determining the amount of any tax imposed by such State or subdivision on the sale of any refundable beverage container, take into account any amount charged which is attributable to the refund value of such container.

(c) Subsection (a) does not prevent a State or political subdivision thereof from establishing or continuing in effect any law respecting a refund value on containers other than for beverages.

PENALTIES

SEC. 8. Whoever violates any provision of Section 4, 5(a), or 6 shall be fined not more than $1,000 for each violation.

EVALUATION AND TECHNICAL ASSISTANCE

SEC. 9. The Administrator shall monitor, before and after the effective dates of Section 4(a) and 6, the rate of reuse and recycling of beverage containers, and shall evaluate and report to Congress annually at the end of the first four years after the date of the enactment of this Act thereafter as the Administrator sees fit on the impact of the provisions of this Act on—

(1) conservation of energy and material resources;

(2) resource recovery and the reduction of solid waste and litter; and

(3) the economy.

CONSULTATION ON EMPLOYMENT DISLOCATION

SEC. 10. The Administrator shall advise and consult with the Secretary of Labor on steps that the Secretary might take, through existing authorities, to identify and provide assistance to individuals whose employment may be adversely affected by this Act.

EFFECTIVE DATES

SEC. 11. (a) Except as otherwise provided in subsections (b) and (c), this Act shall take effect on the date of its enactment.

(b) The provisions of Sections 4, 5, and 7 shall apply with respect to beverage containers sold or offered for sale in interstate commerce on or after two years after the date of enactment of this Act.

(c) The provisions of Section 6 shall apply with respect to beverages in beverage containers sold or offered for sale in interstate commerce on or after one year after the date of enactment of this Act.

(d) The provisions of Section 7(a) shall preempt State and local laws to the extent to which they are inconsistent with the provisions of this Act only on and after the respective effective dates of such provisions.●

● Mr. AuCOIN. Mr. Speaker, I am pleased to join my colleague, Congressman JIM JEFFORDS of Vermont, in support of legislation being introduced today to establish a national beverage container deposit law.

We have a better chance this session to enact a national bottle bill than at any time since Oregon pioneered the first deposit law. I urge my colleagues to follow Oregon's lead, and that of five other States—Vermont, Michigan, Connecticut, Maine, and Iowa—and join us in sponsoring this needed legislation.

A national beverage container bill addresses directly the agenda set by the citizens of our Nation—to stimulate the economy, to boost the working force, to reduce our dependency on foreign resources—all at no Federal expense.

Every study I have seen, uncolored by industrial bias, points to the same conclusion: Beverage container legislation reduces litter and solid waste, saves money to combat inflation, conserves energy, and creates jobs.

We simply cannot continue the throwaway trend. We cannot afford the extravagance of using beverage containers that are not refillable.

Oregon's experience shows that returnable containers represent no loss in the standard of living: Jobs were created, profits for beverage bottlers continued, litter was reduced substantially, and resources were conserved. Oregon taxpayers have saved an estimated $10 million by not paying State employees to pick up bottle and can litter.

Oregon's law has been so popular, the State legislature is considering extending the bill to include other types of containers.

Smaller States like Oregon and Vermont are not the only ones with beverage container laws who boast success stories. Michigan, the first large industrial State to approve a bottle bill, has a system that works.

For these reasons, I urge bipartisan support for this legislation to call a halt to the practice of throwing away resources that can be reused and wasting energy in the process.●

THE KILLINGS IN ATLANTA—AMERICA'S TRAGEDY

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Massachusetts (Mrs. HECKLER) is recognized for 5 minutes.

● Mrs. HECKLER. Mr. Speaker, on Friday, at noon, in the Cannon Office Building, the Congressional Black Associates will hold a memorial service for the murdered and missing children of Atlanta. I would like to add my words of support for this timely and moving response to the tragic deaths of these young people as well as my prayers that the horrors that have occurred in Atlanta will end soon.

My heart goes out to the parents and loved ones of these innocent children who are victims of an unspeakable hatred. Their deaths are not only a loss to their families but a loss to the Nation. As Martin Luther King so wisely reflected in his letter from the Birmingham jail, "Injustice anywhere is a threat to justice everywhere." The bigotry and violence visited upon these children is a painful reminder that we cannot consider ourselves a nation under God if we do not do everything possible to stop acts that are offenses to God. Our survival as a people depends on it.

The poet Yeats vividly described a society of skewed values when he said:

Things fall apart; the center cannot hold • • • the blood-dimmed tide is loosed and everywhere the ceremony of innocence is drowned. The best lack all conviction, while the worst are full of passionate intensity.

We cannot allow the innocence of children to be drowned in Atlanta or anywhere. We must call upon the best of this country to assert the conviction that the evil of racism will not be tolerated by true Americans—that what we see happening in Atlanta is bigotry of the worst intensity.

There is no way we can ever offer recompense to those who have personally suffered from these insane killings. We can only commit ourselves to the urgent task of stopping this senseless slaughter and eliminating the benighted racial prejudice that caused it.●

FINANCING OF ALCOHOL FUELS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. TAUKE) is recognized for 5 minutes.

● Mr. TAUKE. Mr. Speaker, I want to bring to the attention of the House an unfortunate example of what has occurred in the wake of the President's decision to eliminate the Government's loan guarantee program for the development of alcohol fuels and its action putting a hold on the existing application's process. In the small rural community of Elgin, Iowa, a group of 100 farmers has put together an $8 million alcohol project that, if completed, will produce about 3 million gallons of alcohol per year.

To date, each of the farmers has contributed about $1,500 to finance the feasibility studies, engineering design, and organizational and legal costs of the project. After following the initial Farmers Home requirements, the group has now reached the point of being ready to send an application to the agency for a loan guarantee, should the program be allowed to continue. Financial commitments were originally received from Northwestern National Bank in Minneapolis.

The farmers have made arrangements to burn coal and wood in order to fire the combustion system of the project. They have decided that the mash byproduct would be used to feed dairy cattle, which is a big business in the area. And the group has contracted with a local jobber to market the finished product.

While it is far from certain, under present circumstances, that the project will receive Federal assistance—it still would have to proceed through the application and final negotiation processes—it appears that the project is sound in all aspects and

would have had an excellent chance of being selected by FmHA.

After the announcement by the administration to eliminate the loan guarantee program, however, Northwestern National pulled out of the deal, and the farmers have been temporarily left holding the proverbial bag.

My concern is this: It is apparent that alcohol fuels provide us with a viable, short-term means of reducing our dependence on foreign oil. Yet, the industry is not capable at this time of standing on its own feet and may not be for 3 to 5 years. The reason is that financial institutions across this country are not willing to finance alcohol projects without the backing of the Federal loan guarantee program. Elgin Alcohol is only one case in point. There are many others as well.

There is also a question of equity. It should be mentioned that other forms of energy—also not viable in the marketplace—are receiving Federal help, including the synthetic fuels and nuclear industries.

What is perhaps most unfortunate is that 100 farmers, responding to the national need to be more energy efficient and their own need to have security during a fuel shortage, have had the rug pulled out from under them. Not only have they received a financial slap in the face, but they have been told by their government that what they are doing to solve energy problem is not justifiable.

I urge the Congress and the administration during the upcoming debate on the budget cuts to carefully analyze the impact of the decision to terminate alcohol fuels assistance. The critical issue is Federal financial assistance. It makes little sense to continue some forms of alcohol fuel subsidies, and, at the same time, eliminate the chances for growth in the industry. If the alcohol fuels industry is capable of standing on its own feet, then let it stand. But, in my opinion, the preponderance of evidence indicates that it is not yet ready to do so. The risks and cost of development are still too high for the large—let alone the small—businessman to undertake on his own.●

A CALL FOR REPEAL OF THE 25TH AMENDMENT

The SPEAKER pro tempore (Mr. RODINO). Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 15 minutes.

Mr. GONZALEZ. Mr. Speaker, yesterday I introduced a resolution to repeal the 25th amendment to the Constitution. I am reaffirming a commitment I have had for six consecutive Congresses. I feel today, as strongly as I ever have, that the 25th amendment is a threat to orderly and most important, elected government in this country.

We value our Constitution, because it assures that the Government is elected, and that it is bound by laws. But laws and constitutions are only as strong as the will of the people to keep them. A government respects law only if its leadership is committed to law, and we know that this is not always the case.

In the 25th amendment, we have a device that is intended to provide for an orderly succession in the office of President. But what we also have is a standing invitation to overthrow the President, through the operation of the disability clause.

We have already lived through the reality of an unelected Vice President, who succeeded an elected President. In that circumstance, it was the criminal culpability of the Vice President that led to his resignation, and later, the criminal conduct of the President that forced him to resign—leading to the first and only time in our history that we have had an unelected President.

What few people remember is that before President Nixon resigned, it was his chief of staff, together with the Secretary of State, who contemplated using the 25th amendment to force him out of office if he did not quit. Even though the 25th amendment was not invoked, the President's powers were effectively shorn, because those same two individuals issued orders that they had to approve anything ordered by the President. In other words, the President might issue commands, but they were dead letters. This is as close to a palace coup as this country has ever been.

The fact was that Mr. Nixon was viewed by his staff as dangerous and irresponsible. They were operating outside the law and outside the Constitution by isolating him, and not invoking the judgment of anyone else. It was perhaps a well-meant conspiracy, but a conspiracy nevertheless. They had the tool of the 25th amendment to use as a last resort, but they did not need to.

Now we see Alexander Haig, who was that chief of staff, as the Secretary of State—the Keeper of the Seal. He is in a position of great power, greater by far than he enjoyed as chief of staff under Nixon. We know that Mr. Haig did not then and will not today hesitate to use his considerable powers to get his way—and the way could be inviting. Whereas Mr. Nixon was criminally guilty and under broad attack, Mr. Reagan is of an age where his powers might suddenly wane. Mr. Haig did not hesitate to become de facto President in 1974, and he would not hesitate to do so again.

The 25th amendment allows the President to be declared disabled, but by whom? By unelected officers of the Government. I do not think the Constitution ever intended that the unelected should have the power to unseat the elected.

The amendment assumes that all the President's staff and Cabinet are loyal to him, that they will not develop ambitions to unseat him. But we have already seen what happens when the country is in the grip of a political firestorm. The President finds himself isolated, and then gently forced from office by his friends, who it turns out have other loyalties, other wishes than to serve their erstwhile leader. I certainly am no apologist for Nixon, but I say that it was the power and duty of the Congress to remove him if that were to be the outcome—not the power of his staff to force him out. The Constitution gave the power of judgment to the Congress, which is elected, and not to Al Haig or Henry Kissinger, who were not.

The actions of Haig and Kissinger were taken, they say, because they were responsible to the Office of President, more than to the President himself. But that begs the issue. The fact is, they were not being loyal to the Constitution, which provides a way to eliminate a President who has committed high crimes. That is a power not delegated to anyone but the Congress.

But there is the rub. The 25th amendment blurs this power, by delegating it to those who surround the President. By allowing the President to be declared disabled, the amendment hands the President's advisers a complete power to force him out of office in a time when he faces the judgment of Congress, or of the people. This is exactly what happened in 1974.

This should not be the case. It is extremely unlikely that any circumstance would every arise when a President would in fact be justifiably removed by operation of the 25th amendment. Even if you did have a case in which the President were gravely ill, this would not develop so fast or last so long that the Congress could not, in behalf of the people, make that decision. If there were a Wilson situation, Congress would have the time to make the necessary judgment of the President's ability to serve. If there were a repetition of the Garfield case, there would be time to let Congress judge the disability.

The point is, the right to judge a President's ability to serve in office ought never to be given to the hands of a small, unelected, undefined group of people, as it is in the 25th amendment. That kind of power should never be exercised by any but the representatives of the people, the Congress. It is far less likely that the Congress, being large and diverse and directly accountable, would ever seek to conspire against a President than

would a small group of ambitious Cabinet officers. A congressional conspiracy would in fact be impossible, quite unlike the possibilities that exist under the arrangements of the 25th amendment, possibilities that have been clearly revealed in 1974, and which we ignore today at our own peril. If we must have a power given to declare a President disabled or the office vacant, we should not dare give that power to anyone but the Congress.

The best thing that can be said about the 25th amendment is that it might work. But it is far less likely that it really protects the Constitution, than it is that it endangers the right of the people to elect a President who will remain in office no matter how disgruntled his advisers might become, how ambitious they might be, or how much they want to take powers into their own hands.

THE AMERICAN LEGION'S 62D ANNIVERSARY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, on March 15, 62 years ago in 1919, delegates from the First American Expeditionary Force founded the American Legion in Paris, France. The preamble to the constitution of the Legion states:

> For God and country we associate ourselves together for the following purposes: to uphold and defend the Constitution of the United States of America; to maintain law and order; to foster and perpetuate a one hundred percent Americanism; to preserve the memories and incidents of our associations in the great wars; to inculcate a sense of individual obligation to the community, State and Nation; to combat the autocracy of both the classes and the masses; to make right the master of might; to promote peace and good will on earth; to safeguard and transmit to posterity the principles of justice, freedom and democracy; to consecrate and sanctify our comradeship by our devotion to mutual helpfulness.

The American Legion has maintained the high standards it set for itself in 1919 and the members of this outstanding organization continue to be successful in making their noble ideals become a living, working everyday reality. An update of American Legion activities last year in service to our Nation follows:

Over 2.7 million Legionnaires and almost 1 million auxiliary members are deeply concerned for the welfare of the Nation's veterans and their dependents. In 1980 over 50,000 young men and women participated in the Legion's yearly boys State and girls State activities held in our Nation's Capital. Selected individuals are chosen from State-level conventions to participate in a unique government training program designed to motivate their interest and concern in the Federal Government process.

The American Legion School Medal Award is given to thousands of young students each year. This program is designed to recognize young people who display outstanding performance in the areas of courage, honor, leadership, patriotism, scholarship, and service.

Slightly more that 55 percent of all 1979 major leaguers played American Legion baseball as teenagers. Last year over 4,100 teams across the country participated in American Legion sponsored baseball programs.

Intensifying its effort to encourage citizens to exercise their constitutional right to participate in the electoral process, the Legion provides and distributes a "Get Out the Vote" promotion kit. The kit contains useful aids designed to increase voter participation in communities by including such items as suggested news release, editorial and TV/radio public service announcements, State voter qualifications, polling hours, and a suggested plan of action.

Legion activities in the area of child welfare continued to expand in 1980. The American Legion Child Welfare Foundation, a separate corporation from the American Legion, dispersed more than $106,000 in grants to nonprofit organizations for activities ranging from the placement of foster children to juvenile delinquency programs.

A program recently undertaken by the American Legion is designed to educate parents of the seriousness of Reye's syndrome, a swift, deadly disease which attacks healthy children under the age of 18.

As a member of the American Blood Commission, the American Legion actively supports the national blood donor program.

The American Legion education and scholarship program supports continued education through the development of a yearly publication entitled, "Need A Lift?" This booklet contains lists of career sources, scholarships, grants, and loan information for not only veterans and their dependents but for all children.

The Legion also conducts an extensive national energy program and is very cooperative with the FBI and local police jurisdictions in support of a national crime resistance program.

Mr. Speaker, I am glad to join the members of the American Legion in celebrating the 62d anniversary of their proud traditions, and I commend the Legionnaires of the 11th District I am honored to represent, in Illinois, and all over our Nation, for their dedication to the ideals of our American heritage. I extend to them my best wishes as they go forward in greater service to secure the blessings of liberty for us all.●

LEGAL SERVICES CORPORATION

The SPEAKER pro tempore (Mr. GONZALEZ). Under a previous order of the House, the gentleman from New Jersey (Mr. RODINO) is recognized for 5 minutes.

Mr. RODINO. Mr. Speaker, today I am introducing legislation to extend the authorization for appropriations for the Legal Services Corporation for 3 additional years. I am aware that some Members and the President may want to terminate the Corporation and end Federal assistance to the poor for civil legal aid. I believe that such a radical move is unwarranted, unfair, and unwise.

The Legal Services Corporation is a private nonprofit corporation which was created by Congress in 1974 (Public Law 93-355). The original legislation was proposed by President Richard M. Nixon as an alternative to the earlier legal services program begun in the midsixties which was part of the executive branch in the Office of Economic Opportunity and later in the Community Services Administration. The need for an independent corporation outside the executive branch was emphasized by the President who stated that among the objectives of the new program would be:

> That the lawyers in the program have the full freedom to protect the best interest of their clients in keeping with the Canons of Ethics and the high standards of the legal profession . . . and that the Nation be encouraged to continue giving the program the support it needs to become a permanent and vital part of the American system of justice.

As President Nixon noted on May 15, 1973:

> Legal assistance for the poor, when properly provided, is one of the most constructive ways to help them to help themselves . . . (and) justice is served far better and differences are settled more rationally within the system than on the streets.

The Committee on the Judiciary has exercised oversight of the Legal Services Corporation since it began operations in 1975. We processed legislation to extend the authorization for appropriations in 1977 (Public Law 95-222), and have held several hearings over the past 6 years. While there are always areas subject to improvement we have been impressed overall with the corporation and the services which the local programs provide. Legal Services is well run and a bargain. More than 93 percent of its resources are spent to provide legal services directly to its clients in 323 legal services programs in 50 States, the District of Columbia, the Virgin Islands, Puerto Rico, Micronesia, and Guam. Less

than 2 percent of the funding goes for management and administration.

The national legal services program, though primarily funded through the Legal Services Corporation—which administers grants and monitors its grantees—is basically a local program. Each field program is a private nonprofit organization which is directed by a local board whose composition is 60 percent lawyers and one-third clients from the service community. There are limited resources and so priority setting is conducted at the local level with input from the private bar and client community. The initial goal of "minimum access"; that is, two attorneys per 10,000 poor persons, has just been completed. This is a modest goal of access to the justice system, since there are approximately 14 attorneys per 10,000 persons across the Nation. But for the poor this goal provides minimum access to the basic necessities of life—food, shelter, clothing, and education.

I have introduced a bill which keeps funding for the next fiscal year—1982—identical to the Corporation's present funding level of $321.3 million. This is considerably less than the Corporation has requested—$399 million—or than President Carter had requested—$347 million. It is no doubt less than the poor need for truly adequate service. Inflation rates ranging up to 20 percent may diminish the ability to deliver minimum access, and in fact some programs have been forced to close some branch offices. However, I have suggested this figure as a means of balancing the needs for minimum access to the legal system and the need for fiscal restraint. It is not an easy task.

Legal Services staff are in no way overpaid. They work long hours in modest offices. The average staff attorney is paid less than $17,000 per year. Nor is the work glamorous in the conventional sense. Fully 80 percent of their cases involve disputes in the family and over housing, income maintenance and consumer finance. Eighty percent of legal services cases are closed within 6 months, about 30 percent a day. Certainly this is an example of speedy justice. Less than 12 percent of the cases ever reach court decision.

The Subcommittee on Courts, Civil Liberties and the Administration of Justice will be conducting 6 days of hearings on extending the authorization of appropriations for the Legal Services Corporation. The dates are March 17, 18, 24, 25, 31, and April 8. Several witnesses will testify, including critics of the program as well as supporters. Among the supporters of the program are the American Bar Association, several other bar groups, public and private organizations, and private citizens. I expect the hearings to be quite productive, and to assist the committee in processing reauthorization legislation. There may be amendments offered to improve the Legal Services Corporation Act, and the subcommittee and committee will certainly want to examine every recommendation. I welcome any written statements which Members may wish to submit as part of the RECORD.

HOLD THE LINE ON MIDEAST WEAPONS SALES

The SPEAKER pro tempore (Mr. GONZALEZ). Under a previous order of the House, the gentleman from Massachusetts (Mr. MAVROULES) is recognized for 5 minutes.

● Mr. MAVROULES. Mr. Speaker, on Friday, the Reagan administration announced its intention to proceed with the foreign military sale of certain pieces of military hardware to the Government of Saudi Arabia. The sale does not make good sense, and in fact, I believe it represents poor judgment and planning on the part of the new administration.

While the formal notification process on the foreign sales has not yet been initiated, and therefore, the Congress has not yet exercised its own review of the proposed sale, our responsibility is clear. We must move to block this new arms shipment, and prevent this unnecessary escalation of the Mideast arms race.

The sale is contrary to our efforts to promote peace and stability in the region, and is not in the best interests of the United States, Saudi Arabia, or Israel.

There is no question that the F-15's already in the Royal Air Force of Saudi Arabia are the most sophisticated jet fighters in the world. The F-15 is the mainstay of the U.S. Air Force, and in 1978, in a questionable move to strengthen the security of Saudi Arabia, the American Government sold 62 of these aircraft to the Saudis.

At the time of the 1978 sale, the Congress was assured by then Defense Secretary Harold Brown that additional components giving the F-15's greater offensive capabilities, would not be sold to Saudi Arabia. In a letter to John Sparkman, then chairman of the Senate Foreign Relations Committee, Secretary Brown pledged "Saudi Arabia has not requested nor do we intend to sell any systems or armaments that would increase the range or enhance the ground attack capability of the F-15's."

When the 1978 sale was made, it was transacted with very clear preconditions. Now, 3 years later, we learn that the new administration does not consider itself accountable to the commitments which were made, and is prepared to write its own ground rules for future arms sales to the Mideast.

If the administration proceeds with the sale of the AIM-9L air-to-air missile, and the pods to carry additional fuel and consequently extend the range of the F-15, they will only encourage the sale of additional military equipment to the Saudi Government. KC-135 jet tankers, the AWACS airborne warning and control system, and the multiple ejection bomb racks making the F-15 an air-to-ground attack aircraft, are likely to be the subject of future arms sale discussions.

This is wrong.

The beginnings of a very fragile peace process were initiated at Camp David. If that process is to work, the United States must use its influence to promote the independence of Israel, and the resolution of the economic and political disagreements which jeopardize stability in the entire region.

While the new administration may be well intended, they have nonetheless made a mistake. The Congress must exercise its authority.●

MATERNAL AND INFANT HEALTH SERVICES ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. STOKES) is recognized for 5 minutes.

● Mr. STOKES. Mr. Speaker, I appreciate the opportunity to discuss today a strategy for improving pregnancy outcome. The Nation is currently gratified at the steady decline in infant mortality rates which has occurred in this country during the last 25 years, to the point where, in 1979, a record low of 12.3 infant deaths per 1,000 live births were reported. However, much more remains to be done since: First, the United States has the highest infant mortality rate than 12 other industrialized nations in the world; second, the first year of life remains the most hazardous until age 65; third, blacks and Hispanic infants are nearly twice as likely to die before their first birthday than white infants; and fourth, many inner-city and rural areas of the country lack the resources to combat high-risk pregnancies. Consequently, new or improvements to existing programs are needed to better plan maternal and infant health services to remedy these problems.

I wish to stress at the outset, that two recent activities have highlighted the need to enhance the health of infants through improving access to quality medical care for low-income women and their newborns. First, the Senate Subcommittee on Child and Human Development held an oversight hearing on infant mortality on June 30, 1980. This hearing identified areas in the Nation experiencing high infant mortality rates and the need for the Department of Health and Human Services (HHS) to initiate a Department-wide effort to better plan,

coordinate, and evaluate health services delivery and health care financing programs affecting maternal and infant health services. Second, the findings of the Select Panel for the Promotion of Child Health recommended extending prenatal care and family planning services for all pregnant women.

Mr. Speaker, the events surrounding a pregnancy are critical in determining the future development of an infant. The entire perinatal period from the moment of conception, through the prenatal period, the delivery process, and the postnatal period presents potential dangers to an infant's healthy survival. Over the years the title V and medicaid programs have provided the major Federal strategies to assist underserved mothers and children. Both of these programs have fallen short of their initial mandates. Moreover, a significant number of communities still have no title V funded services while infant mortality rates remain high. In many areas where title V services are available, there are no specified eligibility, program performance standards, or planning process to assure that services are delivered to meet specific community goals and objectives. Although title V maternal and child health services have provided many pregnant women and newborns with excellent clinical care, low-income pregnant women still lack access to basic medical services. The medicaid program often duplicates the services provided by the title V project sites which emphasize the lack of coordination between the title V and title XIX programs. Moreover, 27 State medicaid plans fail to include prenatal care as a covered benefit for low-income pregnant women and many plans impose arbitrary limitations on the amount or scope of care a family may receive. These limitations are profoundly inadequate for pregnant mothers at risk, who often do not visit physicians regularly during the course of their pregnancy. The Children's Defense Fund has reported that almost 10 percent of all black mothers receive no prenatal care until the final trimester.

Mr. Speaker, I am today introducing legislation to alleviate some of the problems in the delivery of federally funded maternal and infant health services.

The Maternal and Infant Health Services Act of 1981 establishes a national goal of lowering the number of infant deaths to 9 per 1,000 live births, by 1990; the establishment of a regional planning and advisory process in high infant mortality areas to assist State maternal and child health agencies; and, provides additional funds to upgrade health facilities to better serve and prevent high-risk pregnancies. The bill provides funds for maternal and infant health and the development of a planning strategy to coordinate and evaluate existing health programs.

This act, furthermore, will amend the title XIX medicaid program to allow automatic coverage for medicaid-eligible newborns for a 120-day period. Moreover, it requires State medicaid plans to include prenatal care as a covered benefit, and to increase the reimbursement and coverage of benefits for medicaid-eligible pregnant women during the course of their pregnancy.

This act will foster improvements and better coordination among existing Federal programs at the State and local levels to achieve the goal of reducing infant mortality during this decade.

The bill is as follows:

H.R. 2507

A bill to amend titles V and XIX of the Social Security Act with respect to maternal and infant health services, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of American in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Maternal and Infant Health Services Act of 1981".

FINDINGS; NATIONAL GOAL; AND PURPOSES

SEC. 2. (a) The Congress finds that—

(1) infant mortality among the children of poor and minority women is a serious and growing problem;

(2) infant mortality and morbidity rates for the children of adolescent mothers are particularly high;

(3) among the leading causes of infant mortality are pregnant women's lack of access to proper prenatal services, poor nutrition, and substance abuse;

(4) because the provision of health promotion, counseling, and outreach services is inadequate and fragmented, many pregnant women do not know or are unable to learn effective health maintenance practices;

(5) because the provision of maternal and infant health services is poorly planned and is uncoordinated, perinatal services are not being targeted in a manner to prevent difficulties associated with high-risk pregnancies; and

(6) quality medical care for pregnant women and infants offers a great potential for efficiently improving the health status of the general population.

(b) Congress hereby establishes the national goals of—

(1) reducing the rate of infant mortality in the United States by 1990 to less than 9 infant deaths per 1000 live births, and

(2) reducing the rate of infant mortality for underserved target groups in each county in the United States by 1990 to less than 12.5 infant deaths per 1000 live births.

(c) In order to meet the goal described in subsection (b) through the development of regional perinatal care systems, the purposes of the Act are—

(1) to identify pregnant women who are likely to have a high-risk pregnancy;

(2) to encourage prenatal assessments for each such pregnant woman identified;

(3) to improve the coordination of comprehensive maternal and child health services furnished under title V of the Social Security Act, under title XIX of such Act, through community health centers receiving grants under section 330 of the Public Health Service Act, and through hospitals, in order to increase accessibility and continuity of high-quality obstetrical and neonatal care;

(4) to reduce the unacceptably high infant mortality rate among poor and minority newborns, particularly in inner cities and rural areas;

(5) to encourage health promotion and health education to prevent complications of pregnancy; and

(6) to increase the availability of perinatal services in communities designated as high infant mortality areas.

AMENDMENT TO TITLE V

SEC. 3. (a) Title V of the Social Security Act is amended by adding at the end the following new section:

"PLANNING AND DEVELOPMENT GRANTS FOR MATERNAL AND INFANT HEALTH CARE

"SEC. 517. (a) GRANTS AND COOPERATIVE AGREEMENTS.—(1) The Secretary shall make grants to, and enter into cooperative agreements with, State maternal and child health agencies for the establishment of Statewide perinatal systems plans for the coordinated delivery of existing maternal and infant health services in the States.

"(2) The Secretary may make grants to, and enter into cooperative agreements with, State maternal and child health agencies for projects to implement Statewide perinatal systems plans described in subsection (b)(2).

"(b) APPLICATIONS.—(1) No grant or cooperative agreement may be made under this section unless an application therefore has been submitted to and approved by the Secretary.

"(2) The Secretary may not approve an application for a grant or cooperative agreement under subsection (a)(1) unless the application provides for the development of a Statewide perinatal systems plan which—

"(A) is part of the State plan for maternal and child health services required under section 505(a);

"(B) includes a statement of goals and objectives for the coordination of the delivery of maternal and infant health services under this title, under the State's plan approved under title XIX, and through community health centers receiving grants under section 330 of the Public Health Service Act;

"(C) provides for the analysis of the State personnel, funding, and other resources available to meet such goals and objectives;

"(D) is developed in consultation with the State health planning and development agency for the State and in a manner that takes into consideration actions concerning perinatal services recommended by the agency or by health systems agencies within the State;

"(E) provides for the designation, in each health service area in the State incorporating a high infant mortality area (as determined in accordance with standards established by the Secretary), of a regional advisory board, which board is composed of representatives of—

"(i) local government organizations, the health systems agency designated for that area, local medical societies, and health consumers concerned with the planning, coordination, and delivery of perinatal services, and

"(ii) providers of maternal and infant health services (including public and private nonprofit providers of family planning services and community health centers) who are

interested in the need to plan, coordinate, and evaluate the delivery of perinatal services;

"(F) is developed in consultation with the regional advisory boards designated and under subparagraph (E); and

"(G) includes performance standards (satisfactory to the Secretary) with respect to the improvement of the health of mothers and infants in the State and specifies actions (including changes in delivery of services under this title and under the State plan approved under title XIX, and improvements in maternal nutrition and other programs) which will be taken to achieve these standards.

"(3) The Secretary may not approve an application for a grant or cooperative agreement under subsection (a)(2) unless the application—

"(A) provides that the State maternal and child health agency will assume responsibility for coordinating the delivery of maternal and infant health services under this title and under the State plan approved under title XIX;

"(B) provides for the designation of regional advisory boards (in accordance with paragraph (2)(E)) and provides that such boards are empowered to make recommendations and to serve as the official advisory board to the State maternal and child health agency with respect to—

"(i) the implementation of the perinatal maternal and infant health plan (described in paragraph (2)),

"(ii) improving the delivery of neonatal and obstetrical services for high-risk infants and pregnant women;

"(iii) promoting the establishment of a uniform system of data collection on maternal and infant health care and on the delivery of perinatal services in the health services areas within areas of the board, to be based on state and other statistical reporting requirements;

"(iv) the feasibility of designating (and providing assistance for the upgrading of facilities to become) referral centers or transport systems for high-risk pregnancies, including neonatal centers (providing high quality intensive care nursery services to high-risk infants), obstetrical centers (to provide high quality obstetrical services and to assist other perinatal providers that serve pregnant women likely to have high-risk pregnancies), and an emergency transport system for high-risk infants (including related communication systems with perinatal providers); and

"(v) establishing a case management system described in subparagraph (C);

"(C) provides for the development of a case management system under which—

"(i) each pregnant woman and newborn residing in a high infant mortality area within the county is provided a comprehensive assessment by health care provider who—

"(I) furnishes primary care for woman and the infant and

"(II) arranges to coordinate and monitor all other medical care for the woman and infant on a continuous basis throughout the perinatal period,

in order to identify her need for perinatal services or referral for specialized services;

"(ii) such women are informed of medical determinations relating to their care and of the particular reasons for the need for particular obstetrical or perinatal services;

"(iii) there is coodination between the delivery of health education and the furnishing of medical-social services and nutritional services to such women; and

"(iv) there is a system providing for coordination in the establishment and use of medical records for these patients in order to assure that all relevant documents concerning the health care of such a woman can be readily available to the women's health care provider, whether in the ambulatory or inpatient setting; and

"(D) provides for the furnishing of perinatal services required to meet the needs identified in comprehensive assessments described in subparagraph (C)(i), including—

"(i) the targeting of prenatal care to communities with high infant mortality rates;

"(ii) collection and monitoring of data for the analysis of infant records and indicators of maternal and infant health status;

"(iii) providing assistance for the upgrading of facilities to some neonatal centers, obstetrical centers, or systems for the emergency transport of high-risk infants;

"(iv) the coordination and expansion of health promotion, outreach, and parenting educational services for pregnant women;

"(v) taking such steps as might increase the availability of physicians, nurse practitioners, and certified nurse midwives to provide perinatal services; and

"(vi) expanding nutritional screening and high blood pressure screening for pregnant women and infants and counseling services for pregnant women.

"(c) PAYMENT AND TECHNICAL ASSISTANCE.—(1) The Secretary may pay the amount of any grant or cooperative agreement under this section in advance or by way of reimbursement.

"(2) The Secretary may provide technical assistance to States in order to assist them in applying for grants and cooperative agreements under this section.

"(d) ANNUAL REPORT.—The Secretary shall annually report to the Congress on the assistance provided to States under this section and on how such assistance has helped in preventing high-risk pregnancies and in lowering infant mortality and morbidity rates.

"(e) AUTHORIZATION OF APPROPRIATIONS AND ALLOTMENTS.—(1) For the purpose of making grants and cooperative agreements under subsection (a)(1), there are authorized to be appropriated $10,000,000 for fiscal year 1982, and for each of the next two fiscal years.

"(2)(A) For the purpose of enabling each State to improve maternal and infant health services under grants and cooperative agreements under subsection (a)(2), there are authorized to be appropriated $85,000,000 for fiscal year 1982, and for each of the next two fiscal years.

"(B) Appropriations pursuant to subparagraph (A) shall be allotted each year, in accordance with regulations of the Secretary, to States for grants or cooperative agreements under subsection (a)(2) on the basis of (i) the rate of infant mortality in the State and (ii) the amount of funds required to carry out the Statewide perinatal systems plan developed under subsection (b)(2).

"(f) DEFINITIONS.—For purposes of this section:

"(1) The terms 'health systems agency' and 'State health planning and development agency' mean such an agency as designated under sections 1515 or 1521, respectively, of the Public Health Service Act.

"(2) The term 'high-risk pregnancy' means a pregnancy that, because of the medical or other condition (including diabetes, hypertension, malnutrition, drug or alcohol abuse) of the pregnant women, has a higher than normal risk of complications, delivery, or of health or developmental problems for her infant.

"(3) The term 'high-risk infant' means a newborn child of low birth weight, or an infant who is otherwise identified as having congenital anomalies or health or developmental problems.

"(4) The term 'infant' means a child under the age of one year.

"(5) The term 'neonatal' relates to infants during the period from birth to the age of 28 days.

"(6) The term 'perinatal' relates to pregnant women during the period from conception to six weeks after delivery and to infants during the period from birth to 120 days after birth.

"(7) The term 'State maternal and child health agency' means, for a State, the agency designated under section 505(a)(2) for that State.".

MEDICAID ELIGIBILITY AND SERVICES FOR PREGNANT WOMEN AND INFANTS

SEC. 4. (a)(1) Section 1902(a)(10) of the Social Security Act is amended—

(A) by inserting "(i)" after "(A)" in subparagraph (A), and

(B) by inserting after subparagraph (A) the following new clause:

"(ii) for making medical assistance available for care and services provided during pregnancy and 120 days following the date of the termination of a pregnancy to a woman (and any child born as a result of such pregnancy) if—

"(I) her resources (including the resources of her family) meet the resources test of eligibility for medical assistance under the State plan applicable to a family with dependent children, and

"(II) her income (including the income of her family) does not exceed the higher of the income standard for such a woman to be eligible for any medical assistance under the State plan or 55 percent of the applicable nonfarm income official poverty line, as defined by the Office of Management and Budget, revised annually in accordance with section 624 of the Economic Opportunity Act of 1964;".

(2) Sections 1902(f) of such Act is amended by striking out "(10)(A)" and inserting in lieu thereof "(10)(A)(i)" each place it appears.

(3) Sections 1903(a)(1), 1903(f)(4)(C), and 1905(a) of such Act are each amended by striking out "section 1902(a)(10)(A)" and inserting in lieu thereof "1902(a)(10)(A)(i)" each place it appears.

(b)(1) Section 1905(a) of such Act is amended—

(A) by striking out "or" at the end of clause (vi);

(B) by inserting "or" after the semicolon at the end of clause (vii);

(C) by inserting after and below clause (vii) the following new clause:

"(viii) women during pregnancy and during the 120 days following the date of termination of pregnancy and during such 120 days any child born as the result of such pregnancy,"; and

(D) by adding at the end thereof the following sentence: "A woman described in clause (viii) of this subsection shall be considered to have income insufficient to meet all of the cost of the care and services described in this subsection if the income of the woman (and of her family) does not exceed the income standards described in section 1902(a)(10)(A)(i)(II).".

(2)(A) Section 1902(a)(17) of such Act is amended by inserting", except as provided

under paragraph (10)(A)(i)(II)," after "include reasonable standards (which".

(B) Section 1902(a)(17)(B) of such Act is amended by inserting "or family composition" after "except for income and resources".

(c)(1) Section 1902(a)(13) of such Act is amended by amending subparagraph (B) to read as follows:

"(B) in the case of any individual described in paragraph (10)(A), for the inclusion of at least the care and services listed in paragraphs (1) through (5) and (17) of section 1905(a), and".

(2) Section 1902(a)(14)(A) of such Act is amended by inserting", individuals described in paragraph (10)(A)(ii)," before "and individuals with respect to whom there is being paid".

(3) Section 1905(a)(4) of such Act is amended (A) by striking out "and" before "(C)", and (B) by inserting before the semicolon at the end the following: "; and (D) perinatal services (including nutritional screening)".

(d) Section 1902(e) of such Act is amended—

(A) by inserting "(1)" after "(e)", and

(B) by adding at the end thereof the following new paragraph:

"(2) Notwithstanding any other provision of this title, each State plan approved under this title must provide that any pregnant woman (or any child born as a result of her pregnancy) who is eligible for, has applied for, and has received medical assistance under this title and who becomes ineligible for such assistance because of increased income or resources shall, nonetheless, remain eligible for all such medical assistance provided under the State plan until the end of the 120 day period beginning on the date of the termination of her pregnancy.".

(e) Section 1902(a)(13) of such Act is amended—

(1) by inserting "and" at the end of subparagraph (F), and

(2) by adding at the end the following new subparagraph:

"(G) for payment for physicians services furnished in an outpatient setting to individuals described in paragraph (10)(A)(ii) at a rate not less than 80 percent of the reasonable charge for such services (as determined under section 1842(b));".

(f) Section 1902(a)(10) of such Act is amended—

(1) by striking out "and" before "(III)", and

(2) by inserting before the semicolon at the end the following: ", and (IV) the plan shall make available medical assistance to eligible pregnant women for prenatal services furnished in an outpatient setting of at least such reasonable amount, duration, and scope as the Secretary shall prescribe".

(g)(1) The amendments made by this section shall (except as otherwise provided in paragraph (2)) apply to medical assistance provided under a State plan, approved under title XIX of the the Social Security Act, on and after October 1, 1981.

(2) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary of Health and Human Services determines requires State legislation in order for the plan to comply with the amendments made by this section, the State plan shall not be regarded as failing to comply with such requirements of such title solely on the basis of its failure to comply with such requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature that begins after the date of the enactment of this Act.●

FEDERAL USURY LAW

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 5 minutes.

● Mr. LAFALCE. Mr. Speaker, I am introducing today a bill to preempt State usury ceilings on consumer credit. This is an issue that I raised last year in two bills that I introduced that explored different approaches for Federal preemption of State usury ceilings on consumer loans. No action was taken on those proposals. But the problem remains. In fact, it has been aggravated by continued high interest rates. Congress needs to give urgent attention to the problem of usury ceilings because of its serious affect on both consumers and lenders.

The problem is straightforward: Many States currently have usury laws that set ceilings on consumer loans at levels well below market interest rates. The result is that many banks and other lenders are reluctant to finance big-ticket items and extend revolving credit because of the high cost of their funds—a cost that low usury ceilings prevents them from recouping. This has hurt consumers who cannot secure credit at any price and small businesses that rely on commercial credit to finance their retail sales.

My new bill deals with this problem by providing for a simple Federal preemption of the various State usury ceilings on consumer loans. Let me point out that it in no way affects the consumer protection provisions that the States, or the Federal Government, have enacted. Whatever protections the States have provided to consumers would stand and States would be able to do whatever they decide in the future. In addition, the bill protects State discretion by allowing the States a 3-year period after the legislation's enactment in which they could reimpose interest ceilings on consumer loans.

I think we would all prefer that the States themselves take action to alleviate any untenable conditions caused by usury ceilings. However, in the absence of State action, I believe that it is incumbent on the Congress to provide relief to consumers, small businesses, and lenders.

Following is the text of the bill and a review of its provisions, section by section:

H.R. 2501

A bill to deregulate interest rate ceilings on business, agricultural and consumer credit transactions, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Interest Rate Deregulation Act of 1981".

TITLE I—BUSINESS AND AGRICULTURAL LOANS

SEC. 101. Section 511 of the Depository Institutions Deregulation and Monetary Control Act of 1980 (94 Stat. 161; Public Law 96-221) is amended to read as follows:

"SEC. 511. The provisions of the constitutions or the laws of any state expressly limiting the rate or amount of interest, discount, points, finance charges or other charges which may be charged, taken, received, or reserved shall not apply in the case of a business or agricultural loan."

SEC. 102. Section 512 of the Depository Institutions Deregulation and Monetary Control Act of 1980 is amended to read as follows:

"SEC. 512. (a) Except as provided in subsection (b) of this section, the provisions of this part shall apply with respect to business and agricultural loans made on or after April 1, 1980.

"(b) The provision of this part shall not apply to any business or agricultural loan made in any State after the date (on or after April 1, 1980, and prior to April 1, 1983), on which such State adopts a law or certifies that the voters of such State have voted in favor of any provision, constitutional or otherwise, which states explicitly and by its terms that such State does not want the provisions of this part to apply with respect to loans made in such State, except that such provision shall apply to any loan made on or after such date pursuant to a commitment to make such loan which was entered into on or after April 1, 1980, and prior to such date.

"(c) A loan shall be deemed to be made on or after April 1, 1980 if such loan—

"(1)(A) is funded or made in whole or in part during such period regardless of whether pursuant to a commitment or other agreement therefor made prior to April 1, 1980;

"(B) was made prior to or on April 1, 1980, and bears or provides for interest during a period after April 1, 1980, on the outstanding amount thereof of a variable or fluctuating rate; or

"(C) is a renewal, extension, or other modification of a loan made prior to April 1, 1980, and such renewal or extension or other modification is made with the written consent of any person obligated to repay such loan; and

"(2)(A) is an original principal amount of $25,000 or more ($1,000 or more on or after the date of enactment of the Housing and Community Development Act of 1980 or any amount on or after the date of enactment of the Interest Rate Deregulation Act of 1981); or

"(B) is part of a series of advances and is the aggregate of all sums advanced or agreed or contemplated to be advanced pursuant to a commitment or other agreement therefor is $25,000 or more ($1,000 or more on or after the date of enactment of the Housing and Community Development Act of 1980 or any amount on or after the dates of enactment of the Interest Rate Deregulation Act of 1981)."

TITLE II—CONSUMER LOANS

SEC. 201. Title V of the Depository Institution Deregulation and Monetary Control Act of 1980 is amended by adding at the end thereof the following new subpart:

"PART D—CONSUMER LOANS

"SEC. 531. (a) The provisions of the constitution or the laws of any state expressly limiting the nature, rate, amount of, or

manner in which interest, finance charges or other charges or fee, including the imposition by a creditor of transaction fees and access fees pursuant to an open-end credit plan, which may be charged, taken, received, or reserved shall not apply to an extension of consumer credit.

"(b) Notwithstanding subsection (a), the consumer protection and regulatory provisions of the constitution or the laws of any state shall remain in full force and effect.

"SEC. 532. The term 'extension of consumer credit' means credit made available by a creditor to a natural person, primarily for personal, family, household, investment, home-acquisition, or home improvement purposes, whether secured or unsecured and without regard to the nature of the property securing the indebtedness including the refinancing of credit made available for such purposes, but excluding credit subject to the provisions of section 501 of this title.

"SEC. 533. (a) Except as provided in subsection (b) of this section, the provision of section 531 shall apply with respect to any extension of consumer credit made on or after the effective date of the Interest Rate Deregulation Act of 1981.

"(b) The provisions of section 531 shall not apply to any extension of consumer credit in any state made on or after a date (on or after the effective date of the Interest Rate Deregulation Act of 1981 and prior to a date three years after such effective date) on which such State adopts a law or certifies that the voters of such State have voted in favor of any provision, constitutional or otherwise, which states explicitly and by its terms that such State does not want the provisions of this part to apply with respect to loans made in such State, except that such provisions shall apply to any loan made on or after such date pursuant to a commitment to make such loan which was entered into on or after the effective date of the Interest Rate Deregulation Act of 1981.

"(c) Any law or certification adopted by a State or its voters pursuant to subsection (b) of this section may specify that portion of the extensions of consumer credit made in such State to which the provisions of section 531 will not apply.

"SEC. 534. The Board of Governors of the Federal Reserve System is authorized to issue rules and regulations and to publish interpretations governing the implementation of this part."

SEC. 202. Section 528 of the Depository Institutions Deregulation and Monetary Control Act of 1980 is amended by inserting "section 107(5)(A)(vi) of the Federal Credit Union Act" after the words "National Housing Act,".

TITLE III—EFFECTIVE DATE

SEC. 301. The effective date of this Act shall be the date of enactment of this Act.

SECTION-BY-SECTION ANALYSIS

This bill would amend Title V of the Depository Institutions Deregulation and Control Act of 1980 to extend the preemption of various state usury ceilings.

TITLE I—BUSINESS AND AGRICULTURAL LOANS

Section 101. This section eliminates the alternative federal ceiling on rates for business and agricultural loans. The present federal alternative ceiling is set at 5 percent over the discount rate on ninety day commercial paper as set by the Federal Reserve banks. This section also eliminates the $1,000 threshold amount now required for the preemption to apply.

Section 102. This section would make the preemption of state usury ceilings applicable to business and agricultural loans permanent subject to the ability of the states to reimpose the ceilings. This provision, along with section 101 would make the treatment of business and agricultural loans the same as the treatment of residential first mortgage loans. This amendment continues to give a state the opportunity to determine that the federal preemption will not apply to loans made in that state. The amendments made by this section would not effect any state determination to reimpose its usury ceilings made prior to the effective date of this act.

TITLE II—CONSUMER LOANS

Section 201. This section adds a new part D to the Title V of the Depository Institutions Deregulation and Monetary Control Act of 1980. Part D consists of sections 531, 532, 533, and 534.

Subsection (a) of section 531 preempts state usury ceilings on extensions of consumer credit and preempts state laws which prohibit the imposition of transaction fees and annual fees in conjunction with open end credit plans.

Subsection (b) of Section 531 explicitly provides that consumer protection provisions are not affected by the elimination of rates ceilings. A few examples follow: state laws or regulations specifying that the Rule of 78's is an improper method of computing a rebate upon prepayment of a precomputed loan would not be preempted; laws limiting the prepayment penalties that may be imposed would not be preempted; State laws providing for limited periodic increases on variable rate loans would not be preempted, although a ceiling on the ultimate interest rate would be preempted; laws specifying maximum late charges would not be preempted; laws requiring the refinancing of balloon payments would not be preempted; laws requiring specific disclosures or notices such as the use of plain English or default notices would not be preempted.

Section 532 defines the term "extension of consumer credit". The term is defined by specifying the purposes that will be considered consumer credit. But the definition would generally cover such types of credit as new and used automobile loans, credit card plans, overdraft checking plans, other open end credit plans, second mortgage loans on the residence of a consumer, and retail sales financing.

Section 533 gives states a three-year period to reimpose ceilings. Subsection (c) provides that a state may reimpose ceilings on only a portion of the extensions of consumer credit made in that state if it so desires. This would allow states to address specific problems without reimposing ceilings on all extensions of consumer credit.

Section 534, provides that the Federal Reserve Board may write rules and regulations and issue interpretations implementing the preemption provisions for consumer loans. It is contemplated that the Board would resolve conflicts between these provisions and state laws where appropriate.

Sections 202. This provision amends section 528 of the Depository Institutions Deregulation and Monetary Control Act to permit federally insured credit unions to charge interest at the same rates permitted to other lenders under part D of Title V as set forth in this act.

TITLE III—EFFECTIVE DATE

Section 301. This section specifies the effective date of this act and the amendments made to Title V of the Depository Institutions Deregulation and Monetary Control Act of 1980 as the date of enactment.●

MOBILE TEACHERS' RETIREMENT ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PANETTA) is recognized for 5 minutes.

● Mr. PANETTA. Mr. Speaker, today I am reintroducing legislation to correct a serious inequity affecting the retirement benefits of teachers throughout the Nation. I hope that the 97th Congress will finally act to eliminate an injustice which denies hard-earned retirement benefits to teachers who move across State lines. I urge all my colleagues to support swift passage of the Mobile Teachers' Retirement Act of 1981.

The justification for my legislation is clear and simple. Current law effectively penalizes teachers who move across State lines. At a time when there is severe unemployment in the teaching profession and when there is a growing need for experienced teachers in our rural areas in many States, it is essential that Congress pass legislation quickly which will lift this penalty so that teachers will be able to seek employment in various locations without losing retirement benefits.

In California alone there are over 100,000 elementary, secondary, and community college teachers who have taught in other States. Many of these teachers have spent an average of 8 years working in other States; unfortunately, those years have been lost in figuring the retirement benefits accumulated over the years.

The bill I am reintroducing today establishes a Federal-State program to assist in the funding of these benefits for teachers. It would enable teachers who have taught in two or more States to retire at the end of their careers with benefits substantially the same as they would have received by teaching in a single State for their entire careers. In addition, the bill would extend Federal aid in the financing of recognized out-of-State service credit for those States wishing to participate.

While many State retirement systems have made attempts to rectify this situation, limitations on State funds and the interstate nature of the problem point to the Federal responsibility in this area. Because of the tremendous role played by our Nation's teachers in the education of our children, it is critical for the Federal Government to lend support to teachers in this matter relating to retirement benefits. Thomas Jefferson recognized the importance of sound education in the democratic process and feared the consequences of ignorance on the ability of Americans to participate in the grand democratic experiment. His concerns then are still valid today. Feder-

al support for teachers' retirement benefits should be commensurate with the awesome responsibilities which teachers bear in our society.

I have reprinted below the full text of my bill for the convenience of my colleagues.

H.R. 2504

A bill to permit teachers to change employment across State lines without substantial loss of retirement benefits

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Mobile Teachers' Retirement Assistance Act".

FINDINGS AND STATEMENT OF PURPOSE

SEC. 2. The Congress finds that the transfer of qualified teaching personnel between schools operated by public educational agencies in one State and schools operated by public educational agencies in another State is seriously impeded because of the possibility of forfeiture of retirement benefits in the system from which a teacher transfers and that the resulting immobility of teachers impedes the mobility of the Nation's work force by hindering the growth and development of new communities. It is therefore the purpose of this Act to protect commerce by facilitating the interchange of teaching personnel from a public educational agency in another State by providing Federal financial assistance in the transfer of credits from one State to another State.

DEFINITIONS

SEC. 3. For purposes of this Act:

(1) The term "State retirement system" means a State retirement system established under State law or local public retirement system recognized or established by State law; in which teachers participate.

(2) The term "teacher" means an individual who is employed in a professional educational capacity by a board of education.

(3) The term "covered teacher" means a teacher who is a member of a State retirement system.

(4) The term "board of education" means any board, committee, commission, or agency authorized by State law to direct a public educational system, school, or institution of higher education.

(5) The term "State" includes the District of Columbia and Puerto Rico, and any other territory of the United States which has a public retirement system which includes teachers.

(6) The term "Secretary" means the Secretary of Education.

(7) The term "out-of-State" means public teaching service performed in another State or in elementary or secondary schools operated by the United States Department of the Interior and United States Department of Defense and recognized by the system in which the teacher is a member for the purpose of service credit under the terms and conditions of the law governing the operation of such system.

(8) The term "vesting" means a right of a teacher who separates from covered employment after having at least the minimum years of credited service required under the State retirement system, and has left his contributions in the retirement fund of such system, to a retirement benefit upon reaching an age specified in the law governing the terms and conditions of the system, which benefit is based at least in part on public contributions.

SEC. 4. (a) In order to participate in the program provided for in this Act, a State retirement system must—

(1) provide for payment of retirement benefits on account of out-of-State service by a covered teacher as required in section 5(c);

(2) allow covered teachers at least ten years of out-of-State credit for public teaching service not covered by the system which is not vested under another State retirement system, upon payment by the covered teacher by the date of retirement of a portion of the cost involved and payment from public funds of the remainder;

(3) require no more than one year of in-State service for each year of out-of-State service credit granted;

(4) provide that the teacher's payment for out-of-State service credit shall not exceed 25 per centum of the total cost of the out-of-State service credit;

(5) provide for vesting after not more than five years of credible service in the State retirement system; and

(6) provide for making such reports, in such form and containing such information as the Secretary may reasonably require to carry out his functions under this Act, and for keeping such records and for affording such access thereto as the Secretary may find necessary to assure the correctness and verification of such report.

(b) If the Secretary determines a State retirement system meets the requirements of subsection (a), he shall approve it for participation in the benefits of this Act.

OUT-OF-STATE CREDIT PROVISIONS

SEC. 5. (a) The Secretary shall, as soon as practical after the end of each calendar year, make a Federal contribution to each State retirement system which he has approved under section 4(b) on account of each covered teacher who is a member of the system who retired during the fiscal year (or other twelve-month period designated by the system) which ended in such calendar year with credited out-of-State service as a teacher. The Federal contribution on account of each year of each such teacher's credited out-of-State service as a teacher shall be an amount equal to 50 per centum of the total cost as determined by the retirement system at such teacher's age on date of retirement, except that if the teacher has not reached age sixty, the cost shall be determined as if the teacher were age sixty.

(b) The Federal contribution under this section to a State retirement system shall be limited to the reserve required to provide not more than ten years of out-of-State service credit, except that the Secretary may determine maximum reserve factors at each age, beginning at age sixty, for purposes of the Federal contribution.

(c) The Federal contribution under this section to a State retirement system shall be used for the same purposes, and subject to the same terms and conditions, as are funds of the system derived from other sources. Retirement benefits under such system attributable to service credited under this section shall not be paid on a basis less favorable to the retired teacher than the payments made under such system which are attributable to service other than that so credited.

COST OF ADMINISTRATION

SEC. 6. The Secretary shall each fiscal year make a grant to each State retirement system which is approved to participate in this Act. Each such grant shall be an amount equal to 2 per centum of the Federal contribution made under section 5.

EFFECTIVE DATE

SEC. 7. This Act shall become effective October 1, 1981, with respect to teachers who retire on or after such date.

APPROPRIATIONS AUTHORIZED

SEC. 8. For the purpose of making such Federal payments, there is hereby authorized to be appropriated for the fiscal year ending September 30, 1982, and for each succeeding fiscal year the amount necessary to effectuate the provisions of this Act.●

ENROLLED BILL SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

[*Inadvertently omitted from Congressional Record of Wednesday, March 11, 1981*]

H.R. 2166. An act to amend the Energy Policy and Conservation Act to extend certain authorities relating to the international energy program.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. LUNGREN) to revise and extend their remarks and include extraneous material:)

Mr. JEFFORDS, for 10 minutes, today.

Mrs. HECKLER, for 5 minutes, today.

Mr. TAUKE, for 5 minutes, today.

(The following Members (at the request of Mr. BEDELL) to revise and extend their remarks and include extraneous material:)

Mr. BEDELL, for 5 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. RODINO, for 5 minutes, today.

Mr. MAVROULES, for 5 minutes, today.

Mr. WYDEN, for 10 minutes, today.

Mr. STOKES, for 5 minutes, today.

Mr. MCHUGH, for 5 minutes, today.

Mr. LAFALCE, for 5 minutes, today.

Mr. PANETTA, for 5 minutes, today.

Mr. ANNUNZIO, for 15 minutes, on March 18.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. LUNGREN) and to include extraneous matter:)

MS. FIEDLER.

Mr. JEFFORDS.

Mr. CLINGER.

Mr. LENT in two instances.

Mr. LOTT.

Mr. MCGRATH.

Mr. RUDD in three instances.
Mr. FORSYTHE.
Mr. HILLIS.
Mr. BAILEY of Missouri in two instances.
Mrs. FENWICK.
Mr. RHODES.
Mr. HYDE.
Mr. DERWINSKI in two instances.
Mr. ROTH.
Mr. DANNEMEYER.
(The following Members (at the request of Mr. BEDELL), and to include extraneous matter:)
Mr. BEDELL.
Mr. FRANK.
Mr. FITHIAN in two instances.
Mr. APPLEGATE.
Mr. LAFALCE.
Mr. GUARINI.
Mr. ERTEL.
Mr. JACOBS.
Mr. ROSENTHAL.
Mr. AUCOIN.
Mr. WAXMAN.
Mr. GRAY.
Mr. VENTO.
Mr. HUBBARD.
Mr. COTTER.
Mr. EDGAR.
Mr. MOFFETT.
Mr. HARKIN.

ADJOURNMENT

Mr. RODINO. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 50 minutes p.m.), the House adjourned until tomorrow, Friday, March 13, 1981, at 11 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

774. A letter from the Acting Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics), transmitting a report on Selected Reserve recruiting and retention incentives as of December 31, 1980, pursuant to 10 U.S.C. 2134 and sections 308b and 308c of title 37, United States Code; to the Committee on Armed Services.

775. A letter from the Assistant Secretary of the Air Force Research, Development and Logistics), transmitting notice of the proposed conversion to contractor performance of the North Ranges operation and maintenance function at Nellis Air Force Base, Nev., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

776. A letter from the Assistant Secretary of the Air Force (Research, Development and Logistics), transmitting notice of the proposed conversion to contractor performance of the commissary shelfstocking and custodial services function at Pease Air Force Base, N.H., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

777. A letter from the Secretary of Health and Human Services, transmitting notice of a delay until May 1, 1981, in submission of the report on the impact of the change in the definition of developmental disabilities, required by section 503(b)(2) of Public Law 95-602; to the Committee on Energy and Commerce.

778. A letter from the Secretary of Health and Human Services, transmitting a report on activities under section 340A of the Public Health Service Act, pursuant to section 106(b) of Public Law 95-626; to the Committee on Energy and Commerce.

779. A letter from the Acting Assistant Secretary of State for Congressional Relations, transmitting a copy of Presidential Determination No. 81-3, finding that the sale of defense articles and defense services to the Government of Rwanda will strengthen the security of the United States and promote world peace, pursuant to section 3(a)(1) of the Arms Export Control Act; to the Committee on Foreign Affairs.

780. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a copy of Presidential Determination No. 81-4, authorizing the furnishing of certain defense articles, defense services, and military education and training to El Salvador under the provisions of chapters 2 and 5 of part II of the Foreign Assistance Act of 1961; to the Committee on Foreign Affairs.

781. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a draft of proposed legislation to authorize appropriations for fiscal years 1982 and 1983 for the Department of State; to the Committee on Foreign Affairs.

782. A letter from the Acting Director, International Communication Agency, transmitting a report on the Agency's activities under the Freedom of Information Act during calendar year 1980, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

783. A letter from the Acting Administrator, National Aeronautics and Space Administration, transmitting a report on NASA's activities under the Freedom of Information Act during calendar year 1980, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

784. A letter from the Administrator, Panama Canal Commission, transmitting a report on the Commission's activities under the Freedom of Information Act during calendar year 1980, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

785. A letter from the Acting Commissioner of Social Security, Department of Health and Human Services, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

786. A letter from the Secretary of the Interior, transmitting the annual report on review and revision of royalty payments for fiscal years 1979 and 1980 for Federal onshore and Outer Continental Shelf oil and gas leases, pursuant to section 602 of Public Law 95-372; to the Committee on Interior and Insular Affairs.

787. A letter from the Chief, Forest Service, Department of Agriculture, transmitting the development and management plan, legal description, and map for the St. Joe River, Idaho, pursuant to section 3(b) of the Wild and Scenic Rivers Act, as amended; to the Committee on Interior and Insular Affairs.

788. A letter from the Secretary of Labor, transmitting a draft of proposed legislation to amend the Federal-State Extended Unemployment Compensation Act of 1970 to eliminate the national trigger for extended compensation, change the State trigger, provide for a qualifying requirement, and for other purposes; to the Committee on Ways and Means.

789. A letter from the Secretary of Energy, transmitting notice of a delay until May 15, 1981, in the submission of the first annual report on the use of alcohol in fuel, required by section 221(c) of Public Law 95-618, as amended (94 Stat. 280); to the Committee on Ways and Means.

790. A letter from the Chairman, Federal Election Commission, transmitting the Commission's revised fiscal year 1982 budget request, pursuant to section 307(d)(1) of the Federal Election Campaign Act, as amended; jointly, to the Committees on Appropriations, and House Administration.

791. A letter from the Comptroller General of the United States, transmitting a report on the need for more diligent follow-up to weed out ineligible SSA disability beneficiaries (HRD-81-48, Mar. 3, 1981); jointly, to the Committees on Government Operations, and Ways and Means.

792. A letter from the Comptroller General of the United States, transmitting a report on the problem of outstanding Supplemental Security Income checks (HRD-81-58, Mar. 3, 1981); jointly, to the Committees on Government Operations, and Ways and Means.

793. A letter from the Chairman, U.S. Nuclear Regulatory Commission, transmitting a draft of proposed legislation to amend the Atomic Energy Act to clarify that no prior public hearing is required for applications for amendment which involve no significant hazards consideration and for other purposes; jointly, to the Committees on Interior and Insular Affairs, and Energy and Commerce.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

Mr. ALBOSTA (for himself, Mr. VANDER JAGT, Mr. BRODHEAD, and Mr. SHANNON):

H.R. 2485. A bill to extend duty-free treatment to imports of chipper knife steel; to the Committee on Ways and Means.

By Mr. APPLEGATE:

H.R. 2486. A bill to amend the Internal Revenue Code of 1954 to extend the targeted jobs credit for 3 years, to increase the amount of wages per year taken into account, to eliminate the requirement that an employee who is a Vietnam-era veteran be economically disadvantaged, and to raise the maximum age of a Vietnam-era veteran for whom an employer may qualify for such a credit; to the Committee on Ways and Means.

By Mr. BAFALIS:

H.R. 2487. A bill to amend section 8e of the Agricultural Adjustment Act of 1933, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, to subject imported tomatoes to restrictions comparable to those applicable to domestic tomatoes; to the Committee on Ways and Means.

By Mr. BARNES (for himself, Mr. MCCLORY, Mr. MATSUI, Mr. OBER-

STAR, Mr. LEE, Ms. FERRARO, Mr. WHITEHURST, Mr. EDGAR, Ms. MIKULSKI, Mr. BEILENSON, Mr. FORSYTHE, Mr. FROST, Mr. DOWNEY, Mr. BINGHAM, Mr. VENTO, Mr. COLLINS of Texas, Mr. ERDAHL, Mr. LANTOS, Mr. LAFALCE, Mrs. SCHNEIDER, Mr. FINDLEY, Mr. MITCHELL of Maryland, Mr. DE LUGO, Mr. MOFFETT, and Mr. CHAPPIE):

H.R 2488. A bill to amend section 402 of title 23, United States Code, relating to establishment by each State of comprehensive alcohol-traffic safety programs as a part of its highway safety program; to the Committee on Public Works and Transportation.

By Mr. BEARD:

H.R. 2489. A bill to amend the Internal Revenue Code of 1954 relating to estate taxes to provide that the election to use the alternate valuation date may be made on a return that is filed late; to the Committee on Ways and Means.

By Mr. BONKER:

H.R. 2490. A bill to amend the Social Security Act to require the issuance of social security cards designed to reveal any unauthorized alteration, to require that alien employment restrictions be marked on such cards and that such cards be presented to employers by prospective employees, to limit the use of such cards as identification cards, and for other purposes; to the Committee on Ways and Means.

By Mr. BREAUX:

H.R. 2491. A bill to amend the Tariff Schedules of the United States to increase the rates of duty on shellfish; to the Committee on Ways and Means.

By Mr. DASCHLE (for himself, Mr. MITCHELL of Maryland, Mr. HUBBARD, Mr. PRICE, Mr. LAFALCE, Mr. ATKINSON, Mr. GAYDOS, Mr. CORCORAN, Mr. CARNEY, Mr. BEDELL, Mr. RINALDO, and Mr. MADIGAN):

H.R. 2492. A bill to amend title 39 of the United States Code to provide that regular daily mail delivery shall not be limited by the Postal Service to fewer than 6 days each week; to the Committee on Post Office and Civil Service.

By Mr. DASCHLE (for himself, Mr. PANETTA, Mr. BONIOR of Michigan, Mr. ASPIN, Mr. GORE, Mr. FROST, Mr. ERTEL, Mr. LAFALCE, Mr. MURTHA, Mr. WIRTH, Mr. MCCLOSKEY, Mr. HARKIN, Mr. WILLIAMS of Montana, Mr. BAILEY of Pennsylvania, Mr. MOAKLEY, Mr. BRODHEAD, Mr. MILLER of California, Mr. MATTOX, Mr. SABO, Mr. HOWARD, Mr. GLICKMAN, Mr. DONNELLY, Mr. RODINO, Mr. OBERSTAR, Mr. SMITH of New Jersey, Mr. FRANK, Mr. ROE, Mr. PEPPER, Mr. LEE, Mr. KOGOVSEK, Mr. MOFFETT, Mr. SCHEUER, Mr. DELLUMS, Mr. RICHMOND, Mr. MURPHY, Mr. ECKART, Mr. KILDEE, Mr. RUSSO, Mr. EDGAR, Mrs. CHISHOLM, Mr. VENTO, Ms. MIKULSKI, Mr. YOUNG of Missouri, Mr. ATKINSON, Mr. BROWN of California, Mr. WEISS, Mr. PRICE, Mr. MITCHELL of New York, Mr. FORD of Tennessee, Mr. EMERY, Mr. FAZIO, Mr. WEAVER, Mrs. COLLINS of Illinois, Mr. SUNIA, Mr. SEIBERLING, Mr. WOLPE, Mr. LOWRY of Washington, Mr. MITCHELL of Maryland, Mr. YATRON, Ms. FERRARO, Mr. SHANNON, Mr. RATCHFORD, Mr. DYSON, Mr. KEMP, Mr. DORGAN of North Dakota, Mr. SIMON, Mr. PHILLIP BURTON, Mr. MCHUGH, Mr. DIXON, Mr. GRAY, Mr. EDWARDS of California, Mr. DORNAN of California, Mr. STUDDS, Mr. WHITEHURST, and Mr. WEBER of Minnesota):

H.R. 2493. A bill to amend title 38, United States Code, to provide a presumption of service connection for the occurrence of certain diseases in veterans who were exposed to herbicides during service in Southeast Asia during the Vietnam era; to the Committee on Veterans' Affairs.

By Mr. EDWARDS of Alabama:

H.R. 2494. A bill to designate the John Archibald Campbell Federal Building-U.S. Courthouse; to the Committee on Public Works and Transportation.

By Mr. EVANS of Iowa:

H.R. 2495. A bill to amend the Internal Revenue Code of 1954 to provide that the imputed interest rate used for purposes of allocating income and deductions between related taxpayers shall be the same as the interest rate used in determining the amount of interest on certain deferred payments; to the Committee on Ways and Means.

By Mr. FASCELL:

H.R. 2496. A bill to amend 8e of the Agricultural Adjustment Act as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, to subject imported tomatoes to restrictions comparable to those applicable to domestic tomatoes; to the Committee on Ways and Means.

By Mr. HUCKABY:

H.R. 2497. A bill to authorize and direct the Secretary of Agriculture to conduct a pilot program of guaranteed loans providing for periodic disbursements to owners of nonindustrial private forest lands; to the Committee on Agriculture.

By Mr. JEFFORDS (for himself, Mr. SCHEUER, Mr. MOFFETT, Mr. EMERY, Mr. BEDELL, Mr. TAUKE, Mr. AUCOIN, Mr. WEAVER, Mr. WYDEN, Mr. BONIOR of Michigan, Mr. BRODHEAD, Mr. CROCKETT, Mr. FORD of Michigan, Mr. KILDEE, Mr. PURSELL, Mr. SAWYER, Mr. BEILENSON, Mr. BINGHAM, Mr. BROWN of California, Mrs. CHISHOLM, Mr. DORNAN of California, Mr. DOWNEY, Mr. EDWARDS of California, Mr. FORD of Tennessee, Mr. FRANK, Mr. GOODLING, Mr. MCCLOSKEY, Mr. MCHUGH, Mr. MOAKLEY, Mr. OTTINGER, Mr. PANETTA, Mr. PATTERSON, Mr. PEASE, Mr. ROSENTHAL, Mr. STARK, Mr. STUDDS, Mr. WIRTH, Mr. WON PAT, and Mr. YATES):

H.R. 2498. A bill to require a refund value for certain beverage containers, and for other purposes; to the Committee on Energy and Commerce.

By Mr. LAFALCE:

H.R. 2499. A bill to prevent inequities in the administration of income determination pertaining to low-rent housing; to the Committee on Banking, Finance and Urban Affairs.

By Mr. PANETTA (for himself, Mr. MCCLORY, Mr. FAZIO, Mr. SIMON, Mr. BONIOR of Michigan, Mr. BEILENSON, Mr ADDABBO, Mr. COELHO, Mr. FROST, Mr. BINGHAM, and Mr. MCCLOSKEY):

H.R. 2500. A bill to establish a select commission to examine the issues associated with voluntary service; to the Committee on Education and Labor.

By Mr. LAFALCE:

H.R. 2501. A bill to deregulate interest rate ceilings on business, agricultural and consumer credit transactions, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. LEATH of Texas:

H.R. 2502. A bill to extend for 3 years the existing suspension of duty on natural graphite; to the Committee on Ways and Means.

By Mr. LOTT:

H.R. 2503. A bill to designate the visitors center in the Mississippi District of the Gulf Islands National Seashore as the William M. Colmer Visitors Center; to the Committee on Interior and Insular Affairs.

By Mr. PANETTA:

H.R. 2504. A bill to permit teachers to change employment across State lines without substantial loss of retirement benefits; to the Committee on Education and Labor.

By Mr. RITTER:

H.R. 2505. A bill to amend the Internal Revenue Code of 1954 to allow individuals an income tax credit for amounts paid or incurred for maintaining a household a member of which is a dependent of the taxpayer who has attained age 65; to the Committee on Ways and Means.

By Mr. RODINO:

H.R. 2506. A bill to authorize appropriations for the Legal Services Corporaton for fiscal years 1982, 1983, and 1984; to the Committee on the Judiciary.

By Mr. STOKES:

H.R. 2507. A bill to amend titles V and XIX of the Social Security Act with respect to maternal and infant health services, and for other purposes; jointly, to the Committees on Energy and Commerce and Ways and Means.

By Mr. WAXMAN (for himself, Mr. GRAMM, and Mr. PEPPER):

H.R. 2508. A bill to amend titles XVIII and XIX of the Social Security Act with respect to payments to health maintenance organizations; jointly, to the Committees on Energy and Commerce and Ways and Means.

By Mr. WOLPE (for himself, Mr. VANDER JAGT, Mr. WILSON, Mr. HIGHTOWER, Mr. COELHO, Mr. ALBOSTA, Mr. BEARD, Mr. BLANCHARD, Mr. BONIOR of Michigan, Mr. BREAUX, Mr. DAUB, Mr. FORD of Michigan, Mr. FORD of Tennessee, Mr. GOODLING, Mr. GRAMM, Mr. ZEFERETTI, Mr. ROBERTS of South Dakota, Mr. SAWYER, Mr. TRAXLER, Mr. WALKER, Mr. JONES of Tennessee, Mr. SCHEUER, Mr. ALEXANDER, Mr. BROOMFIELD, Mr. LOEFFLER, Mr. MURTHA, Mr. WATKINS, Mr. CLINGER, Mr. PURSELL, Mr. RICHMOND, Mr. SYNAR, Mr. BOWEN, Mr. KEMP, Mr. BAILEY of Pennsylvania, Mr. DAVIS, Mr. CROCKETT, Mr. RITTER, Mr. SHAW, Mr. YATRON, Mr. DASCHLE, Mr. DUNN, Mr. KILDEE, Mr. NOWAK, Mr. BENEDICT, Mr. BRODHEAD, Mr. AKAKA, and Mr. LUKEN):

H.R. 2509. A bill to place a moratorium on decisions by the Federal Trade Commission in shared monopoly proceedings until the Congress establishes the existence of the violation and defines its elements; jointly to the Committees on Energy and Commerce and the Judiciary.

By Mr. YOUNG of Alaska:

H.R. 2510. A bill to amend the Alaska Railroad Act to direct the Secretary of Transportation to sell the Yukon River barge service to the city of Nenana, Alaska; to the Committee on Energy and Commerce.

By Mr. BEDELL:

H.R. 2511. A bill to amend the Urban Mass Transportation Act of 1964 relating to mass transportation to meet special needs of

the handicapped, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. ERTEL:

H.R. 2512. A bill to provide for supplemental insurance to cover the costs of necessary remedial action following damage to nuclear powerplants, including certain remedial action at the Three Mile Island facilities, and for other purposes; jointly to the Committees on Energy and Commerce and Interior and Insular Affairs.

By Mr. STOKES:

H.R. 2513. A bill to amend title XIX of the Social Security Act to require State medicaid programs to provide grants to certain financially distressed hospitals and community health centers which provide uncompensated care and which would otherwise be closed, and for other purposes; jointly to the Committees on Energy and Commerce and Ways and Means.

By Mr. JOHN L. BURTON:

H.J. Res. 207. Joint resolution to require the Secretary of the Interior to place a plaque at the U.S. Marine Corps War Memorial honoring Joseph Rosenthal, photographer of the scene depicted by the memorial; to the Committee on Interior and Insular Affairs.

By Mr. BAFALIS:

H. Res. 110. Resolution to amend the Rules of the House of Representatives to require that reports accompanying certain bills and joint resolutions reported by committees contain computations of the potential tax impact of such bills and resolutions on the individual taxpayer; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII,

20. The SPEAKER presented a memorial of the Legislature of the State of Maine, relative to authorizing the Veterans' Administration to furnish outpatient medical services to veterans exposed to ionizing radiation as a result of atmospheric testing of atomic weapons; to the Committee on Veterans' Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. HENDON introduced a bill (H.R. 2514) for the relief of Stencel Aero Engineering Corp., which was referred to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 43: Mr. DE LUGO and Mr. MINETA.

H.R. 953: Mr. ROEMER and Mr. DORGAN of North Dakota.

H.R. 1051: Mr. GINGRICH.

H.R. 1052: Mr. JOHN L. BURTON.

H.R. 1054: Mr. BONER of Tennessee.

H.R. 1373: Mr. AUCOIN, Mr. ROBERT W. DANIEL, JR., Mr. STANGELAND, and Mr. SIMON.

H.R. 1819: Mr. BARNARD, Mr. BURGENER, Mr. COELHO, Mr. COURTER, Mr. FAZIO, Mr. GLICKMAN, Mr. HUCKABY, Mr. IRELAND, Mr. KINDNESS, Mr. KOGOVSEK, and Mr. SKELTON.

H.R. 1935: Mr. GRAY and Mr. STOKES.

H.R. 1978: Mr. FORSYTHE, Mr. WON PAT, Mr. HORTON, Mr. MARKS, Mr. WORTLEY, Mr. STOKES, Mr. TAUKE, Mr. MITCHELL of Maryland, and Mr. CROCKETT.

H.R. 2163: Mr. EVANS of Delaware, Mr. PARRIS, Mr. JOHNSTON, Mr. LUJAN, Mr. LAGOMARSINO, Mr. LUNGREN, Mr. KEMP, Mr. KRAMER, Mr. WINN, Mr. PETRI, Mr. FORSYTHE, Mr. SAWYER, Mrs. HOLT, Mr. BUTLER, Mr. MCCLORY, Mr. MCDONALD, Mr. FRENZEL, Mr. SCHULZE, Mr. GREGG, Mr. WHITEHURST, Mr. SKEEN, Mr. WILLIAMS of Ohio, Mr. CORCORAN, Mr. KINDNESS, Mr. MARKS, Mr. BAFALIS, Mr. LEE, Mr. COLLINS of Texas, Mr. RUDD, Mr. GRADISON, Mr. WHITTAKER, Mr. YOUNG of Florida, Mr. GOLDWATER, Mr. BADHAM, Mr. DICKINSON, Mr. CARMAN, Mr. GUYER, Mr. BEARD, Mr. TAUKE, Mr. MCGRATH, Mr. LOWERY of California, Mr. BLILEY, Mr. COURTER, Mr. CRAIG, and Mr. MITCHELL of New York.

H.R. 2278: Mr. MOLLOHAN, Mr. RAHALL, and Mr. STATON of West Virginia.

H.R. 2331: Mr. GILMAN and Mr. BARNES.

H.J. Res. 8: Mr. KOGOVSEK.

H.J. Res. 167: Mr. MCCOLLUM.

H. Con. Res. 67: Mr. FARY, Mr. LELAND, Mr. MINETA, Mr. BEDELL, and Mrs. HECKLER.

H. Res. 10: Mr. RITTER, Mr. WAMPLER, Mr. BAILEY of Pennsylvania, Mr. BEDELL, and Mr. SKELTON.

DANIEL, JR., Mr. DANNEMEYER, Mr. DE LA GARZA, Mr. DERWINSKI, Mr. EDWARDS of Alabama, Mr. EDWARDS of Oklahoma, Mr. FOUNTAIN, Mr. GINN, Mr. GINGRICH, Mr. GUYER, Mr. SAM B. HALL, JR., Mr. HUBBARD, Mr. JEFFRIES, Mr. KAZAN, Mr. KINDNESS, Mr. LAGOMARSINO, Mr. LEATH of Texas, Mr. LIVINGSTON, Mr. LOTT, Mr. MONTGOMERY, Mr. MOORE, Mr. MOTTL, Mr. MYERS, Mr. RINALDO, Mr. RUDD, Mr. SENSENBRENNER, Mr. SHELBY, Mr. SHUMWAY, Mr. SOLOMON, Mr. STANGELAND, Mr. STENHOLM, Mr. STRATTON, Mr. STUMP, Mr. WALKER, Mr. WHITEHURST, Mr. WINN, Mr. WON PAT, Mr. YATRON, Mr. YOUNG of Alaska, and Mr. ZEFERETTI.

H. Res. 55: Mr. BEDELL, Mr. EVANS of Georgia, and Mr. GEPHARDT.

H. Res. 98: Mr. WALKER, Mr. BLANCHARD, Mr. MCDONALD, and Mr. CONABLE.

SENATE—*Thursday, March 12, 1981*

(Legislative day of Monday, February 16, 1981)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., offered the following prayer:

Merciful Father in Heaven, we beseech Thee on behalf of all those who are hurting. We pray for the people of Atlanta in their fear and frustration and anger for those whose children have been killed, for the authorities who work tirelessly for a solution, and for all throughout the country who feel the agony and frustration with Atlanta.

We pray for the poor, the homeless, the hungry, the jobless, and those who live in daily fear that their positions or jobs or the source of their support will be cut off. We pray for the Members of the Senate who feel the hurt of the people and struggle for equitable and just legislation. We pray for all leadership which bears the burden of our society in domestic and international affairs.

We pray for those outwardly composed who suffer within and are not free to share their hurt. May they receive special comfort from Thy spirit.

Especially do we remember Senator JENNINGS RANDOLPH in the loss of his beloved wife.

We ask all this in the name of the gracious Saviour whose love is unconditional and whose care is unlimited. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. Under the previous order, the majority leader is recognized.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

CHANGE IN ORDER OF RECOGNITION OF SENATORS

Mr. BAKER. Mr. President, for the moment, I will withhold utilization of the time allocated to me under the standing order.

Are there special orders for the recognition of Senators today?

The PRESIDENT pro tempore. There are three special orders for today.

Mr. BAKER. Mr. President, I understand that it is desired by all three Senators that we change the order of the special orders.

I ask unanimous consent that the order be changed so that the distinguished Senator from Virginia (Mr. HARRY F. BYRD, JR.), who is in the Chamber, may have the first special order; that the distinguished Senator from Alabama (Mr. HEFLIN), who also is in the Chamber, be assigned the second special order; and the third special order, of course, would be for the distinguished Senator from Montana (Mr. BAUCUS).

The PRESIDENT pro tempore. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that after the time allocated to the two leaders under the standing order and the special orders, there be a period for the transaction of routine morning business, not to exceed 30 minutes, in which Senators may be permitted to speak for not more than 5 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 11 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 11 a.m. tomorrow.

The PRESIDENT pro tempore. Without objection, it is so ordered.

THE SALARY ADJUSTMENT RESOLUTIONS

Mr. BAKER. Mr. President, today, we will consider resolutions, sponsored by myself and others, to disallow recommended 16.8-percent pay increases for the following four categories of Federal personnel: The Vice President and all Members of Congress, various unelected officials of the legislative branch of the Government, the members of the Federal judiciary, and, finally, several thousand executive schedule employees.

It was with admitted misgivings that I offered these resolutions and I profess some misgivings today as well. My colleagues know that I have consistently advocated some degree of salary reform for top executives of the Federal Government. There is substantial evidence to the fact that we are increasingly driving highly qualified men and women out of Government servi.e because of the disparity between public- and private-sector compensation. Indeed, President Reagan indicated recently that he was finding it difficult to attract the highest caliber private sector officials into Government service at this critical time when our Nation desperately needs the finest minds available.

I further fear that as executive schedule salaried employees' pay scales continue to compress at the top salary level, we will witness a further exodus from Government service.

The 16.8-percent pay increases were proposed by former President Carter following a recommendation to him from the Quadrennial Commission on Executive, Legislative, and Judicial Salaries for salary increases on the order of 40 percent for the employees in question.

I do not question former President Carter's intentions, nor those of the Quadrennial Commission. Indeed, this Commission and its three predecessors have performed their duties admirably. Under normal circumstances and in normal times, it has been, and would be again, my inclination to support their recommendations.

But these are neither normal circumstances, nor normal times, Mr. President. We are asking every segment and every region of our Nation to make sacrifices so that the Federal Government might attain some semblance of fiscal responsibility. And while the total dollar amount in question with regard to these salary adjustments is relatively small in comparison to our other spending reduction proposals, it will be a saving to the taxpayers nonetheless, just as the $4.6 million we have already pared from the Senate's operating budget was a saving.

By rejecting these increases, we not only attain some savings to the taxpayers, but we further state once again that we are, at long last, truly serious and determined to ultimately balance the Federal budget.

However, I will say to my colleagues and to all the Federal employees affected by this action today that I remain concerned about the adequacy of the salary levels of Federal executives. I have this matter under study, and it will be my intention, at some future time when the fiscal house of the Federal Government is in order, to propose a program for reforming these salary determinations. The annual bloodletting we experience on this floor on the matter of our own salaries and those of the Federal executive corps, demeans the Senate and seriously damages the morale,

quality, and effectiveness of those charged with managing the programs of this Government.

It is a matter of serious proportions, a matter we must address some day in the relatively near future.

But this is not that day, Mr. President. In these difficult times, we cannot, in good conscience, increase these salaries.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, in the event any Senator with a special order may have a requirement for additional time, I am prepared to yield any of the remaining portion of my standing order for that purpose, and I am advised that the distinguished minority leader is prepared to do so, also.

I ask unanimous consent that the time allocated to the two leaders under the standing order, as the same may remain after this discourse, be reserved and that we may be permitted to yield it to other Senators.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I am prepared to proceed to the special orders as previously identified.

The PRESIDENT pro tempore. The Senator from Virginia (Mr. HARRY F. BYRD, JR.) is recognized.

S. 684—CONTROLLING "REGULISM" BY PETITIONING FOR A LEGISLATIVE VETO

Mr. HARRY F. BYRD, JR. Mr. President, I am today introducing a measure to curb what I have come to call "regulism."

I have coined the term to describe contemporary American statecraft, a gray zone between traditional free enterprise and full-blown socialism: a land where regulatory bureaucrats rule by fiat.

As I see it, unless regulism is curbed, the melancholy transit from a relatively free market, with minimal rules to protect the public welfare, to rigid State control will one day be complete.

The pervasiveness of the regulatory burden our citizens unknowingly shoulder is awesome. The estimates of the direct dollar cost of regulation is in the billions per year. Unfortunately, there is no way to calculate the "cost" in terms of the erosion of our individual freedoms.

I am introducing a bill which I believe offers a unique approach to solving some of the problems that result from regulism.

My bill provides for a two-House congressional veto of all final Federal regulations promulgated by the executive branch. Congressional review, however, could only begin upon the petition of 20 percent of the Members of both Houses. It would take the form of a concurrent resolution.

At the end of that review, Congress would decide the fate of the rule by a majority vote.

The rationale for the legislative veto process I have outlined is two-pronged.

First, we need to bring all the rulemaking offices of the Government under the same congressional scrutiny. Legislation over the past several years has provided both general and piecemeal reviews of agency rules. With the passage of the FTC authorization bill in 1980 (in a different format than contemplated here), it became apparent that the majority in Congress demands broadscale review powers.

The second reason for the petition approach is Congress inability to review all the rulemaking by the Federal agencies. Wholesale review would be institutionally impossible without swelling the already heavy workload required of Congress. That could lead to another bureaucracy in Congress to ride herd on executive branch rulemaking. Clearly that would be unacceptable.

We have, then, a conflict between the desire for review power and the ability to make reviews.

My bill accomplishes the goal of general review but limits such reviews only to those final rules that are so onerous that a substantial number of Members are willing to petition for a review.

The approach is admittedly unique. However, because Congress is responsible for the laws from which the rules are drawn, Congress must determine the extent to which it can realistically conduct oversight of agency regulations.

There is a consensus, both in Congress and among the public, that many rules have adverse economic and social effects and frequently go well beyond statutory intent—and the public expects Congress to provide remedies for regulatory excesses.

Remedies can be sought in the courts, but this process is expensive and time consuming, and is available only to a minority of the public.

Such litigation is itself a "cost" which should be added to the total in computing the dollar impact of overregulation.

I have five broad goals in mind with the introduction of this bill. First, all Federal agencies would know in advance of the possibility of congressional review and rejection of specific final rules. I am hopeful that such knowledge would restrain the rulewriters.

Second, the automatic petition format sends a signal throughout the multitudinous agencies of Government that Congress, not the agencies, shall determine public policy goals.

Third, the establishment of a uniform procedure for congressional review lifts the cloud of uncertainty which hangs over all new rules. Thus, the executive branch may carry out its normal rulemaking functions without fear of protracted congressional intervention.

Fourth, I believe that a specific, general and time-constrained congressional review process, begun on the effective date of a final rule, would do much to end costly and time-consuming litigation.

The fifth goal of this bill is to create a standard format for all reviews. I do not believe it makes sense to have innumerable variations on the congressional veto theme. Existing veto mechanisms could be replaced by this simple procedure. This goal, if achieved, would obviate the necessity of continuing court challenges to the congressional veto process.

This bill in no way circumscribes the rights of any party to access to the courts.

Before turning to background and illustrative material, I must state the obvious: There would be no need for congressional reviews or vetoes of regulations were the Congress more exact in its lawmaking. Unfortunately, Congress is reluctant to be more specific and, thus, in its delegation of powers to the executive branch, almost encourages abuses of those powers.

Furthermore, Congress passes entirely too many laws. In 16 years, I have seen no movement away from this institutional disease.

It may be utopian to expect both fewer and better laws. Perhaps in the future, Congress will realize that the best means of preserving the traditional and constitutionally guaranteed liberties of Americans is for Congress to stop trying to do so much, for so many, so often.

In the meantime, we must find a means of reining in the regulators now lest regulism replace representative democracy.

THE FACE OF REGULISM

To recast the definition: regulism is a phenomenon in American public administration which means control over the lives of citizens through regulation. The face of regulism in our society is pervasive, but largely hidden.

It is possible for something as obvious as regulism to be hidden from the public. Yet the magnitude, complexity, and scope of Federal regulations is of such proportions that the public largely ignores them.

Regulism rears its head each working day in the pages of the Federal Register. Only those who daily watch the Register are aware of the extent of the control being exercised over citizens, both consumers and producers. Very few have the time or inclination to assess the impact of the growing body of regulations on the freedom of action of all citizens.

No one can state with certainty the number of Federal agencies with rulemaking power. In 1979, President Carter estimated there were 90 agencies with such authority. The General Accounting Office has said there are about 116 such agencies. The American Enterprise Institute for Public Policy recently put the number no higher than 55.

Whatever the figure, there is little doubt that there has been an inexorable increase in both economic and social regulatory agencies.

If the number of agencies is uncountable, their impact is even less known. Agency rules are often extremely specific and agonizingly technical and apply to relatively small groups of citizens or to relatively small segments of the economy.

We can see the face of regulism in some rules promulgated—either as proposed or final—in the Federal Register of January 16. On that day alone, the

following agencies, numbering 31, published rules:

1. Alcohol, Drug Abuse, and Mental Health Administration,
2. Animal and Plant Health Inspection Service,
3. Architectural and Transportation Barriers Compliance Board,
4. Conservation and Solar Energy Office,
5. Education Department,
6. Employment and Training Administration,
7. Employment Standards Administration,
8. Environmental Protection Agency,
9. Equal Employment Opportunity Commission,
10. Farmers Home Administration,
11. Federal Communications Commission,
12. Federal Contract Compliance Programs Office,
13. Federal Energy Regulatory Commission,
14. Federal Home Loan Bank Board,
15. Federal Housing Commissioner—Office of Assistant Secretary for Housing,
16. Federal Trade Commission,
17. Food and Drug Administration,
18. Food and Nutrition Service,
19. Food Safety and Quality Service,
20. Housing and Urban Development Department,
21. Internal Revenue Service,
22. Interstate Commerce Commission,
23. Justice Department,
24. Labor Department,
25. National Oceanic and Atmospheric Administration,
26. Nuclear Regulatory Commission,
27. Occupational Safety and Health Administration,
28. Personnel Management Office,
29. Rural Electrification Administration,
30. Social Security Administration, and the
31. Wage and Hour Division.

All of that is on 1 day, just 1 day, January 16.

THE OSHA NOISE EXPOSURE RULE

From the above list of agencies, we find the publication of one of the most complex "final rules" ever to come out of the bureaucracy. It is a rule on noise standards in the workplace issued by the Occupational Safety and Health Administration.

OSHA estimates that the new rule would affect 5.2 million workers in 311,000 plants where workers are exposed to high levels of noise above the 85-decibel level. The direct cost of the implementation is expected to be $254 million annually.

While the yearly amount is being spread throughout the chain of production and distribution of goods and services unevenly, we can say with some certitude that the consuming and producing public will pay several times over for compliance with the rule.

The new noise rule itself begins on page 4708 of the January 16 Federal Register. It is 102 pages in length; an estimated 122,000 words, and that is without the charts. Is it any wonder the public is not interested in Federal rulemaking?

Were I to bore the Senate with a recitation of this rule, it would take me 22½ hours to read it at a rate of 90 words per minute.

How can anyone ever understand such a rule as that? Twenty-two and a half hours just to read it at 90 words a minute.

Were I to ask the taxpayers to pay for printing of the rule in the CONGRESSIONAL RECORD, it would cost approximately $35,760 for a 74½ page reprint in the CONGRESSIONAL RECORD, just for this 1 rule.

I shall not call on the taxpayers to foot such a bill.

Of course, I am talking only about the rule itself. There are two companion documents which are an integral part of the promulgation of the rule. The first, "Final Environmental Impact Statement—Noise," is 232 pages in length. The second, "Final Regulatory Analysis of the Hearing Conservation Amendment," is 236 pages in length.

I wonder if anyone ever reads all those pages. I doubt it.

The rule is a result of years of bureaucratic haggling with industries and unions across the country. It was first proposed in October 1974.

According to OSHA, the national health and safety benefit to be derived from implementation is the reduction of a worker's risk of "significant" job-related hearing loss by about 12 percent.

In other words, after years of debate among management, labor, and the Government, and their respective batteries of experts, the expenditure of untold millions of private and public dollars on studies, evaluations, legal fees, appearances, testimony, travel, surveys and the like, an estimated 5.2 million workers will have 88 percent as great a chance of suffering a "significant" job-related hearing loss as they would have had without implementation of the rule.

I believe it is fair to ask if the product (rule) of OSHA is worth the cost. Let me be quite specific on one point: I wholeheartedly agree with the necessity for making workplaces safer and healthier. But it is legitimate to question whether this should occur as a result of a regulation that is the product of political maneuvering.

And, try as we might, we cannot achieve a risk-free world through regulation, no matter how comprehensive.

THE CHADHA DECISION AND LEGISLATIVE VETOES

At this point, I must briefly discuss the most recent judicial statement on the subject of legislative vetoes: Jagdish Rai Chadha against Immigration and Naturalization Service, decided December 22, 1980.

While not an attorney, I concur with some legal observers that the decision was relatively narrow and only slightly touched the general issue of congressional vetoes. The Chadha decision arose from a dispute—years ago—as a result of a one-House veto of a quasi-judicial decision.

Most legislative vetoes involve Government rules and regulations, and not judicial or quasi-judicial decisions.

The U.S. Court of Appeals for the Ninth Circuit did call into question the constitutionality of the one-House veto. With reference to the legislation I have introduced today, that issue is moot. Furthermore, my bill deals specifically with "final rules" of regulatory agencies.

Historically speaking, since 1932 there have been 186 acts of Congress containing 263 separate provisions giving the Congress direct review powers. Of that number, substantially more than half have been enacted since 1970.

In 1980 alone, at least 13 acts with a total of 33 veto provisions were passed.

According to the Congressional Research Service, in its review of the Chadha decision and other court cases relative to the congressional veto question—

> The *Chadha* decision still leaves the general question of the constitutionality of the legislative veto unsettled.

The Service concluded its analysis thus:

> In the end . . . the quest for a definitive judicial resolution in this area may be akin to the search for the Holy Grail. Simply the enormous number and variety of legislative veto mechanisms coupled with the equally varied statutory contexts in which they appear, seems to militate against a single-definitive ruling. More likely, *Atkins* and *Chadha* represent the beginning of an extended case-by-case, situation-by-situation treatment, a process of selection out tempered by the already apparent judicial realization that the issue is not a wholly legal one.

PRESIDENT REAGAN AND REGULISM

The new administration is keenly aware of the implications of regulism although it has not used the exact term. The President has moved dramatically to put regulism on the "most wanted" list. I applaud the initiatives from the White House and intend to support the President in the quest to bring the Federal regulatory monster to heel.

The President's January 29 memorandum to departmental secretaries—in which he postponed final and proposed regulations for 60 days—as a necessary first step toward bringing regulatory abuses under control.

The administration followed up with a second step with the creation on February 17 of the Regulatory Relief Task Force, to be chaired by the Vice President.

The new administration's actions give reason for hope that future rules emanating from the executive branch will more nearly accomplish the difficult, dual goal of implementing law without imposing unreasonable burdens on individuals and businesses.

But even new rules under this more realistic regulatory mandate may prove too burdensome. In that instance, the congressional review process I have suggested would be necessary.

I believe my bill is complementary to the thrust of President Reagan's goal of reducing over-regulation.

As the President emphasized in his February 18 speech to the Nation, the Congress and the executive branch must work together to bring about regulatory relief and reform. Indeed, thwarting regulism will take dedicated cooperation between the two branches of Government. It is time for such an era in Washington.

Mr. President, at this point I send to the desk a bill and ask that it be appropriately referred.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

Mr. HARRY F. BYRD, JR. Mr. Presi-

dent, I ask unanimous consent to have the text of the bill printed in the RECORD.

There being no objection the bill was ordered to be printed in the RECORD, as follows:

S. 684

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Rules Review Act of 1981".

SEC. 2. (a) Subchapter II of chapter 5 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"§ 560. Congressional review of agency rules

"(a)(1)(A) Except as provided in paragraph (2), the head of each agency shall, on the date on which the agency proposes a final rule, (i) publish such rule in the Federal Register with a full and complete explanation of such rule, and (ii) transmit a copy of such rule and explanation to the Secretary of the Senate and the Clerk of the House of Representatives. Any rule published under this paragraph may become effective after 30 days of continuous session of Congress after the date of publication of such rule, unless, within such 30-day period, a petition with the signatures of at least 20 Senators or 87 Members of the House of Representatives is filed with either the President pro tempore of the Senate or the Speaker of the House of Representatives, as the case may be, stating that the Senate or the House of Representatives, as the case may be, intends to review such rule.

"(B) Any rule for which a petition is filed under this paragraph may become effective after 60 days of continuous session of Congress after the date on which the petition is filed unless, within such 60-day period, the Congress has adopted a resolution of disapproval concerning such rule.

"(2)(A) The provisions of paragraph (1) shall not apply to any rule if the President—

"(i) makes a written certification with respect to such rule that the national defense, foreign policy, or emergency circumstances require that such rule becomes effective prior to the expiration of the 30-day period described in paragraph (1);

"(ii) publishes such rule, a full and complete explanation thereof, and his certification with respect to the rule in the Federal Register on the date such rule is to become effective; and

"(iii) transmits such rule, explanation, and certification to the Secretary of the Senate and the Clerk of the House of Representatives on the date such rule is to become effective.

"(B) Any rule which becomes effective under subparagraph (A) shall cease to be effective, if within 30 days of continuous session of Congress after the date on which such rule is published in the Federal Register—

"(i) a petition with the signatures of at least 20 Senators or 87 Members of the House of Representatives, as the case may be, is filed with the President pro tempore of the Senate or the Speaker of the House of Representatives, stating that the Senate or the House of Representatives, as the case may be, intends to review such rule; and

"(ii) within 60 days of continuous session of Congress after the filing of such petition, the Congress adopts a resolution of disapproval concerning such rule.

"(b) On the day on which such a petition is filed with respect to a rule under subsection (a), the rule, the explanation concerning the rule submitted under such subsection, and, in the case of a rule to which subsection (a)(2) applies, the certification of the President with respect to the rule, shall be referred to each appropriate committee of the Senate or the House of Representatives, as the case may be, having legislative jurisdiction or oversight responsibility with respect to the subject matter of the rule.

"(c)(1) Within 30 days of continuous session of Congress after the day on which a rule was referred to a committee under subsection (b), each committee of the Senate or the House of Representatives, as the case may be, to which a rule was referred shall report to its respective House a resolution of disapproval concerning such rule. If a committee to which a rule has been referred has not reported a resolution of disapproval with respect to such rule within 35 days of continuous session of Congress after the date on which such rule was referred, it is in order to move to discharge the committee from further consideration of the rule.

"(2) Any such motion to discharge must be made by an individual favoring the resolution of disapproval and must be supported by one-fifth of the Members of the House of Congress involved (a quorum being present), and is privileged in the Senate and highly privileged in the House of Representatives (except that it may not be made after a resolution of disapproval has been reported with respect to the same rule); and debate thereon shall be limited to not more than one hour, the time to be divided in the Senate equally between, and controlled by, the majority leader and the minority leader or their designees, and to be divided in the House of Representatives equally between those favoring and those opposing the resolution. An amendment to the motion is not in order and it is not in order to reconsider the vote by which the motion is agreed to or disagreed to.

"(d)(1) Except as provided in paragraph (2), when a committee of the Senate or the House of Representatives has reported or has been discharged from further consideration of a resolution of disapproval, it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion shall be privileged in the Senate and highly privileged in the House of Representatives, and is not debatable. An amendment to the motion shall not be in order, nor shall it be in order to move to reconsider the vote by which the motion is agreed to or disagreed to. If a motion to proceed to the consideration of a resolution of disapproval is agreed to, the resolution of disapproval shall remain the unfinished business of the respective House until disposed of.

"(2) If, within 5 days of continuous session of Congress after the date on which a committee of the Senate or the House of Representatives has reported or has been discharged from further consideration of a resolution of disapproval pursuant to subsection (c), the Senate or the House of Representatives, as the case may be, has not proceeded to the consideration of such resolution, such resolution shall become the pending business of the respective House and shall remain the unfinished business of the respective House until disposed of.

"(e)(1) Debate on a resolution of disapproval, and on all debatable motions and appeals in connection therewith, shall be limited to not more than 6 hours, which shall be divided in the Senate equally between, and controlled by, the majority leader and the minority leader or their designees, and which shall be divided equally in the House of Representatives between individuals favoring and individuals opposing the resolution. A motion further to limit debate is in order and not debatable. An amendment to, or a motion to postpone, or a motion to proceed to the consideration of other business, or a motion to recommit the resolution is not in order. A motion to reconsider the vote by which the resolution is agreed to or disagreed to shall not be in order.

"(2) Appeals from the decisions of the Chair relating to the application of the rules of the Senate or the House of Representatives, as the case may be, to the procedure relating to a resolution with respect to a reorganization plan shall be decided without debate.

"(f) If prior to the passage by one House of a resolution of disapproval of that House, that House receives a resolution of disapproval from the other House, it shall not be in order in that House, notwithstanding any other provision of law or of the Standing Rules of the Senate or the Rules of the House of Representatives, to move to proceed to the consideration of such resolution unless a petition with the signatures of at least 20 Senators or at least 87 Members of the House of Representatives, as the case may be, to make such a motion has been filed with the President pro tempore of the Senate or the Speaker of the House of Representatives, as the case may be. If a motion to proceed to the consideration of such resolution is agreed to, such resolution shall remain the unfinished business of the respective House until disposed of and subsection (e) shall apply to the consideration of such resolution.

"(g) For purposes of this section—

"(1) continuity of session is broken only by an adjournment sine die; and

"(2) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of calendar days of continuous session.

"(h) For purposes of this section, the term 'resolution of disapproval' means a concurrent resolution of either House of the Congress, the matter after the resolving clause of which is as follows: 'That the Congress disapproves the final rule proposed by the dealing with the matter of , which rule was transmitted to the Congress on .', the first blank being filled with the name of the agency proposing the rule, the second blank being filled with the title of the rule and such further description as may be necessary to identify it, and the third blank being filled with the date of transmittal of the rule to the Congress.

"(i) The provisions of subsections (b)(2), (c), (d), (e), (f), (g), and (h) are enacted by the Congress—

"(1) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House respectively, but are applicable only with respect to the procedure to be followed in that House in the case of resolutions of disapproval; and they supersede other rules only to the extent that they are inconsistent therewith; and

"(2) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in any manner and to the same extent as in any other rule of that House.".

(b) The table of sections for such chapter is amended by inserting after the item relating to section 559 the following new item:

"560. Congressional review of agency rules.".

RECOGNITION OF SENATOR HEFLIN

The PRESIDING OFFICER. The Senator from Alabama (Mr. HEFLIN) is recognized.

S. 685—NATIONAL LASER INSTITUTE ACT

Mr. HEFLIN. Mr. President, I am today reintroducing a bill I put in late last session which would mandate the establishment of a National Laser Institute. The purpose of this bill is to

establish a mechanism to improve the coordination of the Federal efforts in laser research and technology development in order to accelerate the development and utilization of laser technology for the benefit of the Nation and of mankind.

This bill generated a good deal of comment in the national press and received considerable comment and support both in the Senate and out. At the urging of a number of Senators, I have broadened the scope of the measure so that it now encompasses particle beam devices.

Mr. President, during December of 1979 and January of 1980, I had the privilege, along with Senator SCHMITT, of chairing several days of hearings on the emerging and exciting laser technology. The committee report summarizing the findings and recommendations growing out of these hearings is now available and has been distributed to each Senator's office. I strongly recommend that each Senator thoughtfully examine this report, for I am thoroughly convinced that the invention and development of the laser is an event which will someday rank in importance along with some of the fundamental inventions of mankind, such as the invention of the wheel, internal combustion engine, television, electronic computer, heavier-than-air flight, air-conditioning, and nuclear energy.

While much has been done to nurture this infant technology during the first 20 years of its existence, a recurring theme developed during the laser hearings and is well documented in the report I mentioned above. To date, laser research and development has been highly compartmentalized with a number of Federal agencies and civilian institutions working more or less independently, each within its own sphere of interest and influence. For example, the research and development effort on this technology has been fragmented with responsibilities for various programs resting with the National Aeronautics and Space Administration, the Department of Energy, the Department of Defense, as well as other agencies. Even within the Department of Defense, the high-energy laser effort is spread among four separate organizations—the Defense Advanced Research Projects Agency, the Department of the Air Force, the Department of the Navy, and the Department of the Army.

While there is a degree of coordination among the programs under the aegis of the Department of the Defense, each program is directed toward technology objectives of primary and unique interest to the sponsoring organization or service. The individual funding levels, even within the Department of Defense, do not permit the accumulation of the critical mass funding necessary to facilitate program development. Thus, the hearings found that there is a compelling need to revise the DOD high-energy laser research and development planning and funding to achieve a balance between technology development and weapon system development. It is, therefore, recommended that the achievement of this objective could be enhanced by the Secretary of Defense's designating an office in the Office of the Deputy Under Secretary for Research and Engineering to manage and direct the overall DOD high-energy laser program. But, this is only part of the program since, as mentioned, the total national effort is fragmented just as the DOD effort is fragmented.

Coordination among the Federal departments and agencies is generally weak, and much of the coordination which does exist stems from the professional relationships among the senior managers and researchers, rather than from institutional relationships. The Federal program structure stresses achievement of differentiated departmental, rather than national, missions and goals. Thus one of the major findings of the hearings documented by the committee report is that there is a need to improve the coordination of the high-power laser programs among the various departments and agencies of the Federal Government.

This improved coordination will increase the effectiveness of the separate departmental and agency laser programs and thus increase the efficiency and effectiveness of the overall Federal effort. It is, therefore, strongly recommended that an institutional mechanism be established to improve this coordination. That, Mr. President, is what the National Laser Institute, which would be created by the bill I offer today, would accomplish.

Although the hearings Senator SCHMITT and I chaired were investigating the state of the art and potential of lasers, we did hear some testimony concerning particle beams technology. Moreover, discussion with members of the Armed Services Committee and others have convinced me that particle beam devices should be brought under a common umbrella with lasers, since often these programs have the same ultimate goal and certainly compete for funds.

Mr. President, my bill would create in the executive branch of the Federal Government a National Laser Institute to coordinate the national laser research and development effort, as well as the particle beam research and development effort. The Institute would be comprised of key Government officials, such as the Secretary of Defense, the Secretary of Energy, the Administrator of NASA, the Director of the National Science Foundation, and the Director of the Office of Science and Technology Policy, and other recognized leaders of the scientific, business, academic, and governmental community who would be appointed by the President and by the Congress. The Institute would be supported by a small, but competent, full-time staff and would be required to meet at least two times each year and would be mandated to study laser and particle beam research and technology applications for future civilian and national security uses; to make recommendations, including recommendations for legislation, to the Congress and to the President regarding implementation of the findings of the Institute; and to make recommendations to the Congress and the President regarding coordination of the efforts of the departments and agencies of the Federal Government with respect to laser and particle beam technology, including cooperative programs and exchange of information, manpower, and facility resources.

The institute will be required to prepare and submit to the President and the key committees in the House and Senate an annual report regarding its activities under the act. The institute members and employees would have access to such classified or nonclassified information as is necessary for them to carry out their responsibilities of an overall umbrella agency under the act.

Mr. President, the approach I am advocating here today is certainly not without precedent. When World War I broke out in 1914, the United States was last on the list of world powers equipped with military aircraft, running a poor fifth behind France, Germany, Russia, and Great Britain. But, not only the tangible evidence of aeronautical progress was lacking, there were few aeronautical research laboratories and facilities in this country, whereas the above-mentioned nations already had well-equipped and well-staffed research facilities. Italy and Russia had aeronautical laboratories long before the United States took the step. A survey by the Smithsonian Institution resulted in a report which showed clearly the dangerous gap between the state of aeronautical technology in Europe and in the United States. The result of the national concern which mounted over this problem was the establishment of the National Advisory Committee for Aeronautics which was charged with the duty of supervising and directing the scientific study of the problems of flight, with a view toward practical solutions. The first committee appointments were made by President Woodrow Wilson on April 2, 1915, and the committee began its work by April 23 of that year. This forerunner of the National Aeronautics and Space Administration proved to be one of the most successful approaches to solving practical problems ever devised by this Congress. Within a few short years, the United States was able to assume the lead in aeronautical science and continues to this day to be the technological leader in air and space applied sciences, primarily because of the foresight displayed by the Members of Congress and the scientific community in those early years of aviation. Similarly, if this Congress will draw upon the precedence provided by that Congress so many years ago and establish this National Laser Institute, I am confident that 50 or 75 years from now, Americans will look back with pride to the beginnings of the effort which made us preeminent in the advancement of laser technology.

Mr. President, I ask unanimous consent that my bill be printed in its entirety at the close of these remarks so that the Members can examine it in detail at their convenience.

Mr. President, I will not today dwell on the many potential civilian peacetime applications of laser technology, nor on the many potential defense applications of this new science. These

various applications are well documented in the hearing record and are, of course, summarized in the committee report I mentioned above. I would, however, like to highlight a few of these applications to put the need for this legislation in the proper perspective.

Since the initial discovery of the laser in 1960, practical applications of laser technology have already proved to be of great benefit in manufacturing, retailing, medicine, and advanced communication fields. However, the potential for laser application in space exploration and in the crucial areas of national defense and energy production has yet to be realized. And this potential, in my judgment, makes laser technology the most exciting and important scientific field of research for the remainder of the century. I am not exaggerating when I say that the future of this Nation, especially in defense and energy, is inextricably tied to the full development and exploitation of laser technology.

During the laser hearings, I listened to numerous scientific experts testify that many of our Nation's problems could—and I feel certain will—be solved through laser applications. Let me briefly outline a few examples of the potentials of laser application.

First, there is a great potential for lasers to be used in the production of electricity through clean and safe nuclear fusion—as opposed to the current method of nuclear fission. This application of laser technology can provide our Nation with an inexhaustible supply of cheap and clean electric power without the dangers of nuclear reactor accidents or the problems caused by radioactive nuclear wastes.

With respect to defense applications, a very large number of Senators are already on record as supporting a space based laser weapons system which could potentially provide an umbrella protecting our Nation from enemy missile-delivered nuclear weapons systems, whether launched from underground land-based silos or from submarines lurking near our shores. I expect that during this session of Congress we will be asked to channel funds into just such a program.

Unless, however, the actions I am recommending today are taken, it is possible that we will not begin to achieve these very complicated and complex systems during this decade, and perhaps not even during this century. High-energy lasers which offer the potential for directed energy weapons in which hostile targets are disabled or killed by the energy of the laser beam require three stressing technology components: Very high power laser devices; precision mirrors/optics, and precise pointing and tracking devices. These weapons systems also would require sophisticated fire control and technology for battle management. A less than fully coordinated national effort to advance these various technology components, in my judgment, would be doomed to failure or at least to delays which could prove decisive.

The issue of how to proceed on the development of a space-based laser system really epitomizes the need to establish this National Laser Institute as a clearing house on laser information. There is within the scientific community a wide divergence of opinion about how and when such a system could be developed, and also as to how expensive such a system might be. The institute I propose could be used as the focal point to bring together these divergent views on this important technology to make sure that the proponents of various approaches have their day in court and to make sure that the program which best suits our national interests is pursued. While I will leave to the scientists the technological problems involved in this potential program, I feel that to delay taking the steps necessary to at least make the commitment to do something could, as I mentioned above, prove to be decisive.

The reason I feel that delay may become a decisive factor is that much has been written lately about the Soviet Union's extensive research and development of laser weapon systems. It is generally believed that the Russians are spending at least five times as much as we are on their laser program each year. In my judgment, we cannot afford to fall behind the Soviet Union in this critical area.

Lastly, there is a great potential for laser application in space exploration which must be fully developed by the National Aeronautics and Space Administration. Laser propulsion is within our reach if we will but only agressively pursue it.

The almost unlimited potential for laser applications is not seriously questioned. While private industry is engaged in the research and development of laser technology, there is little doubt but that the Federal Government must be the leader. The program is so vast and so important that just as the Federal Government has taken the lead in the space program and established as a national commitment the placing of a man on the Moon, thus the Federal Government must take the lead in developing this new technology. Federal funding for laser research—and the Federal Government is the principal sponsor of high-energy laser R. & D.—exceeded $400 million last year. This amount was shared almost equally by the Departments of Energy and Defense, with a small amount expended by NASA. This relatively small amount of money being expended in such a critical field places us at a terrible disadvantage with the Soviet Union, which is expending massive amounts of money—as I mentioned earlier, more than five times our expenditures—on the development of laser technology.

The United States cannot afford not to make an all-out American effort in laser and particle beam research and development.

Because a record has already been made in previous hearings during the last Congress as to the efficacy and importance of this legislation, I would hope that this measure could be expeditiously moved forward to become law. I urge every Member of this body to examine this proposal seriously and thoughtfully. I think that each of you will agree with my conclusion and rally behind this most worthwhile effort.

Mr. President, I shall ask unanimous consent that my bill be printed in its entirety at the close of these remarks so that Members may examine it in detail at their convenience.

Mr. President, when I use the word "laser" I am referring to an acronym which means light amplification by stimulated emissions of radiation.

The basic idea of laser is the containment into a very narrow beam or a broader beam, as may be necessary, of light, and using light in its amplification by emitting energy through it.

There are great potentials in the use of laser. Laser is being used today as a surgical scalpel to remove cataracts from the human eye. They feel today that laser can be used to treat teeth in order to eliminate the potential of cavities occurring in our teeth.

Military applications are really astounding according to the scientists, and there are many scientists in this field who say it has great potential.

One type of military application they say which is entirely possible is that a laser beam or a particle beam could be fired in the United States and within a few seconds it could destroy an intercontinental ballistic missile a few hundred feet above a launch pad after that missile might be fired in Russia.

Other potential applications of laser include nuclear fusion. It is considered to be one of the best methods of inducing nuclear fusion today, and all of us know the benefits of nuclear fusion as compared to nuclear fission.

It is also predicted that some day we might have laser transmit electricity that a powerplant could be built on a South Pacific island and within a matter of a few seconds electricity could be delivered to Washington, D.C.

I mention these as some of the potential applications.

Today in the scientific community there are several schools of thought. One school of thought is that laser can be developed in the next 5 to 10 years. They are very conscientious in the belief and they can support that position by scientific data.

On the other hand, there is a more conservative scientific community that say that laser cannot be developed for 15 or 20 years. They are divided in this. We do not know the answer. A National Laser Institute could cause a decision to be made as to which scientific community is correct.

Our hearings reflected that Russia is spending at least five times what the United States is on laser research and development. According to many military experts, they are several years, 5 years at least, ahead of the United States in laser development.

I hope it is not necessary that some astounding event, such as a destruction of a satellite by a laser weapon by the Russians, has to accelerate the United States into activity in regard to this.

I think the creation of a National Laser Institute will bring together the leaders of the scientific community along with our military leaders, our energy leaders, and our space leaders.

Let me mention one other possibility of a laser application—and there are scientists that say that this is possible—

that through the use of laser as a medium of propulsion some day we may be able to travel in spacecraft at a speed approaching the speed of light, which is 186,000 miles per second. It has great potential.

I hope that we at this time recognize the potential of laser, recognize the compartmentalized and fragmented approach toward laser development, and recognize the legitimate differences in the scientific community in regard to its future development.

I think a National Laser Institute is the answer to a solution to these problems, and I hope that we will adopt my legislation which would create such an institute.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 685

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Laser Intute Act."

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds that—

(1) directed energy physics, including laser and particle beam technology is among the most important technologies of this century, ranking in significance with nuclear fission and integrated circuits;

(2) low-power laser systems already have produced large improvements in military capability, with further improvements expected;

(3) directed energy technology has the potential to benefit the United States in many important areas including national security, energy production, space activities, communications, and photochemistry;

(4) high-energy laser and particle beam systems have the potential to significantly alter existent military strategy, doctrine, and tactics, and thus cause a dramatic shift in the relationships of the superpowers;

(5) federally sponsored directed energy research has not been fully coordinated, and the lack of coordination has detracted from the Nation's ability to achieve important directed energy applications at the earliest time;

(6) achievement of directed energy applications can be accelerated through cooperative and coordinated efforts of departments and agencies of the Federal Government; and

(7) the diverse areas to which directed energy technology can make extremely important contributions, require that the Congress participate in charting the Nation's course in the development and use of high-energy laser and particle beam technology for the benefit of mankind.

(b) The purpose of this Act is to establish a mechanism to improve the coordination of, and to increase, Federal efforts in directed energy research and technology development, in order to accelerate the development and use of laser and particle beam technology for the benefit of the Nation and mankind.

ESTABLISHMENT OF INSTITUTE

SEC. 3. (a) There is created in the executive branch of the Federal Government a National Laser Institute (hereafter cited as the "Institute"). The Institute shall be composed of thirteen members as follows:

(1) The Secretary of Defense.

(2) The Secretary of Energy.

(3) The Administrator of the National Aeronautics and Space Administration.

(4) The Director of the National Science Foundation.

(5) The Director of the Office of Science and Technology Policy.

(6) Two individuals shall be appointed by the President from industries involved in direct energy technology, selected from among individuals in such industries who are knowledgeable and possess expertise in laser and particle beam technology and laser and particle beam research and development.

(7) Two individuals shall be appointed by the President from the academic profession, selected from among individuals who are knowledgeable and possess expertise in laser and particle beam technology and laser and particle beam research and development.

(8) Two members shall be selected by the President from a list of names to be submitted to the President by the President Pro Tempore of the Senate, upon the recommendation of the Majority Leader and the Minority Leader.

(9) Two members shall be selected by the President from a list of names to be submitted to the President by the Speaker of the House of Representatives.

Not more than five of the individuals appointed pursuant to paragraphs (6) through (9) of this subsection may be members of the same political party.

(b) The President shall designate one of the members of the Institute as Chairman at the time of his appointment. Any vacancy in the Institute shall be filled in the same manner as the original appointment, including the party affiliation limitations contained in subsection (a) of this section.

(c) The Institute shall hold such meetings as are necessary for carrying out its responsibilities under this Act. The Institute shall meet at the request of the Chairman or upon the request of a majority of its members, but in no event shall the Institute meet less frequently than two times within each calendar year.

(d)(1) There shall be a full-time staff director for the Institute who shall be appointed by the President, by and with the advice and consent of the Senate.

(2) Within the limit of its appropriations, the Institute may—

(A) appoint and fix the compensation of such other personnel as may be necessary;

(B) obtain the services of experts and consultants in accordance with the provisions of section 3109 of title 5, United States Code, at rates for individuals not to exceed the rate prescribed for GS–18 in the General Schedule under section 5332 of title 5, United States Code; and

(C) accept and use the services of voluntary and noncompensated personnel and reimburse them for travel expenses, including per diem, as authorized by section 5703 of tile 5, United States Code.

(e) Members of the Institute who are otherwise employed by the Federal Government shall serve without compensation. Members of the Institute who are not employees of the Federal Government shall receive compensation at a rate equal to the daily rate prescribed for positions in level V of the Executive Schedule under section 5316 of title 5, United States Code, including traveltime for each day they are engaged in the performance of their duties as members of the Institute during which they are engaged in the actual performance of duties vested in the Institute. While away from their homes or regular places of business in the performance of services for the Institute, members of the Institute shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Federal Government service are allowed expenses under section 5703 of title 5, United States Code.

(f) Section 5316 of title 5, United States Code, is amended by inserting at the end thereof the following: "Director, National Laser Institute.".

FUNCTIONS OF THE INSTITUTE

SEC. 4. (a) The Institute shall—

(1) study laser and particle beam research and technology applications for future civilian and national security uses;

(2) make recommendations, including recommendations for legislation, to the Congress and the President regarding implementation of the findings of the Institute made pursuant to paragraph (1) of this section; and

(3) make recommendations to the Congress and the President regarding coordination of the efforts of the departments and agencies of the Federal Government with respect to laser and particle beam technology, including cooperative programs and exchange of information, manpower, and facilities resources.

(b) The Institute may make specific recommendations pursuant to its authority under subsection (a) of this section as necessary, or upon the request of the President, the Congress, or the head of any department or agency of the Federal Government.

ACCESS TO INFORMATION

SEC. 5. (a) The members and employees of the Institute shall have access to such classified or nonclassified information as is necessary for carrying out their responsibilities under this Act. Access to such information shall be subject to the procedures for security clearance established and in effect by departments and agencies of the Federal Government. Nothing in this subsection shall be construed as waiving any requirement or sanction, criminal or civil, with respect to disclosure of classified information by any person.

(b) In order to assist the Institute in carrying out its responsibilities under this Act each department and agency of the Federal Government shall, upon request of the Chairman of the Institute, provide access to such information and materials as is requested in accordance with the provisions of subsection (a) of this section.

ANNUAL REPORT

SEC. 6. (a) The Institute shall prepare and submit—

(1) to the President;

(2) to the Committee on Armed Services, the Committee on Commerce, Science and Transportation, and the Committee on Energy and Natural Resources of the Senate; and

(3) to the Committee on Armed Services, the Committee on Science and Technology, and the Committee on Interior and Insular Affairs of the House of Representatives;

an annual report regarding its activities under this Act, together with such recommendations for legislation, budgets, and program content or other action as the Institute determines to be necessary or desirable in order to carry out the objectives of this Act.

(b) Notwithstanding any other provision of law, any information which is designated as classified and is transmitted to the Congress in accordance with the provisions of subsection (a) of this section shall be treated by recipients of such information as classified information, and not released to any source except in accordance with any law, rule or regulation applicable to or promulgated by the source of such information.

AUTHORIZATION OF APPROPRIATIONS

SEC. 7. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

TERMINATION

SEC. 8. The provisions of this Act shall terminate five years after the date of enactment of this Act.

Mr. MATSUNAGA. Mr. President, I am happy to join the distinguished Senator from Alabama (Mr. HEFLIN) in introducing the National Laser Institute Act. An overall coordinating agency is very much needed to expedite the development of this relatively recently discovered technology.

As one of the strongest advocates of solar energy in the Congress I support this bill to enable our country to move ahead as quickly as possible on the development of nuclear fusion. The Sun derives its energy through the process called nuclear fusion, and mankind has unleashed this genie in a devastating fashion we know as the hydrogen bomb.

However, specialists tell me that we can control the fury of the explosion in two ways, magnetic confinement and inertial confinement. In the former case, a magnetic bottle is used requiring a temperature of 100 million degrees inside the bottle and minus 450° F. on the outside. The inconceivably hot temperatures are beyond my imagination, but our less than Hawaii-like weather of the past month we have had in Washington makes me appreciate and relate very well to minus 450°.

The Congress last year passed the Fusion Energy Research, Development, and Demonstration Act, which was specifically written to accelerate the commercialization of the magnetic concept. Unfortunately, the inertial confinement concept, or laser fusion, was left out, and this measure will serve to rectify this oversight.

When the United States first exploded the H-bomb on the Pacific island of Enewetak in 1952, the notion of the laser, which is the acronym for light amplification by the stimulated emission of radiation, was merely a theoretical toy in the minds of our scientists, fully a decade away from discovery. Thus, although magnetic fusion has had nearly 30 years of development, laser fusion has only gained full credibility during the past decade.

However, Mr. President, tremendous strides have been made in this short period. I visited the SHIVA laser system at the Lawrence Livermore National Laboratory last year and came away greatly impressed. This awesome experiment in one short duration pulse produces the electrical power equivalent generated in the entire United States.

Yet, laser fusion has a long way to go before being able to supply electricity to the utility grid network and deserves our early assistance. For one thing, the specific laser to eventually produce the needed reliable long-term power has not yet been invented. Second, there is the danger that the budgetary crunch will create delays today that will seriously hurt us tomorrow. We paid more than $70 billion for imported oil last year and will pay even more this year. It is today that we must prepare for tomorrow, and laser fusion, in some circles, has been identified as the most promising of our long-term options.

Mr. President, I believe this bill will serve to bring together in the best possible manner the capabilities of our scientific and industrial communities, enabling our Nation to move ahead in the development of what could be the key to resolving our energy problem. I urge my colleagues to join us in cosponsoring this necessary and timely measure to establish a National Laser Institute.

CONSOLIDATION OF UNDERGRADUATE HELICOPTER PILOT TRAINING

Mr. HEFLIN. Mr. President, I want to speak for a few minutes today about an economy move which has been identified and suggested by the Department of Defense for a number of years—the consolidation of undergraduate helicopter training. For several years now the Defense Department, spurred initially by a directive from this Congress, has been trying to consolidate undergraduate helicopter pilot training at Fort Rucker, Ala., in order to save the taxpayers of this country tens and perhaps hundreds of millions of dollars. Presently, Mr. President, all of the Army and Air Force undergraduate helicopter training takes place at Fort Rucker, Ala., while Navy undergraduate helicopter pilot training takes place at Whiting Field at Pensicola, Fla.

I would like to stress at this time Mr. President, that this is not an idea which was dreamed up by me or any other member of the Alabama congressional delegation. This was a program that was initially suggested by the Congress and which has been attempted by the two previous administrations, one Republican and one Democratic. I admit a parochial interest in this matter since the consolidated training would take place in my home State, but the overriding motivation for my stance on this issue is that I have been persuaded by experts in the Defense Department, both Army, Navy, and Marine that we can produce better trained pilots at a lower cost by effecting this proposed consolidation.

Mr. President, a factsheet supplied to me by the Department of Defense when the initial fiscal year 1982 budget came out with consolidation once again proposed, indicated that a potential savings of as much as $196 million over the next 5 years could be realized if this consolidation were effected. The fact sheet went on to indicate that even if the Navy were allowed to proceed with the procurement of a certain training aircraft which they need to operate their program at Whiting Field, the savings could be as much as $100 million over the 5-year period. Mr. President, these are not numbers that I am manufacturing or pulling out of the air. These are numbers that have been supplied to me by the Department of Defense.

However, Mr. President, subsequent to the release of the initial fiscal year 1982 budget some question was raised concerning the capacity of Fort Rucker to absorb the increased undergraduate pilot load if consolidation were to go forward. In order to get the facts concerning the alleged capacity problem and to get a better handle on the documented savings which could be expected if consolidation were to occur, I wrote a letter to the present Secretary of Defense asking that a study be initiated which would address both the capacity of Fort Rucker to absorb the Navy training pilot load and also to verify the estimated savings which would result. It is my understanding that such a study was ordered, although I have not received a formal reply from the Secretary of Defense with respect to my request.

Officials at Ft. Rucker have informed me that the Defense Audit Service, an independent auditing arm of the Department of Defense would be conducting the study and that they were prepared to cooperate with the Defense Audit Service in any way.

Nevertheless Mr. President, I was concerned about the alleged capacity problem because when the consolidation issue had been before the Congress in 1979, it appeared then that the Army could handle its projected increased pilot load and still be able to absorb the Navy pilot load with only a minor amount of additional military construction at Ft. Rucker. In order to get a better idea of the current state of facts, I sent a member of my staff to meet with the officials at Ft. Rucker to get a first-hand assessment of the problems which might be encountered and the factors which might limit Ft. Rucker's ability to absorb the Navy training load.

It has been reported to me, Mr. President, as a result of this staff visit that officials at Ft. Rucker have explored four options under which they could absorb the increased load due to consolidation. Two of the options have a great deal of promise and should be explored thoroughly by the study commissioned by the Department of Defense. One of these options would be for consolidation to take place while Ft. Rucker continues to perform its mission just as it is performing its mission right now, with no change other than the new Navy mission. Under this option the officials at Ft. Rucker estimate that they would need about $8.8 million in military construction funds in order to make space available to absorb the Navy training load. Their best estimate of what would be required is that they would need to complete a four-lane stage field, add 12 50-man classrooms and 17 briefing rooms as well as several other smaller projects. Under this option, Mr. President, it is indicated that by spending about $8.8 million, Ft. Rucker could absorb the Navy training load and save, again according to figures supplied to me by the Department of Defense, $196 million. Surely on the face of it, it would appear to be a cost effective move. Under this option there may be a problem with air space but is a problem which can also be solved.

A second option which is being considered by the officials at Ft. Rucker examined the shifting of some of the advanced helicopter training to bases located some distance away from Ft. Rucker. but still close enough to be supported from the Ft. Rucker complex. Under that option, because additional facilities would be freed up for use by the Navy, the construction costs dropped to somewhere in the neighborhood of $4.4

million. Again Mr. President, this is a $4.4 million investment in order to reap the savings of $196 million. Under this option, some additional funds might be required in order to facilitate the advanced training at some other base, but these numbers have not been identified. Surely the expenditures would not get so great as to render this option unacceptable.

What these facts and figures show, Mr. President, is that indeed, Fort Rucker does have the capacity to absorb the Navy training load with only relatively minor adjustments and expenditures. Certainly there are problems associated with any realinement of bases, but the indications are that these problems can be overcome and that the cost of overcoming the problems is quite small compared to the potential savings which can be realized.

In my judgment, Mr. President, the Department of Defense needs to proceed quickly with the study and assessment that I have requested so that these apparent economies and efficiencies can be verified. For this reason Mr. President, I am going to contact the Secretary of Defense once again to ask that the study concerning the capacity and the predicted savings be expedited so that the Congress will have the information available to it to make an informed decision—a decision that I think can only be to move forward with the consolidation of undergraduate helicopter pilot training at Fort Rucker, Ala.

S. 686—TAX DEDUCTION FOR LEGAL EXPENSES

Mr. HEFLIN. Mr. President, in the last several years, as inflation has impacted on everything from food to shelter, I have become increasingly aware that the American middle-class taxpayer, some 140 million strong, does not have effective access to legal help. I believe that the major reason why so many people fail to make use of an attorney is the cost of legal assistance. Many of those frightened off by the perceived high cost of legal help often will turn to other sources of aid to avoid the costs. Some resort to legal aid bureaus only to find that they do not qualify for assistance. Other sources are consumer complaint units of the State's attorney's office or the Attorney General's office. These usually have limited jurisdiction to resolve legal problems which are outside the scope of criminal prosecution. Sometimes they resort to self-help efforts, which often turn out to be more costly in the long run, as in the case of a contract or will which is later litigated with disastrous results.

From the observation of the great numbers of persons who seek legal advice and assistance for noncriminal problems, it can be seen that people want—and need—expert help in resolving legal difficulties. They are, however, often neither able nor willing to pay the high costs of retaining counsel. Clearly, there is a tremendous need for competent counsel that the middle class can afford. While we can not reduce the legal fees directly, we can and should take steps to soften the impact on the average middle-class taxpayer.

One approach is through group insurance programs, similar to medical group insurance. In the case of United Transportation Union against State Bar Association of Michigan, the Supreme Court of the United States gave its approval to such plans stating:

> The common thread running through our decisions in N.A.A.C.P. v. Button, Trainmen, and United Mine Workers is that collective activity to obtain meaningful access to the courts is a fundamental right within the protection of the first amendment. However, the right would be a hollow promise if courts could deny associations of workers or others the means of enabling their members to meet the costs of legal representation.

These decisions furnished the catalyst that spurred the development of the group legal services movement. As a result, several such plans have been established across the country. However, these plans are still in their infancy, and a major problem is the underutilization of services by plan members.

Mr. President, in my judgment, the legal profession, and the Congress face the responsibility of finding a more workable means to make lawyers more affordable to the citizens of the United States.

Mr. President, I would like to draw to the attention of my colleagues, an article titled "Aid For The Middle Class: Deduction of Legal Expenses" by Robert Sklodowski and Douglas Rothe which appeared in the April issue of Case & Comment. I believe, Mr. President, that this article gives an excellent argument for the case of tax deductions for legal services.

As suggested by Sklodowski and Rothe, one solution that would begin to resolve this growing problem is the bill that I am offering today, a bill that would amend the Internal Revenue Code to provide a deduction for legal expenses. Businesses can already deduct most of their legal expenses, the poor are often provided free aid, and the wealthy can afford the help regardless of the cost. Thus the tax deduction would be of great benefit to the average American taxpayer, who collectively of course, foot the large part of the country's tax bill. This deduction is modeled after the medical expense deduction now found in section 213 of the Tax Code.

There are two significant advantages this proposal has over any other plan. First, Mr. President it makes lawyers more affordable to the average taxpayers and second, it can be implemented immediately.

The proposal will help the middle class because it will make legal service less costly to those who itemize deductions. For example, the deduction would provide sizable tax relief for those who experience catastrophic legal expenses, and the relief would be meaningful even for those whose expenses were not in the catastrophe range. Another advantage of this deduction is that a direct correlation would exist between the use of legal services by the taxpayer and the deduction to be taken.

Put simply, the more the taxpayer uses an attorney, the greater would be his deduction. Unlike a group type plan, the taxpayer only pays for what he receives. This deduction could be, if it were deemed necessary, tailored to provide greater benefits for the income group or groups that are most in need of aid. For example, the child-care deduction sets a maximum income level above which a deduction is not allowed. This device could be used with my bill and I would expect the committee to examine the possibility.

Since the tax structure is generally progressive, the deduction limitation can be calculated to provide benefits to those who are not eligible for legal aid, yet who are not sufficiently well off to be able to retain counsel as a matter of course. Still another advantage is the fact that the cost of adopting an amendment to the Internal Revenue Code would be minimal in comparison to the service programs.

For example, in 1980 alone the Legal Services Corporation granted $1.5 million for 19 small demonstration projects to test the effectiveness of various legal service type programs. Even assuming resulting economies of scale, once programs become operational, clearly the startup costs of these programs will be enormous. The total budget for Legal Services Corporation for fiscal year 1981 exceeds $300 million. In contrast, the loss of revenue to the Federal Government in terms of taxpayers using this deduction should be de minimus.

Another problem with the group type or prepaid legal insurance programs is that they will require the creation of a bureaucratic structure to implement them. Legislatures will have to enact statutes, regulatory agencies will have to be created or expanded, regulations will have to be promulgated, and most certainly, numerous hearings will have to be held. All of these activities will generate the need for additional people to carry out these functions. Further, there may be numerous court challenges to any such programs. The bureaucratic mechanism, the Internal Revenue Service, is already in place. Once this deduction is adopted it will mesh into the tax structure along with other provisions of the code.

For these reasons, the adoption of an amendment to the code will not face the difficult problems that will certainly accompany the implementation of group or prepaid type programs. This deduction cannot make lawyers affordable to all who desire legal help, but the proposal has two extremely significant advantages over other plans. The deduction can be adopted quickly and it would provide assistance to a segment of the middle class who want to retain or who must retain the services of an attorney.

Mr. President, the use of this tax deduction should provide tax relief to those with costly legal expenses and, at the same time, encourage those who have not used an attorney previously to obtain legal help.

Mr. President, the Congress of the

United States cannot afford the luxury of waiting a decade or more for the implementation of group or prepaid legal plans. We must work for the adoption of a plan that will make lawyers more affordable to the average American taxpayer now.

I urge my colleagues to give this matter the attention it deserves, and move it forward into law most expediently.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 686

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) part VII of subchapter B of chapter 1 of the Internal Revenue Code of 1954 (relating to additional itemized deductions for individuals) is amended by redesignating section 221 as section 222 and by adding after section 220 the following new section:

"SEC. 221. LEGAL SERVICES.

"(a) ALLOWANCE OF DEDUCTION.—In the case of an individual, there shall be allowed as a deduction an amount, not compensated by insurance or otherwise, equal to the sum of—

"(1) the amount by which the amount of the expenses paid during the taxable year (reduced by any amount deductible under paragraph (2)) for legal services incurred by the taxpayer, his spouse and dependents (as defined in section 152) exceeds 3 percent of the taxpayer's adjusted gross income, and

"(2) the amount (not in excess of $150) equal to one-half of the expenses paid during the taxable year for insurance which constitutes legal services incurred by the taxpayer, his spouse and dependents.

"(b) DEFINITION OF LEGAL SERVICES.—For purposes of this section, the term 'legal services' has the same meaning as such term is used in section 120.".

(b) The table of sections for such part is amended by striking out the item relating to section 221 and inserting in lieu thereof the following new items:

"221. Legal services.

"222. Cross references.".

SEC. 2. The amendments made by the first section of this Act shall apply to taxable years beginning after December 31, 1980.

Mr. HEFLIN. Mr. President, I suggest the absence of a quorum and suggest further that the time be charged to the time allocated to the minority leader.

The PRESIDING OFFICER. Without objection, the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

TAX EXPENDITURES: SOME OPTIONS FOR CUTS

Mr. BAUCUS. Mr. President, over the past few weeks, I have spoken on the floor many times on the subject of tax expenditures. Tax expenditures, as you know, Mr. President, are those deductions, exemptions, credits, and exclusions to the Tax Code, which taxpayers can deduct before computing their tax liability. I have spoken up on this subject because I recognize that people in America desperately want Congress to act to reduce inflation.

There is a common belief, which I share, that continuing Federal deficits throughout the seventies have driven inflation to unlivable levels. We must act—all of us, to reduce this inflationary force.

When President Reagan was elected last November 4, he embarked upon a program to cut back on Federal spending. He struck a budget-cutting chord that I and many of my colleagues have been trying to play for many years, but we have been unable to gain common agreement up to this point.

But, as the weeks have passed, it has become all too clear to me that as the President narrowed his focus for spending cuts on a narrower and narrower part of our national budget, the opposition to his cuts has begun to mount.

I think we can continue this momentum, begun by the President, if we expand upon the scope of his budget-cutting vision.

When we consider tax expenditures as part of the Federal budget, we realize that soon we will be spending almost $1 trillion each year. To focus only on nonsafety net, non-defense-oriented programs for cutting, we are left with less than one-quarter of the budget in which to begin to register cuts.

But, if we expand the scope and vision of our budget-cutting efforts, we will find that the magnitude of cuts proposed by the President can be achieved. Indeed, I think we can exceed those cuts.

More important, I think we can do it in a way that is truly evenhanded, that makes everyone sacrifice, and that does not place a truly unlivable burden on any one segment of our society.

Now, I do not claim to have a magic answer. Rather, all I am suggesting is that we should not allow any Government programs—be it a tax benefit from our Internal Revenue Code or a special entitlement program—to be spared at least a critical look by Congress for a possible budget reduction.

Unfortunately, the recent budget submission by President Reagan, which we received just 2 days ago, makes not a single mention of the possibility of cutting tax expenditures.

Over the past 2 weeks I have spent considerable time spelling out for my colleagues the scope and depth of the over 100 tax expenditures that are currently part of our tax system. If any of my colleagues would like to have the benefit of these comments and further explanatory materials, I would be happy to provide them.

What I would like to do today, though, is to outline three possible ways that tax expenditures might be reduced.

OPTION 1—SELECTED CUTS IN TAX EXPENDITURES

One relatively simple option in cutting tax expenditures would be to identify specific tax expenditures that might be eliminated from the current tax laws. One recent example of this option was proposed by our colleague, the senior Senator from New York, Mr. MOYNIHAN, when he proposed that investors in silver straddles be denied the tax benefit of subtracting their losses from the use of this investment scheme.

The precise magnitude of the savings on this proposal is not clear, but there does seem to be a growing consensus that this type of tax expenditure should not be immune from critical review by Congress.

Last month the Congressional Budget Office published a report identifying 105 potential changes to the Federal budget proposed by President Carter. Among these proposed changes were a dozen proposals to reduce tax expenditures.

My cursory review of these proposed cuts is that substantially over $20 billion could be shaved from our Federal deficit if these proposals recommended by CBO were enacted.

While I do not wish to argue at this point that each of those 12 proposals be enacted, I feel compelled to emphasize that Congress should at least take a look at these proposed cuts.

Mr. President, at this point I ask unanimous consent that those portions of the CBO report dealing with tax expenditures be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

PORTION OF CBO REPORT

A dozen tax expenditure candidates for possible cuts by proposed CBO. Excerpted from "Reducing the Federal Budget: Strategics and Examples, Fiscal Years 1982–1986," prepared by Congressional Budget Office, February 1981.

(1) PHASING OUT OF DISC'S

[In billions of dollars]

	Annual revenue effect					Cumulative 5-yr increase
	1982	1983	1984	1985	1986	
Loss under current law	1.8	2.1	2.4	2.8	3.0	.....
Increase from phasing out of DISC	.2	.8	1.7	2.4	3.0	8.1
Increase under Carter budget	(no proposal)					

Note: Preliminary estimates, subject to change.

A Domestic International Sales Corporation (DISC) is a special corporation, established as a conduit for export sales, that is allowed to defer payment of corporate income tax on a portion of its profits.

In many cases, the DISC is a paper corporation with no employees and no actual operations. The DISC tax subsidy actually goes to the parent or an affiliated corporation, since the export-related profits of this corporation can be allocated to the DISC. One-half of the tax liability on these profits (over a base level) can be deferred indefinitely. Special intercompany pricing rules governing the allocation of income between the DISC and its related suppliers enhance the tax subsidy.

The principal objective of the legislation establishing DISCs in 1971 was to increase exports as a way of improving the U.S. balance of trade and increasing domestic employment. The statute was intended to help offset existing tax incentives, both U.S. and foreign, that encourage U.S. companies to favor production abroad over production at home for sale abroad.

Some evidence suggests that the level of exports increased modestly during the 1973–1978 period because of the DISC provisions.

Most of this increase took the form of one-time expansions of exports during the first few years of each DISCs operation. Treasury Department estimates indicates that, because of competition between DISC and non-DISC exports, the net increase in exports attributable to DISCs is at most equal to the tax receipts forgone, and probably is less.

Critics of DISCs contend that this type of tax subsidy is inefficient. They maintain that it is not flexible enough to respond to changes in the overall U.S. trade position; in particular, that it cannot easily be retargeted as prospects for growth in the exports of more competitive commodities improve or as the need for export support for ailing industries increases. In addition, other countries see DISCs as illegal tax subsidy vehicles as defined by the General Agreement on Tariffs and Trade.

The tax benefits of DISCs could be reduced in a variety of ways. One method, similar to a 1978 Administration proposal, would be to phase out the tax benefits over a three-year period, beginning January 1, 1982. This would increase federal revenues by about $8.1 billion over the 1982–1986 period.

The accumulated tax on past earnings of DISCs could continue to be deferred as long as the earnings remain invested in export-related assets. Alternatively, some or all of the accumulated tax liability could be recaptured over a specified period.

(2) ELIMINATION OF TAX EXEMPTION FOR POLLUTION CONTROL BONDS

[In billions of dollars]

	Annual revenue effect					Cumulative 5-yr increase
	1982	1983	1984	1985	1986	
Loss under current law	0.8	0.9	1.0	1.1	1.2	.....
Increase from elimination of exemption on new issues	.1	.2	.3	.4	.5	1.5
Increase under Carter budget	(no proposal)					

Note: Preliminary estimates, subject to change.

Industrial development bonds for pollution control (PCBs) finance 40 percent of all pollution control investments. In the past few years, annual sales have amounted to approximately $2.5 billion.

The use of PCBs raises two questions: Should the subsidy be continued? If so, are tax-exempt bonds the best way to provide it? Like all tax-exempt bonds, PCBs have several beneficiaries—the recipient of the subsidy, the purchaser of tax-exempt bonds, and intermediaries. An alternative subsidy, such as a tax credit, would be less costly because it would provide benefits only to the recipient of the subsidy. If the tax exemption on new issues of PCBs was eliminated effective July 1, 1981, federal revenues would be increased by $1.5 billion in the 1982–1986 period.

If the subsidy is to be continued, then its form and the regulations governing it warrant reexamination. At present, PCBs encourage technological inefficiency because they are available only for "end of pipe" capital expenditures, thereby discouraging selection of other, possibly more effective, solutions to the underlying pollution problem, such as use of less-polluting raw materials or adoption of production processes that produce less pollutants.

The availability of PCBs—or any other subsidy for pollution control—can have only limited influence on a company's decision to invest in pollution control equipment. This is because federal pollution control regulations are highly prescriptive, so that an existing firm must choose between making the required improvement or closing.

The main argument for eliminating the subsidy is that private industry should pay its own pollution control bills, just as it pays for complying with other requirements imposed by law. On the other hand, some argue that industry's efforts to avoid contaminating the environment confer a public benefit and thus warrant some subsidy from the public.

(3) ELIMINATION OF TAX EXEMPTION ON SMALL-ISSUE IDB'S

[In billions of dollars]

	Annual revenue effect					Cumulative 5-yr increase
	1982	1983	1984	1985	1986	
Loss under current law	1.6	1.9	2.4	2.8	3.3	.....
Increase from elimination of exemption on new issues	.3	.6	1.0	1.5	2.0	5.4
Increase under Carter budget	.1	.2	.3	.5	.6	1.7

Note: Preliminary estimates, subject to change.

Industrial Development Bonds (IDBs) are tax-exempt bonds that state and local governments issue to provide low-cost financing to private firms. Since interest from the bonds is exempt from federal taxation, private businesses are enabled to borrow funds at below-market interest costs. In general, the bonds are backed only by project revenues, so their issuance is unrestrained by state constitutional or other limitations on "full faith and credit" borrowings.

IDBs were used infrequently until the 1960s, when a growth in sales led the Congress to limit their use. Since 1968, IDBs have been taxable unless they are issued for specific purposes such as pollution control, or are eligible for the so-called "small issues" ($10 million or less) exemption.

Small issues are being used with increasing frequency to finance a wide range of facilities including manufacturing plants, fast-food franchises, and country clubs. In 1968, sales of IDBs for all purposes amounted to $1.8 billion; by 1979, small issue sales alone amounted to $7 billion.

The widespread use of IDBs raises the question of under what circumstances the federal government should incur revenue losses, particularly of a kind that it cannot supervise or control, to subsidize the borrowing costs of private industry. Unlike direct federal expenditure programs to assist private business, IDBs are targeted neither to specific locations nor to specific kinds of businesses. If the tax exemption on new IDB issues was eliminated effective July 1, 1981, federal tax revenues would increase by about $5.4 billion over the 1982–1986 period.

The advocates of continued use of small-issue IDBs maintain that the bonds stimulate investment and promote job development. Those who would restrict their use argue that the bonds often finance investment that would take place in any event, and that their public purpose is ambiguous.

President Carter's fiscal year 1982 budget recommendations would limit, but not end, the exemption on small-issue IDBs. This, along with a six-month earlier effective date, accounts for the differences shown above in revenue increases.

(4) LIMITING OF HOME MORTGAGE INTEREST DEDUCTION

[In billions of dollars]

	Annual revenue effect					Cumulative 5-yr increase
	1982	1983	1984	1985	1986	
Loss under current law	25.3	31.8	39.8	49.7	62.2	.....
Increase from $5,000 cap	4.3	5.4	6.8	8.5	10.6	35.6
Increase from $10,000 cap	.8	1.0	1.2	1.6	1.9	6.5
Increase under Carter budget	(no proposal)					

Note: Preliminary estimates, subject to change.

Home mortgage interest payments have always been deductible under the federal income tax, thus providing a large and popular subsidy for homeownership. Because the deduction stimulates homeownership, it is often said to promote better home maintenance and greater civic involvement. Moreover, the subsidy it provides has been widely incorporated into prices and investment decisions throughout the economy and could not be eliminated without causing significant short-term losses and economic dislocation.

Recent economic studies, however, suggest that the deduction may have important adverse consequences both for housing markets and for the economy as a whole. Besides creating substantial losses of federal revenues, it appears to have contributed both to a serious decline in the construction of rental housing and to the conversion of rental housing into condominiums and cooperatives. In addition, the deduction has promoted the rapid rise of home prices and encouraged the flow of individual savings into housing rather than into productive capital.

Many homeowners receive little or no benefit from the deduction. Almost 60 percent of all homeowners either have no mortgage or use the standard deduction and thus gain no direct benefit from the deductibility of home mortgage interest. While taxpayers with income over $50,000 save on average more than $2,400 a year in taxes from the deduction, the great majority of homeowners with incomes below $20,000 save little or nothing.

If the Congress wished to reduce the revenue loss from the deduction, the simplest option would be to limit the amount of mortgage interest that could be deducted. If the ceiling were set high enough, most homeowners would not be affected. At the same time, price increase for more expensive homes would tend to moderate and the incentives for condominum conversion would decrease. For example, if a ceiling of $5,000 was set effective January 1, 1981, the savings would be about $4.3 billion in fiscal year 1982. This ceiling wou'd affect only 4.6 percent of all taxpayers. Homeowners with a 12 percent mortgage would be affected only if their mortgage principal was over $41,700. Homeowners with a 7 percent mortgage would be affected only if their mortgage principal was over $71,750. A $10,000 ceiling would save about $800 million in fiscal year 1982, but it would also affect many fewer persons—only homeowners with a mortgage principal of over $83,500 at a 12 percent interest rate. Under this ceiling, many recent purchasers of homes costing up to $100,000 could be shielded from a tax increase.

The current deduction could be converted to a tax credit to extend the subsidy to all homeowners, including those who do not itemize. Under a flat-rate credit, tax savings would be a constant percentage of all mortgage interest paid. Under the current deduction, by contrast, the savings range from 14 percent to 70 percent of all interest pay-

ments, depending on the taxpayer's marginal tax rate. Converting the current deduction to a 25 percent tax credit would increase revenues by about $3.5 billion in fiscal year 1982, while at the time targeting more financial assistance on low- and moderate-income homeowners.

Applying these changes only to newly purchased homes, rather than to all outstanding mortgages, would prevent tax increases for some homeowners but lead to a variety of perceived inequities among those purchasing homes at different times. It could also force some homeowners to maintain their present homes, and thus delay significant revenue gains for a number of years. Applying the changes to all outstanding mortgages would avoid these problems. Most people's taxes would not be sharply increased, since the proposed changes would involve fairly modest departures from present law.

One problem with limiting the mortgage interest deduction is that the limit could be circumvented by using a business or some other asset as collateral for the loan. This problem could be alleviated by adopting a broader limit on all nonbusiness interest deductions, similar to the $12,000 limit approved by the House of Representatives in 1975.

(5) REDUCTION OF CAPITAL GAINS EXCLUSION ON HOME SALES

[In billions of dollars]

	Annual revenue effect					Cumulative 5-yr increase
	1982	1983	1984	1985	1986	
Loss under current law	0.7	0.7	0.8	0.8	0.9	.....
Increase from reducing exclusion to $50,000	(1)	.1	.2	.2	.2	0.7
Increase under Carter budget	(no proposal)					

[1] Less than $50,000,000.

Note: Preliminary estimates, subject to change.

Persons 55 and older are allowed a one-time exclusion from capital gains tax of up to $100,000 of profit on the sale of their principal residence. This tax provision, enacted in 1978, replaced a far more limited provision that applied only to less expensive homes and only to persons aged 65 or over.

The provision encourages older homeowners either to become renters or to move to less expensive homes, thus freeing up some larger homes for younger, larger families. On the other hand, it may also discourage some homeowners just below the current age limit from moving. The provision probably helps to raise housing prices, as buyers become willing to pay more in the expectation of future tax-free gains. While this increases the investment value of homes, it also diverts funds away from other, possibly more productive investments, such as business plant and equipment.

If the $100,000 exclusion was cut back to $50,000 effective July 1, 1981, and if taxpayers were allowed to use it cumulatively, rather than for just one sale, the revenue loss would be reduced. A homeowner would continue to be able to shelter gain on a home sale by purchasing another residence costing at least as much as the home sold. Moreover, since the 1978 decrease in capital gains taxes, no gain is taxed at more than 28 percent.

(6) REPEAL OF CONSUMER INTEREST DEDUCTION

[In billions of dollars]

	Annual revenue effect					Cumulative 5-yr increase
	1982	1983	1984	1985	1986	
Loss under current law	6.0	6.8	7.8	8.9	10.1	.....
Increase from repeal of deduction	6.0	6.8	7.8	8.9	10.1	39.6
Increase under Carter budget	(no proposal)					

Note: Preliminary estimates, subject to change.

Interest payments have been deductible ever since the federal income tax was enacted in 1913, at a time when nonbusiness credit transactions were virtually unknown. Over the years, however, the use of consumer credit has become widespread, and the interest deduction now has the effect of providing more than $6 billion a year in tax relief to those who pay for their goods on credit instead of in cash. Only a small fraction of borrowers share in the $6 billion, however; the consumer interest deduction was claimed by just 17 percent of all taxpayers in 1979. If the deductability of consumer interest was ended effective January 1, 1981, federal income tax receipts would increase by $39.6 billion over the 1982–1986 period.

The argument for repeal of this deduction is that it is a policy accident which discourages saving and promotes consumption, is very costly in terms of lost revenue, and provides more financial assistance to an upper-income borrower than to a lower-income borrower making the identical purchase. The 2 percent of taxpayers with incomes over $50,000 receive 22 percent of the tax relief provided by this deduction.

An argument in favor of retaining the deduction is that it is sometimes difficult to distinguish interest paid for business or other purposes from interest paid on consumption purchases (for example, when a small business or a home serves as the collateral for a loan). The problem could be dealt with by putting a limit on all nonbusiness interest deductions . . .

(7) LIMIT ON PARENTAL PERSONAL EXEMPTION FOR STUDENTS

[In billions of dollars]

	Annual revenue effect					Cumulative 5-yr increase
	1982	1983	1984	1985	1986	
Loss under current law	1.1	1.1	1.1	1.1	1.1	.....
Increase from limit on parental exemption	1.1	1.1	1.1	1.1	1.1	5.5
Increase under Carter budget	(no proposal)					

Note: Preliminary estimates, subject to change.

Under current law, a parent can claim an exemption of $1,000 for a dependent aged 19 or over if the dependent is a student. If an over-18 dependent is not a student, the parent also receives an exemption provided the dependent earns no more than $1,000 in the year. The rule allowing a parental personal exemption for students, even if they earn more than the amount of the exemption, was adopted in 1954. The main reason for the rule was to avoid the "notch" problem that resulted when a dependent's earning were close to the exemption amount; an extra few dollars in earnings could deprive the parents of the exemption, costing them hundreds of dollars in extra taxes. The exemption was also justified as a way of taking into account the added costs parents incur for students.

If the exemption for students aged 19 and over was repealed effective January 1, 1981, the increased federal revenues over the 1982–1986 period would total about $5.5 billion.

The main argument for repeal of the parental exemption for students is that it is not well designed as a measure to assist parents in meeting the costs of educating their children. Its value in tax savings is greatest for those in the highest marginal tax brackets, and it is unrelated to the costs of a child's education. With the great expansion of federal student aid in recent years, it can be argued that the relatively modest and not very well targeted assistance provided by the extra exemption is no longer needed.

The main argument for retaining the exemption arises from the notch problem that prompted the 1954 change. Even though parents of nonstudents over 18 face this problem under present law, most of these nonstudents earn well over $1,000 a year so that the question normally does not arise. Students, who often work only part time, are much more likely to have earnings for the year that come close to the $1,000 dividing line.

(8) LIMITING OF ELIGIBILITY FOR TARGETED JOBS TAX CREDIT

[In millions of dollars]

	Annual revenue effect					Cumulative 5-yr increase
	1982	1983	1984	1985	1986	
Loss under extension of current law	345	345	350	355	355	.....
Increase from limiting eligibility	40	115	165	175	175	670
Increase under Carter budget	NA	NA	NA	NA	NA	NA

Note: Preliminary estimates, subject to change.

The Targeted Jobs Tax Credit (TJTC) program is designed to help certain classes of unemployed workers find jobs by authorizing tax credits of up to $3,000 in the first year and $1,500 in the second year to employers who hire any member of seven targeted groups, including cooperative education students between the ages of 16 and 19. By the end of fiscal year 1980, 305,000 people had been certified for TJTC participation, of whom 151,000 were cooperative education students.

Cooperative education programs arrange for high school and, in some cases, post-secondary students to spend a part of the school day working in local businesses, thus gaining employment experience. Many cooperative education programs are well established and have little difficulty generating work placements for participating students. Therefore, eliminating cooperative education students from TJTC would focus the subsidy on people likely to experience the greatest difficulty in finding employment.

On the other hand, employers who have received tax credits for hiring cooperative education students may decide to hire members of other targeted groups instead, thus eliminating any increased revenues from

this provision. Also, the recent increase in minimum wage rates may make cooperative education placements more difficult to generate; some program coordinators feel that TJTC helps to maintain the attractiveness of cooperative education programs.

President Carter's budget for fiscal year 1982 does not recommend that the TJTC be extended when the current law expires on October 1, 1981.

(9) TIGHTENING OF THE MEDICAL EXPENSE DEDUCTION

[In billions of dollars]

	Annual revenue effect					Cumulative 5-yr increase
	1982	1983	1984	1985	1986	
Loss under current law	4.1	4.7	5.3	6.0	6.9	.....
Increase from eliminating health insurance deduction	.4	.4	.5	.6	.7	2.6
Increase from raising floor for deductible expenses to 10 percent of AGI	2.5	2.5	2.8	3.2	3.7	14.3
Increase under Carter budget	(no proposal)					

Note: Preliminary estimates, subject to change.

The 35 percent of taxpayers who itemize may claim as deductions up to $150 for health insurance premiums, plus all out-of-pocket medical expenses that in total exceed 3 percent of adjusted gross income (AGI).

The separate deduction for health insurance premiums was adopted in 1965, in the belief that it would encourage the purchase of such insurance. There is no empirical evidence that it has had such effects. But there is substantial evidence that the financial assistance provided by this tax subsidy is not well targeted on those with the greatest need. The deduction is claimed by less than 4 percent of all taxpayers with incomes under $10,000, but by more than 50 percent of those with incomes over $100,000.

The deductibility of medical expenses above 3 percent of adjusted gross income has been justified on the ground that it assists people with extraordinary and involuntary expenses. But some of those expenses are optional rather than involuntary. The deduction has also been criticized for the characteristic it shares with all deductions: it provides a larger, rather than a smaller, subsidy rate the higher a person's income.

The basic argument for change in this instance is that, if the income tax system is to be used to shift part of a person's health care costs to the federal treasury, the relief ought to be confined to taxpayers with genuine financial need. This is the same principle that governs Medicaid, the government's direct expenditure health care program for the poor. By this standard, the separate deduction for health insurance premiums would be repealed, and the 3 percent threshold for the medical expense deduction raised to a level considerably higher than the average family health care cost burden.

Repeal of the deduction for health insurance premiums would increase federal revenues by about $2.6 billion over the 1982–1986 period. If the threshold for the medical expense deduction was raised to 10 percent effective January 1, 1981, revenues for the five-year period would increase by about another $14.3 billion.

(10) LIMITING OF HOSPITAL BOND TAX EXEMPTION

[In billions of dollars]

	Annual revenue effect					Cumulative 5-yr increase
	1982	1983	1984	1985	1986	
Loss under current law	0.7	0.8	0.9	1.0	1.2	.....
Increase from repeal of tax exemption on new bonds	.1	.2	.3	.5	.6	1.8
Increase under Carter budget	.1	.2	.4	.5	.7	1.9

Note: Preliminary estimates, subject to change.

About half the funding for capital projects at hospitals comes from tax-exempt bonds. Over $3.4 billion of these bonds were issued in 1979 alone. More than 75 percent were used to finance private nonprofit hospital projects, with the rest supporting public government-owned hospitals. The federal loss in fiscal year 1982 from all outstanding private hospital bonds will be about $700 million.

The lower borrowing costs from tax-exempt bond financing provide savings to the hospital, which they may pass on in the form of lower charges to patients, to insurers, and to the federal government through Medicare and Medicaid. These potential cost savings are outweighed, however, by the revenue losses from the bonds. As with all tax-exempt bond subsidies, about a quarter of the subsidy goes to outsiders including bondholders, underwriters, and bond counsel. Every $1 saved by the borrowing hospitals thus costs $1.33 in lost federal revenue.

The effectiveness of the subsidy can also be questioned because it allocates resources on the basis of a hospital's financial standing, rather than on the need for such facilities in a particular area. At present, the United States does not have a general shortage of hospital beds, and thus the Congress has sharply reduced direct expenditure subsidies for hospital facilities.

Eliminating the tax exemption for private hospital bonds issued after July 1, 1981, would increase fiscal year 1982 revenues by about $100 million, and the amount would grow significantly in later years, reaching about $600 million by fiscal year 1986. The Carter budget contains a similar ban on further tax-exempt bond financing by private hospitals, effective January 1, 1981, but extends it to all tax-exempt private institutions, including colleges and universities. Both of these options would preserve tax-exempt financing for public hospitals.

(11) REPEAL OF THE CASUALTY LOSS DEDUCTION

[In billions of dollars]

	Annual revenue effect					Cumulative 5-yr increase
	1982	1983	1984	1985	1986	
Loss under current law	0.9	1.0	1.1	1.3	1.4	.....
Increase from repeal of deduction	.4	1.0	1.1	1.3	1.4	5.2
Increase under Carter budget	(no proposal)					

Note: Preliminary estimates, subject to change.

Under current law, taxpayers who itemize their deductions may deduct losses caused by fire, storm, shipwreck or other casualty, or theft, to the extent that the taxpayer is not reimbursed for the loss through insurance, disaster assistance, or other compensation. In 1964, the Congress limited the deduction to the amount of each loss in excess of $100.

If the deduction was repealed effective July 1, 1981, revenues would increase by about $400 million in fiscal year 1982 and by about $5.2 billion over the 1982–1986 period.

The main argument for allowing the deduction is that taxpayers who suffer large, unpredictable, and unavoidable losses have a diminished ability to pay their federal income taxes and should thus be granted some financial assistance.

The present system, however, has three drawbacks: It is difficult to administer, it provides an uneven kind of disaster assistance, and it creates perverse incentives. The deduction is difficult to administer because defining a casualty loss is inherently difficult and valuing the loss is even more difficult. The definition, for instance, includes the loss of nonessential luxury items such as jewelry, furs, and ornamental shrubs, whose loss probably does not diminish an individual's ability to pay tax. A deduction is allowed only for sudden and unexpected losses. A deduction is allowed, for instance, for ornamental shrubs struck by lightning but not for the same shrubs lost gradually to winterkill.

The deduction provides uneven disaster assistance because the assistance is granted only to those who itemize their deductions, and the amount of the assistance for a given loss increases with the taxpayer's marginal tax rate. Only about 3 percent of all taxpayers claim the deduction, but it is skewed toward those with the highest incomes: The top 5 percent will receive about 40 percent of the financial assistance provided in 1981.

Finally, the current system discourages some taxpayers from taking precautions of their own against disaster—encouraging them to buy less insurance than they otherwise might.

An alternative to outright repeal would be to establish a higher floor for the deduction. Raising it from $100 to $250 would simply be an adjustment for the inflation that has occurred since 1964, and would cut the projected revenue loss by about $150 million a year. In 1978, President Carter recommended that the floor be made dependent on income, and that the personal casualty and theft loss deduction be combined with the medical expense deduction, but the Congress took no action on that recommendation.

(12) REPEAL OF TAX CREDIT FOR "POSSESSIONS CORPORATIONS"

[In billions of dollars]

	Annual revenue effect					Cumulative 5-yr increase
	1982	1983	1984	1985	1986	
Loss under current law	1.1	1.1	1.3	1.5	1.7	.....
Increase from repeal of tax credit	.4	1.1	1.3	1.5	1.7	6.0
Increase under Carter budget	(no proposal)					

Note: Preliminary estimates, subject to change.

"Possessions corporations" are companies incorporated in the United States that are exempt from U.S. income tax on their opera-

tions in Puerto Rico, American Samoa, and Guam. Ninety-nine percent of the revenue loss is attributable to Puerto Rico.

If the possessions corporation exemption was repealed effective January 1, 1982, the revenue increase would be about $400 million in 1982 and $6 billion over the 1982–1986 period.

The exemption was originally enacted in 1921, mainly to provide U.S. firms doing business in the Philippines, then a U.S. possession, with the same favorable tax treatment enjoyed by their British competitors. In 1975, the House Ways and Means Committee considered repeal of the exemption on the grounds that its original purpose was no longer being served, since the Philippines ceased being a U.S. possession in 1946. Proponents of the exemption argued, however, that it had become crucial to the economic development of another U.S. possession, Puerto Rico. A large number of U.S. firms had established plants in Puerto Rico after Puerto Rico enacted special tax exemption provisions of its own in 1948, and it was argued that these firms were a primary source of jobs in Puerto Rico. It was also argued that the loss of revenue from the provision was quite modest—about $200–300 million a year—and that this was a small price to pay for the benefits achieved. The Tax Reform Act of 1976 narrowed the possessions corporation exemption somewhat, and required that the Treasury Department report annually on the "operation and effect" of the exemption.

The third of these annual reports, released in June 1980, shows that the revenue loss from the possessions corporation exemption is much larger than originally estimated. A loss of $1.1 billion is expected in fiscal year 1982, increasing to $1.5 billion by fiscal year 1985. Almost 50 percent of the revenue loss in 1978 was attributable to 55 pharmaceutical companies, according to the Treasury report. Relative to their profits, these companies employ few people; the annual revenue loss per pharmaceutical company employee in 1978 was an estimated $43,261, while average compensation in Puerto Rico per pharmaceutical company employee was estimated at $13,618. For all 374 manufacturing companies benefiting from the possessions corporations exemption, the federal revenue loss per employee in 1978 was estimated to be $12,667, compared to average employee compensation of $10,697. The Treasury reports suggest that a major effect of the exemption in the 1970s has been to induce U.S. firms to shift high-profit, low-labor activities to Puerto Rico, with relatively few benefits to the Puerto Rican economy. Defenders of the exemption argue that it is crucial to long-term Puerto Rican economic growth, that the job loss and economic dislocation that would result from repeal would impose additional costs in the U.S. and Puerto Rican governments, and that the exemption is an important underpinning of the U.S.-Puerto Rican political relationship.

If, as the Treasury reports indicate, the possessions corporation exemption is not an efficient job-creating mechanism, it could be either phased out or replaced by some less costly form of assistance. Revenue-sharing funds could be extended to Puerto Rico, for example, to be used for whatever job-creating purposes the Puerto Rican government saw fit, or eligibility for the existing targeted jobs tax credit could be broadened to include more Puerto Rican workers. The cost of any alternative form of assistance would, of course, reduce the budgetary savings from repeal of the exemption.

OPTION 2—ACROSS-THE-BOARD CUTS IN TAX EXPENDITURES

Mr. BAUCUS. Another possibility would be to cut all tax expenditures by a small percentage. If, for example, the Congress would decide to reduce all tax expenditures by 5 percent, more than $13 billion could be reduced from our Federal deficit.

Recently, I asked the staff of the Joint Committee on Taxation to look into the technical problems that might be encountered if an option such as an across-the-board cut were seriously proposed.

The Joint Tax Committee staff responded yesterday with a brief memorandum suggesting that an across-the-board cut could be effected in most of the tax expenditures without serious administrative difficulty. The preliminary finding by the Joint Tax Committee staff was that there are roughly 23 tax expenditure items that are currently not required by law to be filed on tax return forms. These items are estimated to total roughly $60 billion in revenue losses for fiscal year 1982.

If one excludes those items from an across-the-board cut because of the administrative problems they would cause, we are left with over $200 billion in tax expenditures that could be subject to an across-the-board cut. If these items were reduced by, say, 5 percent, the proposed Federal deficit for fiscal year 1982 could be reduced by over $10 billion.

Mr. President, I ask unanimous consent at this point that the Joint Tax Committee memorandum and my letter requesting their assistance be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON FINANCE,
Washington, D.C., March 2, 1981.

MARK L. MCCONAGHY,
Chief of Staff, Joint Committee on Taxation, Washington, D.C.

DEAR MARK: I am writing to request the Joint Committee on Taxation's assistance in preparing legislation providing for a 5 percent reduction in tax expenditures for the purpose of reducing the federal deficit. Our staff discussed this proposal at a meeting last week.

There are at least three ways to achieve a 5 percent cut in the tax expenditure budget. One approach is to develop a package consisting of reductions and eliminations of particular tax exclusions and deductions. A second approach is to reduce each tax expenditure by a 5 percent amount. A third approach is to require each taxpayer—individual and corporate—to take all but 5 percent of tax expenditures in filing their tax return.

My preferential plan is to accomplish a 5 percent reduction through the latter approach. Accordingly, I would like the Joint Committee to suggest ways to implement a 5 percent reduction in tax expenditures by using the tax form as the mechanism. I am reminded that revenues were raised during the Vietnam War by a 10 percent surcharge tax added to each taxpayer's return. It may be that the Vietnam surcharge tax offers us some guidance in achieving a 5 percent tax expenditure cut.

In preparing your report, please address yourself to both individual and corporate tax returns. Please also identify administrative, technical and other difficulties in implementing this approach and suggest means for circumventing these difficulties and/or arguments for refuting their significance.

Should the 5 percent cut on each tax return prove unworkable, I would like the Joint Committee to look at the second alternative of cutting each tax expenditure item by the 5 percent amount. Questions I would like answered include:

1. How to design legislation providing for a cut in each tax expenditure?
2. Please identify the technical difficulties and the administrative complexities.
3. Please identify where the costs would equal or exceed the benefits.
4. Please suggest ways of avoiding and/or rebutting the difficulties and complexities identified in No. 2, above.
5. Please include a discussion of tax expenditure items (e.g. the excise expenditures), which do not appear in the Budget for FY82—Special Analysis G.

Wherever possible, the Joint Committee should provide revenue estimates for each approach. I respectfully ask that the deadline for this request be no later than April 10.

I look forward to working with you on this project. Please feel free to contact me, Debbie Landau or Steve Browning at 4–2651 if you have further questions. Thank you in advance for your help.

With best personal regards, I am

Sincerely,

MAX.

[Memorandum on tax expenditure reduction]

NONRETURN TAX EXPENDITURE ITEMS

MARCH 10, 1981.

To: Senator MAX BAUCUS.
From: Staff of Joint Committee on Taxation.

The general objective of reducing tax expenditures by 5 percent, as set forth in Senator Baucus' letter, could be accomplished in any of the ways noted in the Senator's letter. Some approaches would be more complicated than others.

The simplest way of accomplishing the Senator's objective probably would be to require every taxpayer (individual and corporate) to include in taxable income an amount equal to 5 percent of the sum of the tax expenditure items of that taxpayer. In the case of an individual, most tax expenditures probably appear on Schedule A for Form 1040. In the case of corporations, tax expenditure items generally must be noted to conform tax with book income (or for "E&P") purposes). Five percent of the sum of these deduction or exclusion items could be included in income on the applicable return. In addition, the sum of each taxpayer's credits could be reduced by 5 percent. This approach would result in a 5 percent, "rough justice," reduction in tax expenditures.

Another alternative would be to reduce a selected number of tax expenditures by an amount which would equal the overall reduction desired. This approach would require more than a 5 percent reduction in the affected tax expenditure items, and would focus attention on particular items.

Reducing tax expenditures by 5 percent would involve some administrative and technical difficulties because some tax expenditure items are not subject to "tax return information," i.e., they are not required to be shown on an income tax return and no income tax records are maintained with regard to them. Examples of these tax expenditures are: (1) tax exempt interest, (2) social security benefits, (3) other Governmentally-furnished benefits for military personnel, veterans, etc., and (4) certain employer-furnished fringe benefits, e.g., medical plan contributions, legal service plan contributions, etc.

While inclusion of non-return items in the 5 percent reduction would generate some administrative complexities, there would appear to be no policy reason why this could not be required. Each recipient of many of those items clearly knows whether they have been received. With respect to some of these items, annual statements may be prepared and furnished to the recipients for reasons

not related to the income tax. Some non-return items would generate difficulties, however. For example, if 5 percent of the value of an employer-furnished legal plan were to be included in income, the employee would have to know what 5 percent of its value (or cost to the employer) was before this could be accomplished.

A list of tax expenditure items that generally do not appear on, and the amount of which ordinarily cannot be computed from information contained on, a Federal income tax return, is attached. Items followed by the letter "A" simply do not appear on the return, but normally would not be difficult to compute. Items followed by the letter "B," on the other hand, do not appear on the return, and their computation frequently would impose administrative burdens on persons other than the taxpayer, e.g., employers.

Excluding some of these non-return items from a 5 percent reduction might be desirable for several reasons. First, some of these items, notably social security and similar benefits, might be viewed as a tax counterpart to the budget's "social safety net." Second, the majority of the recipients of such items probably would be nontaxable even with a 5 percent tax expenditure reduction. Third, inclusion of some non-return items would impose administrative burdens on persons other than the taxpayer filing the return. In some instances, the information generated would be used only for purposes of the 5 percent tax expenditure reduction.

Conversely, some non-return tax expenditure items do not appear to be part of a "social safety net," and including them in a 5 percent reduction would not generate administrative problems for persons other than the taxpayer filing the return.

Examples of possible "social safety net" tax expenditure items, as shown on the attached list, are numbers 1, 2, 11–20, and 22. Examples of items which might be excluded from the 5 percent reduction for administrative reasons include numbers 4, 6–9, 11–19, 21, and 23.

Estimating the revenue impact of excluding some or all of these items from a 5 percent tax expenditure reduction is difficult for several reasons. As with all tax expenditure listings, estimating the revenue impact of any particular list of items cannot be done simply by adding the individual estimates. For example, as noted above, the majority of social security recipients would remain nontaxable even with a 5 percent reduction in the amount of social security benefits excludable from taxable income.

NON-RETURN TAX EXPENDITURE ITEMS

1. Exclusion of Armed Forces benefits (sec. 112 & 113), A, B.
2. Exclusion of military disability pensions (sec. 104), A, B.
3. Exclusion of certain Federal employee cost-of-living pay differentials (sec. 912), A.
4. Exclusion of value of van pooling (sec. 124), A, B.
5. Exclusion of water and sewage facility construction payments (secs. 118 & 362(c)), A.
6. Exclusion of scholarships, etc. (sec. 117), A.
7. Exclusion of employee meals and lodging (sec. 119), B.
8. Exclusion of employer educational assistance (sec. 127), B.
9. Exclusion of legal service contributions (sec. 120), B.
10. Exclusion of cost-sharing payments (sec. 126), B.
11. Exclusion of medical premiums (sec. 106), B.
12. Exclusion of social security benefits (administrative), A.
13. Exclusion of railroad retirement benefits (45 USC 228), A.
14. Exclusion of workman's compensation benefits (sec. 104), A.
15. Exclusion of coal miner benefits (30 USC 801), A, B.
16. Exclusion of public assistance benefits (administrative), A.
17. Exclusion of employee life insurance (sec. 79), A.
18. Exclusion of employee accident insurance contributions (sec. 106), B.
19. Exclusion of supplemental benefit trust income (sec. 501(c)(17)), A.
20. Exclusion of life insurance interest (sec. 101), B.
21. Exclusion of veterans disability compensation, pensions and benefits (sec. 38 USC 3101; sec. 104), A.
22. Deferral of savings bond interest (sec. 454), B.
23. Exclusion of tax exempt interest on:
A. State and local debt (sec. 103), A.
B. Industrial development bonds (sec. 103(b)), A.
C. Mortgage bonds (sec. 103A), A.
D. Student loan bonds (sec. 103(e)), A.
E. UDAG-related issues (sec. 103(b)), A.
F. Pollution control bonds (sec. 103(b)), A.
G. Renewable resource bonds (P.L. 96-223, sec. 243), A.
H. Hydroelectric facility bonds (sec. 103-(b)), A.
I. Alcohol facility bonds (sec. 103(b)), A.
J. Solid waste bonds (sec. 103(g)), A.

OPTION 3—A LINE ITEM TO REDUCE THE NATIONAL DEBT

Mr. BAUCUS. Mr. President, another option, that might be considered by Congress is to insert a new line item on the tax return forms for all individuals and corporations that would reduce all tax expenditures by 5 percent.

The rationale is quite clear. It is that the American people accept the notion at this time that everyone must sacrifice if we are to reduce the national deficit. While the momentum exists for individual sacrifice, it may be appropriate to see if the American people would be prepared to pay 5 percent of their tax expenditures to help reduce the national debt.

I am reminded of the 10-percent tax surcharge proposed by President Johnson as a means of helping to pay for the increased costs of the war in Vietnam.

I am not here today to advocate any of these options. But, I am here to say that we can cut tax expenditures.

Mr. President, I support the effort to cut Federal spending, and I support a tax cut. But I want spending and tax cuts that are fair and evenhanded.

The fair way to make a tax cut possible is to reduce both unnecessary spending and tax expenditures that benefit the few, and use these savings to provide a significant tax cut to all Americans.

If Congress is to adopt an economic program that is truly fair, truly across-the-board, truly evenhanded, we must consider cutting tax expenditures.

I urge my colleagues to join me in this effort as we begin the process of taking action on President Reagan's economic program.

Mr. President, I yield back the remainder of my time.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business, not to exceed 30 minutes, and Senators may speak therein up to 5 minutes each.

Mr. BAUCUS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? There being no further morning business, morning business is closed.

CASH DISCOUNT ACT

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to the consideration of S. 414, which the clerk will state by title. The time for debate is limited to 5½ hours.

The assistant legislative clerk read as follows:

A bill (S. 414) to amend the Truth in Lending Act to encourage cash discounts, and for other purposes.

The Senate resumed consideration of the bill.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. CHAFEE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. RUDMAN). Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, what is the pending business?

The PRESIDING OFFICER. S. 414, which the clerk has reported.

The Chair believes that the Senator from Rhode Island is familiar with the fact that time for debate on this bill is limited to 5½ hours.

Mr. CHAFEE. How much time do I have under that agreement?

The PRESIDING OFFICER. The Senator from Rhode Island has 1½ hours under that time agreement.

Mr. CHAFEE. I yield myself 15 minutes.

Mr. President, I am pleased that the Senate has agreed to consider S. 414, the Cash Discount Act, which I introduced last month.

This bill will benefit consumers by allowing merchants to offer unlimited discounts to consumers who purchase with cash.

In other words, what this act would do, Mr. President, would be to change the existing law which restricts cash discounts currently to 5 percent. This bill would permit unlimited cash discounts. If a store owner wants to grant more than 5 percent, he would be free to do so.

S. 414 would open the way for the market rather than Congress to determine the extent of the discount. To further promote discounts, the bill would

eliminate existing regulatory disincentives.

One of the problems that exist now is the Federal Reserve has set out some extremely complicated regulations dealing with how to proceed with a cash discount, so complicated because both the rules are complicated and the 5 percent is so limited that indeed no cash discounts are given on any broad basis in the country.

This bill would eliminate existing Federal Reserve Board regulations. The Fed could, if necessary, issue further regulations, but the indication we have from the Federal Reserve is that they would not write further regulations in this matter.

On the other hand, the bill extends for 3 years the prohibition against credit card surcharges.

Until 2 weeks ago the law prohibited a merchant from adding a surcharge.

Upon assuming my position as chairman of the Consumer Affairs Subcommittee of the Banking Committee, I was faced with the imminent expiration of the existing surcharge ban. It expired February 27 and as we know, this Congress did not organize until January. I am sensitive to the similarities between surcharges and discounts but also concerned about the disadvantages of surcharges.

Now some will argue, and we will hear a good deal of oratory today in the Chamber, that if we are going to permit merchants to give discounts also let them make additions when people use credit cards of surcharges. That is what we are talking about when we use the word "surcharge."

There has been an excellent discussion on both sides. We had some good hearings in the Banking, Housing and Urban Affairs Committee and we will hear a good deal of discussion of this, as I say, today.

Mr. President, rather than act precipitously on a matter that Congress has failed to resolve during all the years that this matter has been pending—I have sought, with the bill that is before us today, basically a 3-year extension of the status quo, except we permit unlimited cash discounts. But this extension is not further avoidance of the issue. In the interim, we will have an opportunity to see whether the changes this bill effects with regard to cash discounts in fact encourage their use, thereby adding support to or diminishing the arguments on the need for allowing surcharges.

We will also have the benefit of additional information on the issue of subsidization—the question of whether credit cards result in higher overall costs that are passed on in added charges to the cash purchaser.

That is one of the underlying arguments about this whole matter of discounts and surcharges.

This bill that we have before us today includes an important provision which calls for the Federal Reserve Board to examine the relative costs of the various forms of payment. I expect that the study provision in S. 414 will result in concrete information which will be useful to Congress in formulating a permanent resolution of this discount-surcharge problem.

Mr. President, as chairman of the Subcommittee on Consumer Affairs I presided over a hearing on this matter on February 18. We had testimony which was broadly supportive of the cash discount provision. Debate, however, was focused on the surcharge issue in both the hearings and in the committee markup.

Therefore I would like to say a few words on the surcharge prohibition.

We are going to hear a good deal of passion on the part of those opposed to the surcharge ban, and I find this somewhat difficult to understand when all we are doing here is maintaining the status quo.

I think the history of this is important. The prohibition against surcharges was imposed in February 1976. It was extended again in 1978, and then last July, the Banking Committee, manned by some of those from whom we are going to hear passionate arguments against this matter, voted another extension of the surcharge ban.

I am unaware of any Senate opposition to it at that time.

What has happened over the past 5 years to arouse this antipathy? Indeed what has happened in the past 7 months since the Banking Committee last approved an extension?

It was stated in the committee last month that what is new is an appreciation of the cost of credit. But what was cited was the total figure the major credit card issuers received from merchants. I believe they cited a very substantial figure in billions of dollars that that is what credit card issuers received from all merchants in the country.

What is relevant is not that figure, but how the overall cost of credit card transactions compares to the cost of other forms of payment.

For instance, if someone goes in and pays cash that is not a matter that imposes no obligations or burdens on the storeowner. With cash he has proolems of security. With checks he has problems of fraud. It is by no means clear the cost of credit cards is the highest among all methods of payment.

In all the years that this issue has been before Congress we have not had any concrete information on the issue of subsidization. That is why I believe the study we are calling for is important.

There are two basic reasons for the temporary extension of the surcharge ban.

First, to allow surcharges would be a complete reversal of what has been the Federal law for 5 years and would presuppose the outcome of the study. In other words, why have a study if we are going into these matters already and change something that has been the law of the land for the past 5 years?

If subsidization is the key justification for two-tier pricing—in other words, one price for the credit-card user; one price for the cash user—first let us determine whether this justification is a fact before we move to expand two-tier pricing so broadly.

Second, while there are clear similarities between discounts and surcharges—we all acknowledge that—there are real consumer disadvantages to surcharges that are not associated with discounts. There are disadvantages with surcharges that we do not find with cash discounts.

With regard to surcharges, I am concerned that credit card customers can be misled and abused.

During the February 18 hearing there was firm support for a continued prohibition on surcharges. Ironically, though, the testimony of some of the witnesses who were opposed to the surcharge ban—I believe, gave strength to the position that I am maintaining here. Specifically, it was stated that merchants would probably prefer surcharges over discounts. That is because with discounts the merchants' regular price is the higher of the two prices offered. But with surcharges it was stated the merchants would advertise their rock bottom price as the regular price, and add the surcharge to that.

It seems to me the reason surcharges might be preferred by merchants is the very reason why we should be wary of their use. I am concerned if we allow surcharges, we would be opening the way to abuse of the consumer. The credit card customers might well be lured into a store by the advertised price, $100 for this, which is the advertised price, but which is only the price if you pay cash.

Then they take the goods, they go up to the counter—$100; fine, and they present their card. There they find the price is not $100 but is something higher, a price they did not suspect. I think the potential for deception is the very kind of practice we should be careful to guard against.

Now, a further disadvantage to surcharges is their potential inflationary impact. In implementing surcharges, merchants might simply slap on an added charge to their existing prices with no real benefit to the cash customer at all. At a time when customers are staggering under the weight of inflation, it is difficult to understand how allowing surcharges, which may result in still higher prices, can be proposed in behalf of the consumers.

I have heard the arguments that a surcharge prohibition is antifree enterprise and anticompetitive. I am as strong a believer in free enterprise and competition as anybody in this Chamber. But any law can be labeled antifree enterprise and anticompetitive, and any law is—any time you put any law on the books, it limits in some way free enterprise and free competition if it alters the way the business is conducted.

I might say all this stems from the Truth-in-Lending Act. That is why we are here. All of this comes out of a bill that in itself, I suppose, could be called antifree enterprise or anticompetition. But I think all of us support the concept of truth-in-lending: let the customer know what he is paying for.

But not all regulation is overregulation simply because it regulates. The question, of course, is always one of balance.

In the case of surcharges I am not convinced that the added benefits outweigh

the consumer disadvantages. The benefits of two-tier pricing can be fully provided through discounts without the potential disadvantages of surcharges.

With the unlimited cash discount we provide in this bill, you can have all that without the potential disadvantages that I talked about before.

I believe they are very real. I can see many people going in, purchasing some goods, thinking this is the price, going up and paying with their credit card, and then the clerk says that it will not be $10, but that it will be $11.

With unlimited surcharges certainly they can do that, and the consumer really did not want to pay $11 and would not have paid $11 if he had known initially it was that price. But we are all susceptible to being bullied. The customer is not going to go through the embarrassment of going back and saying, "In that case I won't take it. I don't have the cash. I thought this was the price," and meekly go back and put the goods back on the counter. I do not think that will happen. There will be a lot of people taking advantage of the unlimited surcharge, as suggested.

I am hopeful and confident that the elimination of existing regulations will increase the availability of cash discounts, thereby obviating any need for surcharges.

But the important point is this issue will be examined again by Congress within the next 3 years, and if experience shows that discounts are still not widely offered, Congress may conclude that they want to go into surcharges as the only effective approach to two-tier pricing.

On the other hand, if the data provided by the Federal Reserve study indicate there is little or no subsidization of credit card customers by cash customers—it is not exactly clear that the person who is paying cash is indeed subsidizing the credit card user. Certainly the merchants have concluded it is worth their while to have credit cards or they would not use them, they would not encourage them. Some come to the conclusion that they do not want to accept them; certain fancy restaurants in New York City will not accept a credit card, but most places think the added volume contributes to their business.

The PRESIDING OFFICER (Mr. MATTINGLY). The Senator's 15 minutes have expired.

Mr. CHAFEE. I yield myself 5 more minutes, Mr. President.

So there is no clear finding certainly as yet, and actually the only study we have ever had, which was some time ago, admittedly was in 1968, a Federal Reserve study said cash customers did not subsidize credit card customers. Clearly, Mr. President, there are too many unanswerables at present. Additional experience and information are necessary.

Under the previous bills that were passed, that I mentioned, starting back in 1977 and onward, was no provision for a study. I do not know why they did not do that. Some of the people who are going to argue with extreme passion on the floor today, when they were dealing with this matter previously never provided for any study. I think a study should take place. As I say, we provide for that.

Mr. President, one further point with regard to my proposal for a study. At first we considered what might turn out to be quite an expensive study on the part of the Federal Reserve, and it was estimated that this would cost up to as much as $1 million. There were objections to that, and I can understand that. In this era of budget restraints when we are cutting things, why spend $1 million on a study? So I think it would be irresponsible to call for expenditure of those sums for the Federal Reserve. But the study we provided is somewhat narrower in scope. It addresses essentially only the direct question of subsidization, and it encourages the Federal Reserve Board to tap other responsible research sources on the subject.

To the extent this approach results in the generation of additional data by responsible sources, the Federal Government's examination and the taxpayers can only benefit.

It is expected, of course, Mr. President, that the Federal Government would objectively critique and analyze all material it utilizes, supplementing it with whatever additional information of its own it deems appropriate.

I believe that S. 414, the Cash Discount Act, is a sound and constructive approach to an important consumer banking issue. It encourages two-tier pricing. For the first time we allow unlimited cash discounts while, at the same time, it continues the surcharge ban and its protections against consumer abuses for 3 years. This ends in 3 years, and Congress can always stop it before then if it gets to be a burning issue before then.

Further, the bill calls for the study that I mentioned which will provide the concrete information which has been sorely lacking over the past several years, to assist Congress when it examines this issue again. Let me say, too, Mr. President, as you know, we did not extend the ban for 2 years. There was a certain temptation to do that. But then in 2 years we would be in the same situation, with another new Congress just coming in, the act expiring February 27, and all the problems with committees getting organized and not having the people who were familiar with the issue dealing with it. So we made it 3 years, when it would be in the middle of a Congress.

I urge my colleagues to adopt this legislation.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Utah.

Mr. GARN. Mr. President, will the floor manager for the majority yield me 3 minutes?

Mr. CHAFEE. I yield 3 minutes to the distinguished Senator from Utah.

Mr. GARN. Mr. President, today we bring the Cash Discount Act before the Senate. I support this bill with enthusiasm as both chairman of the Banking Committee and as an original cosponsor, since it provides significant benefits to consumers, particularly during these inflationary times.

The Cash Discount Act would permit merchants to reduce the regular price they normally charge for their goods or services for the benefit of consumers who pay by cash or check rather than by credit card. Presently the law places an artificial 5 percent limitation on the discounts that merchants can offer to cash-paying customers. This act would eliminate that limitation and allow merchants and the marketplace to determine the level of discounts that are offered.

On the other hand, this bill would continue a ban against merchants adding a surcharge to the regular price for those customers choosing to pay by credit card. Since 1976, the law has specifically prohibited merchants from imposing surcharges on credit card customers. While that prohibition expired on February 27, it is the intention of the Banking Committee to see that prohibition reenacted for a 3-year period, pending a study by the Federal Reserve Board on the relative costs of credit versus other forms of payment.

What I most want to stress is the urgent needs for expeditious action on this issue. On February 24, the House passed, by a vote of 372 to 4, a very similar bill to S. 414, which was accepted by voice vote of the committee. The House is anxiously awaiting action by the Senate and if S. 414 passes the Senate in its present form, we have been assured that it would be promptly accepted by the House. However, it is equally clear that if the Senate accepts an amendment which specifically allows merchants to surcharge, this will be unacceptable to the House, and a long delay will ensue.

I reiterate the necessity for prompt action, particularly on the surcharge issue. While Congress delays, those merchants who are aware of the expiration of the surcharge ban and who impose a surcharge during this interim period are risking violations of both State usury ceilings and the Truth in Lending Act. Therefore, I urge you to accept this bill which was overwhelmingly endorsed by the Banking Committee, without amendment, and send it to the House for prompt action.

I would also like to point out the anomolous situation which exists while this bill is pending. Due to the expiration of the surcharge ban, while there is no limit to the amount that a merchant can add to the regular price and thereby increase the cost to credit card customers, there is still a 5-percent restriction on the amount that a merchant can discount for cash customers. In other words, there is a cap on the ability of merchants to offer certain consumers reduced prices, but no limitation on, and no prohibition against, merchants imposing a surcharge which simply increases the cost to certain consumers.

I intend to keep my initial comments brief since the committee report describes the Cash Discount Act and the committee's position, and Senator CHAFEE's statement certainly echoes my own views on this issue. However, I would like to merely highlight a few important points.

First, the basic premise for permitting

surcharges is the theory that credit cards result in higher overall costs than other forms of payment and therefore cash customers are forced to subsidize credit card customers. This basic premise has never been proven, and in fact, the only available evidence indicates the contrary. Therefore, we are requesting the Federal Reserve Board to examine this primary issue and report its findings to the Congress.

In the interim, the Cash Discount Act maintains the status quo on surcharges and allows merchants who do wish to offer two-tier pricing to do so through cash discounts.

Second, I have a real concern that surcharges could contribute to inflation. Since the testimony before the committee indicated that merchants who presently offer discounts do not begin by raising all of their prices, it logically follows that those who surcharge do not first lower all of their regular prices. Merchants might simply add this additional charge to their present prices, resulting in higher prices for credit customers with no relief for cash customers.

In addition, this bill would change the existing law regarding cash discounts in order to facilitate the offering of deeper discounts to more consumers. If these changes increase the availability of cash discounts, all the benefits of two-tier pricing may become available to consumers without the need for surcharges.

In order to encourage merchants to offer cash discounts, the Cash Discount Act would not only remove the existing 5-percent limitation, but would also specifically abrogate existing complex regulations. The Committee believes that the detailed regulations which implement the consumer protection requirements may be partly responsible for the hesitancy of merchants to offer cash discounts.

While nullifying the existing regulations, the bill would not eliminate the statutory consumer protections. Sellers would still be required to offer discounts to all prospective buyers and to clearly and conspicuously disclose their availability. However, merchants would be able to decide what manner or method of clear and conspicuous disclosure best suits their purposes.

The provisions of this bill would also enhance competition in the marketplace. It would permit merchants to price their goods and services with an unrestricted differential between the price to credit customers and the price to cash customers. It would permit merchants to charge a higher price for those consumers who pay by credit and a lower price for those who pay by cash. In other words, it would permit merchants to utilize two-tier pricing systems.

However, what it would not permit is the implementation of two-tier pricing systems which deceive or mislead the consumer. The only difference between what would be permissible under the Cash Discount Act and what would occur if surcharges were specifically permitted, is the different methods by which the price of merchandise could be tagged or posted. And I contend that that is a significant difference.

The Cash Discount Act would permit merchants with two-tier pricing systems to tag or post either both prices, one price or no prices. However, if only one price is tagged or posted, the act would require that that be the higher of the two prices, namely the credit price. This assures that consumers cannot be lured into an establishment on the basis of the "low rockbottom" price, only to find at the checkout counter that it will cost more if a credit card is used. This guarantees that consumers will be exposed to the highest possible price they will have to pay when they see a tagged or posted price, and therefore will not be misled or deceived.

Mr. President, I could continue to expound upon the benefits of the Cash Discount Act, but I would like to move this bill along as rapidly as possible. I will only say that this legislation would facilitate free-market competition and provide significant benefits for consumers while still assuring that consumers are not misled or deceived when they are shopping for goods and services.

I urge the adoption of the Cash Discount Act.

HOME MORTGAGE DISCLOSURE ACT AMENDMENTS

Mr. President, the time agreement on S. 414 permits me to offer an amendment to the Home Mortgage Disclosure Act allowing the Federal Financial Institutions Examination Council to defer, for 1 year, the aggregation of HMDA reports.

The Exam Council unanimously voted to approve this recommendation, and I find it sensible and highly desirable. However, I am not going to offer this amendment today because I understand that there are Members in the House who object to it, and we have promised not to jeopardize the rest of the bill with potentially controversial provisions. Therefore, the amendment will not be offered. The time allocated for nongermane amendments will not be used.

The amendment would have released the Exam Council from spending at least $300,000, and probably closer to $1 million to produce aggregated HMDA reports of questionable usefulness. The amendment would not have eliminated any of HMDA's disclosure requirements; it merely would have deferred, for 1 year, the aggregation of HMDA reports. As pointed out by the Exam Council, in their unanimously approved resolution which I am attaching for the RECORD, aggregation of last year's reports pose many problems.

For example, calendar year 1980 HMDA reports will be based on 1970 census tracts, which will be matched to 1970 census tract demographic information. Unfortunately, 1970 census tract information is obsolete, and therefore often irrelevant, in 1980. We need look no further than the Capitol Hill area to see that the demographic, racial and housing information for the 1970 census will differ dramatically from the 1980 census data from the same area. Because the obsolete 1970 census data will be used as the basis for aggregation, the resulting aggregated reports will often be very misleading.

The Exam Council also points out that many financial institutions will not be reporting on standard formats for the 1980 calendar year. Aggregating data from nonstandard formats requires extensive editing and transcribing onto standard data entry forms. There are also problems arising from ZIP code reporting in 1980 disclosures.

Finally, and most importantly in these budget-cutting days, the Exam Council estimates that the cost for aggregating HMDA data, to produce a product of questionable use and meaningfulness, is $300,000 at the very least. This figure is a conservative, and improbably low, estimate based strictly on known data processing costs. It does not account for problems that may be encountered in the aggregation process, although it is expected that there will be many. Witnesses testifying before the Banking Committee last spring estimated that the costs of HMDA aggregation could range well over $1 million.

Therefore, the expense of aggregation, the questionable meaningfulness of the resulting reports, and the difficulties arising from ZIP code reporting and nonstandardized formats for 1980 HMDA statements make it necessary to postpone aggregation until next year. I would hope that we could quickly act to avoid the expense of producing misleading and unreliable aggregated HMDA reports. It is pure and simple "waste" to sanction spending several hundred thousand dollars for a report "that will be of limited use to the public and to the Federal financial institutions regulatory agencies." Therefore, although I will not today try to accomplish this needed amendment to the Home Mortgage Disclosure Act, I certainly find the Exam Council's recommendation on this matter commendable and hope we may pursue it another time.

I ask unanimous consent to have the recommendation printed in the RECORD.

There being no objection, the recommendation was ordered to be printed in the RECORD, as follows:

FEDERAL FINANCIAL INSTITUTIONS EXAM COUNCIL RESOLUTION

RESOLUTION

Whereas, section 340 of the Housing and Community Development Act of 1980 (the "1980 amendments", Public Law 96-399) amended the Home Mortgage Disclosure Act of 1975 ("HMDA", 12 U.S.C. sections 2801 et seq.) to require the Federal Financial Institutions Examination Council (FFIEC) to compile, each year for each Standard Metropolitan Statistical Area (SMSA), aggregate HMDA data by census tract and to produce tables for each SMSA that show aggregate lending patterns on the basis of specified neighborhood characteristics as determined by the latest available U.S. census;

Whereas, data from the 1980 census will not be available until approximately 1982, thus necessitating reliance on obsolete 1970 census data until that time;

Whereas, any demographic aggregation by census tract will be neither very accurate nor very useful unless it is based on census tract data derived from the 1980 census;

Whereas, there will be a significant volume of HMDA data for 1980 still reported by Zip Code, rather than by census tract, and these data must be aggregated without comparable demographic data and excluded from the tables showing lending patterns based on neighborhood characteristics;

Whereas, the prescribed standard HMDA disclosure format will become mandatory be-

ginning with disclosures for calendar year 1981;

Whereas, the lack of a prescribed disclosure format for 1980 means that HMDA data for 1980 will be reported by financial institutions in various nonstandard formats;

Whereas, without a standardized reporting format, processing of 1980 HMDA data will require extensive editing and transcribing of data onto standard data entry forms, and even then it will be very difficult for the FFIEC to assure the accuracy of the 1980 disclosures and, consequently, the 1980 aggregate compilations;

Whereas, it is estimated that the aggregation of the 1980 HMDA data will cost the FFIEC and the agencies a minimum of $300,000;

Whereas, in light of the problems arising from the unavailability of 1980 census data, the lack of a standard disclosure format, and the number of reports filed by Zip Code, it appears that any aggregate compilation for 1980 will be of limited use to the public and to the Federal financial institutions regulatory agencies, and that the costs of preparing the 1980 aggregate compilations will substantially outweigh any usefulness the compilations may have; and

Whereas, even if aggregate compilation were not required for 1980 data, covered financial institutions will still be required to make available individual HMDA disclosures for 1980, individual disclosure reports will still be filed in central respositories in each SMSA and made available for inspection and copying by the public, and the 1980 reports will still be available for use by the examiners of the Federal financial institutions regulatory agencies: Now, therefore, be it

Resolved, That the Federal Financial Institutions Examination Council urges the Congress to amend section 310(a) of HMDA (12 U.S.C. section 2809(a), as amended) by requiring the compilation, for SMSAs, of aggregate HMDA data beginning with HMDA disclosure reports prepared for calendar year 1981 rather than 1980.

Mr. DODD. Mr. President, I yield myself such time as I may need.

First of all, Mr. President, I commend the chairman of the Banking Committee, Mr. GARN, and the chairman of the Consumer Affairs Subcommittee, Mr. CHAFEE, for their able handling of the Cash Discount Act in committee.

I believe that it is vitally important for the Senate to act quickly on this legislation so that we can increase the availability of cash discounts for consumers. This bill is designed to help carry out the goal established by Congress back in 1974, which first allowed cash discounts to be offered without running afoul of the Truth in Lending Act. That goal was to let merchants "reward" cash customers by returning some or all of the charges imposed by the credit card companies.

Unfortunately, Mr. President, the availability of these discounts has remained very limited. As I understand it from testimony before the Banking Committee, and as described by the able Senator from Rhode Island, two of the main reasons why so few merchants have offered cash discounts in the past have been the 5-percent cap on the size of the discount and the restrictive and complex rules adopted by the Federal Reserve to carry out this legislation. These regulations carefully spell out how a merchant is to disclose availability of a discount and its complexity has frightened many merchants away from offering discounts for fear of inadvertently violating the Fed's regulations.

This legislation we are considering today would help boost use of discounts by removing these two impediments. The 5-percent cap would be removed, allowing merchants to decide what size of a discount would be appropriate; and, the Fed's existing regulations covering discounts would be nullified and the requirement that availability of discounts be disclosed ' in accordance with regulations of the Federal Reserve" would be removed. The requirement of "clear and conspicuous disclosure," Mr. President, would remain. However, detailed regulations governing that requirement would not be necessary.

I find it somewhat interesting, Mr. President, that we are going to hear those who, at least traditionally, have been accused of being the overregulators, those who have been accused, I think, unfairly, of being ones who would insist that Government play a larger role in the lives of people in this country support and argue for getting the Federal Government out of another area of economic activity in this country.

That brings me to the next major point under this bill, which was disclosed ably, I might add, by my colleague from Rhode Island, the continuation of the ban on surcharges. We are going to discuss that issue today at some length. It is my understanding that two of our colleagues will be offering an amendment to lift that ban, so we will have a good discussion of it.

I would like to take a minute or so, Mr. President, to identify the problem that arises with a use of a ban on surcharges with credit card usage.

This is clearly the most controversial part of this bill: The provision extending the ban on surcharges for credit card use for an additional 3 years. This ban was first enacted in 1976 on a temporary basis. Those were the circumstances in which we established this ban. It was extended in 1979.

There was opposition about the ban, but the decision was to extend it another couple of years. As was pointed out, it expired. In effect, it no longer exists. The ban was lifted on February 27, 1981.

The original purpose of the ban was to resolve uncertainty about whether discounts and surcharges were the same—that was the purpose of the ban—and about the economic impacts of allowing both surcharges and discounts to be exempted from the truth-in-lending disclosure requirements. However, this year, the Banking Committee has received testimony and comment from numerous and rather diverse sources that a continued ban on surcharges for credit card use may or may not be in the public interest.

Unfortunately, this issue has never been closely studied by the committee, as the Senator from Rhode Island has pointed out. However, thanks to his initiative, this issue will be the subject of a Federal Reserve study and report that should allow the committee to make its long-delayed, final decision on whether or not to allow surcharges.

I will return momentarily to why a study of the effects of credit card transactions would be more useful and enlightening in the absence of a ban on surcharge.

This legislation, I should quickly add, Mr. President, also addresses a couple of other issues. First, it would make a technical correction in the truth-in-lending simplification provisions passed last year in the Depository Institutions Deregulation Act. This correction would clarify civil liability requirements applicable to financial institutions at the time they might voluntarily comply with the simplified requirement, prior to the effective date of the statutory provision.

Second, the bill would extend for 2 years the time that banks have been given by the Comptroller of the Currency to divest themselves of the real estate required to be divested under the National Bank Act. This 2-year delay will help provide for a more orderly divestiture of this property and give the committee a chance to discuss the issue of bank real estate holdings more fully.

I would like to go back, if I may, and address the continuation of the ban on surcharges. There are several reasons, Mr. President, why I believe it would be in the consumers' interest to lift this ban. I could not agree more, by the way, with the Senator from Rhode Island. This is not a clear-cut call. I do not think anyone knows exactly what the effect will be. But I believe, after listening to the testimony and after consulting with those who are most familiar with this problem, that the scales tip in favor of lifting this ban.

Let me identify a few of the reasons why I think this is so. First of all, during this period of high interest rates, which are strangling the housing industry in this country, as well as the automobile industry, small businesses, and economic activity in this country in general, the Government has no business requiring merchants to hide the cost of credit in their "regular price." And that is what is going on. They are paying for the cost of using credit and they are hiding it because of the ban.

We have seen in the last 6 years consumer debt quadruple from $15 billion to about $60 billion. Consumer debt is contributing to our present inflationary problems in this country. Clearly no one is going to deny that.

Second, I feel that Congress should begin to live up to its mandate to eliminate unnecessary Federal regulations.

I have just come through the electoral process of last November. I got the message. I think we all know what the message is. The message was to try to reduce the level of Federal regulations. That was one of the clear messages that people across this land were giving those who were running for public office or who hold public office.

Here we have our first chance to determine whether or not this institution is going to live up to the desires of the American people. They want less government in areas where there is healthy competition. So we have a chance today to eliminate some unnecessary Federal regulations. That is the second reason

why I think it is in the country's interest to lift this ban.

Third, it is not fair to cash payers. We should be encouraging people to use cash where possible, rather than using plastic. We all know that this has been a country of "plastic junkies" in the last few years. That is what has happened. But that addiction is not contributing to the economic well-being of this country, to further encourage that kind of activity.

Frankly, an awful lot of people cannot get credit today. Some are obtaining credit cards, but an awful lot of people do not qualify. As a result, the cash customer, evidence indicates, is paying for the charges associated with the use of credit.

Fourth, Mr. President, the true cost of credit, which varies among different credit card companies, should be openly disclosed. That is what the Truth in Lending Act intended. Again, the distinguished Senator from Rhode Island pointed out that was its purpose: to let consumers know what they are getting into.

It seems to me by allowing merchants to decide and identify the surcharge, we are doing just that. By lifting this ban, we are allowing consumers to make a choice, to be aware, to be conscious of the economic impact in terms of their own family budgets.

Last, I point out that a Federal Reserve study would be required under this legislation. Again, I commend the chairman of the Subcommittee on Consumer Affairs for proposing this study so that we might get a clear indication of the effect of the ban on surcharges. I would suggest, however, that we might get a better reading, a truer reading, in the next 3 years if the ban were lifted. Given the massive increase in the use of credit since the last study was done in 1968, we would be better able to compare the effects of the cash and credit transactions.

That is really what we ought to be trying to do.

I support the notion of the study under any circumstances. I think that should be done. But I think we are going to get a far better reading if we lift this ban rather than maintain it.

At any rate, this is a good bill. If the amendment is offered, I will support the amendment to lift the ban. If it is not and we have the study, I still intend to support the legislation. I think the elimination of the limitation on cash discounts and the abolishment of Federal regulations in this area are sound points. Even though we may not be able to eliminate the ban on surcharges, I intend to support this legislation, Mr. President, and I urge my colleagues to support it as well.

Mr. PROXMIRE addressed the Chair.

The PRESIDING OFFICER. The Senator from Wisconsin.

UP AMENDMENT NO. 9

(Purpose: To permit surcharges)

Mr. PROXMIRE. Mr. President, I thank my good friend from Connecticut for his leadership in this matter.

Mr. President, I call up an unprinted amendment which Senator GLENN and I are jointly offering. I ask that it be read and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. PROXMIRE), for himself and Mr. GLENN, proposes an unprinted amendment numbered 9.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 4, line 2, after "Sec. 101." insert "(a)".

On page 4, line 4, before "discount" insert "surcharge added to or".

Beginning with page 4, line 9, strike out all through page 5, line 10, and insert in lieu thereof the following: "106 if such surcharge or discount is clearly and conspicuously disclosed to all prospective buyers.".

(b) Section 171(c) of such Act is amended by inserting "surcharge imposed or" before "discount offered".

On page 5, line 11, strike out "Sec. 103." and insert in lieu thereof "Sec. 102.".

On page 5, strike out lines 16 through 21 and insert in lieu thereof the following:

TITLE II—STUDY OF CHARGE CARD TRANSACTIONS

On page 5, line 22, strike out "Sec. 202." and insert in lieu thereof "Sec. 201.".

Mr. PROXMIRE. Mr. President, before I begin, I would like to have it known that the amendment Senator GLENN and I are offering is technically different than the proposed amendment included in the "Dear Colleague" letter. By way of a drafting oversight, our initial proposal deleted the Federal Reserve Board study of credit card transactions. That problem has been corrected. Our proposal today also eliminates the definition of regular price. This definition becomes surplusage when merchants are permitted to impose credit card surcharges.

Mr. President, this is a very interesting and exciting moment for me because I think it is one of the first actions where the new Republican Senate has had a chance to take on a regulatory matter. I think the Republican Party in the Senate and in the country deserves credit for taking the strong position they have taken against excessive regulations. There is no question about it, this has caused a great burden on our business and on consumers.

All of us can only gain if we rely more on the freedom of the marketplace and less on the heavy hand of Government.

But that is the delicious irony we have before us today. Here we have the spectacle of our new majority ramming through a bill calling for increased restrictions of the private enterprise system as one of the first orders of business when we come to regulatory matters before us.

Mr. President, it is also ironic that the No. 1 domestic problem facing this country—and I think the President is absolutely right—is inflation. One of the reasons why inflation is so serious is because there has been far too much borrowing and too little cash payment in this country by the Federal Government and in the private sector.

All of us are well aware, and we have heard nothing else, about attacks on the Federal Government's excessive borrowing and spending. I support those attacks. I think the Federal Government has to reduce its borrowings, has to run surpluses instead of deficits, has to stop bidding up interest rates.

Mr. President, we have a bill here today which would continue to discourage people from paying cash.

I realize, of course, that the Federal Government is a big factor. It is probably a quarter of our economy. But almost two-thirds of our economy is in the private sector. If we are going to follow a policy of supporting regulations which discourage the payment of cash and encourage putting it on the cuff and borrowing money, encourage driving up interest rates, encourage inflation by excessive credit, it seems to me we are following a most unwise course, economically, and a course which is not in the interest of consumers, a course which particularly contradicts the very essence of the position the Republicans have properly taken, that it is time we emphasized the free enterprise.

Mr. President, I am going to quote in a few minutes from a number of free enterprise groups who strongly support the amendment Senator GLENN and I are offering, as well as a number of consumer groups that support that amendment. I do not know any consumer group, not one, which has taken the position that this amendment is against the consumer interest. These consumer groups are ably staffed. They have won the admiration of us. We may disagree with them, we may vigorously disagree, but they won our admiration on the basis of their competence.

They say that consumers will be ill served if we pass this bill restricting the credit surcharges, that it will be against the interest of the consumer and it will mean that the consumer will have to pay more when he pays cash.

Let us not forget that our No. 1 problem today is inflation. Not El Salvador, not Afghanistan, not Iran, but an inflated, high-interest-rate economy that has been teetering on the brink of real trouble for a long time and will continue to teeter, until we can bring inflation under control. So what is our first action? To adopt a policy to encourage credit and discourage cash purchases. If this country could get off the credit kick—not just the Federal Government which certainly is the biggest offender—but the private sector which is still three times bigger than the Federal Government sector—if the private sector too will get off the credit kick and onto more of a cash basis, can anyone doubt that our conduct as a Nation will be less inflationary? And how do we get 200 million consumers to reduce their credit, to put less on the cuff and pay more in cash?

According to the title of S. 414 this bill is concerned with cash documents.

Make no mistake about it, the heart and soul of this legislation is the demand of the credit card industry that the Con-

gress extend the ban on credit card surcharges for another 3 years.

Talk about a special interest group. The credit card industry last year got $1.5 billion from merchants. Why did they get that from merchants? They got it because when people went in to use their credit cards the merchants, in turn, would be billed by the credit card company for the interest and the cost of processing that credit transaction.

Of course, the credit card companies enjoy very much getting that $1.5 billion, but does anybody really believe that that $1.5 billion did not result in higher prices for the merchandise that all of us buy? Of course it did. It is translated simply into higher prices. That is why the consumer organizations are unanimously, without exception, emphatically in favor of the Glenn-Proxmire amendment and opposed to the bill in its present form.

It is why they feel that merchants should be free. That is all we are asking. We are not asking that this be imposed. We are saying let the free enterprise system work. What is wrong with that? Why not let the merchants be free to make a surcharge if they wish to do so?

Back in 1975, the lines of battle on the surcharge question were far less clearly drawn. By a 4-to-3 vote, the Governors of the Federal Reserve Board came down in favor of the ban on surcharges. The Consumer Federation of America also opposed credit card surcharges at that time. Last Wednesday the Consumer Affairs Subcommittee heard testimony from the Federal Reserve Board, the Consumer Federation of America, and Consumers Union calling for an end to this unnecessary restriction of the free market system.

A week ago Wednesday, the Consumer Affairs Subcommittee heard testimony from the Federal Reserve Board, the Consumer Federation of America, and the Consumers Union calling for an end to this unnecessary restriction of the free market system. Additionally, the Federal Trade Commission, the Comptroller, the Bank Board, and the Credit Union Administration also oppose any extension of the surcharge ban.

So not only do we have all the consumer organizations, not only do we have all the free enterprise organizations, every responsible, competent Government agency that has studied this situation and testified, testified that we should remove the ban. That is what our amendment does. They are unanimously for it. There is no competent testimony that does not have a clear special interest, such as the credit card companies themselves, that opposes this amendment.

On the other side of the coin, the credit card industry claims that the Government restriction of surcharges is somehow in the public interest.

Frankly, when we first began the debate on surcharges in 1974, I had no idea how inflationary the hidden merchant discount fees might become. For example the domestic operations of the three major card issuers—Visa, Master Charge, and American Express—collectively earned in excess of $1.5 billion from these hidden fees in 1980 alone.

After listening to literally hundreds of bankers testify before the Banking Committee that every law and regulation eventually results in additional costs which are always passed along to consumers, there is certainly no doubt in my mind that the $1.5 billion hidden fee was likewise passed along to all consumers in the form of higher prices for goods and services. Nor, I might add, does there seem to be any doubt on the part of the Federal Reserve Board that these hidden fees are buried in the regular prices of goods and services of merchants who accept credit cards.

Of course they are. We were not born yesterday. We know there is no way the merchants can assume this. They are going to go out of business if they do not pass along their costs. They have to. It is the first thing you learn in cost accounting. Every merchant who has enough sense to come in out of the rain is going to require that his costs be covered in the price he charges. They do that.

There is nothing wrong in that. It is proper, it is desirable, it is necessary. And they pass along that cost.

Unfortunately for cash purchasers, merchants have no way of knowing which customers will pay by cash and which will pay by credit card. Consequently, merchants must bury the $1.5 billion merchant fee in their regular price, with the result that both cash and credit card customers alike must shoulder this hidden fee.

Even if we conservatively assume that cash customers wind up paying only one-third of the merchant fee, that still amounted to a $500 million subsidy of credit card purchasers by cash customers in 1980.

Mr. GARN. Will the Senator yield for some comments at this point?

Mr. PROXMIRE. Yes, indeed.

Mr. GARN. I thank the distinguished Senator from Wisconsin.

Mr. President, may I respond first to his comment about the delicious irony of additional regulation? I merely say that, of my 6 years on the committee, I do not apologize for my record of trying to deregulate and suggest that I hope this fervor for deregulation continues and that I shall get the help that I need from the former chairman of the Banking Committee to have some vast deregulation in a number of Banking Committee bills over the next couple of years.

Mr. PROXMIRE. If the Senator will yield on that point, I commend the Senator. The Senator is absolutely correct. He has a very strong record against regulations that are unnecessary. He has fought them and fought them hard and he deserves credit for that.

Mr. President, that is why I am so stunned, so shocked, that the Senator from Utah, the great champion of fighting regulation, who has fought for deregulation so hard and so well, is now somehow sandbagged by the credit card industry into supporting a bill which imposes a restriction on merchants, which says, you cannot issue a surcharge; you must follow a regulation and not issue it.

Mr. GARN. I must say, Mr. President, I am astonished that it has been so difficult for me, in the committee when it was chaired by the Senator from Wisconsin, to simplify truth in lending. I hope this dictates a new attitude on the Democratic side and that the Senator will be very persuasive on his side of the committee so that we can accomplish this great and wondrous thing.

Mr. President, the rhetoric is great. I understand how much fun the Senator is having taking this side of the question against us Republicans. But I suggest we look at the reality of this particular situation. In principle, I agree with the Senator and Senator GLENN: there is no doubt that from a free enterprise standpoint, we ought to remove the restrictions in both directions. But I think we ought to look at the reality of what is taking place in this case.

There is no study except the 1968 Federal Reserve Board study which indicates that cash customers are not subsidizing credit card purchasers. The emphasis of Senator CHAFEE's study as it is contained in this bill is to find out the truth on the subsidization issue. As Senator DODD said, it is a close call. Nobody really knows or can stand up here and say for certain that subsidization is taking place. We do not know.

The reality of the situation is that, on February 27, the current law expired, so now we have a situation where unlimited surcharges can be imposed. We can have unlimited surcharges, but there is still a cap of 5 percent on discounts. The fact is that, as has been pointed out before, with all of the restrictions under truth in lending on cash discounts, they really have not been widely offered.

The fact of the matter is, in reality, that if surcharges are permitted we are not going to see price levels reduced. That is not going to happen. If I could read a letter that came unsolicited—not only unsolicited, it was not addressed to me. It came to the president of Visa:

GLENN FALLS, N.Y., *March 2, 1981.*

Mr. DEE W. HOCK,
President, Visa U.S.A.
Washington, D.C.

DEAR MR. HOCK: This past weekend I drove over to Vermont to entertain my relatives.

We had dinner on Saturday evening, February 28, 1981 at a delightful restaurant called The Paddock Restaurant in Springfield, Vermont 05156. The meals were delightful. The service was excellent.

When I was ready to pay the bill with my Visa charge card, the waitress returned and informed me that there was a 4 percent surcharge on any bill over $100.

There was no sign in the restaurant that I saw indicating that such a charge would be made.

I have eaten in other restaurants in Vermont and have not had such a surcharge.

I have eaten in many cities in New York State as well as in many other of the States and have never had such a surcharge.

When I am out to enjoy an evening, I make it a point to avoid any form of unpleasant discussion. Accordingly I paid the charge. My custom is to tip satisfactory waitresses approximately 15 percent. In this instance I gave her a tip less than 10 percent. In that way my total charge was somewhat less than

it would normally have been. It makes me unhappy to penalize a very competent and pleasant waitress because of a practice by her employer that may be questionably legal but certainly is immoral.

This matter is brought to your attention for any possible action that you consider appropriate.

A copy of my Visa slip is enclosed.

Very truly yours,

WALTER F. HARRISON, Jr., M.D.

Mr. President, we have received letters like these already. I did not think the business community was watching that carefully the actions of the Senate and the House and that businesses would know that the prohibition against surcharges had expired on the 27th of February.

Mr. PROXMIRE. Will the Senator indicate where he got the letter?

Mr. GARN. A copy was sent to the president of Visa. Frankly, I do not know how we got a copy of the letter.

Mr. PROXMIRE. Would the Senator say it came from the Visa people?

Mr. GARN. I do not know. Forget the Visa people, the point is, who is paying the bill? The consumer is paying the bill. The Senator from Wisconsin and Senator GLENN are kidding themselves if they think that we are going to have a reduction in prices across the country, and that businesses are going to put out announcements, "We are lowering the general price for everybody because we are going to impose surcharges." Those menus and the prices on merchandise are going to be exactly the same even if surcharges are allowed, and cash discounts will still not be pervasive because of the complexities of the law. Cash discounts are now limited to 5 percent. Therefore, all we have succeeded in doing by permitting surcharges is to add to the inflation rate and to the cost to the poor consumer.

Mr. GLENN. Mr. President, will the Senator yield?

Mr. PROXMIRE. I shall yield to the Senator from Ohio in just a minute, Mr. President. Before I do, let me say I have much more faith in the free enterprise system and the competitive way in which it works than the Senator from Utah. There is no question that it works and by working, that means that when the price can be passed on to where it should be, the credit card customer, the price of goods will come down. Competition will drive them down. Not overnight, of course not. They will come down in all kinds of ways—sales, many other actions that they will take.

I do not say this is just my opinion. This is the opinion of the Consumer Federation of America. They represent 30 million people. It is the opinion of the Consumer Reports. It is the opinion of the consumer people who have studied this, who took the other position 5 years ago but have changed, because they have found out that the consumer is going to be benefited if we permit the merchant, when he wishes to do so, to put a surcharge on the credit cards.

Mr. GARN. If the Senator believes that the general price level will go down and that people will reprint menus, and that the surcharge will not be just an additional cost to the consumer, then I suggest that he believes in the tooth fairy.

Mr. PROXMIRE. That is a shocking lack of faith in the free enterprise system.

Mr. President, I believe the Senator from Wisconsin has the floor. Is that correct?

The PRESIDING OFFICER. The time for the Senator from Wisconsin on the amendment has expired. The Senator still has time on the bill.

Mr. PROXMIRE. The Senator from Wisconsin has 2 hours on the bill.

Mr. GARN. I would be happy to yield whatever time I am taking from the amendment I am not going to call up, in order to help the Senator from Wisconsin.

The PRESIDING OFFICER. It would require unanimous consent to do that.

Mr. GARN. I ask unanimous consent.

Mr. CHAFEE. Take time from the amendment.

Mr. PROXMIRE. The time has all been used up.

Mr. GARN. We have time to respond.

Mr. CHAFEE. Mr. President, I yield to the Senator from Utah my time on the amendment of the Senator from Wisconsin. That means I will still have time on the bill, to discuss the amendment.

The PRESIDING OFFICER. The Senator is correct.

The Senator from Utah has been yielded 15 minutes on the amendment.

Mr. GARN. I thank the Senator.

Mr. President, this is not a matter of faith. It is a matter of reality, and the letters show what is happening to the consumer.

I believe that there is a very important point to be made in the fact that while all the consumer groups are in favor of this, there is a person opposed to this who is someone with whom I have rarely agreed in the last 6 years and with whom I have had incredible fights on the so-called pro versus anticonsumer issues over the years. This man is FRANK ANNUNZIO, in the House of Representatives. I doubt whether there is anybody in the Senate or in the House who is known by the consumer groups or consumers as more of a defender of the consumer. That is why, in the time that has been yielded to me, I believe that it is important to not just place this letter in the RECORD but that I read it for the benefit of the full Senate. He writes:

WASHINGTON, D.C.

DEAR MR. CHAIRMAN: I am deeply concerned that through some misunderstanding the legislation being taken up by the Senate today, S. 414, is being interpreted in part as an anti-consumer bill.

Since much of the Senate bill is identical to the House-passed version of H.R. 31, of which I was the chief sponsor, I would like to clear the air on a few points.

I take a backseat to no Member of Congress as being a champion of the consumer. And, I know my position on the anti-surcharge provision of H.R. 31 and S. 414 is a pro-consumer position. If I thought for one minute that H.R. 31 or S. 414 was an anti-consumer bill I would pull my name off of it immediately and ask the House to reconsider its position, but that is not the case.

I say, parenthetically, that this bill was passed in the House by a vote of 372 to 4.

The anti-credit card surcharge provision of the legislation has been law for more than five years. It has served to save consumers millions of dollars in extra costs that they would have had to pay had the legislation not been in effect. I am the first to admit that credit card costs are too high and have consistently sponsored legislation to reduce those costs. I fail to understand, however, how the consumer will benefit by paying more for the use of credit cards when credit cards are already too expensive.

As you know, the credit card surcharge ban expired on February 27. Since that time I have already seen evidence of surcharges being placed on credit cards. I have seen no decreases in the cash prices of items by those businesses that surcharge credit cards. Complaints from consumers are already reaching my office objecting to the surcharge. All of these consumers want to know when the Congress is going to put the surcharge ban back into effect, because as one woman stated to me, "I have to use my credit card, I have no other choice".

Unfortunately, that situation occurs far too often in our economy. There are more than 600 million credit cards in circulation in this country. Last year consumers used these credit cards to purchase $140 billion of goods and services, and these credit cards were used 92 million times.

It is nice to think that if credit cards can be surcharged that businesses will automatically reduce their prices to cash customers, but what happens if that assumption does not prove true? Can we afford to take a chance of telling millions of Americans that in addition to paying record high interest rates on credit cards, paying annual fees on credit cards, and being subjected to new billing methods that they now will be surcharged every time they use a credit card? And are we willing to put ourselves in a position of saying that you must pay this surcharge because that is what the Congress of the United States has decreed?

I am not prepared to place any additional economic burdens on the shoulders of any Americans. I ask you to urge your Senate colleagues not to support any provision that would increase credit card costs. Let's make the economic burden a little lighter for millions of our fellow Americans.

With every best wish,

Sincerely,

FRANK ANNUNZIO,
Chairman.

As I say, FRANK ANNUNZIO and I have not often agreed on issues, but he could not in any way be considered anything but the champion of consumer issues by both the Senate and the House.

I thank the Senator from Wisconsin for allowing me to interrupt his statement.

Mr. PROXMIRE. Mr. President, I thank my good friend from Utah.

This has been most enlightening. The 30 million member Consumer Federation of America supports the Proxmire-Glenn amendment, as does the Consumers Union, as do a number of other consumer organizations which I will cite in a moment.

The Senator from Utah was able to cite a Congressman—a Congressman—and was able to cite a diner at a Washington restaurant. I submit that the testimony by the Consumer Federation of America, which has gone into this matter in great detail over a period of years, should weigh at least as heavily as the diner at the Washington restaurant; and I will put the Consumers Union up against a fine young man like FRANK

ANNUNZIO—or, FRANK ANNUNZIO—any day.

Mr. President, our good friends on the other side have pointed to the fact that a study has not been made here. Since when do we say that we have a regulation and that in order to remove the regulation, we have to have a study? I say that in order to have that regulation in effect, we should have a study. The burden of proof is on those who would put the regulation into effect. It is not on those who would oppose the regulation.

If we are going to follow the advice of the consumer groups, if we are going to follow the advice of every competent Federal agency that has studied this matter—and I will point to a number of other groups that support our position—if we are going to be willing to stand up to special interest groups, the credit card companies, we should support this amendment.

Unfortunately, the ban on surcharges also promotes costly economic inefficiencies by encouraging Americans to use credit cards without knowing the true cost of the credit card. They do that because they do not know. I believe that not one American knows that the merchant who takes his credit card, and gives him credit on the basis of the credit card, then will have to pay 3 or 4 or 5 percent to the credit card company whose credit card he uses. Therefore, obviously, ineluctably, certainly, that additional price is in the price of the merchandise he buys. It is concealed.

Unquestionably, the free market system depends on consumers being able to make informed choices. It is, therefore, vital to the marketplace that the Congress not be a party to any plan to restrict free enterprise in order to enable the credit card industry to bury billions of dollars in hidden charges. Consumers must be free to choose wisely between buying on credit and using cash.

This would do that. It would do it freely. It does not say that you have to impose a surcharge on credit cards. It says that if the merchant wishes to do so, he can do it. Then, when the consumer goes in to buy, he will have some notion that the cost of using that credit card is what it is—a 3-, 4-, or 5-percent surcharge.

By the same token, merchants must also be free to choose whether discounts or surcharges are in their best interest.

We are talking, Senator GLENN and I, for freedom, for freedom of the marketplace, for the absence of restrictions.

Given unrestricted choices I just do not have any doubt that the vast majority of consumers and merchants will make the decision which is in their best interests.

I say it is time that Congress got out of the business of forcing this hidden subsidy charge upon cash customers for the benefit of the credit card industry. Let competitive market forces determine whether one merchant will impose a surcharge while another will not. What right does Congress have to restrict that free market choice at the behest of the credit card industry? If, in truth, this Congress and this administration are dedicated to getting the Government off people's backs—then it can start by killing any attempt to extend the surcharge ban.

Just as an aside, I note that even a witness who testified before us, and our expectation was that he was going to support the surcharge ban, Mr. Kittle, the home furnishing store owner from Indianapolis, Ind., who was introduced by Senator LUGAR at the meeting, said that deregulating surcharges would probably lower the price that a cash customer will pay for goods, compared to the credit card customer.

That is not just a casual customer. That is not a Member of the House of Representatives who has to spend his time in all kinds of things. That is a man who is in the business. He says it would probably lower the price that a cash customer will pay for goods, compared to the credit card customer.

This measure to extend the ban on surcharges another 3 years should provide considerable insight into just how serious Congress and the administration are about restricting the interference of Government into our free market system when the restriction in question will insure billions of dollars for their friends in the credit card industry—and higher prices for cash on paying consumers.

I urge my colleagues to consider that there is no room in this economy for special interest legislation costing the American people billions of dollars. Nor is there any place for unwarranted Government intrusion in the marketplace.

Mr. President, I ask unanimous consent to have printed in the RECORD letters from the Federal Trade Commission, the Comptroller of the Currency, the National Credit Union Administration, and the Federal Home Loan Bank Board that reflect the unanimous dissent of of these Federal agencies against extending the ban on surcharges.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

FEDERAL TRADE COMMISSION,
Washington, D.C.

Re S. 414 "Cash Discount Act."

Senator WILLIAM PROXMIRE,
Senate Committee on Banking, Housing, and Urban Affairs, U.S. Senate, Washington, D.C.

DEAR SENATOR PROXMIRE: This is in response to your letter requesting our comments on S. 414, the "Cash Discount Act."

S. 414 would amend Section 167(b) of the Truth in Lending Act, 15 U.S.C. §1666f (b), by removing the five percent ceiling on discounts for cash in lieu of payment by credit card, and by repealing some procedural provisions of §226.4(i) of Regulation Z, 12 C.F.R. § 226.4(i) (1980). In addition, Title II would extend the current prohibition on merchants imposing surcharges on credit card customers until February 27, 1984. This prohibition would otherwise expire on February 27, 1981. Finally, S. 414 contains an additional provision which moves forward by one year the date on which the civil liability provisions of the Truth in Lending Simplification Act are applicable to certain creditors.

We generally support the Cash Discount Act but provide below a few suggestions for the Committee's consideration. The goal of federal efforts to encourage cash discounts is to allow merchants to offer plans under which cash customers do not pay the inherent costs of credit card programs. One example of these costs is the charge ("discount") imposed by credit card issuers on merchants who accept credit cards.

The most significant change which we believe should be made in S. 414 is deletion of the extension of the current Act's prohibition on merchant-imposed surcharges and substitution of a provision affirmatively allowing merchants accepting third-party credit cards to impose surcharges. We understand from our staff that many small merchants which adopt programs to ensure that cash customers do not pay the costs associated with accepting credit cards do so by imposing a surcharge rather than granting a discount. In instances in which the staff has notified these merchants that surcharges are illegal, the uniform response has been to abandon the surcharge, but not to institute cash discounts. Moreover, in at least one instance, the merchant orally expressed his dismay that the law allowed him to raise his cash price and then grant a discount but not to take the much simpler step of simply imposing a surcharge.

In theory, a discount and a surcharge are equivalent concepts, but one is hidden in the cash price and the other is not. From a practical standpoint the surcharge seems easier to implement and more likely to ensure that the price credit card users pay reflects the cost of accepting credit cards. If the goal of the legislation is to ensure that cash customers are not required to absorb the extra costs of accepting credit cards, and thereby subsidize credit card users, then elimination of the current prohibition on surcharges would seem to be one of the most effective methods of obtaining this goal.

There are really two separate questions facing the Congress. The first decision is whether to extend the Act's current substantive prohibition on surcharges. We believe that there is no economic or other rationale justifying the current substantive prohibition and that it should be deleted or, at least, allowed to expire. A merchant should not be restricted from imposing a surcharge or granting a discount on whatever terms it deems appropriate so long as the discount or surcharge does not violate state law and is accompanied by Truth in Lending Act disclosures.

The second, and more important issue from a practical standpoint, is whether surcharges should be granted an exemption from the Truth in Lending Act's general disclosure requirements, similar to that provided to cash discounts, in order to encourage their use. We believe that the Cash Discount Act should be amended to grant a limited exemption to merchants which accept third party credit cards and impose a surcharge. This exemption should, at least, apply to surcharges which are equal to the amount of the discount the merchant will pay the card issuer. If such a provision is enacted, it might be coupled with a provision requiring merchants to clearly disclose that they impose such surcharges in any advertisement stating that they accept third party credit cards in order to prevent merchants from exploiting consumers' current understanding that such charges will not be imposed. Such a notice could be employed for a limited period such as one to three years, to overcome current consumer perceptions that merchants advertising that they accept third party credit cards are impliedly representing that this is a free service.

The Act would also remove the existing five percent ceiling on cash discounts. It is our understanding that the purpose of the existing ceiling is to prevent merchants from passing along to consumers a charge greater than that the merchant would otherwise pay to the card issuer on the specific transaction.

We understand from our staff that the limitation on the amount of the discount has not been a particularly important reason for the general reluctance of merchants to offer cash discounts. Moreover, we are concerned that an unlimited discount could be used to subvert the Truth in Lending Act's general policy of promoting informed use of credit through full disclosure of cost. Even a five percent discount for cash can have a substantial impact on the true Annual Percentage Rate for the credit transaction and substantially frustrate the Truth in Lending Act's primary goal of enabling consumers to make meaningful cost comparisons between financial institutions. Therefore, we believe that the question of a ceiling on discounts related to the size of charges actually being imposed by card issuers should be carefully considered.

Finally, we are pleased to see that the existing statute's requirements that the cash discounts must be available to all cash customers has been retained. This provision ensures that customers who do not have credit cards, and who otherwise might bear the costs of credit transactions without enjoying any of their benefits, can receive the discounts for cash payments.

I hope that you will find our views of assistance in considering this legislation.

By direction of the Commission.[1]

MICHAEL PERTSCHUK,
Chairman.

COMPTROLLER OF THE CURRENCY,
ADMINISTRATOR OF NATIONAL BANKS,
Washington, D.C., February 25, 1981.

Hon. JAKE GARN,
Chairman, Committee on Banking, Housing, and Urban Affairs, U.S. Senate, 5302 Dirksen Building, Washington, D.C.

DEAR MR. CHAIRMAN: This is in response to your request for comments of this Office on S. 467. Title I of the bill would amend the Truth in Lending Act ("TILA") to encourage greater use of cash discounts by merchants. Title II would extend until February 27, 1983, the current ban on surcharges by merchants under the TILA. Title III is a technical amendment to the TILA which would make effective on April 1, 1981, the new civil liability provisions of the TILA, enacted as part of Title VI of the Depository Institutions Deregulation and Monetary Control Act of 1980 ("DIDA"). Lastly, Title IV would amend 12 U.S.C. § 29 to permit a national bank to continue to hold certain real estate beyond the permissible time period provided by the existing law.

We support the purpose of Title I to encourage greater use of cash discounts by merchants; however, we suggest that cash discounts and surcharges upon the use of credit cards be afforded similar treatment under the law. We question the need for proposed Title II which would continue the ban on merchant surcharges for users of credit cards. Recent testimony before the Subcommittee indicated the existing ban on surcharges has the effect of subsidizing credit card users at the expense of cash paying customers, many of whom are low- and moderate-income persons who may not qualify for open-end credit. Permitting such surcharges would provide a mechanism by which cash customers could be relieved of subsidizing credit card users.

We support the enactment of Title III of the proposed bill as necessary to remove any ambiguity regarding the effective date of the new civil liability provisions of the TILA.

Title IV of S. 467 is non-germane to the other provisions of the proposed legislation. It would permit a national bank to hold until December 31, 1982, title to and possession of real estate carried on its books at a nominal value on December 31, 1980, provided the earnings from such real estate are disclosed separately in financial statements of the bank. The National Bank Act currently limits the ability of national banks to acquire or hold real estate. Generally, any real estate acquired by a national bank must be disposed of within five years. Section 29 was recently amended by Section 701 of DIDA to permit the Comptroller, under certain conditions, to approve the holding of real estate ("other real estate owned") for a period not to exceed 10 years. In amending the law, Congress reaffirmed the general underlying purposes of Section 29 to: (1) prevent banks from acquiring large amounts of real estate and holding it for extended periods of time, (2) keep bank capital flowing in the daily channels of commerce, and (3) prevent banks from accumulating large amounts of illiquid and speculative assets. See Senate Rep. No. 96-923, 96th Cong., 2d Sess. The recently amended law does not permit banks to continue to hold such real estate beyond ten years.

Our opposition to legislation proposed during the 96th Congress to amend Section 29 was stated in the enclosed letter of February 5, 1981, to Senator Tower, Chairman of the Financial Institutions Subcommittee. In that letter, we noted our objections to a proposed five-year extension contained in S. 2255. Title IV of S. 467 is similar to the previously considered amendment. As such, those comments are applicable to the merits of the issue underlying the proposed two-year extension contained in Title IV of S. 467. We do not believe a statutory extension is necessary at this time.

We are, in fact, now requiring firm divestiture plans from each of the banks which hold real estate in contravention of the existing law.

It is our intention to permit a reasonable amount of time—up to two years in some instances—to each institution to dispose of properties in their possession so that a fair value can be realized. This approach, in our view, is consistent with the concept of fairness to other national banks and the underlying purposes of existing federal law. We, therefore, urge the deletion of Title IV from the bill.

Should the Committee, nevertheless, decide to favorably report the proposed amendment, we suggest that the Committee's Report expressly indicate the need for affected institutions to prepare adequate divestiture plans in order to promptly dispose of such real estate upon expiration of the extended holding period. In order to avoid disorderly and costly divestiture of such holdings, we would require such plans to be submitted to the agency prior to the expiration of any extended statutory time period.

In balance, we do not believe that enactment of the proposed bill is necessary at this time. More specifically, we suggest that Titles II and IV be deleted from the proposed legislation. The existing ban on surcharges by merchants should be permitted to expire.

If we can be of further assistance with regard to Titles I, II and III of the proposed legislation please contact Ms JoAnn S. Barefoot, Deputy Comptroller for Customer and Community Programs at (202) 447-0934. If you have any questions regarding Title IV, please contact Mr. Charles E. Lord, Senior Advisor to the Comptroller, (202) 447-1763.

Sincerely,

PAUL M. HOMAN,
Acting Comptroller of the Currency.

NATIONAL CREDIT UNION ADMINISTRATION,
Washington, D.C., February 23, 1981.

Hon. JAKE GARN,
Chairman, Committee on Banking, Housing and Urban Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This is in response to your request for comments on S. 414, a bill "to amend the Truth in Lending Act to encourage cash discounts, and for other purposes".

The National Credit Union Administration supports this measure to remove the present 5 percent limitation on cash discounts, however, we would recommend that the ban on surcharges also be removed for a trial period in order to provide merchants the most flexibility in marketing their products. At the end of a trial period such as 2-3 years, and after determining that abuses such as the hiding of finance charges have not occurred, a decision for permanent removal should be made.

Sincerely,

LAWRENCE CONNELL,
Chairman.

FEDERAL HOME LOAN BANK BOARD,
Washington, D.C.

Hon. JAKE GARN,
Chairman, Committee on Banking, Housing and Urban Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This is in response to your request for our comments on S. 414 and S. 467, two essentially identical bills both entitled the Cash Discount Act. The measures would allow discounts to be offered for cash purchases without the discount constituting a finance charge under the Truth-in-Lending Act, as long as the discount is available to all prospective purchasers and this availability is clearly and conspicuously disclosed. Currently, any such discount in excess of 5 percent must be computed as part of the finance charge. The bills also would extend the present ban on imposing surcharges for credit card use. Under current law, the ban will expire on February 27, 1981; S. 414 would prohibit surcharges through February 27, 1984, and S. 467 would continue the ban until February 27, 1983.

The Bank Board supports S. 414 and S. 467 in their proposed elimination of the existing 5 percent limit on cash discounts. By freeing sellers from certain current Truth-in-Lending complications resulting from offering discounts, the bills could significantly increase the number of such discounts available, thus contributing to a lowering of the cost of goods and services. In addition, removing barriers to the offering of discounts for cash purchases would serve an equitable purpose, in that it could contribute to ensuring that cash purchasers are not required to provide subsidies to persons utilizing credit cards. And, of course, the proposed cash discount liberalization would be consistent with the general trend toward economic deregulation that has characterized such Congressional actions as the Depository Institutions Deregulation and Monetary Control Act of 1980, Public Law 96-221. As witnessed by our strong, consistent support of rate decontrol, this is a trend with which the Bank Board is very sympathetic. In our view, a return to a market place environment in as many sectors as feasible will result in a fairer and more efficient functioning of our national economy.

Because of our support for lifting government controls, as the bills, in effect, would do with respect to cash discounts, we do not endorse the extension of the credit card surcharge prohibition contained in both S. 414 and S. 467. Should a merchant wish to charge more for goods obtained with a credit card in

---

[1] Commissioners Clanton and Pitofsky voted to recommend that the cash discount ceiling be abolished. While they recognize that elimination of the ceiling might increase the chance of inadequate credit cost disclosures, they believe that the risk is too speculative to justify limiting the bill's primary goal of encouraging cash discounts.

order to reflect the higher costs involved in credit card transactions, we believe he should be free to do so. The credit card industry, in our view, is capable of prospering without this kind of Federal protection. In any event, the actual difference between a discount and a surcharge is unclear, and we believe it would be anomalous to allow one and not the other. The practical consequence of imposing this artificial distinction undoubtedly would be to discourage the use of discounts, for merchants would be confused as to what is or is not allowed, and thus would be reluctant to engage in any alteration of their pricing structure.

We have no comment on the provision in S. 467 that would extend until 1982 the ability of national banks to hold certain real estate, for it is outside our area of responsibility.

I hope this has been responsive to your request. Please note that, in accordance with 12 U.S.C. § 250, this letter has been reviewed only by the members of the Federal Home Loan Bank Board. The views expressed herein are those of this agency, but do not necessarily reflect the views of the President. If you need any additional information, please do not hesitate to contact me.

Sincerely,

JOHN H. DALTON.

INTERNATIONAL LADIES' GARMENT WORKERS' UNION,
New York, N.Y., February 25, 1981.

Hon. JAKE GARN,
U.S. Senate,
Dirksen Senate Office Building,
Washington, D.C.

DEAR CHAIRMAN GARN: The International Ladies' Garment Workers' Union opposes the ban on credit surcharges presently contained in S. 414 the Cash Discount Act.

The government ban on credit surcharges forces retailers to charge all customers for the "merchant discounts" paid to credit card companies. Last year these charges amounted to over $1.5 billion for American Express, Visa and Mastercharge alone.

Simply put, the ban requires cash customers to subsidize credit card purchases. Even lower-income consumers who cannot qualify for credit cards pay this cost of credit The ban also deceives consumers about the true cost of credit, burying the merchant discount in the overall price of goods.

In mark-up tomorrow, the Committee will consider an amendment to lift the surcharge ban for a period of three years. We urge you to support this action. The amendment will not require merchants to do anything, but it will give them greater freedom to create a system of equitable prices.

Sincerely,

EVELYN DUBROW,
Vice President.

NATIONAL COUNCIL OF SENIOR CITIZENS,
Washington, D.C., February 25, 1981.

Hon. JAKE GARN,
Chairman, Senate Banking Committee,
Dirksen Senate Office Building,
Washington, D.C.

DEAR CHAIRMAN GARN: The National Council of Senior Citizens opposes the ban on credit surcharges in S. 414, The Cash Discount Act. The ban should be lifted so that retailers are not forced to make cash customers subsidize credit card purchases.

Cash customers helped bear the burden of over $1.5 Billion in "merchant discounts" retailers paid last year to the three largest credit card companies. These charges—attributable solely to credit card purchases—are buried in the overall prices of goods. Even low-income consumers, elderly and others, who cannot qualify for credit cards must pay these hidden costs.

In mark-up session tomorrow, the full Banking Committee will consider an amendment to lift the surcharge ban for a period of three years. We urge you to support this action. It is essentially a free market amendment which will give merchants greater capacity to use a fair system of cash and credit pricing.

Sincerely yours,

JACOB CLAYMAN,
President.

Mr. PROXMIRE. Mr. President, I wish to call attention now to a series of letters that I received and that the chairman of the committee has received from organizations approving the extension of this ban on surcharges.

Mr. President, I assume that this is being taken out of my time, my 2 hours that I have on the bill.

The PRESIDING OFFICER (Mr. GARN). The Senator is correct.

Mr. PROXMIRE. Mr. President, the first letter comes from the National Small Business Association, one of the two major small business groups in the country. Almost all of us in Congress are aware of that organization. It is one that has a deep interest in Federal legislation. We know of its expert reflection of the views of small business. What do they say? This letter is March 10, addressed to me. It says:

The National Small Business Association is strongly supportive of S. 414, the Cash Discount Act. We feel that removal of the 5 percent limitation on cash purchases can indeed help move consumers toward more stable purchasing habits.

However, we are opposed to title 2 of S. 414 which extends the ban on surcharges.

Credit card charges are currently passed on to the consumers even though they are not indicated as a surcharge at the time of purchase.

That again is the National Small Business Association. That is not one Congressman. That is not one person having dinner in a Vermont restaurant. That is an organization of small business that has well represented small business in the past:

We feel strongly that the consumer's right to be informed includes being informed of charges associated with his credit card purchases. The merchant should have the right if he so desires to pass the information along.

That is what the Glenn-Proxmire amendment does:

The National Small Business Association would support any amendment aimed at eliminating the ban on surcharge notices.

Mr. President, I have a letter from the Consumers Federation of America. I referred to that organization. They represent 30 million consumers, by far the biggest consumer organization and perhaps one of the biggest, certainly in the country. This is a letter dated March 12 and they say:

DEAR SENATOR PROXMIRE: Consumer Federation of America is totally and unequivocally opposed to the surcharge ban contained in S. 414. This government intrusion on the free market gives consumers incorrect signals about credit—making it appear to be free when it in fact has substantial costs. Further, the surcharge ban penalizes lower-income purchasers who cannot qualify for credit cards; they still pay for the "merchant discount" in their prices. Finally, the ban discourages merchants from offering legal cash discounts, whose only difference from credit surcharges is a semantic one.

The letter goes on to say:

To those who argue that lifting the surcharge ban can cause abuse, we respond that the lifting of the ban is not likely to cause any merchant to deceive consumers who are not already doing so. The potential for deception is much greater in the "cash discount" situation, especially where the merchant raises his regular prices one day to a "phony regular price" and, then, the next day offers a cash discount which brings the price of the goods back to their actual "regular price." Certainly the proponents of the ban would not argue that cash discounts should be eliminated because there is this potential for abuse.

CFA favors limit of 7 percent on the amount of the surcharge and the cash discount. However, if the choice is between the surcharge ban and the removal of the ban with no limitation, we support your amendment to remove this ban without limitation.

It could hardly be more unequivocal. Here is a letter from the Consumers Union. This is an organization that publishes Consumer Reports and has won an enviable reputation throughout the years as highly competent and expert. They study these matters very carefully before they issue reports, and the Consumer Reports, of course, have a very big circulation and have been viewed by many as an expert voice of the consumer movement. They in a letter dated March 11 to me say this:

On behalf of Consumers Union, I am writing in support of your effort to amend S. 414 to eliminate the ban on surcharging credit card purchasers. That ban constitutes an unwarranted government intrusion into the marketplace that serves only one special interest group—credit card issuers—at the expense of other consumers.

Your amendment to allow unlimited surcharges would remove this special interest provision and permit more equitable pricing of goods and services.

Then I have a letter here from an outstanding labor union. I think many people are unacquainted with the remarkable record of the International Ladies' Garment Workers' Union. It is a union that has won the admiration of those who have studied the labor movement in this country because it has worked very, very closely with management. It has been able to preserve a situation of survival with great difficulty in New York City and around the country because it is one that is characterized by small business, one that is characterized by very tough foreign competition, and it takes a great deal of attention on the part of both labor and management to improve the technology and to proceed on the basis of providing decent wages and working conditions and yet being able to sell a product at a reasonable price. This union has taken one of the most constructive and positive interests in consumer affairs. This is what Evelyn Dubrow, vice president and legislative director of the International Ladies' Garment Workers' Union, tells. This is a letter to the chairman of the committee, Chairman GARN. It says:

The International Ladies' Garment Workers' Union opposes the ban on credit surcharges presently contained in S. 414, the Cash Discount Act.

The government ban on credit surcharges forces retailers to charge all customers for the "merchant discounts" paid to credit card companies. Last year, these charges amounted to over $1.5 billion for American Express, Visa and Mastercharge alone.

Simply put, the ban requires cash customers to subsidize credit card purchases. Even lower-income consumers who cannot qualify for credit cards pay this cost of credit. The ban also deceives consumers about the true cost of credit, burying the merchant discount in the overall price of goods.

Mr. President, I think that this letter should be of particular concern to us because I say this union has again and again demonstrated its expertise, its wisdom, and it is the fact that it hesitates to take a position until it knows where the true interest of the consumer lies.

I have a letter here from the National Council of Senior Citizens, one of the great organizations that represents the senior citizens in this country. Its president, Jacob Clayman, writes as follows on February 25:

The National Council of Senior Citizens opposes the ban on credit surcharges in S. 414, The Cash Discount Act. The ban should be lifted so that retailers are not forced to make cash customers subsidize credit card purchases.

Remember, this comes from the senior citizens organization of this country. They are concerned, of course, with millions of senior citizens who, without the Glenn-Proxmire amendment, will be in the position of having to pay higher prices because in many cases they do not have the kind of credit that would permit them to have a credit card, and the National Council of Senior Citizens again is an organization that does not act on impulse or sentiment. They act on a very hard, tough study of what the facts are.

They go on to say:

Cash customers helped bear the burden of over $1.5 billion in "merchant discounts" retailers paid last year to the three largest credit card companies. These charges—attributable solely to credit card purchases—are buried in the overall prices of goods. Even low-income consumers, elderly and others, who cannot qualify for credit cards must pay these hidden costs.

Here is a letter from the National Farmers Union, one of the three great farm organizations of this country, to Chairman GARN and it is dated February 25. It says:

National Farmers Union opposes the ban on credit surcharges presently contained in S. 414, The Cash Discount Act. We urge Banking Committee action to remove the ban.

As a result of the government ban on credit surcharges, cash customers are forced to subsidize cash purchases. Last year, cash customers as a whole helped bear over $1.5 billion in "merchant discount" . . .

And it goes on to say that:

Lifting the ban on surcharges would force this hidden cost—currently buried in the overall price of goods—into the open.

That is according to the letter from the National Farmers Union.

Mr. President, let me turn very briefly to two other organizations that represent free enterprise: First the Council for a Competitive Economy. This organization wrote to the committee on March 5 as follows:

I am writing to express the Council's vigorous opposition to the credit-surcharge ban in S. 414, the Cash Discount Act. The Council, as you know, is a national business organization dedicated to the free, competitive economy unhampered by regulation, subsidy or special privilege. We have members in all 50 states, including Utah.

Our support of free competition leads us to oppose the surcharge ban, an anticompetitive regulation that interferes with business people and consumers and that is out of step with the economic views expressed by the voters in November.

It goes on to say:

In a free economy, merchants have the right to use surcharges for any purpose. This is simply voluntary exchange; customers are free to shop elsewhere if they dislike the extra charge. This view is implicitly conceded in S. 414, which allows unlimited discounts for cash customers. The surcharge ban, then, is perplexing. If merchants are free to use one device, they should be free to use the other.

Finally, Mr. President, the National Taxpayers Union, which many of us are familiar with. I do not think there is any organization in the country that has done a better job of focusing on the spending records of Members of Congress, has exposed that record, and has made people conscious of whether their Senator or their Congressman has been voting in favor of or opposed to authorizations and appropriations bills that increase Federal spending. Here is what the National Taxpayers Union said on March 5:

The National Taxpayers Union supports the above referenced bill to remove the present five percent limitation on cash discounts. However, we do not believe the bill should continue the prohibition against so-called surcharges and urge that you support an amendment to the bill to legalize this harmless practice.

We find absolutely unconvincing the argument that credit card surcharges are apt to "deceive or mislead the consumer." And while, should either surcharges or cash discounts become widespread through the market process, we believe that it would have a significantly positive effect in slowing the creation of inflationary monetary substitutes, we base our position strictly on our support of free enterprise and freedom of contract. The market is perfectly capable of determining which practices will find the greatest acceptance.

Finally, I should note that we reject the notion that cash buyers are somehow forced to "subsidize" credit card users or that the merchant costs associated in providing credit card conveniences are conceptually distinct from any other cost of doing business. This is not the issue. We do not believe there is any need for a government "study" on services a merchant might choose to offer potential customers to make his goods more attractive, to increase his business, and to raise his profits. One might as well study the practice of providing "free" TV sets in modern hotels or any other cost of doing business which is only indirectly tied to static notions of production costs. "Subsidies" are purely a creation of the government and do not exist in the marketplace.

(Mr. HEINZ assumed the chair.)

Mr. PROXMIRE. I do have one other letter here which comes from the National Mass Retailing Institute, which is a trade association representing a discount merchandising industry and with nationwide sales of over $50 billion, obviously a very, very big factor, representing many stores and representing probably hundreds of thousands of employees who work for this very important factor that sells $50 billion a year.

The National Mass Retailing Institute, according to the letter of March 11, says as follows:

The National Mass Retailing Institute (NMRI), a trade association representing the discount merchandising industry with nationwide sales of over 50 billion dollars, strongly urges your support for the Proxmire-Glenn amendment to the Cash Discount bill (S. 414) scheduled for floor consideration on Thursday, March 12. NMRI's member stores, which are located in virtually every state, operate on a discount basis and have predominantly cash-paying customers.

The continued ban on credit card surcharges under the reported bill hides the real cost of credit and discriminates against cash-paying customers by forcing them to continue to subsidize the purchasing habits of credit card users. While the result is mitigated to some extent by allowing unlimited cash discounts to cash-paying customers, it puts an unfair burden on discount stores, the majority of whose customers already purchase by cash. A simpler and more straightforward method of allocating the cost of credit is to impose a surcharge in an amount equal to such cost on the small percentage of purchases which actually use credit.

NMRI urges you to vote for the Proxmire-Glenn amendment which gives consumers an informed choice without artificial distortion of the buyer-seller relationship.

Sincerely,

RICHARD I. HERSH,
President.

Mr. President, there you have it. Every organization that is not a special interest organization, which has spoken out on this, says they favor this amendment, every one, the consumer organizations, the business organizations, the organizations representing the unions and representing the elderly.

This amendment is supported by the National Small Business Association, the National Mass Retailing Institute, the Council for a Competitive Economy, the National Taxpayers Union, the National Farmers Union, the Consumer Federation of America, the Consumers Union, the AFL–CIO, the International Ladies Garment Workers, the National Council of Senior Citizens, and the other side says this is an anticonsumer amendment. Anticonsumer? How silly can you get.

We know, and as the expert organizations which have studied this carefully know, that there is no way merchants are going to take a $1.5 billion amount and just eat it. As I say, any merchant, whether he has a cost accounting system or not, is going to pass on all his costs and his pricing. He has to do it. That is the way our system works. He has to do it, and he does do it.

What happens under present circumstances is that customers are encouraged to take the free ride and use their credit cards and that, I submit, is an inflationary practice. We know that credit is excessively used in our economy, it is excessively used in the Federal

Government, as my good friend John Chafee has called to our attention from time to time, and as have other Members of the Senate over and over again. We know it is excessively used, but also excessively used by 200 million—I guess I should say 230 million—consumers, because I notice on the "Today Show" this morning 3-year-old children are now buying makeup, little girls, a very attractive feature.

At any rate, to get back to the subject, Mr. President, I think the issue here is and must be clear. If any Member of the Senate believes in holding down regulations, if any Member of the Senate believes that the consumers of this country should have an opportunity to buy on cash and get the lowest possible charge, if they believe we should have as full an anti-inflation program as possible, then it seems to me they should support the Glenn-Proxmire amendment.

VISIT TO THE SENATE BY MEMBERS OF THE BRITISH-AMERICAN PARLIAMENTARY GROUP

Mr. CHAFEE. Mr. President, I wonder if we might have a brief recess. A distinguished group of British MP's are here and they are going to be introduced by the distinguished Senator from North Carolina (Mr. HELMS). I ask unanimous consent that we have a recess for whatever brief time, say no more than 5 minutes, and without the time being charged to either side.

Mr. HELMS. Mr. President, will the Chair withhold for just a moment? I thank the distinguished Senator.

Mr. President, we do have a distinguished group of members of Parliament with whom I just had lunch, along with the distinguished Senator from Delaware (Mr. BIDEN).

We have the honor of the presence of members of Parliament, Mr. Dennis W. Healy, Mr. Roland Moyle, Mr. Jeffrey Thomas, Mr. James Tinn, Mr. Kenneth Woolmer, Sir Charles Fletcher-Cooke, Mr. Anthony Buck, Mr. Nicholas Bugen, Mr. Hugh J. Dykes, Mr. Roger Moate, and Mr. Eric Deakins.

[Applause, Senators rising.]

There being no objection to the request for a short recess, the Senate, at 1:39 p.m., recessed until 1:44 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. HEINZ).

CASH DISCOUNT ACT

The Senate continued with the consideration of the bill (S. 414).

Mr. GLENN addressed the Chair.

The PRESIDING OFFICER. I believe the Senator from Rhode Island was previously recognized.

Mr. CHAFEE. Mr. President, I know the Senator from Ohio has been patiently waiting to get the floor. It would be my intention to yield to the Senator from Hawaii for 3 minutes and then I would like 3 minutes, and then I would yield to the Senator from Ohio.

I yield 3 minutes to the Senator from Hawaii.

The PRESIDING OFFICER. The Senator from Hawaii is recognized for not to exceed 3 minutes.

Mr. INOUYE. Mr. President, I wish to express my support for S. 414, and my opposition to any effort to amend it by permitting merchants to add a surcharge as a condition of accepting credit cards. It seems to me that such an amendment creates the very real possibility of discrimination against middle-income Americans, the group which relies on them the most. At the same time, I fail to understand who would benefit by the amendment.

According to a Federal Reserve Board study, credit card use is a middle-income phenomenon. High-income people may use charge accounts but rarely any other kind of consumer credit.

Credit cards offer several advantages to the user. Among others, these advantages include:

The cash-advance feature of a credit card enables the customer to handle unexpected contingencies without destroying his budget and making an unwanted dip into savings, and without excessive formalities.

The single monthly statement received by the customer enables him to see at a glance all his card purchases for the month and to simplify his budget process.

Credit cards enable the holder to economize on the amount of cash carried.

If merchants are allowed to add a surcharge most assuredly this practice will have a chilling effect on the use of credit cards, and the benefits they offer will in effect be restricted.

If the use of credit cards is restricted, the user is not the only one who will suffer. Business will drop off, and more unemployment will occur. Our tourism industry, which accounts for $140 billion annually and employs over 6 million people, would be especially hard hit. It is not too difficult to imagine the enormity of the hardship this would cause among the men and women who work in our food and beverage and lodging industries.

Those who advocate lifting the ban on credit card surcharges do so on grounds that it penalizes those who pay cash because cash customers have to bear the added costs created by other customers' use of credit cards, as prices rise to cover higher handling expenses, including the merchant discount.

Mr. President, according to the evidence I have seen this simply is not so. A Federal Reserve Board study found that the use of credit cards does not increase merchants' costs; does not raise prices; and does not discriminate against the cash customer.

Mr. President, I believe this amendment would create instability in our economy at a time when we should be doing our utmost to bolster it, and I am therefore opposed to it.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. CHAFEE. Mr. President, I am prepared to forego my time at this time and let the opposition proceed.

The PRESIDING OFFICER (Mr. KASTEN). The Chair recognizes the Senator from Ohio.

Mr. CHAFEE. I do not yield my time permanently.

Mr. GLENN. I yield myself such time as I may need, Mr. President.

Mr. President, I rise to support Senator PROXMIRE's efforts to put forth an amendment that I would call a truth-in-selling amendment to this Truth In Lending Act. We all recall last year's political campaign and the Presidential campaign that always had as a slogan at every stop, "Get Government off the backs of the people. Get Government off the backs of the people." And at every stop we heard rhetoric such as, "My friends, the heavy hand of Government adds burdens to the forces of the free enterprise system and to those forces that made this Nation great," or we then come back to "Get Government off the backs of the people." Or we would go ahead with another one of, "My friends, we must remove the shackles, the chains, the handcuffs that bind the businesses of our beloved land," and we come back to "Get Government off the backs of the people."

Then there would be another speech that would be something like this. It would be, "My friends, the regulatory bonds of Government interference fall like a smothering blanket over the spirit of every American, of every man, woman, and child in this sovereign country, and every businessman, every entrepreneur, every investor, every laborer, every unionist wanting to work in a free enterprise system and I promise you that I will work to deregulate, to throw off those shackles."

And we heard speeches like that ad nauseam last year. We heard it all on deregulation. "Get Government off the backs of the people."

Well, the President listed deregulation as a priority to fight inflation. Hundreds of millions of dollars a year were going into unnecessary regulation, adding to the cost of business in this country. And now, Mr. President, we are faced, here on the floor of the Senate today, with the first real test, the first real test of whether we mean this or whether we are just selling each other a bill of goods, a lot of hot air, when we go out and talk about getting Government off the backs of the people.

I would hope that those in the press gallery would send out this message loud and clear across this country to every single spot where somebody was up for election last year, so that they will know whether their representatives here were really serious. I think it has been quite notable that the White House has remained silent. The White House has chosen to remain silent on this first test of whether we really mean it on deregulation.

I understand they have been asked and they are still silent.

Well, I would send a message down Pennsylvania Avenue to the President that I made promises, too, and I was serious about those promises on deregulation. I think now, with this first deregulation proposal coming up in this amendment, in this new Congress, that this is a good place to start. I hope the people in my home State of Ohio will note that I am starting and I am help-

ing Senator PROXMIRE on this because how can we indeed be against a proposal that frees business to run their own business? How can we be against a proposal that stops the practice that is now law—of mandating, of requiring, hidden costs—requiring hidden costs? How can we be against a proposal that provides the poor at least an opportunity in some places to buy at the cheapest cost by having their purchases not go to subsidize those of the credit card users?

Basically, let us get Government out of telling businesses what to do as much as we can. This stands as a classic example of what we all talked about in last year's election and what I, for one, still mean.

If, for instance, today I stood here on this Senate floor and I proposed doing just the opposite—let us say we had no ban on surcharges, and I proposed that we put on new regulations to say that they cannot give a rebate or give a reduction in cost of a particular goods or service, a reduction for paying cash—people would think I was crazy to try to put that in given the climate we have today. And yet here we are just trying to eliminate that, just trying to simplify things, and we are being opposed.

I am amazed that that is the situation in which we find ourselves.

Mr. President, I want to say how shocked and disappointed I was when I first learned of the Banking Committee's recommendation to keep the heavy hand of Government regulation firmly around the throats of merchants and consumers.

Last fall, candidate Reagan and those of us campaigning for reelection promised the people of this land that we would in fact lift the yoke of burdensome regulations; that we would free the spirit of private enterprise; that we would resuscitate our economy by eliminating the deadening effects of Government interference in the marketplace.

We all promised the voters we would do those things. When I made those remarks, I meant what I said, and I believed that my fellow campaigners, including President Reagan, were sincere as well. So when I returned to Washington for the 97th Congress I was looking forward to working with my colleagues and the administration in cutting through the redtape that binds the hands of American business.

Imagine my dismay when I first learned of the Banking Committee's vote to continue the Government ban on credit surcharges. Imagine my shock that the new administration has chosen to voice no opinion on this issue.

So here we are with our very first legislative opportunity to follow the voters' mandate on loosening Government restraints. And what does Congress offer? A new straitjacket. And on this the administration has no opinion.

Well, I will not be a party to this. I will not renege on what I promised the voters, the merchants, and the consumers last November. I am deeply disappointed that the White House has not literally jumped at this chance to hold high the banner of free enterprise. After all, this is the banner that President Reagan waved so triumphantly during his campaign. Now is the time to reverse the tide of Government regulations. Now is the time to make a new beginning and to fulfill the promises we made to deregulate the economy.

The amendment Senator PROXMIRE and I offer today is a major step in those directions.

Let us not overdo this particular amendment. Whether it passes or fails is not going to mean that inflation goes up or down by even a fraction of a percent, but it is an indication to me of whether this body, this Congress, and this administration are serious about getting on with deregulation, with getting the Government off the backs of the people.

First, I want to express my full support of title I of this act which removes the artificial 5-percent limitation on discounts that merchants can offer to cash paying customers. In my view, it is high time we let merchants decide how much discount they can give their customers.

This whole thing of the discount is almost unbelievable to me. I think the fact that we have to pass an act of Congress to give businesses the right to reduce their prices highlights the extent to which Government has been meddling in the marketplace.

The amendment Senator PROXMIRE and I offer today seeks to further lighten the burden imposed on merchants and consumers by the heavy hand of Government regulation. It is absurd that we have to pass a law, we have to pass legislation here today, to tell a businessman he can reduce his prices in this time of inflation.

But our amendment goes beyond the bill's provision lifting the artificial ceiling on cash discounts by eliminating the current prohibition against surcharges for paying through credit cards instead of cash, check, or other means.

The opponents of our proposal contend that our amendment disrupts the status quo; that it is based on a premise that may not be valid; that it will cause consumer confusion and poses a threat of consumer deception; that it might contribute to inflation, and that it is a moralistic attack on the use of credit cards.

These arguments are wrongheaded and distort the objectives and effect of our amendment. Let me address these arguments.

It is true that our amendment would disrupt the status quo—and that is precisely our intention. We want to disrupt the status quo of unnecessary, anticompetitive, Government regulation of the marketplace. In this regard, our amendment gives legislative voice to the economic views expressed by voters last November—it reduces Government interference in business transactions between merchants and consumers, while advancing the cause of free enterprise and freedom of contract. Some Senators who oppose our amendment apparently do not believe that the people of this Nation want a repeal of unnecessary Government regulation.

I shall be happy to give them the names of several merchants associations and consumer groups, such as the ones that Senator PROXMIRE read into the RECORD a short while ago, as well as the names, I might add, of several former Senators, several ex-Senators no longer with us, who will vouch for our contention that Congress must begin to alter the way in which Government relates to business.

Other opponents of this proposal argue that our amendment is based on a premise that may not be valid—namely, the premise that a credit card is a more expensive payment mechanism than cash or checks and, therefore, that credit card users are being subsidized by other purchasers. A Government study, it is suggested, should address this question. But this argument misrepresents the basis for my support of this amendment and it raises a question that only the market, not Congress, can answer.

The basis for my support of this amendment is not my opinion on the relative costs of credit versus cash, but rather my strong belief that Congress should not regulate how merchants price their goods. If merchants are free to grant discounts, they should be free to use surcharges. Together, merchants, consumers, and free market forces, unfettered by artificial restraints, can best decide the proper price fo goods. That is our system.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. GLENN. Certainly.

Mr. PROXMIRE. Mr. President, I congratulate my good friend from Ohio. I think this is a most important point he is making. I think he has made the point, as I have made the point, that our amendment is proconsumer. It is anti-inflation. It is an amendment that is supported by every single Federal agency that has studied this problem, including the Federal Reserve, the FTC, the Comptroller of the Currency, the Home Loan Bank Board, the Credit Union Federation, by consumer groups, labor groups, farm groups, senior citizens.

More important than any of that is the point the Senator from Ohio is making right now, that our amendment would knock out a regulation and restriction on the free enterprise system that cannot be justified. I have not heard one word of rebuttal of that. I cannot understand, for the life of me, how anyone can say we should have a regulation for once that we have unanimous agreement on, from every group, business to labor, which says regulation should not continue. Yet, somehow, because of a special interest group, the credit card people, who have the clearest kind of financial interest, we are continuing it.

The point by the Senator from Ohio is by far the most important. I am so glad he has highlighted that as an unjustified, meddlesome, completely irresponsible interference with the freedom of business concept.

Mr. CHAFEE. Mr. President, I won-

der if the Senator from Ohio would yield me 1 minute?

Mr. GLENN. Yes.

Mr. CHAFEE. I just want to get the record straight, Mr. President.

The distinguished Senator from Wisconsin has been constantly saying that every Federal agency is in support of this, constantly citing the Federal Reserve Board.

Let us see what Mrs. Teeters, who came before the committee when the Senator from Wisconsin was there, said.

I said:

And yet, you are saying by law you are going—you were going to restrict cash discounts to 5 percent, which in your own testimony you say hasn't worked. And at the same time, you are going to permit the merchant to impose a surcharge on the customer.

Ms. TEETERS. I am not wedded to the 5 percent number. For safety, you ought to have it equally on the surcharge and the discount, so it doesn't get out of hand. However, I don't think you want to make it totally unregulated, because there are some people out there who could be backed into unreasonable finance charges which don't count under Truth-in-Lending and wouldn't have to be Truth-in-Lending disclosures.

Senator CHAFEE. You're not working a free market system; you are having the government set limits.

Ms. TEETERS. All right, so I am compromising between a totally free, unregulated market, and one that is totally regulated.

Mr. PROXMIRE. Will the Senator from Ohio let me respond quite quickly to the Senator from Rhode Island?

Mr. GLENN. Mr. President, let me finish my statement; then we can get into debate.

Mr. President, only the free market can answer the question of whether cash or credit payments are more expensive. A ban on credit surcharges distorts the free operation of market forces. We do not need a Government study to determine that, although I am not going to oppose that in this bill.

I was a little bit appalled awhile ago when the floor manager of the bill indicated that might cost as much as $1 million; $1 million of taxpayers' money to go to study something like this. We do not need a Government study to determine which services a merchant should offer potential customers to make his goods more attractive or their prices more competitive. A study is unnecessary because the market will provide those answers—and will provide them quickly and free of charge. If there is no subsidization and a merchant assesses a surcharge, his competitors could gain an advantage by not instituting a surcharge. If there is a subsidization and a merchant fails to assess a surcharge or assesses an inaccurate one, he will lose cash customers. Thus there is a market incentive to seek out and assess an accurate surcharge.

Still other opponents of our amendment argue that allowing both cash discounts and credit surcharges will cause consumer confusion and pose a threat of consumer deception. This argument is both distressing and absurd.

It is like saying we are distorting the market because we charge a 3- or 4-percent sales tax on checkout after you have bought your item, whatever it is. It is also distressing because it reveals a loss of faith in free enterprise. And it is absurd because it is suggested that in the absence of congressional regulation, the market will soon dissolve into chaos and chicanery. So the logical follow to that argument could be that we should somehow get in and regulate everything in the market.

Rather than confuse consumers, passage of our amendment will give consumers a better indication of the true cost of goods. By allowing cash discounts and credit surcharges, our amendment will make consumers more aware of the actual cost of credit and hence better able to make informed choices. To compare prices and assess the costs of credit, they need only ask: "How much does this cost if I pay cash?"

Instead of "threatening consumer deception," our amendment would bring to light costs in excess of $1.5 billion that are currently hidden, hidden by law. Opponents argue that the ban is necessary to protect consumers using credit cards. There is no evidence, however, to suggest that merchants will be able to charge credit card users a price higher than that reflecting the true cost, including credit. The competitiveness of the retail industry will protect the interests of all consumers, credit as well as cash. Just as merchants would be free to use discounts or surcharges, consumers would be free to shop elsewhere if they dislike a merchant's pricing policy.

The charges are nothing if the merchant does not want them to be. This changes nothing as far as a merchant's current operations go unless he wants the option of changing. This would permit him to change.

Mr. President, opponents of our amendment suggest that it would contribute to inflation. This view ignores the inflationary effects of the current system and the competitive effect of our proposal.

Merchants now pay anywhere from 1 to 6 percent to credit card users on each credit card purchase.

I dare say that few people in this country are aware of that. I do not believe most credit cardholders are aware that the charges do go up for that credit card and that the merchant with whom they are doing business does pay a 1- to 6-percent charge because the person used the credit cards.

For charges on Visa, MasterCharge, and American Express alone, this cost amounted to $1.5 billion in 1980. Although a legitimate business cost, it is a cost unnecessarily borne, because of Federal law, by credit card and cash customers alike. Because merchants do not know who will use cash and who will use credit, they must base their pricing on the assumed use of cards. Hence, the $1.5 billion cost of credit card use is included in the price of all goods and passed on to all consumers. By unmasking the variance in costs which different card issuers charge, our amendment would stimulate competition among credit card issuers that, in turn, would benefit consumers.

If I had a "Glenn's Law" to propose here, it would be this, simply and concisely: Informed consumers encourage competition, competition encourages efficiency, efficiency reduces inflation.

Finally, our opponents allege that this amendment is a moralistic attack on the use of credit cards. This is simply untrue. We are not attacking credit cards—they are a useful device both for merchants and consumers and they will continue to be worthwhile instruments of exchange.

I am not against credit cards. I have here my little wallet, and this is a pack of credit cards, and this is not even all I use. It almost looks like a deck we could play pinochle with. I have other cards at home. If you think my collection is bad, you should see that of my wife.

So I do not speak today as one who is against the use of credit cards. Quite the opposite. I am not the only credit card junkie, as the reference was made a little earlier.

Neither are we advocating the imposition of credit surcharges by merchants. We are simply asking that merchants be given the option of using either cash discounts or credit surcharges. By lifting the ban on surcharges and letting merchants decide which option is best, we are putting Government where it ought to be in the pricing of goods—in a neutral position.

Extending the ban on surcharges, on the other hand, is not a neutral policy. It is unfair, inflationary, and distorts competition. It is unfair because cash paying customers who do not have, or cannot afford, credit cards bear part of the costs of credit transactions without enjoying any of their benefits.

To those on low or reduced incomes, those on retirement incomes, those already hit by inflation, those few extra dollars they pay because other people use credit cards may well be of tremendous importance to them. It is inflationary because it artificially raises the basic price of goods. And it does so in a way that is both invisible and that encourages the use of credit cards—indebtedness from which has grown from $15 billion in 1975 to $60 billion in 1980. It hides the variance in costs which different credit card companies charge merchants.

We are trying to cut down credit in this country right now. I believe that the figure on credit card float, as it is called—the credit that is out at any one time—is between $4 and $5 billion, which would match roughly the figure used by Senator DODD earlier, to the extent that credit card use runs around $60 billion, a figure I also used. So there is a $4 to $5 billion float in additional credit at any one time on the use of credit cards.

This amendment returns long overdue flexibility and choice to the buyer-seller relationship. It reduces Government regulation by letting merchants, rather than Congress, decide how to price their goods. It promotes a more efficient economy by giving consumers a better indication of the true cost of merchandise and of the costs involved in using a credit card. This is the essential goal of our amendment and it is a fundamental requirement of our free market system. For our economic system to prosper, con-

sumers must be able to make informed choices. To do that, they must have a clear understanding of costs and prices. This amendment will help them to acquire that understanding and, more important, it will insure that, as to that understanding, "They do not leave home without it."

Mr. President, I reserve the remainder of my time.

Mr. CHAFEE. I yield myself such time as I require.

Mr. President, in further discussion of the point made by the senior Senator from Wisconsin in connection with all Federal agencies supporting his position, I put in the RECORD a letter to the chairman of our committee from the Federal Deposit Insurance Corporation, signed by Mr. Walter Doyle, the legislative counsel. This is what he says:

> We are inclined to agree that the more straightforward approach of permitting surcharges on credit card sales could contain an inherent upward bias on retail prices in some instances. We would therefore favor the approach of S. 414 as an interim measure pending further Congressional review of the issue.

There it is. We have some statements going around here that all of this group and all of that group are for a particular position.

Let me further submit for the RECORD a letter from the Hotel and Restaurant Employees and Bartenders International Union, directed to me:

> The Hotel, Restaurant and Bartenders International Union strongly endorses S. 414, the Cash Discount Act, a bill dealing with the credit card surcharge ban and cash discounts. At the same time we are strongly opposed to the Proxmire amendment, which would create an instability in our industry at a time when we do not need any further setbacks that could lead to a loss of jobs.

Mr. President, a lot of souls seem to have been saved recently around this place, and strong positions were taken contrary to positions that were taken but a short time ago.

I regret that the Senator from Wisconsin is not here, because I should like to be able to explore further his position as recently as 6 months ago. The Senator has indicated here that no one can be opposed to his proposal, that everybody is for it. Let us see what took place in the committee last July, when they were considering the markup on the bill dealing with surcharges and the position in opposition to surcharges. The chairman was the distinguished Senator from Wisconsin. I read from the testimony:

> The CHAIRMAN. Any other amendments to the insurance bill?
>
> (No response.)
>
> The CHAIRMAN. If not, the bill will be reported. Any objection to reporting the bill as amended?
>
> Senator MITCHELL. Mr. Chairman, no objection. I merely wanted to point out, included in the draft of the usury commission that we approved yesterday was a provision extending the prohibition on the surcharge for credit card transactions for one year. I assume everybody was aware of that, but it wasn't mentioned. For the benefit of those members that were here and voted, it should be understood that that was also included.

This wicked prohibition on surcharges on credit cards—

> The CHAIRMAN. It was in your amendment. We did not discuss it with any member. If you want to raise a point of disagreement on that, you're free to do so.
>
> (No response.)
>
> The CHAIRMAN. All right.

Then they go on with other business.

So here is this poison spreading across the Nation, sort of like the hoof and mouth disease—not hoof in mouth—and not a voice raised by those who are now fervently opposing it on the floor of this Chamber.

Mr. President, I point out as to this bill, that never was an objection raised by even the distinguished Senator from Ohio, who has spoken so eloquently about it now. Not a word. We passed this before. That is why it is on the statute books today.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. GLENN. I yield myself such time as I may need.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. GLENN. Mr. President, I think it is good to look again at the organizations that the Senator from Wisconsin pointed out—the broad support for the amendment that he has offered and which I am supporting. The Heritage Foundation put out an information sheet. And while they say they have not officially taken a position on this, the information sheet they gave read almost like my speech here on the floor a little while ago. So I know the slant they took in their information sheet certainly went along with our amendment.

Alined with the Heritage Foundation on our side now is the AFL–CIO, for instance. They are two unlikely groups in concert in support of this amendment.

The National Small Business Association is in favor of this. The Council for a Competitive Economy is in favor of this amendment. The National Taxpayers Union is in favor of this. The Federal agencies that have indicated their support for this amendment are the Federal Reserve Board, the Federal Trade Commission, the Federal Home Loan Bank Board, the Comptroller of the Currency, and the National Credit Union Administration. In addition to those, there are the Consumers Federation of America, the Consumers Union, the International Ladies Garment Workers Union, the National Council of Senior Citizens, the National Mass Retailing Association, which represents businesses doing some $50 billion worth of business a year, and the National Farmers Union. This is such a varied group it is almost unbelievable that they could get together under one banner here in supporting this amendment.

So I point out that while we have that kind of array of support across the whole political, business, and labor spectrum, the opposition has quoted from a very limited number of people supporting the other side.

I also wish to make a remark regarding the comments made by the distinguished Senator from Hawaii (Mr. INOUYE) because I understand his concern that anything we might do that would interfere with the tourist business or anything that would interfere with tourism in general in this country, which is a very major industry in the United States, would have a definite impact on the economy.

But I would say this to the hotels of Hawaii and to Senator INOUYE who represents their interest here. There is absolutely nothing, absolutely nothing that forces any businessman in Hawaii to stop using credit cards and since most people traveling to Hawaii would use credit cards at the hotels there I do not think that this amendment would have one single bit of influence on tourism.

What it does do is give businessmen flexibility to set their prices and that is all. And if there is a basic surcharge that is put on for certain services, it is like any other surcharge we would expect to have put on for other services.

So I think the impact on tourism, on restaurants, on hotels, would be absolutely minimal.

I also want to respond very briefly to the distinguished Senator from Rhode Island regarding his remarks concerning the former chairman of the committee, Senator PROXMIRE. I can only say that I am glad he has become that educated in the last 6 months since that remark and I am reminded of the old statement that a foolish consistency is the hobgoblin of small minds. I am glad he has seen the wisdom of coming around to propose the amendment that he has proposed.

Mr. DODD. Mr. President, will the Senator yield?

Mr. GLENN. I yield.

Mr. DODD. First of all, I compliment the Senator from Ohio on a fine statement regarding the amendment he coauthored along with the distinguished Senator from Wisconsin.

It just occurred to me during the course of debate that there has been a contest of sorts going on regarding how many special interest groups support or oppose this legislation. During my previous life as a Member of the other body, I recall vividly the distinguished chairman and the present chairman of the House Rules Committee, Congressman BOLLING, standing in the well of the House one day during a heated debate where a similar contest had been going on over how many different groups supported or opposed the pending legislation, and he said that unfortunately we have come to believe that the sum of special interest equals the national interest. That is not the case.

This amendment that is being proposed by Senators GLENN and PROXMIRE is a good idea. It is the right idea. It is the right idea not because 10 groups support it and 8 groups oppose it. We must realize that, while it is important to take note of which institutions and which groups support or oppose things, it is also important to recognize that people, in addition to being tired of overregulation, too much Government, and inflation, are also tired of mindless debate between an emerging and threatening number of special interest groups. We need them. They do a good job. They can be informative. They can assist in the process. But I do not think it contributes

tremendously to the merits of debate to always count how many different groups support or oppose things.

The amendment proposed by Senator PROXMIRE and Senator GLENN to lift the ban on surcharges is a sound notion. It is a sound notion for the arguments that Senator GLENN has put forth this afternoon. It is a sound idea because it is going to contribute to our battle against inflation. It is a sound idea because it is going to eliminate unnecessary Government regulation at a time when people are demanding that and when our economic system requires it. It is a sound idea because it will eliminate the discrimination against cash buyers, people who want to pay for their goods with cash and do not want to subsidize those people who prefer to use credit cards.

It is a sound idea because it conforms to the very notion of truth in lending and that is to give consumers in this country an opportunity to know what they are paying, how much they are paying, and what hidden charges are included. That is why this is a good idea. That is why we should be supportive of it, not because of this notion that a certain number of groups oppose or support the idea.

So I stand here to encourage my colleagues to support this amendment.

I thank the Senator for yielding.

Mr. GLENN. Mr. President, I yield myself such time as I may need.

There is one other thing I wanted to respond to that was brought into the debate a little bit earlier and that was the credibility given Mr. ANNUNZIO over in the House of Representatives, and I certainly share the opinion of his credibility. And that was used as backing up opposition to this amendment, the fact that the bill went so overwhelmingly through the House of Representatives.

I wish to put a little different perspective on this. In an article in the New York Times on March 9 of this year by Karen DeWitt, the following is quoted—

"Credit card users should pay the legitimate cost of using their cards. We don't need cast customers subsidizing their use," said Representative Barney Frank of Massachusetts.

Mr. Frank offered an amendment eliminating the ban but House rules required that the bill go to the floor without amendments. "That bill was rushed through the House," said Mr. Frank. People came up to me on the floor after I voted against it and asked why. When I explained it was because the surcharge ban was a subsidy of the credit card industry they said they wished they had known that earlier. I think I could win that amendment on the floor if we go to a House-Senate conference.

I wanted to make sure we got that in the RECORD because I think it puts a little different light on that overwhelming vote that is recorded over in the House.

I reserve the remainder of my time.

Mr. CHAFEE. Mr. President, I think we really are running out of gas in this place when we are down to quoting a freshman Representative who when a vote came out 372 to 4 saying "people did not understand what they were doing. I think I could change that vote." I am glad he got a little press and 372 people were wrong apparently. People did not understand what was going on and he could change things. We take off our hat to his confidence.

The distinguished Senator from Connecticut says that if this amendment passes it is going to cut down on inflation, it is going to help the small purchaser, it is going to do everything but cure the common cold. We know that what he is saying is what the facts of the matter are that people who accept credit cards—namely, the merchants—do not have to. There is nothing that says they have to take credit cards. They take credit cards because it increases the gross of their business and permits them to remain competitive.

I ask the opposition why is it that if all these charges are imposed on the cash customer by the use of credit cards we do not see more operations in the country that are cash only and no credit cards at all. Those are the outfits that should win, easily. If this $1.5 billion subsidy is going to the credit card users, then obviously anyone who runs an operation with straight cash can sell his products for less and can drive the opposition right out.

But we have not found that taking place. Of course we have not because Americans have found that credit cards increase their volume, permit them to lower their prices and remain competitive overall.

How are you going to allocate the cost to the use of any form of business? They say that credit cards——

The PRESIDING OFFICER. All time on the amendment has expired.

Mr. CHAFEE. I will take time from the bill. How much time do I have left on the bill?

The PRESIDING OFFICER. There are 77 minutes remaining on the bill to the Senator from Rhode Island.

Mr. CHAFEE. I yield myself 15 minutes, no longer.

Mr. President, what the opposition is arguing here—and it is amusing to hear the strident voices about regulation, because some of the great regulation voters in the Senate are up now saying this is wrong.

Mr. GLENN. Right.

Mr. CHAFEE. If we want to get rid of regulations why do we not get rid of the whole truth in lending? Of course, this amendment nips away at truth in lending.

The customer does not know what it is costing him. Under their proposal, when a person uses a credit card, the merchant can put on 10 percent, 15 percent. Under the Glenn amendment, the merchant will say, "We are permitted to do that. Thanks to Senator Glenn we can charge you 20 percent."

Mr. GLENN. Mr. President, will the Senator yield for a question?

Mr. CHAFEE. If it is a favorable one. [Laughter.]

Mr. GLENN. I will make it as favorable as I can.

Does the Senator think in law we should require the credit card costs to be hidden and not known to the public? That is a favorable question.

Mr. CHAFEE. That is a question that assumes a fact. That is a question which starts off with hidden costs. The only study we have ever had on this, Mr. President, despite the tremendous knowledge of the distinguished Senator from Ohio and the distinguished Senator from Connecticut, in this field—and they are very learned men—the only study we have had—and studies, as you know, carry a certain flavor in this body—was cited by the distinguished Senator from Hawaii. This was a Federal Reserve study, admittedly some years ago, but I do not see that the circumstances have changed that much, and that study said there are not hidden costs in the use of credit cards.

Merchants obviously do not think that. The merchants believe they can remain competitive by doing this. But we will have some merchants unquestionably seize on the Glenn amendment and charge there and add costs to the use of a credit card to the unwary, to the unsuspecting, to the traveler, the innocent traveler here, without sufficient amounts of cash, who uses his credit card and is caught with the Glenn amendment—20 percent additional.

So, Mr. President, I think this is an iniquitous piece of legislation proposed.

Mr. GLENN. Mr. President, will the Senator yield? Did the Senator say 20 percent additional, is that what he said?

Mr. CHAFEE. The Glenn amendment could permit that.

Mr. GLENN. How would that be?

Mr. CHAFEE. You have unlimited surcharge.

Mr. GLENN. We could just as well say 200 or 300 percent. But the marketplace will take care of that. That is where the free enterprise people disagree with you. We believe the marketplace will regulate that, and as long as the people know what they are being charged for the marketplace will take care of that.

If I followed the analogy, Senator, we could say that every single price should be regulated so that no merchant could ever put a price above a certain level, and I do not think the Senator is going to stand here today and ask for wage and price controls across the board.

Inform the people and the people will make their free choice. That is what we are proposing with this amendment.

Mr. CHAFEE. I am not sure that new free enterprise costume the Senator is wearing completely fits.

What we are doing here is undermining the truth-in-lending law. If we want to get rid of it, all right, let us take up that issue. But that is a separate subject. If we want to say we are trying to restrict credit in the country—one of the arguments that is made here on the floor is that we want to restrict credit and that there is something wrong with people using credit cards, because that fuels inflation—then that is a separate subject.

If we want to get into those moralistic judgments, let us do so, but not under this piece of legislation, Mr. President.

What we are saying is let us maintain the status quo, let us have a study. The surcharge prohibition will expire in 3 years, but in the meantime, the unwary are going to be protected under the proposal we offer here.

I reserve the remainder of my time.

Mr. GLENN. Mr. President, I yield myself such time as I may require. I think we are winding down here. I do not know of anyone else who wants to speak, and I think we are beginning to go over ground we have already been through two or three times today, so I would be prepared at the proper time here to yield back my time if other people on the floor will do the same thing.

I think to those staff people who are listening in the offices and Senators who are listening in their offices that this thing comes down to one basic thing. Do we believe in deregulation and getting on with it or do we not? It is that simple.

We talked about it in the campaign. The President talked about it in the campaign. We all talked about it. We talked about getting Government off the backs of the people.

Yet here we are debating on this little amendment, which is not going to change the overall course of the economy of the country, about whether we are willing now to face up to it here on the floor of the Senate, the first test we have had in this new Congress, the first test on the floor of this Senate, the first amendment that proposes really getting into deregulation, albeit on a small scale, and we are now going to flunk this, and the President is going to say, "I have no position on this, Senate." He has already done so. "I have no position. I am a big free enterprise person, I want to get Government off the backs of the people, get that Government off the backs of the people, but not with my blessing." No position. "I do not have any position on this, Senate," after all the talk of last fall, and it is disgusting.

I say this is a good place to start. It is small but it is a start, and let us set a precedent and let us set it today that we mean business about getting Government off the backs of the people.

I meant it when I talked about that in my reelection campaign last fall, and I am here trying to do something about it, not defend special interests and try to hide credit costs in the law—in law that continues to hide costs from the American people so they cannot make their own decisions, prohibited by law from knowing what they are paying and what goes into it. I find that unconscionable, and for an administration to take no position on that is unconscionable.

I think we should pass this amendment. The President campaigned on deregulation as a priority to fight inflation. This is his first test as well as the first test of the majority, the first test of the whole Senate as far as I am concerned, and I say again any proposal that frees business to run its own business, that stops this practice now in law of mandating hidden costs, and any proposal that provides the poor at least an opportunity to have some businesses that will match the credit, match the surcharge, reduce the price of their goods so that the poor, those in lower income levels, can buy at a cheaper cost, it is just unbelievable to me that we would be debating this instead of jumping on this and supporting it.

Yet the President will not support it. The majority side is fighting this, and here we are. We have sort of switched roles in the traditional view that people take for the parties here on the floor of the U.S. Senate. You bet I am free enterprise, and I mean it with this amendment. I want to cut out Government regulation. The other side wants to keep it on. That is the basic fact we are up against here today; that is the basic, fundamental truth.

Are we on this first little amendment, not very expensive, on this first little amendment, of the 97th Congress of the United States, going to have guts enough to really and truly start our own little nibble here on deregulation or protect it? Are we going to say that the special interests are such that we dare not do anything to their little bailliwick, that we cannot destroy that? We talk deregulation and it is all hot air, it means absolutely nothing. The President has talked about deregulation, but he will not support this. The talk about deregulation on the other side of the aisle meant nothing because they will not support this.

I do not know whether we can win this or not. We got started very late on this, but I say we need to add this truth-in-selling amendment to the truth-in-lending legislation we have before us.

We cannot afford to leave this Chamber without it.

(By request of Mr. BAKER, the following statement was ordered to be printed in the RECORD:)

● Mr. DOLE. Mr. President, I would like to express my support for the Cash Discount Act as reported by the Senate Banking Committee.

The Senator from Kansas believes that credit card purchases should not be subsidized by those who pay with cash. With the proliferation of credit cards, cash purchasers are in many cases those who are unable to qualify for credit, namely lower income citizens. We should not make them pay extra for their purchases just so merchants can pay credit card companies for the cost of credit card purchases. The Cash Discount Act addresses this problem by providing for a two-tier pricing system. Under this act, merchants will be allowed to offer discounts to cash purchasers if the cash transactions are less costly than credit transactions.

Those of us who believe in a free market and the fair allocation of costs might be tempted to support efforts to expand this bill by also allowing merchants to impose surcharges on credit card customers. However, I am convinced that surcharges are not a good idea. My main concern is that cash customers not be forced to subsidize credit card customers. This bill does that by allowing cash discounts, which are essentially the same as surcharges on credit card customers.

The primary difference is the price the merchant must post. Under a surcharge system the merchant can display the lower price to lure the customer into his store before imposing an unposted surcharge. On the other hand, the merchant offering cash discounts must post the higher price and then discount that price if the customer pays with cash. If I were a merchant offering a cash discount, I would also post the availability of the discount. The consumer benefits in the end from this more accurate disclosure.

In addition, the underlying premise of surcharges may be wrong. Most of us assume that credit cards are subsidized by cash purchases. The only study of this matter I know of was conducted by the Federal Reserve Board over 10 years ago, and it indicated that credit transactions do not cost more than cash transactions. This may be the case for several reasons—credit card use increases total retail volume and cash transactions are not cost free either.

For instance, the costs of accepting checks, which are a form of cash, are often high because of employee time and the proliferation of bad checks. At any rate, the question of cost is open for debate. I favor the committee bill because it calls upon the Federal Reserve Board to examine whether credit cards result in higher overall costs than other forms of payment. Once we have the results, we can formulate a permanent solution.

I urge the Senate to approve this bill as overwhelmingly as the House did 2 weeks ago. By doing so, we can protect the rights of cash purchasers at the same time we preserve the expectations of the 19 million credit card users in our country.●

Mr. CHAFEE. Mr. President, I yield myself such time as I may require.

Mr. President, I think it is important to point out to those Senators who are listening in their offices and others who have just come to the Chamber that what this bill does as we have proposed it is to permit free-market competition by removing the cash discount limitation that exists under present law. If a merchant wants to offer lower prices for cash, three cheers, go to it.

Second, what this bill does is remove the present regulations that have inhibited merchants from offering cash discounts. They have been discouraged from offering such discounts both by the small percentage that is permitted, namely the 5-percent limit and also by the Federal Reserve Board's regulations. We remove both of these obstacles.

The only real difference, Mr. President, between what the majority side is proposing here and what Senator GLENN and others are supporting—the so-called Glenn-Proxmire amendment—is that the committee's amendment requires that the highest price be the one that is tagged and that when you go into a store you know that what you see is the highest possible price and that it is not going to be any more. When you go in and see this piece of furniture for $120, that is it. They cannot use bait-and-switch tactics. They cannot bamboozle the consumer. They cannot confuse the unwary. That is the price; it can be lower, but it cannot be higher. That is the maximum price.

It seems to me that that is the best solution for the interim while we await this study to determine which route to pursue.

Mr. President, there has been a lot of talk here about special interests. The definition of a special interest is somebody who takes the side that you are not on. It seems to have a wicked ring to it. One always accuses the opposition of having the support of special interests,

while the other one supports his or her position by saying, "We are opposed to special interests. Haul those vandals away. Keep them from the gates of Vienna. We don't want them coming in."

But, Mr. President, set aside special interests—and I think the Senator from Connecticut made a good point when he said, "Since when are we reduced to weighing how many letters we have of support from Agencies A, B, C"—some I have never heard of; how many members they have, I do not know—"as opposed to weighing the scale of how many letters of support on the other side?" I do not believe in that. I think we have a duty here.

We have to protect the unwary consumer. We have to help those who pay cash. We have done that with this piece of legislation which I submit and urge the Senate to support. I submit it is the finest possible solution to the present dilemma we are in.

Mr. President, I reserve the remainder of my time.

Mr. GLENN. Mr. President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DODD. Mr. President, I suggest the absence of a quorum and ask that the time be charged to the time remaining to the Senator from Ohio.

The PRESIDING OFFICER. All time has expired. The time will not have to be charged.

Mr. DODD. Mr. President, may I withdraw that request?

The PRESIDING OFFICER. Yes.

Mr. DODD. Mr. President, I suggest the absence of a quorum, and I ask that it be charged against the time on the bill. I believe I have time remaining on the bill.

The PRESIDING OFFICER. The Senator is correct, but the quorum does not count against the time on the bill since all time has expired on the amendment.

Mr. DODD. Mr. President, I still would suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CHAFEE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, I yield to the distinguished Senator from New York such time as he may require.

The PRESIDING OFFICER. The Senator from New York is recognized

Mr. D'AMATO. Mr. President, I believe that this bill is long overdue. I know it has been the subject of legislative debate and passed the House of Representatives. I think it is a good bill. I think it should be enacted into law, unencumbered by any amendments, particularly those which would allow a surcharge to be applied against those who would use credit.

I think those that advocate a study costing the American public untold amounts of money would, in essence, defeat the very nature of this bill. S. 414 will allow people to utilize cash so as to be less dependent on credit, creating in both the minds of the consumers and in the minds of businessmen who are looking to move their stock the incentive to minimize the unnecessary use of credit.

I think it is a step in the right direction in terms of breaking the shackles of Government overregulation.

What useful purpose is ever served by attempting to legislate the denial of a merchant's right to give discounts benefiting the consumer and especially their business? If a person wanted to give a 50-percent discount because he felt that people paying cash would produce the kind of economic return that would benefit his business, why should the Government restrict that kind of activity, particularly when we provide that people would be notified in clear language, conspicuously posted, of the fact that a discount would be available for those who would rely upon cash as opposed to credit?

To allow a businessman to impose a surcharge on those who would rely on credit, as has been advocated by some, would be a terribly counterproductive amendment which would, most likely, lead to the defeat of this very basic legislation. As we have been told, our colleagues in the House are absolutely adamantly opposed to that.

This would be a denial, I believe, to the business community, and to the consumer of the free economic society that we are attempting to promote

For the reasons I have stated, Mr. President, I believe this is really a move in the right direction, breaking the shackles of Government, allowing the business community to do that which it knows how to do—to merchandise products unencumbered with this amendment. The cash discount bill is long, long overdue.

For one, I would like to see it enacted quickly and expeditiously because it is going to mean savings to the consumers, and I believe it will eliminate a situation which would be rife with fraud if we were to allow a surcharge on those who use credit cards to encumber this bill.

For these reasons, Mr. President, I am wholeheartedly in support of this bill and would urge my colleagues to give that kind of support which would enact S. 414 into law.

Mr. GLENN. Mr. President, I yield myself such time as I may need.

Mr. President, in response to the Senator from New York, I believe he should vote for this amendment. He says he wants to break the shackles of overregulation. Those are his words.

That is exactly what we are trying to do with this amendment, to break the shackles of overregulation, which the Senator from New York referred to.

He said a discount is OK. Why not then label the surcharge so people know about it and let them know about the charge as well as the discount? In other words, why not take the charges out of hiding where they are mandated in law right now?

The distinguished Senator from New York said he thought it was a denial to the business community of their rights, I believe, and said that we wanted merchandisers to sell their products unencumbered—unencumbered.

I am with the Senator all the way on that one. Let us sell them unencumbered. Let us let the marketplace determine what happens. Let us break the shackles of overregulation. I agree with that statement.

I believe if the Senator believes in what he just said he will probably come over and vote for this amendment because that is what we are trying to do, to break the shackles of overregulation. We are not trying to deny the business community the right to do business. We are doing exactly what he said in trying to let the merchandisers sell their products unencumbered. That is the American way.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. CHAFEE. I yield 5 minutes to the Senator from New York.

Mr. D'AMATO. Mr. President, I support this bill and am personally opposed to the amendment because I think people would be personally and pleasantly surprised when they find out that they are going to get a discount because they are purchasing with cash, but equally I think customers would be greatly surprised if they were to find upon arrival at the cash register that there was a surcharge for the purchase of goods, or for the meal they had just consumed. I would ask you, what does that person do when he has arrived at the cash register and finds out that there is a 10-, 15-, or 20-percent surcharge for the meal he has just consumed because he will be using a credit card? How many restaurants will be advertising that for the use of the credit card a surcharge will be added? How many people, will be inclined to say, "Take back this jacket" or "Take back this garment because I did not realize there would be a 10-, 15-, or 20-percent surcharge for utilizing my credit card?"

There are very few people who would do that. They might not go back to the establishment, and they are going to be embarrassed.

I would suggest to you that we are not freeing the economic system by saying that we are going to allow for a surcharge in the use of credit cards. It indeed would be counterproductive. Thank you. Mr. President.

Mr. GLENN. Mr. President, I yield such time as I may require.

Mr. President, I would say in response to the Senator from New York again that the surprise of getting a discount will be very pleasant. The idea that a surcharge will automatically just go on to the existing level of goods without there having been a lower level established for that particular goods to begin with goes to the heart of this whole thing.

If all this was going to do would be to permit surcharges on top of already high, inflation-ridden prices, that would be one thing. But that is not the free enterprise system. If we believe in the free enterprise system, if we are going to unencumber it, as the Senator from

New York said, then we are going to let the marketplace dictate what those prices will be, and those merchants that are charging 3, 5, or 6 percent more are going to get it in the neck because they are not going to have as many customers very shortly as those other merchants who are establishing an initial lower price for their goods or services and then deliberately giving that price to those who do not use credit cards and requiring the surcharge to go on to those who do use it. It is the service we pay for.

That is the reason I said a while ago that this also benefits the poor, very definitely, in that, where they have shops that do do exactly that, they will not then be in effect subsidizing the credit card users.

Mr. President, I am sorry the distinguished Senator from New York had left the floor, but I did want to respond to him in that regard.

I reserve the remainder of my time.

● Mr. HAYAKAWA. Mr. President, I rise in opposition to Senator PROXMIRE's amendment. I believe it would be a mistake for Congress to lift the ban on surcharges for credit card customers at this time.

Over the next 2 years, if the Cash Discount Act passes, the Federal Reserve System will be conducting a study of the effects of charge card transactions on card issuers, merchants, and consumers. Until the completion of the study, Congress will continue to debate and act on this issue as it has for the past 5 years, relying on conjecture instead of facts. Until we have the facts, I am of the opinion we should continue to restrict the surcharges on credit cards.

Our economy is in a precarious position, Mr. President. Anything we do to affect it must be done with caution and complete understanding of the results it will produce. The allowance of discounts for customers who pay cash will be helpful to both merchants and consumers. It will encourage the use of cash by discouraging the notion of buying on credit now and paying later with smaller inflated dollars.

The Cash Discount Act is a step in the right direction. However, until the study by the Federal Reserve System is complete, we cannot possibly know if we have gone far enough or if we need to go further. As an educator I am acutely aware of the need to have all the facts before trying to implement an idea or present it to someone else. I hope my colleagues are also aware of this need and will wait for the completion of the Federal Reserve System's study before they accept an amendment such as the one before us today.●

Mr. TSONGAS. Mr. President, it should be clear to all of us what the mandate in November was all about. "Get the Government off our backs." "Get Americans to work and save more." "Let the free market, the private sector, have a free hand." "Eliminate costly, time consuming, wasteful Government regulation."

I for one remain unconvinced about the ability and willingness of the private sector to house the poor, or to avoid future Love Canals without Federal presence. Here is a case where the market clearly deserves to operate on its own. Here is a chance to eliminate an unnecessary regulation. This amendment will let the shopkeeper decide whether he wants to give a discount to his customers for paying cash or impose a surcharge if they use a credit card. Surely, that is his choice to make. Let us not forget that every cash-paying individual pays part of the cost of credit card operations. This is a hidden cost, passed on to the consumer. A surcharge presents users of a card with an explicit addition to the posted price, making the message clear.

Moreover, by allowing a surcharge to be imposed, we can hope to motivate people to save. Individuals facing extra charges for credit purchases may begin to save for that new toaster, rather than buying it on credit.

Finally, the amendment to allow the surcharge option has extensive support in both ideological camps. The Consumer Federation of America, the Consumers Union, the ILGWU, and the National Council of Senior Citizens strongly endorse this option. The Federal Reserve Board, which is greatly concerned about rampant increases in consumer credit, also supports this amendment. Finally, that bastion of conservative thinking, the Heritage Foundation, supports the concept of surcharges.

So we have before us an amendment with widespread support in both ideological camps that promises to eliminate one useless regulation and which may provide one small impetus to get mom and pop to start saving again. I think we should watch closely to see who will be standing up and fighting to keep this regulation on the books. Let all those individuals who voted to get the Government off their backs in November monitor their elected officials carefully on this vote. I think they may be surprised.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ANDREWS). Without objection, it is so ordered.

The question is on agreeing to the amendment.

Mr. CHAFEE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I take the floor only to announce that a vote should occur on this amendment at about 3:15 this afternoon. Certain other details are being attended to. In the meantime, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I inquire of the distinguished manager of this amendment and the manager of the bill if they are prepared to vote at this time.

Mr. GLENN. Mr. President, I am filling in for the manager of the bill, and I should like to check with him. So far as I know, he has no additional statement, and I would be prepared to yield back my time.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, I believe that all debate has ended. I do not believe there are any more requirements for time. I am prepared to yield back the time of the manager of the bill, Senator DODD, as well as the time I have on the amendment. I believe that Senator PROXMIRE has nothing else. So I yield back his time, also, and we are prepared to vote.

Mr. CHAFEE. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

I announce that the Senator from Kansas (Mr. DOLE) is absent due to illness.

Mr. CRANSTON. I announce that the Senator from Oklahoma (Mr. BOREN) and the Senator from Louisiana (Mr. LONG) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 41, nays 56, as follows:

[Rollcall Vote No. 28 Leg.]

YEAS—41

Armstrong	East	Metzenbaum
Baucus	Exon	Moynihan
Bentsen	Glenn	Nickles

NOT VOTING—3

Boren	Dole	Long

So Mr. PROXMIRE's amendment (UP No. 9) was rejected.

Mr. CHAFEE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. GARN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CHAFEE. Mr. President, I yield to the Senator from North Carolina.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. CHAFEE. I wonder if we might have order.

UP AMENDMENT NO. 10

Mr. HELMS. Mr. President, I ask unanimous consent, notwithstanding the previous unanimous consent with reference to amendments, that I be permitted to send to the desk for immediate consideration an amendment. This has been checked with both sides.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 10:

At the end of the bill add the following: (a) section 204 of the Public Health Service Act is amended by inserting after the first sentence the following new sentence: "The President may appoint to the office of Surgeon General an individual who is sixty-four years of age or older.".

(b) Section 211(a)(1) of such Act is amended by adding at the end thereof the following new sentence: "This paragraph does not apply to the Surgeon General of the United States.".

Mr. HELMS. Mr. President, I will not take long. This is an amendment which has been requested by the administration to correct a defect in the law and permit the nomination of a Surgeon General who may be more than 64 years of age.

The PRESIDING OFFICER. The Senate will be in order. The Senator cannot be heard.

The Senator from North Carolina.

Mr. HELMS. The present law contains what many of us consider to be an anomaly in that the Surgeon General of the United States cannot be 64 years of age or older. At a time when our new 70-year-old President has just begun his first term in office such an age restriction seems particularly inappropriate.

The amendment at the desk would remove this arbitrary age restriction from present law but only as it affects the Surgeon General. That the law be changed has been requested by Secretary Schweiker and the White House and is supported by the floor managers of S. 414.

In the House, Representatives ST GERMAIN and ANNUNZIO have said it will not impede action on the bill by the House and that they support the amendment.

Mr. DODD. Mr. President, will the Senator yield? As I understand it, this has been cleared with the other body as well and they have no objection to this?

Mr. HELMS. Exactly, the Senator is correct.

Mr. DODD. The minority has no objection to this amendment.

Mr. HELMS. I thank the Senator and I thank the Chair. I move the adoption of the amendment.

The PRESIDING OFFICER. Do the Senators yield back their time on the amendment?

Mr. HELMS. I yield back the remainder of my time.

The PRESIDING OFFICER. All time is yielded back, and the question is on agreeing to the amendment of the Senator from North Carolina.

The amendment (UP No. 10) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HEINZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Are there further amendments?

Mr. CHAFEE. Mr. President, there are no further amendments on this side of the aisle that I know of.

The PRESIDING OFFICER. If there be no further amendments, the question is on agreeing to the committee amendment, as amended.

The committee amendment, as amended, was agreed to.

Mr. CHAFEE. Mr. President, I move to reconsider the vote by which the committee amendment was agreed to.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. CHAFEE. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 31.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 31) to amend the Truth in Lending Act to encourage cash discounts, and for other purposes.

The PRESIDING OFFICER. Without objection, the Senate will proceed immediately to the consideration of the bill.

Mr. CHAFEE. Mr. President, I move to strike all after the enacting clause of H.R. 31 and to substitute the text of S. 414, as amended.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Rhode Island.

The motion was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (H.R. 31) was passed.

Mr. CHAFEE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CHAFEE. Mr. President, I ask unanimous consent that the calendar item 28, S. 414, be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senate will be in order. The staff will retire to the rear of the Chamber.

The Senator from Tennessee.

RESOLUTIONS OF DISAPPROVAL OF PAY RECOMMENDATIONS

Mr. BAKER. Mr. President, in accordance with the order previously entered, I have conferred with the distinguished minority leader and I now call up the first of the resolutions of disapproval on the recommendations of the Quadrennial Commission which is now on the calendar and I ask that the Chair lay it before the Senate.

DISAPPROVAL OF PAY RECOMMENDATIONS OF THE PRESIDENT WITH RESPECT TO MEMBERS OF CONGRESS

The PRESIDING OFFICER. The clerk will report the first resolution.

The legislative clerk read as follows:

A resolution (S. Res. 89) disapproving the pay recommendations of the President with respect to Members of Congress.

The Senate proceeded to consider the resolution.

Mr. BAKER. Mr. President, might I inquire if there is an order in respect to the time for debate on this resolution?

The PRESIDING OFFICER. The Senator is correct. There are 20 minutes, equally divided. The Senator from Delaware (Mr. ROTH) and the Senator from Missouri (Mr. EAGLETON) control the time.

Mr. BAKER. Mr. President, I thank the Chair. I do not see either of the managers of the resolution available in the Chamber at this time. Since the time is so short for debate, I ask unanimous consent that it be in order for me to suggest the absence of a quorum without the time being charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROTH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Delaware is recognized.

Mr. ROTH. As chairman of the Governmental Affairs Committee, I rise in strong support of these disapproval resolutions. The issue here is not whether judicial, legislative, executive, or congressional officials deserve an increase in salary. The issue is not even whether these officials should receive the 40-percent increase recommended by the Quad-

rennial commission or the 16.8-percent increase proposed by former President Carter. The issue, Mr. President, is whether Government officials are entitled to any across-the-board increase at a time when millions of Americans are not only going to feel the effects of across-the-board budget cuts, but are also being battered by consecutive years of double-digit inflation. I strongly believe that it would be highly inequitable to approve these salary increases at a time when the American people are being asked to sacrifice for the common good.

The results of last November's election reflect the desire of the voters that Congress put reins on runaway Federal spending. President Reagan, consistent with the views of the voters, opposes any increase for Government employees. I can think of nothing more in conflict with the strong mandate of the people than for the Senate to contravene the will of the voters by now approving a pay increase for these four categories of officials.

Increases for the four categories upon which these votes are based involve only 2,987 positions and an initial 12-month cost of $18.7 million. But because of separate, interlocking statutes, the salaries of another 34,211 Government employees would automatically be raised at an additional cost of $164 million. I recognize that a sum of $183 million is just a drop in the bucket for a national budget of hundreds of billions of dollars. Nevertheless, I cannot resist the opportunity to respond to such an argument by saying that "every little buck helps." As the administration weighs the relative need between competing budgetary items to determine which should be increased, reduced, or eliminated, will Members of Congress, executive, legislative, and judicial officials suffer hardship great enough to justify a salary boost? I doubt that a case of such hardship can be persuasively made. I am concerned that good public servants are leaving Government service, but I am more concerned about the immediate need to improve our troubled economy.

Notwithstanding their opposition to the salary proposals, the administration is not opposed to the increases on the merits of the issue, but is convinced that the approval of any increase would be highly inappropriate at this time. The problems surrounding pay compression in the executive and G–S level positions are serious. but not unique. Unfortunately Government service, like the private sector, is replete with many inequities.

The administration has indicated that it will address this problem before 1984, when the next quadrennial commission report is due. As the chairman of my committee, I will assist them in their efforts to rectify th's situation. But for now, we must make and adhere to a national agenda of priorities. As a supporter of these resolutions, I do not believe that these salary proposals are a national priority. I urge my colleagues to join me in voting for these four disapproval resolutions.

Mr. President, I yield the floor,

The PRESIDING OFFICER. Who yields time?

Mr. ROTH. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROTH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GORTON). Without objection, it is so ordered.

Mr. ROTH. At this time I am happy to yield to the distingu'shed leader.

Mr. BAKER. Mr. President, I thank the Senator from Delaware. I commend him for his leadership role in this matter and his management of these resolutions.

I inquire of the distinguished manager of the resolutions if he is aware of any further debate on this measure. If he is not I am prepared to ask unanimous consent to stack the votes and to commence voting after Senators have completed their statements.

Mr. CHAFEE. Mr. President, will the Senator yield me just 30 seconds?

Mr. ROTH. I yield.

Mr. CHAFEE. Mr. President, I do not want any confusion on my position. As I pointed out I am supporting what the President wishes in this instance. In other words, I am going to vote for these resolutions, some with more enthusiasm than others. I will vote with magnificent, tremendous enthusiasm for the cap on the judiciary and less enthusiasm on Congress, and zero enthusiasm for the cap on the Federal executives.

But I am going to vote for them because that is where we are now and then I want to move forward with the delinkage problem that we had our extensive discussion on.

I thank the Senator.

Mr. GRASSLEY. Mr. President, I wish to go on record as opposing President Carter's recommendations that would, pursuant to Public Law 90–206, increase the compensation of Members of Congress and other already highly paid employees of the executive and judicial branches. On March 10, 1981, four resolutions explicitly disapproving these pay increase proposals were introduced in the Senate. The parliamentary situation is structured so that those of us who opposed further Federal salary hikes at this time will be voting in favor of Senate resolutions numbered 89 through 92, as introduced.

I am gratified that this matter is being brought to the floor of the Senate for final disposition. It is important that we go on record as voting to forgo these salary increases.

My interest in this matter dates back a number of years. In 1977, before the law was changed to require affirmative approval of the quadrennial and Presidential recommendations, I introduced the first resolution disapproving the 1977 salary increases. At that time we were not able to bring this matter to the floor of either the House or Senate for a direct vote. The law now gives us that opportunity.

There are two points that should be made. The first is that many of us in the Congress are now or soon will be asking the American people to make sacrifices and do without. We have all heard from many citizens, groups, and organizations. I believe that the President's effort to restrain Federal spending is absolutely necessary in order to insure the economic survival of the United States. The move to put a lid on Federal spending is long overdue. It is within this context that the question of increasing the pay of Members of Congress and other senior Government employees should be reviewed. My judgment is that the President's program, despite whatever flaws and imperfections it may contain, has absolutely no chance of succeeding unless we are willing to forgo this most recent salary increase. I would not care to return to my home State of Iowa and face the people who sent me here, the same people who pay the taxes, and tell them that the institution of which I am a Member was unable or unwilling to do that which it has asked of others.

Second, I have read where one of the justifications for increasing Federal salaries is that we are unable to attract competent, qualified people to serve in the Federal Government. I do not believe that for a minute. That line of argument is an insult to my colleagues in the Senate. It is patently unfair to the thousands of truly dedicated individuals who serve the people in the executive and judicial branches of the Federal Government.

Anyone who is at all familiar with what has happened in Washington, D.C., over the past few months knows that there has been no shortage of applicants for senior positions with the Federal Government. And I know that the people who are coming forward to serve, the people whose primary purpose in working for the Federal Government is not financial enrichment, would be coming forward even if salaries were not what they are today.

Mr. President, the question now before the Senate is more important than simply the dollars and cents involved. We will be setting the tone and tenor for the next 4 years. I am glad that we have an opportunity to freely discuss this matter. I urge my colleagues to vote in favor of the pending resolutions disapproving the Federal pay increases.

Mr. SASSER. Mr. President, I am pleased to vote for Senate Resolution 89 which disapproves pay increases for Members of Congress. Certainly at a time when we are being asked to reduce Federal spending by nearly $44 billion, we should not be at the same time raising the salaries of the Members of Congress.

We went through considerable debate on this matter and the other related pay raises at the end of the 96th Congress. We were told at the time that we could not man the Government unless we raised the pay of top Federal officials, the judiciary, and Members of Congress. We were advised that the Reagan administration could not run the executive branch unless there was a pay raise which would have raised the salaries of some positions in the executive branch to as much as $95,000. We were told that

we could not have adequate congressional salaries unless they reached the level of $85,000. Judicial salaries were also to be raised commensurately.

Yet, all these recommendations are made at a time when we are experiencing inflation above 10 percent, when unemployment is at unacceptable levels and when interest rates are at historically high levels, topping 20 percent.

Indeed, during the Senate Governmental Affairs Committee hearings on the confirmation of Dave Stockman to be Director of OMB, I questioned him closely about the pay raise issue, and won from him a concession that it would be sheer folly to go ahead with the pay raises that were recommended by the commission on executive, legislative, and judicial salaries. Mr. Stockman agreed and indicated that he would counsel with the President on this matter and ask him to hold back his recommendations until we could get the economy in better shape.

Now Dave Stockman and I will have our disagreements, but this is one matter where his counsel has been wisely heeded by the President. For subsequent to our discussions on this matter, Mr. Stockman sent to Senator ROTH, the distinguished chairman of the Senate Governmental Affairs Committee a letter indicating that the President had decided to withhold the pay raise recommendations of the quadrennial commission. Mr. President, I ask unanimous consent that the letter of Mr. Stockman to Senator ROTH be entered into the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OFFICE OF MANAGEMENT AND BUDGET,
February 17, 1981.

Hon. WILLIAM V. ROTH, Jr.,
Chairman, Committee on Governmental Affairs, U.S. Senate, Washington, D.C.

DEAR BILL: While the Administration understands and sympathizes with the extent of the problem of inadequate and compressed executive salaries, it is inappropriate, with other planned budget initiatives, to endorse the full recommendations of the Quadrennial Commission. Those would call for increases of around 40%.

President Carter's 1981 budget proposals on Federal executive, legislative, and judicial pay called for an increase of 16.8% over the 1977 pay cap. That proposal would simply bring payable salaries for Federal executives in line with their legal salary rates as established under P.L. 94–82.

The status of the economy requires that we concentrate our resources on achieving substantial budget reductions. Federal executives, the Congress, and the Judiciary should forgo salary increases at this time. Thus, the President has determined that we should not now seek an increase in Federal Executive salaries.

The President has expressed a deep concern with the diminishing ability of the Federal Government to attract and retain high caliber executives; therefore, we should develop other ways to address this issue before the next Quadrennial Commission Report due in 1984. We will be glad to work with the Congress in this endeavor.

Sincerely,

DAVID A. STOCKMAN,
Director.

Mr. SASSER. Mr. President, I am also pleased that President Reagan has taken note of the Senate's action in the closing hours of the 96th Congress in backing my action to defer these pay raises. He has been wise to heed Mr. Stockman's counsel on this matter by asking us to defer these pay raises until we get the economy back in shape.

Mr. President, I hope that all our colleagues follow the lead of the Senate's action in the 96th Congress and support approval of this and other related resolutions which have been supported by our distinguished majority leader, Senator BAKER and our distinguished Democratic leader, Senator BYRD.

Thank you.

Mr. BAKER. Mr. President, if the Senator will yield to me again, I have spoken to the distinguished minority leader on this subject and I believe the request I am about to make is perhaps cleared on his side.

Mr. President, at this time I ask unanimous consent that at the time debate is concluded on these resolutions the votes occur thereon back to back, with the first vote to be 15 minutes in length, and each subsequent vote to be 10 minutes in length.

I ask unanimous consent that it be in order at this time to ask for the yeas and nays on the four resolutions with one show of seconds.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, there is no objection on this side of the aisle.

The PRESIDING OFFICER. The Chair will state to the distinguished majority leader that the yeas and nays are automatic.

Mr. BAKER. I thank the Chair.

Mr. President, I understand the yeas and nays are automatic under the provisions of the statute, and I withdraw that portion of my request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there debate?

Mr. ROBERT C. BYRD. I yield back any time on this side.

Mr. ROTH. I yield back the time on this side.

The PRESIDING OFFICER. All time is yielded back, and the question is on agreeing to Senate Resolution 89. The yeas and nays are automatic, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from Oklahoma (Mr. BOREN), the Senator from California (Mr. CRANSTON), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Louisiana (Mr. LONG), are necessarily absent.

I further announce that, if present and voting, the Senator from Oklahoma (Mr. BOREN) and the Senator from California (Mr. CRANSTON) would each vote "yea".

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Texas (Mr. TOWER) are necessarily absent.

I also announce that the Senator from Kansas (Mr. DOLE) is absent due to illness.

I further announce that, if present and voting, the Senator from Kansas (Mr. DOLE) and the Senator from Arizona (Mr. GOLDWATER) would each vote "yea".

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 93, nays 0, as follows:

[Rollcall Vote No. 29 Leg.]

NOT VOTING—7

Boren	Goldwater	Tower
Cranston	Kennedy	
Dole	Long	

So the resolution (S. Res. 89) was agreed to as follows:

S. Res. 89

Resolved, That, with respect to the recommendations of the President which were transmitted to the Congress with the President's budget for fiscal year 1982 pursuant to section 225(h) of the Federal Salary Act of 1967 (2 U.S.C. 358), the Senate disapproves the recommendations for increases in rates of pay for positions described in subparagraph (A) of section 225(f) of such Act (2 U.S.C. 356(A)), relating to Members of Congress.

Mr. ROTH. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RESOLUTIONS OF DISAPPROVAL OF PAY RECOMMENDATIONS WITH RESPECT TO LEGISLATIVE BRANCH, JUDICIAL BRANCH, AND CERTAIN POSITIONS UNDER THE EXECUTIVE SCHEDULE

Mr. STEVENS. Mr. President, we are literally faced with a crisis in the executive branch. The Quadrennial Commission, to whom the Congress delegated the responsibility to set pay for the top executive, legislative, and judicial personnel, recommended increases up to $20,000 for many executive personnel. Former President Carter revised these recommendations downward by 60 percent. Yet, today, we are voting on resolutions not approving the already reduced recommendations but disapproving recommendations which still fall far below what is fair and adequate compensation. I quote from the Commission's introductory summary:

The Commission believes that this nation is faced with a quiet crisis in terms of the

rapidly increasing problems of attracting and retaining men and women of outstanding ability and achievement to fill the top positions in our government.

The Commission is concerned about the massive exodus of top government officials who are resigning or retiring early from their positions, and there is growing evidence that low salaries are a major reason for highly talented people declining appointment to key positions in the Federal government. Therefore, based on its findings, which are summarized below, the Commission concludes unanimously that salary increases are urgently needed and long overdue for the Federal officials who come under its jurisdiction.

Thousands of dedicated civil servants have received one 5.5 percent pay adjustment in 4 years. Their purchasing power has declined drastically. The exodus of such workers from the Government has grown astronomically. Critical jobs in the executive branch cannot be filled. Numerous midlevel managers refuse, promotions, knowing that increased responsibility means no pay renumeration.

Mr. President, the same reasoning applies to the military. We are raising military spending for this year by the billions and yet we cannot pay the generals, the administrators, the managers $10,000 more? Five to nine levels of management authority in both the civil service and the military earn the same income, and I am forced to ask: How can we expect our new military awareness to translate into effective policies without proper compensation to the planners, strategists, and administrators? How can we turn the economic stagflation of this country around without paying the managers, the policymakers, the implementers a reasonable salary?

Mr. President, over the next few years, the Government will be making a concerted effort to turn the Nation around. The one thing all people agree upon is that this country's recent experience with high inflation, high unemployment, and high interest rates is unprecedented. To stymie these economic woes and other social ills will take creativity, ingenuity, and hard work.

Low pay will prevent and is preventing the recruitment of individuals who have the ability to find the answers.

Mr. President, only this morning, I held a hearing in the Defense Appropriations Subcommittee. There is a recommendation now. for the second year, to increase the pay of military personnel. We will find that the comb'ned pay raise that military personnel will receive in 2 years will be over 27 percent, yet the combined pay increases for civil servants will be less than 10 percent. And the pay increase for those people that I am speaking about today will be zero. These people have had no pay adjustment whatsoever. If the pay cap that is still in existence is not removed and if we do not act on this Quadrennial Commission report, those people will get no pay increase at all.

We find now that people from grade 15 to the top of the Civil Service ladder will be impacted: there will be no pay adjustments whatsoever.

On the military side, it will surprise the Members of the Senate how low in the military hierarchy this pay cap now touches. We are going to have literally the year of the colonels, because everyone who implements policy in a military department now in uniform will be paid the salary of a colonel.

Mr. President, I just do not know how I can make it more emphatic than to say that this is no way to run a government. Our Government is the biggest business in the world and we ought to run it with commonsense. Commonsense says we should pay enough to attract people who have absolutely the top capability in every field possible, and this is no way to do it.

Mr. President, I urge Congress to vote down the disapproval resolutions for the executive branch, the judicial branch, and the related legislative branch employees. I shall vote to sustain the decision not to raise our own pay.

That is another signal to send to the country. That is the signal that we, who are the board of directors for the Government, acknowledge that there is a terrible problem in terms of inflation and the control of expenditures. But we have no right to foist that decision onto those people who have made their career and dedicated their lives to the service of this country.

Mr. ROBERT C. BYRD. Mr. President, before the Senate completes action on these pay raise resolutions, I would like to recount for the record the Senate's recent history with respect to preventing pay raises for Members of Congress and other Federal officials.

On September 9, 1980, I introduced printed amendment No. 2302 to H.R. 7590, the Energy and Water Development Appropriation Act of 1981. This amendment was designed to impose a ceiling on pay of higher level Government employees. I also entered notice that I intended to seek suspension of paragraph 4 of rule XVI of the Standing Rules of the Senate to permit the offering of an amendment which was both legislative in nature and which was not germane to the subject matter of a general appropriation bill.

On September 10, 1980. bv a vote of 84 yeas to 5 nays, two-thirds of the Senate having voted in the affirmative, the Senate agreed to suspend paragraph 4 of rule XVI to allow the consideration of my amendment.

Subsequently, by a vote of 78 yeas to 13 nays, the Senate adopted the amendment I offered to impose a ceiling on the pay of high level Government employees in all three branches of the Government—including judges, Members of Congress, and high level civil servants in all three branches of Government.

On September 29, 1980. the Senate adopted the first fiscal year 1981 continuing resolution by a vote of 58 yeas to 27 nays. Included in the legislation was the very same pay cap which I had first proposed on September 10 and the Senate had adopted overwhelmingly at that time.

Now the legislative situation regarding the pay cap gets more complicated—but not confused. The Senate has consistently voted for imposing the pay cap and against removal of the cap.

On December 10, 1980, the Senate adopted by a vote of 69 yeas to 21 nays, an unprinted amendment offered by the able and distinguished junior Senator from Tennessee (Mr. SASSER) to House Joint Resolution 637 designed to continue in effect a salary pay cap limitation for executive, legislative, and judicial employees and officials through September 30, 1981. The substance of this amendment was identical to the legislation the Senate adopted on September 10 and 29.

On December 13, 1980, I offered a motion to House Joint Resolution 637 designed to restore the salary pay cap limitation for executive, legislative, and judicial employees and officials. This amendment carried by a vote of 62 yeas to 8 nays. This marked the fourth time in a little over 3 months that the Senate had voted overwhelmingly to adopt the pay cap limitation that I had first offered on September 10, 1980.

Finally, on Monday, December 15, 1980, the Senate passed by voice vote House Joint Resolution 644, which included the pay cap limitation.

Obviously, Mr. President, this is not a new issue. The Senate has already voted on this matter five times—four rollcall votes and one voice vote—in the past 6 months. Nevertheless, I think it is important that the Senate take this opportunity to further strengthen its record against a pay raise. It will have to do it once again in June—when the continuing resolution we adopted last session expires. The American people must be convinced that we intend to bring Government spending under control if at all possible.

Mr. ROTH. Mr. President, I yield 5 minutes to the distinguished Senator from Rhode Island.

PAY PROPOSAL FOR FEDERAL EXECUTIVES

Mr. CHAFEE. Mr. President, the present cap on senior level pay causes two severe problems: First, it makes attracting top-notch career people to Government service very difficult. A look at what has happened to the senior level salaries since 1977—think of it; that was the last Quadrennial Commission report—explains what has gone wrong. Since 1977, Federal-level pay has increased by 5.5 percent. In other words, the top people have received a 5.5 percent increase. During this same period, comparable private-sector pay has increased by 25 percent, general schedule civil service pay has gone up 32 percent, and the Consumer Price Index has gone up 45 percent.

Let us go back to 1969, which was the date of the first Quadrennial Commission report. During this 11-year period, the salaries of level 2 executives have risen by 43 percent. They have gone up from the cap, which was then $42,500. Now the cap is $60,662: 11 years, 43 percent increase.

During that same period, the Consumer Price Index went up by 130 percent. The average salary of the civil servants—that is, the general schedule ones—went up by 118 percent.

The salaries of private sector executives went up by 116 percent. So, measured in 1969 dollars, the purchasing pow-

er of level II executives has gone down to $25,800.

This wage disparity is a disincentive for people already part of civil service either to take a promotion or to stay on as they approach retirement.

Seven grades of high level senior executives, comprising 33,000 employees, are now paid the same amount. They can be the top person or seven grades below, and they all receive the same pay. Each year the pay cap is in effect, more grade levels bump up against this ceiling.

Should Congress not lift the cap this year, another 11,000 employees will reach the pay ceiling. If we wait until the next meeting of the Quadrennial Commission in 1984, the projections are that 140,000 civil service workers, 7 percent of our entire work force, will be bumped up against the same ceiling.

The second point: Not only does this distort the normal civil service pay scale, but also, this freeze provides an incentive for Federal executives to either retire early or to take a more lucrative job in the private sector. Last year, 75 percent of the Federal executives who had reached the pay ceiling and were eligible to retire did so. This results in an incalculable loss of experience and knowledgeable talent to the Federal Government. A few examples will help illustrate my point.

For the past three decades, Mr. Russell Shewmaker has been a major figure in U.S. trade law. Over a period of 7 years, Mr. Shewmaker created the tariff schedules of the United States, drafted the enabling legislation, and helped get this legislation passed. As a member of the senior executive service, Mr. Shewmaker's salary was subject to the pay freeze. Over the past several years, Mr. Shewmaker watched as the cost of living increased by 40 percent, but his salary only went up 5 percent. That is enough to disturb anyone.

In addition, many of the people who were working under him were able to have their salaries keep up with at least 75 percent of the cost-of-living increases. It is not hard to blame Mr. Shewmaker for retiring under these circumstances, and will be hard for the Federal Government to get someone of his caliber to replace him.

Another case involves an individual with 7 years' experience as technical director of the Naval Coastal Systems Center in Florida. This individual retired in August of 1980, but has continued as a reemployed annuitant until a new director can be found. The reason for his retirement: The realization that he could make up the difference between his retirement and his salary under the pay freeze by working just one-quarter of the time he had previously.

A third case involves an individual with a long career as a researcher and administrator with the Forest Service. As a GS–16 this individual has had his salary frozen for some time. While compensation was not at the top of his list of priorities for employment, this person ultimately took a position with a State university which provides greater income than his civil service position.

Finally, a director of heavy duty research with the National Highway Traffic Safety Administration resigned in August of 1980 to take a position with a trucking firm similar to United Parcel. His salary has more than doubled, and his position with NHTSA was still open as of February of this year. They could not fill it under these salary limitations.

Mr. President, one of the stumbling blocks to removing this pay ceiling is the linkage that has grown up between the the salaries of Members of Congress and that of executive level II salaries. I do not know why we have this linkage. Somehow, the rule is that you cannot pay these people more than you pay a Member of the Senate or a Member of the House. I think that is ridiculous. After all, Members of the Senate come here for a variety of reasons.

This linkage has no legal basis or deeply rooted foundation. There are few parallels between the career patterns, career expectations, and responsibilities of Members of Congress and level II executives. There is no compelling reason to continue to link these salaries.

Furthermore, Members of Congress are not limited by the pay ceiling. We are paid $60,000, but we can go out and earn honoraria by making speeches.

In 1979, 87 Senators chose to supplement their income in this way. The amounts varied. The low was $100. The high, almost $31,000.

Let us go down the list, and I will not give the names; $31,000 was the leadoff; next, $29,000; next, $27,000; next, $26,500.

Anybody who thinks Senators are not making some money on the outside should look at what the financial disclosure statements reveal.

One-fourth of all Senators earned over $20,000 in honoraria. I am not opposed to this. But let us not say that we are treating the executive II people as we treat Senators. We are not. The average for all Senators earning honoraria was in excess of $13,000.

That is fine. I think it is good for Senators to get around the country, to speak, to inform people of what is happening here; and if they receive honoraria for it, that is fine. But I believe it is unfair to say that we are staying at $60,000 and we will suffer and we will let the executive II level people suffer at the same level.

Clearly, Members of Congress have an opportunity to supplement their income in ways not available to the normal civil servant. This ability to earn extra income should help put to rest any concerns about the necessity of maintaining equivalency between Members' salaries and those of executive level II.

Mr. President, the ability to attract good people and to retain the qualified professionals already in Government are two key ingredients to making Government more efficient. By maintaining this arbitrary pay cap, we are making this job all the more difficult.

I am strongly for delinkage. I recognize that the President of the United States and the leadership of this body, in urging that we not go forward with the Quadrennial Commission recommendations, are operating in an era of frugality which I respect, and I am not going to make a motion to do otherwise. But I urge those who are in positions of authority to proceed with this delinkage.

I note that the distinguished majority leader is in the Chamber, and I should like to pose a question or two to him on this subject.

What can we do to achieve this delinkage? How do we do it and when might we do it?

I know that the majority leader is tremendously concerned with the losses of our top civil servants, our professionals, whom we need to keep this wonderful organization called the U.S. Government functioning. Can the majority leader give me some illumination on this problem?

Mr. BAKER. Will the Senator yield to me?

Mr. CHAFEE. I yield.

Mr. BAKER. I am happy to respond.

First of all, I commend the Senator from Rhode Island for his consistent concern in this field. It is worthy of his distinguished service that he rises today to express his interest in these problems.

In response to the Senator's question, I believe Congress must face ahead on the question of linkage. I favor delinking congressional salaries from executive department salaries. I believe there is no other realistic way to approach that problem, except to face up to the fact that there are other particular and sensitive political problems that we must deal with in respect to our own salary that should not color and change our attitude toward the salaries and compensation of members of the other departments of Government.

So, at some point, I hope that through the regular processes of committee consideration and floor action, Congress simply would provide, in the future, for salary levels for other agencies and departments of Government aside and separate from the salary levels of Members of Congress.

Although the Senator did not mention this, I think he will acknowledge that he and I have discussed this matter on previous occasions. I say, parenthetically, that I think we have to find a way of going on this question of congressional salaries in a reasonable and rational way.

I have about concluded, and I do not mean this to be unduly cynical, but I have about concluded that Congress is institutionally incapable of handling the issue of congressional salaries. I do not know of any way to handle it other than the way we have tried to do it unless we adopt a constitutional amendment. I might very well favor a constitutional amendment. I think it is time that we thought of such things as constitutional amendments to eliminate this apparent conflict of interest with Congress setting its own salary.

The most intriguing proposal I have heard lately is a proposal that would indeed require a constitutional amendment, and that is to provide by such an amendment for the Supreme Court of the United States to regularly and periodically conduct ex parte hearings and proceedings and to adjudicate the

salary level of Members of Congress, thus vesting that authority in another department of Government. I am not prepared to say now that we should do that or that that is the only possible solution.

What I do say is that I have reluctantly concluded that it is at least very difficult, perhaps impossible for Congress in this day and age to deal with the question of its own salary.

In view of that I think the answer to the Senator's question is that Congress must simply face up to these facts and must go forward with a delinkage between congressional salaries and those of executive department agencies.

Mr. CHAFEE. Mr. President, I thank the distinguished majority leader for his help on this matter, and I wish to pose him another question if I might.

It seems to me that the way we have to proceed then is to introduce legislation. I am dealing now with the delinkage problem. It would go to the Governmental Affairs Committee, I presume, and then proceed with the passage of such legislation if it could be done which would formally delink and then the executive grade of civil servants then would proceed up with the normal increases that are granted by the President to the whole civil service force. Is that correct?

Mr. BAKER. Mr. President, that is correct. It could be done under the present law. But we run into the practical roadblock that if congressional salaries are not changed then Congress is reluctant to approve a recommendation of the Quadrennial Commission or to approve the regular escalation of salaries in other agencies and departments. So I think it is going to require an affirmative statement of statute law that there should not be linkage between the two departments.

Mr. CHAFEE. I thank the distinguished majority leader for that illumination on this difficult problem. I hope that we all could get on with it because it is highly unfair and it is not a question of just unfairness. It is a question of loss to the U.S. Government of valuable people who under our odd retirement system, which in itself has lots of difficulties to it, can retire at a relatively early age and, as a matter of fact, if they stay on they are penalized because if they retire than they move upward with the index in the double indexing that we presently have and if they they do not retire they are locked in at this ceiling and when they do retire they are way behind their contemporaries who chose to retire earlier and have moved up with the indexing. That is a double loser and it is a tremendous incentive for people to retire, and thus we lose valuable servants of the Nation.

Mr. BAKER. I say to the Senator, if the Senator will yield to me, somewhat in jest in the words of the late great Congressman Carl Reece, speaking of Members of Congress of his acquaintance, "Few die and none resign."

Mr. CHAFEE. I am not talking about them. I have no worry and I have no concerns about Congressmen and Senators taking care of their pay. But my concern is of the civil servants.

Mr. WARNER. Mr. President, will the Senator yield?

Mr. CHAFEE. I certainly yield.

Mr. WARNER. Mr. President, I worked with the distinguished Senator from Rhode Island as we jointly managed the Department of the Navy, and he speaks from a basis of knowledge gained through many years of experience, of personally pleading with these individuals to remain, particularly in the scientific areas of research and development, and the like, where both Senator CHAFEE and I as Government managers witnessed the loss of top talented people because of the inflexibility in these pay situations.

For that reason I commend the distinguished Senator from Rhode Island, and I know that he speaks not purely from philosophy but from experience as a manager on this subject.

Mr. CHAFEE. I thank my colleague who I worked so closely with for many years in the Navy Department where we wrestled with these problems, and the problem now is far worse than it was then when we have the inflation in figures such as they are today.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. CHAFEE. I yield.

Mr. BAKER. Mr President, I also wish to thank the Senator from Rhode Island. He has such a wealth of experience and background as Governor of his State, as Secretary of the Navy, and now as a distinguished Senator from the State of Rhode Island, that he speaks with special authority on this and the authority of experience that extends now over several years.

I urge the Senator from Rhode Island to continue his interest in this, and I assure him that I will work with him in seeing that we approach this business of linkage and indeed the entire question of salary levels and adjustments for all of the agencies and departments of Government, including Congress. But his is clearly a leadership role in that field, and I wish to assure him I will look to him for advice and counsel as we proceed.

Mr. CHAFEE. I thank our leader for those comments and I will pursue it and I also thank my distinguished colleague and long-time friend from Virginia, Senator WARNER, for his comments because he knows this difficulty also and I will rely on him as we proceed.

But clearly something has to be done and I hope we can make some progress.

Mr. MATHIAS. Mr. President, will the Senator yield?

Mr. CHAFEE. I am glad to yield.

Mr. MATHIAS. Mr. President, the Senator from Rhode Island has been praised as being the voice of experience here this afternoon. I point out that I think he is also the voice of courage, because it takes a certain amount of courage in this climate to talk about paying an increased salary or even to continue to pay the salary of public servants. I think that is likely to be a lonely position. I am prepared to share his loneliness because what he is talking about really is the long-range economy. There is no economy in shortchanging civil servants, particularly those who by years of training and experience have some expertise, and then have to go out and recruit people who are less qualified, less experienced, and less trained. The long-range interest of the taxpayer of the United States is to have efficient, effective civil servants and to pay them an adequate amount to retain their services.

That is not peculiar to public service. That is true with any private enterprise in the country.

I think that we should not allow the strong emotions that exist today with respect to trimming the public expenditures to work either an injustice to individuals who happen to work for the Government, nor to work an injustice to the taxpayers because we shortchanged them by discouraging good people from staying in Government or from going into Government.

Mr. CHAFEE. I thank the Senator. I thank the Chair. I thank the distinguished chairman of the committee for permitting me this time.

I yield the floor.

Mr. ROTH. Mr. President, I also join in thanking the distinguished Senator from Rhode Island for pointing out, I think, not only a question of compensation but the general environment in which the bureaucracy works.

I am deeply concerned when I talk to some of my colleagues that too often the bureaucrat is attacked. I think it is time that we publicly recognize that we have some of the best managers and professional people in the executive branch of Government and that we should duly recognize that here in the Chamber.

Mr. WARNER. Mr. President, I would like to associate myself with the remarks made by the distinguished Senator from Rhode Island. I, too, will support the resolutions, and with a pledge to those particularly in the executive branch that I will work with the distinguished Senator from Rhode Island on the issue.

Mr. DURENBERGER. Mr. President, everytime we deal with an issue like the salaries of Members of Congress, those in the judiciary and the top rung of Federal executives, I am reminded of a letter I received from a constituent in Redwood Falls, Minn., a small city in the western part of my State.

This constituent—an ordinary citizen who gleans his understanding of Congress, the bureaucracy, and Government in general from the media and an occasional visit by a Senator or Congressman—wrote the following:

> Congress is torn apart by catering to every special interest group that can afford a lobbyist or a barrage of letters. Concern for survival and reelection becomes more important in many cases than what must be done to insure the continued philosophical vitality and economic growth that our country really needs.

He continued by giving me the best advice I have heard:

> You must realize the great strength of the American people, their ability to survive and adjust, to make sacrifices for a national cause and good if they are motivated and

challenged . . . the American people are starving for realism in their politicians, they know better than many politicians the problems and uncertainties of now and the future . . . there is a common cause that unites our people, wherever you go, people are frustrated and pessimistic about the future, more from a lack of confidence in government than from a lack of confidence in America's ability to solve their problems.

Mr. President, I received this letter more than 2 years ago, shortly after my election to the Senate, but the sentiments expressed by this Redwood Falls constituent are as valid today as they were in early 1979.

They succinctly state the mandate of the elections of 1976, 1978, and 1980. And that mandate is the basis of my vote against increasing the salaries of our country's top legislative, executive and judicial servants.

A good case can be made for Government salary adjustments, particularly in the executive and judicial branches. Government is only as effective as the human beings who administer its programs and services. If Government wants the best people, it has to pay competitive salaries.

But for the present, there is a more pressing factor that compels me to vote against these increases, Government is now in the process of asking the American people to make substantial sacrifices for the sake of economic stability. We are asking the public to forsake more than $45 billion in budgetary benefits. If we expect the public to support this effort we have to lead by example. It would be inconsistent, and almost hypocritical, for any branch of the Federal Government to grant itself greater benefits at a time when we are asking the public to live on less.

For years the Federal Government has been asking the American people to restrain their budgets. But at the same time, Government has demonstrated that it lacks the will to restrain its own spending habits. The result is predictable. People want to withhold our pay until we do the job they elected us to do.

America's public sees a Congress that is plagued by scandals—real or imagined—and subservient to a few special and powerful interests. They see a bureaucracy that is self-perpetuating and insensitive to the real needs of the public. They see a judiciary that offers more protection for the criminal than for the victim.

Those who serve in Government see the distortions in these perceptions. We know the 14- 15- and 16-hour days, the sacrifices our families must make, the personal gains we have traded for the chance to serve. We know the many fine men and women who serve in the departments and the agencies, trying to do their best under often trying circumstances. We know the members of the judiciary who give up lucrative careers in private practice in order to protect and preserve our unique system of justice.

But the truth is that these distorted perceptions result from Government's own inability to practice what it preaches. In the coming weeks we will have an opportunity to change those perceptions. We will again be asking Americans to change their way of living. We will be asking for sacrifices that are necessary because society can no longer tolerate double-digit inflation and interest rates.

I have confidence that the American people will respond. They will again confirm the conviction I share with my letter-writing friend: The strength of America is in its people.

The real question is whether the politicians will respond, whether Government will provide the kind of leadership that a public willing to sacrifice deserves. It is my hope that the step we take today will be one of many that demonstrates to the American people that the raise we turn down was deserved, not based on statistics and cost-of-living data, but based on our leadership.

DISAPPROVAL OF PAY RECOMMENDATIONS OF THE PRESIDENT WITH RESPECT TO CERTAIN OFFICES AND POSITIONS IN THE LEGISLATIVE BRANCH

The PRESIDING OFFICER. The clerk will state the resolution relating to the legislative branch.

The legislative clerk read as follows:

A resolution (S. Res. 90) disapproving the pay recommendations of the President with respect to certain offices and positions in the legislative branch.

The PRESIDING OFFICER. The question is on agreeing to the resolution. The yeas and nays are automatic, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), and the Senator from Texas (Mr. TOWER) are necessarily absent.

I also announce that the Senator from Kansas (Mr. DOLE) is absent due to illness.

I further announce that, if present and voting, the Senator from Kansas (Mr. DOLE), and the Senator from Arizona (Mr. GOLDWATER) would each vote "yea."

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Louisiana (Mr. LONG), are necessarily absent.

I further announce that, if present and voting, the Senator from California (Mr. CRANSTON) would vote "nay."

The PRESIDING OFFICER. Are there any other Senators wishing to vote?

The results were announced—yeas 91, nays 3, as follows:

[Rollcall Vote No. 30 Leg.]

YEAS—91

Abdnor	Chiles	Grassley
Andrews	Cochran	Hart
Armstrong	Cohen	Hatch
Baker	D'Amato	Hatfield
Baucus	Danforth	Hawkins
Bentsen	DeConcini	Hayakawa
Biden	Denton	Heflin
Boren	Dixon	Heinz
Boschwitz	Dodd	Helms
Bradley	Domenici	Hollings
Bumpers	Durenberger	Huddleston
Burdick	Eagleton	Humphrey
Byrd, Harry F., Jr.	East	Inouye
	Exon	Jackson
Byrd, Robert C.	Ford	Jepsen
Cannon	Garn	Johnston

Metzenbaum	Riegle	Warner
Mitchell	Roth	Weicker
Moynihan	Rudman	Williams
Murkowski	Sarbanes	Zorinsky
Nickles	Sasser	

NAYS—3

Gorton	Melcher	Stevens

NOT VOTING—6

Cranston	Goldwater	Long
Dole	Kennedy	Tower

So the resolution (S. Res. 90) was agreed to, as follows:

S. RES. 90

Resolved, That, with respect to the recommendations of the President which were transmitted to the Congress with the President's budget for fiscal year 1982 pursuant to section 225(h) of the Federal Salary Act of 1967 (2 U.S.C. 358), the Senate disapproves the recommendations for increases in rates of pay for positions described in subparagraph (B) of section 225(f) of such Act (2 U.S.C. 356(B)), relating to certain positions in the legislative branch.

Mr. ROTH. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DISAPPROVAL OF RECOMMENDATIONS OF THE PRESIDENT WITH RESPECT TO CERTAIN PERSONNEL IN THE JUDICIAL BRANCH

The PRESIDING OFFICER. The clerk will state the resolution by title relating to certain personnel in the judicial branch.

The assistant legislative clerk read as follows:

A resolution (S. Res. 91) disapproving the pay recommendations of the President with respect to certain personnel in the judicial branch.

The PRESIDING OFFICER. The question is on agreeing to the resolution. The yeas and nays are automatic. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

I also announce that the Senator from Kansas (Mr. DOLE) is absent due to illness.

I further announce that, if present and voting, the Senator from Kansas (Mr. DOLE) and the Senator from Arizona (Mr. GOLDWATER) would each vote "yea."

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Louisiana (Mr. LONG) are necessarily absent.

I further announce that, if present and voting, the Senator from California (Mr. CRANSTON) would vote "nay."

The PRESIDING OFFICER (Mr. HUMPHREY). Are there any other Senators in the Chamber who desire to vote?

The results was announced—yeas 87, nays 8—as follows:

[Rollcall Vote No. 31 Leg.]

YEAS—87

Abdnor	Ford	Moynihan
Andrews	Garn	Murkowski
Armstrong	Glenn	Nickles
Baker	Grassley	Nunn
Baucus	Hart	Packwood

Mathias	Stevens	

NOT VOTING—5

Cranston	Goldwater	Long
Dole	Kennedy	

So the resolution (S. Res. 91) was agreed to, as follows:

S. RES. 91

Resolved, That, with respect to the recommendations of the President which were transmitted to the Congress with the President's budget for fiscal year 1982 pursuant to section 225(h) of the Federal Salary Act of 1967 (2 U.S.C. 358), the Senate disapproves the recommendations for increases in rates of pay for positions described in subparagraph (C) of section 225(f) of such Act (2 U.S.C. 356(C)), relating to certain positions in the judicial branch.

Mr. ROTH. I move to reconsider the vote by which the resolution was agreed to.

Mr. QUAYLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DISAPPROVAL OF PAY RECOMMENDATIONS OF THE PRESIDENT WITH RESPECT TO OFFICES AND POSITIONS UNDER THE EXECUTIVE SCHEDULE

The PRESIDING OFFICER. The clerk will state the next resolution.

The legislative clerk read as follows:

A resolution (S. Res. 92) disapproving the pay recommendations of the President with respect to offices and positions under the executive schedule.

The PRESIDING OFFICER. The question is on agreeing to the resolution. The yeas and nays are automatic. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from South Dakota (Mr. ABDNOR), the Senator from Arizona (Mr. GOLDWATER) and the Senator from Idaho (Mr. SYMMS) are necessarily absent.

I also announce that the Senator from Kansas (Mr. DOLE) is absent due to illness.

I further announce that, if present and voting, the Senator from Kansas (Mr. DOLE) and the Senator from Arizona (Mr. GOLDWATER) would each vote "yea."

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Massachusetts (Mr. KENNEDY) and the Senator from Louisiana (Mr. LONG) are necessarily absent.

I further announce that, if present and voting, the Senator from California (Mr. CRANSTON) would vote "nay."

The PRESIDING OFFICER. Are there other Senators in the Chamber wishing to vote?

The result was announced—yeas 86, nays 7, as follows:

[Rollcall Vote No. 32 Leg.]

YEAS—86

Andrews	Exon	Mitchell

So the resolution (S. Res. 92) was agreed to, as follows:

S. RES. 92

Resolved, That, with respect to the recommendations of the President which were transmitted to the Congress with the President's budget for fiscal year 1982 pursuant to section 225(h) of the Federal Salary Act of 1967 (2 U.S.C. 358), the Senate disapproves the recommendations for increases in rates of pay for positions described in subparagraph (D) of section 225(f) of such Act (2 U.S.C. 356(D)), relating to certain positions under the Executive Schedule.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the previous resolution (S. Res. 92) was agreed to.

Mr. DODD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ANNOUNCEMENT OF POSITION ON VOTE RELATING TO CONGRESSIONAL PAY INCREASES

Mr. BOREN. Mr. President, this is not the time for pay increases for top Federal officials, including Members of Congress. All of us must join together to keep Federal spending under control. We in Congress must set the example. To raise our own salaries while asking others to sacrifice would be to apply a double standard which the public would rightfully resent.

I was delayed in returning to the session and missed the vote on the first resolution disapproving congressional pay increases. Had I been present I would have voted to disapprove that raise just as I voted to disapprove the others.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to extend beyond 25 minutes in length during which Senators may speak therein not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE GENOCIDE CONVENTION AND NATIONAL SOVEREIGNTY

Mr. PROXMIRE. Mr. President, in the postwar period, clear precedents have been established in the field of international law to alleviate the fears of those who think that the Genocide Convention compromises the right of the United States to decide domestic questions and to decide for itself whether or not to submit to the jurisdiction of international tribunals.

First, the right of nation-states to adjudicate matters of a domestic nature is provided for in the Charter of the United Nations, adopted in San Francisco in 1945. Article 2, section 7 states that—

Nothing contained in the present charter shall authorize the United Nations to intervene in matters which are essentially within the domestic jurisdiction of a state.

The Connally amendment, adopted by the Senate on August 2, 1946, assures that the United States retains the right to decide unilaterally whether or not to submit to the authority of the World Court. This self-judging reservation, sponsored by the chairman of the Foreign Relations Committee, Connally (D–Texas), amended a resolution calling for compulsory jurisdiction for the World Court in favor of a unilateral decision by the United States regarding whether a contested case involved a domestic question.

Finally, the Genocide Convention itself states in article VI—

Persons charged with genocide shall be tried by a competent tribunal of the State in the territory of which the act was committed, or by such international penal tribunal as may have jurisdiction with respect to those Contracting Parties which shall have accepted its jurisdiction.

In this way, the convention clearly states that any international tribunal established in the future would have to be accepted by all parties in order to retain jurisdiction.

In short, the Genocide Convention does protect states' rights as well as the national security interest of the United States and should be ratified by this body as soon as possible.

APPOINTMENTS BY THE VICE PRESIDENT

The PRESIDING OFFICER (Mr. HUMPHREY). The Chair, on behalf of the Vice President and upon the recommendation of the minority leader, pursuant to 22 U.S.C. 276, as amended by Public Law 95–45, appoints the following Senators to attend the Interparliamentary Union Conference, to be held in Manila, Philippines, April 20–25, 1981: The Senator from North Dakota (Mr. BURDICK), vice chairman; the Senator from New Jersey (Mr. WILLIAMS); and the Senator from Nevada (Mr. CANNON).

DESIGNATION OF THE "HUGH SCOTT ROOM"

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now turn to Calendar Order No. 9, Senate Resolution 80, a resolution designating S–120 of the Capitol as the "Hugh Scott Room."

The PRESIDING OFFICER. The clerk will state the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 80) designating room S–120 in the United States Capitol as the "Hugh Scott Room".

There being no objection, the Senate proceeded to consider the resolution.

UP AMENDMENT NO. 11

(Purpose: To name room S–113 in the U.S. Capitol the "Styles Bridges Room")

Mr. BAKER. Mr. President, I send to the desk an amendment to the resolution and ask that it be stated by the clerk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER for himself, Mr. HUMPHREY, and Mr. RUDMAN), proposes an unprinted amendment numbered 11:

At the end of the resolution strike the period and add the following: and that room S–113 (Republican Senators Dining Room), in the United States Capitol be named the "Styles Bridges Room".

(By request of Mr. BAKER, the following statement was ordered to be printed in the RECORD:)

● Mr. HUMPHREY. Mr. President, I congratulate the distinguished majority leader, the Senator from Tennessee, and the distinguished chairman of the Committee on Rules and Administration, the Senator from Maryland, for recognizing the careers of two giants who preceded us in this body: Senators Styles Bridges and Hugh Scott. I am honored to be an original cosponsor of this amendment, which designates the Republican Senate Dining Room (S–113) the Styles Bridges Room, and (S–120) the Hugh Scott Room.

As the senior Senator from New Hampshire, it is a particular pleasure for me to speak in favor of this measure recognizing the late Styles Bridges, a Senator from New Hampshire, who served his State and Nation well throughout a long career in public service. As Governor, 1934–36, and Senator 1937–61, Styles Bridges was a popular and effective leader. His colleagues selected him minority leader, 1952–53, and President pro tempore, 1935–55, of the Senate.

Mr. President, it is rare that a single man becomes the father of one of the Senate's traditions. It was Styles Bridges who located the desk of a great American in the basement of the Capitol, had it dusted off, then led the effort to return it to its proper place in the Senate Chamber. Another distinguished son of New Hampshire, former Senator Norris Cotton, sponsored the resolution which made formal the practice of honoring the senior Senator from New Hampshire with the desk of the Granite State's great orator and statesman, Daniel Webster. I now have the privilege of occupying his desk.

It is equally fitting that we honor Hugh Scott, a distinguished public servant, and cherished Member of the body. First elected to the U.S. Senate, later serving three terms in the Senate, the gentleman from Pennsylvania led his party as minority whip and minority leader.

Given the lengthy and estimable careers of these men, it is my sincere hope that the Senate will publicly express our Nation's gratitude by unanimously agreeing to this amendment. ●

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee.

The amendment (UP No. 11) was agreed to.

UP AMENDMENT NO. 12

(Purpose: Designating room S–210 and S–211 in the U.S. Capitol as the "John Fitzgerald Kennedy Room" and the "Lyndon Baines Johnson Room"' respectively)

Mr. ROBERT C. BYRD. Mr. President, room S–210 in the U.S. Capitol is known as the John Fitzgerald Kennedy Room. There is a plaque to that end hanging in that room, but the room was never formally designated the J. F. K. Room by the Senate itself.

I have asked the Rules Committee to research this to be sure that I was correct and the Rules Committee informs me that that is correct.

I believe that only the Senate should designate rooms in the Capitol by names. Accordingly, therefore, I am going to offer an amendment that will name the room S–210 the John Fitzgerald Kennedy Room.

In that regard, Mr. President, room S–211 has long been known as the Lyndon Baines Johnson Room. His picture hangs therein. There is a plaque, I believe, so designating the room. But, here again, the room was not designated the Lyndon Baines Johnson Room by the Senate. Again, I think the Senate should make that determination.

I, therefore, send an amendment to the desk which will formally name S–210 in the U.S. Capitol as the John Fitzgerald Kennedy Room and formally designate Room S–211 in the U.S. Capitol as the Lyndon Baines Johnson Room.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD) proposes an unprinted amendment numbered 12:

In the appropriate place include the following: that room S–210 in the United States Capitol be designated as the "John Fitzgerald Kennedy Room" and that room S–211 in the United States Capitol be designated as the "Lyndon Baines Johnson Room."

Mr. BAKER. Mr. President, I move that the amendment proposed by the distinguished minority leader be amended by inserting therein the language in addition thereto:

S–138, the Arthur Vandenberg Room.

May I say, Mr. President, in connection therewith, the Vandenberg Room, S–138, falls in exactly the same category as that described by the distinguished minority leader. May I also say that I entirely agree with him that only the Senate should name rooms in the Capitol. I fully support his amendment and I submit the amendment as just stated.

Mr. ROBERT C. BYRD. Mr. President, I wish to thank the distinguished majority leader for his statement.

Mr. CHAFEE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. CHAFEE. Mr. President, I am not sure what we are doing here. Are we naming all these rooms?

Mr. BAKER. Mr. President, will the Senator yield to me so that I can try to reply?

Mr. CHAFEE. Yes.

Mr. BAKER. Mr. President, this is a matter that has come up a number of times. The situation is this: The rooms have been named. The only problem is that they have not been named in a way that the minority leader thinks is appropriate and desirable for the Senate and constitutes a bad precedent, and so do I.

In the past, what has happened is that the rooms have been named arbitrarily by other majority leaders. I do not think any majority leader should name any room, or any minority leader should name any room.

I do feel, however, that we should honor the designations that have already been made and the recognition that has been given to these former colleagues in so naming them.

But what we are doing, except in the case of the Styles Bridges Room and the Hugh Scott Room is to validate what is an accomplished fact. The titles are there. The pictures are there, in some instances, and plaques in others. This is to validate and adopt a practice that has already been undertaken.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished majority leader yield?

Mr. BAKER. Mr. President, I believe the Senator from Rhode Island has the floor.

Mr. CHAFEE. Mr. President, I will certainly yield, but I would like to have the opportunity to question the distinguished minority leader and the majority leader when they are completed. But I will certainly yield.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator.

I should point out that the plaques that are presently in the J. F. K. Room and the L. B. J. Room were paid for and the moneys for those plaques were taken

out of the contingency fund of the Senate.

I did not name either of the rooms, and I am not complaining or criticizing anyone else for having named the rooms.

I join with the distinguished majority leader that no majority leader should have the authority to name any room in the Capitol. I think this is the property of all of the citizens and I think it should be the Senate itself which should have the authority to name a room after any Senator, living or deceased.

The two rooms that I have mentioned have long been known as the J. F. K. Room and the L. B. J. Room. If this resolution is not passed, they will continue to be called the L. B. J. and the J. F. K. Room.

I thought that we should do the matter in the proper way. Both plaques were paid for in 1964 and nobody has ever raised any questions about it.

I am sure that the majority leader, or majority leaders, whichever the case may have been, who named those rooms certainly did not intend to arrogate any authority to himself that was not proper. I think he must have named them because he felt that it was appropriate.

I happen to believe that the Senate ought to do the naming of the rooms. I think that, inasmuch as those names have already been named as they are—I do not know of any Senator who would want to take away those designations—it ought to be done in a formal and correct way.

I join with the majority leader in stating that we think this is the way it should be done.

UP AMENDMENT NO. 13

Mr. BAKER. Mr. President, I wonder if the Senator would permit me one more request. I have stated the substance of the amendment that I offer to the amendment submitted by the minority leader. I wonder if the Senator from Rhode Island would permit the clerk to state the amendment that I now send to the desk.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER) proposes an unprinted amendment numbered 13 to the Robert C. Byrd unprinted amendment numbered 12:

At the end of the amendment add the following: and that room S-138 in the United States Capitol be designated as the "Arthur H. Vandenberg Room."

Mr. BAKER. Mr. President, I thank the Chair.

Mr. CHAFEE. Mr. President, I feel a little queasy and nervous about this procedure. There are no two gentlemen that I have more respect for, as they both know, than my present leader and the distinguished Senator from West Virginia, who was our majority leader in this Chamber for a good number of years.

But what we are doing here is putting into concrete some names that perhaps were not on correctly in the first place, and also, if I am correct, we are adding another.

Is the Styles Bridges Room to be added in there?

Mr. BAKER. Yes.

Mr. CHAFFE. Mr. President, when you say it should not be done by a majority leader, it does not seem to me it is getting very wide consideration here. It is being done in this case by the majority and the minority leader, which is a powerful team and one that should be heeded.

But this Capitol has been around here for 181 years and we are naming rooms at a rapid rate for very recent Senators.

It does seem to me that we are going to run out of room and there are going to be some good Senators who come along in the future. I do not know where the Byrd room is going to be and I do not know where the Baker room is going to be, because they will all be gone.

When we suggest naming the back part of a room such a name, I think that gets confusing. That is like we name squares at home. We name squares and then we run out of squares to name after veterans and so we combine them and we have the several veterans' squares.

But this Capitol has been here 180 years and the names I have heard today are all Senators who have served in the last 30 years.

There should be a better system instead of—I do not want to use the word—well, I better not use it. There has to be a better system of proceeding than what seems to be some kind of a scattershot method that somebody has some authority and so a name goes on a room.

President Kennedy had a very distinguished career, there is no question. But it seems to me he has been pretty well memorialized in this city. Why one more room? Can I get any help with these problems?

Mr. BAKER. Mr. President, will the Senator yield to me for a moment?

Mr. CHAFEE. I yield.

Mr. BAKER. Mr. President, you know it is in the nature of the leadership that we act as the agents of our respective Members. I cannot recall a time when the Senator from West Virginia was majority leader when I ever thought he was acting on his own and other than in his role as the agent for. at that time, the Democratic majority in the Senate.

So it is with me. I take very seriously my obligation to act on behalf of Republican Senators.

In this particular case, the resolution in respect to the naming of the additional rooms, I believe I am stating it correctly, was introduced some years ago by another Senator, not this Senator, and it has been under consideration by the Rules Committee. It has been the subject of extensive conversation in the records and testimony in the Rules Committee for a long period of time. It certainly is not some new idea or some recently contrived proposal.

It has gone through the clearance process on both sides. It has been on the calendar, not only this session but last session and, if my memory serves me, the session before that. There have been extensive and sometimes difficult negotiations on how we might go about this business of allocating a name to room space in the U.S. Capitol.

I can assure my friend from Rhode Island that this is a matter that has received very careful attention in committee. It has received very careful attention from the leadership. The leadership on this side, and I am sure on the other side as well, has acted as the agent of every Member of the Senate in going through the standard and routine clearance process on our calendar.

So many times we are called upon to take up a matter for immediate consideration because it is necessary to deal quickly with certain matters. That is inevitable. I understand the concern of the Senator from Rhode Island in that respect. But this is not one of them. On the one hand, we are dealing with naming of rooms which has been the subject of controversy for many years and it is now about to be resolved, I trust. In the other case, we are about to rectify what I believe was a mistake, the de facto designation of rooms without the authority of the full Senate.

It has gone through the full clearance process and I would hope the Senator from Rhode Island will indulge us the confidence that this has been a matter that we have handled in the regular and, I hope, diligent leadership manner and is one that has been cleared on both sides.

Mr. CHAFEE. Mr. President, any remarks I have made here today in no way should show a lack of confidence in both leaders. They know the confidence I have in them. We have all worked together. There is no question of confidence here. I certainly hope that has not been suggested by anything I have said today.

I did not know the system. If it has gone through the Rules Committee and all those procedures, that is fine. I just hoist a warning flag that we are running out of rooms. There was a lot of talent before 1950 that was in this place and there will be a lot of talent after 1980. I think if we really want to save rooms for the great giants of this body, I would hope that we would not use them all up. Thank you very much, Mr. President.

Mr. ROBERT C. BYRD. Mr. President, I thank the Senator. I congratulate him on his dedication to principle and on his concern that the rooms of the Capitol, numbered as they are, limited in number as they are, should not be named without great consideration and appropriate forethought by the appropriate committees.

That has been done in this instance with respect to the resolution which is on the calendar.

This resolution, numbered differently but with the same content, was on the calendar during the last Congress. For reasons that I do not mind stating, there were objections to proceeding to take up the resolution. Some of those objections were voiced to me from both sides of the aisle so I did not call up the resolution.

But it has been cleared at this time.

For the record, may I say I took the matter up. I asked the distinguished majority leader not to call up this resolution on Tuesday of this week because I wanted to take it up before the caucus of Democrats, along with other matters, on yesterday. I took it up before the Democrats and no Senator in that group

indicated he wanted to offer an amendment. So, as far as this side of the aisle is concerned, the matter has been appropriately handled and has gone through the appropriate committee process.

It has been taken up with my colleagues on this side of the aisle.

I thank the distinguished majority leader for his indulgence in allowing the time necessary to proceed as I have indicated.

As to the L. B. J. and J. F. K. Rooms, I have already stated that those rooms have been so named. They were designated by the majority leader who was my predecessor. I simply want the Senate to put its stamp of approval on what has already become a de facto situation, as the majority leader pointed out.

Mr. BAKER. I also thank the Senator from Rhode Island. He has shown his characteristic concern for a matter of importance not only to the Capitol but to the Senate. He does it with good grace. I admire him for it. I appreciate his understanding. I hope the Senate will adopt this resolution.

The PRESIDING OFFICER. The question is on agreeing to the amendment in the second degree.

Without objection, the amendment in the second degree (UP No. 13) is agreed to.

The question is on agreeing to the amendment in the first degree, as amended.

Without objection, the amendment in the first degree (UP No. 12), as amended, is agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment, as amended, was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the resolution, as amended.

The resolution (S. Res. 80), as amended, was agreed to, as follows:

S. RES. 80

Resolved, That room S–120 in the United States Capitol is designated as the "Hugh Scott Room"; that room S–113 (Republican Senators Dining Room), in the United States Capitol is designated as the "Styles Bridges Room"; that room S–210 in the United States Capitol is designated as the "John Fitzgerald Kennedy Room"; that room S–211 in the United States Capitol is designated as the "Lyndon Baines Johnson Room"; and that room S–138 in the United States Capitol is designated as the "Arthur H. Vandenberg Room".

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution, as amended, was agreed to.

Mr. DODD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FAREWELL TO A GOOD LEGISLATOR

Mr. DURENBERGER. Mr. President, earlier this week it was my sad occasion to pay final tribute to one of Minnesota's most influential legislators, Nick Coleman. After a valiant struggle with acute leukemia, Nick passed away Thursday.

As a legislator and majority leader of the Minnesota Senate, Nick's influence was felt far beyond the borders of his State. His involvement in every Presidential campaign between 1960 and 1976 and his innovative legislation helped to shape not only his State but also his country.

I had the opportunity to work closely with Nick when he was a member of the minority party in the senate and I was executive secretary to Gov. Harold LeVander. Nick may have been the quintessential politician, but he did not let partisan politics stand between him and the best interests of the people he served. It was with Nick's active cooperation that Governor LeVander was able to lead the Nation in human rights protection, fair housing legislation, and worker safety.

Nick Coleman's legacy is especially important for all of us in Washington to keep in mind. His work in the State legislature for almost two decades was evidence that State government is effective, efficient, compassionate, and responsive. Nick was willing to take on the tough challenges and find the best solution. He accepted no less from himself and from those who served with him.

Minnesota and the country will miss Nick Coleman. I ask unanimous consent that an article on Nick in the March 7, 1981, St. Paul Pioneer Press be printed in today's RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

COLEMAN'S POLITICS DREW SPARKS AND RESPECT

(By Robert J. O'Keefe)

Nick Coleman's death was anticipated, but even the expected causes pain when the victim is somebody like Nick.

He wasn't perfect, as he would acknowledge, but among Minnesota senators in the last decade he was the best of the finest.

If the state ever decides to have a Senate Hall of Fame, a bust of Nick Coleman will be displayed with such other Senate giants as Gordon Rosenmeier of Little Falls and Donald Wright of Minneapolis.

He was the leader of the Senate during most of the 1970s and the best debater in the Minnesota Legislature's Upper Chamber. But there was more to him than the Senate.

When he was talking to newsmen or lobbyists in his office, Coleman's Irish wit would come through the same as it did on the Senate floor. His temper could get the best of him, too, in or out of the Senate chambers. He once went a year without talking to a reporter who had written a story that had upset him. Eventually the break was healed.

He loved the Senate, although he grew weary of it, and he loved politics. It was politics, of course, that led him to the Senate.

"Nick Coleman was both a personal friend and a political associate," former U.S. Sen. Eugene McCarthy said. "His death is a personal loss to his friends and a loss to the politics of Minnesota.

"He never avoided difficult positions. He fought hard and courageously but was without bitterness or vindictiveness either in victory or defeat. He never quit."

Coleman and McCarthy were linked more than three decades ago. Both were St. Thomas College men—Coleman as a student and McCarthy as an instructor.

McCarthy's campaign for the U.S. House of Representatives first pulled Coleman into politics. He worked on the campaign in 1948. After a brief fling as a schoolteacher, he went into politics for keeps in 1958 as a worker in McCarthy's campaign for the U.S. Senate.

From 1958 on, Coleman and politics were closely linked.

He must have been elated when John Kennedy was elected President in 1960 becoming the first Catholic to occupy the White House. Coleman once quipped that he was in his teens before he learned that Irish-Catholic-Democrat wasn't one word.

Prior to Kennedy's victory over Republican Richard Nixon, which had to bring Coleman great pleasure, he might have been swayed by the stirring speech his friend McCarthy gave nominating Adlai Stevenson at the 1960 Democratic convention. And earlier in the year, he was undoubtedly swayed toward Hubert Humphrey when the Minnesotan challenged Kennedy unsuccessfully in the Wisconsin and West Virginia primary elections.

Two years later, Nick had a campaign of his own. He ran for the state Senate against a veteran opponent, and won with 55 percent of the vote.

Sen. Paul Thuet of South St. Paul was DFL minority leader when Coleman entered the Senate. "All of us recognized he had great ability," Thuet recalled. "He was a brilliant debater."

As for Coleman's death, Thuet said, "We knew it was coming. It wasn't any surprise. But it was still a shock."

One of Coleman's closest friends in the Senate was Harold Kalina, now a district judge in Minneapolis. "Everybody is going to miss him," Kalina said. "He was a fine person. I am grief stricken that it happened to him at such a young age when he still had so much to offer."

Two others who entered the Senate for the first time after the 1962 election were Sens. Wendell Anderson and Rudy Perpich.

Thuet noted that Anderson and Coleman both had their eyes on the governor's office, but in 1962 their gubernatorial fight was still eight years away.

In the 1960s, it was the habit of Democratic presidential candidates to have their Minnesota campaigns run by rising young state senators.

Sen. Donald Fraser—now mayor of Minneapolis—ran Kennedy's campaign in 1960. By the fall of 1963, Kennedy had already decided that he wanted Coleman to run his 1964 Minnesota campaign.

But on Nov. 22, 1963, Coleman, Attorney General Walter Mondale and Assistant Attorney General Warren Spannaus were in the state Capitol discussing the next year's campaign when they heard the news bulletin that the President had been slain in Dallas.

So instead of running the Kennedy campaign, Coleman was executive director of the state volunteer committee that ran President Lyndon Johnson and Humphrey's campaign in 1964.

My first contact with Nick came in 1964 when I came from Duluth to cover politics for The St. Paul Pioneer Press and the St. Paul Dispatch. Johnson and Humphrey had an easy time carrying Minnesota, of course, but Coleman was nevertheless meticulous in his work.

I recall talking to him often about the campaign, and he would spiel off county by county figures on how well the Democratic ticket was doing against Republican Barry Goldwater.

Two years after the presidential election, Coleman was in the middle of a battle in Minnesota between Gov. Karl Rolvaag and

Lt. Gov. Sandy Keith. He favored Keith, who defeated Rolvaag at the state convention, but lost to the incumbent governor in the primary election.

The weekend before the general election is still vivid to me. A poll had come out showing Rolvaag the winner over Republican Harold LeVander. I called Nick, and asked him how he and so many other DFLers were wrong in saying Rolvaag couldn't be re-elected. But he knew more than the pollsters. LeVander, he predicted, was going to win, regardless of what polls said. LeVander did win.

The 1960s were a hectic decade in Minnesota. The Rolvaag vs. Keith battle was followed in 1968 by McCarthy challenging President Johnson. Coleman was torn. He felt that he owed allegiance to Johnson after running his campaign four years earlier. But when Johnson dropped out, Coleman quickly lined up with McCarthy.

Anderson, who had entered the state Senate with Coleman in 1962, was Humphrey's campaign chairman in 1968. Humphrey won the nomination over McCarthy after Johnson dropped out.

The 1970s started just as busy for DFLers as the 1960s had been.

Coleman and Anderson both wanted the DFL endorsement for governor. "They were both after the No. 1 position," Thuet said. "I guess DFLers around the state just figured Anderson was more electable."

I can remember talking to Nick the night before the balloting at the state convention in Duluth. He would win, he said, if everybody who said they were going to vote for him actually did. But apparently some changed their minds, because Anderson won the endorsement, and in the fall was elected governor.

Anderson, after being endorsed, wanted Nick to run with him as the party's candidate for lieutenant governor. But Nick had given his word to Perpich, who won the endorsement.

Two years later, DFLers won control of the Senate for the first time, and during the balance of the 1970s he made DFL history with the passage of innovative legislation, with his leadership, his debating ability, his Irish wit, and occasional flares of temper.

His temper shouldn't be understated.

He kicked in a glass panel on a Capitol door after a discouraging night on the Senate floor. After being on the losing side of a court case, he compared Minnesota's Supreme Court to Ayatollah Ruhollah Khomeini of Iran.

Despite his flashes of temper, he was the standout senator of his day.

Anderson, who served with him in the Senate and defeated him for governor, put it like this: "Nick was a giant. He was the best a person could be."

Sen. Roger Moe, Ada, who succeeded Coleman as DFL majority leader, said, "He was the conscience of the state Senate, reminding all of us that legislation had to be rooted in fundamental values."

Coleman's long time foe on the Senate floor, Senate Minority Leader Robert Ashbach, I-R-Arden Hills, praised Coleman for being sincere, competitive and, when the fights were over, a friend.

"His work will be evident for a long time to come," Ashbach said. "May he now be in peace."

TRIBUTE TO ELLA GRASSO

Mr. DODD. Mr. President, the passing of Ella Grasso was marked by many tributes and accolades, but few were more heartfelt and to the point than those offered by Joseph A. Owens, the editor of the editorial and opinion pages of the Post Publishing Co. Newspapers in Bridgeport, Conn.

The wide experience and broad perspective of Mr. Owens is complemented by his familiarity with Ella Grasso. As a close friend of the former Governor and as one of my State's most respected editors, Mr. Owens provides great insight into Ella Grasso's life. I ask unanimous consent that his editorials and columns of February 6, 1981, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Bridgeport Post, Feb. 6, 1981]

ELLA T. GRASSO

(By Joseph A. Owens)

Governor Ella Tambussi Grasso was an extraordinary person.

A debilitating, wasting illness claimed her life yesterday, but only after she had courageously fought the ravages of cancer for 10 long, painful months.

During Governor Grasso's heroic battle, the people of Connecticut were united in the hope that a miracle would occur; that their prayers would be answered. It was almost mystical, this intense concern for the woman who had governed this state for six years. To men and women of all ages, and social stations, it was unbelievable that their vibrant leader would be touched by death.

Ella T. Grasso was an officeholder with style and grace. She had an indomitable will to succeed, once she was convinced the cause was fair and just.

All her life she confronted the odds and won. By never losing sight of the fact that she was the daughter of poor immigrants, she worked hard at every project she undertook. That accounted for a good measure of her success. But there was more. She had the rare ability to quickly perceive facts and draw logical conclusions. Often there was need for bravery, whether the contest involved Democratic politics, a governmental issue, the rights of others or the good of Connecticut and the nation.

Mrs. Grasso did not think it unusual in 1974 when she became the first woman to seek the governorship. "I believe that working for the people is the noblest profession. and I seek this office to serve the people."

The empathy between this native of Windsor Locks and the people was abundantly evident as she traveled about the state during the autumn days and nights of her first gubernatorial campaign. There was a sense of anticipation. Voters were anxious for Election Day to come so they could pull the lever for the candidate they knew as "Ella."

Upon entering office, she inherited financial problems of a tremendous magnitude. Her inaugural address was a message of hope, of confidence and of challenge.

"The business of Connecticut can be conducted openly, compassionately and efficiently—with prudence and economy. It can; it must; and so it will," she declared in the magnificent Great Hall of the House in the Capitol. Twenty-one years earlier, in the same high-ceilinged, historic chamber she had taken the oath as a state representative.

There is no career in American history that parallels the course Mrs. Grasso traveled. While giving unstintingly of herself to public service, Mrs. Grasso remained the heart of the Grasso home. She took special interest in the work of her husband, Thomas, an educator, and raising their two children, Susane and James.

She lived by a code which embraced the highest moral laws and would withstand the test of any ethics or philosophies ever promulgated. That code orbited around her love of people. There was a personal attachment that was genuine and treasured by Ella.

To build a better state, she was convinced it was necessary for her to set the example. Until the state's finances were straightened out, she returned part of her salary, and insisted on frugality in her office and the Executive Residence. During the gasoline shortage in 1979, she commuted by bus between the Grasso summer home in Old Lyme and Hartford.

That was the indefatigable Ella, in her role of teacher, refusing to ask of others what she would not do herself. On the bus trips, as she did wherever she went, this warm-hearted woman introduced herself as Ella. That is how she wanted to be known. Titles meant little to her.

No one loved a challenge more than Ella. The blizzards early in the winter of 1978 pumped up her adrenalin and, much in the manner of a MacArthur or Patton in war, she was the general who, from a command post in the Hartford Armory, directed emergency measures.

Then in her typical fashion, the governor went aloft in a helicopter and viewed operations from the sky. In a rural area, people had etched a message in the snow: Ella Help! They knew their plea would be heeded.

When other natural disasters struck, this woman of strong spirit and boundless energy was on the scene, exhorting rescue squads to give their all. With that kind of inspirational leadership, how could they do less?

Governor Grasso, a Phi Beta Kappa graduate of Mt. Holyoke College, mastered the intricacies of politics, with the late Democratic Chairman John M. Bailey her tutor.

Connecticut is saddened by the death of Ella, a dynamic leader who showed us that old values will never wear out. Her explanation of why she entered public life is worthy of reflection: "Working for the people is the noblest profession of all."

Ella T. Grasso did Connecticut great honor.

ELLA'S LAST PUBLIC APPEARANCE

(By Joseph A. Owens)

Most fittingly, Gov. Ella T. Grasso's last public appearance was at the annual meeting of an organization she helped launch, whose members will always hold special affection for her.

It was a night of fun for the Hundred Club at La Renaissance in East Windsor. Larry Elgart's big band rocked the rafters with its rendition of "Hello Dolly" with the lyrics changed to "Hello Ella" as Connecticut's beloved governor marched into the hall, accompanied by Bridgeport businessman Bill Flynn, the retiring president, and Bob Lappin, the new head.

There was a constant stream of visitors to the head table, as men and women sought to personally greet the governor and a gentleman who directed the state from 1961 to 1971, former Gov. John N. Dempsey.

The crowd was happy because Ella and Dempsey spread joy wherever they went. And, in a departure from previous practice, another state officeholder, Secretary of the State Barbara B. Kennelly, served as "mistress of ceremonies."

Though she was accustomed to speaking to large groups, running the show was a new experience for Barbara. Her husband, Jim, her mother, Mrs. John Bailey and her brother, John, smiled every time the MC looked to Flynn or Lappin for a cue.

Lappin announced the establishment of a $5,000 scholarship in Ella's name for the son or daughter of a firefighter or police officer killed while on duty. To make the night complete, Ella was given a gold mantel clock and a scroll commemorating the occasion.

Dempsey was at his best. He turned the pages back to 1967 and a meeting in his office which led to the founding of the club

which aids families of police officers and firefighters killed on duty. Among those present was Secretary of the State Ella Grasso. After listening to the proposal, Ella said to the governor, "If this club will help human beings, and I think it will; and if this club will help those in need, and I think it will; let's get it going."

With a big smile, Dempsey added, "Ella gave me some additional advice. 'Make sure you put up the first one hundred bucks!'"

Though she was tired and weakened by her illness, Ella was magnificent.

First she needled "Barbie" and expressed hope Kennelly would be "a toastmaster person for a long time."

The compassion Ella felt for people who had experienced misfortune was obvious. She spoke eloquently about those who give "a gift of self and a gift of love."

And paying tribute to her long-time friend, she revealed, "You know, I didn't spend all those years with John Dempsey for nothing. I learned a great deal from him, especially from his inimitable store of quotations. I'm sure he won't mind if I take a little liberty with one:

"The world has need of the best in you,
The world has need of the work you do,
The world has need of a helping hand,
The world has need of a friend who understands.
It welcomes the honest, the loyal, the true,
The world needs this Hundred Club and it looks to you."

There was a standing ovation for Ella. Everyone in the hall, some 650 people, knew that she was making a gallant attempt to conquer a disease that topples giants.

The date of the dinner was Nov. 6, 1980. Within a month, Ella T. Grasso resigned her governorship because she lacked the strength to serve.

Ella's last public speech was as good as any she ever made.

[From the Bridgeport Telegram, Feb. 6, 1981]

GOVERNOR ELLA T. GRASSO—AN INSPIRATION

(By Joseph A. Owens)

For as long as there is a state called Connecticut, the remarkable career of Ella Tambussi Grasso will be a source of inspiration.

Sentimentalists are rightly claiming that she was the American dream come true. We are among them.

The distinctive success of Governor Grasso was the result of hard work. Her quest for excellence as a student brought her scholarships to private schools where classmates were accustomed to a lifestyle enjoyed by the wealthy. Her immigrant parents, who settled in Windsor Locks—a mill town between Hartford and Springfield—had ample cause to be filled with pride when their daughter graduated Phi Beta Kappa from Mt. Holyoke College. That was only the beginning of the achievements this ambitious woman would attain.

More with a sense of history than anything else, Governor Grasso often described herself as a "child of the Great Depression." She would recall, with a smile, that during the early years of their marriage, she and husband Tom operated a movie theater in the shoreline community of Old Lyme during the summer. There was need to supplement his income as an educator. "Every morning we hoped it would rain," she said more than once as she spoke of a bygone era that had left an indelible imprint on her mind.

In this current age of pretense, Ella T. Grasso was genuine. She was plain; she was real. Humor and sparkling conversation were prized by her. She walked with, and talked to, the mighty, but never lost the common touch because of the deep and abiding concern she harbored for the well-being of others. She was a woman of true compassion.

The cosmetics of politics and Ella T. Grasso were not compatible. During a campaign she sought the opportunity to meet and to talk to people. The result, she confidently believed, would take care of itself. Nine victories without a loss stand as a tribute to the philosophy which governed her policy.

It is history that she was the last protege of the late Democratic State Chairman John M. Bailey. A quarter of a century ago he envisioned greatness for a young woman in the General Assembly, gifted with the ability to understand complex issues and offer sensible solutions.

The arrival of Ella T. Grasso at the top—her victorious gubernatorial effort in 1974—was welcome and invigorating. She had succeeded in a man's world. Her election to the governorship was national news, but the winner stoutly refused to see herself as a celebrity. Always, she wanted the people to think of her simply as, and call her, "Ella."

Politics is a rough profession. No one ever liked the give-and-take as much as Governor Grasso did. She crafted an administration that well served the best interests of the majority of the people. The example was set by the leader who carried out her duties conscientiously and most often cheerfully.

Humor was one of her hallmarks and she used it effectively on lawmakers and bureaucrats alike to get a job done. In the company of friends at lunch or dinner, Governor Grasso took special delight in recounting happenings, serious and otherwise, in a way which provoked laughter. The wrinkles in her cheeks were etched by thousands of smiles that reflected her inner joy.

The death of Governor Ella T. Grasso is an occasion for detailed reports about her ascendancy in public life, along with statements by countless high-ranking public figures and business leaders who honestly admired her skills, her character and her integrity. After all has been written and said, one fact will remain: Her stay in Connecticut was all too brief, though she lived here her entire life of 61 years.

Comfort can be taken in her legacy. Governor Ella T. Grasso willed to current and future generations a special gift. She provided a model of how public service can be an unselfish act of love for fellow human beings.

IN HONOR OF TONY SCIORTINO

Mr. BRADLEY. Mr. President, I wish to take this opportunity to call to the attention of my colleagues the recent loss of a true athlete, competitor, and humanitarian. On November 29, 1980, Anthony "Tony" Sciortino, a citizen of Perth Amboy, N.J., passed away at the age of 71. This is certainly a painful loss for his family members and admirers alike. There will forever be a great feeling of absence within the community that considered Mr. Sciortino to be not only a champion athlete, but a man whose compassion for others earned him the respect and admiration of all who knew him.

Mr. Sciortino was considered by many as Middlesex County's most popular boxer. He first won acclaim in the boxing world by becoming New Jersey's featherweight champion at the young age of 16, a truly amazing accomplishment. Tony won 152 of his 182 bouts in his 9-year career as a boxer, accumulating along the way the prestigious titles of welterweight and lightweight champion of New Jersey. He also had the quickness of foot and professional stamina to attain the distinction of never having been knocked out.

In December of last year, the New Jersey State Senate and Assembly approved resolutions memorializing the life and heartfelt loss of this eminent individual. At this time, I would like to pay tribute to the memory Anthony Sciortino and in offering sincere condolences to the Sciortino family.

PROPOSED ARMS SALES

Mr. PERCY. Mr. President, section 36 (b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of a proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is available to the full Senate, I ask unanimous consent to have printed in the RECORD at this point the notifications I have received.

There being no objection, the notifications were ordered to be printed in the RECORD, as follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., March 3, 1981.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 81-22, concerning the Department of the Army's proposed Letter of Offer to Egypt for defense articles and services estimated to cost $28 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERNEST GRAVES,
Lieutenant General, USA.

[Transmittal No. 81-22]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective purchaser: Egypt.

(ii) Total estimated value:
Major defense equipment,* $21 million.
Other, $7 million.
Total, $28 million.

(iii) Description of articles or services offered:

Seventy-three TOW ground launchers, 1282 HEAT missiles, 362 TOW practice missiles, ancillary and support equipment, related spare parts, and other associated services.

(iv) Military department: Army (UCY).

(v) Sales commission, fee, etc. paid, offered or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: None.

(vii) Section 28 report: TOW ground launchers included in report for quarter ending 31 December 1980. Remainder of case not included in Section 28 report.

(viii) Date report delivered to Congress: March 3, 1981.

---

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

POLICY JUSTIFICATION

Egypt—TOW launchers and missiles:

The Government of Egypt has requested the purchase of 73 TOW ground launchers, 1282 HEAT missiles, 362 TOW practice missiles, ancillary and support equipment, related spare parts, and other associated services at an estimated cost of $28 million.

This proposed sale will contribute to the foreign policy objectives of the United States by enabling Egypt to provide for her own security and self-defense and to further enhance the peace process in the region.

The Government of Egypt will use the TOW to replace aging equipment rapidly becoming unserviceable due to the nonavailability of spare parts. Previously, the bulk of the Egyptian armaments was provided by the Soviet Union, but Egypt has recently turned to Western nations for defense articles and services.

Because this TOW equipment will replace obsolescent or unserviceable equipment already in the Egyptian inventory, the sale will not have a significant impact on the regional military balance.

Implementation of this sale will require the assignment of both U.S. Government and contractor personnel to Egypt.

The short leadtime associated with this delivery precludes provision from production. These items will be provided from U.S. Army reserve stock inventory.

DEFENSE SECURITY ASSISTANCE AGENCY,

Washington, D.C., March 3, 1981.

Hon. CHARLES H. PERCY,

Chairman, Committee on Foreign Relations, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 81-25, concerning the Department of the Army's proposed Letter of Offer to Jordan for defense articles and services estimated to cost $156 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERNEST GRAVES,
Lieutenant General, USA.

[Transmittal No. 81-25]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFSET PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective purchaser: Jordan.

(ii) Total estimated value:

Major defense equipment,* $120 million.

Other, $36 million.

Total, $156 million.

(iii) Description of articles or services offered:

Twenty-four AH-1S helicopters with M65 TOW missile system, the M197 20mm gun subsystem, and support.

(iv) Military department: Army (VCF).

(v) Sales commission, fee, etc. paid, offered or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: None.

(vii) Section 28 report: Included in report for quarter ending December 31, 1980.

(viii) Date report delivered to Congress: March 3, 1981.

POLICY JUSTIFICATION

Jordan—AH-1S helicopters:

The Government of Jordan (GOJ) has requested the purchase of 24 AH-1S helicopters with the M65 TOW missile system, the M197 20mm gun subsystem, and support at an estimated cost of $156 million.

The sale will further U.S. foreign policy objectives by assisting a friendly country to deter hostilities and defend itself in a region where it is vital to U.S. interests to promote peace and stability. The sale will assist the GOJ in meeting its legitimate defense requirements and reaffirm to the Jordanian military and political leadership that the United States is responsive to the priority modernization objectives of the Jordanian Armed Forces (JAF). This modernization effort is consistent with U.S. views on Jordanian security needs, the regional military balance, and long-range peace and stability in the region.

The JAF modernization plan calls for a significant improvement in anti-armor capability. Because of the increasing tank density among neighboring countries of the Middle East and Jordan's numerical inferiority by comparison, Jordan must improve its anti-armor defenses. Acquisition of AH-1S helicopters will give Jordan a moderate anti-tank helicopter capability. The GOJ has not obtained this system under previous Foreign Military Sales or the Military Assistance Program. However, the JAF has previously obtained the ground version of the TOW commercially, is currently obtaining the mobile TOW under Armor system commercially, and has been provided TOW missiles under FMS and MAP. The addition of these aircraft to Jordan's military forces will not cause a significant change in the balance of forces in the region.

The prime contractor will be the Bell Helicopter Corporation of Fort Forth, Texas.

Implementation of this sale will require the assignment of four U.S. government personnel to Jordan for two years.

There will be negligible impact on U.S. defense readiness as a result of this sale as the AH-1S helicopters will be from extended production at the Bell facility.

DEFENSE SECURITY ASSISTANCE AGENCY,

Washington, D.C., February 27, 1981.

Hon. CHARLES H. PERCY,

Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 81-26, concerning the Department of the Army's proposed Letter of Offer to Morocco for defense articles and services estimated to cost $182 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERNEST GRAVES,
Lieutenant General, USA.

[Transmittal No. 81-26]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective purchaser: Morocco.

(ii) Total estimated value:

Major Defense Equipment,* $154 million.

Other, $28 million.

Total, $182 million.

(iii) Description of articles or services offered: One hundred eight M60A3 tanks with related spare parts, ancillary and support equipment, and associated services.

(iv) Military department: Army (UKV).

(v) Sales commission, fee, etc. paid, offered or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: None.

(vii) Section 28 report: Case not included in section 28 report.

(viii) Date report delivered to Congress: February 27, 1981.

POLICY JUSTIFICATION

Morocco—M60A3 Tanks:

The Government of Morocco has requested the purchase of 108 M60A3 tanks with related spare parts, ancillary and support equipment, and associated services. The estimated total value is $182 million.

The sale will further U. S. foreign policy objectives by demonstrating that the U.S. remains willing to support, as it has in the past, the legitimate defense needs of Morocco, a staunchly anti-communist, strategically located country which has generally played a moderate, pro-Western role in Africa and the Middle East on issues important to U.S. national interest.

The sale of 108 M-60 tanks will allow Morocco to modernize two of its armored battalions, giving Morocco added defensive capability, and is meant to support a long-standing U.S. policy of assisting Morocco with the modernization of its conventional armed forces. Algeria, Morocco's principal regional rival, is equipped with a large number of Soviet tanks—the bulk of which are T-54 and T-62 models—and currently enjoys a substantial tank advantage over Morocco. The sale of the M-60 tanks will reduce the ratio but still leave Algeria with a substantial advantage.

Furthermore, the tanks will not be available for delivery to Morocco for over two years. We believe that it is unlikely that Morocco would elect to use these tanks in the Western Saharan conflict, even in the event that conflict is still going on after delivery, because of its continuing need to defend against an armored thrust along the traditional invasion routes in northern Morocco and because the terrain and the nature of the conflict in the Western Sahara are unsuitable for the employment of main battle tanks.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor for this sale will be the Chrysler Corporation of Warren, Michigan. It is estimated that there will be an in-country requirement for 15 U.S. Government personnel for up to one year in support of this case.

This sale will have no impact on U.S. defense readiness since these vehicles will come from production capacity not needed to meet U.S. requirements.

---

* As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

EGYPT TODAY

Mr. PERCY. Mr. President, I would like to honor Egypt Today, an exposition of ancient and modern Egyptian culture featuring over 70 exhibits and events in three American cities. Egypt Today emphasizes the growing friendship and understanding between the United States and Egypt.

This particular concept of fostering international understanding was begun by the National Endowment for the Humanities in 1977 with a program honoring Canada. Similiar programs have followed honoring Mexico, Japan, and Belgium. Egypt today is thus the fifth in this series. The program is sponsored and organized by the Middle East Institute, the Smithsonian resident associate program, and Meridian House International. The National Endowment for the Arts, the Government of Egypt, and many private individuals and corporations have all contributed to this program.

This celebration officially opens in Washington on March 16, 1981, with the visit of the gifted and talented wife of

the President of Egypt, Mrs. Jehan El-Sadat. Mayor Marion Barry of the District of Columbia has proclaimed the week of March 16–23, 1981, as "Egypt Today Week" in Washington, D.C.

Accompanying the inaugural ceremonies will be the opening of an impressive array of exhibitions of Egyptian paintings, sculptures, tapestry, photographs, and films. Many lectures on Egyptian culture will also be part of the celebration. I ask unanimous consent to include in the RECORD a sampling of the events.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EXHIBITIONS

March 14–April 26, Egypt today: Embroidered Pictures from Akhmim, Renwick Gallery.

March 16–April 30, Traditional Costumes and Jewelry of Egypt, Museum of African Art.

March 16–April 26, Mahmoud Moukhtar: 1891–1934, Hirshhorn Museum and Sculpture Garden.

March 16–April 30, Hand-Painted Papyrus, Discoveries Gallery.

March 16–May 31, Ancient Egyptian Art, Freer Gallery of Art.

March 16–April 15, Egypt in America, National Museum of American History.

March 16–April 26, Arts of Ancient Egypt: Treasures of Another Scale, Smithsonian Institution Building.

March 16–April 30, Egypt Through the Eyes of Her Children, Capital Children's Museum.

March 16–April 30, Two Sculptures by Ramzi Moustafa, The Phillips Collection.

March 16–April 17, Four Contemporary Egyptian Artists: Moity, Nada, Sirry, El-Razzaz, National Academy of Sciences.

March 16–April 16, Washingtonians Collect Modern Egyptian Art, District Building.

March 16–April 26, Scenes of Contemporary Egypt, 50 photos by Donald and Betty Wiechec, National Museum of Natural History.

March 16–April 30, Pharaonic Architectural Images of Egypt, The Middle East Institute.

March 17–August 1, Cairene Carpets, The Textile Museum.

March 18–April 18, Tapestries of Wissa Wassef, The Textile Museum.

March 18–April 25, Works of Five Contemporary Egyptian Artists: Nawar, Gebali, Selim, El-Sarrag and Saleh Reda, Meridian House International.

March 18–April 25, From the Deserts of Egypt—Costumes, Kelim Rugs and Basketry, Meridian House International.

March 18–April 25, Modern Egyptian Jewelry of Azza Fahmy, Meridian House International.

PERFORMING ARTS

March 17, Tuesday, 6:00 p.m., Recital by Marcelle Matta, (By invitation only), Meridian House International.

LECTURES, SEMINARS, PANEL DISCUSSIONS

March 25, Wednesday, 9:30 a.m.–12:30 p.m. The Egyptian Identity, Smithsonian Resident Associate Program, Carmichael Auditorium, National Museum of American History, Admittance Fee.

March 25, Wednesday, 2:00–5:00 p.m. Arts and Literature, Smithsonian Resident Associate Program, Carmichael Auditorium, National Museum of American History, Admittance Fee.

March 26, Thursday, 9:30–12:30 p.m., Society in Transition, Smithsonian Resident Associate Program, Carmichael Auditorium, National Museum of American History, Admittance Fee.

March 26, Thursday, 2:00–5:00 p.m., The Land and Its Resources, Smithsonian Resident Associate Program, Carmichael Auditorium, National Museum of American History, Admittance Fee.

March 26, Thursday, 8:00 p.m., An Evening of Egyptian Poetry, Salah Abdel Sabbour, Smithsonian Resident Associate Program, Carmichael Auditorium, National Museum of American History, Admittance Fee.

April 2, Thursday, 2:00 p.m., Egypt's Population Explosion, Dr. Asad Nadim, George Washington University, Lisner Hall, Room 603.

April 8, Wednesday, 6:00 p.m., Arts of Ancient Egypt: Treasures on Another Scale, Robert S. Bianchi, Smithsonian Resident Associate Program, Baird Auditorium, Museum of Natural History, Admittance Fee.

April 14, Thursday, 5:00–7:00 p.m., World Affairs Seminar: The Impact of Religion on Egyptian Society, (Reception following), Meridian House International, Registration: 202/667–6800.

April 16, Thursday, 8:00 p.m., Architecture for the Poor, Hassan Fathy, Carmichael Auditorium, National Museum of American History.

April 16–May 14, Thursdays, 8:00 p.m., In Search of Egypt, Jidith Kipper, Moderator; A series of lectures exploring contemporary Egyptian society with particular emphasis upon Egypt's continuity with its rich historical past and the impact of change in the 20th century. Smithsonian Resident Associate Program, Admittance Fee. Registration; 202/357–3030.

April 26, Sunday, 10:00 a.m.–1:00 p.m. Fashioning Egyptian Paste Beads, David Field, Instructor, Smithsonian Resident Associate Program, Admittance Fee. Registration: 202/359–3030.

FILMS

March 18, Wednesday, 7:30 p.m. Evening of Egyptian Documentaries: "From Philae to Agalika," "Mudhorse," "On the Nile," "Pearl of the Nile." The Middle East Institute.

March 18–19, Wednesday and Thursday, 12:30 p.m. Free Film Theater.

March 23, Monday, 6:30 p.m. "Alexandria Why?" Directed by Youssef Shaheen, The American Film Institute, John F. Kennedy Center for the Performing Arts.

The following series of films will be shown Wednesdays at 6:00 p.m. and 8:30 p.m. Sponsored by the Smithsonian Resident Associate Program, they will be shown at the Carmichael Auditorium, National Museum of American History, 14th Street and Constitution Avenue, N.W. Admission: $2.00.

March 25, "The Postman" (1968) Hussein Kamal.

April 1, "The Night of Counting the Years" ("The Mummy") (1969), Shadi Abdul Salam.

April 8, "The Land" (1970) Youssef Shaheen.

April 15, "Grandson" (1975) Atif Salem.

April 22, "The Water Carrier is Dead" (1977), Salah Abou Seif.

April 29, "Ascent into the Abyss") (1978), Kamal El-Shaikh.

PRELIMINARY NOTIFICATION, PROPOSED ARMS SALES

Mr. PERCY. Mr. President, section 36 (b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of a proposed sale shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice. I ask unanimous consent to print it in the RECORD.

I wish to inform Members of the Senate that such a notification was received on March 2, 1981.

Interested Senators may inquire as to the details of this preliminary notification at the offices of the Committee on Foreign Relations, room 4229 Dirksen Building.

There being no objection, the notification was ordered to be printed in the RECORD, as follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., March 2, 1981.

Dr. HANS BINNENDIJK,
Committee on Foreign Relations,
U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Northeast Asian country for major defense equipment tentatively estimated to cost in excess of $7 million.

Sincerely,

Lt. Gen. ERNEST GRAVES,
Director.

THE WORK OF DR. WALTER E. MASSEY OF ARGONNE NATIONAL LABORATORY

Mr. PERCY. Mr. President, since its creation the Argonne National Laboratory has been in the forefront of the national scientific research into alternative fuels development for America's energy future. Long recognized as one of this country's principal laboratories for research and development of nuclear power, Argonne has been instrumental in developing both the fast breeder and the boiling water reactors. The lab is currently engaged in advanced testing of heavy-ion fusion energy. Among its nonnuclear projects, Argonne is conducting extensive tests on the fluidized bed combustion of high-sulfur coal. It is the Nation's principal national laboratory for work in magnetohydrodynamics, a promising technology which can enhance the efficiency of coal-fired powerplants by 20 percent. Argonne's ambitious solar energy program is responsible for the invention and development of the compound parabolic concentrator, a solar collector now being sold to businesses across the Nation.

Much of the success which Argonne National Laboratory has enjoyed in recent years must be attributed to its creative and dynamic director, Dr. Walter E. Massey. For years, Dr. Massey has won extensive praise as both an educator and as a physicist. In July 1979, he be-

came the first black American appointed director of a national laboratory.

For many years, Dr. Massey has been actively involved in efforts to recruit more black Americans, and other minorities, for careers in higher scientific research. His efforts have contributed to the sponsorship by the American Physical Society of scholarships for minorities interested in entering the sciences. In addition, Dr. Massey has actively sought out minority businesses to manufacture scientific instruments used by Argonne. Dr. Walter Massey must be seen as one of the Nation's leading theoretical physicists of today, and a champion for the entrance of minorities into the world of modern science.

Mr. President, the February/March issue of Dollars & Sense magazine contains a short article recognizing Dr. Massey's contribution to American science. If there is no objection, I ask unanimous consent that the contents of this article be inserted into the RECORD at this time.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WALTER MASSEY OF ARGONNE LABORATORY—LEADING THE SEARCH FOR ALTERNATE SOURCES OF ENERGY

(By Leon Colvin)

At first glance, Argonne National Laboratory resembles an army compound—its barrack-like one-story buildings are painted light blue to offset the atmosphere so often associated with a military base. But while driving through the winding roads of the facility located 28 miles southwest of Chicago, the Spartanesque resemblance softens and Argonne takes on the appearance of a college campus with dozens of two- and three-story red brick buildings dotting the acres of greenery.

It's hard to believe that this complex—as tranquil as it seems—holds the key to the nation's energy future. But inside the baby blue and red-brick buildings, University of Chicago scientists are busy conducting energy related experiments, many of which have expanded in recent years to include numerous programs in advanced energy technologies, fossil energy and energy conservation.

The laboratory's largest energy program is nuclear reactor research and development. Most of the work connected with nuclear reactors is carried out at Argonne-West, which is located near Idaho Falls, Idaho. Argonne-West is the site of the nation's first experimental breeder reactor that started producing electricity as early as 1951.

About 40 percent of the laboratory's research efforts are centered on nuclear power-related projects. The other 60 percent are devoted to other energy, conservation and basic research programs. Some of those projects include finding ways of efficiently burning high sulphur coal, examining pollution on the Great Lakes, and seeking methods of converting solid waste into liquid waste through energy sources.

Argonne is extremely proud of its solar energy program. The laboratory has probably developed the most advanced solar collectors in use today. The program is so successful that solar energy collectors developed by Argonne's scientists are now available commercially.

In charge of the entire operation is Dr. Walter E. Massey, a brilliant, 42-year-old theoretical physicist, the first black to head up one of the nation's largest energy research and development centers.

Massey's career as director of Argonne Laboratory began July 1, 1979, after he accepted the offer of University of Chicago President Hanna H. Gray to fill that prestigious post. He was returning to familiar environs, however, as he had worked there as a post-doctoral appointee from 1966 to 1968. (The laboratory is operated for the U.S. Department of Energy by the University of Chicago under a tripartite contract among DOE, the university and the Argonne Universities Association.)

By accepting the challenging directorship, Massey has been able to pursue one of his greatest interests—the desire to involve more minorities in scientific-related careers.

Nearly three years ago, he authored an article in which he urged scientific societies to do more to encourage minorities to seek careers in the sciences. His efforts contributed to the American Physical Society's sponsorship of undergraduate scholarships for minority students who aspire to careers in the sciences.

"There should be more of that," Massey said, "but in the end I think the black community, the minority community, in general, is going to have to place more emphasis on and give more encouragement to black students going into the sciences."

Massey believe that professional societies need to do more. "But," he added, "they can only do so much."

"If parents and teachers don't encourage students to take the proper courses, then we're never going to get more minorities than we're getting now."

Hinting that minorities are placed at an educational disadvantage, Massey urged blacks to get a head start on science-related careers by taking the proper courses in junior high school.

"That's stretching it," Massey said, "but, unfortunately, that's true. Students don't take the proper mathematics early in high school. They don't take algebra, geometry and trigonometry and, therefore, are behind in college."

Many white students who go to colleges to major in science will have taken calculus in high school. Massey says the same usually is not true with minority students.

"This means they are at a tremendous disadvantage and each step is just harder and harder to make up," he said. "There are two or three courses that are almost critical to take between the ninth and eleventh grades. These are algebra, geometry, trigonometry, and, perhaps, physics and chemistry. The science in high school is not as important as the math because once you get into college they (the professors) will teach you science if you know enough of the math."

Massey speaks with the voice of academic experience. During 1968 he served as an assistant professor of physics at the University of Illinois. He was professor of physics and dean of the college at Brown University between 1970 and 1975. During his tenure at Brown he received a number of honors, including "Outstanding Educator of America" in 1974.

"I think more and more fields are going to require that (mathematics) kind of training and that kind of education in the future. People who understand mathematics are going to be more versatile. People who rise to the highest level of business are people who have some undergraduate science and technical training," Massey said.

He also stressed the importance of having teachers who back their students.

"I had a good teacher at Morehouse College. I also had another good professor at Washington University in St. Louis where I did my graduate work," he recalled. "I think what kept me going, why I stayed with it, was having professors like them who helped me out and inspired me."

Right now Massey is inspiring his staff to put more involvement into Argonne's affirmative action program.

"We have affirmative action programs; they are in place. They aren't significantly better or worse than others. We should be doing a lot better, and we're working on it. That's the best way to sum it up."

Argonne's affirmative action department sums up its efforts this way:

At the beginning of the fiscal year, October 1, 1980, Argonne employed 4,200 people. Nearly 8½ percent (356) are black.

33 percent of Argonne's black employees are women.

Women make up 24 percent (1,029) of Argonne's total work force.

Argonne has 10 blacks in top management positions. Blacks comprise 2½ percent of Argonne's top management team of 397 persons.

Argonne does extensive recruiting at minority colleges that have energy directed programs. Massey believes the laboratory stands a better chance of recruiting people at the professional and doctoral levels through one-on-one contact rather than through advertising. He is a firm advocate of sending the laboratory's recruitment officer to colleges to talk with professors and students before they earn their degrees. However, he concedes that Argonne doesn't do as much of that as he thinks they should, nor does he feel they do it as well as they should. "It's something we'll have to work on," he says.

Getting someone with a doctorate to work at Argonne isn't as simple as it sounds, he says. The field is very competitive and, for talented black scientists, it's even more competitive. Argonne has a good reputation among research and development laboratories, but so do other universities and private companies. Some of the other laboratories pay more than Argonne and. to be perfectly honest, Chicago's winters are no match for the warmer climates of California, which boasts of the University of California at Berkeley and Stanford University in Palo Alto.

Recruiting engineers to work at Argonne is a little easier than trying to lure persons with doctorates since most engineering positions don't require doctoral degrees to begin doing research. To lure minority engineers, Massey said Argonne has instituted various programs.

"We have students come in the summer to work so they will get to know the lab while they are in undergraduate school. When they finish, at least they will know us and we'll know them. This gives us a good chance of attracting them."

Last summer, Argonne's Division of Educational Programs sponsored a project for high school students. Special funds made this successful program possible. But it is not known whether it will return this summer.

The Argonne National Laboratory can be compared to a small city. This means that a large amount of supplies from outside sources are needed to keep the city of 4,200 going each day.

For the past two years, Argonne's Purchasing Department has sponsored meetings in which the needs of the facility are outlined to minority vendors. These entrepreneurs are selected from several government and private publications, including the Blackbook Business and Reference Guide.

Between October 1, 1979, and September 31, 1980, the purchasing department spent $3.978 million on goods and services from minority vendors. By the end of 1980, $1.132 million had been paid out to minority businesses.

Ninety-four percent of Argonne's operating budget of $225 million for fiscal 1980 is funded by the federal government's Department of Energy. This makes Argonne one of the nation's largest federally funded research and development centers. However, some of

the research work at the laboratory may find itself the victim of belt tightening by the Reagan administration.

"Reagan's energy policies will affect different sections of the lab," Massey said.

"The nuclear energy program, I suspect, will be better off during this administration than it has been. I would suspect that environmental, conservation and solar projects may not fare so well. We haven't been able to get many signals about how they will support basic research, but we will be affected, no doubt."

With Reagan's announced intention to dismantle the Department of Energy, the future status of federal support for Argonne's energy research is, indeed, a matter of conjecture.

AN AGENDA FOR THE NEW CONGRESS

Mr. HELMS. Mr. President, I have before me an article by Anthony Harrigan, which recently appeared in Point of View, a publication of the U.S. Industrial Council. For those of my colleagues who do not know, the U.S. Industrial Council is a public policy research organization concerned with national and international issues. Originally formed in 1933 as the Southern States Industrial Council, it is currently headquartered in Nashville, Tenn., and consists of some 4,000 companies employing 3 million people.

I received this article along with a letter from my good friend, John G. Hutchins, president of Food World, Inc., a supermarket chain based in High Point, N.C. John is past president of the USIC, and to this day remains very active in USIC affairs.

The writer of this article, Tony Harrigan, is well-known to many of my colleagues. He writes a weekly newspaper column subscribed to by 350 newspapers, and does a weekly radio show aired on 250 radio stations around the country. In addition, Mr. Harrigan's articles frequently appear in newspapers, magazines, and other periodicals.

This article, entitled "An Agenda for the New Congress," sets out USIC's suggestions for rebuilding the American economy and restoring the United States to a position of military superiority in a hostile world.

The article's summary reads as follows:

The USIC believes strongly that the American economy and defense of the free world are interrelated. Without a strong defense, we can't insure that our nation and our allies will be safe from Soviet aggression. As Soviet agitprop focuses on the resource-rich areas of the world, the U.S. must have the capability to challenge Soviet interventionism. Without a strong economy, which means an economy free of inflation and ruinous public debt, we will not be able to build and maintain an effective defense of our nation, or set an example for our allies, which is the traditional role of the United States as leader of the free nations of the world.

Mr. President, that is a succinct statement of the major challenges facing this Congress. So that my colleagues might have the full benefit of Mr. Harrigan's article, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

AN AGENDA FOR THE NEW CONGRESS

(By Anthony Harrigan)

The theme for the 1930's was sounded in the Presidential and Congressional elections in November: the American people have demonstrated that they want the health of their economy restored, their military strength rebuilt, and America's role as leader of the free world continued and renewed. The United States Industrial Council presents these proposals as the key to achieving these urgent national goals:

REGULATION

Regulation is the very guts of Big Government. Government at all levels currently accounts for over one-third of the national economy, and in 1979 alone cost business $15 billion. Disruption of the nation's economy grows in direct proportion to the increase in government regulation of business. Government regulators are often zealots, indifferent to the economic cost of the regulations they promulgate.

Small businesses employ the majority of American workers. Government regulations grievously impair their ability to produce by squeezing them out of the market for their goods. Unlike the corporate giants, smaller firms are less likely to survive an antagonistic regulatory climate. American consumers must then pay higher prices, when competition is destroyed through regulatory fiat.

The USIC recommends that regulators be made to compare the total cost of regulation to any anticipated benefits, notwithstanding the difficulty of quantifying benefits. Existing regulations must be made more flexible. Whenever possible, they must be replaced by market incentives. Government interference with the private sector should be far less punitive and far more deferential. Regulations should address the true social costs of industrial activity, not consumer preferences.

ENERGY

Although the Carter Administration and the 96th Congress did approve the phased deregulation of crude oil and natural gas prices, they followed that important step forward by imposing the so-called windfall profits tax last March, which is intended to confiscate $227 billion from the energy-producing companies over the next ten years. In addition, Congress has approved the creation of a new Synfuels Corporation, which will subsidize the development of "alternative" energy sources by awarding contracts to companies with interesting synfuels ideas, to the tune of $20 billion over the next five years.

These legislative leaps toward full government management of the energy industries complement the most serious blunder in government energy policy, which was the establishment of the Department of Energy in 1977. Today, this huge bureaucracy is engaged in regulating and restricting the freedom of energy producers. The DOE has been from the first an unmanageable bureaucracy, that produces only paperwork and obstructions.

Other factors have contributed to the difficulties of American energy production: the environmentalist blockade of the use of federal lands in the Western states for production of energy continues. Due to government-caused delays, the important nuclear breeder reactor program at Clinch River, Tenn., is unfinished. Anti-nuclear extremists have been able to manipulate the courts, the regulatory agencies, and public hearings to delay construction of nuclear plants around the country, thus driving the already high costs of construction even higher, and out of the reach of many utilities.

The USIC urges, first of all, that the Dept. of Energy be abolished, and its necessary functions, such as the supervision of the production of nuclear weapons, be returned to the agencies that originally performed them. A meat-ax approach to regulation in the energy area is necessary. Domestic oil and gas prices ought to be deregulated immediately. Congress should repeal the windfall profits tax, and leasing of federal lands and offshore continental shelf tracts should be stepped up. The Clinch River breeder must be finished, and research on other promising nuclear breeder technologies continued. The construction of nuclear power plants, with proven safeguards must be encouraged, commensurate with projected electric power needs. The American energy industry has worked wonders in finding, producing, refining, and distributing energy. It must be allowed, through the free enterprise system, to continue and increase its efforts.

LABOR

Labor represents the single most important cost of production for most American businesses. The impact of labor unions, under the protective umbrella of onerous labor laws, has been enormous. To begin with, labor unions are exempted from federal antitrust laws. The legislative intent behind this exemption was primarily to promote collective bargaining. Its chief effect in recent years has been to insulate labor unions from accountability for their actions.

In addition to antitrust exemption, many labor laws friendly to union leaders but inimical to the free market system have distorted the national economy. Artificial costs created by minimum wage laws and Davis-Bacon, which sets an unrealistic wage floor for government contracts, add a labor "surcharge" to the already high cost of American labor.

In the months ahead, labor unions may well merge into larger bargaining units not for the purpose of collective bargaining so much as to ramrod socialistic programs through Congress. Unions will demand a bigger voice in plant closings, increased job-safety protection, mandatory bargaining for retirees' benefits, and neutrality clauses. Such clauses allow unions to organize new plants anywhere in the U.S.

Inflation will prompt unions to demand higher wages and benefits in new contracts despite the self-defeating, myopic benefit of indexing undeserved wages to unreasonable prices.

USIC advocates a frontal attack on union arrogance and greed. We will urge the rank and file to throw their leaders out of office unless they provide leadership on the productivity front. Big Labor's exemption from federal antitrust laws must be abolished. Minimum wage laws must be revamped to mitigate unemployment and reduce artificial production costs. Davis-Bacon must be repealed. Management must be urged to fight unrealistic union demands and unconscionable labor laws at the federal and state levels.

INTEREST RATES

The Prime Interest rate is another deleterious factor in the U.S. economy. While Big Businesses can actually make money in a period of high inflation, floating currencies, tax policies favoring corporate borrowers with huge cash reserves, etc., the vast majority of U.S. businesses are barely surviving. During a recession, the accounts receivable of small businesses contract while business overhead is often fixed. With a prime rate of 20% and more, such businesses cannot afford to carry the indebtedness required to tide them over until the economy recovers. Thus, we have experienced a sharp rise in small business bankruptcies, severly low profitability, and slow economic growth. Poor growth means fewer and fewer jobs, and chronic economic stagnation.

The U.S. Industrial Council urges the new Administration to break the back of inflation, but not at the expense of America's largest employer, the small businessman. One hopeful step has been the small business

prime which is usually set about a point lower than the prime rate. This differential should be increased to several points below normal prime until the economy begins to expand. Inflation should be controlled by a stringent rein on the money supply, not by interest rates which stifle real economic growth.

NATIONAL DEFENSE

The decline in American defense capabilities is most obvious in the current condition of the U.S. Navy. First-line combat vessels patrol the Mediterranean, the Pacific, and the Indian Ocean dangerously short of key personnel, such as aircraft mechanics, radar operators, and even pilots. In the event of attack, our Navy would be hard pressed indeed. A similar manpower shortage exists in the U.S. Army, which has been forced to accept less than desirable people to fill its ranks. In fiscal year 1980, only 45 percent of Army recruits were high school graduates.

At the same time, U.S. spending on the construction of ships, planes, tanks, and other defense equipment needed to confront Soviet forces in Europe and the Indian Ocean region has fallen off precipitously. The indifference of the Carter administration towards military preparedness has already led to a dangerous situation: many American manufacturers are unable or reluctant to undertake defense projects because of past experiences with cancelled or reduced orders. Consequently, major items like tank turrets and sophisticated guidance systems for aircraft are more costly and require more time to build.

In the area of strategic weapons, the decade-long complacency over detente and the strategic arms negotiations led to the slowdown in the development of important weapons. It is a fact that the Soviets have acquired the capability to "win" a nuclear war with the U.S., from their perspective. Therefore, the possibility exists that the Soviet leadership, which could change at any moment, might become confident enough to make some aggressive move that would in effect "dare" the United States to respond militarily. The decision to do so would be agonizing and perhaps disastrous.

Meanwhile, America's NATO allies have observed the rapid growth of Soviet military power. They have vacillated in their financial support for NATO and in their public support for the U.S. in the Iranian crisis. If the trend continues, Western Europe could be "Finlandized."

The United States must act quickly to insure that the drift of the industrial democracies towards weakness doesn't continue. The USIC urges President Reagan to follow up his campaign promises by pushing a new defense program through Congress. The serious deficiencies in military pay and allowances must be remedied. A decision must be made about continuing the volunteer force, or returning to a military draft.

In the area of strategic arms, only the Trident submarine program is proceeding, and it is behind schedule. The Congress must act quickly to protect our land-based ICBMs, which are vulnerable to attack by heavy Soviet missiles. The MX multiple launch based system is being debated. It might be easier to adopt a system of shuttling Minuteman III missiles to varied launch sites, however.

Additionally, the administration must undertake to enlarge the size of the Navy to at least 600 ships. The highly-touted Rapid Deployment Force won't go anywhere without amphibious shipping, which is in a pathetic state. The needs of the Navy have particular urgency, because the Navy is the key to maintaining a strong international presence, and ensuring that the sea lanes remain open to crucial commercial shipping. American industry is dependent on numerous strategic minerals from far-flung parts of the world. Transport of these, and oil from the Persian Gulf to the U.S. must be safeguarded if our industry is to be revitalized in the coming years.

SUMMARY

The USIC believes strongly that the American economy and defense of the free world are interrelated. Without a strong defense, we can't insure that our nation and our allies will be safe from Soviet aggression. As Soviet agitprop focuses on the resource-rich areas of the world, the U.S. must have the capability to challenge Soviet interventionism. Without a strong economy, which means an economy free of inflation and ruinous public debt, we will not be able to build and maintain an effective defense of our nation, or set an example for our allies, which is the traditional role of the United States as leader of the free nations of the world.

FUTURE OF THE DOMESTIC REFINING INDUSTRY

Mr. WALLOP. Mr. President, today I call the attention of the U.S. Senate to a subject that I intend to explore in the Senate Finance Committee Subcommittee on Agricultural and Energy Taxation. I am speaking of the future of the U.S. domestic refining industry.

On January 28, 1981, President Reagan took the courageous step of decontrolling crude oil prices and ending 7 years of allocation controls which had bound up the productive forces of the American energy industry. Ending price controls is an essential ingredient in developing a sound energy policy and will accomplish several important national objectives. Production of more energy will be encouraged. Remaining U.S. reserves of crude oil will be priced according to their true replacement cost and the American people will accordingly conserve this precious resource. Most important of all, the ingenuity and creativity of the U.S. energy community will be freed for productive purposes, rather than remaining a captive of pricing regulations, and rulemaking by the Department of Energy.

However, it is my hope that the end of controls will also prompt Congress and the executive branch to thoughtfully examine the current problems facing this Nation's domestic refining industry.

Over the last several years, the Congress of the United States has studied, debated, and legislated on the question of energy self-sufficiency. Congress has focused largely on issues of energy production and supply. In this rush to attain high levels of national energy production, we must not ignore the downstream processes required to refine raw materials into usable commodities and to deliver those products to the American people.

To encourage Senate deliberations on the future of the U.S. refining industry, I intend to conduct hearings before the Senate Finance Subcommittee on Energy and Agricultural Taxation on March 27, 1981. These hearings will explore the problems that domestic U.S. refiners may experience in the decade ahead and consider several tax and tariff-based ideas which have been advanced as possible solutions to these problems. I recognize that there are many different approaches to a national refining policy—the options range from doing nothing to a full-blown regulatory program that allocates crude oil among the Nation's refineries.

It is not my intent to examine the regulatory approach. Rather, I would hope that the Subcommittee on Energy and Agricultural Taxation could examine tax- or tariff-based incentive approaches to this problem. The role of the Energy and Agricultural Subcommittee in this review should be to examine the industry, its particular problems, and the potential solutions which lie within the jurisdiction of the Senate Finance Committee.

THE DOMESTIC REFINING INDUSTRY

The role that this Nation's refiners play in serving the overall energy needs of this country cannot be overemphasized. Approximately forty percent of the total energy consumed in the United States consists of petroleum products that presently pass through our domestic refineries. The refining industry itself consumes approximately 12 percent of the total energy used each year in manufacturing. According to a recent survey, there are more than 300 refineries operating in the United States, possessing a cumulative crude oil refining capacity of approximately 17.8 million barrels of crude oil per day. This represents close to 22 percent of the world's refining capacity.

The U.S. refining industry is also one of the largest manufacturing segments of our economy when measured by the value of its output. In 1978 alone, the gross product originating from petroleum refining facilities totaled an estimated $13 billion, which represents 2.5 percent of the product originating in the manufacturing sector and 0.6 percent of our gross national product. Petroleum refineries employed more than 155,000 Americans in 1978 alone, most of whom were highly skilled employees. Indeed, professional and technical workers and craftsmen account for 44 percent of the total employment in petroleum refining.

In summary, petroleum refining is a basic U.S. industry, providing the vital energy input to the rest of American industry. A healthy refining industry will be essential to a healthy U.S. economy—at least for the next two decades.

Most energy experts predict that the U.S. economy will show a moderately declining demand for petroleum products over the next 10 years. This projection is based upon both the depressed world economic situation and the result of higher prices encouraging increased conservation. Proper incentives for investment in energy efficient industrial and residential equipment should accelerate this trend even further.

If these projections hold true, then present U.S. refining capacity of approximately 17.8 million barrels/day should be adequate for our national needs. But all is not as encouraging as such a surface analysis would indicate. Much of present U.S. refining capacity is incapable of producing desirable petroleum products from the high sulfer, low gravity crude oils that increasingly constitute available supply.

Unfortunately, the United States must continue to rely upon approximately 40 percent of our crude oil coming from abroad. Enhanced recovery from older U.S. fields as well as Alaskan crude oil is also less desirable for producing optimal refinery yields from a given barrel. Our Nation's refinery capacity must be flexible in order to respond to the changes in crude oil slates over which we will have little control.

EXISTING DIVERSITY WITHIN THE U.S. REFINING INDUSTRY

Mr. President, one of the objectives of the hearings is to highlight the existing diversity within the U.S. refining industry. Petroleum refining in the United States is represented by four distinct types of refiners. Large integrated refiners, large independent refiners, small independent refiners, and "teakettle or bias refineries" constitute the four main industry segments.

The large, multinational U.S. oil companies are the dominant force in the U.S. refining industry. U.S refineries owned or controlled by these companies represent approximately 70 percent of the total U.S. refining capacity. These refineries produce almost every type of petroleum product, and account for a large percentage of highly refined product such as unleaded gasoline. The companies controlling these U.S. refineries also operate a substantial amount of refining capacity located outside the continental United States. So, while the domestic refining interests of integrated companies are large in terms of total U.S. throughput capacity, these companies cannot be classified as wholly domestic refiners.

Integrated U.S. refiners own or control large volumes of U.S. domestic crude production (approximately 70 percent) and enjoy certain historical relationships with foreign governments which enable them to purchase needed amounts of foreign crude oil at competitive prices.

LARGE INDEPENDENT REFINERS

The refining capacity of this group is generally in excess of 175,000 barrels per day per refiner. Several of these large independent refining companies possess facilities comparable in size and sophistication of those of any of the major integrated oil companies. However, an independent refiner by definition owns or controls less than 30 percent of the crude oil run in his refinery. As a result, these independent refiners will have significant problems with access to crude oil at competitive prices in a decontrolled crude oil marketplace. In fact, a recent crude oil access study released by the Department of Energy indicates that, of late, large independent refiners have had among the highest crude acquisition costs of any segment of the industry.

SMALLER INDEPENDENT REFINERIES

This third segment of the refiining industry represents refineries whose capacities do not exceed 175,000 bbls/day of throughput capacity. This particular segment is a diverse one, including companies whose refining capability varies significantly in terms of the size of the operation as well as the product slate they are capable of processing. Responsible and efficient small independent refiners perform specific functions and serve particular purposes in satisfying the Nation's petroleum product needs.

Small and independent domestic refineries, including cooperative refineries, often provide sparsely populated agricultural areas with the petroleum products such as diesel fuel and propane that are necessary to sustain the farming activities so essential to the economy of these rural regions. In view of such circumstances, it is necessary for Congress to consider the impact that the collapse of these small and independent refining companies would have upon these agricultural regions.

Small and independent refiners have also proved to be an important component of the refining industry in providing a number of lesser known petroleum products. These firms are willing to provide the highly specialized refined petroleum products which larger refiners may prove reluctant to produce due to the limited markets available for these items. For instance, the refining industry produces the specialty chemicals, inks, and petrochemical feedstocks necessary for a variety of dependent industries whose needs might be unfulfilled if this segment of our domestic refining capability were allowed to expire.

Solutions to the problems of access to crude oil at competitive prices and the need to upgrade capacity to process sour, heavy crude oils must be found if the small independent segment of the refining industry is to survive as a competitive force in the U.S. energy industry.

TEAKETTLE OR BIAS REFINERIES

This term is often applied to very small (under 10,000 bbl/day) refineries which were constructed after the imposition of oil price controls in 1973. Many of these refineries were built to take advantage of the "small refiner bias" of the DOE entitlements program.

Though many owners of these refineries have since plowed their profits back into their refineries and upgraded in anticipation of the end of controls—many others have not. The refineries that have not invested in preparation for decontrol cannot remain competitive in the future without a Government subsidy. In my view, sound U.S. energy policy should not be distorted to serve these particular companies.

Unfortunately, many of the editorial comments and uninformed discourses have unfairly branded all small and independent refiners as "tea-kettles." This misperception must be corrected at the outset of any serious discussion on U.S. refinery-policy.

DOMESTIC REFINING AFTER DECONTROL

Mr. President, as the era of oil price controls come to an end, it is important to recognize the possible threat posed by foreign refining to our U.S. refining industry. The entitlements program, for all of its obvious faults, did encourage the refining of substantial volumes of foreign crude oil in U.S. refineries. Integrated U.S. oil companies with overseas production interests and both U.S. and foreign refining capacity found it profitable to refine the higher priced foreign barrel in the U.S. facility. This occurred because the entitlements program paid benefits to those refiners who were running high priced crude oil, which, during the period of price controls, was generally the foreign barrel.

With price controls gone, one existing incentive for U.S. refining will disappear. The natural advantages for refining abroad will, however, remain in place. These advantages include lower labor costs, less onerous environmental restrictions, lower tax rates, and the ability to transport petroleum products in foreign-flag vessels manned with foreign crews.

There is not a sufficient tariff or import fee on refined petroleum products in place to offset this foreign refining advantage. The U.S. tariff schedules presently imposed a tariff on imported refined products of approximately $.52 per barrel. Import fees of $.21 per barrel on crude oil and $.63 on products were suspended by President Carter on April 1, 1979, and have not been collected since that date.

With foreign refineries running at very low utilization rates, there is little to prevent a dramatic upsurge in U.S. imports of refined products now that controls are gone. The uncertainty associated with relying on foreign imports would make it difficult if not impossible to either plan for or anticipate the severe economic dislocations that would occur if a petrolum product embargo were ever imposed on the United States.

Moreover, it has been pointed out that it is much simpler to enforce an embargo on refined products than an embargo on crude oil because the latter can be exchanged frequently in the world market while the former has its destination well known.

Mr. President, any increased reliance on foreign nations for our heating oil and gasoline supplies merits the serious attention of Congress.

Congress must recognize that in a national emergency we must be able to direct our refineries to produce the types of products that our country demands. If we import the raw material we can retain this flexibility. If we must rely on foreign refineries for finished products, we lose this flexibility. It seems important to this Senator that the United States maintain a healthy domestic refining industry within our borders, subject to direction in accordance with our own statutes.

ACCESS TO CRUDE OIL BY DOMESTIC REFINERS

Mr. President, the primary problem confronting the responsible small and independent refining segment today is the inability to obtain equitable access to crude oil at prices which would enable them to remain competitive with the refineries of major international firms and foreign governments.

Major companies have several advantages when crude acquisition costs are assessed. Aside from controlling most domestic production, the majors enjoy long historical relationships with foreign governments who supply crude under long-term contract at prices significantly below the spot market prices that

most independents would be paying in the wake of decontrol. This historical fact of life is an outgrowth of U.S. policy since the 1930's, a practice that utilized major oil companies as an instrument of U.S. foreign policy in certain areas of the world. It should be recognized that producer nations are showing an increasing tendency to supply crude oil in exchange for the transfer of refining technology. International companies, unlike U.S.-based independents, are in a better position to supply technicians and help finance economic development in exchange for favorable long-term crude contracts.

The high costs for crude oil which result from complex international market, coupled with today's uncertainties in acquiring adequate supplies, confront small and independent refiners with the need to finance capital improvements to their facilities at a time that they are unsure of continued existence. The question of whether refiners can continue to operate profitably and pass along crude oil costs increases in their product prices, particularly when competing with the major integrated oil companies, is far from settled. Therefore, the hearings in our subcommittee will inquire into the crude oil access problems of small refiners and the tax based programs that might insure equitable access to crude oil.

UPGRADING DOMESTIC REFINERIES

In addition to equitable access to crude oil, small refiners need to upgrade their U.S. refining capacity. Upgrading must occur if the small and independent industry segment is to remain viable. While the subcommittee hearings will focus first upon the problems associated with access, testimony would be welcomed on the particular problems faced by the U.S. refining industry in obtaining the necessary financing to remain competitive.

SOME SUGGESTED SOLUTIONS

The test solutions to the problems faced by the domestic refining industry are those that do not require thousands of employees in the Department of Energy to administer and that do require a high degree of initiative from the refiners who earn the benefits by planning and investing for the future.

I will describe a few of the ideas that have been raised. There are surely additional ideas that await development. The hearings will provide an occasion for airing and comparing all these proposals.

FOREIGN TAX CREDITS

One such approach which has been suggested would involve amending the foreign tax credit rules in the Internal Revenue Code to provide that income from sales of domestic or foreign crude to unrelated domestic small and independent refiners be treated as foreign source income. Such a provision might include an election whereby the income from such sales would be treated as either foreign extraction income for purposes of computing separate tax limitations in section 907(a) of the Code or as foreign oil-related income for purposes of computing a separate overall limitation under sections 904 and 907 (b). The intention would be simply to neutralize what is perceived to be an existing benefit favoring foreign refining over domestic refining.

Under existing law, there are tax provisions which could favor the sale of crude oil to foreign refiners. International oil companies can increase their utilization of foreign tax credits and avoid a buildup of unusable excess foreign tax credits, which may expire before they can be drawn down, by selling their lowest priced foreign crude—under proper pricing methods—to related foreign refining companies. This effectively allocates income to the related foreign refining company, increases the separate overall limitation on foreign oil related income, makes more foreign tax credits available to offset U.S. tax liability, and increases the overall porfitability of major oil companies. It has been proposed by some segments of the refining industry that these provisions be amended to provide that sales by these companies of domestic or foreign crude oil to small and independent U.S. refiners be treated in the same fashion, regardless of where the sale actually takes place.

This proposed amendment to the Code would narrow the choice between sales of crude oil to foreign refiners and sales to domestic small and independent refiners. It would not create a new tax benefit for major oil companies but merely make available additional foreign tax credits which represent out-of-pocket amounts actually paid by these companies. It would also not deprive the major oil companies of any benefit presently available to them.

A TARIFF APPROACH

Another way that existing incentives for foreign refining can be neutralized is through an adequate tariff or import fee on foreign refined product. Imposing a fee on the importation of crude oil with the allocation of import rights to refiners on a sliding scale has been suggested as another way that crude access problems of independent refiners might be addressed. This could be structured in much the same fashion as the old mandatory oil import program initiated in 1959 under the administration of President Eisenhower.

A fee on crude oil could further stimulate U.S. oil recovery efforts, encourage conservation, and capture revenue for the U.S. Treasury that might otherwise flow to OPEC in the form of premature price increases. A recent January 1981 Forbes magazine article shows in great detail how the OPEC oil pricing strategy works to the long-term disadvantage of our country. A tariff, though raising prices for consumers in the short run, would eventually keep more U.S. dollars in the United States rather than being paid into the coffers of OPEC in the form of higher prices.

TAX INCENTIVES FOR UPGRADING

Present U.S. refining capacity should be adequate for meeting projected demand over the next decade, provided that U.S.-based independents are not forced out of business in large numbers. But, as stated earlier, U.S. refining capacity is not of the right configuration to handle heavier, sour crude oils that increasingly constitute available supply. Much of the needed upgrading must occur in the small refineries of this Nation. Petroleum refining is a very capital-intensive industry, and energy experts predict that up to $20 billion must be spent in the next decade to upgrade existing U.S. capacity.

President Reagan's proposed business tax cuts will do much to encourage this needed investment. Under the administration proposal, refining assets are assigned a depreciable life of 5 years with the regular 10-percent investment tax credit. Additional incentives have been suggested to bring about the much needed investment in both sour crude processing equipment and energy efficient refinery units. These include an additional 10-percent energy tax credit for energy conservation equipment or processes. In the 96th Congress, I introduced S. 3006, a measure designed to hasten investment by industry in energy-efficient processes. I will soon reintroduce similar legislation to stimulate new investments in industrial energy efficiency.

PRIVATELY OWNED CRUDE OIL PURCHASING COOPERATIVE

I have already discussed the difficulty small and independent refiners have in obtaining long-term contracts for foreign crude oil at competitive prices. Some have proposed that this problem could be overcome if independent refiners were permitted to pool their resources in a privately owned and operated, tax-exempt purchasing cooperative. Such an organization, might permit independents to bargain on an equal footing with major oil companies. It would be left to those independents that choose to participate in such a venture to make it succeed. The Federal Farm Credit Administration, including the Banks for Cooperatives, might serve as a good model for such an independent refiners' cooperative.

Additionally, I should note that with the expiration of controls, the Federal Government must become an efficient crude oil purchaser in its own right. The filling of the Strategic Petroleum Reserve will no longer be subsidized through the entitlements program. Such a federally blessed crude oil cooperative, if properly structured, might acquire crude oil for the reserve at a price lower than could be negotiated by the Department of Energy or the Department of Defense.

Mr. President, I have listed a few tax- and tariff-based approaches that could provide a healthy environment for the domestic refining industry. I want to emphasize that I have not endorsed these proposals, nor do I want the Subcommittee on Energy and Agricultural Taxation to limit the hearing to a review of these ideas. I welcome testimony on any other proposals which represent an incentive-based approach to a strong U.S. domestic refining industry. My objective is to examine the problems of this industry, and determine the role that the domestic refining industry will play in forming a sound energy policy for the 1980's.

FINANCIAL DISCLOSURE

Mr. WALLOP. Mr. President, I ask unanimous consent that a letter from the Select Committee on Ethics reminding members and staff of the May 15 public financial disclosure filing be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SELECT COMMITTEE ON ETHICS,
Washington, D.C., March 9, 1981.

DEAR COLLEAGUE: As you are aware, Title I of the Ethics in Government Act of 1978 requires Members to file a public financial disclosure report covering calendar year 1980 on or before May 15, 1981. Forms and instructions applicable to this filing requirement are being sent to you under separate cover.

In addition to this requirement for a report from Members, the Act and Senate Rules provide for three categories of Senate staff who are required to submit a report. These categories are:

(A) Senate employees who meet all of these criteria: (1) they are employed by the Senate on May 15, 1981; (2) they were employed by the Senate for at least 61 days in 1980; and (3) they were paid for at least 60 days in 1980 at or above the rate of pay in effect for GS–16 of the General Schedule. Staff are considered "employed" by the Senate as of May 15, 1981 if they are actually receiving a Senate salary as of that day; those who are carried on the Disbursing Office's records as "When Actually Employed" individuals are *not* Senate employees on that day unless they actually receive payment for services performed on that day. The rates of pay in effect for grade GS–16 during 1980 were $47,889 in the period January 1 to September 30, and $50,112.50 in the period October 1 to December 31.

(B) If a Member does not have an employee on his or her personal staff who meets all three of the criteria enumerated in the preceding paragraph, then he or she is required by the Act to designate an employee as a "Principal Assistant", who must then file a disclosure report on or before May 15, 1981.

(C) Senate employees who were designated, pursuant to Senate Rule 41, to handle political funds at any time during 1980 must file a financial disclosure report on or before May 15, 1981 covering calendar year 1980. If an employee designated to handle political funds is also required to submit a disclosure report due to the requirements set forth in either paragraph (A) or (B) above (that is, salary level and period of employment, or designation as a "Principal Assistant"), then a duplicate report is not required.

The Ethics Committee staff will attempt, with the assistance of the Disbursing Office, to identify those staff who are required to file a report, and to provide them with the necessary forms and instructions. However, it is each individual's responsibility to ascertain whether he or she is obligated to file a report.

Sincerely yours,

MALCOLM WALLOP,
HOWELL HEFLIN.

MESSAGES FROM THE HOUSE

At 11:03 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that pursuant to the provisions of 16 U.S.C. 715a, as amended, the Speaker appoints Mr. DINGELL and Mr. CONTE as members of the Migratory Bird Conservation Commission, on the part of the House.

The message also announced that pursuant to the provisions of section 3(a) of Public Law 86–380, the Speaker appoints the following Members to the Advisory Commission on Intergovernmental Relations, on the part of the House: Mr. FOUNTAIN, Mr. RANGEL, and Mr. BROWN of Ohio.

The message further announced that pursuant to the provisions of section 4 (a) of Public Law 94–118, the Speaker appoints Mr. ZABLOCKI and Mr. CONTE as members of the Japan-United States Friendship Commission, on the part of the House.

ENROLLED BILL SIGNED

The message also announced that the Speaker has signed the following enrolled bill:

H.R. 2166. An act to amend the Energy Policy and Conservation Act to extend certain authorities relating to the international energy program.

The enrolled bill was subsequently signed by the President pro tempore (Mr. THURMOND).

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–586. A communication from the Secretary of Agriculture, transmitting, pursuant to law, a report of the National Advisory Council on Maternal, Infant and Fetal Nutrition; to the Committee on Agriculture, Nutrition, and Forestry.

EC–587. A communication from the Deputy Assistant Secretary of Defense for Installation and Housing, transmitting, pursuant to law, a report on the design and construction supervision, inspection and overhead fees charged by the construction agents for the military construction projects of the Military Departments and the Defense Agencies; to the Committee on Armed Services.

EC–588. A communication from the Secretary of the Army, transmitting, pursuant to law, notification of discovery and disposal of lethal chemical nerve agent munitions at Dugway Proving Ground, Utah; to the Committee on Armed Services.

EC–589. A communication from the Secretary of the Army, transmitting, pursuant to law, notification of intended disposal of chemical munitions at Pine Bluff Arsenal, Ark.; to the Committee on Armed Services.

EC–590. A communication from the Acting Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a proposed foreign military sale to Turkey; to the Committee on Armed Services.

EC–591. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Decisions to be Made on charting Future of DOD's Assault Breaker"; to the Committee on Armed Services.

EC–592. A communication from the Secretary of Housing and Urban Development, transmitting, pursuant to law, a report under the Interstate Land Sales Full Disclosure Act; to the Committee on Banking, Housing, and Urban Affairs.

EC–593. A communication from the Secretary of the Interior, transmitting, pursuant to law, a report on the Teton Dam claims program; to the Committee on Energy and Natural Resources.

EC–594. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Deteriorating Highways and Lagging Revenues: A Need To Reassess the Federal Highway Program"; to the Committee on Environment and Public Works.

EC–595. A communication from the Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on the provision to El Salvador of defense articles, services, and training; to the Committee on Foreign Relations.

EC–596. A communication from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, copies of international agreements other than treaties, entered into by the United States within the previous 60 days; to the Committee on Foreign Relations.

EC–597. A communication from the assistant vice president of the Farm Credit Banks of St. Louis, transmitting, pursuant to law, tables that were inadvertently omitted from the initial report of the Farm Credit Banks of St. Louis Retirement Plan Report; to the Committee on Governmental Affairs.

EC–598. A communication from the Deputy Assistant Secretary of Defense (Comptroller), transmitting, pursuant to law, a report on a proposed alteration to a system of records in the Department of Defense for implementing the Privacy Act; to the Committee on Governmental Affairs.

EC–599. A communication from the Deputy Assistant Secretary of Defense (Comptroller), transmitting, pursuant to law, a report on a proposed alteration to a system of records for the Department of Defense for implementing the Privacy Act; to the Committee on Governmental Affairs.

EC–600. A communication from the Deputy Assistant Secretary of Defense (Comptroller), transmitting, pursuant to law, a report on a proposed alteration to a system of records of the Department of Defense for implementing the Privacy Act; to the Committee on Governmental Affairs.

EC–601. A communication from the Deputy Assistant Secretary of Defense (Comptroller), transmitting, pursuant to law, a report on a proposed alteration to a system of records of the Department of Defense for implementing the Privacy Act; to the Committee on Governmental Affairs.

EC–602. A communication from the Deputy Assistant Secretary of Defense (Comptroller), transmitting, pursuant to law, a report on an alteration to a system of records of the Department of Defense for implementing the Privacy Act; to the Committee on Governmental Affairs.

EC–603. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, legislation adopted by the Council on February 10, 1981; to the Committee on Governmental Affairs.

EC–604. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Federal Employees' Compensation Act: Benefit Adjustments Needed To Encourage Reemployment And Reduce Costs"; to the Committee on Governmental Affairs.

EC–605. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Defense Needs Better System For Assuring Adequate Security At Reasonable Cost on U.S. Bases"; to the Committee on Governmental Affairs.

EC–606. A communication from the Director of the Administrative Office of the United States Courts, transmitting a draft of proposed legislation to authorize additional judicial positions for the Courts of Appeals and District Courts of the United States; to the Committee on the Judiciary.

EC–607. A communication from the Secretary of the American Battle Monuments Commission, transmitting, pursuant to law, the report on the activities of the Commission

under the Freedom of Information Act for calendar year 1980; to the Committee on the Judiciary.

EC–608. A communication from the Acting Administrator of the Veterans' Administration, transmitting, pursuant to law, a report on the activities of the Administration under the Freedom of Information Act for calendar year 1980; to the Committee on the Judiciary.

EC–609. A communication from the Secretary of the Panama Canal Commission, transmitting, pursuant to law, a report on the activities of the Commission under the Freedom of Information Act for calendar year 1980; to the Committee on the Judiciary.

EC–610. A communication from the General Counsel of the Civil Aeronautics Board, transmitting, pursuant to law, the report on the activities of the Board under the Freedom of Information Act for calendar year 1980; to the Committee on the Judiciary.

EC–611. A communication from the Acting Assistant Public Affairs Director for News, Department of Agriculture, transmitting, pursuant to law, the report on the activities of the Department under the Freedom of Information Act for calendar year 1980; to the Committee on the Judiciary.

EC–612. A communication from the Deputy Director of the Central Intelligence Agency (Administration), transmitting, pursuant to law, the report on the activities of the Agency under the Freedom of Information Act for calendar year 1980; to the Committee on the Judiciary.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–21. A petition from a cititzen of North Hollywood, Calif., favoring congressional cooperation with President Reagan's efforts to strengthen the military power of the United States; to the Committee on Armed Services.

POM–22. A petition from a citizen of North Hollywood, Calif., favoring congressional cooperation with President Reagan's efforts to strengthen the military power of the United States; to the Committee on Armed Services.

POM–23. A petition from a citizen of Mission Hills, Calif., favoring congressional cooperation with President Reagan's efforts to strengthen the military power of the United States; to the Committee on Armed Services.

POM–24. A petition from a citizen of Sun Valley, Calif., favoring congressional cooperation with President Reagan's efforts to strengthen the military power of the United States; to the Committee on Armed Services.

POM–25. A petition from a citizen of North Hollywood, Calif., favoring congressional cooperation with President Reagan's efforts to strengthen the military power of the United States; to the Committee on Armed Services.

POM–26. A petition from a citizen of Cuyahoga Falls, Ohio, favoring congressional cooperation with President Reagan's efforts to strengthen the military power of the United States; to the Committee on Armed Services.

POM–27. A resolution of the First Congress of the Federated States of Micronesia; to the Committee on Energy and Natural Resources:

"CONGRESSIONAL RESOLUTION No. 1–130

"Whereas, the one hospital facility serving the 38,650 people of the State of Truk is the Truk hospital built in 1971 and located on the island of Moen; and

"Whereas, the Truk hospital was negligently constructed due to defects in design and the use of inappropriate building materials; and

"Whereas, over the years, the maintenance needed to keep both the hospital's physical plant and equipment in operating condition has not been fully performed, largely because of inadequate funding; and

"Whereas, the initial poor construction and subsequent neglect has caused the Truk hospital to deteriorate to the point where the building structure, electrical system, plumbing and equipment are all in a gross state of disrepair; and

"Whereas, the hospital's deteriorated condition makes it impossible to provide hygienic conditions and to furnish adequate medical care; and

"Whereas, the deterioration of the Truk hospital facilities has been documented in a report dated April 25, 1980, by the Bureau of Public Works of the Trust Territory Government and, most recently, in a report dated September 4, 1980, by a representative of the United States Department of Health and Human Services; and

"Whereas, the deplorable condition of the hospital and attendant lack of needed health services presents a life threatening situation to the residents of Truk; and

"Whereas, the United States as administering authority is obligated under the terms of Article 6 of the Trusteeship Agreement "to protect the health of the inhabitants of the Trust Territory"; now, therefore,

"Be it resolved by the First Congress of the Federated States of Micronesia, Third Special Session, 1981, that the Government of the United States is hereby requested to provide funding of $1.7 million to repair and renovate the Truk hospital; and

"Be it further resolved that it is the sense of the Congress of the Federated States of Micronesia that the present condition of the Truk hospital is the result of negligence on the part of the Trust Territory Administration; and

"Be it further resolved that certified copies of this resolution be transmitted to the United Nations Trusteeship Council; United States Senators Warren Magnuson, Frank Church, Jacob Javits, John Glenn, Jesse Helms, Milton Young, Robert C. Byrd, Thadeus Stevens, Henry Jackson, Mark Hatfield, J. Bennett Johnston, Jr., Daniel K. Inouye, and Spark Matsunaga; Members of the U.S. House of Representatives Jamie Whitten, Silvio Conte, Sidney Yates, Joseph McDade, Clement Zablocki, William Broomfield, Lester Wolff, Tennyson Guyer, Morris Udall, Phillip Burton, Robert Duncan, Donald Clausen, Robert Lagomarsino, Daniel Akaka, Cecil Heftel, and Antonio B. Won Pat; Mr. Rodney Weiher and Mr. Ronald Cogswell in the Office of Management and Budget; Secretary of the Department of the Interior Cecil D. Andrus; Under-Secretary of the Department of the Interior James A. Joseph; Assistant Secretary for Territorial and International Affairs Wallace O. Green; Trust Territory High Commissioner Adrian P. Winkel; the President of the Federated States of Micronesia; the Governor and the Speaker of the legislature, State of Truk; the Chairman of the Commission on Future Political Status and Transition and the Washington Liaison Officer."

POM–28. A resolution of the First Congress of the Federated States of Micronesia; to the Committee on Foreign Relations:

"CONGRESSIONAL RESOLUTION No. 1–129

"Whereas, the Ministry of Science and Technology of the Government of Japan is proceeding with its plans to dump nuclear waste north of the Mariana Islands; and

"Whereas, despite unanimous and vigorous protests of Pacific Island nations and territories lodged against the plans of the Government of Japan to dump nuclear waste in the Pacific Ocean and increasing evidence as to the hazards of such dumping, the Ministry of Science and Technology of the Government of Japan is still proceeding to convert the Pacific Ocean into a nuclear dumping site; and

"Whereas, it has become apparent to this Congress that concerted action by Pacific Island nations and territories against the Government of Japan is necessary to prevent the Pacific Ocean from being converted into a nuclear dumping site; and

"Whereas, Pacific Island nations and territories annually import hundreds of millions of dollars in goods from Japan; and

"Whereas, the threat of a unified boycott by Pacific Island nations and territories of Japanese goods to take effect upon the dumping of nuclear waste north of the Mariana Islands should discourage the Government of Japan in proceeding with its present plans; now, therefore,

"Be it resolved by the First Congress of the Federated States of Micronesia, Fourth Regular Session, 1980, that the President of the Federated States of Micronesia is hereby requested to begin talks with Pacific Island nations and territories to organize a boycott of Japanese goods to take effect upon the dumping of nuclear waste by the Government of Japan north of the Mariana Islands or elsewhere in the Pacific Basin; and

"Be it further resolved that certified copies of this resolution be transmitted to the President of the Federated States of Micronesia; the President of the United Nations Trusteeship Council; the United States Congressional House and Senate Committees on Territories; the United States Senate Committee on Energy and Resources; the United States Secretary of State; the United States Secretary of the Interior; the Prime Minister of Japan; the Japan Minister of International Trade and Industry; the Japan Minister of Science and Technology; the United States Ambassador to Japan; the President of Nauru; the President of the Marshall Islands; the Speakers of the Legislatures of Commonwealth of the Northern Mariana Islands, Guam, Palau, Yap, Truk, Ponape and Kosrae; and the South Pacific Commission."

POM–29. A resolution of the Fifteenth Guam Legislature; to the Committee on Foreign Relations:

"RESOLUTION No. 620

"Be it resolved by the Legislature of the Territory of Guam:

"Whereas, the Legislative Presiding Officers of the Pacific Basin duly vested by their respective citizens in preserving the health, welfare and livelihood of the Pacific island nations met on Guam on August 14 and 15 and jointly adopted a resolution 'pursuing their rights in the International Court of Justice'; and

"Whereas, the Government of Japan has announced its plan to dump low-level radioactive waste into the northwest Pacific in a location approximately 900 kilometers or 600 miles north of the Commonwealth of the Northern Mariana Islands; and

"Whereas, such disposal will adversely affect the marine environment of the Mariana Islands and the health and welfare of all Pacific Basin citizens—fishing and tourism are the only viable industries which can be developed by the Pacific island nations, given their limited natural resources; and

"Whereas, there industries are completely dependent upon a pollution free marine environment; and

"Whereas, the dumping of low-level radioactive waste under or upon the seabeds of those areas of the Pacific over which ocean currents and marine life flow will disrupt the ecosystem of the Pacific Ocean and present a substantial and perpetual threat to the biological and economic integrity of the oceans' natural resources; and

"Whereas, the various island areas in the Pacific Ocean proximate to the territorial waters of many Pacific island nations have

been considered as possible sites for disposal and storage of nuclear waste; and

"Whereas, nuclear scientists cannot guarantee the absolute safety of these programs or that no radioactive material might be released into the ocean; and

"Whereas, any miscalculation could have an irreversible negative impact upon the fishery resources of the Pacific and the health and welfare of the citizens of the Pacific Basin; and

"Whereas, the representatives of the Government of Japan which presented information to the Second Annual Conference—Association of Pacific Basin Chief Executives as to the danger any proposed disposal of radioactive waste would present to the safety, health and welfare of the people of the Pacific Basin; and

"Whereas, the Government of Japan and the Government of the United States are presently conducting studies on the disposal of nuclear waste; and

"Whereas, such efforts should no longer be directed toward the disposal of nuclear waste in the ocean or storage on a Pacific Island; now, therefore, be it

"*Resolved*, that the Guam Legislature, on behalf of the people of Guam, and the Pacific Basin, hereby demand that the Government of Japan halt its planned dumping of nuclear waste materials into international Pacific waters; and be it further

"*Resolved*, that the United States Government and the Government of Japan cease in their efforts to study the feasibility of storing nuclear waste in the Pacific Ocean or on a Pacific Island; and be it further

"*Resolved*, that the United Nations International Court of Justice is hereby requested to require that the Government of Japan and the United States Government cease and desist from disposing low-level radioactive waste in the northwest Pacific Ocean; and be it further

"*Resolved*, that the United Nations is hereby further requested to inquire if countries, not a party to the "London Dumping Treaty", are regularly depositing their spent radioactive wastes in the ocean without the knowledge of the signatures to the abovementioned document; now, therefore, be it

"*Resolved*, that the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the Secretary General of the United Nations; to the Prime Minister of the Government of Japan; to the President of the United States of America; to the Speaker of the House of Councillors of the Japan National Diet; to the Chief Justice and Justices of the International Court of Justice; to the Executive Secretary of the Japan Congress Against Atomic and Hydrogen Bombs (GENSUIKIN); to the United States Ambassador to Japan; to the Presiding Officers of the United States Congress; to the Secretary General of the Asian Parliamentary Union; to the Presiding Officers of the Hawaii State Legislature; to the Presiding Officers of the Northern Marianas Commonwealth Legislature; to the Presiding Officers of the American Samoa Legislature; to the President of the Federated States of Micronesia; to the Governors of the States of Yap, Truk, Ponape, and Kosrae; to the President of the Marshall Islands; to the Presiding Officers of the Marshall Islands Legislature; to the Presiding Officers of the State Legislatures of Yap, Ponape, Kosrae, and Truk; to the Presiding Officers of the Palau Legislature; to the Governor of American Samoa; to the Governor of the Commonwealth of the Northern Mariana Islands; to Guam's Delegate to the United States Congress; to the Northern Marianas Representative to Washington, D.C.; to the Hawaii State Delegation to the United States Congress; and to the Governor of Guam."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, without amendment:

S. 271. A bill to repeal section 222 of the Communications Act of 1934 (Rept. No. 97-25).

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs:

Special Report entitled "Oversight Activities of the Committee on Banking, Housing, and Urban Affairs (Rept. No. 97-26).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry:

C. W. McMillan, of Virginia, to be an Assistant Secretary of Agriculture.

(The above nomination reported from the Committee on Agriculture, Nutrition, and Forestry, with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. BAKER (for Mr. DOLE), from the Committee on Finance:

Angela M. Buchanan, of the District of Columbia, to be Treasurer of the United States.

David B. Swoap, of Virginia, to be Under Secretary of Health and Human Services.

(The above nominations reported from the Committee on Finance, with the recommendation that they be confirmed subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. ROTH, from the Committee on Governmental Affairs:

Ricardo M. Urbina, of the District of Columbia, to be an associate judge of the Superior Court of the District of Columbia.

By Mr. HATCH, from the Committee on Labor and Human Resources:

Thorne G. Auchter, of Florida, to be an Assistant Secretary of Labor.

(The above nomination reported from the Committee on Labor and Human Resources, with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HARRY F. BYRD, JR.:

S. 684. A bill to establish a procedure for a congressional review of agency rules; to the Committee on the Judiciary.

By Mr. HEFLIN (for himself, Mr. FORD, Mr. MATSUNAGA, Mr. HEINZ, Mr. TSONGAS, Mr. MATHIAS, and Mr. RIEGLE):

S. 685. A bill to accelerate the development and utilization of laser and particle beam technology, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. HEFLIN:

S. 686. A bill to amend the Internal Revenue Code of 1954 to provide for a deduction for expenses for legal services; to the Committee on Finance.

S. 687. A bill to amend the Internal Revenue Code of 1954 to provide an additional personal exemption for the taxpayer, the taxpayer's additional spouse, or a dependent, who has a disability requiring the use of a wheelchair; to the Committee on Finance.

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S. 688. A bill to amend titles XVIII and XIX of the Social Security Act to provide that community mental health center services shall be covered under part B of medicare and shall be a required service under medicaid; to the Committee on Finance.

By Mr. HEINZ (for himself, Mr. PRESSLER, Mr. BIDEN, and Mr. PERCY):

S. 689. A bill to amend section 307 of the Veterans Health Programs Extension and Improvement Act of 1979 to require the promulgation of regulations containing guidelines for resolving claims for veterans' benefits based on exposure to Agent Orange, and for other purposes; to the Committee on Veterans Affairs.

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S. 690. A bill to authorize the Secretary of the Navy to sell certain harbor craft to Indo-Pacific Fisheries, Inc.; to the Committee on Armed Services.

By Mr. THURMOND:

S. 691. A bill to amend titles 18 and 17 of the United States Code to strengthen the laws against record, tape, and film piracy and counterfeiting, and for other purposes; to the Committee on the Judiciary.

By Mr. BRADLEY (for himself, Mr. PACKWOOD, Mr. DANFORTH, and Mr. TSONGAS):

S. 692. A bill to amend the Internal Revenue Code of 1954 to provide taxpayers engaged in a trade or business a credit against income tax for amounts contributed to a reserve the payments from which must be used for research and experimentation by institutions of higher education and to provide a deduction for such payments; to the Committee on Finance.

By Mr. BENTSEN:

S. 693. A bill for the relief of Elena Cazimir and Marius Cazimir; to the Committee on the Judiciary.

By Mr. TOWER (for himself and Mr. STENNIS) (by request):

S. 694. A bill to authorize supplemental appropriations for fiscal year 1981 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and for research development, tests, evaluation, and to increase the authorized personnel strength for military and civilian personnel of the Department of Defense, and for other purposes; to the Committee on Armed Services.

By Mr. LUGAR:

S. 695. A bill to amend the formula used for reapportionment; to the Committee on the Judiciary.

By Mr. DANFORTH:

S. 696. A bill to amend the Internal Revenue Code of 1954 to treat as public charities certain organizations which operate libraries; to the Committee on Finance.

By Mr. HELMS:

S. 697. A bill to amend the Internal Revenue Code of 1954 to permit certain multiyear pension plan distributions to be treated as qualifying rollover distributions; to the Committee on Finance.

By Mr. DECONCINI:

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S. 688. A bill to amend titles XVIII and XIX of the Social Security Act to provide that community mental health center services shall be covered under part B of medicare and shall be a required service under medicaid; to the Committee on Finance.

MENTAL HEALTH SERVICES UNDER MEDICARE AND MEDICAID

● Mr. INOUYE. Mr. President, today I am introducing legislation on behalf of Senator MATSUNAGA and myself that would amend our Nation's Social Security Act in order to insure that appropriate mental health centers will be directly reimbursable under both the medicare and medicaid programs.

Since our medicare and medicaid laws were first enacted in 1965, the scope of the mental health benefits has not been amended. During this 15 years of experience that we have had in administering the programs, there have, however, been a number of other substantive changes that the Congress felt were appropriate.

There no longer can be any question that our Nation's mental health professionals made major strides in both defining the practicalities of what are, in fact, mental health services and identifying those target populations which would benefit from mental health expertise Unfortunately, however, as the Senate Finance Committee's hearings in August of 1978 clearly demonstrated, there is no unity within the mental health professions nor the consumers of the mental health services as to what types of services or what providers should be reimbursed under the Social Security Act. Accordingly, Senator MATSUNAGA and I are today introducing legislation that we feel is a reasonable attempt to address both the issues that have not yet been resolved and at the same time, provide for an increased benefit package under the Social Security Act.

The first major policy that we are addressing in this legislation is that, in fact, our Nation's community mental health centers should be directly reimbursable under the Social Security Act. As evidenced by the recommendations of the President's Commission on Mental Health, the network of community mental health centers that has evolved over the past decade has a long and glorious history of being truly responsive to the needs of our Nation's consumers. Accordingly, we are now confident that they do have the professional and the administrative integrity needed to participate in social security programs.

Along with specifically focusing upon utilizing community mental health centers as an appropriate vehicle in providing mental health services, we have also adopted the recommendation of the President's Commission on Mental Health that each of the four traditional mental health disciplines should be directly reimbursed for those services that they provide within the scope of their own State licensing or certification acts. At the same time, we strongly feel that it is important to provide for interdisciplinary peer review within each mental health center. Accordingly, we have attempted to amend the present medically oriented social security regulations with a more dynamically oriented approach that reflects the realities of mental health treatment by requiring:

First. That each of our four disciplines shall be able to bill for their professional services, and;

Second. That interdisciplinary peer review mechanisms will be in place to insure that the services are safe, effective, and appropriate.

We are quite confident that each of these four traditional disciplines has the ability to refer to another type of practitioner when he or she feels that such additional expertise would be appropriate. I would also like to note that we have spelled out specific legislative criteria for defining each of the four disciplines which is the highest level of training offered by each one.

In deciding that community mental health centers should be reimbursed for their services, we were faced with the dilemma that there are different types of services that, in fact, such centers provide. Our proposal, as indicated earlier, would allow each of the four mental health disciplines to be reimbursed for "their professional services" by which we mean consumers would be able to receive visits for drugs, psychological testing, and individual or family or group psychotherapy. We have specifically authorized reimbursement for up to 15 visits per year, per patient, and upon approval by an interdisciplinary review committee, an additional 30 visits. There are, however, a number of services such as day care, dance therapy, recreational therapy, occupational therapy, psychodrama, and so forth, that we, in all can-

dor, question as to whether these should be reimbursed on a fee-for-service basis. Accordingly, our proposal would direct the Secretary of the Department of Health and Human Services to spell out in regulations what types of supportive services should be provided, and under what conditions. We feel that this is the type of administrative decision that the Secretary should make after consultation with the appropriate professional disciplines.

I sincerely hope that the Senate Finance Committee will be able to hold additional hearings this year on the scope of mental health benefits under the Social Security Act and at that time, the committee will look very closely at the possibility of reimbursing community mental health centers. From all the information that I have reviewed, we will not be able to contain our ever-escalating cost of physical health care unless we aggressively make available the appropriate delivery of mental health services. There seems very little doubt that well over half of the current visits being made to our physical health care system are really made by individuals who have emotional, rather than organic etiology for their physical symptoms. This I can assure you is an extraordinarily expensive way of not meeting real and pressing needs.

I request unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 688

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1832(a)(2) of the Social Security Act is amended—

(1) by striking out "and" at the end of subparagraph (E);

(2) by striking out the period at the end of subparagraph (F) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new subparagraph:

"(G) community mental health center services, subject to the limitations in section 1861 (dd).".

(b) Section 1833(c) of such Act is amended—

(1) by redesignating paragraphs (1) and (2) as subparagraphs (A) and (B);

(2) by inserting "(1)" after "(c)"; and

(3) by adding at the end thereof the following new paragraph:

"(2) In making the determination under paragraph (1), there shall not be included any expenses incurred by an individual for community mental health center services with respect to which payment is authorized to be made on his behalf under this part.".

(c) Part C of title XVIII of such Act is amended by adding at the end thereof the following new subsection:

"COMMUNITY MENTAL HEALTH CENTER SERVICES

"(dd)(1)(A) The term 'community mental health center services' means the following items and services provided to a patient by a community mental health center (as defined in paragraph (2) by an employee of such center:

"(i) Professional services provided by a mental health specialist (as defined in paragraph (3)).

"(ii) Supportive services provided by such center to its patients as the Secretary determines to be appropriate, furnished under the supervision of a mental health specialist.

"(iii) Drugs and biologicals which cannot, as determined in accordance with regulations be self-administered, and which are furnished by the center (or prescribed by an employee of the center) under the supervision of a mental health specialist.

"(B) No service shall be considered to be a community mental health center service for purposes of subparagraph (A) unless such service—

"(i) in the case of an individual who is an outpatient, is reasonable and necessary in order to prevent the institutionalization of such individual, to prevent such individual from being unable to carry out activities in society which are generally accepted as being necessary for independent functioning; or to prevent such individuals from being a danger to himself or others; or

"(ii) in the case of an individual who is an inpatient, is reasonable and necessary in order to diagnose or treat a mental condition which necessitates diagnosis or treatment on an inpatient basis, and can be reasonably expected to improve, or prevent the deterioration of, such condition.

"(2) The term 'community mental health center' means a public or voluntary community-based nonprofit facility which—

"(A) meets the definition of a community mental health center under section 101 of the Mental Health Systems Act;

"(B) maintains clinical records on all patients;

"(C) has bylaws in effect with respect to its staff which require that all services be rendered under the supervision of a mental health specialist; and

"(D) has in effect a utilization review plan for purposes of making determinations required under paragraph (4), which provides for a multidiscipline utilization review committee composed of mental health specialists.

"(3)(A) The term mental health specialist' means an individual who is—

"(i) a clinical psychologist (as defined in subparagraph (B)):

"(ii) a clinical social worker (as defined in subparagraph (C)):

"(iii) a psychiatric nurse specialist (as defined in subparagraph (D)); or

"(iv) a psychiatrist (as defined in subparagraph (F)).

"(B) The term 'clinical psychologist' means an individual who—

"(i) is licensed or certified at the independent practice level of psychology by the State in which he so practices;

"(ii) possesses a doctorate degree in psychology from a regionally accredited educational institution, or for those individuals who were licensed or certified prior to January 2, 1978, possess a master's degree in psychology and is listed in a national register of mental health service providers in psychology which the Secretary deems appropriate: and

"(iii) possesses two years of supervised experience in health service, at least one year of which is post degree.

"(C) The term 'clinical social worker' means an individual who—

"(i)(I) possesses a master's or doctor's degree in social work,

"(II) after obtaining such degree has performed at least two years of supervised clinical social work, and

"(III) is licensed or certified as a clinical social worker in the State in which the individual performs the community mental health center services; or

"(ii) is listed in a national register of social workers who, by education and experience, qualify as health care providers in clinical social work.

"(D) The term 'psychiatric nurse specialist' means an individual who—

"(i) is licensed to practice nursing by the State in which the individual practices nursing;

"(ii) possesses a master's degree or higher degree in psychiatric nursing or a related field from an accredited educational institution; and

"(iii) is certified as a psychiatric nurse by a duly recognized national professional nurse organization.

"(E) The term 'psychiatrist' means a physician who—

"(i) is described in clause (1) of section 1861(r); and

"(ii) is board certified by the American Board of Psychiatry and Neurology or has successfully completed a minimum of three years of approved graduate medical training in psychiatry.

"(4)(A) Except as provided in subparagraph (B), the number of visits for services of a mental health specialist for which payment may be made under this part as community mental health center services shall not exceed 15 visits in any calendar year for any individual.

"(B) Payment may be made for community mental health center services under this part for up to 30 visits for services of a mental health specialist, in addition to the visits for which payment is authorized under subparagraph (A), if such additional visits are approved by the utilization review committee of the facility providing such services as being medically or psychologically necessary.".

(d) Section 1861(u) of such Act is amended by inserting "community mental health center," after "detoxification facility.".

(e) Section 1864(a) of such Act is amended—

(1) by striking out "or a comprehensive outpatient rehabilitation facility as defined in section 1861(cc)(2)" and inserting in lieu thereof ", a comprehensive outpatient rehabilitation facility as defined in section 1861 (cc)(2), or a community mental health center as defined in section 1861(dd)(2)"; and

(2) by inserting "community mental health center," after "comprehensive outpatient rehabilitation facility," each place it appears.

SEC. 2. (a) Section 1905(a) of the Social Security Act is amended—

(1) by striking out "and" at the end of paragraph (17);

(2) by redesignating paragraph (18) as paragraph (19); and

(3) by inserting after paragraph (17) the following new paragraph:

"(18) community mental health center services (as defined in section 1861 (dd)), subject to the same limitations with respect to numbers of visits for any individual as apply under title XVIII to individuals eligible for benefits under that title; and".

(b) Section 1902(a) of such Act is amended—

(1) by striking out "paragraphs (1) through (5) and (17)" in paragraph (13)(B) and inserting in lieu thereof "paragraphs (1) through (5), (17), and (18)";

(2) by striking out "paragraphs (1) through (5) and (17)" in paragraph (13)(C)(i) and inserting in lieu thereof "paragraphs (1) through (5), (17), and (18)";

(3) by striking out "paragraphs numbered (1) through (17)" in paragraph (13)(C)(ii) and inserting in lieu thereof "paragraphs numbered (1) through (18)"; and

(4) by striking out "paragraphs (1) through (5), (7), and (17)" in paragraph (14)(A)(i) and inserting in lieu thereof "paragraphs (1) through (5), (7), (17), and (18)".

SEC. 3. (a) The amendments made by the first section of this Act shall be effective with respect to services performed on or after the first day of the first month which

begins more than 60 days after the date of the enactment of this Act.

(b)(1) Except as provided under paragraph (2), the amendments made by section 2 shall be effective with respect to payments under title XIX of the Social Security Act for calendar quarters beginning more than 60 days after the date of the enactment of this Act.

(2) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary of Health and Human Services determines requires State legislation in order for the plan to meet the additional requirements imposed by the amendments made by section 2, the State plan shall not be regarded as failing to comply with the requirements of such title solely on the basis of its failure to meet these additional requirements before the first day of the calendar quarter beginning after the close of the first regular session of the State legislature that begins after the date of the enactment of this Act.●

By Mr. HEINZ (for himself, Mr. PRESSLER, Mr. BIDEN, and Mr. PERCY):

S. 689. A bill to amend section 307 of the Veterans Health Programs Extension and Improvement Act of 1979 to require the promulgation of regulations containing guidelines for resolving claims for veterans' benefits based on exposure to agent orange, and for other purposes; to the Committee on Veterans' Affairs.

GUIDELINES FOR RESOLVING VETERANS CLAIMS REGARDING AGENT ORANGE

● Mr. HEINZ. Mr. President, the purpose of this bill is really quite straightforward. It is very similar to an amendment I offered to S. 1188, the Disabled Veterans Rehabilitation Act of 1980, on September 4, 1980. It quite simply requires the VA to promulgate regulations containing guidelines to resolve the claims of veterans' benefits based on exposure to agent orange.

This addresses, in other words, one of the most serious problems still confronting Vietnam veterans and their families, the toxic effects of the herbicide agent orange. In the last few years over 10,000 veterans have gone to the VA for treatment of agent orange-related problems resulting from skin and nervous disorders to malfunctions of internal organs and cancer.

Nor is this problem restricted to veterans. Among alleged effects are birth defects in offspring.

In recognition of the serious nature of this problem, Congress has directed the VA to conduct a wide-ranging epidemiological study of those Vietnam veterans who were exposed to agent orange. This study is just beginning and it will be at least a year before the initial findings are reported to Congress.

Mr. President, it has already been 13 years since agent orange was identified as a hazard to humans, and considerable scientific evidence exists indicating its harmful effects. Yet of the 5,025 claims which the VA has received as of November 30, 1980 for in-service exposure to herbicides, only 23 claims have been allowed. It is understandable, therefore, when many Vietnam veterans express frustration and hostility toward the efforts of their Government to respond to their pleas for help.

It is the purpose, therefore, of my bill to remove obstacles that could block compensation to veterans for agent orange, and to insure the timely consideration by the VA of findings causally linking agent orange to diseases in humans.

Since the Vietnam veteran is being told that there are insufficient data to rule on his claim for compensation, it is important that he be given assurance that every effort will be made to evaluate new evidence obtained from the VA study just as soon as possible. To accomplish this objective my bill requires the VA to develop regulations which define what conditions of service establish exposure to agent orange and what symptoms medical research has shown to be caused by agent orange. I would like to point out that the bill does not prejudge the findings of the VA epidemiological study and does not compel the VA to take any action which is not justified by the existing scientific evidence at the time.

I would also like to make clear that although this bill does not include a specific mandate that the VA's final regulations include a particular presumption framework, it is my undertanding that if the VA determines that there are disabilities causally related to exposure, then the VA will have to adjudicate individual claims for those disabilities through a presumption framework. Any other approach would result in massive and unacceptable inequities.

There is no way that individual veterans can prove that their disabilities are specifically and individually related to exposure that occurred one to two decades ago. My belief that the VA must proceed this way is reinforced by a belief that the VA will in fact proceed through a presumption framework because that is both consistent with the statutory framework for adjudicating claims, which itself proceeds through presumptions, and is also consistent with the VA's administrative practice of giving veterans the benefit of the doubt. Indeed, in the VA's recent decision to grant service-connection status to certain cardiovascular disabilities that developed after service in veterans with certain service-connected amputations, the VA adjudicated claims through a presumption framework. Accordingly, at this time I can understand that it is not necessary to include a specific requirement, but I remain convinced that the final regulations must include a presumption framework of some sort.

There are three additional points about my bill that I want to highlight. First, Mr. President, I want to note my understanding that, although my bill calls for action by the VA Administrator to issue proposed regulations not later than 90 days after the submission of the first report, and not later than 90 days after each subsequent report, on the VA's epidemiological study, the bill does not expressly preclude, and is not intended to prevent, the Administrator from taking such action at any earlier time, and indeed the text makes this point explicitly. In fact, I believe that the Administrator should develop and promulgate regulations providing guidelines for the resolution of agent orange-related claims at any earlier point at which he has information warranting specific guidelines for one or more specific types of claims for VA benefits based on exposure to agent orange.

In this regard, I would also note that the bill is not restricted to requiring action on the study results alone but also on other available pertinent information at the time the proposed regulations are issued. It seems to me that this is a clear recognition that other information may be developed on the basis of which the Administrator could act and that such information is not limited to information available at the time of the study. By including a reference to other pertinent information, the bill makes the important point that although the results of the study are important, those results will not and should not be the only basis for action.

Let me also stress that the purpose of the bill is to require the VA to conduct rulemaking once reliable results of the study are available. I am aware that the VA has yet to conduct public rulemaking on the rules it now uses to decide claims for agent orange-related disabilities. Indeed, I encourage the VA to allow public participation in all agency decisions made before the study is completed. And I understand that such action is the subject of a lawsuit filed in Federal District Court in Washington, D.C., White against Administrator Cleland. This bill is not intended to affect or influence in any way the outcome of this litigation or any rules that may or should be promulgated before the study is completed.

A second point about my bill that I want to highlight is the absence of any specific mention of genetic damage or birth defects in the bill itself. In the amendment that I offered in January 1980, I had included specific reference to this issue and provided a mechanism by which birth defects in the children of Vietnam veterans might be compensated for, should such a health problem be linked to their parents' exposure to agent orange. Such reference was not included in my amendment of September 4, 1980 to S. 1188 nor in today's bill because, in my discussions with the Veterans' Affairs Committee, I have become convinced that it would be more appropriate for the Congress to fashion any suitable legislation needed to provide compensation and health-care benefits for a child of a veteran only after Congress would have before it definitive data indicating that the birth defects do result from genetic damage due to exposure to a particular chemical during service—if that should prove to be the case. Once any such data is provided, I am confident that the Veterans' Affairs Committee and the Congress would respond promptly and properly to the need for such legislation in light of the particular facts shown to exist.

Nevertheless, I remain very concerned about this aspect of the agent orange issue, and stress that the study itself will include a focus on the question on genetic damage—as one of many alleged "long-

term adverse health effects" to be investigated—and that the provisions requiring the Administrator's recommendations on any study findings or other data to include recommendations "for administrative or legislative action, or both" would provide a firm for the consideration of legislative action, as indicated, to address problems related to genetic damage.

Finally, I wish to stress that this bill is not intended to affect or influence in any way litigation in connection with the VA's initial notice regarding the contracting process on the original request for proposal issued pursuant to Public Law 96–151, which is also the subject of a GAO investigation requested by several Members of Congress. I do not intend by this bill to interfere with the orderly processes of the courts and the investigating arm of Congress.

Mr. President, I worked very hard with Senate Veterans' Committee to structure this bill so that the committee could be supportive of it. I believe that it is the minimum we should be doing to insure that our Nation's veterans are awarded the benefits they are owed and, I believe, the minimum required to restore the Vietnam veterans' faith in the Government's efforts to address this problem thoroughly and expeditiously.

I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 689

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 307 of the Veterans Health Programs Extension and Improvement Act of 1979 (Public Law 96–151; 38 U.S.C. 219 note) is amended—

(1) by inserting "for administrative or legislative action, or both," after "recommendations" in subsection (b)(2); and

(2) by adding at the end of subsection (b) the following new paragraph:

"(3)(A)(i) Not later than ninety days after the submission of each report provided for in paragraph (2), the Administrator shall, based upon the results described in each such report and the comments and recommendations thereon and any other available pertinent information, develop and publish in the Federal Register, for public review and comments, proposed regulations containing proposed guidelines, standards, and other criteria (together with an explanation of the bases for such proposed guidelines, standards, and criteria) for resolving claims for benefits administered by the Veterans' Administration based on exposure to Agent Orange during service in the Armed Forces of the United States in the Republic of Vietnam during the Vietnam conflict.

"(ii) Proposed regulations developed and published pursuant to division (i) of this subparagraph shall include specification of any presumptions (including any presumptions regarding service and exposure) to be applied to the resolution of the claims to which such proposed guidelines, standards, and criteria in such proposed regulations apply.

"(iii) Notwithstanding any other provision of law, the public review and comment process required by division (i) of this subparagraph shall be conducted in accordance with the provisions of sections 553 (b) and (e), 556, and 557 of title 5, United States Code.

"(iv) On the same day as such proposed regulations are published as required by division (i) of this subparagraph, the Administrator shall submit to the appropriate committees of the Congress any recommendations for legislative action that the Administrator considers appropriate in light of such proposed guidelines, standards, and criteria, the report submitted pursuant to paragraph (2), and any other available pertinent information.

"(B) Not later than ninety days after the completion of the public review and comment process provided for in subparagraph (A)(i) and (iii), the Administrator shall publish in the Federal Register final regulations containing the guidelines, standards, and other criteria (together with an explanation of the bases for such guidelines, standards, and criteria) for resolving the claims involved.

"(C) Nothing in subparagraph (A) or (B) shall be considered to limit in any way the discretion and authority of the Administrator to promulgate or prescribe regulations, guidelines, standards, or other criteria for resolving any claims described in subparagraph (A)(i) at any time earlier than the time prescribed in subparagraph (A) for the publication of the proposed regulations described in such subparagraph.

"(D) The Administrator's compliance with the provisions of, and any regulations promulgated pursuant to, this paragraph shall be subject to judicial review in accordance with the provisions of chapter 7 of title 5, United States Code.".●

By Mr. INOUYE (for himself, and Mr. MATSUNAGA):

S. 690. A bill to authorize the Secretary of the Navy to sell certain harbor craft to Indo-Pacific Fisheries, Inc.; to the Committee on Armed Services.

SALE OF CERTAIN VESSELS TO INDO-PACIFIC FISHERIES, INC.

● Mr. INOUYE. Mr. President, I am introducing today a bill which would authorize the Secretary of the Navy to sell to Indo-Pacific Fisheries, Inc., a firm based in Hawaii, any or all of the following vessels—YW83, YOG68, YW86, YW126, YO174, YW101, YOG79—which are no longer needed by the Navy, for conversion and operation in the fisheries of the United States.

The vessels are surplus Navy tankers presently located at the Naval Inactive Ship Maritime Facility at Pearl Harbor, Hawaii. Indo-Pacific Fisheries, Inc., wishes to convert and subsequently operate these vessels in the U.S. fisheries in the mid-Pacific, as "mother ships" which would offload and resupply small catcher vessels.

In addition to allowing the acquisition and use of these surplus vessels by this Hawaii firm, enactment of this bill would help our Government to better promote domestic fisheries development and decrease American reliance on imported fisheries products. As these vessels will be based in Hawaii after they have been refitted and will be a major addition to the local fleet, the State of Hawaii strongly supports their sale to Indo-Pacific Fisheries, Inc.

I believe that this bill would significantly benefit the fishing industry in Hawaii as well as the Federal Government by facilitating the attainment of optimal fisheries production and efficiency, and I urge my colleagues to give it early and favorable consideration.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 690

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding any other provision of law, and subject to the provisions of section 2, the Secretary of the Navy is authorized, at any time within one year after the date of the enactment of this Act, to sell to Indo-Pacific Fisheries, Inc., any or all of the following harbor craft which are no longer needed by the Navy: YW83, YW86, YOG 68, YW126, YO174, YW101, YOG79.

Sec. 2. Any harbor craft sold under the first section shall be sold at a price equal to the fair market value of such craft, as determined by the Secretary of the Navy.●

By Mr. THURMOND:

S. 691. A bill to amend titles 18 and 17 of the United States Code to strengthen the laws against record, tape, and film piracy and counterfeiting, and for other purposes; to the Committee on the Judiciary.

PIRACY AND COUNTERFEITING AMENDMENTS ACT OF 1981

Mr. THURMOND. Mr. President, today I am introducing a bill to provide Federal law enforcement authorities with better tools to meet the increasing problem of massive and extremely lucrative counterfeiting and piracy of records, films, tapes, and video reproductions. I might add that this proposal was essentially incorporated into the Federal Criminal Code bill last Congress and had the support of the Department of Justice.

Mr. President, in recent years that has been a rapid growth in record, tape, and film piracy and counterfeiting. This is hardly surprising, considering the tremendous technological breakthroughs in record-tape reproductions and the development of home video systems. Everyone in the legitimate chain of the creative process loses—the artists, actors, actresses, musicians, producers, publishers, directors, and others. In addition, the revenues at all levels of government are avoided.

In 1979, it was estimated that the volume of record counterfeiting amounted to more than $250 million a year. Record and film counterfeiting and piracy combined drained an estimated $650 million annually from legitimate sales and rentals in these industries. It is not uncommon to have a single operation produce an annual profit of $30 million a year. Because of the high profitability of these activiites, law enforcement officials believe that organized crime has become increasingly involved.

Mr. President, the deficiencies perceived in current law are a result of inadequate penalties and closing a few loopholes. Current 18 U.S.C. 2318, for example, is directed at illicit sound recordings in interstate commerce. The penalty is a misdemeanor for the first offense and a 2-year felony for any subsequent offense. Inexplicably, there is no crime at all unless the record, disc, cassette cartridge, or other container actually has a counterfeit label affixed—thereby exempting the transporter of the goods if he is wise enough to keep the

container and counterfeit label separated until those articles have come to rest at their destination. The present copyright laws—17 U.S.C. 506(a)—provide similarly inadequate penalties for relatively large-scale piracy and counterfeiting activities.

Mr. President, the measure I am introducing would do the following:

First, it would amend 18 U.S.C. 2318 to make it a 5-year felony (with a $250,000 fine) to knowingly transfer for profit, or possess with intent to so transfer, a counterfeit label that is affixed, or that is designed to be affixed, to a phonorecord or a copy of a motion picture or an audiovisual work. Federal jurisdiction occurs if the offense is committed first, within the special territorial, maritime, or aircraft jurisdiction of the United States; second the mail or a facility of interstate or foreign commerce is used in the commission of the offense; or third, the counterfeit label is for a copyrighted audiovisual work or motion picture or a phonorecord of a copyrighted sound recording.

Second, the bill adds a new section 2319 to title 18 to incorporate by reference the criminal infringement of a copyright offense defined in 17 U.S.C. 506(a) and to establish more appropriate penalties. A copyright offense involving at least 1,000 phonorecords or at least 65 films within any 180-day period, or a repeat offender, would be punishable by a fine of $250,000, or imprisonment for 5 years, or both. A copyright offense involving 101 to 999 phonorecords or 8 to 64 films would carry a penalty of $250,000 fine, or imprisonment for 2 years, or both. Any other violation of the section would be a 1-year misdemeanor with a fine of $250,000.

Finally, certain technical changes are included, such as adopting title 17 definitions by reference.

Mr. President, I ask unanimous consent that the bill I am introducing be printed in the RECORD following these remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 691

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Piracy and Counterfeiting Amendments Act of 1981".

SEC. 2. Section 2318 of title 18, United States Code, is amended to read as follows:

"§ 2318. Trafficking in counterfeit labels for phonorecords, and copies of motion pictures, and audiovisual works

"(a) Whoever, in any of the circumstances described in subsection (c) of this section, knowingly traffics in a counterfeit label affixed or designed to be affixed to a phonorecord, or a copy of a motion picture or an audiovisual work, shall be fined not more than $250,000 or imprisoned for not more than five years, or both.

"(b) As used in this section—

"(1) the term 'counterfeit label' means an identifying label or container that appears to be genuine, but is not;

"(2) the term 'traffic' means to transfer, or otherwise dispose of, to another, as consideration for anything of value or obtain control of with intent to so transfer or dispose; and

"(3) the terms 'copy', 'phonorecord', 'motion picture', and 'audiovisual work' have, respectively, the meanings given those terms in section 101 (relating to definitions) of title 17.

"(c) The circumstances referred to in subsection (a) of this section are—

"(1) the offense is committed within the special maritime and territorial jurisdiction of the United States or within the special aircraft jurisdiction of the United States (as defined in section 101 of the Federal Aviation Act of 1958);

"(2) the mail or a facility of interstate or foreign commerce is used in the commission of the offense; or

"(3) the counterfeit label is affixed to or encloses, or is designed to be affixed to or enclose, a copyrighted audiovisual work or motion picture, or a phonorecord of a copyrighted sound recording.".

SEC. 3. Title 18, United States Code, is amended by inserting after section 2318 the following new section:

"§ 2319. Criminal infringement of a copyright

"(a) Whoever violates section 506(a) (relating to criminal offenses) of title 17 shall be punished as provided in subsection (b) of this section.

"(b) Any person who commits an offense under subsection (a) of this section—

"(1) shall be fined not more than $250,000 or imprisoned for not more than five years, or both, if the offense—

"(A) involves the reproduction or distribution, during any one hundred and eighty-day period, of at least one thousand phonorecord or copies infringing the copyright in one or more sound recordings;

"(B) involves the reproduction or distribution, during any one hundred and eighty-day period, of at least sixty-five copies infringing the copyright in one or more motion pictures or audiovisual works; or

"(C) involves a sound recording, motion picture, or audiovisual work, and is a second or subsequent offense under this section;

"(2) shall be fined not more than $250,000 or imprisoned for not more than two years, or both, if the offense—

"(A) involves the reproduction or distribution, during any one hundred and eighty-day period, of more than one hundred but less than one thousand phonorecord or copies infringing the copyright in one or more sound recordings; or

"(B) involves the reproduction or distribution, during any one hundred and eighty-day period, of more than seven but less than sixty-five copies infringing the copyright in one or more motion pictures or audiovisual works; and

"(3) shall be fined not more than $25,000 or imprisoned for not more than one year, or both, in any other case.

"(c) As used in this section—

"(1) the terms 'sound recording', 'motion picture' 'audiovisual work', 'phonorecord', and 'copies' have, respectively, the meanings set forth in section 101 (relating to definitions) of title 17; and

"(2) the terms 'reproduce' and 'distribute' have, respectively, the meanings set forth in section 106 of title 17."

SEC. 4. The table of sections for chapter 113 of title 18 of the United States Code is amended by striking out the item relating to section 2318 and inserting in lieu thereof the following:

"2318. Trafficking in counterfeit labels for phonorecords and copies of motion pictures and audiovisual works.
"2319. Criminal infringement of a copyright."

SEC. 5. Section 506(a) of title 17, United States Code, is amended to read as follows:

"(a) Criminal Infringement.—Any person who infringes a copyright willfully and for purposes of commercial advantage or private financial gain shall be punished as provided in section 2319 of title 18.".

By Mr. BRADLEY (for himself, Mr. PACKWOOD, Mr. DANFORTH, and Mr. TSONGAS):

S. 692. A bill to amend the Internal Revenue Code of 1954 to provide taxpayers engaged in a trade or business a credit against income tax for amounts contributed to a reserve the payments from which must be used for research and experimentation by institutions of higher education and to provide a deduction for such payments; to the Committee on Finance.

RESEARCH REVITALIZATION ACT

Mr. BRADLEY. Mr. President, this country's declining productivity is of grave concern for the future of our economy. Yet the administration's tax bill presently lacks any focused approach to stimulate the type of investment most likely to enhance productivity. Indeed, the recommended "10-5-3 accelerated cost recovery system" is likely to do just the opposite by promoting investment in large, capital intensive plants and equipment. Subsidizing such investments could well lower, not raise, overall productive efficiency.

Accordingly, what is needed is legislation to promote innovation, competitiveness and technological progress. The legislation which Senators PACKWOOD, DANFORTH, TSONGAS and I are introducing today remedies this imbalance by providing a tax incentive for research. Under our legislation, business will be encouraged to contribute funds to universities for research and development.

Our bill will achieve the dual objective of facilitating the transfer of knowledge from the university to the business community and increasing the amount of funds available for research at universities.

I have intentionally mentioned the "transfer of knowledge" function first because I believe it to be the most important. I envision that the direct contact between university and industry scientists will stimulate the technology transfer which is so vital in recovering this country's competitive position in the world.

Under this legislation, a business taxpayer would receive a 25-percent credit against income tax for amounts contributed to a research reserve trust. The credit shall not exceed 5 percent of the business' taxable income. A deduction would be allowed for the taxable year during which the amounts were paid out of the research reserve. Contributions to the reserve must be spent within 4 years. The definition of qualifying research in this bill is designed to be in concert with the appropriate functions of an institution of higher education. It includes both "basic" research and research that may prove useful in the development or significant improvement of a product or process. It specifically excludes the actual development of a product and the ordinary testing or inspection which can best be done in the taxpayer's own facilities. Efficiency surveys, advertising, promotions, management studies, consumer surveys, and the acquisition of patents are also excluded.

A potential area of concern which our bill resolves is the precise nature of the interaction between the business and the academic institution. In this bill.

issues such as patents and licenses, freedom to publish and length of projects are left to the individual requirements of the parties involved.

Mr. President, this legislation targeted towards universities complements Senator DANFORTH's bill, the Research and Development Act of 1981 (S. 98) which provides a tax incentive for business to do more research and development. Research is the key to the innovative products of the future. It is my hope that this legislation will build the bridges between industry and the universities for the benefit of all. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 692

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Research Revitalization Act of 1981".

SEC. 2. TAX INCENTIVES FOR RESEARCH.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended by inserting after section 44E the following new section:

"SEC. 44F. CONTRIBUTIONS TO RESERVE FOR RESEARCH BY INSTITUTIONS OF HIGHER EDUCATION.

"(a) ALLOWANCE OF CREDIT.—In the case of a taxpayer engaged in a trade or business, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to 25 percent of the amount contributed in cash during the taxable year by the taxpayer to the research reserve of the taxpayer.

"(b) MAXIMUM CREDIT.—The credit allowed by subsection (a) to the taxpayer for the taxable year shall not exceed an amount equal to 5 percent of the taxable income of the taxpayer for such year which is properly allocable to the taxpayer's trade or business. For purposes of the preceding sentence, taxable income shall be computed without regard to the deduction under subsection (c)(2).

"(c) RESEARCH RESERVE.—

"(1) EXEMPTION FROM TAX.—Any research reserve shall be exempt from taxation under this title except that such reserve shall be subject to the taxes imposed by section 511 (relating to imposition of tax on unrelated business income of charitable, etc., organizations).

"(2) DEDUCTION FOR PAYMENTS FROM RESERVE.—There shall be allowed as a deduction for the taxable year an amount equal to the aggregate qualified research expenses paid out of the research reserve of the taxpayer during the taxable year.

"(3) QUALIFIED RESEARCH EXPENSES.—For purposes of this section—

"(A) IN GENERAL.—The term 'qualified research expenses' means amounts paid to any institution of higher education for a planned search, critical investigation, or experimentation.

"(B) CERTAIN AMOUNTS INCLUDED.—The term 'qualified research expenses' includes, but is not limited to, those expenditures described in subparagraph (A) which may prove useful in—

"(i) the development of a new business item for the taxpayer, or

"(ii) bringing about a significant improvement in an existing business item of the taxpayer.

"(B) CERTAIN ITEMS EXCLUDED.—The term 'qualified research expenses' does not include any amount paid for—

"(i) the ordinary testing or inspection of materials or products for quality control, or for efficiency surveys, advertising, promotions, management studies, or consumer surveys;

"(ii) acquiring any patent, model, production, or process from any other person, or obtaining a patent (including attorney's fees expended in a patent application);

"(iii) research to the extent that the taxpayer has received a grant, contract or subcontract for such research from any Federal, State, or local government, or agency or instrumentality thereof; or

"(iv) applying the results of research to the development or the production of a new business item for the taxpayer, or for an improvement in an existing business item of the taxpayer.

"(4) INSTITUTION OF HIGHER EDUCATION.—The term 'institution of higher education' means an institution described in section 1201 (a) or 491 (b) of the Higher Education Act of 1965 (as in effect on January 1, 1978).

"(5) DENIAL OF DOUBLE BENEFIT.—Any amount allowable as a deduction under this subsection shall not be allowed as a deduction under any other provision of this chapter.

"(d) SPECIAL RULES.—For purposes of this section—

"(1) Use of reserve amounts for other than payment of qualified research expenses.—

"(A) IN GENERAL.—If any amount in a research reserve is, during a taxable year, used for any purpose other than for the payment of qualified research expenses—

"(i) an amount equal to the amount so used shall be included as taxable income (without regard to other income or deductions) to the taxpayer for the taxable year in which such use commences, and

"(ii) the liability of the taxpayer for the tax imposed by this chapter for such taxable year shall be increased by an amount equal to 300 percent of the amount so used.

"(B) EXCEPTION.—Subparagraph (A) shall not apply to any payment from any research reserve within 90 days after the last day prescribed by law (including extensions thereof) for filing the return of the tax imposed by this chapter for the taxable year if the amount of such payment is not more than the excess of—

"(i) the aggregate amount of contributions by the taxpayer to such reserve during the taxable year, over

"(ii) the maximum amount of contributions necessary to allow the taxpayer the maximum amount of credit allowable under subsection (a).

"(C) EXCESS CONTRIBUTIONS DUE TO RECOMPUTATIONS.—If, after the close of the 90th day under subparagraph (B), there is a recomputation of the maximum credit allowable to the taxpayer under subsection (b)(1) for a taxable year, subparagraph (A) shall not apply to any payment from any research reserve of the taxpayer if—

"(i) the amount of such payment does not exceed the sum of the excess described in subparagraph (B) with respect to such taxable year, plus the income on such excess,

"(ii) such recomputation was due to reasonable cause and not to willful neglect on the part of the taxpayer, and

"(iii) such payment is made at the time prescribed by regulations by the Secretary.

"(2) Contributions must be spent within 4 years.—

"(A) IN GENERAL.—If any amount remains in a research reserve for more than 4 years after the date such amount was contributed to the reserve (or, in the case of income of the reserve, the date such income was received by the reserve)—

"(i) an amount equal to such amount shall be included as taxable income (without regard to other income or deductions) to the taxpayer for the taxable year in which the last day of the 4th year occurs, and

"(ii) the liability of the taxpayer for the tax imposed by this chapter shall be increased by an amount equal to 300 percent of the amount included in income under clause (i).

"(B) CERTAIN AMOUNTS TREATED AS PAID.—For purposes of subparagraph (A), an amount shall not be treated as remaining in a research reserve on any day if there is a binding commitment on such day to pay such amount from such reserve not later than 1 year after such day. The preceding sentence shall not apply to any amount which is not paid from such reserve during such 1 year.

"(C) FIFO ACCOUNTING REQUIRED FOR CERTAIN PURPOSES.—For purposes of determining whether an amount has been held in the research reserve for more than 40 years, under regulations prescribed by the Secretary, the taxpayer shall allocate payments to contributions and income on a first-in first-out basis.

"(3) Unused research funds may be redeposited in reserve.—

"(A) IN GENERAL.—Nothing in this section shall be construed to prevent amounts which have been paid from a research reserve and which have not been spent by the recipient from being returned to such reserve.

"(B) RETURNED AMOUNTS INCLUDED IN INCOME.—Any such amount returned to the research reserve of the taxpayer during the taxable year shall be included in the income of the taxpayer for such year.

"(4) APPLICATION WITH OTHER CREDITS.—

"(A) IN GENERAL.—The credit allowed by subsection (a) shall not exceed the tax imposed by this chapter for the taxable year, reduced by the sum of the credits allowable under a section of this subpart having a lower number of letter designation than this section, other than credits allowable by sections 31, 39, and 43.

"(B) TAX IMPOSED BY CHAPTER.—Any tax which is not treated under section 46 (a)(4) as imposed by this chapter shall not be treated as imposed by this chapter for purposes of subparagraph (A).

"(e) RESEARCH RESERVE DEFINED.—For purposes of this section, the term 'research reserve' means any trust—

"(1) which is created or organized under the laws of the United States or of any State (including the District of Columbia) for the taxpayer,

"(2) the exclusive purpose of which is the payment of qualified research expenses of the taxpayer,

"(3) contributions to which may be made only in cash,

"(4) no amount may be contributed to the trust in excess of the amount necessary to allow the taxpayer the maximum amount of credit allowable to the taxpayer under subsection (a),

"(5) the trustee of which is a bank (as defined in section 401 (d) (1)), or any person who demonstrates to the satisfaction of the Secretary that the manner in which such person will administer the trust will be consistent with such purpose, and

"(6) the asset of which will not be commingled with any other property other than in a common trust fund.

"(f) REGULATIONS.—The Secretary shall prescribo such regulations as may be necessary to carry out the purposes of this section.".

(b) TECHNICAL AMENDMENT.—Subsection (b) of section 6096 of such code (relating to designation of income tax payments to Presidential Election Campaign Fund) is amended by striking out "and 44E" and inserting in lieu tnereof "44E, and 44F".

(c) CLERICAL AMENDMENT.—The table of sections for subpart A of part IV of subchapter A of chapter 1 of such Code is

amended by inserting after the item relating to section 44E the following new item:

"Sec. 44F. Contributions to reserve for research by institutions of higher education.".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to contributions made after December 31, 1980.

● Mr. DANFORTH. Mr. President, I am pleased to cosponsor the Research Revitalization Act of 1981. In my opinion, increased research is essential if we are going to get inflation under control by increasing domestic productivity.

I have had a continuing interest in stimulating research in our educational institutions. In 1979, I introduced S. 1065 which was similar in many respects to the legislation I am cosponsoring today.

In my opinion, increased incentives for research are complementary to the Reagan administration's tax reduction proposals contained in S. 663 of which I am also a cosponsor. The administration's proposal recognizes the importance of research and development by including machinery and equipment used for research and development in the 3-year category instead of the 5-year category.

There has been some speculation as to whether this provision, by itself, will provide enough of an incentive to sustain domestic research at the level necessary to help get inflation under control. I look forward to working with the administration and my colleagues in the Senate in considering whether additional incentives for research are warranted and whether such incentives should be included in the first or a subsequent tax bill.●

● Mr. TSONGAS. Mr. President, today I am joining with Senators BRADLEY, DANFORTH, and PACKWOOD in introducing the Research Revitalization Act of 1981. S. 692, which can help rebuild an eroding foundation of the American economy. This legislation creates a cost-effective mechanism to encourage research with practical applications in business and industry. It is a vital antidote to economic stagnation and declining productivity.

The Research Revitalization Act provides an incentive for the private sector to invest in research and development on university campuses. The incentive mechanism is straightforward—a nonrefundable credit for 25 percent of the amount contributed in cash to tax-exempt research reserve. The maximum credit is 5 percent of the business' income. A deduction is allowed for payment from the reserve if it is used for research by colleges and universities. There are penalties if reserve funds are used other than for basic research and if funds are retained in the reserve for more than 4 years.

This legislation faces up to current research conditions. During the 1960's and 1970's, there has been a gradual shift of university efforts away from industrial needs. The Federal Government now funds 70 percent of university research. Washington effectively controls the direction of much of the basic research done in the United States. Federally-funded research has failed to lead to commercialization of enough productivity-enhancing developments.

The Research Revitalization Act will promote greater industry involvement in the basic research done at universities. It will restore some of the cooperation between industry and academia due to low return on investment. The bill recognizes that the benefits of innovation spread throughout an industry, and that it is in the national interest to encourage them. Federal spending on research and development, as measured in constant dollars, is falling. We have a national obligation—and opportunity—to do more.

During the Vietnam war and previous conflicts, defense spending served as a major Federal stimulant on technology, much of which had civilian applications. Now we need to stimulate research and development under a more positive condition—peace. The Research Revitalization Act creates a simple, efficient mechanism to move in this important direction.

This is an effective first step toward revitalizing research and development in order to increase innovation and productivity. Our compounding economic problems indicate that the time is overdue. The current trade deficit is about $25 billion annually. Internationally, America's competitive edge is disappearing. U.S. productivity stopped growing in 1978, and dropped 3 percent last year. Without more productivity, the standard of living for Americans cannot climb. If productivity is allowed to atrophy, it will besiege us in a vicious circle: profits and wages will shrink, foreign trade will stagnate, and inflation will loom even larger.

Mr. President, the Research Revitalization Act of 1981 can catalyze research and development in areas most likely to pay off practically. I urge my colleagues to consider its simple, efficient approach to the urgent problem of lagging innovation.●

● Mr. PACKWOOD. Mr. President, I join with my colleagues today in cosponsoring this legislation which will encourage basic research by colleges and universities. Basic research is essential to the development of new technologies and the commercialization of new products—products which are necessary to promote and enhance industrial innovation, and to increase productivity and real economic growth. It will be an important ingredient in our efforts to strengthen this Nation's international economic and technological position.

This legislation will complement the capital cost recovery legislation which was offered by the administration on Tuesday of this week. President Reagan's depreciation liberalization legislation is an excellent example of a productivity-boosting tax incentive. It will encourage new investment. It will help revitalize aging industrial facilities. It will help boost productivity and the ability of U.S. businesses to compete effectively in the international marketplace. It will help us to rebuild and revitalize the economy of the United States.

Mr. President, both of these bills are important. It is my hope that together they will become key ingredients in this administration's program of economic revitalization.●

By Mr. TOWER (for himself and Mr. STENNIS) (by request):

S. 694. A bill to authorize supplemental appropriations for fiscal year 1981 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and for research development, tests, evaluation, and to increase the authorized personnel strength for military and civilian personnel of the Department of Defense, and for other purposes; to the Committee on Armed Services.

DEPARTMENT OF DEFENSE SUPPLEMENTAL AUTHORIZATION ACT, 1981

● Mr. TOWER. Mr. President, by request, for myself and the senior Senator from Mississippi (Mr. STENNIS), I introduce, for appropriate reference, a bill to authorize supplemental appropriations for fiscal year 1981 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and for research, development, test, and evaluation, and to increase the authorized personnel strength for military and civilian personnel of the Department of Defense, and for other purposes.

I ask unanimous consent that a letter of transmittal requesting consideration of the legislation and explaining its purpose be printed in the RECORD immediately following the listing of the bill.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 694

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Department of Defense Supplemental Authorization Act, 1981."

TITLE I—PROCUREMENT OF AUTHORIZATION AND APPROPRIATIONS

SEC. 101. In addition to the funds authorized to be appropriated under title I of the Department of Defense Authorization Act, 1981, funds are hereby authorized to be appropriated for fiscal year 1981 for the use of the Armed Forces of the United States for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, as authorized by law, in amounts as follows:

AIRCRAFT

For aircraft: for the Army, $128,000,000; for the Navy and Marine Corps, $143,600,000; for the Air Force, $716,625,000.

MISSILES

For missiles: for the Army, $27,000,000; for the Air Force, $209,369,000; for the Marine Corps, $10,700,000.

NAVAL VESSELS

For Naval vessels: for the Navy, $317,700,000.

TRACKED COMBAT VEHICLES

For tracked combat vehicles: for the Army, $795,000,000; for the Marine Corps, $11,300,000.

TITLE II—RESEARCH, DEVELOPMENT, TEST AND EVALUATION

SEC. 201. In addition to the funds authorized to be appropriated under title II of the Department of Defense Authorization Act, 1981, funds are hereby authorized to be appropriated for fiscal year 1981 for the use of the Armed Forces for research, development, test, and evaluation, as authorized by law, in amounts as follows:

For the Army, $79,500,000; for the Navy (including the Marine Corps), $146,900,000; for the Air Force $330,900,000; for the Defense Agencies, $41,000,000.

TITLE III—ACTIVE FORCES

SEC. 301. Section 301 of the Department of Defense Authorization Act, 1981, is amended to increase the active duty personnel end strengths of the Navy, Marine Corps, and Air Force by striking out "537,456", "188,100" and "564,500' and inserting in place thereof "540,456", "190,600" and "569,000".

TITLE IV—RESERVE FORCES

SEC. 401(b) of the Department of Defense Authorization Act, 1981, is amended to increase the number of Reserve Component members authorized to serve on full-time active duty with the Marine Corps Reserve for the purpose of organizing, administrating, recruiting, instructing or training by striking out "67" and inserting in place thereof "133".

TITLE V—CIVILIAN PERSONNEL

SEC. 501. Section 501(a) of the Department of Defense Authorization Act, 1981, is amended by striking out "986,000" and inserting in place thereof "1,013,900".

GENERAL COUNSEL OF THE
DEPARTMENT OF DEFENSE,
Washington, D.C., March 11, 1981.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: The President has submitted a supplemental request for appropriations for fiscal year 1981. This supplemental request is designed to increase readiness and enhance defense capabilities. Some of these increased amounts will require fund authorization pursuant to section 138(a) of title 10, United States Code. In addition it will be necessary to increase certain military and civilian personnel authorizations.

Accordingly, there is forwarded herewith legislation, "To authorize supplemental appropriations for fiscal year 1981 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles and for research, development, test, and evaluation, and to increase the authorized personnel strength for military and civilian personnel of the Department of Defense, and for other purposes."

The amounts herein requested for authorization represent the total amounts of supplemental appropriations now requested for those appropriations that require fund authorization, except for construction. A separate request for supplemental Military Construction is being submitted.

In accordance with the usual practices, the Committee on Armed Services will be furnished with such additional information as it may require in connection with this request.

The Office of Management and Budget has advised that enactment of this proposal would be in accord with the program of the President.

Sincerely,

L. NIEDERLEHNER,
Acting.●

By Mr. LUGAR:

S. 695. A bill to amend the formula used for reapportionment; to the Committee on the Judiciary.

MODIFICATION OF METHOD OF APPORTIONMENT OF CONGRESSIONAL DISTRICTS

Mr. LUGAR. Mr. President, to correct what many consider to be serious flaws in the method of apportionment which the Census Bureau now uses to assign congressional seats, I am introducing legislation which would require the use and retroactive application of a more equitable method.

Congress has debated the question of apportionment methods for over 150 years, engaging the wit and expertise of such illustrious statesmen and respected thinkers as Thomas Jefferson, Alexander Hamilton, and Daniel Webster. During this time it has employed several different methods and has used many authoritative sources as the bases for its decisions. Not the least of these sources was a 1929 report, issued by the National Academy of Sciences, which Congress was later to use to make its determination.

In this report, the Academy registered its preference for the equal proportions method, the method which is presently used. The fact that the equal proportions method was thought to best equalize the proportional difference between any two congressional districts and that it "occupied a mathematically neutral position with respect to emphasis on larger and smaller States" were the decisive factors in this determination.

New research has surfaced, however, which convincingly proves the inaccuracy of the latter part of this statement and which imperils the accuracy of the first part. Legislators and educators alike have demonstrated that, contrary to the Academy's findings, the equal proportions method consistently favors the small States to the detriment of the large ones. Statistics show that the last 19 censuses have been slanted toward small States by a 3.4-percent margin, a bias which mushroomed to 7 percent in the 1980 census. Earlier in this century, Senator Vandenberg spoke out against the small State bias:

> I contend as a constitutional axiom that a group of individuals should have as nearly as may be the same weight in choosing Representatives in the House whether they happen to live in the large states or the small states.

While a bias toward any group is objectionable, this one is particularly disturbing in light of the fact that citizens of small States are already better represented by the distribution of Senators.

Further, it seems self-evident that the best way to fulfill the Supreme Court's "one man-one vote" mandate is to minimize the actual numbers of people who are misrepresented through seat reapportionment. A State's unique "quota"—its exact fractional share of the congressional pool—is useful for measuring a State's faithfulness to the "one man-one vote" mandate. The term, "quota" describes the quotient resulting from the division of a State's total population by the ideal district (519,234 in 1980). In this census, to cite an actual example, California's "quota" was 45,584. It would seem fair then, that California should receive a 46th seat before New Mexico, whose "quota" is 1.504, receives its second seat. Under the present method of apportionment, however, New Mexico was allotted 2 seats and California 45. Nor is this an isolated example. In fact, five States whose fractions were smaller than California's received their "fractional" seats while California did not.

This is not an obscure question which is never to be heard from again. The fact that almost half of our country's population lies in the nine largest States improves the likelihood that large numbers of people will be disadvantaged by the violation of "quota" and the small State bias. Studies have been conducted which bear this out, indicating that an increasing number of large States are likely to be victimized by the continued use of the equal proportions method in the next two censuses.

The method which I am proposing in this legislation, the Hamilton-Vinton method, uses a logical formula which appeals to our commonsense. It divides a State's total population by the ideal district size and awards a seat to each resulting integer—with no State receiving less than one seat. The largest fractions are then distributed until all 435 seats have been doled out.

Besides being a more logical way of going about the distribution of seats, this method is perfectly evenhanded in its treatment of large and small States. Further, it is the method which most often respects "quota." Finally, it has historical basis, having been used from 1850–1900.

Its critics will point out that the Hamilton-Vinton method is subject to two mathematical quirks, the so-called Alabama paradox and the population paradox. If we assume, however, that the total size of the House is not likely to change, then the first paradox becomes moot. And even the critics of Hamilton-Vinton will concede that while the second paradox is theoretically possible, it is highly unlikely to occur in practice. My office will gladly furnish mathematical evidence for anyone wishing proof of this statement.

Questions concerning apportionment have often been decided by political considerations. In 1941 for example, Congress moved to return to Arkansas a seat which it had lost to Michigan in the 1940 census. No reasons were given for this formula change. The prevalent impression was that it was based on political expedience. I will not try to disguise the fact that I am particularly interested in this issue because Indiana was one of those large States which was victimized by a "quota" distortion. But I would not try to convince this body to overturn an apportionment method which was free of serious imperfections. With the introduction of this measure, I am only asking Congress to be guided by a sense of fairness and to act, in the interests of equity, on an issue which will grow in its importance to our Nation.

By Mr. DANFORTH:

S. 696. A bill to amend the Internal Revenue Code of 1954 to treat as public charities certain organizations which operate libraries; to the Committee on Finance.

TREATMENT AS PUBLIC CHARITIES OF CERTAIN ORGANIZATIONS WHICH OPERATE AS LIBRARIES

● Mr. DANFORTH. Mr. President, today I am introducing a bill to provide that

any tax-exempt organization whose activities are devoted to the operation of a library of the type I am about to describe, be treated for tax purposes as a public charity in the same manner as other educational organizations such as schools and universities. The types of libraries to which this bill refers are: First, those which are operated as a permanent and principal part of the tax-exempt activities of the subject organization and were organized by a public act of the United States, of any State, of the District of Columbia, or of any possession of the United States, or were in existence prior to 1789; and second, ones which are open and available to the public at no charge and are operated as the sole activity of the subject organization. The bill is limited to only those libraries which I have just described in order to insure that only such libraries that are clearly organized to serve the public will benefit from this legislation.

Because of the investment income from their endowments, some tax-exempt organizations that operate libraries of the types described above run the annual risk that they will fail to meet the Internal Revenue Service guidelines to qualify as a "publicly supported organization" and that, therefore, they will be classified as a private foundation.

Under existing law, unless a library meets the "publicly supported" financial tests, it will not qualify as a public charity even though such library clearly serves a public purpose. Such libraries spend significant amounts in legal and accounting fees on an annual basis in order to determine and insure that they meet the Internal Revenue Service guidelines, which amounts would otherwise go to the exempt purpose; for example, the purchase of books, et cetera.

A library that does not meet these tests is usually classified as a private operating foundation and is required to pay a 2-percent excise tax on its net investment income. The purpose of the excise tax, as set out in the legislative history, is not to raise revenue for the Government, but to cover the Internal Revenue Service expense in monitoring private foundations, principally to insure that such organizations are promptly and properly using their funds for charitable purposes. The purpose behind the excise tax does not appear to be applicable to the classes of libraries described in this bill.

A library that is classified as a private foundation also has a more difficult task than an organization classified as a public charity in soliciting funds from potential contributors. For example, a private foundation that is not an operating foundation may make contributions to public charities and private operating foundations, but generally may not make qualifying contributions to other private foundations that are not operating foundations. Because of the uncertainty as to whether a private operating foundation continues to qualify as an operating foundation—there are complex tests that must be satisfied annually—many individual contributors and other private foundations that are not operating foundations are hesitant to contribute funds to such an organization even though it clearly serves a public purpose. As a result, funds that would otherwise go to libraries described in the bill are diverted to other charitable organizations.

Although most libraries within the classes of libraries described in the bill are able to satisfy the "publicly supported" test and qualify as public charities, there are two libraries within those classes of which I am aware—the St. Louis Merchantile Library located in St. Louis, Mo., and the Linda Hall Library located in Kansas City, Mo.—both of which, because of their endowment funds, are unable to satisfy these tests, and therefore are classified as private operating foundations. Because these libraries are classified as private operating foundations, they must pay an excise tax on their net investment income.

For taxable years after 1977, this bill will amount to $2,000 to $4,000 annually for the St. Louis Merchantile Library and $30,000 to $34,000 annually for the Linda Hall Library. In addition, these libraries must incur annual legal and accounting expenses in order to insure that they fall within the private operating foundation guidelines.

I am not aware of any other similar libraries in the particular situation being faced by the St. Louis Merchantile Library and Linda Hall Library, and, thus, it is anticipated that the total loss in revenue if this bill is enacted would be less than $40,000 per year. However, the bill indirectly affects many other libraries because passage of the bill will also relieve them of the necessity of continually insuring that they meet the "publicly supported" tests.

The Linda Hall Library was established in 1946. The instruments governing its establishment and operation specifically provide that the library shall be open and available to the public at no charge. These instruments also provide that none of the library's income shall be expended for purposes other than the construction, maintenance, expansion, operation, or management thereof. The library is maintained in its own buildings situated on a tract of land adjacent to the University of Missouri at Kansas City in Kansas City, Mo.

Since its establishment, the library has assembled one of the Nation's most extensive and notable collections devoted to science and technology including more than 460,000 volumes and over 620,000 microforms. Together with a distinguished retrospective collection, it also has very extensive holdings of current books and journals from all countries where publications at the research level in science and technology are available. Among those works especially valuable to research scientists throughout the United States, and not widely held by other institutions, are the library's comprehensive collections of current journals from the Soviet Union, Japan, and the People's Republic of China.

The Linda Hall Library maintains a program of providing photocopies of its materials to persons upon request, whenever requests for such services are consistent with copyright laws and with the Copyright Clearance Center procedures, and a program of lending portions of its collection from time to time to other libraries. Shortly after its establishment, the library purchased the entire collection of the American Academy of Arts and Sciences which had its principal offices in Boston, Mass. After the purchase, the Linda Hall Library agreed to act as the agent of the academy in continuing its broad exchange program with libraries and learned societies located throughout the world.

In the early years of its existence, the Linda Hall Library was selected by the Atomic Energy Commission as one of 15 or 20 depositories throughout the United States for its literature, and the library continues to maintain a collection of material relating to the AEC's successor organization, the Energy Research and Development Administration. In the late 1950's the National Aeronautics and Space Administration selected Linda Hall Library as a depository for the literature which it distributes in connection with its information program. Literature is still being sent by NASA to the library in connection with this program.

Linda Hall Library is a depository for all specifications and standards to be used by individuals and organizations when dealing with military and civilian projects of the Federal Government. The library also maintains the patent specifications for all patents issued by the U.S. Government since July, 1946, and is a depository for all current maps issued by the U.S. Geological Survey.

Linda Hall Library maintains a very close relationship with the University of Missouri at Kansas City which is almost entirely dependent upon Linda Hall for library material in the areas of science and technology.

The St. Louis Mercantile Library Association was established in 1846 to form a well-rounded collection of books for the information and convenience of St. Louisans. The formation of the library was authorized and approved by a public act of the general assembly of the State of Missouri. The library is maintained in its own building in downtown St. Louis.

Over the past 132 years the library has assembled a notable collection of books, now over 213,000 volumes, comprising a general collection in the liberal arts area, with emphasis on history, biography, travel, philosophy, religion, and the arts. The library maintains one of the country's distinguished and most comprehensive collections of regional history pertaining to St. Louis and Western Americans.

The Western Americana Collection, with approximately 55,000 rare books, is probably the most comprehensive collection in that field in existence. The collection is frequently consulted and referred to by many historians in this field. In addition, the library has one of the most complete files available in the St. Louis area for six local papers, including some 500 bound volumes of St. Louis newspapers, beginning with 1812—a few of these cannot be obtained in any other library. The library has also been

the recipient of many valuable gifts during its existence. These gifts include the fragmentary journal of Pierre Laclede's stepson, Auguste Chouteau, describing the founding of St. Louis, and the original manuscript, "Journal of the Proceedings of the First Legislative Council of the Territory of Louisiana, from June 3, 1806 to October 9, 1811."

For individuals researching the organization of the territorial government of the Louisiana Purchase or Missouri's first steps toward statehood, these documents are of extreme importance. Another notable possession is the four-volume elephant folio of Audubon's "Birds of America." The library is open to the public and currently maintains a broad-based membership of over 2,000. While membership is necessary to check out materials—membership dues are currently a nominal $10 per year—anyone can use the books and collection on the premises of the library. The library is also made available to students from Washington University to observe the library's unique cataloging systems, reference department, and rare book room.

Mr. President, in my opinion, neither the St. Louis Mercantile Library nor the Linda Hall Library should be penalized by the private foundation rules and applicable excise taxes. These provisions were not intended to penalize organizations that clearly provide a public benefit such as these libraries do. Further, other libraries of a similar nature likewise should not be burdened with the additional legal and accounting expenses to assure that they continue to satisfy the publicly supported financial tests.

Mr. President, I ask unanimous consent that a copy of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 696

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) clause (ii) of section 170(b)(1)(A) of the Internal Revenue Code of 1954 (relating to charitable, etc. contributions and gifts) is amended by adding at the end thereof: "or any organization which operates a qualified library within the meaning of subparagraph (F).".

(b) Paragraph (1) of section 170(b) of such Code is amended by adding at the end thereof the following new subparagraph:

"(F) QUALIFIED LIBRARIES.—For purposes of subparagraph (A)(ii), a library shall be treated as a qualified library if—

"(i) such library was established as a library by a law of a state, a law of the United States, a law of a possession of the United States, a law of the District of Columbia, or, before 1789, in the geographic area now comprising the United States and such library is operated by an organization as a permanent and principal part of the public services of such organization; or

"(ii) such library is open and available to the general public, does not charge a fee for admission to its premises or use on the premises of the library collection, and is operated by an organization, none of whose income is expended for purposes other than the construction, maintenance, expansion, operation, or management of such library, its collection and the premises on which such library is located.".

(c) For purposes of sections 509(b) and 507 of such Code, an organization which for its first taxable year beginning after the date of the enactment of this Act is described in the amendment made by subsection (a) shall be treated as not having been a private foundation at any time before the first day of such first taxable year.●

By Mr. HELMS:

S. 697. A bill to amend the Internal Revenue Code of 1954 to permit certain multiyear pension plan distributions to be treated as qualifying rollover distributions; to the Committee on Finance.

TECHNICAL CHANGE IN ERISA LEGISLATION

Mr. HELMS. Mr. President, under regulations promulgated under the Employee Retirement Income Security Act and made effective as of January 1, 1977, a constituent of mine, Mr. John W. Pope received a portion of his share of the Variety Wholesalers, Inc. pension plan which was terminated in 1976. The distribution of the final sum in this pension program to my constituent was delayed because of the 1977 change in ERISA regulations dealing with the right of a participant to purchase an insurance policy on his own life from a qualified retirement plan. At the time of the termination of the Variety Wholesalers plan, such a purchase was a prohibited transaction.

Mr. Pope received a portion of his share of the plan's assets on December 20, 1976 and on January 7, 1977 he established a rollover (IRA) account. Also in the month of January, Mr. Pope purchased the policy on his life from the plan thus enabling the trustee to deliver the balance of his fund to him.

Mr. Pope deposited these funds to his rollover (IRA) account on January 24, 1977. Thus a complete rollover on all funds received by Mr. Pope from the terminated pension plan was effected within 60 days, in compliance with the code.

Upon audit by the Internal Revenue Service of Mr. Pope's 1976 and 1977 tax returns the entire rollover (IRA) was disallowed because the two distributions were made in different tax years. The IRS assessed an income tax deficiency, plus interest and penalty for excess contributions.

This entire problem was created by the fact that while Mr. Pope followed the law in rolling his distribution into an IRA within 60 days, he is being unjustly penalized due to a technicality in ERISA which made it impossible for him to acquire the policy on his own life and meet the requirements of section 401(a)(6) of the code.

Mr. President, my bill would simply make it clear that as long as a recipient of funds from a canceled pension plan acts within the prescribed 60-day period, that this process be treated as if it took place within the tax year he received the payments.

Clearly, Congress did not intend to penalize taxpayers who conformed with the act's requirements, but who faced adverse treatment by the IRS because the payout made in conformance with ERISA following the cancellation of a pension plan straddled 2 tax years.

I am informed that the bill results in a negligible loss of revenue to the Government.

Mr. President, I ask unanimous consent that a copy of the bill be printed in the RECORD following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 697

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ROLLOVER OF MULTIYEAR DISTRIBUTIONS.

Section 402(a)(6) of the Internal Revenue Code of 1954 (relating to special rollover rules) is amended by adding at the end thereof the following new subparagraph:

"(E) CERTAIN POST-TAXABLE-YEAR DISTRIBUTIONS TREATED AS DISTRIBUTED WITHIN 1 TAXABLE YEAR.—For purposes of paragraph (5)(D)(i)(I), if the last distributions or payments under a plan are made—

"(i) after the close of the taxable year of the recipient in which 1 or more distributions are made under that plan on account of its termination or the complete discontinuance of contributions under the plan, and

"(ii) before the date prescribed by law for making a return of tax under this chapter for that taxable year (without regard to any extensions thereof),

then such last distributions or payments shall be treated as made on the last day of such taxable year.".

SEC. 2. EFFECTIVE DATE.

The amendment made by section 1 shall apply with respect to taxable years beginning after September 2, 1974.

By Mr. DECONCINI:

S. 698. A bill to authorize the Secretary of the Interior to assist the Yuma County Water Users' Association, Arizona, to relocate the headquarters of such association; to the Committee on Energy and Natural Resources.

YUMA COUNTY WATER USERS' ASSOCIATION

Mr. DECONCINI. Mr. President, today I am pleased to introduce a measure which will help to preserve and restore one of the Southwest's great historic sites. At the same time, it will demonstrate the significant role the West has played in this Nation's historical past.

In keeping with the spirit of the Historic Sites Act of 1935, former Secretary of the Interior Stewart Udall designated the Yuma Crossing and associated sites as a national historic landmark. These sites include the Quartermaster Depot, Fort Yuma, the territorial prison, and the U.S. customhouse.

Of particular interest and the predominant objective of this legislation is the restoration of the Old Quartermaster Depot. The Old Quartermaster Depot was constructed by the military around 1859 as a storage and supply depot for military posts in Arizona, New Mexico, Utah, and Texas. A 6-month supply of ammunition, clothing, and food were kept at the depot at all times, and supplies were transported by oceangoing vessels from points in California, around the Baja Peninsula to the mouth of the Colorado River. There they were transferred to river steamboats and taken up river to

Arizona City. After 1862, the boats were unloaded and supplies were taken to the depot for storage. In 1880, after the depot had served its purpose, it was abandoned by the military and the equipment and supplies were transferred to Fort Lowell, near Tucson.

In 1906, the Bureau of Reclamation occupied the depot when it began its initial water diversion project on the lower Colorado River. The Bureau, now the Water and Power Resources Service, entered into a repayment contract with the Yuma Water Users' Association, a nonprofit, private corporation functioning as an irrigation district, to construct irrigation works to divert the flows of Colorado River water from points in California to Arizona farmlands in the Yuma Valley. This, the oldest reclamation project on the lower Colorado River, became known as the valley division of the Yuma project. The Bureau continued to operate and maintain the project at the Old Quartermaster Depot until 1951, when it entered into another contract with the Water Users' Association, transferring the operation and maintenance function of the project to the Water Users' Association from the Old Quartermaster Depot site.

The repayment contract was fully repaid to the United States in 1962, and the Association has since worked under an agreement with Water and Power for the operation and maintenance of the project.

The State of Arizona, in conjunction with the city of Yuma and the Quechan Indian Tribe, has initiated the historic preservation and renovation of the Yuma Crossing and Associated Sites. The city has dedicated parcels of land along the Colorado River and west of the landmark for parks and recreational purposes. Subsequently, the restoration of the historic sites, with the exception of the Old Quartermaster Depot, has been moving along quite smoothly. Before the restoration of the depot can move forward, the Water Users' Association must be relocated.

The Water and Power Resources Service and the Water Users' Association recognize the importance of preserving the landmark for all Americans to enjoy, and are willing to transfer the operational headquarters of the association. The purpose of this legislation is to give the Secretary of the Interior the authority to relocate the association and make the necessary funds available for such a move.

Clearly, the Old Quartermaster Depot possesses the values and qualities significant in interpreting the historical heritage of our great Nation. Enactment of this measure will insure the continued proper preservation of the National Landmark known as the Yuma Crossing and the Associated Sites.

Mr. President, I request prompt consideration of this legislation by the Committee on Energy and Natural Resources and hope that this measure can receive the approval of the Senate early in this session so that the necessary steps in the restoration process can be undertaken without further delay.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 698

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Secretary of the Interior is authorized to take such action as may be necessary to make available to the Yuma County Water Users' Association, Arizona, suitable facilities for use by such Association in carrying out its project functions, and to assist such Association in relocating from its present facilities in the Yuma Quartermaster's Depot and Associated Historic Sites.

(b) The Secretary of the Interior is authorized to make such facilities available to the Yuma County Water Users' Association on the basis of such terms and conditions and for such period as the Secretary shall prescribe.

SEC. 2. There is authorized to be appropriated such sum as may be necessary to carry out the provisions of this Act.

By Mr. DECONCINI:

S. 699. A bill entitled the "Federal Diversion Act of 1981;" to the Committee on the Judiciary.

FEDERAL DIVERSION ACT OF 1981

Mr. DECONCINI. Mr. President, today I am introducing the Federal Diversion Act of 1981. The bill was passed by the Senate in both the 95th and the 96th Congresses. Hearings held on the bill in the 95th Congress reviewed the history of pretrial diversion programs in the United States on both the Federal and State levels and the report issued with the bill in the 96th Congress outlined the advantages of a statutory diversion program and the need for congressional implementation of diversion programs.

In reviewing the genesis of the diversion concept, the Subcommittee on Improvements in Judicial Machinery came to the conclusion that much of the theoretical basis for diversion was not supportable by existing research. However, the subcommittee found much pragmatic justification for increasing the number of Federal programs. The subcommittee determined that the Federal Diversion Act would be a significant addition to the Federal criminal justice system.

Briefly, pretrial diversion operates in this manner:

Soon after arrest (for instance, at the bail/release interview) the accused is interviewed and screened by the pretrial diversion agency to determine eligibility for the diversion program. The bill requires that the accused not be charged with a violent crime and not be a recidivist to be eligible. Names of eligible persons are submitted to the U.S. attorney for a final determination of suitability.

The Attorney General, by regulation, and the U.S. attorney, by his or her prosecutorial discretion may establish further suitability criteria. If accepted, the accused, his attorney, and the U.S. attorney design a program that may consist of medical treatment, psychological treatment, restitution, residence in a halfway house, community service, or other elements.

While the accused is participating in this program, charges against him or her are suspended. If the accused successfully completes the plan and has not been arrested for other offenses, the U.S. attorney dismisses the charges. If not, the accused has a very limited right to appeal the decision to prosecute.

While early literature on pretrial diversion suggested that such programs would result in reduced recidivism rates and reductions in court calendar backlogs, no clear data was presented to the subcommittee to support these claims. What the subcommittee did discover was a rather significant gap in the options available to a prosecutor in a certain class of cases. These cases are offenses serious enough to require action by the criminal justice system, yet the circumstances of each case mitigate the seriousness. Formal prosecution, with the onus of a criminal conviction resulting, is inappropriate.

Historically, the justice system responded to these cases by dismissal of the charges, lectures by the police without arrest, or full prosecution. The ad hoc diversion system arose from the general unsuitability of these other responses: The prosecutor would agree to dismiss charges if the accused exhibited good behavior over a period of time.

This informal process is unsatisfactory for a number of reasons. The prosecutor's authority to conduct diversion is not clearly established. Lacking court involvement or representation of the accused by counsel, the process provides no protections for procedural rights. Most important, the informal process is arbitrary, discretionary, and unevenly applied.

Although the Justice Department has implemented a formal diversion program, the committee found that congressional implementation of the program is still needed. Despite the approval of diversion programs by the Department of Justice, testimony of the Department indicates that diversion is being utilized formally in only about two-thirds of all districts. Mandating the implementation of programs in each district is necessary to effect significant reductions of court costs and caseloads. Legislation is also necessary to insure that standardized minimum entry criteria and procedures are utilized. Although program guidelines have been promulgated by the Department of Justice, U.S. attorneys are under no mandate to follow the procedures.

The subcommittee addressed these difficulties and concluded that the need for a statutorily mandated pretrial diversion program was real. Further, while the subcommittee found statistical validation lacking, evidence suggests that a national program, consistently utilized in appropriate cases, could possibly prevent some first-time offenders from becoming recidivists.

Mr. President, I urge my colleagues to review the reports on the bill from the 95th and 96th Congresses. I hope that my colleagues will join me in supporting this bill, which hearings have shown would be a significant addition to the Federal criminal justice system. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 699

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SEC. 101. This title may be cited as the "Federal Diversion Act of 1981."

SEC. 102. The Congress finds and declares that:

(1) in the interest of operating the Federal criminal justice system efficiently, protecting society, and deterring individuals charged with violating criminal laws from future criminal acts can be served by creating alternatives to prosecution; and

(2) such alternatives can be accomplished in appropriate cases without losing the general deterrent effect of the criminal justice system.

SEC. 103. (a) Title 18 of the United States Code is amended by adding immediately after chapter 209 the following new chapter:

"Chapter 210—DIVERSION

"Sec.
"3201. Definitions.
"3202. Admission to diversion program.
"3203. Voluntariness of waiver of rights.
"3204. Inadmissibility of diversion information.
"3205. Continuation and dismissal of charges.
"3206. Termination; review; completion; withdrawal.
"3207. District panel.
"3208. Authority of the Attorney General.

"§ 3201. Definitions

"As used in this chapter, the term—

"(1) 'eligible individual' means any person against whom a prosecutable case exists for an offense against the United States where—

"(A) the alleged offense did not involve the threat or infliction of serious bodily injury to other persons;

"(B) it is reasonably foreseeable that the person will not commit violent acts if admitted to a diversion program;

"(C) the person has not exhibited a continuing pattern of criminal behavior;

"(D) the person meets the criteria established by regulations issued by the Attorney General and guidelines established by the attorney for the Government in the district where the indictment, information, or complaint is filed; and

"(E) the person is admitted to participation in a diversion program by the attorney for the Government in the district in which the indictment, information, or complaint is filed;

"(2) 'diversion program' may include, but is not limited to, medical, educational, vocational, social, and psychological services; corrective and preventative guidance, training, and counseling; provision for residence in a halfway house or other suitable place; other services designed to protect the public and benefit the individual; restitution to victims of the offense or offenses charged; and uncompensated service to the community;

"(3) 'diversion plan' means a written agreement, signed by the eligible individual, defense counsel, diversion administrator, and the attorney for the Government, that states those elements of a diversion program in which the eligible individual will participate to assure that he will lead a lawful life, and states the length of time required to complete the plan; but in no event shall a diversion plan exceed twelve months except to allow the person admitted sufficient time to make restitution; and

"(4) 'diversion administrator' means a person designated by the Attorney General, after consultation with the district planning group, as administrator of the diversion program; except that in those districts in which a chief pretrial services officer has been appointed by a panel consisting of the chief judge of the circuit, the chief judge of the district, and a magistrate of the district (or their respective designees), the chief pretrial services officer shall also serve as the diversion administrator.

"§ 3202. Admission to diversion program

"(a) The diversion administrator or his assistants shall, to the extent possible, upon arrest or the issuance of a summons or as soon thereafter as possible, review the allegations against each person charged with a criminal offense against the United States and interview each person who he believes may be eligible for diversion. The diversion administrator shall then make a report to the attorney for the Government on the eligibility of each person charged. A person who has not had the allegations against him reviewed may request to be considered for admission by application to the diversion administrator. The attorney for the Government may require further investigation by the diversion administrator of a person being considered for admission with the consent of that person. If the attorney for the Government determines that a person is suitable, the diversion administrator shall prepare a diversion plan. Upon agreement of the attorney for the Government, diversion administrator, eligible person, and defense counsel about the elements of the plan, the attorney for the Government shall assign supervision of the plan to the diversion administrator. A determination of eligibility or suitability by the attorney for the Government shall not be subject to review except as otherwise provided by law.

"(b) The diversion administrator shall report to the attorney for the Government on the progress of the person in carrying out his plan in a manner and at times the attorney for the Government and diversion administrator deem appropriate and shall at the same time provide a copy of each such report to the person and defense counsel.

"§ 3203. Voluntariness of waiver of rights

"No person shall be admitted to a diversion program unless he has voluntarily agreed to participate and has received a copy of his diversion plan, and has voluntarily waived, in the presence of a judge or magistrate and with the advice of counsel (except in a case where counsel has been voluntarily waived), all applicable statutes of limitations and his right to a speedy trial for the period of diversion.

"§ 3204. Inadmissibility of diversion information

"Whenever a person is admitted to a diversion program and his diversion plan is later terminated or the person withdraws and prosecution is resumed, any statement made or other information given by the person in connection with the determination of his eligibility or suitability for the program, any statement made by the person while participating in an activity of the program, and any statement, report or other information concerning his participation in the program shall not be admissible against the person on the issue of his guilt of the offense that was the basis for diversion in any judicial proceeding in which he is accused of the offense. This section shall not be construed to limit the admissibility of any information for purposes of impeachment.

"§ 3205. Continuation and dismissal of charges

"In each case involving a person who is admitted to a diversion program under this chapter, the criminal charges against the person shall be continued without final disposition for the period agreed upon in the diversion plan, unless the admission is terminated, completed earlier, or the person withdraws pursuant to section 3206 of this chapter. Upon the expiration of the diversion period, the attorney for the Government shall file a dismissal with prejudice as provided in section 3206(C). Nothing in this paragraph shall be construed to limit further investigation of the offense charged or presentation of evidence to a grand jury during the diversion period.

"§ 3206. Termination; review; completion; withdrawal

"(a) If the attorney for the Government finds the person is not fulfilling his obligations under the plan, or has discovered facts previously unknown to him demonstrating that the person is not suitable for diversion, the attorney for the Government may resume prosecution. The attorney for the Government shall make a written statement of the factual basis for his determination to resume prosecution and transmit copies to the person and to defense counsel. The person and defense counsel shall thereafter be notified of their opportunity to appear before the attorney for the Government and the diversion administrator to contest the determination within a reasonable time as established by the Attorney General.

"(b) If the person fails to contest the determination of the attorney for the Government within the time specified, no further review of the determination shall be granted. If, on the appearance of the person and defense counsel before the attorney for the Government and the diversion administrator, the attorney for the Government determines that prosecution shall be resumed, the person may petition the court for review. If the court finds that no fact exists upon which the attorney for the Government could base a determination to resume prosecution, the court shall order that the person be allowed to fulfill his obligations under the plan or shall dismiss the charges if the court finds that all such obligations have been fulfilled. In a proceeding under the provisions of this subsection, evidence shall be admissible regardless of its admissibility in a trial on the offense.

"(c) If the diversion administrator certifies to the attorney for the Government at any time during the period of diversion that the person has fulfilled his obligations and successfully completed the plan, and if the attorney for the Government concurs, the attorney for the Government shall file, by leave of court, a dismissal with prejudice of the indictment, information, or complaint against the person.

"(d) A person participating in a diversion plan may withdraw at any time, and the attorney for the Government may resume prosecution.

"(e) Whenever a diversion plan is terminated or the person withdraws before completion of the plan and the prosecution is resumed resulting in a conviction, the court shall consider the length and nature of the defendant's participation in the plan and may credit such participation as time served toward any sentence of probation or incarceration.

"§ 3207. District panel

"(a) The panel established by section 3153 (b) of this title, together with the diversion administrator and such other individuals as the panel may appoint, shall constitute a diversion advisory committee. The panel may appoint individuals representing agencies to which persons are referred under a diversion program pursuant to this chapter. The group shall plan the implementation of the diversion program for the district and review on a regular basis the administration and progress of such program. The group shall report to the Attorney General at times and in a manner as the Attorney General shall prescribe.

"(b) Members of the group shall not be compensated, but may be reimbursed pur-

suant to section 3208 for reasonable expenses incurred by them in carrying out their duties as members of the committee.

"§ 3208. Authority of the Attorney General

"(a) In carrying out the provisions of this chapter, the Attorney General shall—

"(1) reimburse agencies of the judicial branch of the Government for the cost of services of United States probation officers, pretrial service officers, and employees other than judges, magistrates, or Federal public defenders, necessary to carry out the purposes of this chapter;

"(2) employ and fix the compensation of such persons as he determines necessary to carry out the purposes of this chapter, without regard to the provisions of title 5, United States Code, relating to appointments in the competitive services and the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates;

"(3) acquire such facilities, services, and materials as he determines necessary to carry out the purposes of this chapter; and

"(4) enter into contracts and other agreements without regard to advertising requirements for the acquisition of such personnel, facilities, services, and materials which he determines necessary to carry out the purposes of this chapter.

"(b) In addition to the responsibilities described in subsection (a), the Attorney General shall—

"(1) issue, within one hundred and eighty days after the effective date of this section, regulations for use by the United States attorneys governing recommendations of persons to diversion programs;

"(2) conduct research and prepare concise annual reports for the President, the Congress, and the Judicial Conference showing the progress of all diversion programs in fulfilling the purposes set forth in this chapter;

"(3) provide for the audit of any funds expended under the provisions of this chapter other than funds expended to provide for defense counsel;

"(4) be authorized to accept voluntary and uncompensated services; and

"(5) promote the cooperation of the Department of Justice, local diversion programs, and all agencies which provide education, training, counseling, legal, employment, or other social services under any Act of Congress to assure that eligible individuals admitted to diversion programs can benefit to the extent possible."

(b) The table of chapters for title 18, United States Code, and for part II of title 18, United States Code, are each amended by inserting immediately after the item relating to chapter 209 the following:

"210. Diversion ----------3201.".

SEC. 104. For the purposes of carrying out the provisions of this title, there is authorized to be appropriated for each of the fiscal years ending September 30, 1982, 1983, 1984, and 1985 the sum of $3,000,000.

By Mr. WALLOP (for himself, Mr. DOMENICI, Mr. CRANSTON, Mr. SCHMITT, and Mr. HAYAKAWA):

S. 700. A bill to amend chapter 45 of the Internal Revenue Code of 1954 with respect to the exemption of the State share of Federal royalties from the crude oil windfall profit tax and to insure the deductibility of certain severance taxes; to the Committee on Finance.

EXEMPTION OF STATE SHARE OF FEDERAL ROYALTIES FROM WINDFALL PROFIT TAX

Mr. WALLOP. Mr. President, today I am introducing legislation to redress the inadvertent financial burdens imposed on State, local governments, and Indian tribes by the windfall profit tax. I cannot believe the windfall profit tax was ever intended to handicap the financing of projects for the public good. States, local governments, and Indian tribes do not reap "windfall profits," they do not transgress the public interest by hoarding money and misallocating resources. On the contrary, they benefit the public interest by providing necessary services. Nevertheless, the windfall profit tax limits the ability of these governments to provide basic services. This legislation remedies the situation by exempting Federal royalty oil from the tax, by making local ad valorem taxes and tribal severance taxes deductible from the tax, and by clarifying a term used in assessing tax liability.

As is generally known, the windfall profit tax (WPT) directly affects the amount of domestic petroleum exploration and development by siphoning off cash flow that otherwise would be used to finance such ventures. Not widely known, however, is that the WPT indirectly affects the amount of exploration and development by eroding the quality and limiting the quantity of logistical support provided through the governments of mineral producing regions. Oil wells do not drill themselves; oil does not flow from reservoir to refinery in some mysterious process that requires little or no help.

Hundreds of workers are needed to drill each well and hundreds more are needed to develop it for commercial production. As a result, locations proximate to the oil fields face a massive influx of population. Historically, these "boomtowns"—whether they existed previously as communities or just groups of buildings—have been hard pressed to meet the needs of these new workers. The ensuing deterioration of the quality of life in these towns creates many problems, not the least of which are soaring crime and increasing pollution. The attraction of numerous jobs paying high wages in these towns soon pales in comparison to the risks and hardships encountered in living there. Even the high wages become not so high as prices and rents skyrocket to bring equilibrium to demand and supply. Consequently, the influx of people slows and the oil companies are left without the workers they need to explore and develop new petroleum reserves.

To combat this, States and local governments need extra funds. To maintain the livability of their towns, they need more money to provide more public services to more people. Recognizing the costs incurred as a result of mineral extraction, Congress granted the States a share of the Federal royalty on oil in the Mineral Leasing Act of 1920. The Mineral Leasing Act gave the States a 37.5 percent share of the 12.5 percent royalty received by the Federal Government for mineral extraction on public lands. The State's share of the royalty was specifically designated for such public programs as road construction, road maintenance, and funding for local schools. The restriction on the use of the money proved onerous, however.

When an area is newly opened for mineral extraction, local government entities must assume a vast array of public services. The exploding population growth creates demands for more than just new schools and roads. New hospitals, new sewers, more fire and police protection, and other new public facilities are demanded as well. Congress acknowledged this fact and altered royalty oil policy by amending the Federal Land Policy and Management Act of 1976. First, the State's share of the Federal royalty was increased from 37.5 to 50 percent. Second, the 1976 act broadened the allowable use of the State's share of the royalty so that they would have more flexibility in responding to energy development.

The additional 12.5 percent granted to States was not earmarked for specific projects, but was intended for use in such programs as planning community development, expanding public services, and funding new public facilities, with priority going to those areas suffering the greatest impact. As a result of these amendments, the 1976 policy for Federal royalty so that they would have more to help State accommodate energy development than that of 1920.

Unfortunately, passage of the WPT undermined the 1976 policy by taxing the Federal and State share of the mineral royalty, thus reducing the funds returning to the States. Congress has turned its back on its commitment to assist the States in dealing with energy development. In many regions of the West, energy development is deterred by the fact that local governments are unable to provide financing for basic human services. Oil exploration cannot go forth when workers have no schools for their children, have no hospitals for when they are sick, and have no police for their protection.

Adequate services must be provided if we want to attract workers to the energy projects of the Western States. Nonetheless, the States will not be able to provide support for the development of domestic energy resources unless they are able to raise the revenues needed to address energy impact problems. The legislation I am introducing today will help provide adequate funds to the States and facilitate energy development by allowing the full share of the States' royalty from Federal leases to return to the States.

By preventing local ad valorem taxes from being deducted, the WPT deals yet another heavy-handed blow to State and local governments and further distorts their tax treatment. While it allows State severance taxes to be deducted, the WPT reverses this treatment for taxes levied at the local or county level. The nondeductible status of ad valorem taxes generates pressures for these governments to turn them into a severance tax. Any State is free to work with county and local governments to convert ad valorem taxes to a State severance tax, but pursuing this alternative is like opening Pandora's box, with all the attendant consequences.

To change the status of a local ad valorem tax to a State severance tax would

require a constitutional amendment in many States. This would inevitably lead to the disintegration of the fiscal relationship between States and their political subdivisions, since revenue formerly going straight to the local level would be routed instead through the State government. Many extra layers of bureaucracy would be needed to rearrange long-established patterns of distributing funds to local governments, and the end result would be that everyone winds up with less money because so much is wasted in the shuffle. The nondeductibility of ad valorem taxes affects not only Government revenue, but also oil company revenue.

Oil companies face the burden of having to pay a double tax on their production—both ad valorem and windfall tax. The additional tax liability can do nothing but discourage the search for and production of domestic oil. My legislation relieves the varied burdens of WPT by making all ad valorem taxes deductible.

The problems created by the WPT for Indian tribes are no less discriminatory than those faced by city and county governments. The WPT puts Indian oil at competitive disadvantage by allowing oil companies to deduct a State severance tax, but not a tribal severance tax. Companies operating on the reservation of a tribe that imposes a severance tax would have to pay the tribal tax, and then pay a Federal tax on the tax paid to the tribe. The logical alternative for oil companies when confronted with a double tax is to abandon plans for exploration and development on tribal land, which leaves the Indians without a vital source of revenue.

Anyone who is familiar with the economic conditions on most reservations knows that the populations are extremely poor and that there is little business activity to produce revenue. Tribal governments must depend on the royalties and tax revenues from their oil to provide the funds needed to pay for public services. However, the unequal treatment puts pressure on the tribes to give up consideration of severance taxes as a source of revenue, which would further narrow an already meager tax base.

The enactment of taxes on the severing of oil from reservation land is an inherent power of tribal governments—a power recognized by both the courts and the Congress. The Natural Gas and Policy Act acknowledged a tribe's right to tax, and recently the 10th Circuit Court of Appeals in Merrion against Jicarilla Apache Tribe reaffirmed it. Yet, the effect of the WPT is to deny that right and depart from established Federal tax policy. Once again, the WPT impinges on the ability of a government unit to raise funds necessary to meet basic public services. Under this legislation, tribal severance taxes would be made deductible from the WPT and the deleterious effects of this double taxation would be eliminated.

The last problem to be addressed by this legislation is an oversight created by language in the Windfall Profit Tax Act, an oversight that deprives tax-exempt Government entities of money from their net profits interest in oil production. The ambiguity arises from use of the term "economic interest" in crude oil to describe the governmental interest that qualifies for exemption. The phrase "economic interest," used for depletion purposes by taxpaying oil companies under standard Federal income tax law, has acquired a meaning far broader than the company's net profits interest under an agreement with a nontaxable Government entity. Thus, an oil company with a mere 5 percent, or less, net profits interest may be deemed to have a depletable "economic interest" of 30 percent or more. Reciprocally, the economic interest of the Government agency, despite its 95 percent net profits share, may be 70 percent or less. This increases the WPT paid to the Federal Government by the oil company. The company then deducts the extra tax from gross profits before distributing the net profits share to a tax-exempt public entity, such as a State. The effect is to impose 95 percent or more of the additional tax on the State by directly reducing the amount of money left after expenses which is divided as net profits This legislation revises the definition of economic interest and changes the provision so that tax-exempt entities will receive the full share of their new profits agreements.

Mr. President, the windfall profit tax cannot be allowed to continue to oppress State, local, and tribal governments. The tax treats these bodies as culprits, when in fact, they are victims of its singular purpose to raise revenues for the Federal Government. The Federal Government must stop usurping funds belonging to lower levels of government.

The other government entities have a responsibility to provide basic public services to their people, and their ability to meet public needs should not be curtailed by Federal taxes. Passage of my legislation would alleviate the burdens created by the windfall profit tax on State, local, and tribal governments, and in doing so, it would provide those governments with the funds needed to support energy development. I urge my colleagues to support this needed change in the Windfall Profit Tax Act.

I request unanimous consent that the bill be reprinted, in the RECORD, following remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 700

Be it enacted by the Senate and House of Revresentatives of the United States of America in Congress assembled,

SECTION 1. QUALIFIED GOVERNMENTAL INTEREST TO INCLUDE STATE SHARE OF ROYALTIES UNDER THE MINERAL LAND LEASING ACT.

Subsection (a) of section 4994 of the Internal Revenue Code of 1954 (relating to qualified governmental interest) is amended by adding at the end thereof the following new paragraph:

"(4) AMOUNTS RECEIVED UNDER MINERAL LANDS LEASING ACT.—The right of a State to receive payments under section 35 of the Act entitled "An Act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium in the public domain", approved February 25, 1920 (41 Stat. 437, 450; 30 U.S.C. 191), shall be treated as a qualified governmental interest.".

SEC. 2 SEVERANCE TAXES.

(a) SEVERANCE TAX IMPOSED BY INDIAN TRIBES.—Subsection (c) of section 4996 of the Internal Revenue Code of 1954 (relating to severance tax adjustment) is amended by adding at the end thereof the following new paragraph:

"(4) SEVERANCE TAX IMPOSED BY INDIAN TRIBES.—The term 'severance tax' shall include any severance tax imposed by an Indian tribe, and such severance tax shall be treated in the same manner as a severance tax imposed by a State.".

(b) AD VALOREM TAXES.—Subparagraph (B) of section 4996(c)(2) of such Code (relating to definition of severance tax) is amended by inserting immediately before the period a comma and the following: "or on an ad valorem basis determined with respect to the price at which such oil is sold".

SEC. 3. ASSIGNMENT OF COST RECOVERY OIL TO EXEMPT GOVERNMENTAL ENTITIES IN ACCORDANCE WITH THEIR NET PROFITS INTERESTS FOR PURPOSES OF WINDFALL PROFIT TAX

(a) GENERAL RULE.—

(1) DEFINITION OF PRODUCER.—Paragraph (i) of section 4996(a) of the Internal Revenue Code of 1954 (defining producer) is amended by redesignating subparagraph (B) as subparagraph (C) and by inserting after subparagraph (A) the following new subparagraph:

"(B) CERTAIN NET PROFITS INTERESTS HELD BY EXEMPT GOVERNMENTAL ENTITIES.—If under a net profits agreement an exempt governmental entity's cost recovery oil share is less than its net profits share—

"(i) such entity shall be treated as the producer of enough additional cost recovery oil that its cost recovery oil share equals its net profits share, and

"(ii) each party to the agreement having a cost recovery oil share greater than its net profits share shall have the cost recovery oil of which it is deemed to be the producer properly reduced so that the aggregate reduction under this clause equals the increase under clause (i)."

(2) CLERICAL AMENDMENT.—Subparagraph (A) of such paragraph (1) is amended by striking out "subparagraph (B)" and inserting in lieu thereof "subparagraphs (B) and (C)".

(b) NET PROFITS INTEREST; COST RECOVERY OIL.—Section 4996 of such Code (relating to other definitions and special rules) is amended by redesignating subsection (h) as subsection (i) and by inserting after subsection (g) the following new subsection:

"(h) TERMS USED IN SUBSECTION (a)(1)(B).—For purposes of subsection (a)(1)(B) and this subsection—

"(1) NET PROFITS AGREEMENT.—The term 'net profits agreement' means an agreement providing for sharing part or all of the production of crude oil from a property where—

"(A) 1 or more parties to the agreement are to be reimbursed for qualified costs by the allocation of cost recovery oil, and

"(B) 1 or more parties to the agreement are to receive a share of any production of crude oil from the property remaining after reduction for the cost recovery oil referred to in subparagraph (A).

"(2) COST RECOVERY OIL DEFINED.—The term 'cost recovery oil' means crude oil produced from the property which is allocated to a party as reimbursement for qualified costs paid or incurred with respect to the property.

"(3) QUALIFIED COSTS.—The term 'qualified costs' means any amount paid or incurred for exploring for, or developing or producing, 1 or more oil or gas wells on the property.

"(4) EXEMPT GOVERNMENTAL ENTITY.—The term 'exempt governmental entity' means

any State or political subdivision thereof and any agency or instrumentality of a State or political subdivision thereof.

"(5) SHARE.—Any party's cost recovery oil share or net profits share is the percentage (or other proportion) which such party has in cost recovery oil or net profits, as the case may be.

"(6) PROPER REDUCTION.—The reductions under clause (ii) of subsection (a)(1)(B) shall be made on the basis of the respective amounts by which each party's cost recovery oil share under the agreement exceeds what such share would be if it were commensurate with such party's net profits share.

"(7) SCOPE OF AGREEMENT.—A net profits agreement shall be treated as covering only shares of production of crude oil held by parties who hold economic interests in the property (determined without regard to subsection (a)(1)(B))."

(c) NET INCOME LIMITATION.—Subsection (b) of section 4988 of such Code (relating to net income limitation on windfall profit) is amended by adding at the end thereof the following new paragraph:

"(6) COST RECOVERY OIL COVERED BY NET PROFITS AGREEMENT.—For purposes of paragraph (2), if any exempt governmental entity is treated under section 4996(a)(1)(B) as the producer of any portion of the cost recovery oil covered by a net profits agreement (within the meaning of section 4996(h))—

"(A) no other person shall include in his gross income from the property the gross income from such portion, and

"(B) the qualified costs allocable to such portion shall be treated as paid or incurred by such governmental entity (and only by such governmental entity)."

(d) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendments made by this section shall apply to oil removed after February 29, 1980.

(2) NO INTEREST FOR PAST PERIODS.—No interest shall be paid or credited with respect to the credit or refund of any overpayment of a tax imposed by this title, and no interest shall be assessed or collected with respect to any underpayment of the tax imposed by this title, for any period before the date which is 60 days after the date of the enactment of this Act, to the extent that such overpayment or underpayment is attributable to the amendments made by this section.

SEC. 4. EFFECTIVE DATE.

The amendments made by this Act shall apply to periods after February 29, 1980.

● Mr. HAYAKAWA. Mr. President, I am pleased to join Senators WALLOP, DOMENICI, CRANSTON, and SCHMITT in introducing legislation designed to address some of the problems created with the passage of the Windfall Profit Tax Act in December of 1979. Congress enacted the windfall profit tax measure which covered a new and unfamiliar subject area. The effects of the tax on domestic production, employment, and economic growth could not be predicted. Now, more than a year later, I hope Congress will have the flexibility to alter some of the more onerous and ineffective provisions of the measure. This bill specifically addresses those provisions which have caused financial hardships and impeded the economic growth of States, local governments, and Indian tribes.

During consideration of the tax measure last December, the Senate passed an amendment that would exempt from the windfall profit tax the royalties going to the Federal Government from oil production on federally owned lands. Unfortunately, the conference dropped this provision, and in so doing, severely impacted the States with oil-producing Federal lands within their boundaries.

Since 1920, these State governments have been entitled to a percentage of the Federal royalty, and their share was increased to 50 percent with enactment of the Mineral Lands Act Amendments in 1976. The revenue loss created by the oil tax is substantial to the States that depend on this income to provide basic public services to keep pace with energy development in the State. The revenue is directed toward such programs as public education, road maintenance, and adequate medical facilities. I do not believe the Windfall Profit Tax Act was intended to reduce the State's revenue designated for such purposes, and passage of this measure will alleviate the unnecessary burden on the States created by the tax.

Another difficult financial situation was created for State and local governments in the Windfall Profit Tax Act by the omission of a provision which would allow ad valorem or property taxes to be deducted from the crude oil tax even though State severance taxes may be deducted. In those States which impose ad valorem taxes, the oil companies are required to pay both the ad valorem and the windfall tax. Such a situation could only discourage additional drilling in the area.

Furthermore, the local governments who impose the ad valorem tax are unduly singled out to bear the consequences. The process for a local government to convert their ad valorem tax to a severance tax is possible, but complex and cumbersome. Clearly, the easiest approach would be to make all ad valorem taxes deductible from the crude oil tax, which this legislation proposes.

Along the same lines, the Windfall Profit Tax Act omits language which would allow severance taxes imposed by tribal governments to be deductible from the crude oil tax. This does away with a major source of revenue for the tribes which are in many cases poor with limited means to produce additional revenue. As with the ad valorem tax, oil companies operating on tribal lands which impose a severance tax would have to pay the tribal tax as well as the Federal tax creating another double taxation scenario.

A final section of this legislation is a technical one in nature, attempting to clarify what is clearly the intent of Congress in dealing with State exemption from the windfall profit tax measure. The law provides that when an "economic interest" in crude oil is held by a State or political subdivision, or by an agency or instrumentality of a State or political subdivision, and all the net income received is dedicated to a public purpose, the crude oil property allocable to the interest is exempt from the crude oil tax.

Congress recognized the need for States to develop their public land resources at their own discretion. California has chosen to enter into a "net profits" contract where State-owned oil is produced by private oil companies. These companies receive 50 percent of the net profits with 95 percent being allocated to the States. Net income is calculated after production costs and severance taxes are subtracted.

The intent of Congress in dealing with State-owned oil in the Windfall Profit Tax Act—that State's 95-percent share of the profits be exempt, and the oil companies' 5-percent share be taxed—has been askewed by the use of the term "economic interest" which the Treasury Department interprets as ambiguous. "Economic interest" as applied to net profits agreements between public and private producers has a broader implication when used as a technical term in income tax law. Under income tax precedents, the oil company claims a depletable "economic interest" not only in its 5-percent share of the net profits, but in the oil that must be produced to make up the expenses of production. This interpretation leaves the State with an "economic interest" in about 70 percent of the oil rather than its 95 percent net profits share. The taxes levied on the unintentionally enlarged oil company interest are charged to the State's exempt interest and thus prevent the State from obtaining the complete exemption intended.

Mr. President, the need to reexamine the Windfall Profit Tax Act—the largest tax measure passed by Congress—is certainly understandable and essential. I believe this legislation takes a giant step in improving the tax bill by creating a more stable financial environment for States, local governments, and Indian tribes. I urge my colleagues' support for the measure.●

By Mr. BENTSEN:

S. 701. A bill to amend the Internal Revenue Act of 1954 to provide for the exclusion from taxation of interest earned on deposits which are used for residential mortgage lending purposes; to the Committee on Finance.

INTEREST EXCLUSION ON MORTGAGE ACCOUNTS

● Mr. BENTSEN. Mr. President, today I am introducing the Home Mortgage Incentive Act of 1981.

This measure would amend the Internal Revenue Code to provide an exclusion from gross income for interest earned on savings deposits which are used by the financial institutions for residential mortgage lending purposes.

Inflation is dealing a crippling blow to our Nation's economy. Nowhere is this clearer than the housing industry which is dominated by small businesses. The housing industry is the victim of a vicious inflationary spiral and extraordinary and oppressive interest rates.

Builders cannot build and consumers cannot buy with mortgage interest rates exceeding 15 percent. The housing industry is suffering a disproportionate burden in the fight against inflation.

There is no more fundamental obligation to society than that of providing adequate shelter for our citizens. However, the purchase of a home has become unaffordable by most Americans, resulting in the elimination of one of the greatest incentives to work and save. This problem is even more acute for the first-time home buyer. In 1977, 36 percent of

mortgage loans were made to first-time home buyers; by 1979 that proportion had dropped to 18 percent. Further, employment in homebuilding and associated industries is down to 1.87 million from 3 million jobs in 1979. The unemployment rate in construction is reported by the Commerce Department to be 13 percent.

The average cost of a new home this year is approximately $65,000. Under present interest rates only 5 percent of the households could qualify for a mortgage on such a home. The principal and interest payment on a 30-year mortgage for a $65,000 home at the current 15-percent interest rate is over $275 a month higher than at an 8-percent rate. The combination of rising prices and high mortgage rates has had a serious impact on new home sales and will continue to do so in the future.

Nothing better evidences the impact of high interest and high prices in housing than the reduction of housing starts that we have witnessed over the last 2 years. In 1978 housing starts were over 2 million, however, that number was down to only 1.3 million in 1980. This substantial reduction in housing starts not only has created high unemployment in the construction industry but endangers our ability to provide adequate housing for the future. According to the best estimates available, some 23 million new homes must be built during this decade to maintain an equilibrium between supply and demand. That is 2.3 million homes per year. We got off to a sorry start in 1980, with only 1.3 million homes built in this country. Further, the Nation's production of new housing for 1981 is already seriously below the schedule.

Before we can expect increasing housing starts there must be sufficient funds available, at reasonable rates, for new home buyers. This will require additional savings on the part of Americans. Unfortunately our present tax system encourages consumption and not savings. America is the only major industrial nation which fails to encourage savings, consequently, Americans currently save only 5.3 percent of their disposable income.

Funds available for mortgages declined from $99 billion in 1978 to $71 billion last year. This represents a $28 billion decline in funds available for the housing industry. Thus, without savings, there can be no money loaned for new home construction or for capital improvements. Without investment, productivity declines, inflation increases and no new jobs are created.

Federal Reserve Board Chairman Volcker believes that for those industries like housing, "at the end of the whip" of the Feds policies, "some action to moderate the sharpest edges can in some circumstances be justified and not inconsistent with the whole." If housing starts fall sharply, Volcker observed, in response to questions before the Senate Banking Committee on February 22, 1980 "maintaining a certain level of activity in that industry is not at all inconsistent with an attack on inflation over time. You do not want to close down the whole industry and then have to build it up again as soon as money becomes more fully available." The decline in the housing industry has already been recorded; we must stop it before the entire industry is closed down.

In addition to making housing available, our proposal will do more to create badly needed new jobs in the sagging housing industry and associated industries—a million jobs and more once it gets rolling—than any other proposal that has been offered up to this point. By exempting the interest earned on savings accounts for the use of residential mortgages my proposal will insure that funds necessary for the construction of housing are made available. In addition, it will help bring mortgage rates down to the 8-percent range affordable to the average American family.

Further, by putting Americans back to work in the construction industry my proposed tax cut, instead of costing the Government money, can actually mean a net gain to the U.S. Treasury of as much as $5 billion a year according to projections of the Congressional Budget Office.

Mr. President, if you want to reduce interest rates on mortgages, if you want to provide an adequate supply of money at reasonable rates for new housing, if you want to reduce inflation by lowering the cost of housing, if you want to see a significant increase in the number of jobs in America, this bill I am introducing is the best way to go about it. I urge my Senate colleagues to join me in assuring its expeditious passage.●

By Mr. BAUCUS (for himself, Mr. PACKWOOD, Mr. CANNON, Mr. RIEGLE, Mr. BENTSEN, Mr. WALLOP, Mr. MATSUNAGA, and Mr. BOREN):

S. 702. A bill to allow an income deduction for certain motor carrier operating authorities to offset the impact of the Motor Carrier Reform Act of 1980; to the Committee on Finance.

MOTOR CARRIER OPERATING RIGHTS DEDUCTION

● Mr. BAUCUS. Mr. President, I am pleased to introduce legislation which will rectify a tax problem created by administrative deregulation which culminated in passage of the Motor Carrier Act of 1980. It is especially gratifying to be joined by my colleagues, Senators PACKWOOD, CANNON, RIEGLE, BENTSEN, WALLOP, MATSUNAGA, and BOREN in this important effort.

Four and one-half decades ago, Congress enacted the Motor Carrier Act in response to deepening instability in the Nation's transportation system. Former Montana Senator Burton Wheeler was floor manager of that legislation. His efforts, and those of his colleagues, set the framework for a relatively healthy motor carrier industry. Over the years, some 17,000 companies acquired operating rights under that law—some by Interstate Commerce Commission certification, grandfather rights, and many by purchase. These operating rights entitle motor carriers to provide service on specified routes. They have constituted a crucial part of motor carriers' asset structure for many years—in some cases, amounting to over 50 percent of a concern's assets. Often, they have been used as collateral for the acquisition of needed capital.

In the last session of the Congress, the rules of motor carrier regulation were changed, Henceforth, it will be much easier to initiate service on various routes. As a result, the operating rights held by motor carriers have been rendered virtually worthless.

The decline in the value of these rights has been precipitous and could significantly weaken otherwise healthy concerns. In addition, the accounting profession has been directed by the Financial Accounting Standards Board to write off immediately the value of operating authorities because their value has been permanently and substantially impaired. Since Federal tax law does not clearly provide for this situation, there is some uncertainty concerning the proper tax treatment of these now worthless operating rights.

Congress was aware that the Motor Carrier Act might cause a number of problems. In fact, the House report on the bill clearly states:

> Should it become apparent that the effect of this legislation has been to substantially erode the value of operating rights, then appropriate relief for such results should be considered, as early as possible.

There is virtually no dispute that the operating rights of motor carriers have lost nearly all their value through no fault of the carriers. The sole cause of the declining value is the relaxed Federal procedure for entry and motor carrier service.

This legislation is straightforward in its handling of the problem. A carrier which held operating authority on July 1, 1980—the approval date of the Motor Carrier Act—would be permitted an ordinary deduction equal to $50,000 or the aggregate adjusted basis of the rights held, whichever is greater. The deduction would be prorated over a 36-month period.

Mr. President, I am confident that my proposal will provide necessary and equitable relief for one of the principal adverse effects of motor carrier regulation reform. We knew the problem would occur. It only remains for us to resolve it.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 702

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DEDUCTION FOR MOTOR CARRIER OPERATING AUTHORITY.

(a) GENERAL RULE.—For purposes of chapter 1 of the Internal Revenue Code of 1954, in computing the taxable income of a taxpayer who, on July 1, 1980, held one or more motor carrier operating authorities, an amount equal to the greater of—

(1) $50,000, or

(2) the aggregate adjusted bases of all motor carrier operating authorities held by the taxpayer on July 1, 1980, or acquired on

or subsequent thereto pursuant to a binding contract in effect on such July 1, 1980, shall be allowed as a deduction ratably over a period of 36 months. Such 36-month period shall begin with the month of July, 1980, or, at the election of the taxpayer, the first month of the taxpayer's first taxable year beginning after July 1, 1980.

(b) DEFINITION OF MOTOR CARRIER OPERATING AUTHORITY.—For purposes of this section, the term "motor carrier operating authority" means a certificate or permit held by a motor common or contract carrier of property and issued pursuant to subchapter II of chapter 109 of title 49 of the United States Code.

(c) SPECIAL RULES.—

(1) CONTROLLED GROUPS.—For purposes of this section—

(A) all component members of a controlled group (within the meaning of section 179 (d)(7) of the Internal Revenue Code of 1954) shall be treated as one taxpayer, and

(B) the dollar amount specified in subsection (a)(1) shall be apportioned among the component members of such controlled group in such manner as the Secretary of the Treasury (or his delegate) shall by regulations prescribe.

(2) ADJUSTED BASIS.—For purposes of the Internal Revenue Code of 1954, proper adjustments shall be made in the adjusted basis of any motor carrier operating authority held by the taxpayer on July 1, 1980, for the amounts allowable as a deduction under this section.

(d) EFFECTIVE DATE.—The provisions of this section shall apply to taxable years ending on or after July 1, 1980.●

● Mr. CANNON. Mr. President, I am pleased to join my distinguished colleague from Montana in cosponsoring this legislation to allow an income tax deduction for the loss of value of certain motor carrier certificates. My principal concern is one of basic equity for trucking firms which have expended thousands of dollars to purchase operating authority that has suddenly lost most or all of its value with the basic reforms in trucking regulation implemented last year.

It is important for the Senate to understand that the current situation is neither unexpected nor inherently undesirable. The fact that motor carrier certificates are now worth much less is due to the fact that entry into the trucking business is no longer restricted in any substantial way by the Interstate Commerce Commission. This was the intent of Congress, and there is general consensus that there is no turning back on this new policy.

For 45 years, however, entry into the trucking business was limited by the ICC. As a result, operating certificates became very valuable. They represented legal monopolies to provide specified service and carried certain obligations with them as well. When a new company wanted to get into the trucking business or an existing carrier wanted to expand, there were two basic options. Either the applicant for new authority could attempt to convince the ICC that there was a need for the service and enter into an extraordinary long proceeding with no guarantee of success, or it could purchase an already existing certificate from another company who was willing to sell. Due to the cost and uncertainty of the regulatory process, many companies chose to purchase authority and avoid the regulatory obstacles. Eventually the cost of the certificates became quite high. The most widely publicized case is one of a large bankrupt carrier whose authority was sold in the early 1970's for over $20 million.

When we passed the Motor Carrier Act of 1980, Congress instructed the ICC to liberalize its policy with respect to entry into the trucking business. This it did. Under current policy, the likelihood of an applicant being successful at the Commission is extremely high. Moreover, under the new procedural rules, the time and expense of acquiring the authority are slashed drastically. Hence it is no longer necessary to purchase authority from someone else in order to expand and the value of those certificates have fallen to virtually zero.

My concern is for the motor carriers who recently purchased authority under the old set of rules and expectations and suddenly find that this purchase has resulted in a piece of paper that has little real value. Arguably, those companies who purchased authority many years ago may have had enough time to recoup that investment by being able to conduct business in an environment with less competition than otherwise would have existed. Economists call this the earning of "monopoly rents." But clearly, companies who purchased the authority in the past few years have not had the time to earn revenues sufficient to repay their investment in the operating certificates.

What is at issue then is a question of equity. The Federal Government changed the rules. In my view the rules were changed wisely. Still, certain businesses have realized a true economic loss. Hence as a matter of basic fairness these businesses should be able to deduct from their taxes the losses incurred as a result of these Government actions.

There is only one aspect of the bill that gives me serious concern. As currently written, the bill would allow a writeoff for all certificate authority—even that which was "grandfathered" in for carriers in 1935. This authority was granted by the Government for no cost whatsoever by the carriers involved. Even if these carriers paid nothing for the authority and never carried the value of these certificates on their books, the bill would allow a $50,000 tax deduction. The equity argument is clearly not a compelling one for this type of situation. Accordingly, I want to work closely with Senator BAUCUS and other Members of the Senate to examine this particular problem. If necessary, we must make changes in the bill to assure that this provision does not jeopardize passage of legislation. The focus should be on those companies that have suffered a real economic loss.

With that one reservation, I enthusiastically support this bill. I commend Senator BAUCUS for his astute observation of this problem and will offer all the help that I can to see that the bill is passed.●

● Mr. PACKWOOD. Mr. President, I am pleased to cosponsor this legislation, and I congratulate the Senator from Montana for its introduction.

Last year the Congress enacted the most important changes in the regulatory structure affecting motor carriers since 1935—the Motor Carrier Act of 1980. The trucking industry, the Interstate Commerce Commission, and the Congress are now all closely monitoring the situation to assure full implementation of the reforms contained in that act.

This legislation is designed to remedy one unfortunate problem most everyone expected would arise. Prior to the Motor Carrier Act of 1980, trucking certificates were bought and sold on the open market. In many cases, motor carriers invested in those rights, in good faith and based on the then existing industry conditions. The Motor Carrier Act of 1980 so substantially eased the requirements for entering the trucking business, wreaking havoc with those good-faith investments. These losses should be permitted to be written off for tax purposes.

Had time permitted, I would have preferred to treat this matter last year. It is my hope and desire that this issue be resolved during this Congress. This legislation is a necessary consequence to the Motor Carrier Reform Act of 1980, and I enthusiastically support its consideration by the Finance Committee.●

By Mr. JEPSEN:

S. 704. A bill to amend the Commodity Credit Corporation Charter Act to establish a revolving fund to finance short-term export credit sales of agricultural commodities produced in the United States; to the Committee on Agriculture, Nutrition, and Forestry.

EXPORT FINANCING PROGRAM

● Mr. JEPSEN. Mr. President, the future of our agricultural economy and our economy in general relies heavily on our success in the world marketplace. This is an especially important consideration today when the United States is suffering from a large deficit in its foreign trade balance. At present agricultural exports make up more than 20 percent of total U.S. exports. In 1973, which was the last good year for most farmers, agricultural exports accounted for more than 25 percent of total U.S. exports.

Two years ago the Congress passed legislation designed to aid agricultural exports. Unfortunately, little has been done to implement its provisions. The Agricultural Trade Act of 1978 allows the Commodity Credit Corporation to finance commercial export sales of agricultural commodities out of private stocks with short-term credit, and to finance sales of its own stocks on long-term credit.

It also provides for the upgrading of U.S. agricultural attachés abroad, and establishment of up to 25 U.S. agricultural trade offices abroad.

Last, the bill created the position of Under Secretary of Agriculture for International Affairs and Commodity Programs, and requires the Secretary of Agriculture to report to Congress yearly on measures taken to increase exports. But as I said, almost nothing has been done to implement even these limited measures for increasing agricultural exports.

Today I am introducing legislation which I feel will greatly improve our Nation's agricultural export policy. This legislation should help alleviate problems within the Commodity Credit Corporation's export financing program.

There are presently three basic markets for farm commodities. The first is a cash market in which all countries are eligible except those prohibited under provisions of the Trading with Enemy Act.

Second, there is a market that is financed by the USDA's Commodity Credit Corporation. This program is known as the GSM–5 program. GSM–5 is a commercial program in every respect—the interest rate reflects market rates, the terms are normally 1 to 3 years. In this program, CCC lends money directly to the exporting entity, a trading firm or farmer cooperative, which then exports the goods to the importing nation that then repays the loan to the CCC. The principal and interest are credited to the Treasury.

Since the GSM–5 program was established in 1956, there have been no loan forfeitures, although a small number of loans have been rescheduled. GSM–5 has returned more money to the Treasury than it has taken in revenues. This has been true because the interest rate charged in the program reflects the prime interest rate which is above the cost of money to the Treasury.

The last market for our agricultural products is the Public Law 480 food for peace program. Commodities shipped under this program are either provided without charge or sold on concessional terms. Public Law 480, as a result, fulfills both a food assistance and market development objective.

There are three reasons for establishing a revolving fund for the GSM–5 program. First, the elimination of the current constraint on sales. There is strong evidence that the current program has cost the United States export sales to a number of countries. With strong correlation between farm income and export demand, a marginal increase in exports would have a substantial impact on farm income; second, the elimination of the inequities that currently exist between the United States and competing nations. Most of our competitors in the agricultural export market finance their activities through a revolving fund; third, it will create an export financing program which will be consistent with our aggressive agricultural export policy.

From a budgetary standpoint, the creation of a revolving fund is viewed with skepticism. For this reason, I am today introducing only the authorization for a revolving credit fund and plan to wait until the budget deficit is decreased appreciably before pushing for appropriations.

Mr. President, I believe a revolving export credit system is of utmost importance to the U.S. trade ability. In the past 2 weeks of hearings on the 1981 Food and Agriculture Act, many organizations have testified and several have supported the establishment of a revolving credit fund. Among those in support are: The American Farm Bureau Federation, the National Grange, the American Agriculture Movement, Midcontinent Farmers Association, the National Corn Growers Association, the National Grain and Feed Association, and the American Soybean Association.

As you can see, support for this bill is substantial. This legislation is important to our farmers and consumers. The bill I sponsor today is an important step toward realizing the full potential of our agricultural sector.●

By Mr. DOMENICI:

S. 705. A bill to authorize the Secretary of Agriculture to convey certain National Forest System Lands, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

S. 706. A bill to establish a national policy for the timely notice, conduct, approval, and record of Federal land surveys, and for other purposes; to the Committee on Energy and Natural Resources.

LEGISLATION RELATING TO LAND SURVEY ISSUES IN THE WEST

● Mr. DOMENICI. Mr. President, I am pleased today to introduce legislation directed toward resolving longstanding Federal land survey issues prevalent throughout the Western United States, which are affecting the property titles of thousands of Americans. This legislation will provide the Secretary of Agriculture with the administrative capability to address as many as 50,000 title claim and trespass situations existing throughout the National Forest System and close to 100,000 title claims with the Department of the Interior.

This problem was recently brought to my attention when citizens of Lincoln and Otero Counties in southeastern New Mexico revealed that their property titles were being adversely affected by "improved" Federal land surveys being made by the Bureau of Land Management and the Forest Service.

Hundreds of property owners, the New Mexico State Land Commissioner, New Mexico Department of Agriculture, Otero Soil and Water Conservation District, New Mexico Cattle Growers Association, Arizona Cattle Growers Association, village of Cloudcroft, Otero County Electric Cooperative, Otero County Commissioner, New Mexico Association of Counties, National Association of Counties, land surveyors of New Mexico, New Mexico private landowners, New Mexico abstractors, New Mexico bankers, New Mexico savings and loan associations, real estate firms of Otero County, State Representatives John Mershon and Maurice Hobson, State Senator Wyatt Atkins, Former State Senator Aubrey Dunn, Steering Committee Chairman Dorsey Bonnell, and many other concerned New Mexicans have all joined together to seek to resolve a critical far-reaching problem.

The Forest Service, as part of their continuing program of responsible management, have been engaged for many years in properly locating and identifying the boundaries of National Forest System lands.

This effort has become increasingly more important as land values rise, and resource values increase, in order to protect the interests of all the people, as well as adjacent landowners.

However, two distinct problems have become apparent in the conduct of these surveys; the first related to timeliness of the survey actions, the second related to the increasing technical accuracies surveyors are capable of achieving today.

During the period 1967–69, the Forest Service contracted with the Bureau of Land Management, which has the responsibility for such matters, to conduct a retracement of the original turn of the century General Land Office survey for certain section and township corners within the Lincoln National Forest in southeastern New Mexico.

During the conduct of the survey, many original corners could not be found. The surveyors reconstructed from the original survey notes, and by other accepted methods, the locations of the original corners and set standard brass survey monuments marking these locations.

In late 1969, the retracement was abandoned for lack of funds. Since that time, the Bureau of Land Management has failed to issue a certificate of approval certifying the 1967–69 survey to be correct, and have not removed the temporary brass monuments which have stayed in place, erroneously now, for as many as 14 years. Within the last 3 years, with funding once again available, the Bureau of Land Management has retraced much of the 1967–69 resurvey and has relocated many of these corners to what is presumably determined to be the proper location.

A single corner may have been moved several feet in this period of time. A certificate of approval has not yet been issued by the BLM for this latest survey either.

Another problem has resulted from this fundamental problem. Local private land surveyors have, albeit improperly, utilized the uncertified brass BLM survey monuments over the last 14 years as "established official points of reference" to make private land surveys which title companies and lending institutions have accepted as "certified surveys" for clear title descriptions.

Admittedly, these surveys should never have been accepted by the title companies, nor should the surveys have been conducted from an uncertified monument. In defense of the private land surveyor, I should say that neither the 1967–69 survey maps, nor the 1979–80 survey maps, were available to the private land surveyor in the local land office, nor are the monuments dated to reflect the year of survey.

In other words, there was nothing of record to indicate a particular monument was not the official monument. There was certainly no reason to believe a monument location would be altered in the future.

The second problem I mention related to the accuracy of surveys. The Forest Service uses a highly accurate laser

range pole and electronic transit when subdividing sections in the survey process to locate interior corners to the section in order to establish forest boundaries. Original private land surveys used methods previously available and accepted within the realm of practicability such as the compass, chain, and transit. Prior individual surveys on private lands, performed by registered engineers of the State of New Mexico, from an established corner "then available" are being considered in error by the recent Forest Service highly accurate subdivision surveys, even though the prior surveys have had a permanency of several decades. The sophisticated technology of today far exceeds the capabilities of earlier equipment, particularly in mountainous and wooded terrain.

The results of the new methods have been to find a number of surveys of long-standing in error and the declaration by the Forest Service that their survey is correct. Consequently, fences are now off line, sometimes by 50, 60 or more feet, and must be moved to conform to the new line as suggested by the Forest Service.

In fairness, many old fences were placed on a "line of convenience," that is, from tree to tree, to skirt a rocky area, et cetera, and only approximated the property line. These are not the problems at issue here.

The problem at issue has resulted in loss of assets, and the clouding of property titles of privately owned land, which had previously perfected titles. Clearing these titles now involves waiting until all Federal land resurveying and subdividing is completed and certified. If a discrepancy exists, a private landowner must seek relief through litigation against the Federal Government, or pay for a new private land survey to redescribe his title. In the meantime, no one can sell or exchange property with an insured title.

In addition, the landowner may have been paying taxes on lands that will ultimately not be his.

Many of the individual cases here could be resolved if the Federal land surveyors followed the administrative guidelines in the book "Manual of Surveying Instructions—USDI, Bureau of Land Management" and the act of March 3, 1909, as amended, which requires the surveyor not to impair the bona fide rights of the landowner by such resurvey or retracement. Bona fide rights are those acquired in good faith under the law, and the surveyor should be concerned with the question whether the lands have actually been located in good faith.

By fundamental law the corners of the original survey are unchangeable. Even if the original surveys were poorly executed, it still controls the boundaries of land patented under it. The problem stems, in some cases, from the Federal surveyor's failure to conduct the survey with a "spirit of cooperation" to work with the individual affected landowners and their titles, records of survey, and maps to establish if in fact a bona fide right acquired in good faith is present and should be considered as an unchangeable original survey.

Many affected landowners, given the current situation, are recognized by the Forest Service as innocent trespassers on Federal lands but, under existing law, have no recourse other than applying for a long-term lease of the lands in contention. The Forest Service has been very cooperative in granting special use permits to landowners so affected.

The legislation which I introduce today recognizes that in certain cases a landowner having no advance notice of the fact that his improvement encroached upon Federal land, and who in good faith relied upon an erroneous survey, title search, or other land description indicating there was not such encroachment, may acquire those parcels up to a maximum of 10 acres, or 40 acres if intersected with or adjacent to mineral patents.

This legislation will eliminate the need for correcting many boundary disputes through private relief bills in the Congress.

FEDERAL LAND SURVEY ACT OF 1981

Mr. President, I also introduce today another bill that will help alleviate future land survey problems of the type I have outlined above.

This bill will encourage the timely conduct and approval of Federal land surveys, it will foster and promote a spirit of cooperation with the landowners and local government in the survey of public lands, it will promote the stability and permanence of the Nation's records of survey, and will provide the basis for a multipurpose national land information system.

Section 3 of this bill deals with the role of the Federal Government in this problem area of official land surveys and outlines the general responsibilities of the Federal Government in this area.

Section 4 spells out the exact steps the Secretary of the Interior or such agency as designated by the Secretary should take in carrying out the responsibilities.

These steps include the establishment of a systematic integrated approach which coordinates all Federal land surveys programs with affected parties by the Federal agencies, State agencies, local agencies, or private citizens.

The section further provides for such items as timely notice of the intent to plan, conduct, certify, and record such surveys or resurveys.

This section further spells out such items as proper notice to the parties involved, the initiating period for conducting surveys the time period in which the surveys should be completed, the time frame in which certification of the survey should take place and calls for the monumenting and certification of a section center corner when a subdivision survey is conducted by the Secretary or the Secretary's designee.

The section also contains a provision that if certification does not take place in a timely manner, all temporary monuments will be removed and that a plan for resurvey or retracement is initiated immediately.

The final section of this bill, section 4 (b), subsection 1, 2, and 3 deal with authorizing the Secretary of the Interior and the Secretary of Agriculture to conduct an assessment of a national cadastre information needs and develop a feasibility study for establishing a multipurpose national cadastre system.

Sometime early in the next century it may be possible to check land records easily and quickly to learn precisely where a parcel of American land is, what it is like, what and where the easements are, what its tax status is, and who owns it. As planners, assessors, legislators, engineers, insurers, appraisers, lenders, builders, surveyors, and the buyers and sellers of land know well, land records of the United States generally are quaint, arcane, clumsy to probe, and not altogether reliable or helpful.

Land records may be stored by computer in some places now, but the information they contain may be no better and not much more accessible than records on paper. Maps made for legal and fiscal purposes—cadastral maps—often are inadequate.

For most Americans title search and survey are encountered directly only as sometimes troubling legal rituals in real estate transactions. Out-of-the-ordinary land information questions—say those involved in siting a transportation or utility corridor or in economic and land-use studies or in natural resource appraisal and regulation—are answered if at all only by numerous agencies, public and private, each maintaining its own maps for its own purposes, with the maps often in conflict.

By several estimates the consequent direct added costs to individuals and to Federal, State, and local governments run into many millions of dollars annually; the consequent indirect costs of recurring inability to manage and to properly assess land are inestimable.

Most of the country's title—and assessment—records systems "have undergone only relatively small changes in the last 100 years," the report of a National Research Council panel says, reiterating the complaints of attorneys, geodesists, geographers, real-estate specialists, public administrators, surveyors, and others who have studied these problems. Land information systems for planning and management "have evolved largely since the mid-1960's," and the twain do not meet;

"Title—and assessment—records systems are labor intensive and do not provide necessary information about the land in a timely, unambiguous, authoritative, and economical manner. Land-management information cannot readily be integrated with title and assessment data," the existence of computers and geodetic and Earth-resource satellites and aerial photogrammetry notwithstanding.

Land ownership and development were recorded in the Domesday Book of Norman England for the purposes of assessment. The land-title and assessment records in most U.S. county halls of records today take their form largely from the nature of the dispositions of land in the

early development of the United States, but they are changed little in concept from compilations in the Domesday Book nearly 1,000 years ago. The Domesday Book offers the collateral benefit of a portrait of uses of the land; U.S. cadastral records today rarely do.

Over the last 10 years pressures have been building to modernize cadastral records systems in the United States, as needs to cut land-transfer costs, to determine land-ownership, and to ease access to all sorts of land information have become more evident. According to the National Research Council panel's report:

> There is a critical need for a better land-information system in the United States to improve land-conveyance procedures, furnish a basis for equitable taxation, and provide much needed information for resource management and environmental planning.

The problem is how. The answers and timing will affect every land-taxing jurisdiction in the United States.

At the request of several Federal agencies, a panel of the National Research Council assembly of Mathematical and Physical Sciences' Committee on Geodesy was appointed to consider Federal responsibilities in the possible development of nationally usable, multipurpose cadastre—a record of the nature and extent of interests in land. Such interests and property rights, the Panel on a Multipurpose Cadastre noted:

> May be narrowly construed as a legal right capable of ownership or more broadly interpreted to include any uniquely recognized relationship among people with regard to the acquisition and management of land.

The panel called not for any central land-bank, but for independently undertaken changes to make land information more accessible and to foster intercomparability of records that more than one agency maintain concerning the same land, each parcel of which, the panel said, should have its own, unique identifying number. Local land-parcel registers would identify parcels using these identifiers, which then would serve as indexes to other records where descriptions of the land could be found, and identifiers would appear on parcel index maps.

One-stop shopping for all information available on a parcel, tract, or larger area is not likely, but land-data searches would be faster and more productive—assuming of course that quality control, geodetic control, and considerations of consistency are kept in mind as land-information systems are reshaped.

Mr. President, I ask unanimous consent that the text of both these bills be inserted in the RECORD following these remarks.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 705

Be it enacted by the Senate and House of Representatives of the United States of America in congress assembled, That the Secretary of Agriculture (hereinafter referred to as the "Secretary") is authorized, when the Secretary determines it to be in the public interest—

(1) to sell or exchange, by quitclaim deed, all right, title and interest of the United States in and to National Forest System lands described in section 2; and

(2) to accept, as consideration for the lands sold or exchanged, other lands, interests in lands, or cash payment, or any combination of such forms of consideration, equal in value to the fair market value of the lands, including the mineral estate, sold or exchanged by the Secretary.

The Secretary shall insert in any such quitclaim deed such terms, covenants, conditions, and reservations as the Secretary deems necessary to ensure protection of the public interest, including protection of the scenic, wildlife and wilderness values of the National Forest System and provision for appropriate public access to and use of lands within the System.

SEC. 2. The National Forest System lands which may be sold or exchanged under this Act are those the sale or exchange of which is not practicable under any other authority of the Secretary and which are—

(1) parcels of forty acres or less which are interspersed with or adjacent to mineral patents, which are determined by the Secretary, because of location or size, not to be subject to efficient administration, and which have a fair market value, as determined by the Secretary through appraisal within one year before or after the date application for sale or exchange is made to the Secretary, of not more than $150,000;

(2) parcels of ten acres or less which are encroached upon by improvements occupied or used under claim or color of title by persons to whom no advance notice was given that the improvements encroached or would encroach upon such parcels, and who in good faith relied upon an erroneous Federal survey, title search or other land description indicating that there was not such encroachment; and

(3) road rights-of-way, reserved or acquired, which are substantially surrounded by lands not owned by the United States and which are no longer needed by the United States, subject to the first right of abutting landowners to acquire such rights-of-way.

SEC. 3. Any person to whom lands are conveyed pursuant to this Act shall bear all reasonable costs of administration, survey and appraisal incidental to such conveyance, as determined by the Secretary, except in those cases in which the Secretary determines that it would be consistent with the public interest to waive payment of such costs by such person. In the case of road rights-of-way conveyed pursuant to this Act, the person to whom the right-of-way is conveyed shall reimburse the United States for the value of any improvements to such right-of-way which may have been made by the United States.

SEC. 4. Conveyance of any road rights-of-way under this Act shall not be construed as permitting any designation, maintenance, or use of such rights-of-way for road or other purposes except to the extent permitted by State or local law and under conditions imposed by such law.

SEC. 5. In carrying out the land exchanges authorized in this Act the Secretary is authorized to use the procedures of the Act entitled "An Act to facilitate exchanges of land under the Act of March 20, 1922 (42 Stat. 465), for use for public schools, and for other purposes", approved December 4, 1967 (Public Law 90–171; 81 Stat. 531).

SEC. 6. For purposes of this Act, the word "person" includes any State or any political subdivision or entity thereof.

SEC. 7. The Secretary shall issue regulations to carry out the provisions of this Act, including specification of—

(1) criteria which shall be used in making the determination as to what constitutes the public interest; and

(2) factors relating to location or size which shall be considered in connection with determining the lands to be sold or exchanged under clause (1) of section 2.

SEC. 8. Nothing in this Act shall authorize conveyance of Federal lands within the National Wilderness Preservation System.

S. 706

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Land Survey Act of 1981".

SEC. 2. (a) The purposes of this Act are—

(1) to declare a National policy which will encourage the timely conduct and approval of Federal land surveys;

(2) to provide the public with reasonable notice of intent in the conduct and approval of these surveys;

(3) to promote and foster a spirit of cooperation with landowners and the several States in the survey of Federal lands;

(4) to promote the stability and permanence of the Nation's records of survey; and

(5) to provide the basis for a multipurpose National land information system.

(b) The Congress, recognizing the profound impact of Federal land surveys on land record stability, property conveyance, environmental quality, and resource productivity and the critical importance of Federal land surveys to the economic and social well being of this Nation's citizens, declares that it is the continuing policy of the Federal Government to—

(1) coordinate Federal land surveys with other Federal plans, functions, programs, and resources;

(2) protect the bona fide rights or claims of any claimant, entryman, or owner of lands affected by such Federal land survey, resurvey, or retracement;

(3) cooperate with State and local governments, and other concerned public and private organizations, in the timely, notice, conduct, and maintenance of such Federal land surveys, resurveys, and retracements; and

(4) provide National leadership in the development of a multipurpose National cadastre as a basis for improved land conveyance procedures, for equitable taxation, for informed resource management and environmental planning, and to further the Nation's economic productivity.

SEC. 3. (a) The Secretary of the Interior (hereinafter referred to as the "Secretary") or such agency as the Secretary may designate, in the survey or resurvey of public lands made after the date of enactment of this Act, shall—

(1) provide all affected Federal agencies, local governments, individual claimants, entrymen, landowners, and the local public with notice of intent to conduct, certify, or record a survey or resurvey not less than 30 days prior to the intended action;

(2) initiate any survey or resurvey within six months providing notice of intent to conduct such survey or resurvey;

(3) complete any survey or resurvey and all necessary monumentation, affixing a permanent mark designating the year of the survey or resurvey on each monument when established or reestablished within two years of the date of initiating the survey or resurvey; and

(4) certify the survey or resurvey in the appropriate land office within ninety days of the date the survey or resurvey is completed.

(b) When a section subdivision survey is conducted involving both lands owned by the Federal Government and non-Federal lands, the section center corner shall be monumented and certified in accordance with subsection (a).

(c) If the Secretary or the Secretary's designee fails to certify a monument within ninety days as required in subsection (a)

(4), the temporary monument shall be removed within fifteen days after the 90-day perod has expired. Notice of such removal with reasons for the removal and notice of any plans for resurvey or retracement shall be published in a local newspaper and the Federal Register within thirty days of removal.

SEC. 4. (a) The Secretary of the Interior and the Secretary of Agriculture, in consultation with the Governors of the several States and the President of the National Academy of Sciences, are authorized and directed to conduct an assessment of multipurpose National cadastre information needs and develop a feasibility study for establishing a multipurpose National cadastre system. The Secretary of the Interior and the Secretary of Agriculture shall submit the feasibility report with recommendations and any proposals for legislation to the Majority Leader of the Senate and the Speaker of the House of Representatives within three years of the date of the enactment of this Act.

(b) The recommendations contained in the feasibility study shall be consistent with the Forest and Rangeland Resources Planning Act of 1974, the Federal Land Policy and Management Act of 1976, and the purposes and policies of this Act.●

By Mrs. KASSEBAUM:

S. 707. A bill to provide for certain importers of crude oil to contribute to the Strategic Petroleum Reserve; to the Committee on Energy and Natural Resources.

STRATEGIC PETROLEUM RESERVE AMENDMENTS OF 1981

● Mrs. KASSEBAUM. Mr. President, today I am reintroducing legislation that I proposed last year that will facilitate the filling of our strategic petroleum reserve.

Last year, we discussed this issue at length and were successful in prompting the resumption of our stockpiling efforts. Since purchases were renewed in September, the Department of Energy has added about 160,000 barrels to 117 million barrels. The current level represents approximately a 21-day supply of imports. Although this level is clearly inadequate, I am not quarreling with the magnitude of our efforts. The administration has indicated its commitment to continue this progress despite numerous political and economic constraints. As a member of both the Foreign Relations and Budget Committees, I am sensitive to these concerns. Budget priorities and pressures require that direct expenditures be minimized and volatile Mid-East politics require that we be cautious in fashioning a stockpile policy.

Volatility coupled with our continued dependence on foreign oil, dictate the need to take precautions against a major supply interruption. In a report last year, the Senate Energy Committee concluded that "a major supply interruption appears to be inevitable within the next decade."

The implications of such an interruption are immense. A Stanford University study indicates that a cutoff of the supply we receive from the Persian Gulf area would result in an economic loss to the United States of more than $110 billion in a single year. Therefore, any efforts to enhance development of the SPR clearly contribute to our national security. Mr. President, my legislation will spur filing of the reserve by addressing some of the budgetary difficulties that we have recently encountered.

Since stockpiling resumed, DOE has paid an average price of about $36 a barrel. Most of that oil ultimately comes from the Government-owned Elk Hills Reservoir, and, therefore, we have been getting a refund under the entitlements system. With the lifting of price controls on domestic oil, DOE no longer receives that refund. Even if the reserve is filled at the rate of only 100,000 barrels per day, this will raise the cost of the stockpiling by $1.5 billion this year. As oil prices continue to rise, we will confront increasing problems with filling the reserve. My bill will permit us to get more efficient use from the money we can afford to invest in this endeavor.

I have made a few clarifications from last year's proposal, but the bill is essentially the same. Major crude importers—defined as those whose average daily imports equal or exceed 75,000 barrels—would be required to begin contributing to the SPR at an annual rate equal to five times the average daily amount they import during the calendar year. Title to the oil will be retained by the importers.

The Government will pay the importers an annual fee equal to 10 percent of the purchase price of the oil. This fee will be paid for 11 years or until the oil is withdrawn from the reserve, whichever occurs first. Importers will have the right, upon payment of these yearly fees, to withdraw amounts in accordance with the distribution plan contained in the strategic petroleum reserve plan. The Secretary of Energy shall have the right to override this decision in the event that distribution would not be consistent with the defense objectives of the SPR. The Secretary of Energy shall pay the contributing importers, if it is necessary for the Federal Government to use SPR contributions, the market price at the time of withdrawal less accumulated annual fee payments.

This contribution program will help improve existing SPR acquisition programs. It will assure quicker, cheaper completion of the Nation's reserve requirements. Had the legislation been in effect in 1979, the last year for which figures are available, the SPR would have acquired nearly 25 million barrels. Assuming an average price of $40 per barrel, this bill would accomplish its goal at an initial cost of only $100 million. This bill fits in well with the administration's economic package and with its position on the SPR. It encourages faster filling at a lower cost to the taxpayer without the international political complications of the Federal Government directly entering the foreign market.

Mr. President, we must not be content with recent developments toward completing our reserve. As our money buys less oil, it becomes increasingly important that we make the maximum effort possible to protect ourselves from the impact of a major supply interruption. Many of my colleagues in the Senate share this concern, and I hope they will join me in resolving this problem in the most efficient manner available.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 707

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Strategic Petroleum Reserve Amendments of 1981".

SEC. 2. (a) Part B of title I of the Energy Policy and Conservation Act is amended by inserting the following immediately after the heading therefor:

"Subpart 1—Strategic Petroleum Reserve Program."

(b) Part B of the Energy Policy and Conservation Act is further amended by adding at the end thereof the following new subpart:

"Subpart 2—Importer Contributions

"DEFINITIONS

"SEC. 171. For the purposes of this subpart the term 'major importer of crude oil' is defined, for each calendar year after the date of enactment of this subpart, as any person who imported more than 75,000 barrels of crude oil on a daily average during that calendar year.

"ESTABLISHMENT OF IMPORTER CONTRIBUTION

"SEC. 172. Each major importer of crude oil shall for each calendar year after the date of enactment of this subpart contribute to the Strategic Petroleum Reserve crude oil in an amount equal to the average daily amount imported by such person during such calendar year times 5.

"TITLE AND FEES

"SEC. 173. (a) All rights, title, and interest to the amounts of crude oil contributed under section 172 shall remain with the importer of such crude oil.

"(b)(1) The Secretary shall pay an annual fee to each contributing importer of crude oil equal to 10 percent of the price at which such oil was purchased.

"(2) The fee payable under paragraph (1) shall be payable for a period of 11 years after the date such oil was contributed under section 172.

"(3) The fee payable under paragraph (1) shall not be paid on costs of imported crude oil which are in excess of the world market price at the time of purchase.

"DRAWDOWN OF CONTRIBUTIONS

"SEC. 174. (a) The Secretary may permit any major importer (or successor in interest) to remove amounts of crude oil, not in excess of the amounts contributed by such importer, upon the commencement of distribution under the Distribution Plan contained in the Strategic Petroleum Reserve Plan which has taken effect pursuant to section 159(a) if such removal would not result in distributions contrary to the policy established by such plan.

"(b) In a case where the Secretary makes a distribution of crude oil from amounts contributed under this subpart, the Secretary shall make payments to such major importer (or sucessor in interest) in an amount equal to the world market price at the time of such distribution less the amount of fees paid to such importer pursuant to section 173.

"(c) Such payments made under section 174(b) shall in any event not exceed 100 percent of the average world market price for the 3 months immediately preceding the date of distribution mandated under such section.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 175. There are authorized to be appropriated to carry out the provisions of this subpart such sums as may be necessary.".

SEC. 3. Section 161(a) of the Energy Policy and Conservation Act is amended by striking "The Secretary" and substituting "Except as provided in section 174, the Secretary".●

By Mr. CHAFEE (for himself, Mr. BENTSEN, Mr. DANFORTH, Mr. GARN, Mr. DOLE, Mr. GOLDWATER, Mr. HAYAKAWA, Mr. LUGAR, Mr. MATHIAS, Mr. PERCY, Mr. PRESSLER, Mr. ROTH, Mr. THURMOND, and Mr. TOWER):

S. 708. A bill to amend and clarify the Foreign Corrupt Practices Act of 1977; to the Committee on Banking, Housing, and Urban Affairs.

BUSINESS ACCOUNTING AND FOREIGN TRADE SIMPLIFICATION ACT

Mr. CHAFEE. Mr. President, today, I am introducing an amendment to the Foreign Corrupt Practices Act, along with cosponsors who are Senators BENTSEN, GARN, DANFORTH, DOLE, GOLDWATER, HAYAKAWA, LUGAR, MATHIAS, PERCY, PRESSLER, ROTH, THURMOND, and TOWER.

Mr. President, the Foreign Corrupt Practices Act, signed into law on December 19, 1977, represents an important step toward the objective of prohibiting bribery of foreign government officials by U.S. businesses. In the wake of post-Watergate revelations of questionable corporate conduct, Congress acted quickly to make the United States the only country in the world with an extraterritorial anticorruption law.

While well intended, however, the act has given rise to interpretive problems for companies engaged in overseas transactions. It is difficult to decipher, hard to implement, and its ambiguities have bred confusion for both business people and regulators.

Walter Surrey wrote in the spring 1979 issue of the Harvard International Law Journal:

> The Foreign Corrupt Practices Act . . . represents what can result when the White House reverses signals at the last minute and when Members of Congress, the administration, and the business community are unwilling to challenge a draft law for fear of being accused of being in favor of that which the law seeks to prohibit. The act is not polished legislation.

Certainly, we are all against bribery and condemn the misuse of an official position for personal or monetary gain. In fact, the Congressional Research Service Foreign Law Division and the United Nations Center on Transnational Corporations both indicate that, to their knowledge, there is not a country in the world that does not have an antibribery statute incorporated in its domestic laws. Many U.S. companies with whose representatives I have met, favor an artibribery law.

The problem is one of uncertainty surrounding the application and enforcement of the Foreign Corrupt Practices Act in different countries and cultures.

As Business International editor Sandraw Feustel stated:

> How much grease must cross the palm of a government official before a corporate executive is called on the carpet for offering a bribe? When the brother of a Gulf sheikh demands a large commission before he okays a contract, does that constitute extortion? Does a duck a l'orange at Maxim's tempt a government official to sign on the dotted line, and will a new gold watch at today's prices persuade a sluggish bureaucrat to cut that extra length of red tape?

Last week, the General Accounting Office released a study stating that the current Foreign Corrupt Practices Act is riddled with complicating ambiguities. Many problems arise from confusion over what makes a payment a bribe. Grease payments, such as fees to get low-level bureaucrats to perform their duties of processing forms, approving licenses, or unloading a shipment of perishable goods from a boat in dock, are specifically permitted on the grounds that petty corruption is unavoidable.

But, as an article from this week's Time magazine points out:

> There is a large gray area between that sort of bureaucratic paper shuffling and the discretionary authority of local officials to withhold approval for a project or license, and thereby extort not $50 or $100, but perhaps $10,000 or even $500,000 from a victimized company.

The article continues:

> American businessmen also complain that the complex law keeps them out of many profitable deals. Says Robert Malott, Chairman of Chicago's FMC Corp., a leading manufacturer of chemicals and machinery (1980 sales: $3.5 billion): "The law has American export companies thoroughly confused. We simply cannot get clarification on what is legal and what is not."
>
> Dubbed by one Wall Street wag the "Accountants' Full Employment Act of 1977," the legislation has forced companies not only to beef up their internal auditing staffs but to check and double-check the propriety of even the most inconsequential payments. Example: in Xerox's Cairo office, local staffers had to get permission from a senior corporate officer in the U.S. before they could pay $8 a month in tips to Egyptian telex and telephone repairmen.
>
> More confusion surrounds a company's liability under the Act for the actions of its foreign agents. If the local representatives uses even a part of his commission, as often happens, to bribe officials to keep a deal on track, the Act asserts that the U.S. company is responsible if the executives had reason to know what the agent was doing.

It is this grey area that has had a chilling effect on U.S. export activity and that has caused the loss of billions of dollars of business. Mr. Frank Weil, former Assistant, Commerce Secretary asserted that the smaller companies are the most severely hampered by the Act, Mr. Weil, while at the Commerce Department, was quoted as saying:

> The "uncertainties" of the Act are frightening a lot of legitimate business through commission agents.

When faced with the question of whether or not to pay commissions, which are a social and business custom and legal in many countries, U.S. firms now play it safe and do not even bother to compete.

In addition, the cost of complying with the accounting and recordkeeping requirements of the act has placed an excessive burden on all publicly held companies regardless of whether or not they make any foreign sales. The GAO found that over 55 percent of the firms polled said they believe their efforts to comply with the act's accounting provisions have cost more than the benefits received. To violate the statute, one need only to err in keeping company books in the detail to which the Securities and Exchange Commission deems necessary. One need not be engaged in corruption or foreign sales to violate the so-called Foreign Corrupt Practices Act.

Most alarming is the fact that the American Bar Association (ABA), and the American Institute of Certified Public Accountants (AICPA) disagree with the Securities and Exchange Commission (SEC) as to a firm's responsibility under the accounting provisions of the law.

Costly accounting procedures and ambiguities not only cause U.S. companies to lose foreign orders, but retard competing in the first place. The problems created by the act are especially onerous on smaller publicly held companies, and new exporters, who are unable to obtain specialized counsel familiar with the act's intricacies.

So serious a trade disincentive is the act that the President's report to Congress of September 9, 1980, on export disincentives, noted that businessmen and attorneys had identified the Foreign Corrupt Practices Act (FCPA) as "one of the most significant export disincentives." Substantial uncertainties in interpretation, problems of dual SEC-Justice enforcement jurisdiction, and failures to reach effective international agreement in this area were cited. Subsequently, the report of the President's Export Council, submitted in December, recommended that Congress amend the FCPA along lines I suggested in my bill last year (S. 2763) to unify enforcement of the antibribery provisions in Justice, to clarify ambiguities in the law, to mandate guidelines on interpretation of the law, and to provide an appropriate intent test for criminal prosecutions.

In addition, the GAO report released last week recommended that Congress rewrite the law to give clearer guidance to businessmen as to what they can and cannot do when competing overseas. The Reagan administration, the Chamber of Commerce of the United States, the Georgetown University Center for Strategic and International Studies, and numerous attorneys, accountants, and legal professors have all called for changes or clarifications to be made, and guidance to be provided to American businesses.

Mr. President, we are entering our fifth consecutive year of trade deficits and the rapidly declining competitive position of many U.S. industries in the world export market should be of great concern to our Nation.

The overwhelming U.S. industrial superiority of the early postwar years is gone. Since 1950, our share of the world's export market has dropped by half while our share of the world's imports has risen by 27 percent.

A recent construction industry study shows that U.S. firms claimed only 1.6 percent of the $21.8 billion in new overseas construction contracts let during the 13-month period ending June 1979. This compares with a 10.3-percent U.S.

share from May 1975 to April 1978 of the total $86 billion market.

We are losing the battle to bring home those $60 billion a year we are paying out for foreign oil. Why is this happening?

Mr. President, there is not one simple answer to this question. But there is evidence that certain U.S. Government policies are making it difficult for American firms to compete on even ground with their increasingly sophisticated foreign counterparts. One of these policies is the unclear criminal and civil enforcement of the Foreign Corrupt Practices Act. And we should all be aware that everytime export sales are lost to foreign competitors, U.S. jobs are lost, as well.

If we expect U.S. businesses to be aggressive and competitive abroad, we must not encumber them with unnecessary barriers or restraints.

The legislation I introduce today will provide the groundwork for a necessary and thorough review of the act, and lead to important changes without compromising the original intent of the act.

Under my proposal, bribery of foreign officials would still be illegal, and both criminal and civil penalties, as defined under current law, would be applicable.

My bill would help to eliminate many of the present ambiguities of the act, and would allow compliance guidance to be provided to U.S. business. It would also designate the Justice Department the sole enforcer of corrupt practices, while the Securities and Exchange Commission would administer the accounting standards section of the act. Other provisions of the bill, including the inclusion of a "materially" standard in the accounting section, elimination of the "reason to know" clause, and a resolution calling for an international agreement, are outlined below.

Finally, it is important to address this export disincentive and to open the public record on the act. I urge the Senate Banking Committee to schedule hearings on this bill quickly so as to provide Congress the opportunity to pass this legislation.

Mr. President. I ask unanimous consent to have printed in the RECORD the attached articles, a summary of the bill, and that a copy of the bill be also printed as introduced.

There being no objection, the bill, summary, and articles were ordered to be printed in the RECORD, as follows:

S. 708

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Business Accounting and Foreign Trade Simplification Act".

FINDINGS AND CONCLUSIONS

SEC. 2. (a) The Congress finds that—

(1) the enactment of the Foreign Corrupt Practices Act of 1977 was a positive and significant step toward the important objective of prohibiting bribery of foreign government officials by United States companies in order to obtain, retain, or direct business;

(2) the unclear nature of the enforcement, and interpretation of the Foreign Corrupt Practices Act of 1977 by United States agencies has caused unnecessary confusion among existing and potential exporters as to the scope of legitimate overseas business activities;

(3) the accounting standards requirements of the Foreign Corrupt Practices Act of 1977, which apply to all issuers of securities regardless of size, market, or the presence of international transactions, are unclear and excessive and they have caused costly and unnecessary paperwork burdens;

(4) United States agencies responsible for enforcement of the Foreign Corrupt Practices Act of 1977 have not sufficiently coordinated interpretation and enforcement practices with other agencies responsible for international trade policy, export promotion, foreign policy, international monetary policy, and other related civil and criminal statutes; and

(5) it is in the best interests of all countries to maintain responsible standards of corporate conduct in foreign markets to preserve free and equitable trading practices.

(b) The Congress concludes that—

(1) the principal objectives of the Foreign Corrupt Practices Act of 1977 are desirable, beneficial, and important to our Nation as well as to our relationships with our trading partners, and these objectives should remain the central intent of the Act;

(2) exporters should not be subject to unclear, conflicting, and potentially damaging demands by diverse United States agencies responsible for enforcement of the Foreign Corrupt Practices Act of 1977;

(3) the accounting standards requirements of the Foreign Corrupt Practices Act of 1977 should be integrated with concepts of materiality as they are understood and interpreted in the context of generally accepted accounting principles, and accordingly, should take into consideration the size and operations of issuers of securities;

(4) general compliance and enforcement practices associated with the Foreign Corrupt Practices Act of 1977 should be developed in accordance with considerations underlying foreign policy relations, international trade, export promotion, international monetary policy, and other related civil and criminal statutes; and

(5) a solution to the problem of corrupt payments by firms to obtain or retain business demands an international approach; accordingly, appropriate international agreements should be initiated and sought by the United States agencies responsible for trade agreements and by the President.

AMENDMENT OF SHORT TITLE

SEC. 3. Section 101 of the Foreign Corrupt Practices Act 1977 is amended to read as follows:

"SHORT TITLE

"SEC. 101. This title may be cited as the 'Business Practices and Records Act'.".

ACCOUNTING STANDARDS

SEC. 4. (a) Section 13(b)(2) of the Securities Exchange Act of 1934 is amended by striking out clauses (A) and (B) and inserting in lieu thereof the following:

"(A) make and keep books, accounting records, and accounts which reflect in reasonable detail the transactions of the issuer (including the disposition of assets) in all material respects so as (i) to permit preparation of financial statements in conformity with generally accepted accounting principles or other criteria applicable to such statements, and (ii) to maintain accountability for assets; and

"(B) devise and maintain a system of internal accounting controls sufficient to provide reasonable assurances that in all material respects—

"(i) transactions are executed in accordance with management's general or specific authorization;

"(ii) transactions are recorded as necessary (I) to permit preparation of financial statements in conformity with generally accepted accounting principles or any other criteria applicable to such statements, and (II) to maintain accountability for assets;

"(iii) access to assets is permitted only in accordance with management's general or specific authorization; and

"(iv) the recorded accountability for assets is compared with the existing assets at reasonable intervals and appropriate action is taken with respect to any differences.".

(b) Section 13(b) of the Securities Exchange Act of 1934 is amended by adding at the end thereof the following:

"(4) A person shall be liable in any action or proceeding arising under paragraph (2) only for knowingly falsifying, or causing to be falsified, any book, accounting record, or account described therein, or for knowingly failing to maintain a system of internal accounting controls which is consistent with the purposes of paragraph (2), or for knowingly attempting to circumvent wrongfully the internal accounting controls established pursuant to such paragraph.".

"(5) Where an issuer holds 50 per centum or less of the equity capital of a domestic or foreign firm, the provisions of paragraph (2) require only that the issuer proceed in good faith to use its influence, to the extent reasonable under the issuer's circumstances, including the relative degree of its ownership over the domestic or foreign firm and under the laws and practices governing the business operations of the country in which such firm is located, to cause transactions and dispositions of assets having a material effect as defined in subparagraphs (A) and (B) of paragraph (2) on the issuer to be carried out consistent with the purposes of such paragraph. Such an issuer shall be conclusively presumed to have complied with the provisions of paragraph (2) by demonstrating good faith efforts to use such influence.".

REPEALER; NEW BRIBERY PROVISION

SEC. 5. (a) Section 30A of the Securities Exchange Act of 1934 is repealed.

(b) Section 104 of the Business Practices and Records Act is amended to read as follows:

"FOREIGN PAYMENTS

"SEC. 104. (a) It shall be unlawful with respect to activities in the interstate or foreign commerce of the United States for any domestic concern, or any officer, director, employee, or shareholder thereof acting on behalf of such domestic concern, corruptly to pay, give, offer, or promise, directly or indirectly, anything of value to any foreign official for the purpose of—

"(1) influencing such foreign official to act or make a decision in his official capacity, including a decision to fail to perform his official functions, in violation of the recipient's legal duty as a public servant; or

"(2) inducing such foreign official to use his influence with a foreign government or instrumentality thereof in violation of the recipient's legal duty as a public servant;

in order to assist such domestic concern in obtaining or maintaining business for or with, or directing business to, any person.

"(b) A domestic concern violates subsection (a) by circumventing the proscriptions thereof where a payment, gift, offer, or promise of anything of value by any person is made corruptly to a foreign official in connection with activities within and for any of the purposes set forth in subsection (a), and where the domestic concern corruptly directs or authorizes such payment, gift, offer, or promise.

"(c) Subsection (a) shall not apply to any facilitating or expediting payment to a foreign official which is customary in the country where made and the purpose of which is to facilitate or expedite performance by such foreign official of his official duties.

"(d)(1)(A) Except as provided in subparagraph (B), any domestic concern which violates subsection (a) shall, upon conviction, be fined not more than $1,000,000.

"(B) Any individual who is a domestic concern and who willfully violates subsection (a) shall, upon conviction, be fined not more than $10,000, or imprisoned not more than five years, or both.

"(2) Any officer or director of a domestic concern, or stockholder acting on behalf of such domestic concern, who willfully violates subsection (a) shall, upon conviction, be fined not more than $10,000, or imprisoned not more than five years, or both.

"(3) Whenever a domestic concern is found to have violated subsection (a) of this section, any employee of such domestic concern who is a United States citizen, national, or resident or is otherwise subject to the jurisdiction of the United States (other than an officer, director, or stockholder acting on behalf of such domestic concern), and who willfully carried out the act or practice instituting such violation shall, upon conviction, be fined not more than $10,000, or imprisoned not more than five years, or both.

"(4) Whenever a fine is imposed under paragraph (2) or (3) of this subsection upon any officer, director, employee or stockholder of a domestic concern, such fine shall not be paid, directly or indirectly, by such domestic concern.

"(e) (1) When it appears to the Attorney General that any domestic concern, or officer, director, employee or stockholder thereof, is engaged, or is about to engage, in any act of practice constituting a violation of subsection (a) of this section, the Attorney General may, in his discretion, bring a civil action in an appropriate district court of the United States to enjoin such act or practice, and upon a proper showing, a permanent or temporary injunction or a temporary restraining order shall be granted without bond.

"(2) For the purpose of all civil investigations which, in the opinion of the Attorney General, are necessary and proper for the enforcement of this Act, the Attorney General or any attorney or attorneys of the Department of Justice designated by him are empowered to administer oaths and affirmations, subpena witnesses, take evidence, and require the production of any books, papers, or other documents which the Attorney General deems relevant or material to the inquiry. Such attendance of witnesses and the production of such documentary evidence may be required from any place in the United States, or any territory, possession or commonwealth of the United States, at any designated place of hearing.

"(3) In case of contumacy by, or refusal to obey a subpena issued to, any person, the Attorney General may invoke the aid of any court of the United States within the jurisdiction of which such investigation or proceeding is carried on, or where such person resides or carries on business, in requiring the attendance and testimony of witnesses and the production of books, papers, or other documents. Any such court may issue an order requiring such person to appear before the Attorney General or attorney designated by the Attorney General, there to produce records, if so ordered, or to give testimony touching the matter under investigation or in question; and any failure to obey such order of the court may be punished by such court as a civil contempt thereof. All process in any such case may be served in the judicial district whereof such person is an inhabitant or wherever he may be found. To the extent that such rules may have application and are not inconsistent with the provisions of this chapter, the Federal Rules of Civil Procedure shall apply to any investigation under this chapter.

"(f) As used in this section—

"(1) The term 'domestic concern' means (A) any individual who is a citizen, national or resident of the United States; (B) any corporation, partnership, association, joint-stock company, business trust, unincorporated organization, or sole proprietorship which has its principal place of business in the United States, which is organized under the laws of a State of the United States or a territory, possession or commonwealth of the United States, or which has a class of securities registered pursuant to section 12 of the Securities Exchange Act of 1934 or which is required to file reports under section 15(d) of the Securities Exchange Act of 1934.

"(2) The term 'foreign official' means (A) any officer or employee of a foreign government or any department, agency or instrumentality thereof, or any person acting in an official capacity for or on behalf of any such government or department, agency or instrumentality; and (B) includes any foreign political party or official thereof or any candidate for foreign political office.

DEFINITIONS

SEC. 6. (a) Section 13(b) of the Securities Exchange Act of 1934 is amended by adding at the end thereof the following:

"(6) For the purpose of this section, the terms 'reasonable detail' and 'reasonable assurances' mean such level of detail and degree of assurance as would satisfy prudent individuals in the conduct of their own affairs, having in mind a comparison between benefits to be obtained and costs to be incurred in obtaining such benefits.

"(7) For the purpose of this section, the term 'material' is used in the same sense as in generally accepted accounting principles when those principles are applied to the preparation and presentation of financial statements of the issuer.".

(b) The Business Practices and Records Act is amended by inserting after section 104 the following:

"(g) For the purpose of this Act, an offer, payment, promise to pay, or authorization of the payment of any money, or offer, gift, promise to give, or authorization of the giving of anything of value does not include an item of value that constitutes, or is intended as no more than, an item given as a courtesy, a token of regard and esteem, or in return for hospitality, and does not include marketing activities or expenses related to the demonstration or explanation of products, or operations of a domestic concern, including travel and lodging, if such marketing activities, demonstrations, or explanations, or related expenses pertain to the business presentation associated with the selling or purchasing of goods or services.

"(h) Nothing in this Act prohibits any offer, payment, promise to pay, or authorization of the payment of any money, or offer, gift, promise to give, or authorization of the giving of anything of value which is lawful under the laws and regulations of the country, in which the foreign official, who is the intended recipient serves or in which the foreign political party or official thereof or foreign political candidate who is the intended recipient principally operates.".

EXCLUSIVITY PROVISION FOR OVERSEAS BRIBERY

SEC. 7. Section 104 of the Business Practices and Records Act shall be the exclusive provision under the laws of the United States authorizing a civil or criminal proceeding by the United States against a domestic concern, or any officer, director, employee, or shareholder thereof acting on behalf of such domestic concern, for making use of the mails or any means or instrumentality of interstate commerce in the manner and for the purposes proscribed by such section or for actions of a domestic concern which are taken in furtherance of such conduct.

AUTHORITY TO ISSUE GUIDELINES

SEC. 8. Title I of the Business Practices and Records Act is amended by adding at the end thereof the following:

"GUIDELINES AND GENERAL PROCEDURES FOR COMPLIANCE

"SEC. 105. (a) Not later than 6 months after the date of enactment of this section, an interagency task force with a chairman designated by the President and to include the United States Trade Representative, the Secretary of State, the Secretary of Commerce, the Secretary of the Treasury, and the Attorney General, after consultation with representatives of the business community and the interested public through public notice and comment and in public hearings, shall determine to what extent the business community would be assisted by further clarification of this Act and shall, based on such determination and to the extent necessary and appropriate, have the authority to issue—

"(1) guidelines describing specific types of conduct associated with common types of export sales arrangements and business contracts which such interagency task force determines constitute compliance with the provisions of section 104 of this Act; and

"(2) general precautionary procedures which issuers or domestic concerns may use on a voluntary basis to insure compliance with this Act, and to create a rebuttable presumption of compliance with this Act.

The guidelines and procedures referred to in the preceding sentence shall be issued in accordance with sections 551 through 557 of title 5, United States Code.

"(b) The Attorney General, after consultation with other Federal agencies and representatives from the business community, shall establish a Business Practice and Record and Review Procedure for the purpose of providing responses and specific inquiries concerning enforcement intentions under this Act. The Attorney General shall issue opinions, within 30 days, in response to requests from domestic concerns, regarding compliance with the requirements of the provisions of section 104 of this Act. An opinion that certain prospective conduct does not involve a violation shall be final and binding on all parties, subject to the discovery of new evidence. When appropriate and at reasonable intervals, the responses derived from the review procedure will be reviewed by the Attorney General to determine whether such compilation of responses should be included in a new guideline pursuant to subsection (a).

"(c) Any document or other material provided to, received by, or prepared in the Department of Justice, or any other department or agency of the United States Government, in connection with a request by a domestic concern for a statement of present enforcement intentions under the Business Practices and Records Act Review Procedure pursuant to subsection (b) of this section, or in connection with any investigations conducted to enforce this Act, shall be exempt from disclosure under section 552 of title 5, United States Code, regardless of whether the Department responds to such a request or the applicant withdraws such request prior to receiving a response. If any request is withdrawn or does not receive a response from the Justice Department, any document or other material submitted in connection with such request shall be returned to the requesting party, and any other document or other material submitted to, received by, or prepared by the Attorney General in considera-

tion of such request shall either be returned if the document or material originated from a source outside the United States Government or shall be destroyed. Within 60 days after the withdrawal of a request or the communication of the decision not to respond to the request, the Department of Justice shall certify to the requesting party that any such document or material has been returned to the requesting party or the originating nongovernmental party or has been destroyed in accordance with this section. The Attorney General shall protect the privacy of each applicant, and all documents supplied are for use by the Justice Department only. Without the express written permission of the domestic concern which furnished the document, the Department of Justice and any other department or agency of the United States, may use or rely upon any document, or any information contained in any document, only for the purpose of preparing a response to the specific inquiry in support of which the document was provided under the Business Practices and Records Act Review Procedure. The Review Procedure shall be developed and instituted in accordance with sections 551 through 557 and 701 through 706 of title 5, United States Code.

"(d) The Attorney General shall make a special effort to provide timely compliance guidance to potential exporters, and smaller businesses, who as a practical matter are unable to obtain specialized counsel on issues pertaining to this Act. Such assistance shall be limited to requests for enforcement intention disclosures provided for under this Act, and general explanations of compliance responsibilities and of potential liabilities under the Act.

"(e)(1) On September 1 of each year the Attorney General shall transmit to the Congress and make public a detailed report on all actions which the Department of Justice has taken pursuant to this Act, along with its views on problems associated with implementation, its plans for the next fiscal year to further implement the Act, and recommendations for amendment.

"(2) On September 1 of each year the Chairman of the Securities and Exchange Commission shall file with the Congress a detailed report on all actions which the Commission has taken pursuant to section 13(b) of the Securities Exchange Act, its views on problems associated with implementation, its plans for the next fiscal year to further implement such section, and its recommendations for amendment.".

CONFORMING CHANGES IN INTERNAL REVENUE CODE

SEC. 9. Paragraph (1) of section 162(c) of the Internal Revenue Code of 1954 is amended by striking out "the laws of the United States if such laws were applicable to such payment and to such official or employee" and inserting in lieu thereof "the Business Practices and Records Act".

INTERNATIONAL AGREEMENTS

SEC. 10. (a) It is the sense of the Congress that the President should pursue the negotiation of bilateral and multilateral agreements among the largest possible number of nations which would establish standards of conduct for international business practices and which would create a process by which problems and conflicts associated with such practices could be resolved, and to explore through negotiations an international agreement for rates of Commissions.

(b) It is the sense of the Congress that, within one year after the date of enactment of this Act, the President shall report to Congress on the progress of these negotiations, and those steps which the Administration and Congress should consider taking in the event that the negotiations referred to in subsection (a) do not successfully eliminate the competitive disadvantage of United States business. Within 60 days of receipt of the President's report, Congress shall begin a full oversight review of the Business Practices and Records Act, including its effectiveness in fulfilling its goals and purposes, effects upon export promotion, United States competitiveness, foreign policy relations, small business considerations, costs of compliance, and appropriateness of penalties and those steps set out in the report to Congress as provided in the preceding sentence.

(c) Not later than six months after the date of the enactment of this Act, the President shall submit to the appropriate committees of the Congress a report identifying and assessing the legal and practical consequences of specific action that the United States could take under existing law—

(1) to promote cooperation by other nations in international efforts to prevent bribery of foreign officials, candidates or parties in third countries; and

(2) to encourage persons or business enterprises organized and operating in other nations to refrain from engaging in bribery of foreign officials, candidates, or parties in third countries to the commercial and competitive disadvantage of the overseas operations of United States industry.

This report shall also include recommendations for any new legislation required to give the President authority to take appropriate action to achieve such objectives. The report shall contain an analysis of the potential effect on the interests of the United States including United States national security of the corruption of foreign officials and political leaders in connection with international business transactions involving persons and business enterprises of other nations. In addition, the report shall assess the current and future role in curtailing such corruption of private initiatives such as the Recommendations to Governments and Rules of Conduct to Combat Extortion and Bribery developed by the International Chamber of Commerce. The findings and recommendations of this report shall be included on the agenda of the full oversight review of the Business Practices and Records Act to be conducted under subsection (b).

SUMMARY AND EXPLANATION OF THE CHAFEE BILL

Sections 1 and 2 (Findings and Conclusions):

These sections of the bill include the Congressional findings and conclusions that support the proposed statutory changes.

The findings and conclusions support the Congressional determination in 1977 that there is a need for a statute which prohibits bribery of foreign government officials. The bill seeks to clarify the unnecessary from the "unclear nature of the enforcement, interpretation, and jurisdiction" of the FCPA and the lack of coordination among the U.S. agencies responsible for FCPA enforcement.

The proposed legislation also attempts to ameliorate the "excessive" FCPA accounting standards and the "costly and unnecessary paperwork burden" which these standards have caused.

Section 3 (Change in Name of FCPA):

The bill would change the name of the Foreign Corrupt Practices Act of 1977 to the Business Practices and Records Act. This modification is designed to make clear that certain provisions of the FCPA, notably Section 102 (recordkeeping and internal accounting controls) apply to companies that have no foreign activities and to purely domestic transactions. Also, the present title implies wrongdoing.

Sections 4 and 6(a) (Inclusion of Materiality and Scienter Requirements in FCPA Recordkeeping and Internal Accounting Controls Provisions):

The bill would amend Section 102 of the FCPA (Section 13(b)(2) of the 1934 Act) by inserting a standard of materiality in the FCPA's recordkeeping and internal accounting controls provisions. The Chafee bill would also make clear that the recordkeeping and internal accounting controls provisions establish standards applicable to the preparation of financial statements in conformity with Generally Accepted Accounting Principles (GAAP).

The terms "reasonable assurances," "reasonable detail," and "in all material respects" which appear in the Section 102 amendments are defined in Section 6(b) of the bill. In general, the first definition seeks to make explicit the cost/benefit evaluation that the SEC has said may be applied in designing internal accounting controls. The second definition reinforces the link of materiality to the preparation and presentation of financial statements in conformity with Generally Accepted Accounting Principles (GAAP).

Section 4(b) of the bill would add a subsection (4) to Section 102 of the FCPA to provide that violation of the recordkeeping and internal accounting controls provisions will be found only if there has been knowing falsification of a book, accounting record or account or if there has been knowingly wrongful attempt to circumvent an internal accounting control system or maintenance of an inadequate system. This addition of a scienter requirement to Section 102 would preclude prosecution of issuers or their officers or directors for an inadvertent or otherwise unintentional failure to satisfy the FCPA standards.

Section 4 also makes clear that where an issuer holds 50 percent or less of a domestic or foreign firm, the issuer need only make a good faith effort to influence such firm to comply with the accounting provisions of the Act.

Section 5(a) (Transfer of Jurisdiction for FCPA Antibribery Enforcement from SEC to Justice Department):

Under the FCPA, the Securities and Exchange Commission has authority for enforcing against issuers the civil remedies for violation of the antibribery provisions. The Justice Department enforces against issuers the criminal remedies for violation of the antibribery provisions and the civil and criminal remedies for such violation against domestic concerns, which are defined to include U.S.-based firms and U.S. citizens and residents.

The Chafee bill would place in the Justice Department all jurisdiction for enforcement of the antibribery provisions of the FCPA. The SEC would remain responsible for enforcement of Section 102 (recordkeeping and internal accounting controls (of the FCPA and any securities laws which may apply to failure to disclose foreign bribery.

Section 5(b) (Rewrite of Section 104, Prohibition Against Bribery of a Foreign Official):

A simplified provision of Section 104 is offered in the Chafee bill for the following reasons:

The weak U.S. jurisdictional link of the present statute (which implicates bribes or offers of bribes by any party, U.S. or foreign, so long as the mails or instrumentalities of interstate commerce were used "in furtherance" of such bribes or offers) would be replaced by a direct tie to payments or offers of payment made directly or indirectly by domestic concerns "with respect to activities in the interstate or foreign commerce of the United States."

The exclusion of facilitating payments is clarified by (i) requiring that the influence or inducement was intended to cause the foreign official to act "in violation of the recipient's legal duty as a public servant"

(this phrase is taken from the definition of bribery in Section 1351 of the proposed Criminal Code, S. 1722, 96th Congress) and (ii) the simplified exclusion of payments in Subsection (c) "which are customary in the country where made and the purpose of which is to secure the prompt performance by such foreign official of his official duties."

In the Chafee bill, the substitution of liability for corrupt payments made "directly or indirectly" by a domestic concern for the "reason to know" clause on payments to intermediaries in the present FCPA returns the burden of proof to the prosecution to show that the payment was directly or indirectly the act of the U.S. entity. This is backed up by new language in Subsection (c) where questionable payments are made by a foreign concern but where the payment or offer "was made at the direction of a domestic concern."

In addition, this Section gives the Justice Department civil investigative authority under Section 104 of the FCPA, which it presently does not have.

Section 6(b) (Clarification of FCPA Antibribery Provisions to Exclude Customary Gifts, Routine Business Expenses and Conduct Lawful in Foreign Countries):

This provision of the Chafee bill seeks to clarify the scope of the antibribery provisions of the FCPA by identifying certain conduct which Congress intends to be outside the ambit of the statute. Subsection (e) of Section 104 would exclude from prosecution under the FCPA the presentation of customary gifts and the payment of routine business hospitality and marketing expenses.

This amendment is designed to overcome the chilling effect that the FCPA has had on some activities that are routine in international commerce, that Congress could not have intended to prohibit but that some believe could be encompassed by the broad language of the FCPA.

In the case of gifts, the proposed amendment would permit giving "an item of value that constitutes, or is intended as no more than, an item given as a courtesy, a token of regard and esteem or in return of hospitality."

Permissible business expenses would include, "marketing activities, or expenses related to the demonstration or explanation of products, or operations of an issuer or domestic concern, including travel and lodging, if such marketing activities, demonstrations, or explanations or related expenses pertain to the business presentation associated with the selling or purchasing of goods or services."

Section 6(b) of the bill would provide that the U.S. law would not be violated if the applicable foreign law permits the conduct in question. This provision would reflect a judgment that American concerns and citizens should not be prosecuted under U.S. law for actions that are entirely lawful in the affected foreign country. In such cases, the competitive disadvantage of American firms is particularly acute since their foreign competitors have no incentive to refrain from the relevant conduct.

Section 7 (FCPA Exclusive Substantive Statute Governing Overseas Bribery):

The bill would explicitly provide that the FCPA constitutes the exclusive substantive prohibition on overseas bribery under the U.S. Code. This would eliminate the threat perceived by U.S. business of having the wire and mail fraud provisions stretched to reach conduct not proscribed by the FCPA.

This amendment would leave unchanged the possible applicability of the securities laws and other criminal statutes to overseas bribery including Section 102 of the FCPA disclosure requirements of the 1933 and 1934 Acts, and false statements provisions.

Section 8 (Justice Department Actions to Assist Compliance With FCPA):

The bill would authorize further guidance for the business community beyond that available under the recently established Business Review Procedure. Under Section 105(a) of the FCPA, an interagency task force would be granted the authority "when necessary or appropriate" to issue "guidelines" describing "specific types of conduct associated with common types of export sales arrangements and business contracts which constitute compliance with" the antibribery provisions. The task force would also be allowed to issue "general precautionary procedures which domestic concerns may use on a voluntary basis to ensure compliance and to create a rebuttable presumption of compliance."

The Chafee bill would also include provisions designed to make the Business Review Procedure more attractive to American firms. Section 105(b) would be added to the FCPA to formalize the Business Review Procedure by mandating its operation by the Justice Department.

The only proposed significant changes in the Procedure announced by the Justice Department (45 Fed. Reg. 20800, March 31, 1980) are that a response to a request is required, a response is to be made within 30 days (rather than the object of "every reasonable effort" by Justice to meet this timetable under the current Procedure) and the response shall be final and binding "on all parties" (rather than only on Justice under the current Procedure).

In addition, Section 105(c) would be added to the FCPA to exempt from disclosure under the Freedom of Information Act documents, materials, or information provided to the Justice Department or prepared by it in connection with a request for a statement of enforcement intentions under the Business Review Procedure or any Justice Department investigations. The Justice Department would also be required to return or destroy materials received and prepared in connection with a request that is withdrawn or for some reason not the subject of a response.

Section 105 of the FCPA, as added by the bill, would also urge the Attorney General to provide timely guidance to potential exporters and smaller exporters. In addition, this provision would require the Attorney General and the Securities and Exchange Commission to prepare and submit to Congress one year after enactment of the Chafee bill reports on their respective actions to implement the new legislation and on associated problems, future implementation plans and recommendations for amendments.

Section 9 (Amendment of I.R.C. Section 162(c) to Apply FCPA, As Amended, Rather Than U.S. Law Generally):

Under Section 162(c) of the Internal Revenue Code, no deduction is permissable for any payment by a U.S. taxpayer that would be illegal if U.S. law applied to such payment. This adverse tax consequence occurs regardless of whether U.S. law actually applies to the payment or whether the payment is legal where made.

Further, Section 1065 of the Tax Reform Act of 1976 provides that any Section 162(c) payment by a foreign corporation controlled by a U.S. taxpayer is included as Subpart F income and is not deductible in calculating Earnings and Profits under Section 952. In the case of a DISC of a U.S. taxpayer, Section 162 payments are treated as a "deemed distribution" to the U.S. shareholder.

The Chafee bill would amend I.R.C. Section 162(c) to provide that nondeductibility (and, therefore, adverse Subpart F and DISC treatment) would occur only if a payment by a U.S. taxpayer, controlled foreign corporation or DISC violates the FCPA. Thus, U.S. law would no longer be applied on a hypothetical basis under Section 162(c) but rather the actual U.S. statutory prohibition under the FCPA (and no other) would be incorporated within the terms of the tax penalty provisions.

Section 10 (Sense of Congress Supporting Bilateral and Multilateral Agreements on International Business Practices):

The Chafee bill expresses the sense of Congress that the President should pursue negotiation of treaties establishing standards of conduct for international business practices and creating a process for resolving problems and conflicts associated with such practices.

In addition, the bill calls for exploration of an international agreement for rates of commission. A report to the Congress on such negotiations is sought by September 1, 1981. This report is to identify the steps that the Administration and Congress should consider taking if the negotiations do not successfully eliminate the competitive disadvantage of U.S. business. Full oversight hearings on the FCPA are to be held 60 days after receipt of the Presidential report.

In addition, this section would require that the Administration prepare and submit to Congress in six months a report explaining steps that the United States could take under existing law or should consider implementing in new legislation to promote cooperation by other countries or other industries to prevent bribery in third countries.

[From the Wall Street Journal, Aug. 3, 1979]

BRIBES AND BUSINESS: U.S. FIRMS SAY 1977 BAN ON FOREIGN PAYOFFS HURTS OVERSEAS SALES

Harvey Trilli is fuming with frustration, and he doesn't care who knows it.

Mr. Trilli is president of a large Pittsburgh-based engineering and construction firm—Swindell-Dressler Co., a subsidiary of Pullman Inc. He contends that his company recently was beaten out of a number of big overseas construction jobs because of payoffs to foreign-government officials by European competitors. One of the projects was a $40 million brick plant in Iraq.

"We thought we had the thing all wrapped up," Mr. Trilli says. "We had a team of people there for five or six weeks. All the terms were agreed to, including the pricing, and we were told the contract would be signed in a month. Then out of the clear blue sky, a German firm got the contract."

The Pittsburgh executive names the West German firm involved and says he believes it got the contract "because they made a big payment to a high official in Iraq." Mr. Trilli concedes that he wouldn't be able to prove that a payoff occurred. But even if he could, it would be of little avail. Bribery by West German companies to obtain foreign contracts isn't illegal in West Germany, and the companies may even deduct the costs as a business expense for tax purposes.

$100 MILLION IN LOST SALES

Chicago Bridge & Iron Co., an Oak Brook, Ill., fabricating and construction concern, likewise has lost "in excess of $100 million of sales over the last three years" in situations "where we think the element of bribery was at least present," according to William M. Freeman, senior vice president for finance of the company.

Increasingly, American corporate executives are complaining about what they contend is a continuation of under-the-table payoffs by foreign competitors whose governments either look the other way when overseas bribery occurs or surreptitiously encourage the practice in order to increase their exports and improve their balance of payments.

Midland-Ross Corp. of Cleveland cites two instances of suspected payoffs this year in overseas contract negotiations. Both involve paper-mill equipment for two West African nations, which the company declined to identify. In one case, although Midland-Ross was favored by the consulting engineer for the project, it lost out on a $4 million contract to an Italian company that came in "at the zero hour." In the second case, Midland-

Ross dropped out of the competition on a $4 million to $6 million job when it learned that it would have to kick back 10 percent of the contract's value to the president of the country and another 3 percent to "the president's sidekick."

A SOLITARY CAMPAIGN

Paying off foreign officials to obtain lucrative contracts isn't unknown among American companies, of course. More than 300 of them have admitted to the Securities and Exchange Commission that they had made questionable payments or engaged in misleading accounting practices in their foreign operations. But since December 1977, U.S. companies have been operating under the provisions of the Foreign Corrupt Practices Act, which makes it a criminal offense to offer a payment to a foreign-government official to assist in obtaining or retaining foreign business.

The law provides for prison sentences up to five years for violators and fines of up to $1 million for their companies—the largest fines ever authorized for imposition on American business firms. Companies doing business overseas also are required to set up rigorous accounting safeguard to defect the existence of slush funds and other financial device for making illegal payoffs.

So, far, however, no other industrialized nation has seen fit to impose any such strictures on its businessmen, and an anti-commercial bribery treaty, proposed by the United States, is languishing in an inactive committee of the United Nations Economic and Social Council with little prospect for early agreement even on a working draft.

Meanwhile, the unilateral American effort to upgrade the ethical standards of international business, critics of the 1977 law complain, is blocking off large chunks of the globe as unsafe areas for U.S. companies to solicit business. These "sensitive areas," businessmen say, include not only many developing nations in Africa, the Far East, and Central and South America but also the oil-rich kingdoms and sheikdoms of the Middle East.

PAYING AN ENTRY FEE

"The U.S. brand of morality hasn't been successfully sold to a lot of areas yet," says Robert F. Conley, vice president for international marketing of Lockheed Corp. "In many countries, rewarding the decision makers is still the way that things are done in the business community. It's pretty obvious that we now have less ability to get an audience or even the atteniton of the decision makers when they know we're restricted in paying fees."

How much business is being lost by American firms as a result is impossible to determine because of the private, if not clandestine, nature of most international contract arrangements. But to judge from the intensity of criticisms of the 1977 act, the hardest-hit firms are large international construction companies that deal mainly with foreign governments or with government-run industries. Some of these companies say that in certain countries, it is impossible even to get on the bidding lists without paying what amounts to an "entry fee" to a local agent who has good connections with the government in power.

Last week, the lid was lifted a little bit on how large these fees can sometimes be. A Belgian firm, Eurosystem Hospitalier, which had been working on a $1.2 billion hospital project in Saudi Arabia, was plunged into bankruptcy. The crash was attributed to "excessive" secret commissions, estimated at $282 million, paid to get the Saudi contract. The Belgian royal family is involved because Prince Albert, brother of King Baudouin, was a leading member of the Belgian business mission to Saudi Arabia that obtained the contract.

The United States, which in 1976 ranked first in its share of the overseas construction market, dropped to fifth place last year, trailing Japan, Korea, West Germany and Italy, according to the National Constructors Association, a Washington-based trade association of large construction companies.

"A good part of the reason for this," says an executive of a West Coast construction firm, "is the 1977 law." He adds: "The commissions we used to pay are still a social or business custom in some countries, but now they're crimes as far as we're concerned."

Granville Kester, an executive vice president of Michael Baker Corp., an engineering consulting firm based in Beaver, Pa., says his firm is no longer trying to do business in the Middle East because "we feel we would have to pay big commissions to agents in those countries that could be considered kickbacks by U.S. authorities."

The problem with having to rely on commission agents, he says, is that "it is difficult to determine whether their services are legitimate and yet we're criminally liable if it turns out their services aren't legitimate."

Mr. Trilli of Swindell-Dressler says his company doesn't even attempt to do work anymore in Nigeria or Libya, partly because "we've been led to believe that in order to get business there, you have to pay off somebody." A similar problem exists in Mexico, according to several companies. Says Eugene Myers, vice president for finance of Marley Co., a manufacturer of water-cooling towers that is based in Kansas City. "We know we can't sell to certain people down there." And Joy Manufacturing Co. of Pittsburgh suspects it lost a big contract to supply pollution-control equipment to Mexico's government-owned power company because a Swedish competitor made personal payments to company officials to obtain the contract. "I couldn't prove it, but I have a strong feeling that a payment was expected" in order to get the contract, says a Joy executive.

"A ROUGH AREA"

South Korea is mentioned by one large chemical company. "It's a rough area, corrupt as hell," says a company spokesman, who adds that his company has withdrawn from the area because payoffs to government officials were required. "We decided their business just isn't worth it," he says.

Earlier this year, the State Department received a cable from the U.S. embassy in Kinshasa, Zaire, expressing concern that the U.S. might lose access to Zaire's markets and its vast natural resources because other governments aren't showing the same zeal as the U.S. in policing their businessmen's activities in Africa. "Strict federal regulations against payments to facilitate sales put U.S. salesmen at a distinct disadvantage in a system which would rather not work at all than work without oil (payments)," the cable stated.

Criticism of the 1977 law in U.S. corporate circles has tended to be low key and often off-the-record for obvious public relations reasons—any company that complains too loudly inevitably raises questions in the public's mind about its own overseas sales practices. Many companies, of course, profess to have no difficulties with the legislation: Du Pont Co., for example, with $3 billion in foreign sales last year, says its own corporate code of ethics is more rigorous and predated the passage of the U.S. law. And an official of a major aircraft company says the law has been a boon because "since it was passed we have been getting about a fifth as many requests for payoffs as we used to."

Cincinnati Milacron Inc., one of the nation's largest producers of machine tools and other industrial products, has lost business because of "restrictions on where we can pay legitimate sales commissions," says James A. D. Geier, president, "but we don't know how much." Mr. Geier adds, "However, there are other boys in the world who don't play by the same rules."

THE AVIATION MARKET

One place where the game is fast and loose is the international aviation market, according to some U.S. plane builders. At one time they themselves were active participants, paying out millions of dollars in commissions and "fees" to some of the most highly placed "sales agents" in the world, including a former prime minister of Japan, the husband of the queen of the Netherlands and the commanding general of Iran's air force. Now, under the provisions of the 1977 law, they are required to sit on the sidelines. One big competitor they are watching enviously—and suspiciously—is Airbus Industrie, a European consortium owned mainly by French and West German aircraft makers, including Societe Nationale Industrielle Aerospatiale, the French state-owned aerospace company. Airbus in recent years has had phenomenal success selling an airliner called the A300 to government-owned airlines.

Comments one U.S. plane producer: "The Aerospatiale folks are completely at liberty to take on anybody they wish as a consultant for a retainer or a commission. In the last 18 months, they've had success in selling the A300 to Singapore, Indonesia, Thailand, Malaysia and the Philippines. It may be a coincidence, or it may be their day to shine, but the sales happened all at once and at a time when U.S. companies were restrained from employing their past sales practices."

AN INCIDENT IN QATAR

So far, the government hasn't brought criminal charges against any corporation for violating the law, but in April the Justice Department filed a civil suit against businessman Roy J. Carver and an associate. According to the complaint, Mr. Carver approached the American ambassador to the sheikdom of Qatar and asked, "Who do I see now?" to win approval of an oil concession for which the two men allegedly had paid $1.5 million in bribes during 1976. The two businessmen consented to a court order enjoining them from offering further payments.

Despite intermittent grumbling about the anti-bribery statute, Congress isn't likely to amend it, certainly not this year. However, a White House task force on export disincentives is considering ways to eliminate "ambiguities," especially a provision subjecting company executives to criimnal prosecution for "having reason to know" that independent sales agents abroad were making payoffs. The law could be costing U.S. exporters $1 billion a year in lost business, a task force spokesman says, citing "very rough, preliminary figures."

The "sweeping language" of the law as it relates to a corporation's responsibility for the actions of its overseas agents is particularly disturbing to Dresser Industries, a spokesman says. And Westinghouse Electric Corp. concurs, declaring in a recent position paper on export policies that this provision has led some companies to adopt "an unnaturally conservative marketing approach overseas."

In Indonesia, for example, Airbus's agent used to be a high official of Pertamina, the government-owned oil company. He now is a minister in the government. Recently, Garuda, the Indonesian state airline, placed an order for six A300 jets, with an option for six more.

INDONESIAN SUGAR MILLS

Another Indonesian business opportunity currently is being watched closely by businessmen around the world. The Indonesian government has asked for bids for the con-

struction of six sugar mills for about $40 million each. All the bidders are European except for two U.S. concerns—Arkel International Inc. and a consortium headed by Katy Industries Inc. Neither company will discuss the project, but a source involved in the competition says, "Whoever gets the contract there must pay for it, whether you call it a bribe, commission or consulting fee. That's the fact of life in Indonesia, has been and always will be." For an American company to get an Indonesian contract "without getting caught violating the U.S. law, some very sophisticated paper work has to be done," the source adds.

Businessmen and government officials abroad, meanwhile, are taking attitudes ranging from commiseration to amusement at the controls now imposed on their U.S. competitors. An informal poll of more than a dozen British and European trade officials indicated a nearly unanimous opinion that the U.S. has lost overseas business because of the restrictions of the 1977 law. But more could provide specific examples or make an overall estimate of the amount of business lost.

"The main problem," says Sir Frederick Catherwood, a former chairman of the British Overseas Trade Board, "is extortion rather than corruption—that you can't do business (in many parts of the world) unless you pay the entry fee."

Sir Frederick says the question involves the extent to which a nation can impose its laws and regulations overseas. "Can you make illegal in your own country something which is only nominally illegal—but not enforced—in another country?" he asks. "The U.S. has said more or less, 'Yes we can,' and other countries have said, 'No, we can't.'"

FOREIGN-TRADE DEPENDENCE

Another factor, Sir Frederick says, is a nation's degree of dependence on foreign trade—exports account for only 8.5% of gross national product in the U.S., against 30% for Britain. He leaves little doubt that legislation against illegal foreign payments has minimal public support in the United Kingdom. "We, who are so much more vulnerable, would be killed," he says.

This attitude is reflected in the lack of zeal shown by the British government in following up recent payoff scandals. When a subsidiary of British Petroleum, partly state-owned, was shown (through SEC filings) to have made payoffs totaling up to five million pounds to win a Saudi computer contract, the British government refused even to discuss the situation. Similarly, there hasn't been a public investigation of state-owned British Leyland's Mideast contracts, which have been widely publicized as bribe-aided.

Business payoffs are even less of an issue in West Germany and Japan, the two nations whose companies are most often suspected by U.S. competitors of making illicit payments. Neither country has ever taken any steps to investigate the business practices of its nationals. And neither country has any permanent agency similar to the Securities and Exchange Commission, the U.S. agency charged with enforcing the corrupt practices law. Gen. Douglas MacArthur, in reorganizing the Japanese government after World War II, set up a Japanese SEC, complete even to the name. But it was one of the few MacArthur innovations that didn't take: Japan disbanded the agency after a few years.

In Tokyo, in fact, the man-on-the-street reaction to questions about payoffs is that they are an established way of transacting business. Even after former Prime Minister Kakuei Tanaka was arrested and jailed on charges of receiving a $1.7 million bribe from a Japanese agent of Lockheed Aircraft Corp., he was reelected as a representative to the lower house of parliament, receiving one of the largest votes cast in the election.

[From Time magazine, Mar. 16, 1981]

BIG PROFITS IN BIG BRIBERY

When the forces of virtue rise one foot, the forces of vice rise ten feet.—Chinese proverb.

At a table in Mexico City's Camino Real Hotel, a foreign businessman and a middle ranking government official are talking quietly in a corner. Midway through the conversation, the foreigner casually places an envelop on a chair next to him. When the foreigner rises to leave, the envelope remains behind. The government official slips it into his coat pocket a few minutes later and departs.

That is the way all too much of the world's most important business is done these days. From the shrewdly sophisticated kickback schemes of the Middle East and Latin America, to the virtual Mafia-style and shakedowns of sub-Saharan Africa and Indonesia, the universal game of bribery in the pursuit of profit goes on and on.

Is this a game that U.S. businessmen should be allowed, and even encouraged, to play? Or should they instead be compelled to wash their hands of it entirely, leaving the spoils to competitors in other lands? Those are some of the difficult questions that were addressed last week when the General Accounting Office released a detailed study of the impact on American business of the 1977 Foreign Corrupt Practices Act.

The act sprang from the nation's Watergate-era revulsion at the global bribery excesses of such well-known American companies as Lockheed, Northrop and Gulf Oil. During the mid-1970s those companies, and others, made headlines almost weekly as sensational disclosures surfaced about their roles in paying megabuck bribes to high foreign officials to clinch deals.

In an effort to stop such corruption, revelations of which rocked the government of Takeo Miki in Japan and disgraced Prince Bernhard in The Netherlands, the Foreign Corrupt Practices Act made it a criminal offense to pay bribes of any sort to foreign officials to secure or retain business abroad. Punishment could be a prison sentence of up to five years and fines of as much as $10,000 for individuals and $1 million for corporations. The legislation also set up accounting procedures designed to make it virtually impossible for companies to disguise such "sensitive payments" or to hide them elsewhere in the corporate books.

There is little doubt that the passage of the 1977 act has made U.S. businessmen think twice about bribing abroad. At Lockheed Corp., whose very name was synonymous with payoffs and freebies for foreign officials in the 1970s, the company now no longer picks up even hotel bills for customers visiting its California headquarters for contract talks.

By contrast, "caution" to some U.S. companies simply means figuring out clever new bribery schemes that are harder to spot. One way is to join up with a foreign company that is not prohibited from making the necessary payments, and let it do the dirty work instead.

The major problem of any law on bribery is that in much of the less-developed world what some Westerners might regard as commercial corruption of government and business has always been looked upon as an inescapable fact of everyday life. The stylized arrangements for giving and taking payments are often perfectly normal and legal under local law and custom.

Nevertheless, foreign officials usually design schemes to hide the transactions as much as possible, since few, if any, are willing publicly to admit taking the payoff. Likewise, foreign businessmen are equally queasy about being discovered offering the gift in the first place.

One reason for the generalized embarrassment is the sheer magnitude of the funds involved. In recent years, the worldwide explosion of oil prices has sent hundreds of billions of dollars cascading into some of the poorest nations on earth. These countries have set out on instant-industrialization programs and often spend money as quickly as it is earned.

The typical major case of bribery involves a large project in an industry that is highly competitive, but with little significant difference among the products. The size of the project allows both parties to hide the payoff in the price without undue notice. The number of competitors means that the seller and the buyer can more easily bargain for deals. These conditions, for example, are found in contracts for the sale of telecommunications equipment or aircraft and for most construction programs. Says Jules Kroll, a New York-based consultant on white-collar crime: "If there's only one or two companies bidding on a deal, it might go down very straight. But if you've eight guys who can do it, then people are going to get creative."

The Persian Gulf has now become a romper room of business corruption. In Saudi Arabia, a key government minister is widely reported to have collected upwards of $500 million in "commission fees" in connection with foreign business ventures in the past year alone. To do business in Saudi Arabia, it is essential to be connected, via an agent or middleman, to a member of the royal family, which controls not just the government but business as well. Says a veteran U.S. businessman bluntly: "Everyone needs a prince." Finding one is not hard; there are 5,000 princes in the royal family in this underpopulated nation of 6 million.

Bribery in that part of the world, though, can still be a complicated affair. According to a Justice Department complaint, in 1976 two U.S. businessmen, Roy Carver and R. Eugene Holley, co-owners of a tax haven oil company in the Caribbean, allegedly paid the Oil Minister of Qatar a bribe of $1.5 million for exploration rights in that country. But when the lease expired, a new minister had taken over and he refused to renew it. The indignant oilmen thereupon protested to the local American ambassador, who informed the Justice Department. The department in turn obtained a federal court injunction in 1979 preventing the men from violating the Corrupt Practices Act, which was by then U.S. law.

Mindful of the spreading Islamic disgust at the sort of corruption that helped topple the Shah of Iran two years ago, the Saudi regime has recently begun a well-publicized clean-up drive. The campaign, though, is largely cosmetic; payoffs continue unchecked. One method is fifty-fifty partnership arrangements between foreign companies and Saudi locals. Complains a Dutch industrialist: "It's all very well arranged, with profit-sharing arrangements set up for this purpose. But it is still bribery."

In the developing nations of Africa, foreign visitors have been bestowing gifts on local potentates since time began. Nothing much has changed except the value of the trinkets, which these days are more likely to be yachts and sports cars than beads and mirrors. In many sub-Saharan nations, a favorite scheme is to create a lucrative job in a project for an official's relatives or friends. For years the British-based Lonrho Ltd. trading house kept its Kenyan operations running smoothly with President Jomo Kenyatta's son-in-law as its head. When Kenyatta died in 1978, that connection no longer counted for much. Complains a foreign businessman in Nairobi: "Now there is a whole new set of people to deal with—

and they all are asking for far more money."

In Latin America corruption is pandemic from the Rio Grande to Tierra del Fuego. Bribing in Mexico is handled with the stylized flair of a Latin seduction, beginning with dinner at an expensive restaurant like La Hacienda de los Morales, and climaxing with a weekend jet-jaunt to Punta Cancun or Acapulco. The target of such lavish hospitality is most often the head of purchasing in one of the Mexican government's state ministries, who oversees procurement and importing.

In Brazil bribery is often not just figuratively but literally a matter of seduction. Says a top West German businessman there: "Lavish entertainments with women—that is very effective." In the booming industrial megalopolis of São Paulo, a favorite spot to nurse along a deal is La Licorne, a discreetly mirrored nightclub with a striptease show, where call girls cost $120 a night, and foreign businessmen pick up the tab.

By contrast, love objects in Argentina run more toward postimpressionist paintings from pricey Buenos Aires galleries like Wildenstein, or jewelry selected by government officials for their wives from a famed jewelry shop like Ricciardi, a favorite haunt of the late Evita Perón. Those bills too, of course, are paid by the deal-hungry businessmen.

For really big South American deals, one Italian-based construction company is building an entire luxury real estate development on Uruguay's Punta del Este coastline. Yet none of the development is so far for sale to the public; instead, plots are being doled out like candy drops to favored Latin-American officials.

Leading European electric companies reportedly paid as much as $140 million in payoffs and kickbacks to win a share of the business in the construction of the $10 billion Itaipu Dam that is being built jointly by Brazil and Paraguay. Reports a U.S. business executive who watched the bidding unfold: "The European managers had unlimited authority. They paid cash into half a dozen Swiss bank accounts, and the money trickled down."

While the goal of bribery is the same in Asia, the style is often very different. In Malaysia, aspiring foreign businessmen reward government officials by making use of the Malaysian mania for gambling. A common approach is to invite a minister or government official for an afternoon of golf, bet heavily and then spend the next three hours swatting the ball into sand traps. An only slightly more straight-forward method is to get into an after-dinner poker game with a key civil servant and lose heavily.

In Indonesia, corruption is so family-oriented that in the early 1970s, President Suharto's wife Tien was known as "Mrs. Ten Percent." These days scandal surrounds one Haji Achmad Thahir, a drab Indonesian government employee who never made more than $9,000 per year in salary in his life. But relatives fighting over his estate discovered him to have a bank account of nearly $35 million. The Indonesian state oil company, Pertamina, has charged in court that two German companies, Siemens and Klockner Industrie, paid Thahir the money in connection with the construction of a $500 million steel mill near Djakarta.

While the U.S. took a firm moral stand against corruption with the 1977 legislation, the governments in most leading West European countries either openly condone bribery or look the other way. A confidential West German memorandum by the Federal Office for Foreign Trade Information advises companies to be prepared in difficult deals to fork over as much as 20 percent of the contract price to corrupt foreign officials. All such expenditures, which can run into the millions of dollars on large engineering and construction projects are completely tax deductible as a necessary cost of business. Italy passed a law in 1980 stating that payments to foreign officials to get business are perfectly legal for Italian companies. France has no law at all on foreign bribery. Explains the head of a medium-size French company doing extensive business in the Middle East: "The French authorities know quite well that you cannot deal in those countries without payoffs."

The attitude is similar for leading Asian exporting countries. In Japan, paying off foreign officials to secure business is regarded as normal. Likewise, in Korea, the government takes the attitude that businessmen should not be hamstrung in their efforts to develop export markets and get overseas contracts.

Corruption exists, and probably always will, in this obviously imperfect world. But should the U.S. participate in it? Bribery on the global scale that is now occurring is costly, saps political vitality and can eventually undermine a people's trust in government. The regimes of the Shah in Iran or General Anastasio Somoza in Nicaragua are testimonies to the problem.

Last week's GAO study, however, makes plain that the current American law is riddled with complicating ambiguities and shortcomings. Many of the problems arise from confusion over what constitutes a bribe. So-called grease payments, such as fees to get low-level civil servants to perform their bureaucratic duties of stamping documents and processing licenses, are specifically permitted on the grounds that petty corruption is unavoidable almost anywhere. But there is a large gray area between that sort of bureaucratic paper shuffling and the discretionary authority of local officials to withhold approval for a project or license, and thereby extort not $50 or $100, but perhaps $10,000 or even $500,000 from a victimized company.

American businessmen also complain that the complex law keeps them out of many profitable deals. Says Robert Malott, chairman of Chicago's FMC Corp., a leading manufacturer of chemicals and machinery (1980 sales: $3.5 billion): "The law has American export companies thoroughly confused. We simply cannot get clarification on what is legal and what is not."

Dubbed by one Wall Street wag the "Accountants' Full Employment Act of 1977," the legislation has forced companies not only to beef up their internal auditing staffs but to check and double-check the propriety of even the most inconsequential payments. Example: in Xerox's Cairo office, local staffers had to get permission from a senior corporate officer in the U.S. before they could pay $8 a month in tips to Egyptian telex and telephone repairmen.

More confusion surrounds a company's liability under the act for the actions of its foreign agents. If the local representative uses even a part of his commission, as often happens, to bribe officials to keep a deal on track, the act asserts that the U.S. company is responsible if the executives had reason to know what the agent was doing. The GAO study recommends that Congress rewrite the law to give clearer guidance to businessmen as to what they can and cannot do to curry favor with foreign customers. It suggests that Congress repeal the criminal penalties connected with the accounting provisions of the law and that the Department of Justice and the Securities and Exchange Commission clear up the ambiguities in the act's antibribery provisions.

Senate Republican John Chafee of Rhode Island is expected to reintroduce a bill this week that would make some such changes in the Foreign Corrupt Practices Act. Chafee lauds the law as an "important step toward the objective of prohibiting bribery of foreign government officials." But he also says that it is "difficult to decipher, hard to implement, and its ambiguities have bred confusion."

The Reagan Administration has already signaled its dissatisfaction with the act, and particularly its tendency through loose wording to cast a chill over the willingness of U.S. businessmen to push into foreign markets and thereby help boost U.S. exports.

Instead of taking the politically foolish position of calling for repeal of the act, and thus appearing to be in favor of worldwide bribery by American business, the Administration seems to be indicating, whether intentionally or otherwise, that it is prepared to let enforcement of the act languish. Indeed, the President's transition team on the workings of the Securities and Exchange Commission, which shares enforcement jurisdiction over the act with the Justice Department, has recommended decriminalization of bribery.

Such a stance by the Administration toward foreign bribery would itself cause problems. By failing to enforce the act as written, the Administration not only would leave the legislation's ambiguities unresolved, but would show a disrespect for the law, which is itself corrupting. Since the U.S. has adopted a moral position with regard to foreign bribery neither the Administration nor Congress can now afford to let the subject wither away without compromising its principles in the process.

MUM'S THE WORD

A bribe is a bribe by any name—and the more euphemistic the name for it, the better. *Baksheesh*, currently in wide use in the Middle East, is a Persian word that is also found in Turkish and Arabic. It actually means a tip or gratuity given by a boss to his underling. The word was first used extensively to mean a bribe in connection with the money that a new sultan gave his troops. In most Spanish-speaking countries, *el soborno* means a payoff, but in Mexico pavola is aptly described as the bite (*la mordida*). The Germans call it *Schmiergeld* (grease money), though export traders usually simply say *N.A.* for *nützliche Abgabe* (useful contribution). In France, where there is *veritas* in the *vino*, a payoff is called a *pot-de-vin* or jug of wine. The Italians refer to a bribe as a *bustarella* (little envelope). Under-the-table payments in East Africa go by the sobriquet *chai*, Swahili for tea. In onetime British colonies, the words vary widely: a bribe in Nigeria is called dash, in India a backhander. The popular Japanese word for bribe is *wairo*, but corruption is poetically called *kuroi kiri*, or black mist.

ACCOUNTABLE FOR WHAT? EXECUTIVES PUSH CHANGES IN FOREIGN CORRUPT PRACTICES ACT

(By Shirley Hobbs Scheibla)

WASHINGTON.—If auditors on a company's payroll ferret out possible fraud or other wrongdoing involving management, should the in-house legal counsel report it directly to the audit committee of the board of directors?

This was one of the tough questions posed at a recent conference in Boca Raton, Fla., of the Institute of Internal Auditors (IIA) and the National Association of Corporate Directors (NACD) by C. Barry Schaefer, vice president-law, of Union Pacific Railroad Co. Since management presumably hired the lawyer to represent the shareholders' interest, says Schaefer, he should be able to go straight to the audit committee. But this brings up the touchy issue of the lawyer-client relationship with management. (The American Bar Association now is weighing a proposed revision of its canon of ethics to

deal with the matter, following the failure of the Securities & Exchange Commission to do so.)

To be on the safe side, Schaefer suggests that it might be advisable for both the audit committee and management to obtain independent counsel. Hence three lawyers, or law firms, would be involved in one audit (all at the company's expense).

As this case in point suggests, there are many unanswered questions involving the newly emerging independent corporate audit committees. Since June 30, 1978, the New York Stock Exchange has required each member company to have an active audit committee. The American Stock Exchange has recommended establishment of an audit committee but doesn't require it for listing. The National Association of Securities Dealers is weighing whether to require an audit committee as a condition for listing on the NASDAQ over-the-counter quotation system. According to the SEC, 84.5% of all companies filing proxy statements boasted such bodies.

MISNAMED LAW

Views differ on what they should do, and especially on their working relationship with management. There was general agreement at the conference, however, that the so-called Foreign Corrupt Practices Act is making life difficult for audit committees, other corporate directors, internal as well as independent auditors and management. And that's equally true of companies which do no foreign business, because the misnamed law applies to accounting practices of domestic business.

Attendees complained that the measure's vagueness makes it difficult to know how to comply. Although the law was passed in 1977, guidance from the SEC and the courts is sadly lacking. Yet violators are subject to imprisonment for up to five years and fines of $10,000.

Washington evidently is beginning to get the message. Sen. Edwin (Jake) Garn (R., Utah), slated to be the new chairman of the Senate Banking Committee, plans to hold hearings early next year on a measure by Sen. John H. Chafee (R., R.I.) to clarify the Act. A transitional task force for the Reagan Administration is considering a number of suggestions, including the elimination of criminal penalties.

At Boca Raton, one speaker suggested that the move toward greater corporate accountability may compel the federal government to put its own house in order. The government, said Francine Neff, former treasurer of the United States, should publish actual expenditures similar to the proposed budget it now issues based on what it requests from Congress. "How can we talk about controlling the federal budget when we don't even know what it is?" she asked.

The government keeps its books on the basis of obligational authority, and disbursements can go on for years. This practice makes it virtually impossible to get a clear picture of expenditures and accrued debts. If the critics have their way, it will have to keep its books so that they can be audited by independent CPAs, something that by and large is currently impossible.

"WE'RE BEING HOODWINKED"

A law passed in 1956, ordered the government to do so "as soon as practical." While a few stabs have been made in that direction, it hitherto hasn't been deemed "practical" to complete the job. Now, however, the move toward greater government accountability is gaining momentum. Sen. Pete V. Domenici (R., N.M.), who will be the new chairman of the Senate Budget Committee and is an old friend of Neff, says that he intends to pursue the matter. "We know we're being hoodwinked," he declares.

William Howard Taft IV, head of Reagan's transitional task force for the Office of Management and Budget, asserts: "We definitely will get into it. We will start the ball rolling, even though it will be a long-range undertaking."

Federal emphasis on corporate accountability also has spurred one Democrat, Sen. Thomas F. Eagleton, to make the government more accountable by introducing a bill requiring heads of federal agencies to vouch for their internal accounting controls, just as corporate executives now must do under the FCPA. The Senator plans to reintroduce the measure in January.

Among other shortcomings of the FCPA, explains William J. Maroni, legislative assistant to Sen. Chafee, it stipulates neither a minimum amount that a firm must be accountable for nor a standard for what is material. When Chafee introduced the measure earlier this year, he said that to violate the Act, one need only err in keeping company books in the detail to which the SEC deems necessary." The Chafee bill aims to correct such flaws.

The bill also would have the Justice Department furnish guidance to business on how to comply with the FCPA and make the Department the sole enforcer of the corrupt practices part. The SEC would administer the accounting standards section.

The General Accounting Office has completed a draft of a report on the FCPA and now is awaiting comments from the Departments of Justice and State. Donald L. Scantlebury, director of GAO's Financial and General Management Studies Division is in charge of the study and expects to issue it late next month.

The domestic section of the Act affects far more people, and the cost implications are greater, Scantlebury says. "I like precise laws so that guessing isn't necessary." As the law now stands, a company could decide that it will review all checks over $10,000. A court then could second-guess it by ruling that the review should cover checks of $2,500 or more. Congress, in short, has left it up to the courts to determine reasonable accounting practices, Scantlebury explains.

Charles G. Steele, chief executive officer of Deloitte Haskins & Sells, warned the conferees at Boca Raton that reports by independent CPAs on internal accounting controls don't assure compliance with the FCPA. Their reports cover only material items, and the Act contains no standard of materiality. Moreover, according to Steele, compliance is a legal determination that independent accountants are not qualified to make.

Following a speech to the conference, SEC Commissioner Philip A. Loomis Jr. was asked: "Has the SEC begun any enforcement actions against any companies under the accuracy of books and records provisions of the FCPA?" He replied that there have been some cases, but each involved violations of other laws.

Stanley Sporkin, SEC director of enforcement, denies that the FCPA is excessively vague. He adds that a number of investigations are afoot and cases under consideration. The SEC's Loomis told the conference that there is "a considerable difference of opinion in the Commission" regarding the liability of U.S. corporate executives for violations of the Act when a U.S. firm doesn't own a controlling interest in a foreign corporation and doesn't involve itself in day-to-day management.

One of the suggestions made to the Reagan transition team is that U.S. companies operating abroad should abide by the laws of their host countries. In this country, bribery was illegal prior to the FCPA's passage. The team is actively soliciting all possible suggestions for amending the Act. It already has discussed it with influential members of Congress and found them interested in quick corrective action.

Many members of audit committees wanted to know what questions they should be asking. On this score, Robert Mednick, vice chairman of the Committee on Accounting & Auditing Standards of Arthur Anderson & Co., told us: "If an audit committee member is concerned about exposure, I believe he has an obligation to ask questions of not just the auditor but also management and counsel. These are some of the questions: What do we consider our greatest areas of exposure? What types of contingent liabilities do we have? Have we created adequate reserves? Are there any similar cases that are pending? What's been our experience in the past? What's our experience in the most recent product liability litigation? What's going on in Congress that might change our exposure in the future?

"If there were easy answers, we wouldn't be sitting here talking about this. . . . You can't make precise something that is uncertain. . . . The issue is whether that's communicated properly because the investor has to evaluate whether he is going to accept that risk."

NOT ENOUGH TIME?

Asked if he believes that audit committees are doing an adequate job, Mednick replied that, based on his experience, he finds "they're all over the lot. Some are outstanding, and some are just barely getting their feet wet and not sure of what they ought to do."

A Conference Board study indicates that many audit-committee members feel that direct reporting to them by the internal auditor would require closer supervision than they have time for. All those covered by the study agreed that what's important is unrestricted access.

The majority of one discussion group at Boca Raton decided that having an internal audit go directly to the audit committee would convert it "into a quasi-external audit function. Management would then need some other internal audit function to catch things before they were brought to the committee."

James Martin, chairman of Massachusetts Mutual Life Insurance Co., revealed that his director of auditing has it in writing that he can go directly to the audit committee, although routinely he reports to the chief financial officer, Joseph P. Greene, director of auditing for Gillette Co., said no area is exempt from the internal auditor, who has a clear reporting line to the board and management.

The SEC Staff Report on Corporate Accountability, submitted to Congress last September, stated that the most important functions of an audit committee are to choose an independent auditor and review the plan of audit and the results of the annual audit. It found that a 71.9% of the companies surveyed, audit committees review the adequacy of internal controls, especially to comply with the FCPA. (According to a monograph published by the National Association of Corporate Directors, many SEC consent settlements include the establishment of an audit committee.)

But what about the sensitive audit described at the outset, which may indicate the need for independent counsel for all concerned? Schaefer of Union Pacific suggests developing a procedure ahead of time for dealing with such a contingency. If dependent counsel, according to Schaefer, it may request that he take over supervision and direction of the entire audit. In the proper circumstances, an audit run by outside counsel and used to give legal advice to the board can be safeguarded from discovery in litigation, he said.

A REPORT AS EVIDENCE

A member of the audience asked Schaefer how Union Pacific deals with the problem of having an auditor communicate a probable

violation of law or regulation without leaving potentially incriminating documentation. Schaefer replied that the extent to which an audit report is subject to disclosure is now before the Supreme Court. (An appeals court decided that communications made to the general counsel of Upjohn Co. by lower-echelon employes aren't protected from disclosure to the Internal Revenue Service. Upjohn's appeal to the high tribunal is pending.)

According to Schaefer, an audit report ordinarily must meet two criteria to be secure from disclosure. First, it must be part of the advice given by an attorney to a client. That means the lawyer should request the information. Second, it must be prepared in anticipation of specific litigation. He explained: "You can't simply say, 'Well, someday we thought we'd have a lawsuit so we conducted some investigations.'"

In Schaefer's view, the counsel shouldn't keep the minutes of the audit committee, and the internal auditor should report to the committee and not to the general counsel or chief financial officer.

As to federal accountability, Francine Neff got an ovation with her statement that the public sector should be no less accountable than the private sector. (The former U.S. Treasurer now is vice president of the Rio Grande Valley Bank of Albuquerque, a member of the audit committee of Hershey Foods Corp. and chairman of the audit committee of E-Systems Inc.) In an interview following her speech, she said: "They keep talking about the responsibility that corporations have to consumers and shareholders. Think about the public trust that government entities have for all of us. I just loved hearing Sen. [Howard] Metzenbaum talk about corporate governnance, and then when I asked him if the Senate did not feel it had oversight responsibility regarding the accounting of government, he told me it would be too expensive."

Asked if government books are kept well enough to audit, she replied, "No, I don't think so." Scantlebury of GAO agrees. He says: "I don't disagree with issuing a federal budget on expenditures, but first we'd have to get better yearly reporting from each agency." Requiring that is the job of the Treasury Department, since it keeps the government's books. Without a accrual accounting, it's impossible for the GAO, or any other auditor, to do a complete audit of a federal agency.

In 1975, Arthur Andersen & Co. did a study titled Sound Financial Reporting in the Public Sector, A Prerequisite to Fiscal Responsibility. It observed: "Knowledge of current deficits and surpluses is important for the annual evaluation of our financial affairs. To be meaningful, these amounts should include all costs, whether paid or accrued. Furthermore, the total accumulated deficit is crucial because this is the amount of future taxes required to pay present liabilities. To the extent that this amount exceeds the amounts that can reasonably be expected of future taxpayers, a potential for crisis develops." It also suggested that since federal policymakers frequently hold their jobs for relatively short times, they need adequate financial reports to grasp the complexities involved in their decisions.

The study showed that back in 1949 the first Hoover Commission recommended use of accrual accounting. So did the second Hoover Commission in 1956, and this led to passage the same year of Public Law 84–863, which directed all government agencies to install accrual accounting "as soon as practical." In 1967, the President's Commission on Budget Concepts recommended accrual accounting so that the annual budget could be presented on an accrued expenditure basis. Two Presidents endorsed the approach, though they failed to follow through. But federal accountability now may be an idea whose time has come.

By Mr. HATFIELD (for himself, Mr. PACKWOOD, Mr. CRANSTON, Mr. LEAHY, Mr. STAFFORD, Mr. INOUYE, and Mr. TSONGAS):

S. 709. A bill to require a refund value for certain beverage containers, and for other purposes; to the Committee on Commerce, Science, and Transportation.

BEVERAGE CONTAINER REUSE AND RECYCLING ACT

Mr. HATFIELD. Mr. President, today I am introducing the Beverage Container Reuse and Recycling Act. The time has come for us to save precious energy and natural resources. We cannot afford to continue discarding nearly 100 billion beverage containers annually. These containers are reuseable and recyclable. My bill will do a great deal to protect our environment and scarce natural resources.

Presently, seven States have laws similar to the one I am introducing. Since the manufacture and bottling of beverages is done on a geographic basis rather than a political one, there is a need for a uniform national law to assist in recovering beverage containers.

The General Accounting Office has completed a new study on the effects of the beverage container laws in four of those seven States. The title of the report, "States' Experience With Beverage Container Deposit Laws Shows Positive Effects," speaks for itself. It states that there is an 80 percent reduction of beverage container waste, a 5 percent reduction of post-consumer solid waste, and a reduction in energy and raw material use. Additionally, it reported there would be a net increase of 57,000 jobs nationwide if national legislation were enacted.

Each year over 360 trillion Btu's of energy is expended in the manufacturing of beverage containers in the United States. Under this legislation, 32 to 43 percent of that figure would be saved through the return of bottles and cans. By 1985, approximately 210 million tons of refuse will yearly fill our land. Under this bill, we will have the means to recycle approximately 10.5 million tons of refuse, through the simple device of a mandatory deposit on beverage containers.

Mr. President, this bill will not infringe on any citizen's convenience. He or she will still have the option of discarding beverage containers. It will only obligate each user who discards a bottle or can to pay something nearer to the true cost of that decision to discard. Conversely, it will provide an incentive to those who choose to participate in the cleanup of our land, the recovery of resources and the saving of scarce energy.

For centuries, we have had the luxury of living in a throwaway society. We can no longer afford to live that way. We must become stewards of the Earth. If our stewardship is to be wise rather than rapacious, we must give value for value. We must balance our consumption of the Earth's resources with renewal of those resources, wherever possible. Where resources are not renewable, we must use no more than a reasonable share, and reuse what we can.

This bill is both a symbolic and substantive step in that direction.

Oregonians were the pioneers in developing a workable beverage container law. In the nearly 10 years since its passage, the people of Oregon have grown proud of the active contribution we have made in trying to protect our living environment. It is appropriate that we look at the Oregon experience in regard to what we are fond of calling the "bottle bill."

Mr. President, I ask unanimous consent that portions of the latest report on Oregon's bottle bill be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

OREGON'S BOTTLE BILL, THE 1979 REPORT

SALEM, OREG.

We, in Oregon, are proud of the success of the Bottle Bill, the first of its kind in the nation.

Not only has our natural environment benefited from the law, but our economy has gained as well. By sharing the information we have gained from our experience, we hope you will see the value and application of similar legislation for yourselves.

VICTOR ATIYEH,
Governor.

SUMMARY

The Bottle Bill works in Oregon. The evidence that it is valid and effective is overwhelming. There is no basis for the rumors and misinformation continually circulated by Bottle Bill opponents across the country as they attempt to discredit the Oregon success and to stop other states' legislation. A few facts should dispel these distortions; formidable data backs our statements. Among these facts are:

Beverages sold in returnable containers cost less, as they always have, not only in Oregon but all through the nation. Price comparisons for beverages sold in Oregon stores and those sold in stores in other states demonstrate cost factors related to different economic and geographic regions and do not relate to the effects of the Oregon Bottle Bill. References to a beverage price at any single point in time does not necessarily reflect the actual cost of the product averaged over seasonal fluctuations and price adjustment cycles. Post-Bottle Bill beverage price increases, associated with runaway sugar prices and general inflation, occurred in Washington and California as well as in Oregon.

Sales have not fallen. They have increased. Weather and the availability of disposable income have their usual effects on beverage sales.

Employment has increased as a result of this legislation. Studies done in Oregon document the increase in employment. A study sponsored by the Federal Energy Administration and studies done by the General Accounting Office and the Resource Conservation Committee, a federal interagency committee, project increased employment nationwide as a result of a proposed national bottle bill.

State highway department expenditures for litter collection remain stable. And litter has been reduced. Clerical errors involved in the 1972–74 highway department litter survey, long since corrected, are still being trotted out by the beverage industry as evidence against the Bottle Bill.

The aluminum can has not disappeared from Oregon, nor has any container been banned. After an initial slowing in sales,

beverage cans are once again claiming their share of the market in Oregon. Aluminum can sales have increased to such a level that national aluminum can manufacturers are competing with Oregon recyclers and have instituted special recycling programs to take advantage of the over 80% return rate on aluminum cans.

Oregonians support the Bottle Bill with an enthusiasm usually reserved for popular sports, motherhood and the flag. They are not disenchanted or embittered, as some industry representatives would have us believe.

The Bottle Bill gives some Americans a chance to demonstrate their real priorities: a good life and clean environment based not on consumerism but on conservation. The public does not demand a throwaway economy; it has merely responded to aggressive advertising and marketing techniques which promote waste of natural resources.

The existence of a Bottle Bill, with its high public support and participation, has greatly enhanced community awareness of and commitment to environmental concerns. It has facilitated recycling and resource recovery operations in the state, as well as public acceptance of solid waste management programs, public involvement in community air quality standards, and public protection of open spaces.

EFFECT ON SOLID WASTE AND ROADSIDE LITTER

380 million fewer beverage containers are disposed of in Oregon each year because of the Bottle Bill. It has been calculated that the number of containers entering the solid waste stream has been reduced by 88% as a result of the law. A Portland garbage hauler commented that the volume of household garbage on his route diminished by 7–10% when the law went into effect.

NUMBER OF BEVERAGE CONTAINERS PER YEAR IN SOLID WASTE

Type of container	Prebottle bill conditions	Postbottle bill conditions	Reduction
BOTTLES			
Beer:			
Nonreturnable	89,910,000	458,800	
Returnable	26,892,500	17,556,600	
Soft drink:			
Nonreturnable	18,000,000	0	
Returnable	36,000,000	21,340,000	
Total bottles	173,602,500	39,855,400	133,747,100
CANS			
Beer	161,320,000	3,478,000	
Soft drink	102,000,000	8,100,000	
Total cans	263,320,000	11,678,000	251,742,000
Total beverage containers	436,922,500	51,433,400	385,489,100

Oregonians take great pride in the beauty of their state. They are especially proud when tourists remark that there is noticeably less roadside litter in Oregon than in neighboring states. This fact has been substantiated by several surveys. One of these was carried out in late 1976 by an Oregon newspaper, collecting and comparing litter from Oregon highways and those of its neighbor, Washington. They found 7.5 times more bottle and can litter in Washington. Roadside litter reduction was the original goal of the law and is also the most obvious result.

To document the level of the law's success, a survey of roadside litter amount (by volume and piece) and content was carried out on highways throughout the state, as provided in the bill. The survey was conducted by the State Highway Division along 30 randomly selected one-mile sites in Oregon, for one year before and two years after the law went into effect. When all the figures were in and comparable factors were checked for accuracy, they showed a significant reduction in beverage litter. The reduction after one year was 72%, after two years 83%. The trend was clear: the Bottle Bill was indeed producing the desired result. There was no necessity for, nor had provision been made to continue the survey beyond these three years; costs of recording and analyzing masses of data made its continuation impractical.

The Oregon State Highway Division continues its normal highway program of roadway maintenance, right-of-way maintenance, litter collection, and so on. Over the past five years, litter collection costs have risen only 1.5% annually, well below the rate of inflation, from $589,076 in 70/71 to $633,353 in 75/76. These figures include the costs of the Oregon Youth Litter Patrol, which is funded through the sale of "vanity" license plates.

The dramatic reduction in visual pollution along Oregon highways is a result of the greatly reduced volume of beverage container litter. The number of bottles and cans found on comparable test sites before the law amounted to 22,639; after the law had been in effect for two years, the count on the same sites was down to 3,748. Not only are cans and bottles the most visible sort of litter; they are also the least biodegradable. Natural conditions can recycle a tin can to dust in 100 years, an aluminum can in 500 years, and a glass bottle in one million years.

LITTER COMPOSITION ON OREGON'S HIGHWAYS BEFORE AND AFTER THE BOTTLE BILL

	1971–72				1973–74

ENERGY SAVINGS DOCUMENTED

The critical need to conserve energy has begun to receive national attention from both press and government. Bottle Bill proponents have long been aware of the need to look at all energy costs of container reuse, accounting for raw material acquisition, manufacturing and cleaning processes, and transportation at each stage. Taking into account total resource patterns, energy savings resulting from the shift to returnables have been significant. A net saving of 1.4 trillion BTU's per year has been realized in the new system in Oregon alone, enough to supply the heating needs of 50,000 Oregonians. Much higher savings would be realized with a national bottle bill. A Federal Energy Administration-sponsored study projects a savings of 144 to 169 trillion BTC's annually, equivalent to 70,000 to 80,000 barrels of oil per day saved nationally.

Higher return rates result in higher energy savings, of course. In Oregon, returnable soft drink bottles are reused about 24 times and beer bottles about 20 times. At this rate, the returnable bottle system uses one third the energy consumed in the throwaway system. Added energy savings are obtained from recycling those bottles that are not refilled. The return rate for cans in Oregon is very high, at 80%: the recovered metals are recycled, for additional savings. According to industry figures, the manufacture of aluminum from virgin materials requires 20 times the energy needed for recycling aluminum.

ENERGY SAVING CALCULATIONS—OREGON 1974

	Percent recycled	Container energy for gallon consumed [1] (Btu)	Container size (ounces)	Container energy for filling (Btu)	Container mix 1971 (percent)	Total container for 1974 with 1971 mix (millions of fillings)	Container mix 1974 (percent)	Total containers for 1974 with 1974 mix (millions of fillings)	Difference in container use (millions of fillings)	Energy requirement change (billions of Btu

PUBLIC HEALTH AND SAFETY

According to all government agencies charged with inspection and enforcement of health and sanitation standards, no problems related to the Bottle Bill have been reported, nor has any new staff been added to implement the law. Distributors and dealers are managing the flow of returned containers, efficiently sorting and handling them, with no adverse effect on health and safety standards in stores or other outlets.

Public health is protected by this law as it outlaws metal beverage containers with pull tabs. The result has been to make Oregon's recreation areas cleaner and safer. Oregon has fine public beaches that run the entire length of the coast; the Bottle Bill has helped to keep them and our campgrounds and wilderness areas free of sharp metal and broken glass which are a hazard to the health and safety of people and animals.

IMPROVING THE EMPLOYMENT PICTURE

Employment in Oregon increased as a consequence of the Bottle Bill. New jobs were created in brewing, soft drink bottling, transportation, retail sales and recycling, while bottle and can manufacturing positions were reduced as the demand for containers dropped. An estimated net increase of $1,600,000 in annual payroll ensued, with its accompanying economic benefit to the community.

A study by Gudger and Bailes estimates a gain of 365 jobs, calculated from all segments of the economy. The lowest estimate, 135 jobs gained, is from a study by ADS which was based on inadequate data, having failed to elicit enough responses from enough industry sectors.

Improving the employment picture in Oregon was not the initial goal of the Bottle Bill but has been a welcome effect.

EFFECT OF BOTTLE BILL ON OREGON EMPLOYMENT

	Increase or decrease	Number
Production labor	Decrease	(350)
Truck driving	Increase	140
Warehouse and handling	Increase	575
Total employment	Increase	365

THE ECONOMY: SALES UP, PRICES DOWN

The net economic effect of the Bottle Bill on Oregon consumers and beverage-related industries has also been positive. Excise tax records show increased beer sales. Soft drink manufacturers, distributors, and retailers reported a sales increase in 1973 over 1972 of over 10%. This figure is well above the national trend for this economically depressed period. Total operating income for all beverage-related business sectors combined was increased by $3.93 million per year in the two years following the effective date of the law. Beverage sales and price fluctuation are dependent on many factors other than refund legislation, factors which have always influenced the market, such as weather, sugar prices, spendable income, inflation, and labor costs.

Oregon consumers save money with the shift to refillable containers. The price for beverages in cans has traditionally been as much as 50% per ounce higher than for the same beverages in refillable bottles. These prices of beverages in refillable containers were compared with non-reused containers in an EPA-sponsored study in 24 states. Beer and soft drinks in refillable bottles were shown to be definitely cheaper, from 5% to 58% less, depending on the size of the container, with greater savings going to larger sizes.

Nationally, the manufacture of disposable beverage containers has grown eight times faster than the consumption of beer and soft drinks. The beverage industry believes that convenience packaging is largely responsible for sales growth; they resist refund legislation, fearing it will cut into sales volume. However, in Oregon none of these grave economic consequences predicted by the beverage industry has occurred; Oregon's economy is the better for the Bottle Bill.

OREGON BEER CONSUMPTION

	Gallons (millions)	Population (millions)	Consumption (gallons per capita)

ENFORCEMENT

The Oregon refund law is self-sustaining and self-implementing, a popular law which is in effect publicly administered.

There have been no enforcement problems associated with the refund law. Its highly efficient design, based on positive reinforcement, creates built-in incentives for complying. The 18-month phase-in period, between passage and implementation, gave retailers and consumers time to understand the law's mechanisms. Complaints are rare, usually resolved informally. No state or local government agency has added staff or incurred significant added expense for enforcement of this law. Enforcement power was charged to the Oregon Liquor Control Commission; they report only five retailers prosecuted in as many years since the law went into effect.

RECYCLING AND RESOURCE RECOVERY

Recycling centers, both commercial and non-profit, have continued to flourish in Oregon since the law went into effect. Since 1970, the number of recycling programs in the state has risen to 325. Bottle Bill opponents had predicted that it would cut into voluntary recycling and discourage the harvest of other recyclable waste products. In fact, the reverse is true; the public has been educated by the Bottle Bill to recycle other items. Public participation is the basis for recycling beverage containers are not essential to economic operation of recycling centers.

Eighty percent of beverage cans are returned in Oregon; while they are not refilled, they are recycled. Several recycling companies service beer and soft drink dealers, collecting the returned aluminum, steel, and glass containers and processing them in preparation for recycling.

The Bottle Bill has not hindered the planning or implementation of resource recovery processing facilities as part of solid waste management in Oregon. Today's technology allows recovery of energy and some materials from municipal wastes; as it develops, it must become complimentary to the concepts of recycling and reuse, if it is to conserve resources rather than serve as an end in itself. Resource recovery from solid waste cannot rely on any one source of waste, such as beverage containers, and remain economically viable.

The Recycling Information Office of the Oregon Department of Environmental Quality has served as an information exchange for the public and recyclers throughout the state since 1973. Their Recycling Switchboard lists all recycling and resource recovery operations in the state; a monthly bulletin, guides for recycling projects, fact sheets, and market lists are available for recyclers, legislators, environmental groups, educators, public officials, and interested citizens.

PUBLIC ACCEPTANCE

Public acceptance is the real measure of the Bottle Bill's effectiveness. In Oregon 90% of the population approve of the law, and 95% participate in its implementation, as illustrated by the high container return rate. Energy is saved; money is saved; bottler, consumer and environment gain.

Convenience plays an important role in the Bottle Bill's popularity; containers are commonly returned to the store where they were bought, making returns easy for the consumer and the retailer. Another advantage is reduction of household garbage volume and collection cost. And, of course, pride in a cleaner landscape continues to inspire Ore-

gonians to prefer the refillable container system.

The public opinion surveys underscore the persistence of the Bottle Bill's popularity. One, conducted by Applied Decisions Systems in 1973, showed that 95% of those interviewed had an opinion of the law and, of those, 95% approved by law. The second survey, by the Seattle Post-Intelligencer in 1975, showed 90% in Oregon in favor of the bill, and in Washington, a neighboring state, 68% in favor of an Oregon-type refund law for their state.

Oregon retailers and distributors have cooperated and supported this new law from the start, making the transition smooth. Retailers continue to handle the returns themselves rather than requesting the creation of redemption centers as provided for in the law.

Government officials and politicians look favorably on the Bottle Bill. There has been no attempt to repeal this popular piece of legislation; instead, modifications to increase its scope in various ways have been proposed in each session of the state legislature. The fact that the Bottle Bill has not increased the costs of government nor expanded the bureaucracy enhances its popularity with public and officials alike.

APPROVAL/DISAPPROVAL OF BOTTLE BILL

[In percent]

	Approve	Disapprove	No opinion
1973—All Oregon respondents	90.8	4.7	4.5
1973—Oregon soft drink consumers	90.8	4.6	4.6
1973—Oregon beer consumers	90.3	5.0	4.7
1975—All Oregon respondents	89.9	4.1	6.0
1975—All Washington respondents	68.0	23.6	8.4

Sources: Applied Decisions Systems Study, 1973; Seattle Post-Intelligencer, 1975.

Mr. HATFIELD. Mr. President, returnable beverage containers are not a new concept. As recently as 1960, 95 percent of our soft drinks and 50 percent of our beer were packaged in refillable containers on which a deposit was paid. Today 79 percent of the beer and two-thirds of the soft drinks sold in the United States are packaged in "one-way" or throwaway containers.

Our consumption of beverage containers has far outdistanced the consumption of the beverages themselves. For example, in 1959, 15.4 billion beverage containers were consumed. During the following 13 years when per capita consumption of these beverages increased 33 percent, the use of beverage containers increased by a whopping 221 percent—to 55.2 billion by 1972. In 1973, the figure increased to 60 billion and was projected to go to 80 billion last year.

It is predicted that we could save 5.2 million tons of glass, 1.5 million tons of steel, and 530,000 tons of aluminum annually by switching to a returnable system. The materials used for these containers equal 45 percent of all glass, 6 percent of all aluminum, and 2 percent of all steel purchased in this country.

Beverage container litter amounted to between 54 and 70 percent of the litter in Oregon prior to 1972. On a national basis cans and bottles consist of between 60 and 80 percent by volume of total litter and 20 and 40 percent by piece count. While the antilittering attitude that the industry is trying to instill through programs such as "Keep America Beautiful" is commendable and should be encouraged, that alone is not enough.

Solid waste has quickly become a premier environmental issue. It is a problem we are now just beginning to understand and cope with. Passage of this legislation would signal a willingness on the part of this body to make a direct commitment to reducing solid waste. The National League of Cities and the U.S. Conference of Mayors have endorsed the need for solid waste reduction. They made the following prediction:

Unless we reduce the total volume of solid waste generated nationally, local governments will continue to be overburdened with the flow and financing of solid waste.

On October 26, 1976, the Oregon Journal published the results of a litter survey which they conducted. Ten 1-mile stretches of road with comparable traffic volume in Oregon and Washington were compared. It was determined that Washington roads have 7.5 times more litter than Oregon roads, probably due to Oregon's deposit law. I ask unanimous consent that the complete survey be printed in the RECORD.

There being no objection, the survey was ordered to be printed in the RECORD, as follows:

OREGON BOTTLE BILL CUTS LITTER ACCORDING TO JOURNAL SURVEY

(By Dean Smith)

Washington highways have 7.5 times more bottle and can litter than comparable roads in Oregon, the Oregon Journal has discovered in a special survey on the eve of bottle bill balloting in four states.

Comparing 10 one-mile road sections of comparable use and traffic volume, the Journal found an average of 294 containers per mile in Washington against 39 in Oregon.

Both states have claimed that their anti-litter programs—which in Washington includes a Model Litter Control Act that emphasizes public education and in Oregon the bottle bill—have substantially reduced litter.

Statistics generated in the two states are being used in emotional campaigns in Maine, Michigan, Massachusetts and Colorado where voters will consider ballot measures Nov. 2 patterned after the Oregon law, now in its 5th year.

The Journal tally, which considered only bottle and can litter, showed that few 5-cent returnable beer or soft drink cans were tossed along the 10 miles of Oregon roads inventoried.

Of the 209 cans found in the state, only 11 (or 5.3 percent) were refundable. The other cans found apparently were purchased outside of Oregon, or were bought before the bottle bill took effect in October, 1972.

The survey, compiled with the help of volunteer students from Tigard High School and Portland State University, could not arrive at a similar comparison for discarded bottles.

It did show that a high number of all-aluminum cans, which are newer to the marketplace than other types of cans, were found in Washington.

Of the 1,968 cans turned up in Washington, 69.7 percent were non-deposit aluminum. In Oregon, 26.2 percent of the 209 cans retrieved were aluminum.

Survey tallies also showed that wine bottles—under consideration for inclusion under the bottle bill—constituted 4.8 percent of Oregon's discards and only 1 percent of those in Washington. Whisky bottles represented 2.2 percent of Oregon's total and less than one percent of the Washington litter.

Bottle bill proponent Don Waggoner, ex-president of the Oregon Environmental Council, said the newspaper's findings confirmed his long-held suspicions.

"It confirms what we've been seeing in Oregon and Washington," Waggoner said, "which is that the bottle bill is in fact working and significantly reducing can and bottle litter."

Not convinced of that conclusion is Portland attorney George Wagner, who represents several can companies and the Oregon Beverage Industry Task Force.

Wagner, noting that litter pickups had occurred on the Oregon survey sites more recently than in Washington, said that Washington has a "superior antilitter program" which is working well.

"Since Oregon cleans up after litterers much more frequently than Washington," Wagner said, "the Journal litter survey found more total litter in Washington than in Oregon. This is a measure of cleanliness, not littering."

Washington Gov. Dan Evans says his state has reduced its total litter by 66 percent since 1971, based on estimates of littering before the litter act took effect.

Former Oregon Gov. Tom McCall, meanwhile, has been claiming in the East that Oregon's litter was reduced by 47 percent after the bottle bill.

The Journal study was not able to determine to what extent the differing anti-litter programs have curbed the rate at which litter is dropped along roadways in the two states.

Officials at Washington's Department of Highways and Department of Ecology, which both conduct litter pickup programs, say they do not keep accurate records on exact highway locations cleaned.

In only one case—Oregon's Highway 224 and Washington's Highway 6—was litter collected on nearly the same date.

On the Oregon route, 97 beer and soft drink containers were found and on the Washington road a total of 144.

Illustrated by the survey is the fact that Oregon emphasized roadside cleanup more than Washington, in spite of the fact that more tax dollars are spent on litter programs in Washington.

The Oregon Highway Division spent $633,000 on litter removal during fiscal year 1975–76, while its Washington counterpart spent $480,162 during the same period.

In addition, Washington spent $724,438 for funding education, advertising and litter collection programs during the fiscal year, according to Mike Aarhaus, assistant program director for the litter act. That money comes from a small tax assessed on litter producing industries, he said.

Linda Bradford, a DOE official, said much of the litter collection funded by the act this summer was performed in state parks and other non-highway areas.

Although the bottle bill has strong public support in Oregon, it has fared poorly thus far elsewhere, with only Vermont passing a similar law.

Industry opponents reportedly will spend $300,000 in Maine, at least $750,000 in Michigan and as much as $1.3 million in Massachusetts to defeat the ballot measures.

Proponents have raised only a fraction of that to boost the refund laws, sources in those states report.

The measure is on the ballot as an initiative in Michigan and a referendum in the other states.

In all but Colorado it would ban pull-top cans and would institute a minimum 5-cent per container refund in all four states. (Oregon requires only a 2-cent refund on certified containers able to be used by more than one manufacturer.)

For the Journal survey, volunteers went to pre-designated survey miles and picked up only the "observable" litter seen while walking along the highway shoulder.

The sites were chosen based on their aver-

age daily traffic load, similarity in the type of road (2-lane versus 4-lane, for example) and the nature of travel it generated.

All carbonated soft drink and malt beverage containers were collected—along with wine and whisky bottles—and were returned for tabulation.

In the case of broken glass containers, only the neck portions were retrieved to avoid counting a single container more than once. Bottle caps, pull-tab tops and other beverage-related litter were not collected.

In Oregon, the data showed 165 beer caps, 44 soft drink cans, 159 beer bottles, 17 soft drink bottles, 20 wine bottles and 9 whisky bottles.

In Washington, 1,273 beer cans, 695 soft drink cans, 806 beer bottles, 161 soft drink bottles, 31 wine bottles and 22 whisky bottles were recovered.

Note: The Washington Highway Department said crews worked portions of these highways at the approximate time indicated, but kept no records of the exact mileposts actually cleaned up by foot patrols.

Mr. HATFIELD. Mr. President, the industry has maintained that a litter tax similar to that in Washington should be used instead of container deposit legislation. One State, Connecticut, hoped to get the best from both laws by passing a bottle bill and a litter tax in 1978. This past month the legislature decided that the bottle bill alone accomplished the environmental goals they had set out to achieve. I ask unanimous consent that an article from Environmental Action be included in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

RETURNABLES REVIEW

(By Sandie Nelson)

Tossing the litter tax. Supporters of beverage container deposit laws got a big boost in Connecticut last month when the state legislature repealed industry's favorite foil for deposit legislation, the litter tax.

The defeat of the litter tax, which was originally passed in Connecticut along with deposit legislation in spring 1978, shows the container law is the preferred way to deal with the litter and waste of resources created by the throwaway ethic. Unlike the deposit law, which attacks the problem at its source, the litter tax merely provides funds to pick up the litter after it is discarded.

And container law advocates aren't the only ones saying so. Connecticut Gov. William O'Neill gave the state's mandatory deposit law a lot of good publicity in his State of the State Address given before the legislature vote. Making it the first specific issue he addressed, O'Neill referred to the container law as a touchstone of state conservation efforts. "Experience has shown the 'bottle law' is an effective tool to assure the protection of our natural resources," he stated.

On Feb. 4, both houses of the Connecticut legislature unanimously responded to the governor's request for repeal of the litter tax. Connecticut was the only state with both a litter tax and a container deposit law on the books, so it's an unusual but powerful demonstration of deposit legislation's appeal. In several other states, too, the industry's pseudo litter tax laws are no longer in effect, including Kentucky (1980), Colorado (1979) and Arkansas (1977). . . .

More deposits, more returns. Going one better, Connecticut is showing even more confidence in the deposit law. In late January the state legislature began hearings on making non-carbonated beverage containers under 16 ounces returnable too. (Currently, only beer and carbonated beverage containers are covered.) The measure would include such items as containers for lemonade and iced tea but would exclude those for fruit and vegetable juices.

Another proposal considered at the hearings would authorize additional redemption centers throughout the state at which operators would receive 3 cent handling fee for their efforts to serve consumers and retailers. A third issue to be raised in the hearings is prohibiting distributors from refusing to accept or pay a refund for cans crushed or compacted by dealers. Container law supporters are hoping that these legislative efforts in Connecticut will be imitated by other states. . . .

Uncle Sam takes stock of bottles and cans. The General Accounting Office, a research arm of Congress, recently released a report that takes a very positive view of state successes with deposit laws, flatteringly titled, "States' Experience with Beverage Container Deposit Laws Shows Positive Benefits." The report is significant in that it provides empirical data for advocates who in past years have had to rely on projections from computer models.

The GAO report, PAD-81-08, is available free of charge. Up to five copies may be ordered through U.S. General Accounting Office, Document Handling and Information Services Facility, P.O. Box 6015, Gaithersburg, Md. 20760; (301) 275-6241. Those who wish to order reports in larger quantities should request copies through their U.S. senators and representatives or state agencies or legislators. Ask them not only to get the copies for you as a constituent but to obtain one for themselves—and read it.

Another excellent source, the "Final Report of the Special Joint Committee to Study the Impact of the Beverage Container Deposit Law," assesses the impact of Michigan's deposit law by thoroughly analyzing the implementation of the system, defining problems which occurred and possible solutions. It will be available by mid-February through Sen. Stephen Monsma, State Capitol, Lansing, Mich. 48909; (517) 373-1801.

Reports like these will come in handy especially when the Congress debates the container law later this year (see story, p. 23)

Mr. HATFIELD. Mr. President, now let us consider the impact of throwaways on the individual shopper. The use of returnables adds to the expense of the beverage being purchased. The average price of a beverage in a returnable container is about 2 cents less than one purchased in a one-way bottle and about 5 cents less than in a can. When you buy a no-deposit, no-return bottle or can and discard it after use, you are paying for the total cost of packaging that beverage. When you purchase your beer or soft drink in a returnable container, however, you are actually borrowing the package and sharing its cost with 15 or as many as 20 other consumers, as is the case in Oregon.

Lest we be accused of trying to regulate the marketplace by mandating the use of returnables, let me point out to my colleagues that the industry, through advertising and production policy, has convinced the consumer of the "convenience" of nonreturnables. For this reason, you are hard pressed to find beer and soft drinks sold in reusable containers in most areas of the country. In most stores today you have no choice but to purchase your favorite beverage in a nonreturnable container.

According to Mr. Joseph Griesedieck, the vice chairman of Falstaff Brewing Corp.:

Returnable bottles are the most economical for the consumers and the brewer.

Mr. J. Lucien Smith, the president of Coca-Cola, made the following statement before the Senate Judiciary Committee:

Coke sold in food stores in non-returnable package is priced, on the average, 30 to 40 percent higher than Coca-Cola in returnable bottles. The difference lies essentially in the different costs of packaging. The cost of returnables is spread over many uses; the cost of the non-returnable package is absorbed in one use.

In a recent study done by Pepsi-Cola it was discovered that the consumer paid 97 percent more per ounce for Pepsi in 12-ounce cans than for the same product in 16-ounce returnable bottles. I ask unanimous consent to have a portion of the 1978 Pepsi-Cola report printed in the RECORD.

The consumer paid an average of 97% more per ounce in 1977 for canned Pepsi-Cola than he did for Pepsi in the 16-ounce returnable bottle at the featured newspaper advertised price.[12] The exact cost per ounce for Pepsi-Cola in the disposable can was $0.0156 at the featured newspaper advertised price; [13] and in the returnable 16-ounce bottle, just $0.0079 at the featured newspaper advertised price.[14]

In vast sections of the United States, the consumer has the choice to buy the package he prefers. In effect, he chooses to pay more

[12] Ibid.
[13] Ibid.
[14] Ibid.

for convenience. However, in a number of major markets, some labels are virtually unavailable in returnable packages.[15] Why?

Majers reports [16] on Pepsi advertising activity and per ounce cost in the eastern sector, namely New York-Newark, Philadelphia and Boston—markets exclusively controlled by PepsiCo bottling subsidiaries—reveal NO activity in the economical 16-ounce returnable Pepsi bottle. Instead, the markets are dominated by the higher priced can and nonreturnable packages.[17]

TOTAL MARKET AD ACTIVITY BY PACKAGE SIZE—ALL BRANDS—12 MO. ENDING NOVEMBER 1977

	16 oz. ret.	16 oz. N.R.	32 oz. ret.	32 oz. N.R.	64 oz. ret.	64 oz. N.R.	12 oz. cans
Boston	0	0	9	43	1	18	131
New York/ Newark	0	30	0	50	1	391	826
Philadelphia	0	2	0	0	3	26	85

In these markets there were a total of 291 feature price newspaper ads for Pepsi-Cola and Coca-Cola which is only 2.38 percent of the total Pepsi-Cola and Coca-Cola ads shown in the Majers 106 market survey. These same markets represent 18.5 percent of the ACV (all commodity volume) in the Majers 106 market survey area, a sizable difference. There were only three feature price newspaper ads for Pepsi-Cola and Coca-Cola in returnable packages, only 00.0339251 percent of all Pepsi-Cola and Coca-Cola returnable package ads in Majers 106 market survey. The conclusion must be drawn that the marketing activities of a few major syrup companies can dictate the packaging mix of the entire soft drink industry.

The American consumer would be forced by economic factors beyond his control to pay, in many cases, about twice the price he presently enjoys the opportunity to pay for leading brands of soft drinks in returnable packages.

PEPSI-COLA AND COCA-COLA, FEATURE PRICE AD ACTIVITY 12 MO ENDING NOVEMBER 1977

	Boston, New York/Newark, Philadelphia		Majers 106 United States metro market survey	
	Number of ads	Percent of total	Number of ads	Percent of total
Returnable	3	1	8,843	72.4
Nonreturnable	128	44	1,288	10.5
Cans	160	55	2,089	17.1
Total	291		12,220	

A comparison of feature price package advertising of both Pepsi-Cola and Coca-Cola in the New York-Newark, Philadelphia and Boston markets shows total returnable bottle advertising almost non-existent (1 percent) while cans dominate (55 percent). Majers 106 market study shows almost the reverse—returnables dominate (72.4 percent) featured price newspaper advertising on a national basis. A further look at the combined cost per ounce of Pepsi-Cola and Coca-Cola in this eastern sector reveals a cost of $0.012! per ounce in non-returnable packages or 52.7 percent more than the cost per ounce in the 16 ounce returnable bottle on a national basis. In cans the cost per ounce is $0.0158, or 100.1 percent more, in this same area dominated by Pepsi-Cola company owned bottling subsidiaries.

[15] Ibid.

[16] Op. cit., Majers.

[17] Ibid. Soft Drinks, Number of Ads (per account)/Price Per Ounce Study. Pepsi-Cola: shows no 16-ounce returnable bottles in New York-Newark, Philadelphia or Boston; shows 12-ounce cans as 63/.0164 in New York-Newark, 8/.0138 in Philadelphia, and 1/.0151 in Boston.

As further evidence, let's look at the *total* returnable package feature price advertising in newspapers in the New York-Newark, Philadelphia and Boston areas. The total number of soft drink ads for the year ending November, 1977 was 1616 while the number of ads devoted to returnable packages was only 14—less than 1% of the total.

Mr. HATFIELD. Mr. President, the General Accounting Office study, completed in December of 1977, attempts to assess the direct effects of a national beverage container deposit on American industry and the consumer. In an effort to examine the range of possibilities in the effect the mandatory deposit will have, the GAO assessed two extremes of container mixes. One end of the scale was assumed to be the present mix of 52 percent bottles and 48 percent cans and the other was assumed to be the expected shift by manufacturers to a mix of 80 percent bottles and 20 percent cans. The final result might be anywhere between these two extremes.

With these as parameters, the GAO reached conclusions which should give us all pause to consider the opportunity we have to live in a more conservative manner without sacrificing convenience.

The GAO estimates that even during a 3-year changeover period to returnable containers, cost savings would more than offset the costs of handling returnables, plus the cost of changing filling equipment from one-way bottles to refillables. After the 3-year changeover, GAO estimates that industry as a whole would have between $1.3 billion and $1.9 billion the following year. The savings would accrue to the bottlers. Increased handling costs to distributors and stores would have to be offset by them.

The effects on the environment would be beneficial. U.S. iron ore requirements could be reduced by 2 to 3 million tons. Bauxite use could be reduced by 1 to 1.4 million tons. Energy use could be reduced by 116 trillion to 156 trillion BTU's. The effect on the consumer would be minimal. The consumer will still have the opportunity to discard, but that opportunity will be more expensive. However, addressing that issue, the report notes that the return rate for refillable containers has never dipped below 90 percent from 1947 until 1975, nationally. Also, it publishes the rate for the State of Oregon since the passage of the Oregon bottle bill. Oregonians returned over 92 percent of their bottles and cans in 1976.

The alternative to this situation is probably one where the use of nonreturnable containers increases. The GAO report cites one prediction that the packaged beer market would increase its use of nonreturnable containers to 97 percent of total output, and the soft drink manufacturers would increase use of nonreturnables to 63 percent of the total by 1985, if the Federal Government does not intervene. As part of an effort to prevent such a situation from developing. I ask unanimous consent that these portions of the General Accounting Office study be printed in the RECORD.

There being no obection, the excerpts were ordered to be printed in the RECORD, as follows:

[Report to the Congress by the Comptroller General of the United States]

POTENTIAL EFFECTS OF A NATIONAL MANDATORY DEPOSIT ON BEVERAGE CONTAINERS

CHAPTER 6.—CONCLUSIONS AND RECOMMENDATIONS

CONCLUSIONS

A mandatory deposit system that imposes a deposit on all beer and soft drink containers would convert the present beverage system from less than 30-percent refillable containers to one with 100-percent returnable and/or refillable containers. Several conclusions can be drawn from our analysis of what this conversion would involve.

First, we estimated that beverage container litter would be reduced about 80 percent under this system. This translates into a possible 7 to 37 percent reduction in total litter. The solid waste reduction would be about 4 percent of the estimated 1985 post-consumer refuse, or about 8 million tons. The estimated reductions in litter and solid waste under the assumed mandatory deposit depend primarily on the change from a combined returnable and one-way container system to a completely returnable system.

Second, the consumer who did not return the container and therefore did not receive a refund of the deposit would pay more to have the privilege of throwing the container into the waste stream. Because a mandatory deposit system places a deposit on all containers, the amount of deposit not reclaimed by consumers would increase.

Third, certain business costs would increase due to handling a greater number of empty containers from the retail store to point of refilling or recycling. The eventual container mix and return rates would make some difference in how much these costs increased, but the capital, equipment, space, and labor costs to handle the returned containers would definitely rise under a mandatory deposit system because of the 100-percent coverage of a deposit law. If there were no substitution of refillable containers for one-way containers under a mandatory deposit law, then the costs of supplying beverages would go up by the amount of the costs brought about by handling previously nonreturnable containers. Even though we view the container mix which would evolve after implementation of a mandatory deposit law as uncertain, we did assume that, as a minimum, refillable bottles would replace one-way bottles (Mix I). This change would create container cost savings which would help offset the rise in business costs noted above.

We analyzed the cost changes for the beverage industry for both the changeover period, assumed to be 3 years after implementation, and for a single year after changeover. Analysis of a larger change in container mix, with refillable bottles also substituting for many one-way metal cans (Mix II), had similar results. The analysis of the costs for the single year after the changeover (1981) showed that Mix I could be about $1.3 billion less costly than continuing the present way of packaging beverages, and that Mix II could be about $1.9 billion less.

The overall conclusion is that legislating a mandatory deposit on all soft drink and beer containers would reduce solid waste and litter, increase the level of retained deposits, and increase the business costs of handling returned containers.

Other changes, including raw material use, energy use, business costs for filing containers, and container costs, depend on the container mix. The container mix, which will be determined by the beverage companies, may not change much after implementation of a mandatory deposit.

AGENCY COMMENTS

The draft report was sent to four Federal agencies for review and comment. This reflects the many areas which would be affected if a mandatory deposit law were enacted and implemented. Their comments are reproduced in appendix IV.

The Federal Energy Administration (now part of the Department of Energy) suggested that the potential for lower costs in the beverage system should mean, given competitive markets, that consumer prices would be lower. They suggest that this should be highlighted in our final report. We note in chapter 4 that there seems to be potential for lower prices, but do not believe that there exists enough evidence of a direct link between lower industry costs and lower consumer prices to predict that a mandatory deposit system will result in lower prices.

The Department of Commerce is concerned that we did not examine all the options which could achieve all or part of the purported benefits of mandatory deposit legislation, but rather concentrated on the effects of an option which we felt would be before the Congress for decision in the near future. The specific comments of the Commerce Department about the draft report are reproduced in appendix IV.

The Environment Protection Agency and the President's Council on Environmental Quality agreed with the presentation of material in our draft report.

NON-FEDERAL COMMENTS

In addition to the Federal agencies which commented on the draft report, several industry groups, individuals, and environmental groups were asked to comment on and review the draft.

The industry groups, which included the U.S. Brewer's Association and the National Soft Drink Association took issue with some aspects of the draft report. We have attempted to answer these criticisms in appendix V. We believe that each assumption which had to be made to analyze a potential Federal action is reasonable and that the analysis which flows from the assumptions is representative of the effects of a national mandatory deposit system as described in the report.

The industries which would bear the brunt of the economic adjustments agree that legislative action should continue to explore ways to combat the problems of increasing solid waste burdens and depletion of raw materials. However, the policy trade-offs for such actions are not well documented and for that reason possible policy alternatives should not be disregarded just because there are other ways of achieving some of the same effects.

The environmental groups and individuals who responded to the draft report were in general agreement with the presentation.

RECOMMENDATIONS

The report was intended to compile in one study the major effects which would result from such a mandatory deposit system and to analyze the degree to which these effects would occur. The analysis we have made indicates that there are positive and negative aspects to the effects of a mandatory deposit system. The ultimate question of the appropriateness of a Federal mandatory deposit law must be answered by the Congress. We do have several recommendations to the Congress should it consider enacting such legislation.

Only by treating all containers equally can the system provide positive results because it is necessary to have as many containers as possible, whatever the mix, returned for reuse. Most legislative proposals call for such treatment, but we emphasize it since any beverage container not included would tend to negate the environmental benefits.

Many allocation formulas are possible, and the executive agency designated as the implementing agency should be responsible for its design. Prime considerations should be administrative ease of implementation and equity of the allocation.

A problem in assessing the effects of the various States' mandatory deposit systems has been the lack of good data on the period before and after implementation of the system. Such analyses will keep the responsible agency informed about the effectiveness of the program and the need for any changes. Measurements should be taken of litter and solid waste, beverage industry changeover costs, costs of goods sold, can recycling, and employment changes.

Returned cans cannot be refilled; they are valuable only as scrap. The price the bottlers and breweries would receive for the scrapped cans is less than the deposit which they could retain if the cans were not picked up from the retailer. This means that there will be no economic incentive to pick up the cans. In addition, the legislation should provide some mechanism to encourage the recycling of these cans once they are returned. Without recycling, some of the environment benefits of a mandatory deposit system will not be realized.

Mr. HATFIELD. Mr. President, as I mentioned in my opening remarks, the GAO has recently completed an updated study of beverage container deposit laws for four States—Maine, Michigan, Oregon, and Vermont. Their findings show that beverage container deposit laws do work, but they also point to the need for a uniform national law if our society is to reach the maximum potential for savings that such a law provides.

I ask unanimous consent to place portions of the report in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

INTRODUCTION

Senate bill 50, introduced in the 96th Congress and proposing a national beverage container deposit law, would set the national goals of reducing beverage container litter and solid waste, the amount of materials used to package beverages, and energy consumption. The proposed legislation states that a national mandatory deposit law would result in a high level of reuse and recycling of empty beverage containers, the key to achieving its goals. In response to requests from Senator Mark O. Hatfield, Senate Committee on Appropriations, and Senator Bob Packwood, Senate Committee on Commerce, Science, and Transportation, we have revised our 1977 study of the potential effects of a national beverage container deposit law.[1]

In our 1977 report, we assumed that there would indeed be a high level of reuse and recycling of empty beverage containers under a national law. We found that beverage container litter would be reduced approximately 80 percent by piece count, total solid waste by consumers would be reduced 3 to 4 percent by weight, use of raw materials such as iron ore and bauxite would be reduced by 2 to 3 percent of total U.S. demands, and energy use in the beverage industry would be reduced 30 to 40 percent, about 0.2 to 1 percent of total U.S. energy consumption. In 1980, we believe that these changes are still realistic estimates of the potential benefits of a national beverage container deposit law.

In the 1977 report, we also estimated that business costs would increase in some areas but revenue attributable to the law would increase. When summed for all elements in the beverage industry, estimated cost decreases and revenue increases would represent an increase in net revenue, which could be translated into price decreases if the revenue were forgone. In the present review, we have found that retail costs are probably higher than we estimated in 1977 and that, if there were net revenue increases, they would probably be forgone only by means of competitive pressures.

Three levels of activity in the beer industry and two in soft drinks combine to make, move, and sell packaged beverages in the United States today. For beer, the three are set by the 80 breweries, the 4,900 beer wholesalers, and the estimated 200,000 retail sales points.[2] All would experience some increase in costs under a national beverage container deposit law. All or some of the cost increases could be offset at the brewery and wholesaler level. Revenue would increase because of the change in retained deposits, a switch to refillable containers by the brewery could reduce container purchase costs, and sale of returned nonrefillable containers for recycling would increase revenue.

In the soft drink industry, bottling and wholesaling operations are usually combined within the same firm, of which there are about 2,000. They would experience both increased costs and increased revenue under a national beverage container deposit law. The retailers, who sell most of the soft drinks in the United States and also most of the packaged beer, would face only increased costs. Some states—Maine and Vermont, for example—have required beverage firms to pay the stores 20 percent of the deposit for handling empty containers. Under these conditions, retailers would receive 1 cent per container on a 5 cent deposit to offset their increased costs. The same objective could be reached by raising retail prices 1 cent.

MAJOR AND MINOR ASSUMPTIONS

No one knows what the beverage system would look like under a national mandatory deposit law, largely because there has not been 100 percent deposit coverage for either packaged soft drinks since 1947 or beer since the 1930s. All studies about the effects on a national system, therefore, must begin with both minor and major assumptions about the marketing behavior of all the elements in the beverage industry. We assume, for example, that the beverage producers would react to a law by adjusting their packaging mix in addition to preparing to handle the empty deposit containers. The wholesalers and retailers would also make adjustments to handle the higher number of empty containers passing through their firms. The consumers would look at the products being offered and buy more or less of a beverage because of real and perceived differences in the product caused by the deposit on all containers, whether refillable or nonrefillable.

TABLE 1.—SOME CHARACTERISTICS OF 6 STATES WITH BEVERAGE CONTAINER DEPOSIT LAWS

State and implementation date	Population in millions	Population in SMSA (percent)[1]	Weekly industrial wage
Connecticut: January 1980	3.115	91.6	$290.37
Iowa: July 1979	2.902	37.1	340.35
Maine: January 1978	1.079	30.5	235.31
Michigan: December 1978	9.207	81.1	367.47
Oregon: October 1972	2.527	57.5	303.68
Vermont: September 1973	.493	None	242.76

[1] Standard metropolitan statistical area.

[1] "Potential Effects of a National Mandatory Deposit on Beverage Containers," U.S. General Accounting Office, PAD-78-19, December 7, 1977.

[2] This estimate includes grocery stores, liquor stores, bars selling packaged beer for off-premises consumption, and drug stores.

In the 1977 study, we used existing evidence and expert opinion to form the necessary assumptions about market reaction to a national law. The primary experience at that time had been in Oregon and Vermont, both of which had implemented statewide laws. In this 1980 revision, we have looked at the continued experience in these two States and also at Maine and Michigan, which have adopted beverage container deposit laws since 1977. Connecticut and Iowa have adopted similar laws, but they had less than 1 year of experience with them when we were carrying out our State reviews.

Considered together, the six States contain about 9 percent of the United States population; of this, 6 is in the four States we reviewed in detail—Maine, Michigan, Oregon, and Vermont. The four States are varied in location, urbanization, and industrialization: they range from small Northeastern rural to large Midwestern industrial. Their combined experience helps focus both our major and our minor assumptions about the effects of a national law. Table 1 presents some of the basic information about the States. The population estimates are at midyear 1979; wages are as of April 1980.

OBJECTIVES, SCOPE, AND METHODOLOGY

In this 1980 review, we follow the lead of our 1977 report. As in that report, we present the historical context of individual State beverage container deposit laws, the better to develop our assumptions about a nationwide law. In revising the tables, we have used the 1977 material as a base for the data from subsequent years. (We still report business costs in 1974 dollars.) This report will be most useful, therefore, if it is read in the complete context of the 1977 report. That study is the framework for our 1980 analysis. Our intent here is not to repeat the background but to show how on-going events have been and may be carried forward.

The present outline differs only slightly from that of 1977. To help show how our assumptions and conclusions derive from actual States' experience, we have moved our descriptions of specific States forward from the appendixes, making them full chapters. Chapter 2 gives our historical description and analysis of Maine and is followed, in chapters 3 and 4, by a similar treatment of Michigan and an explanation of our statistical efforts to measure the changes in beer consumption in 1979 in Michigan in relation to its beverage container deposit law. We show the technical development of the statistical models in appendix II. For our modeling effort for Michigan, we used data on possible explanatory variables for beer consumption. This attempt to separate the effect of legislation from other effects is one of the first in this area.

In chapters 5, 6, and 7, we proceed to develop our new assumptions based on the States' experiences since 1977 and to present our revised estimates of the effect of a law on the beverage system nationwide. Chapter 5 shows our forecasts of sales, container mix, and return rate; we have built primarily on the data in chapter 2 of the 1977 report. Chapter 6 shows our forecasts of the use of raw materials, the production of waste, and the consumption of energy; we have built primarily on the data in chapter 3 of the 1977 report. Chapter 7 shows our forecasts of beverage industry costs; we have built primarily on the data in chapter 4 of the 1977 report.

We gathered our information from various government and private sources within the States, including State liquor control commissions, environmental agencies, transportation departments, and brewers and soft drink manufacturers associations. We studied a variety of published reports as well as estimates made by the U.S. Brewers Association and the National Soft Drink Association. We conducted interviews with and also collected and analyzed statistics and documents from these sources as well as the brewers, soft drink manufacturers, bottlers, distributors, and retailers. We studied material provided to us by a wide range of groups and people, from economists in the universities to local citizens' campaigners for environmental protection. (Complying with Senator Hatfield's request, we have not submitted the report to agencies in the executive branch.) In chapter 8, we present a summary of our assumptions, drawn from all these sources and our own estimates revised from the 1977 report.

CONCLUSIONS

After our review of information available primarily from the four States we examined in detail, most of our assumptions in the 1977 report remain basically the same. Table 21 shows some adjustments between the 1977 and the 1980 report for sales, container mix, and return rate. They do not affect the benefits of a national beverage container deposit law, which we still believe would be achieved.

We have changed the sales level assumption, to recognize that beverage sales in Maine, Michigan, Oregon, and Vermont went down during the first year of their laws. We further assume that sales will regain their growth pattern, because this too has been the experience in the three States that have more than 1 year of experience with the law. We are not able to say that the law caused the entire drop in sales in any of the States, because in each there was at least one other contributing factor. We believe that the first year's decrease in sales, whether from a one-time increase in price or an increase in inconvenience or the shock of a new situation, is a transitory effect. After about 1 year, the other influences on beverage sales would resume their effects. The probable decrease in beverage sales coincides with the period of greatest financial outlay, so that the financial performance of some firms in the soft drink and beer industries might suffer during the first year of a national law. We believe, however, that they would adjust to the new situation thereafter and regain their positions.

In this 1980 report, we have focused the container mix on a single value assumption. In the 1977 report, we assumed a range, called Mix I and Mix II. Our revised estimates are close to the Mix I assumption as far as the refillable share of the container market goes, which means that the adjustment by industry to a national law would not be as severe as would be expected under a radical adjustment, such as was envisioned with Mix II. Our revised estimate also recognizes that one-way glass bottles continue to be used for beer in the States with laws and that plastic is making major inroads in soft drink bottling.

Increasing the return rate assumption from 80 percent for cans and 90 percent for refillable bottles to a minimum of 90 percent for all containers would mean a slightly larger reduction in beverage container litter and solid waste than estimated in the 1977 report. This slight improvement in return rates would also affect energy and raw material use.

SALES, CONTAINER MIX, AND RETURN RATE ASSUMPTIONS FOR 1981 IN 1977 AND 1980 COMPARED

[In percent]

	Sales		Container mix		Return rate	
	1977	1980	1977	1980	1977	1980
All containers	(1)	(2)				
Cans			20–50	25	80	90
1-way bottles			(3)	15	(3)	90
Refillable bottles			80–48	50	90	90
Plastic			(3)	10	(3)	90

[1] No change.
[2] Reduced in year 1; no change in trend thereafter.
[3] Not applicable.

The specific net revenue changes to industry under a national law would be within the ranges estimated in the 1977 report (calculated in 1974 dollars) except for retail costs. The experience in large Michigan supermarkets has caused us to increase our estimate of the number of employees required to handle empty containers. Even with the changes in our estimates, however, there seems to be a net increase in revenue when all the net changes for all the firms are summed together. This does not mean that prices would go down or would not go up. We made this point in the 1977 report and emphasize it again here. Of the three levels in the beverage industry that sell filled goods, the retail level has nothing it can offset its increased costs with, but manufacturing and distributing will have both increased costs and increased revenues. Even if net revenue increases at one of these levels, there may be no compelling reason to lower prices.

Several changes would have to take place on the day a national law was scheduled to go into effect. Firms would have to hire more workers, to handle the approximately fourfold increase in returned containers. They would have to buy more transportation equipment, to move the returned containers. They would have to find access to recycling equipment, if the container mix did not shift greatly to refillable containers.

Changes in container mix would be made at the discretion of the beverage firms. We have estimated that the soft drink industry would shift to about 65 percent refillable bottles, more than roughly 38 percent now. Our best guess is that refillables would account for 33 percent of beer containers, up from 11 percent now.

We are aware that Senate bill 50 in the 96th Congress calls for a 3-year interval between enactment and implementation. Even so, we have not changed our assumption of a 1-year interval, because there seems to be no need for more than a year between enactment and implementation. In the 1977 report, we assumed that industry and consumers would need some time to adjust to the law after implementation. Container mix under a national beverage container deposit law would not experience a radical adjustment. Originally, we selected a period of 3 years from implementation date before the predicted package mix would be in place and equilibrium would be relatively reestablished. We believe now that 1 year after implementation is long enough to recognize the adjustment period.

Mr. HATFIELD. Mr. President, the bottling industry and retail groups have long attacked beverage container deposit laws as being costly to implement and maintain. Given that this may be true, I would like to point out that my bill would pay retailers a handling fee of 2 cents per container. In the past bottlers and distributors have been able to overcome their costs of compliance through revenues generated from deposits received from unreturned containers. However, through no fault of his own, it is the retailer who has incurred cost that he cannot recover.

In a recent study prepared for the Food Marketing Institute by Case & Co. of Stamford, Conn., it was found that the cost to the retailer for handling returnable beverage containers was just over 2 cents per container. However, the report also pointed out that supermarkets in States that have had a long experience with beverage container deposit laws show a more efficient, and therefore less costly, ability to deal with the containers.

At this time I would request unanimous

consent to include portions of that report in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COST OF HANDLING RETURNED BEVERAGE CONTAINERS IN SUPERMARKETS—SPECIAL RESEARCH REPORT NO. 27, OCTOBER 1980

(Prepared for the Food Marketing Institute by Case and Company, Stamford, Conn.)

MANAGEMENT OVERVIEW

This report contains the full text of a study conducted by Case and Company, examining the cost of redeeming and sorting beverage containers in supermarkets. As part of this report, worksheets which enable the calculation of handling costs for specific local situations are provided.

The results of a survey of 425 stores in 6 states with container legislation and a series of time studies carried out in supermarkets with a high volume of returned containers are presented. Four basic redemption systems were examined: front-end receiving with all sorting in the back room, front-end receiving with cans and plastic bottles sorted in front and glass sorted in the back room, visual front-end inspection and count with the customer taking the containers to the back, and an integrated redemption station with dedicated personnel.

Only directly attributable costs are included in the estimates. The intangible store disruption factor is discussed but not quantified.

Using the worksheet for one of the redemption methods used by supermarkets (front-end receiving with all sorting in the back room) and drawing on basic information typical for a wide variety of supermarkets, the study finds:

[In cents]

Cost category	1980 Cost per container
Labor	1.814
Space	.362
Additional capital investment	.067
Additional sanitation	.032
Carrying cost of deposit inventory	.029
Breakage, pilferage, miscellaneous	.069
Total cost	2.373

The labor standard is industrial engineering based and therefore likely to be less than the actual experience of many operators. However, these standards do provide a conservative cost estimate for reasonably efficient operators. A handling cost of 2.373 cents per container is equivalent to a cost of 56.95 cents per case of 24 containers.

INTRODUCTION

In 1978, Michigan became the first major industrial state to impose a mandatory deposit on all beer and soft drink containers. This followed earlier mandatory deposit programs in Oregon and Vermont. Other states are continuing to consider similar programs. While the specific details vary from state to state, the basic intent is to encourage the return of beverage containers to retailers (some states do allow non-retailer redemption centers) by imposing a deposit on all beverage containers, which is refunded upon the return of the container.

Three basic arguments have been used to advocate the enactment of these laws:

Mandatory deposits will reduce roadside litter because containers will be returned for the deposit;

Mandatory deposits will encourage a more efficient use of scarce resources because the virgin materials and energy needed to manufacture new containers will not be needed; refillable glass containers can be reused after washing, and the material in plastic and metal can containers can be recycled; and

Mandatory deposits will reduce the cost of beverages because the container cost saving will be passed along to the consumer as a result of normal competitive forces.

These broad, basic arguments have been explored from a variety of perspectives in other studies. However, none of these studies have provided a detailed examination of the impact that mandatory deposits have on supermarkets.

Supermarkets are the final link in the physical flow of food and grocery products from manufacturer to consumers, and they have been designed to handle efficiently this one-way forward flow of product. While the sale of beverages follows this customary product flow, the handling of returned beverage containers imposes the additional steps of receiving, paying for, sorting, storing, and returning of the used containers for re-filling or recycling. With mandatory deposits, the cost of these steps is incurred not only for refillable glass containers, but also for non-refillable glass, cans, and plastic bottles. The supermarket has no offsetting savings in its operations against this cost increase. Further, these additional costs are borne by the supermarket that accepts the returned containers from the customer, even though the beverages may have been purchased from another retailer. In fact, it is not unusual for a supermarket to handle at least 25 percent more returned empty containers than it sells of the filled containers.

Whether or not this function and its costs are significant, the supermarket cannot ignore beer and carbonated soft drinks. Data reported by Chain Store Age Supermarkets (October 1979 and July 1980) show that:

Supermarkets sell $4.3 billion of beer and $3.9 billion of soft drinks; and

On the average, carbonated soft drinks are assigned 195 linear feet of shelf space. Additionally, the merchandising attractiveness of these items brings customers into stores where they may buy other food in addition to the beverages.

To facilitate the informed public discussion of the impact that mandatory deposits have on supermarkets, the Food Marketing Institute retained Case and Company to study the cost of handling returned beverage containers. An important aspect of this effort was the development of standards for the bottle handling function that can be used by supermarket operators to evaluate their own efficiency. The specific study objectives are:

Examine the cost of redeeming and sorting bottles in states that have deposit laws;

Identify the major factors that affect the cost of container handling and develop efficient standards for this function;

Develop worksheets that will enable interested persons to calculate the cost of handling returned beverage containers in supermarkets.

Although the study examines states with deposit laws already in place, the results apply equally to any supermarket operator accepting returned containers. Convenience stores and small specialty food stores were not included in this research. The actual costs of a typical operator are likely to be higher than the industrial engineering standards presented in this report.

There are several different methods which are used for handling returns. The choice of method depends upon the characteristics of the individual supermarket and likewise, so do the costs. By using a worksheet format, the report results can be individualized. Each operator can use these worksheets to apply industry time and cost standards to the operating characteristics of their own methods. In areas considering mandatory deposit programs, the worksheets, together with local wage rates, will provide a specific industrial engineering based handling cost estimate without the need for each operator to complete his own time-motion study. In areas already accepting returns, the worksheets can be used to compare the efficiency of actual container handling systems to industry standards.

COST OF HANDLING RETURNED CONTAINERS

There are three broad perspectives from which to view the handling of the returned containers in supermarkets:

The tangible, measurable dollar costs of handling returns;

The intangible dollar costs of handling returns; and

The "store disruption" factor.

The dollar costs of handling containers include tangible and intangible categories of costs resulting from the following:

Dedicated direct labor;

Non-dedicated intermittent labor;

Space requirements;

Additional equipment required;

Store configurations, modifications, additions, and alterations;

Additional costs of pest extermination;

Interest on deposit investment; and

Losses due to breakage and pilferage.

LABOR

In order to handle returned containers, a supermarket must assign considerable direct labor time to accomplish the following functions:

Accept containers;

Count containers;

Transport containers several times;

Give customers refunds for containers;

Sort containers; and

Clean up store because of breakage, rodents, and various trash receptacles used by customers to carry returned containers.

The labor costs in handling returned containers are considerable and represent about 80% of the cost of handling returns, as shown in Table 1.

TABLE 1.—COMPONENTS OF ACTUAL SUPERMARKET RETURN HANDLING COSTS

[In percent]

Costs	Non-mature	Mature	Average
Total labor	82	78	79
Total space	15	11	13
Additional equipment	1	6	4
Pest control	1	1	1
Breakage/pilferage	1	3	2
Other		1	1
Total	100	100	100

Note: Survey respondents were unable to determine the unit cost of deposit investment from their records.

Source: Survey of 425 stores in 6 states with container return legislation.

In its survey, Case and Company identified the types and job classifications of personnel required to handle returned containers in supermarkets. Table 2 shows that baggers/part-time clerks are used most frequently for these functions. The table also shows that, on average, virtually every level of personnel in the stores, at some time, seems to get involved in handling returns. Substantial variations were observed in these averages. In some chains, manager-level personnel play a major role in handling returns, while in other chains, the manager plays virtually no role.

TABLE 2.—ACTUAL TIME (SECONDS PER CONTAINER) FOR HANDLING RETURNED BEVERAGE CONTAINERS

	Non-mature (seconds)	Mature (seconds)	Average	
			Seconds	Percent
Manager	2.40	0.15	0.75	4.9
Assistant manager	1.65	.30	.75	4.9
Stock clerks	3.60	1.95	2.40	15.7
Cashiers	4.65	1.95	3.45	22.5
Baggers/part-time clerks	11.25	5.70	7.20	47.1
Cleaners/janitors	.60	.15	.30	2.0
Other	.90	.30	.45	2.9
Total	25.05	10.50	15.30	100.0

Note: These are based on a 24-container case.

Source: Survey of 425 stores in 6 States with container return legislation.

The table also distinguishes survey results between "mature" and "non-mature" supermarket chains. The former are defined in this study as having less than one year's experience with mandatory returned containers, while mature chains are located in states where a bottle bill has been in effect for a longer period. Substantially fewer labor hours per case are required to handle returns in mature states. This result is not surprising because experience usually leads to more efficient handling methods and, therefore, lower time and cost per case, indeed, where returns had been redeemed for several years, supermarket executives report changing their systems, over time, to improve efficiency.

Mr. HATFIELD. Mr. President, industry opposition to my bill, and to others like it, is formidable. In Ohio and Washington, business and industry spent over $2½ million to defeat beverage container initiatives backed by citizen groups. In State capitals all across the country, the industry lobbyists spend millions more to defeat bills like this one that would save precious natural resources through the reuse and recycling of beverage containers. Undoubtedly, my colleagues and I will be the target of another well-financed lobbying effort to defeat this bill.

The millions of dollars that have been spent on defeating these bills had instead been spent on implementing them, we would all live in a cleaner world. As an example of the efforts on the part of the industry to defeat these bills and initiatives, I ask unanimous consent to include an article from Audubon magazine that outlines the Ohio and Washington campaigns.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BUYING THE VOTERS' MINDS

(By Robert Cahn)

Those who hope to see beverage-deposit laws established throughout the country wish they could say, "As goes Maine, so goes the nation." Maine had a beverage-deposit law in effect for almost two years. Then opponents tried to get the law repealed last November, and citizens voted 84 to 16 percent to keep their deposit law intact.

But those in business, industry, and labor who oppose beverage-deposit laws say that Maine's election results were a fluke. They insist that the real indicator of the way Americans feel about this controversial subject lies in the election results in Ohio and Washington, where deposit laws were overwhelmingly turned down by voters—72 to 28 percent in Ohio, and 57 to 43 percent in Washington.

Container industry officials now predict that the game is practically over. They boast of defeating every deposit law initiative since 1976, and are convinced that the trend is now set. William Sadd, president of the Glass Packaging Institute, says that "the votes against forced deposits in Ohio and Washington are votes against measures which only further burden our economy while failing to solve the problems of litter and solid waste." He dismisses the Maine vote as insignificant because "the voters did not have a choice for a litter-control law alternative."

Tom McCall, who led the fight for his state's pioneering 1971 bottle bill when he was governor of Oregon, and who has been working in support of similar laws in other states and nationally ever since, alleges that industry "bought the Ohio and Washington elections by flooding the mass media with a mess of lies and distortions of the truth." McCall points out that business and industry poured at least $1.6 million into the Ohio campaign and over $1 million into Washington, outspending their citizen-organization opponents by more than fifteen to one.

In Michigan, where voters in 1976 approved deposit legislation 63 to 37 percent, Governor William Milliken says "The people of Michigan not only have stopped a costly and wasteful trend, they seem to have reversed our plunge into a throwaway society." Commenting on a Michigan highway study which showed can and bottle litter on state highways down nearly 82 percent in the year the deposit law has been in operation, and total litter down 41 percent. Governor Milliken noted that "the Michigan voters approval of the container-deposit law appears to have fostered a spirit of conservation that goes far beyond bottles and cans."

It is too early to assess the impact of these three state elections on the national movement to return to the use of refillable bottles and to encourage recycling of cans as steps toward curbing the litter and wastefulness of a throwaway society. Seven states now have some version of beverage-deposit laws, and seven have adopted industry's preferred alternative, laws to control litter generally without changing the major source of the problem the no-deposit no-return system of bottles and cans. Connecticut this month becomes the first state to try out both types of laws in tandem. Conservationists and consumer groups in twenty-one other states, while dismayed over the defeats in Ohio and Washington, are nevertheless pressing ahead in their legislatures for beverage container-deposit laws or are working on initiative drives. Massachusetts citizens who apparently had won a long fight when the legislature in 1979 passed a deposit law only to see their industry-beholden governor veto it, have vowed to place another bill on his desk in 1980.

The container beer and soft drink industries, notwithstanding their recent victory are continuing the heavily financed lobbying and mass-media campaigns that have so successfully impeded the movement.

Some members of Congress supported by national conservation organizations, work to pass beverage-deposit laws which could save energy and natural resources and clean up litter nationally.

Yet the question remains. Why did the citizens of Maine vote overwhelmingly one way while the citizens of Ohio and Washington veered sharply in the other direction?

Maine, following Vermont's 1973 lead passed an initiative in 1976 to place a minimum five-cent deposit on carbonated beverage and beer containers. The law went into effect in February 1978. A year later, some beverage distributors, with the assistance of small-store owners, obtained 43,000 signatures to place on the ballot an initiative to repeal the deposit law. By September, with their campaign floundering in a state where citizens were well pleased with their new deposit law, the repealers turned to tactics of confusion and deception. They changed their name from "Citizens for Repeal of the Forced Deposit Law," to "Maine Citizens for Litter Control and Recycling," to make it appear that they were the good guys. Their advertising proposed that if you favor total litter control and recycling you should vote "yes" on the bottle-bill question. In support of the campaign, industry raised $162,000 almost entirely from out-of-state interests. The Can Manufacturers Institute in Washington, D.C., put up $30,000. Owens-Illinois glass company of Ohio, $26,000, and Anheuser-Busch brewers of St. Louis, $25,000.

Meanwhile, the real advocates of beverage container-deposit legislation, Maine Citizens for Returnable Containers, were fighting the repeal as best they could with volunteers and a kitty of $22,000 derived from small donations contributed by more than a thousand Maine residents. The citizens' campaign theme played on the outsiders' attempt through money and advertising to influence Maine, and on the fact that the new law was visibly working to clean up the roads, lands, and beaches of the state. They publicized a Maine Department of Conservation study which revealed that container litter decreased by 78 percent after the law went into effect, and all litter decreased by 32 percent. To counter industry strategies, a coalition of citizen groups brought a lawsuit against the repealers, charging them with misleading advertising. The state court agreed that the advertisements were calculated to confuse, but ruled that the industry sponsors were constitutionally protected by the First Amendment. The lawsuit aroused public awareness, however, and alerted voters to the deception. Governor Joseph Brennan, not noted to strong environmental stands, called the repeal advertisements "a disgrace." The governor and the entire congressional delegation came out against repeal of the deposit law.

A young educator, Tom Bertocci, took leave from his doctoral studies to coordinate the campaign of the citizen coalition. Among the groups seeking to defeat the repeal were the Maine Audubon Society, the League of Women Voters, Maine Farm Bureau, the Maine AFL-CIO, the Natural Resource Council of Maine, the Maine Federation of Garden Clubs, and the Sportsman's Alliance of Maine, Maine Audubon donated its new solar building for use as campaign headquarters and furnished printing and telephone facilities. By election day, voters were well aware of the misrepresentation and understood that a "no" vote was needed in order to keep the beverage-deposit law and prevent its repeal. A media blitz by repeal advocates proved counter-productive—they failed to get even as many votes as they had signatures on their repeal petitions!

What about Ohio? Ohioans working for deposit legislation had been encouraged when Michigan successfully passed a beverage container-deposit law in 1976. They figured that if voters in that heavily industrialized state could adopt deposit legislation, so could Ohio. But bottle and can manufacturers and beer-industry officials viewed Ohio as their key test. They reasoned that a resounding win there would drive the last nail in the coffin for deposit legislation in industrial states and would kill the movement for national legislation.

Despite sharing a border, and being the sixth and seventh largest states, Ohio and Michigan were strikingly dissimilar when it came to considering deposit legislation. Michigan's effort had been spearheaded by the long-established, well-organized Michigan United Conservation Clubs (MUCC), which threw into the fray their headquarters staff and facilities and the volunteer efforts of members of the 426 sportsman's and conservation groups that make up MUCC. The Michigan movement had powerful allies including the state's Farm Bureau and League of Women Voters and its popular governor, William G. Milliken, who even lent the citizens' campaign one of his top aides. Michigan also had a record of citizen involvement in fighting and winning environmental and consumer battles.

The Michigan citizen groups had to contend with industry's Committee Against Forced Deposits which had raised $1.3 million (83 percent of it from out of state) to spread its message among the voters. Industry projected a picture of thousands of jobs being lost, predicted that dirty returned bottles and cans would breed vermin and cause health problems, and warned that beverage prices would go sky high. The scare tactics were having their effect—a Detroit News poll showed public support for deposit legislation had dropped from 79 percent to 58 percent—when the well-organized citizens began to fight back. MUCC raised enough money to buy some radio and television time and printed a million brochures setting forth the facts to answer what it claimed were industry's false charges and misleading predictions, and volunteers distributed the brochures door-to-door. Michigan voters adopted the container-deposit law two to one.

In Ohio, however, the various conservation and sportsmen's organizations were not organized to fight the battle. The League of Ohio Sportsmen, with 193 clubs and 28,000 members, at first seemed to welcome the beverage-deposit initiative, giving $5,000 to the Ohio Alliance for Returnables, along with a letter from the league's president, Harry I. Armstrong, wishing luck to the citizens in their efforts. But then Armstrong was named public chairman of a business and industry group organized to defeat the deposit initiative. He also was succeeded as league president by Thomas J. King. The league gave no further support to the initiative and took no official position. A week before the election, however, all league members received from the new president a two-page "Dear Fellow Sportsman" letter. In it King followed industry's campaign line about the bad things that would result from the "forced deposit" law. The letter prepared on league stationery bearing the heading "An Affiliate of the National Wildlife Federation," ended with the statement, "I urge you to go to the polls and vote 'no' on Issue No. 1." Neither the league's board of directors nor its members had been asked to authorize such a position or letter, and the mailing was prepared and paid for by the industry opponents. By coincidence King's letter hit the mails at the same time that the National Wildlife Federation was sending cards to members in Ohio strongly urging a "yes" vote on the initiative.

Another major contrast with the Michigan battle was that industry strategy in Ohio was much more politically adept. Instead of fighting an entirely negative campaign to stop a seemingly popular initiative, the beer bottle and can industries and their allies presented a counterproposal. They named their organization Ohioans for a Practical Litter Law, and persuaded friendly state legislators to introduce and quickly pass a vaguely worded litter control bill in the Ohio House of Representatives (but not in the Senate). The bill was based generally on a law adopted by Washington State in 1971. It proposed raising $15 million a year by taxing manufacturers, distributors, and large retailers on products which contribute to the litter problem. The tax (passed on to consumers, of course) would provide funds which in some unspecified way would be used by the state's Department of Natural Resources to reduce all types of litter. Thus industry's campaign could point out all the bad things it claimed would result from deposit legislation and at the same time advocate a handy alternative, even though the alternative was not on the ballot and might not be voted by the General Assembly.

Industry forces hired the national polling firm, Market Opinion Research (at a cost of $56,000), to help determine which advertising approaches would be most effective and to select the areas and groups in Ohio that should be targeted. No polling results ever were released, although industry now admits that their poll taken before the intensive campaign and media blitz showed 80 percent of the voters favoring deposit legislation. For political consulting and professional campaign direction, industry hired a past chairman of the state Democratic Party, Pete O'Grady, and a past chairman of the state Republican Party, Kent McGough, at a cost of $150,000. Officials of the national Glass Packaging Institute came to Ohio to assist in campaign direction. And teams of executives from Ohio can and bottle manufacturers and organized labor talked to clubs and civic groups around the state and showed a slick slide show entitled "Claims vs. Facts: A Bad Deal for Ohioans."

Industry sent a special meeting of 400,000 letters to senior citizens with an application for an absentee ballot enclosed, explaining how the proposed beverage-deposit law would raise prices and burden them with carrying empty bottles and cans back to the stores. Other mailings went to targeted groups and areas with heavy labor constituencies. And four days before election, Governor James A. Rhodes announced his opposition to the beverage-deposit legislation, which, he alleged, "will cost Ohio consumers a minimum of $200 million a year [and] would also cause a severe depression in Ohio's twenty-three can-manufacturing plants and two glass-bottle plants."

The makeup of the opposition forces is for the most part revealed in the records of the Ohio secretary of state. The initial (October 1979) reporting of $1.3 million contributed to Ohioans for a Practical Litter Law shows the Can Manufacturers Institute in Washington, D.C., leading the list with $240,000 followed by Ohio's major bottle manufacturer Owens-Illinois ($112,600), and other state and out-of-state glass and bottle companies contributing from $10,000 to $45,000. The American Iron and Steel Institute gave $80,000, the American Can Company listed $33,448 of "in-kind" contributions, i.e. salaries and expenses of executives working on the campaign, and Diamond International Corporation's Heekin Can Division gave $28,450 of in-kind contributions. Large donations also came from other state and out-of-state can companies. Among the brewers listed were Pabst ($49,400), Stroh ($46,600), Anheuser-Busch ($46,000), and Miller ($27,000). The soft drink companies included Pepsico ($40,000) and Coca-Cola ($35,000), plus bottlers in Ohio and outside the state Major chains listed included Kroger ($50,000) and Dart ($26,700), along with hundreds of smaller chains, stores, and distributors with amounts of from $1,000 to $20,000. This initial reporting did not specify the extent of in-kind support from the United Steelworkers of America and the AFL–CIO.

Against this heavily financed, politically powerful opposition, the proponents of beverage container legislation looked like a David facing Goliath. The citizens sponsoring a beverage-deposit law had been organized in mid-1977 as the Ohio Alliance for Returnables, started by a few members of the state legislature who had been unsuccessful in getting a deposit bill passed in the legislature. They chose to try to get the proposal onto the state election ballot as an initiative—a process which in Ohio is exceedingly difficult. First 90,000 signatures had to be collected to qualify for the Assembly's consideration, and then, if the Assembly failed to act favorable within 120 days the citizens would have to go through a second signature-collection process to get on the general-election ballot. Obviously, the Ohio State Assembly does not welcome citizens taking issues into their own hands.

The Alliance, with support from a few state conservation groups, located their headquarters in some small office in a low-rent district of Columbus with four low-salaried staff and four full time volunteers. And they hired Lynda James, a bright, dedicated young political science graduate, to coordinate and direct the effort. A few hundred volunteers collected the required 90,000 signatures to place the initiative before the Assembly. But the Assembly failed to act. So a small army of 1,800 volunteers was sent out to obtain signatures from 85,000 additional citizens who had not signed the first petition—a Herculean effort that succeeded only a few hours before the deadline. It was the only initiative to qualify for a place on the 1979 election ballot, and was titled "Issue No. 1."

It took about half of the $90,000 raised in 2,669 small contributions from Ohioans just to get the deposit initiative on the ballot, and most of remainder had to be spent on keeping the Alliance alive during the two-and-one-half-year process. To get their message to Ohio's eleven million residents, the Alliance could not afford any mass mailings, had enough cash for only 260,000 copies of a brochure distributed through volunteer workers, and had just $338 for newspaper, television, and radio advertising—used for tapes which they sent to stations with a request for free time under the FCC's "Fairness Doctrine."

Lynda James and her co-worker had to rely mostly on word of mouth and grass-roots efforts. They were spurred on by their feeling that because their cause was "right," and in the best interests of the citizens, they would win. The initiative they proposed actually was quite conservative. It did not ban cans or refillable bottles. It merely required a minimum of ten cents deposit on each container, to be refunded when the user returned it, a principle and practice once accepted as normal by all beverage users. The Alliance workers saw the law as an important first step in ending the throwaway ethic saving energy and natural resources, and eliminating unsightly bottles and cans from streets, roadsides, beaches, and parks.

To create publicity for the campaign, James staged an eight-day walk from Cleveland to Columbus (162 miles), with trucks picking up bottles and cans alongside the road. After a ceremony at the State Capitol grounds, the refuse was carted away for recycling. The campaign's community organizer, Joe Albrechta—another recent college graduate—and his wife Sue staged a similar 120-mile walk from Cincinnati to Columbus, although they could not afford a truck to accompany them for bottle and can collecting. The walks stimulated media attention, and local citizens joined them while they passed through towns along the way.

Lynda James made many speeches and took part in debates. But the Alliance had limited funds for sending out speakers or for getting information about their side of the issue to Ohio's citizens, and they were helpless to counter the barrage of last-

minute industry advertising, which wiped out the early support the Alliance had obtained while explaining the cause as they circulated petitions.

James feels deeply frustrated that there was no way the Ohio Alliance for Returnables could afford to buy media time or space to refute the opposition charges. "They based their campaign on exaggerated claims about price rises," she says. "They created concern about job losses with false figures, ignoring the fact that other states with deposit laws have shown a large net increase in jobs. They repeatedly emphasized that 'forced deposit' laws in Oregon, ermont, and Michigan were disasters, and that is a complete distortion of the truth. They also neglected to tell the voters that their alternative litter-control laws in Oregon, Vermont, and Michigan were the time it reached the consumer, would create another bureaucracy at a cost of $15 million a year, and would do nothing to stop littering. The alternative was a sham. The Ohio Manufacturers League and the Ohio Chamber of Commerce, which were a part of Ohioans for a Practical Litter Law, are now actively opposing passage of a litter law in the state legislature."

A spokesman for the industry side, Christian Kindsvatter, treasurer of Ohioans for a Practical Litter Law (and executive director of the Wholesale Beer Association of Ohio), gives three reasons why industry won by such a large margin in Ohio. "We can attribute it to the fact that people were conscious that forced deposits would bring higher prices, that people agreed the proposed deposit law would only deal with a small part of the litter problem, and that there was a better way of doing it for less money, and that is our litter control law alternative."

Whom to believe? On the predicted price rise for beverages, the industry forces told the truth when they emphasized the relatively large (36 cents a six-pack) rise in beer prices during the first year's operation of Michigan's deposit law, at least for major brands of beer. But the industry campaign did not mention that prices had not shot up in Oregon, Maine, or Vermont, and that soft drink prices had risen only moderately in Michigan. Nor were the Ohio voters informed that the Michigan attorney general has convened a grand jury to investigate charges of price fixing among brewers and wholesalers, that a Michigan Senate committee has been holding hearings into the causes of the price rise, and that the state's Liquor Control Board has recommended the overhaul of archaic regulations which lead to price fixing. Michigan now prohibits the advertising of beer prices, requires 180 days' notice for beer wholesalers to change prices, requires beer to pass through wholesalers, and prohibits volume discounts. As a result, prices of top-name beer brands are the same in almost all Michigan stores.

Industry claimed that the "forced deposit" laws in Oregon, Vermont and Michigan have proved to be failures. But both former governor McCall and present governor Victor Atiyeh report overwhelming approval by the people of Oregon, the first state to have a bottle bill (passed in 1971). "Oregon has experienced no significant rise in prices related to the bottle bill, nor loss of jobs, nor sanitation problems," says McCall. "The return rate on bottles is ninety-six percent, and on cans eighty percent, beer bottles are being used an average of twenty times and soft drink bottles twenty-four times. A 1979 report by Governor Atiyeh stated that beverages sold in returnable containers cost less in Oregon, sales have increased, employment in the industry has expanded and litter has been reduced.

While Michigan's new law may have been a disaster to distributors faced with large capital investments for new equipment, and grocers have complained about the need for more storage space or having to hire people, to the public the law has been a success. Regional polls have shown that if the law were put to a vote again today, Michigan voters would still approve it by a two-to-one majority as they did it 1976. And the industry's national trade journal, Beverage World (November 1979), noted that although the change over costs to Michigan business and industry have been exceedingly high "The returnable system is proving to be the energy saver and litter deterrent that the environmentalists preached it would be."

More than 90 percent of all applicable Michigan bottles and cans are now being returned. Alcoa and Reynolds both have built new plants to handle the huge volume of aluminum-can recycling, and Great Lakes Steel Corporation reports that it is recycling more than one million steel and aluminum beverage cans a day. And a Michigan Department of Natural Resources study of six municipalities showed an average reduction in solid waste collection of from six to eight percent during the first year's operation of the new law, amounting to $18 million in savings on solid waste disposal.

On the jobs issue, Lloyd McBride, international president of the United Steel workers (185,000 members in Ohio) stated in a campaign debate that if the deposit law were accepted by Ohio voters it would cost 10,000 Ohioans their jobs in the container industry and in related fields. Union officials predicted a loss of "up to 2,000 jobs" in the can-making industry in Ohio, although the proposed Ohio deposit law would not discriminate against cans by charging a higher deposit (as Michigan's law does), nor outlaw them. Yet only 3,665 people are employed in the twelve Ohio plants making beverage bottles and cans. And most experts predict that the few jobs that might be lost under a deposit law would be offset by thousands of new jobs dealing with returned bottles and cans, and in recycling processes.

To back up the claims for a litter-control law alternative, industry claimed as fact that under the Washington State litter law, total litter had been reduced 66 percent in the first three years of operation. While this statement had been made by an earlier director of Washington's Department of Ecology, Washington State officials now say the 66 percent reduction figure "cannot be defended" because it was based on a study now recognized as grossly over-estimating the original baseline amount of litter used to get the 66 percent figure.

On the health and sanitation aspects, a full-page advertisement featuring large sketches of cockroaches appeared in Cincinnati and Columbus newspapers nine days before the election. The ad showed the roaches coming from a bottle and a can, and the text block under the big headline, COCKROACHES!, read, in part: "If you don't vote 'no' on Issue No. 1, roaches could be everywhere, in supermarkets, restaurants, taverns, convenience food stores, carryouts, drive-thrus, bottling companies, warehouses, and on and on . . . America has fought to arrest these creepy varmints for 200 years. Don't let them all go free on election day."

The advertisement was paid for by several independent beer distributors and was not a part of industry's official campaign. Yet many grocery stores displayed the ad prominently. And in the last week of the campaign, the directors of the state's departments of health and agriculture spoke out against the deposit law, using the health issue, and even appeared on television and radio commercials paid for by the industry-funded opposition. Said State Health Department Director John H. Ackerman: "Passage of Issue No. 1 would be a step backward in the efforts Ohio has made to rid its food establishments in neighborhoods of dangerous, disease-bearing rodents and insects."

Ackerman cited as fact that after the bottle bill went into effect in Michigan complaints of insect and rodent parts in returned bottles and cans increased more than 100 percent. William Rustem, assistant to Michigan Governor Milliken, says the Ackerman statement is a "complete distortion." The Michigan Agriculture Department did report that consumer complaints of total foreign objects in containers, including pieces of glass, increased from 79 to 177. But this figure was for total complaints, and would amount to a minute fraction of the more than four billion containers sold in the state each year.

What about Washington? The 1979 campaign in that state followed somewhat the Ohio script. The Citizens for Returnable Beverage Containers tried but failed to get a deposit bill through the state legislature before turning to the initiative process. Nine years earlier, Washington had seemed headed toward becoming the first state to have a bottle bill, until the opposition, Industry for a Quality Environment, used a late media advertising campaign to overcome the citizens' lead and won 51 to 49 percent. In 1971 the legislature passed an industry-backed Model Litter Control Act, which was ratified by voters in 1972. The act established a tax on the gross sales of groceries, newspapers, fast foods, and other items. Funds generated are used for educational programs to reduce littering, as well as for litter-pickup programs by youth.

Industry for a Quality Environment organized anew in 1979 to fight Initiative 61. When early polls showed the deposit bill ahead, industry brought in political experts and organizers from the glass-packaging and can industries. The industry group changed its name to Committee for Litter Control and Recycling and adopted a slogan: "Keep on Recycling, Vote No on Issue 61."

Many of the same arguments used in Ohio—higher beverage prices, loss of jobs, sanitation and health problems—were played out in Washington, in addition to the contention that the deposit initiative would hinder operation of the Model Litter Control Act and the thirty-eight private-enterprise recycling operations that now accept beverage containers and other litter.

One phase of the campaign was a numbers game, with each side having sets of statistics to prove its claims that either the Washington Model Litter Control program was doing a better job eliminating litter than Oregon's bottle bill, or that Oregon's roadsides and beaches were cleaner than Washington's.

The Citizens for Returnable Beverage Containers had 200 groups working for Initiative 61, including the Washington State Sportsman's Council, the Washington State Grange, the state Democratic Party, the state Farm Bureau, and many environmental groups. They raised $70,000. But, as in Ohio, much of their money had to be spent getting the initiative on the ballot. A four-member staff, headed by Steve Zemke, a fisheries biologist and environmental scientist, coordinated volunteers' efforts to get the facts to the public so the citizens would not be fooled by a last-minute industry advertising campaign.

To no avail. Industry, with $1 million in its war chest—80 percent from outside the state—used much of it for advertising, direct mail, and publicity efforts during the last two weeks. Grocers bought billboard space, and printed VOTE NO ON 61 and other messages on shopping bags. They placed stickers on beer six-packs stating that prices would rise 55 cents and stickers on soft drink bottles saying prices would go up 50 cents if the deposit legislation passed. Governor Dixy Lee Ray, who a year earlier had said, "The litter on our highways is worse than I've ever seen it," decided just before

the election that the beverage-deposit initiative was not needed. And the citizen movement for a deposit law lost again.

"The soft drink and beer companies are masters of advertising and promotion because that's how they sell their products, and they use both skills well, and have the money to do it with," says the losers' campaign director Zemke. "But we haven't given up. We'll be back for another campaign."

Whether the advocates of beverage-deposit laws in other states will be able to fare better than the Ohio and Washington citizen movements did appears now to depend on how broad a base they can build, and how well they can get their message to the voters or to the state legislators. In most states the battle is being waged first in the legislatures, where experience has shown that it is much easier and cheaper for industry to apply its influence than in elections, and where environmental groups have not had much lobbying success. If it comes to putting the issue before the voters in ballot initiatives, the citizen movements will again be handicapped by scarcity of funds with which to combat industry's domination of the media.

Veteran bottle-bill warrior Tom McCall suggests that states adopt limits on individual contributions or overall spending for initiative campaigns.

"If limits aren't placed on industry's spending," says McCall, "they will continue to buy out the minds of voters on this issue."

Mr. HATFIELD. Mr. President, in 1979 it was my pleasure to coauthor an article with Stephen J. Owens for the Boston College Environmental Affairs Law Review on beverage container deposit legislation. I ask unanimous consent that this article be included in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MINIMUM DEPOSITS FOR BEVERAGE CONTAINERS: NATIONAL IMPACTS AND CURRENT FEDERAL LEGISLATION

(By Senator MARK O. HATFIELD* and Stephen J. Owens**)

I. INTRODUCTION

There has been a dramatic trend towards non-returnable beverage containers in the United States over the past two decades. The consumption of non-returnable cans and bottles has increased over five times as fast as the consumption of beer and soft drinks.[1] Between 1959 and 1969, the number of containers consumed increased 164 percent while the amount of beer and soft drinks consumed increased only 29 percent[2]—a phenomenon due to the skyrocketing use of the non-returnable container.[3] Of the 15.5 million tons of glass produced annually in the United States, 7 million tons are used to make non-returnable bottles.[4] An admitted goal of container manufacturers is to annually produce 100 billion non-returnable containers.[5]

The underlying reason for the massive switch from returnable to non-returnable containers was the steel and can industries' desire to expand their markets in the late 1940's and early 1950's.[6] During this period the steel and can industries began competing with the glass industry for the beverage container market. The can manufacturers had envisioned manufacturing forty disposable steel cans for each returnable bottle made.[7] Glass manufacturers soon responded to claim their share of the disposable container market by producing a non-returnable container of their own.

The container manufacturers' marketing strategy stressed the benefits of non-returnables to distributors, retailers and consumers. Distributors could save on transportation costs because non-returnables cans and bottles weighed less and only had to be transported one way.[8] Retailers could save on costs in two ways. First, non-returnable bottles required less storage space than returnable bottles. Second, retailers would no longer have to pay for people to sort and handle the returnables.[9] Consumers could take non-returnables anywhere and not be bothered with the inconvenience of returning them for refund.[10] Thus, the initial response to non-returnable beverage containers was overwhelmingly favorable.

While the economic benefits to can and bottle manufacturers are obvious, the switch to non-returnable beverage containers has brought environmental and economic costs to the rest of society. We have paid for the augmented use of non-returnables through detrimental increases in litter, solid waste, energy and resource use, and unemployment.[11]

Legislative action appears to be the best alternative to negate the societal costs of non-returnable beverage containers. Legislation known as "minimum deposit" bills has been proposed at all levels of government.[12] The most effective minimum deposit law would be at the national level, which will be the focal point of this article. First, the potential impacts of a national minimum deposit law will be examined. The article will then analyze minimum deposit legislation currenty before Congress. Finally, the article will conclude by evaluating the costs and benefits of such a law.

II. IMPACTS OF A NATIONAL MINIMUM DEPOSIT LAW

A. Litter

The reduction of litter is a primary goal of beverage container legislation.[13] This goal has received special public attention due not only to the extraordinary increase in litter over past years, but also because of the litter problem's high visibility. While the roadsides have received the most abuse, other public areas such as beaches, parks, campgrounds and such private areas as parking lots and residential sites have also been defaced by the increasing amount of litter.[14]

Studies support the assertion that beverage containers are a primary contributor to the litter problem. One out of every four of the over 60 billion beer and soft drink containers manufactured in the United States ends up as litter on our landscape.[15] Beverage containers comprise from 60 to 80 percent of litter by volume and from 20 to 40 percent on a piece count basis.[16] Each year, over $500 million is spent by federal, state and local governments for litter collection along the nation's roadsides.[17]

Empirical studies at the state level and projected results for the national level indicate the imposition of a minimum deposit law significantly reduces the amount of litter attributable to beverage containers. Results from Oregon and Vermont show that the volume of beverage container litter was reduced 66[18] and 76[19] percent, respectively, after enactment of minimum deposit laws in those states. Total litter was reduced by 21 percent in Oregon[20] and 35 percent in Vermont.[21] Projections indicate that total litter could be reduced by about 40 percent in volume by enacting a national minimum deposit law.[22]

B. Solid waste

In most municipalities the public bears the cost of solid waste disposal in the form of fixed monthly assessments or through property tax mechanisms. The skyrocketing increase of non-returnable beverage container use has shifted the burden of a private industry recovery and cleaning system to the municipal waste management system. Thus, those people buying non-returnable beverage containers and thereby increasing the price for solid waste disposal pay no more than those people reducing the price of such disposal by purchasing returnable containers.[23]

Beverage containers are the most rapidly growing segment of municipal solid waste,[24] with a growth rate of 10 percent annually.[25] It is estimated that beverage containers constitute approximately 6 to 8 million tons of waste,[26] or from 4 to 8 percent of total municipal solid waste.[27] In 1985 this nation will spend over $220 million to dispose of beverage containers.[28]

Imposition of a minimum deposit law would drastically reduce the amount of beverage container waste and significantly reduce total solid waste. Total solid waste would be reduced from 1.5 to 6 million tons,[29] or between 1.5 and 6 percent.[30] Such reductions in solid waste would have two major impacts. First, a reduction of 6 percent would result in a significant cut in expenses for taxpayers.[31] Second, it would reduce the demands on and extend the present life of municipal landfills[32]—an important impact in urban areas where land costs are high.[33]

C. Energy

The shift to non-returnable containers placed an additional burden on national energy sources. The increased burden results when bottles and cans are simply discarded after one use rather than being washed and reused, or recycled. One of the benefits and a primary goal of a minimum deposit law is an overall reduction in energy use. This reduction occurs in two ways.

First, energy is saved in the production of beverage containers because fewer of the energy-demanding non-returnables will be produced.[34] In the bottle area, the number of returnables produced will increase, but a net energy savings will result because a returnable bottle used ten times requires one-third of the energy needed to produce ten non-returnables of equal size.[35] Most cans would be recycled as scrap instead of being discarded.[36] This would also result in energy savings since cans produced from recycled metal require much less initial energy than do cans produced from metal ore.[37] For example, aluminum and all-steel cans made from recycled material save 78 and 39 percent, respectively, of the energy required to produce a "new" can.[38]

The second way in which a minimum deposit law would save energy is in the area of disposal. Energy needs for disposal would be reduced because fewer tons of waste would have to be collected and transported to disposal sites. Once at the site, energy needs would be reduced because less waste would have to be handled.[39]

The energy saved through a minimum deposit law depends upon two variables: (1) bottle and can container mix and (2) return and recycling rates. Due to inconsistent survey results for the two variables, projections of overall energy savings differ somewhat. In general, from 151[41] to 224[42] trillion British Thermal Units (BTU's) could be saved per year. Such a savings is equivalent to between 32[43] and 50[44] percent of the tenergy used in beverage container manufacturing and between 0.2[45] and 0.3[46] percent of the total energy used in the United States.

At a time when the United States' dependency on foreign oil is of major concern, a minimum deposit law would save between 70,000 and 125,000 barrels of oil per day.[47] With the absence of a national energy policy, it becomes increasingly apparent that energy problems will not soon be solved by locating a single massive source of savings. Conservation depends upon the accumulated savings of many less grandiose efforts.[48] For example, the United States saved 200,000 barrels of oil a day by reducing the speed limit to fifty-five miles per hour.[49] By simply enacting a minimum deposit law, this nation could save the equivalent of between 35 and 63 percent of the energy saved by reducing

Footnotes at end of article.

the speed limit.[50] Thus, national energy conservation from a mandatory deposit law would be significant.

D. Raw materials

In 1975, 7 million tons of glass, 2 million tons of steel and 500,000 tons of aluminum were used to make beverage containers.[51] These materials made up 45 percent of all glass, 6 percent of all aluminum and 2 percent of all steel produced in the United States.[52] A minimum deposit law would reduce the amount of materials needed to make beverage containers because fewer bottles would be made and most metal cans would be recycled.

The primary raw materials for glass, aluminum and steel are sand, bauxite and iron ore, respectively.[53] While sand is plentiful, the domestic supply of bauxite and iron ore is not. The United States imports about 90 percent of its bauxite.[54] A minimum deposit law would result in a reduction in the demand for bauxite of between 1 and 1.5 million tons.[55] Such a reduction represents 50 to 75 percent of the bauxite used for beverage container production[56] and 2.4 to 3.5 percent of the total United States demand for the material.[57] Demand for aluminum would be reduced from 300,000[58] to 500,000[59] tons, an amount equal to between 35 and 45 percent of the aluminum used for beverage containers.[60]

The nation's dependency upon imported iron ore is increasing. The United States currently imports one-third of its iron ore, and domestic ore is coming from increasingly lower grade deposits.[61] Imposition of a minimum deposit law would allow the United States to save between 2 and 3 million tons of iron ore each year.[62] This represents a reduction of between 45 and 83 percent of the iron ore used in the beverage container industry[63] and about 2 percent of all iron ore used in the United States..[64] The amount of steel required to make beverage containers would drop by about 1.5 million tons[65] or 15 percent.[66]

E. Economic impacts

The most hotly debated issue related to any proposed national minimum deposit legislation is its impact on the economy. While the environmental benefits are conceded by most opponents,[67] the economic merits of such a law are feverishly challenged.

A minimum deposit law would have primarily two economic effects. First, it would have an effect upon employment. Second, it would have cost implications for the affected industries and eventually for the consumer. The industries affected both in terms of employment and costs would be the soft drink industry, brewers, beer wholesalers and distributors, container manufacturers, and retailers.

1. Employment Impacts:

In every study conducted on the employment impact of federal or state minimum deposit laws there has been demonstrated a net increase in employment.[68] Many of the jobs created by a system of deposits, however, cannot be substituted for jobs existing under the current system. Such employment dislocations would be reduced if non-refillable bottles and metal cans continued to be sold or if the change in container usage occurred over an extended time period.

Because the impact of a new national law upon job dislocations depends on the rate of change of container usage, a transition period would allow natural attrition in employment to absorb some of the job losses. It is estimated that after a five-year transition period about 90 percent of the containers sold would be refillable and 10 percent would be cans.[69] During this period about 39,000 jobs would be lost[70]—primarily skilled positions in the container manufacturing industries.[71] Yet at the same time approximately 107,000 new jobs would be created for lower classifications of skill and pay in the retail and distribution sectors.[72]

Studies in the states also predict a net gain in employment after enactment. Maryland,[73] Minnesota,[74] Connecticut,[75] New York,[76] Illinois,[77] Michigan,[78] Maine,[79] and North Carolina[80] found that the job gains in the retail and distribution sectors would outweigh the job losses of the container manufacturers. For example, enactment of a minimum deposit law in New York would result in a net job gain of 4,000 jobs with a net annual payroll increase of $35 million.[81]

2. Cost Impacts on Affected Industries and Consumers:

Certain industries would be adversely affected upon enactment of a minimum deposit law. A facility for the production, storage and distribution of non-returnable beverage containers which is not convertible to a returnable system will become obsolete. Bottlers and brewers will initially have to invest in additional equipment such as bottle washers and refillable container lines. Additional transportation costs will be incurred since the containers must be transported twice instead of only once. Retailers will need additional storage space and will have to employ extra help to handle and sort the returnable containers.

One study indicates that such changes would result in tax writeoffs of $1.3 billion and total new investments of $1.2 billion for the industry.[82] More recently, the industry has claimed that such a conversion will cost about $5 billion.[83] These costs, however, would be more than offset by container cost savings. The resulting net cost to all sectors of the beverage industry would be about $250 million during the first year of the law's enactment, but this would eventually become a $40 million gain in subsequent years due to container savings.[84] It should be noted that cost reduction in the industry is concentrated in the beverage filling sector—brewers and bottlers—while cost increases occur in the distribution and retail sectors.[85] If the filling sector chooses not to pass its entire cost savings forward, then all of the decrease in systemwide costs might not reach the consumer.[86]

Estimates of the ultimate savings to the consumer vary due to differences in cost estimates and the uncertainty of the portion of savings that will be passed forward from the filling sector. Consumer savings are generally estimated to range from three to five cents per twelve-ounce container.[87] It is often argued, however, that these figures do not take into account the added distribution and handling costs to the industry.[88] Such costs have been estimated to be from less than one cent to two cents per container.[89] Therefore, even if these costs are not included in the consumer savings figures above, beverages in refillable containers will still cost less and will save the consumer money.

III. ANALYSIS OF CURRENT LEGISLATION

As of June, 1979 three minimum deposit bills were facing Congress.[90] The bills—S. 50, H.R. 2812 and H.R. 1416—are almost identical in nature. All would require a minimum five cent refund value on beverage containers of malt or beer, mineral water, soda water or carbonated soft drinks within a certain number of years after enactment. All would prohibit the sale of metal cans with detachable openings ("pull tops") within one year of enactment. There are, however, slight variations. This article will focus on the provisions of S. 50, provisions in other bills which differ from S. 50, and notable omissions from all of the bills.

Sections of S. 50 of particular interest are:

Section 2 states the findings of Congress.[91] H.R. 2812 gives additional findings, such as the fact that enactment of the bill would not be inflationary even though it would create jobs[92] and that an alternative tax approach would be a burden on interstate commerce.[93]

Section 3 defines the terms of the bill.[94] Section 3(1)(C) adds the definition of "refundable beverage conatiner" to the bill.[95] This term had not been defined in previous legislation[96] nor is it defined in H.R. 1416. H.R. 2812 adds to the definition of "retailer" a proviso that the Administrator of the Environmental Protection Agency may prescribe regulations to establish who is a retailer in regard to beverage containers sold to consumers from vending machines.[97] This is a worthwhile addition because it is difficult to determine who would be held accountable for violations of the deposit law when the violation occurs through the operation of a vending machine.

Section 4 provides that no distributor or retailer may sell a beverage container unless a refund value of not less than five cents is clearly indicated on the container.

Section 5 requires the payment of the appropriate refund by a seller to one who tenders an empty, unbroken beverage container of a brand of beverage which the seller currently sells or has sold within the last six months. The six month extension for redemption is aimed at enhancing consumer convenience—a major factor in return rates.[98] H.R. 1416 attempts to accommodate the consumer even more by providing for a redemption period lasting up to ten months after the retailer has stopped selling the brand in question.[99] It also extends the retailer's period of eligible redemption to one year after the distributor has ceased to offer the brand.[100]

Section 6 bans all pull tops on cans. This section does not distinguish between metal and non-metal detachable parts as some state statutes do.[101]

Section 7(a) pre-empts existing state and local minimum deposit laws which are inconsistent with the Act. This section creates uniform deposit laws throughout the nation, insuring that the beverage industry does not have to face conflicting state laws as is often the case now. Section 7(b) exempts from state and local taxes the amount charged for a deposit when one buys a beverage. Subsections (c) and (d) elaborate on what is not pre-empted by the Act: a state may require a distributor to reimburse a retailer for handling containers, and a state or locality may establish or continue in effect deposit laws for containers used to hold liquids other than beverages. H.R. 2812 further states that the Act does not prevent a state or locality from establishing a refund value of at least five cents.[102]

Section 8 provides civil and criminal sanctions for violation of the Act. A violator may be fined not more than $1,000 and/or imprisoned for not more than sixty days for each violation.

H.R. 2812 provides only for civil penalties, distinguishes between violations "without good cause" and "knowing" violations, and sets out the procedure for obtaining different forms of civil relief when one is denied a refund rightfully owed to him. H.R. 2812 section 8(a) provides for a $1,000 fine for each violation. Section 8(b) states that the aggrieved party may seek relief in any appropriate state or federal court and is entitled (in addition to the refund value) to the sum of (1) the amount of damages proximately resulting from the refused refund, (2) the amount of court costs, reasonable attorney's fee and other reasonable costs incurred in seeking a refund, plus (3) ten dollars for each beverage container which was not refunded. This subsection also allows the court to grant apropriate additional relief such as injunctive or declaratory relief. Section 8(c) states that any retailer or distributor who "knowingly" fails to make a refund may be fined a maximum

Footnotes at end of article.

of $100 for each such failure up to $10,000. The subsection also places the burden on the Attorney General of the United States to bring suit for such a violation.

As noted before,[103] a transition period is important to ameliorate some of the potential adverse impacts of the law. *Section 9* establishes such a transition period by delaying the law's effective date until three years after enactment. The ban on detachable pull tops, however, becomes effective one year after enactment. H.R. 2812 provides for only a two-year transition period,[104] except for the ban on pull tops which is also effective one year after enactment.[105]

The legislation facing Congress is also significant when consideration provisions which have not been included. None of the current bills provides for a two-tier deposit system with a certified bottle, employee dislocation compensation, or retailer reimbursement.

Oregon, the first state to enact a minimum deposit law, provides that containers used by more than one beverage manufacturer may be "certified."[106] Certified containers may carry a lower minimum deposit.[107] The purpose of certification is to enable container manufacturers to use each other's containers and to enhance consumer convenience by allowing the consumer to return his beverage containers to more retailers. The experience in Oregon has shown that a two-tier system can lead to greater efficiency in handling and return of empty bottles, and improved consumer convenience.[108]

The beverage industry particularly opposes the two-tier approach and other states have declined to use it. Opponents contend that the two-tier system discriminates in favor of a particular package, does not allow economics to determine what type of package will be on the market, and does not always select the best package in terms of safety, conservation of energy or conservation of natural resources.[109] Regardless of the possible economic impact, omission of the two-tier system is politically sound to prevent added industry opposition.

Two recent innovations from state minimum deposit laws are not included in the present national legislation. A Connecticut provision setting up a special category of unemployment compensation for any person who suffers loss of employment as a result of the Act is not contained in any of the pending national bills.[110] Under the Connecticut act, which became effective on January 1, 1980, a "dislocated employee" may receive up to 85 percent of his net weekly earnings for a period of up to two years.[111] The sum of such payments is reduced by any amount of regular unemployment compensation the dislocated employee receives.[112]

The Connecticut approach is not only novel, but politically sound. Labor opposition is greatly reduced with such a provision, thus enhancing the chances that a national bill will be passed. The benefits of reduced labor opposition must be weighed against the added costs of providing additional unemployment compensation.

The provision's impact upon the national budget is not nearly as severe as it initially appears. A net gain in jobs will result from enactment of the bill.[113] The increased number of productive workers will provide additional tax revenue.[114] The additional revenue can then pay for all or part of the dislocated employees' allowance fund. Finally, if the fund were set up under the Connecticut approach, it would only have to be sustained for two years. This also limits the provision's effect on the national budget.

H.R. 2812 provides for the Administrator of the Environmental Protection Agency to "consult" with the Secretary of Labor about the possibility of dislocated employee assistance,[115] but this does not come close to establishing an allowance fund. Such a provision is probably not included in current legislation in the hope that the bills will pass on their merits alone—without being compromised to appease special interests. The provision does work as a good tool for compromise if special interests prove to be too strong.

Another recent development in state minimum deposit legislation which is not specifically included in current national bills is a provision requiring distributors to reimburse both dealers and redemption centers.[116] Under this approach the distributor is generally required to reimburse the dealer not only for the deposit returned to the consumer, but also for the cost of handling and sorting containers in an amount equal to either one cent per container[117] or 20 percent of the refund value.[118]

The provision for reimbursement can also help in a politically tight situation. Merchants have complained that a minimum deposit law burdens them with the expenses of collecting and sorting containers.[119] While such a reimbursement would favor the merchants, it would put an added expense on the already burdened distributors and is therefore not included in the current legislation.[120]

Other less fundamental issues are also unaddressed in the current legislation. Provisions banning non-biodegradable plastic rings[121] and discriminatory deposit amounts[122] are abundant in state legislation. Statutory provisions establishing special hours for redemption,[123] educational programs,[124] or redemption centers[125] are already in effect in certain states. Such provisions are relatively minor and should not affect the legislation's chances for passage.

IV. CONCLUSION

Under a national minimum deposit law, the beneficial environmental impacts of litter and solid waste reduction, and energy and resource conservation can be achieved at significant levels. After enactment of the law, the nation could expect (1) a 40 percent reduction in the volume of litter, (2) a total reduction in solid waste of up to 6 percent, (3) reduced national energy needs of about 0.3 percent, (4) a savings of about 100,000 barrels of oil a day, and (5) conservation of scarce domestic supplies of bauxite and iron ore. These results are possible with only minimal, short-term consequences to the economy. If an adequate transition period is allowed, the national economy could actually benefit from such a law—especially in the area of employment.

Currently, Congress is again faced with the prospect of a minimum deposit law, with hearings to begin in March. Individual legislators will without doubt receive pressure from beverage container manufacturers and labor interests to defeat the bills. Congress, however, should pass the legislation with all deliberate speed.

The pending bills do not differ significantly in practical effect. Any one of the bills is capable of providing the desired environmental and economic impacts. S. 50 has the advantage of providing for a longer transition period—perhaps the single most important element of the legislation. State experience has shown that this is extremely effective legislation, and the nation should not be forced to wait any longer for such a badly needed law.

FOOTNOTES

* Mark O. Hatfield is the senior United States Senator from Oregon. Senator Hatfield is an advocate of minimum deposit legislation and has several times introduced such bills in the Senate.

** Stephen J. Owens received a Bachelor of Science in Public Administration from the University of Missouri-Columbia in 1977 and is presently a J.D. candidate (to be awarded in 1980) at Wake Forest University. He is the author of a comment on state minimum deposit legislation published in 16 Wake Forest L. Rev.——(Dec. 1979), and he co-authored with Senator Hatfield an article presented at the National Mayors Conference in June 1979 describing the potential impacts of a minimum deposit law.

[98] For the effect of consumer convenience on return rates, see Gudger and Walter, *supra* note 13, at 270–71. The wording in the pending bills does not go as far as it could to enhance consumer convenience. The bills require redemption for containers of the same "brand" sold by suppliers with whom the seller does business. A more convenient approach would be to require retailers to redeem *all* containers of a size, shape, and color sold by suppliers with whom the seller does business. In this way, a consumer would have available more retailers to which containers could be returned. The retailers could accept without difficulty all containers which they could pass on to the appropriate distributor. *Id.* at 285.

ENERGY

Mr. HATFIELD. Mr. President, another problem treated by the continued use of nonreturnables, and one that has taken added significance over the past few years, is the waste of energy resources due to our willingness to discard perfectly good glass and metal containers after one use. By switching to returnables, we could reduce the container industry's energy consumption by 42 percent and save between 80,000 and 125,000 barrels of oil per day.

According to the testimony of the U.S. Environmental Protection Agency during hearings on my returnable beverage container bill before the Senate Commerce Committee in May 1974, the manufacture of one-way bottles and cans wastes the equivalent energy needs for 1 year of all the residents of New York and Chicago. While reducing this wasteful energy consumption would by no means solve our energy problems, this amendment, offers us the opportunity to make significant progress on this critical national problem.

In a study released by the Federal Energy Administration (now DOE) it is predicted that cans will continue to have a significant share of the market in beverage containers and there will be significant reduction in materials use and energy consumption. Based on a return rate of 10 trips for refillable bottles—and it is conceivable that the rate could be higher as has been the case in Oregon—the study predicts energy savings of about 81,000 barrels, which is about 44 percent of the total energy that will be used by the entire beverage container industry.

The study also contains additional figures that indicate an increase of 156,000 jobs primarily in distribution and retailing, along with a decrease of about 38,000 jobs in the container and metals industry, leaving a net increase of 118,000 jobs. These labor statistics collaborate with the experience we have had in Oregon with our own deposit law, and present favorable prospects for success for a national law. Returnables can and do work. The FEA study bears this out.

I ask unanimous consent that the FEA executive summary be printed at this point in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

ENERGY AND ECONOMIC IMPACTS OF MANDATORY DEPOSITS: EXECUTIVE SUMMARY SEPTEMBER 1976

ACKNOWLEDGEMENTS

This project was conducted by the Research Triangle Institute, Research Triangle Park, North Carolina, pursuant to Contract No. CO-0450175-00 with the Federal Energy Administration. The statements, findings and conclusions presented the view of the Federal Energy Administration.

Taylor H. Bingham, RTI, was the project manager for this study. Working with him were Bun Song Lee, Paul F. Mulligan and Philip C. Cooley, Franklin Associates, Ltd., was a subcontractor. At Franklin Associates, William E. Franklin, Robert G. Hunt and Marjorie A. Franklin were primarily involved. Personnel at Franklin Associates were responsible for the materials presented in appendixes D, G, H, I and parts of appendix M.

Morris J. Zusman, Federal Energy Administration, was project officer. Michael Loube, also of the Federal Energy Administration, assisted in the review of this study. Their interest, guidance and critical reviews are very much appreciated.

Many individuals in other government agencies, industry, labor organizations, environmental groups, and in research provided important data, insights and reviews of both the methodology (at an early meeting at RTI) and/or critical reviews of the draft version of this study. Their efforts are very much appreciated. Likewise we owe a debt to other published studies of this issue which also were important sources of data.

EXECUTIVE SUMMARY

1.0 Overview

The subject addressed by this study is the impact of proposed mandatory national beverage container deposit legislation—commonly referred to as "bottle bill" legislation. The study examines specific impacts that the imposition of a 5-cent refundable deposit on all beer and soft drink containers (refillable bottles, nonrefillable bottles and cans) would have on the total beverage related industry.

The study is not a comprehensive cost-benefit analysis of mandatory deposit legislation, but rather examines three major areas of potential impact. These impact areas are (1) changes in annual energy consumption, (2) changes in capital investment requirements (in terms of fixed plant and equipment), and (3) changes in labor requirements (in terms of jobs and earnings). These impacts are developed for those industries in the total beverage system that would be most affected by changes caused by a mandatory deposit. The industries included are: retailers, beverage producers and distributors, container manufacturers, and producers of basic steel and aluminum.

It is important to recognize at the outset that this legislation would not ban any specific container type. Rather, it would create an incentive for consumers to return all types of empty beverage containers for a deposit refund. However, the response of consumers to the deposit incentive (and its requirement to bring containers back) is expected to cause shifts among the types of containers sold.

To develop the potential impacts, the report first projects energy, capital and labor requirements of the beverage industry assuming no deposit legislation is passed. These baseline projections are then compared to projections of what might happen after a deposit law. Results are reported for a 1982 steady-state situation, assuming that: (1) a law would be implemented in the late 1970's and (2) by 1982 transistory effects will have been dissipated.

2.0 Organization

The report is composed of a summary, three primary chapters and 13 supporting appendices.

Due to the controversial nature of this subject an early draft version of this study was sent to various individuals—in other government agencies, industry, labor, environmental groups, research, and to other knowledgeable and interested persons—for critical review and comment. Their comments and suggestions have been incorporated whenever possible in this final report. For the interest of the reader, these extensive comments have been printed verbatum in Appendix L of the study. Specific questions and issues brought out by these comments are addressed in Appendix M. For any reader not fully aware of the controversy this issue has generated, we suggest a close reading of these appendices.

3.0 Approach

The impact of a deposit law depends primarily on two factors: the technical interrelationships between container types and their respective requirements for energy, capital and labor; and the behavioral (market) responses of producers and consumers to the deposit incentive to return the empty container.

Data does exist to estimate the energy, capital and labor requirements of the beverage container system as a function of the total beverage consumed in each specific type of container (based on a specific trippage of refillable bottles and return rate of cans). This study has identified and measured the technical requirements associated with the production and use of each container type. This was done starting with mining the raw materials and continuing through manufacturing, use and disposal of the container, including a loop for recycling or reuse as appropriate.

The behavioral market response determines the extent and direction of any impact caused by a deposit law. Unfortunately no data exist to predict with any degree of accuracy what the market response to a deposit law is likely to be. However, it is assumed that under a deposit system the market share represented by nonrefillable bottles will fall to zero since, to the consumer, there is no intrinsic difference between a one-way bottle or a refillable bottle when both have an associated deposit. Because cans, on the other hand, are intrinsically different from bottles, being lighter weight, easier to stack and not subject to breakage, it is believed, that cans will continue to have a significant share of the market.

What has been done is to establish a set of parameters from which many possible market responses can be evaluated. Three parameters essentially capture the total behavioral market response. These are: the can market share, the can return rate, the refillable bottle return rate (proportion of containers returned) or trippage. Each scenario of possible market response can be described by a unique set of parameter values.

4.0 General findings

The continuation of current trends in the beverage industry without the imposition of a deposit law will mean that in 1982, the base year for which impacts are examined, that the production and distribution of beverage will require 383×10^{12} Btu's of energy (about one-half of one percent of the Nation's total energy consumption), $7.3 billion in capital investment, and 300,000 jobs yielding $4.1 billion in labor earnings.

A deposit law could change these projections since the refillable bottle system, when the bottles are returned, is a comparatively labor and capital intensive sys-

tem; the nonrefillable bottle and can systems are relatively materials and energy intensive. Therefore, any market shift toward refillable bottles with the bottles returned would tend to reduce materials and energy usage while increasing capital and labor requirements. Shifts toward nonrefillable bottles and cans would tend to have the opposite effects.

The increased usage of recycled materials or increases in refillable bottle trippage would tend to reduce the amount of materials required and conserve energy resources for the total beverage system. Over time technological innovations are reducing per-unit energy, labor and material requirements for all container types. The parametric curves displaying the potential impacts of the deposit legislation have these innovations embodied in them. Beyond these general statements the impact of a deposit law will depend on the extent and direction of the behavioral responses.

5.0 Parametric relationships

Figures 1 through 5 present the three impacts examined in the study: figure 1, energy; figure 2 capital; figure 3, 4 and 5 labor. Because the impacts are not identical for beer and soft drinks, the impacts are presented for each beverage. To obtain the total impact of beverage container legislation the impacts for beer and soft drink must be added together. The curves are all parametric, showing the impact as a function of the can market share and the container return rate. In order to minimize the number of curves that would have to be displayed, the bottle and can return rates have been assumed to be identical. The subsequent paragraphs discuss the rationale for this assumption.

Figure 1 presents the net energy impacts of the beverage container legislation. This figure can be read, as all the other impact figures, by selecting a can market share and a container return rate. The figure is entered on the x (horizontal) axis at the can market share assumed after a deposit law is passed. A vertical line is projected until it intersects with the container return rate selected. A horizontal line is projected from the intersection point to the y (vertical) axis to read the impact. Figure 1, as all the impact curves, shows what the estimated 1982 can market share is projected to be without a deposit law. The numbers 1 and 2 on the curves correspond to two illustrative scenarios (discussed below) that are used as a means to aid the discussion in subsequent paragraphs.

The wide range of impacts at the extremes of the possible market response points out one reason why this legislation has been so controversial. Figure 1 shows that under differing scenarios the energy impact could be either positive or negative. At one extreme, if all consumers switched to refillable bottles (a zero can share) and discarded them (a zero return rate) energy consumption would increase by 322 x 10^{12} Btu annually or 155,000 barrels of oil equivalent daily. (This value is obtained by entering figure 1a (the beer panel), at the zero can share point and the zero return rate reading 100 Btu x 10^{12} on the y axis and adding it to the 220 Btu x 10^{12} that is read in a similar manner from the soft drink curve). At the other extreme, if all consumers switched to refillable bottles and always returned them, energy consumption would be reduced by 292 x 10^{12} Btu annually or 141,000 barrels of oil equivalent per day.

Neither extreme is realistic. If all refillable bottles are discarded, producers would find it cheaper to package in one-way containers because unless refillable bottles are returned several times they are more expensive to use. The other extreme is also unrealistic since some bottles will be broken or chipped and some consumers will not return bottles under any circumstances.

(NOTE.—Figures 1–5 are not printed in the Record.)

The format for figures 2 through 5 is similar to that for figure 1. In figure 2 the net change in the value of the capital stock for each post deposit law can market share—container return rate combination is shown. Figure 3 presents the net aggregate employment impacts.

Because jobs are gained in some industries and lost in others aggregating the industries, as was done in developing figure 3, masks the impacts on the individual industries. Therefore, figure 4 presents the net employment impacts disaggregated into each of the six industries considered: glass container manufacturers, can manufacturers, steel manufacturing, aluminum manufacturing, beverage production and distribution, and retailing. These impacts are presented only for the extreme return rates; both beer and soft drinks are shown in the same panel. It is assumed that workers within any industry are substitutable, for example, the same workers can make a one-way bottle or a refillable bottle. In one case, if retailing. employment is insensitive to the market shares and only sensitive to the return rate. Figure 5 is the complement to figure 3. It shows the net aggregate impact on earnings.

6.0 Illustrative scenarios

This study uses two illustrative scenarios to indicate how to use the parametric curves. The scenarios were chosen to avoid extreme values and provide the reader with two complete estimates of the impact of a deposit law that fall within the broad range of what can be considered to be a reasonable behavioral response to beverage container legislation. However, the reader is again reminded that figures 1–5 provide the vehicle for examining the impact of any scenario.

To place the behavioral responses assumed for the two illustrative scenarios into perspective, and to allow the reader some insight for making his own assumptions, a few observations are first in order.

6.1 Key behavioral parameters

(1) Refillable Bottle Return Rate—Currently this rate is about 6.9 or ten trips per bottle. It has declined over time. When the refillable bottle was the primary container, trippage rates of 30–40 were reportedly obtained. Two offsetting factors have to be evaluated to estimate the impact that a deposit law would have on trippage. First, since all stores would accept bottles back under a deposit law the case of returning the bottles would be greatly increased thus suggesting a higher trippage. Second, present one-way container purchasers who switched to refillables might still be inclined to discard them which would argue for lower trippage. The assumptions chosen for the two illustrative scenarios, continuing today's trippage rate or reducing trippage by half seem to fall within a reasonable range of expected outcomes after a deposit law is in place.

(2) Can Return Rates—In most of the nation there currently are collection centers for the recycling of aluminum cans. Aluminum can collection centers, offering three-fourths of a cent per can, today receive approximately 25 percent of all aluminum beverage cans sold. The aluminum industry projects this rate to continue increasing rapidly in the future years. In the state of Oregon, which has a deposit law, about 70 percent of all cans are returned.

Under a national law the can return rate will depend on a number of key factors. Since individuals currently purchasing cans generally value the convenience of immediately discarding the container, low return rates would be obtained if this behavior continued. However, from a convenience standpoint, cans should be easier to return than bottles, since they are lighter and require less space. In addition, since cans may be returned even in a damaged condition, it will be relatively easy for scavengers to collect cans from waste or litter. Thus, while it is possible that a greater proportion of cans than bottles would be discarded by the initial consumer, it is also possible that the can return rate could be higher than the bottle return rate. With this background, the assumptions used in the illustrative scenarios—80 or 90 percent returns—seem to fall within a reasonable range of future (1982) expectations. Any return rate from zero to infinity can be found using the parametric curves. However, the parametric curves presented in the study tie the can and bottle return rates together, under the assumption that the consumer or scavenger will generally return either container at approximately the same rate.

(3) Can Market Share—By 1982 the can market share is projected to be 59 percent. With the imposition of a deposit law, and the likely (and assumed for this report) demise of nonrefillable bottles, the can market share could either rise or fall. Nonrefillable bottle consumers may switch to purchasing cans. This could lead to continued growth in can sales. In addition, since can makers and beverage producers currently have a large capital investment in equipment dedicated to handling cans, the bulk of which cannot be shifted to other uses, they will no doubt face significant incentives to maintain the can as a competitive container in the beverage market. Arguing for a lower can share is the fact that the imposition of a deposit will require can consumers to incur either some new inconvenience by returning cans or dispose of the cans, thus forfeiting the deposit and paying a higher price. This might lead to reductions in the can market share. However, since consumers perceive cans as having some unique attributes (safer and lighter than bottles), total or near total elimination of the can will probably not occur.

Based on the foregoing it has been assumed in the two illustrative scenarios that the can volumes stop growing after legislation: for scenario 1, can sales fall to the 1976 can volume, while for scenario 2 can volume falls to half the 1976 level. This represents a decline of 29 and 65 percent respectively from the projected 1982 levels without a deposit law. In any event, using the parametric curves any can market share from zero to 100 percent may be examined.

6.2 Technical reasons for impact

In developing any particular scenario (the two scenarios used are illustrative) the reader must keep in mind the basic assumptions used in this study. These are:

1. Beverage markets are reasonably competitive.

2. Cans and bottles will be returned at the same rate.

3. The current prices of beer and soft drinks by container reflect the actual costs of each plus a normal return on investment.

4. The relative shares of the can market for steel or aluminum containers will be unaffected by the imposition of a deposit law.

5. The market share represented by nonrefillable bottles will fall to zero after a deposit law.

6. All returned containers will be either recycled or reused, as appropriate.

Combining these assumptions and the specific behavioral responses assumed for the illustrative scenarios yields the following results (table 1 presents the complete results).

6.3 Illustrative scenario 1

Behavioral response assumed: The 1982 quantity of can sales equal 1976 can sales; cans and refillable bottles are both returned at a rate similar to the current average return rate for refillable bottles; 0.9 for refill-

able bottles (this return rate implies a trippage of 10 for refillable bottles). Using the parametric curves, the resulting impact of these assumptions on energy, capital, employment and labor can be found.

Energy: Consumption would be reduced about 168 x 10^{12} Btu annually or 81,000 barrels of oil equivalent daily, compared with 1982 projections of energy use without deposit legislation. This savings is equal to 44 percent of the energy that would have been used by the beverage industry.

Capital: Requirements would be increased by $824 million. This is an increase of 11 percent over capital needs without deposit legislation.

Labor: Employment increases of 156,000, primarily in beverage distribution and retailing, and decreases of 38,000 in containers and metals manufacturing for a net increase of 118,000 jobs. This represents an increase of 32 percent in total employment for the beverage related industries. Total labor income increases by $879 million or 22 percent. This smaller income gain is due to the slight reduction in average earnings per employee since the jobs gained are generally less skilled and lower paying than those in the original job structure.

6.4 Illustrative scenario 2

Behavioral response assumed: The 1982 quantity of can sales falls to one-half of the 1976 sales level; cans and refillable bottles are both returned at a 0.8 return rate (this implies an equivalent trippage of five, about one-half the current refillable bottle trippage rate).

The parametric curves can be used to determine the impacts of this illustrative scenario. The results are displayed in table 1.

TABLE I.—SUMMARY OF THE NET ENERGY AND ECONOMIC IMPACTS OF MANDATORY DEPOSITS: ILLUSTRATIVE SCENARIOS, 1982

	1982 baseline value	Scenario 1 (canned beverage sales equal to 1976 value: container return rate of 0.9)[1]	Scenario 2 (canned beverage sales equal to ½ of 1976 value: container return rate of 0.8)[1]
Beverage consumption rate: 10 oz annually	1,893.5	−3.6	−3.5
Container production rate:			
10^6 units annually	50.6	−33.6	−48.6
Glass containers	18.0	−12.2	−1.6
Refillable	2.4	+3.4	+14.1
Nonrefillable	15.7	−15.7	−15.7
Cans	72.5	−21.3	−47.0
Steel	42.0	−12.8	−27.5
Aluminum	30.5	−8.4	−19.5
System energy requirements:[2] 10^{12} Btu annually	383	−168	−144
System capital requirements:[2] 10^6 dollars	7,303	+824	+2,006
System labor requirements:[2]			
Net employment 10^6 jobs	369	+118	+117
Jobs gained	NA	156	166
Jobs lost	NA	38	49
Labor earnings 10^6 dollars annually	4,080	+879	+936

[1] The values reported in this column represent deviations from the baseline trends reported in the 1st column.
[2] Major direct and indirect industries.
NA—Not applicable.

Source: Research Triangle Institute.

Capital: Requirements would be increased by slightly more than $2 billion.

Labor: Employment increases by a net 117,000 jobs (increases of 166,000 jobs and decreases of 40,000). Total labor income increases by $936 million.

The impacts described have their basis in the assumptions and behavioral responses assumed. The following short discussion represents the reasons and logical format that yield these results. This same process should be followed to examine and evaluate the impacts obtained from any scenario taken from the parametric curves.

Energy—In the case of the illustrative scenarios, energy savings are due to the increased use of refillable bottles and in the recycling of cans. Reuse of bottles avoids the raw material extraction and processing stages of production, as well as the materials and container-fabrication stages. Energy savings are also obtained from recycling metal since recycling bypasses the raw materials extraction and processing stages and lowers energy needs in the refined materials processing steps. This is of particular significance in the case of aluminum cans.

Capital—In the case of the illustrative scenarios, increased capital needs are due to additional space and handling required to return containers as well as the fact that refillable bottle lines are more expensive per unit of output.

Labor—In the case of the illustrative scenarios, additional labor is required at the retail and the beverage producer and distributor level, both to handle and transport returned containers.

6.5 Sensitivity of Results

Although the parametric curves can be used to examine the sensitivity of the impact of a deposit law across the total range of market response, it is convenient to use the two illustrative scenarios to highlight the sensitivity of the impacts to large perturbations in the market response.

With the exception of capital, all of the impacts are inelastic with respect to market responses in the range of the illustrative scenarios. For a 50 percent change in the can share of the market and a 50 percent change in the trippage (the market response changes going from illustrative scenario 1 to illustrative scenario 2), the energy impact changes only 14 percent, the jobs gained change only 6 percent, the jobs lost change 29 percent, the net jobs gained change 1 percent and the net labor earnings change 6 percent. The major shift is in capital requirements which change 143 percent. There is, however, no a priori basis for assuming that any particular scenario will in fact occur, which is why the parametric curves have been developed, allowing for the identification and examination of other scenarios.

It is apparent that within this broad range of potential market responses the impact of a deposit law on energy and labor is relatively constant.

7.0 Qualifications

In evaluating the conclusions of this research, the reader should keep in mind that the beverage production and distribution system is very complex and that packaging has a critical effect on the system. Any attempt to describe the system in terms of only three markets each for beer and soft drinks (the refillable bottle, nonrefillable bottle, and metal can markets), as is done in this study, is bound to ignore many factors that will influence the final set of impacts obtained if mandatory deposit legislation is enacted on a national scale. Furthermore, the set of impacts analyzed in this study, while it includes some of the more important issues, does not necessarily provide the complete set of impacts required for a comprehensive cost-benefit evaluation of mandatory deposits. Nevertheless, the material presented can provide an important input to an informed decision-making process.

FLIP-TOP HAZARDS

Mr. HATFIELD. Mr. President, I now ask unanimous consent that two articles which discuss the impacts of flip tops on the health of humans and wildlife be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Journal of the American Medical Association]

ALUMINUM "POP TOPS" A HAZARD TO CHILD

(By John D. Burlington, M.D.)

In a 3½-year period, seven children have been treated for complications of ingestion or aspiration of pull tabs from aluminum beverage cans. One child died from a fistula between the esophagus and a branch of the aortic arch, and two children suffered esophageal perforation with local abscess formation. Since aluminum absorbs X-rays poorly, the pull tabs cannot be seen in frontal projection if they overlie vertebral bodies. Any toddler with unexplained alteration of feeding habits or persistent respiratory symptoms requires evaluation for an aspirated or ingested foreign body. (JAMA 235:2614–2617, 1976).

Physicians have been alerted by Alexander et al.[1] Glass and Goodman, and others to suspect esophageal foreign bodies in children with unexplained respiratory symptoms. Radiopaque objects are easily detected by routine roentgenographic examination of the neck and mediastinum, but radiolucent objects still go undetected. The advent of radiolucent plastic toys that are frequently included in breakfast cereal or popcorn as "prizes" has produced a substantial number of esophageal obstructions and perforations in children. To this list of child health hazards producing esophageal obstruction with radiolucent objects, we must now add the ubiquitous metal strips removed from "pop top" beverage cans. These shiny pieces of metal, which litter the ground of parks and picnic areas, prove irresistible to curious toddlers or children crawling in the grass. They place the attractive new objects into their mouths and all too frequently swallow or aspirate them. While many pull tabs undoubtedly pass undetected through the gastrointestinal tract, this report outlines the case histories of seven children in whom they lodged in the esophagus or were aspirated into the airway. In none was the ingestion witnessed or suspected. Six of the children survived their encounter, but one bled to death from erosion of the pull tab through the esophagus into a branch of the innominate artery.

REPORT OF CASES

Case 1.—A 13-month-old boy was brought to his pediatrician because of a two-week history of inability to take any table food or other solids. He had been able to drink liquids up until four hours prior to being seen. At that time he was unable to swallow his saliva. Chest roentgenograms demonstrated a column of food and air bubbles extending upward from the level of the aortic arch. He underwent esophagascopy under general anesthesia and a large amount of food was removed from the upper portion of the esophagus. A sharp metal strip from a pop top lying at the base of the food column was removed through the esophagoscope. There were local ulcerations in the esophagus, but no evidence of perforation. His recovery was uneventful, and no stricture or other complication developed.

Case 2—An 11-month-old boy was seen because of high fever, difficult respiration, and inability to swallow liquids. On admission to the hospital, his temperature was 40 C rectally, and he was extremely ill. A chest reoentgenogram showed mediastinal widening and fluid in the left hemithroax. Aspirated fluid showed mixed flora on Gram stain and yielded a mixture of Gram-positive and Gram-negative organisms. After 12 hours' chest drainage, rehydration, and infusion of intravenous antibiotics, he remained extremely ill. A limited barium swallow ex-

Footnotes at end of article.

amination showed considerable distortion of the upper third of the esophagus in the region of the thoracic inlet and extravasation of contrast material into the mediastinun. After further rehydration, he underwent a right thoractomy and exploration of the upper esophagus. The region between the aortic arch and the thoracic inlet was densely fibrotic, and an abscess cavity continuous with the esophagus contained a free-floating metallic strip from a pop top. The stiff and inflamed edges of the esophageal perforation were loosely approximated with interrupted sutures of 4/0 wire. Large anterior and posterior chest tubes were placed in the right portion of the chest, with the tips near the area of perforation. A Stamm gastrostom was placed for alimentation, and a sump catheter was inserted into the nasopharynx to minimize passage of saliva down the esophagus.

The esophageal closure leaked a small amount of saliva from the third through the seventh day but ultimately sealed completely. On the ninth day, the tube in the left side of the chest was removed, and on the tenth and 14th days the tubes in the right side of the chest were removed. A rather long stricture from the thoracic inlet to the region of the aortic arich developed, which required several dilations starting one month after his original surgery. After five dilations, the esophagus assumed approximately normal caliber, and he had no further difficulties in swallowing. The gastrostomy tube was removed approximately nine months after the original operation and two months after his last dilation.

Case 3.—A 4-month-old infant was admitted because of a coarse, hacking cough and wheezing respirations. The initial diagnosis of croup or epiglottitis could not be confirmed by lateral roentgenograms of the airway. When his symptoms worsened, he underwent laryngoscopy before an endotracheal tube was passed to relieve his airway obstruction. Wedged between the vocal cords was a rolled-up metallic portion of a beverage can top. This was removed with forceps, and an endotracheal tube was passed into his airway. Forty-eight hours later, the endotracheal tube was removed, and he had no further difficulties.

Case 4.—A 2-year-old boy was seen for a history of difficulty in swallowing for at least one year. He supposedly had had several normal barium swallow examinations, although our initial study showed a distortion of the esophagus in the portion between the thoracic inlet and the aortic arch. There appeared to be deviation of the esophagus to the left and an apparent diverticulum or duplication of the esophagus extending to the right. Fluoroscopy showed the entire area somewhat stiffened, and peristalsis was abnormal.

An exploratory operation was performed after esophagoscopy showed only the deviation and stiffening of the esophagus. Through a right thoracotomy, the upper portion of the esophagus was mobilized, although it was deeply encased in scar. To the right and posterior portion of the esophagus lay a fairly, large abscess cavity in which a pull tab was lodged, surrounded by pus and old food. There was no mucosal lining, but at operation it was not possible to differentiate a perforation with abscess formation from the diverticulum that had become a repository for the metal strip and food.

The cavity was excised as much as possible, and the esophagus was closed primarily with interrupted sutures of 4/0 wire. A large chest tube was left in place, with its tip near the suture line, and a sump catheter was placed in the nasopharynx. A small amount of salvia was present in the chest tube from the second to the fifth day, although a diatrizoate megiumine swallow examination performed on the tenth day showed no further leakage. The chest tube was consequently removed, and he required four dilations of a long stricture that occurred in the region of the perforation. This slowly resolved, and although his follow-up has been sporadic, he has remained asymptomatic.

Case 5.—An 11-month-old boy was brought to the emergency room about one hour after onset of an episode of coughing and intermittent cyanosis. This had begun during a family picnic at a public picnic ground. On admission to the hospital, he had coarse breath sounds and marked dyspnea. Chest roentgenogram, including inspiratory and expiratory x-ray films to rule out a foreign body, were all interpreted as normal. He was placed in mist and given postural drainage and bronchial dilators without relief. On the following morning, he underwent bronchoscopy, and the metallic tab of a pop top was removed from the region of the carina. His convalescence was uneventful.

Case 6.—A 13-month-old girl appeared in the emergency ward, unable to swallow her own saliva. Chest roentgenograms showed mediastinal widening, with a tiny amount of fluid in the left of the chest. A diatrizoate mellumine swallow examination showed complete obstruction of the esophagus at the level of the aortic arch but not extravasation of contrast material. After eight hours of rehydration and infusion of intravenous antibiotics, she underwent esophagoscopy and had a large amount of old food removed from her esophagus. After the food had been removed, it was not possible to pass the esophagoscope through a narrow portion of the esophagus. This scope was removed and a 3½ F bronchoscope inserted. Through the telescope, a small metallic foreign body could be identified deeply embedded in granulation tissue. At this point, the endoscopy was discontinued, and the patient was returned to the recovery room.

On the following day, with two units of cross-matched blood on hand and with thoractomy instruments in the operating room, the endoscopy was repeated, and the metallic foreign body was removed uneventfully. There was a small amount of bleeding but no evidence of perforation. She was watched carefully in the intensive care area for 48 hours, with a nasopharyngeal sump tube in place, while receiving intravenous fluids and antibiotics. After 48 hours, the diatrizoate meglumines study was repeated and showed a small but distorted lumen in the esophagus and no extravasation of contrast material. By the fourth day, she was afebrile, and her vital signs had returned to normal. She then began a diet of clear liquids and advanced to a soft diet over the next 48 hours.

Two weeks later, she was admitted because of inability to swallow her saliva, and on examination she had food impacted above a stricture in her esophagus. The food was removed through an esophagoscope, and a filiform dilator was passed through the area of the stricture. The filiform dilator was followed with dilators up to 12 F. and then a No. 8 polyethylene feeding catheter was inserted through the nostril into her stomach. She received tube feedings for approximately one week and then underwent an esophageal dilation again. Over the next three months, the stricture slowly softened, and she required no further dilations. She is now asymptomatic.

Case 7.—An 11-month-old boy had been seen in several different emergency rooms over a period of ten days because of noisy breathing and diminished intake of food and liquid. Numerous chest roentgenograms were taken, including a study of the entire airway from nasopharynx to mainstem bronchi. These were interpreted as normal. On the day of admission, he had passed several tarry stools, and his hematocrit reading dropped from 36 percent to 14 percent. Transfusion with packed red blood cells in the intensive care area raised his hematocrit reading to 25 percent. After six hours of stable vital signs, he suddenly became ashen, his blood pressure dropped to unobtainable levels, and bradycardia developed. Resuscitation required 450 ml of saline and 250 ml of packed red blood cells, approximately one blood volume for this 10-kg child, administered over approximately 25 minutes. When his resuscitation was complete, he began to vomit large volumes of bright red blood, and his abdomen distended rapidly.

With a preoperative diagnosis of upper gastrointestinal bleeding probably originating from the stomach, he was taken to the operating room. Rapid exploration of his stomach and the duodenum showed blood to be welling up from the esophagus. Examination of the lumen of the esophagus showed no evidence of mucosal tears suggestive of a Mallory-Weiss syndrome of esophageal varices. A sterile proctoscope inserted in the distal portion of the esophagus showed only that bright red blood was gushing down from above. The incisions were closed with a single running suture. The patient underwent esophagoscopy from above but bleeding was so brisk that no information was obtained.

Through a left thoractomy, the distal portion of the esophagus was freed up from the diaphragm to the arch of the aorta. An umbilical tape tied about the esophagus just below the aortic arch showed that the bleeding was coming from above. The upper portion of the esophagus between the thoractic inlet and the aortic arch was then freed up, and external compression here demonstrated that the bleeding was from behind the aortic arch. The portion of the esophagus below the arch was opened linearly, and with a finger in the esophagus, bleeding could be temporarily tamponaded by pressing upwards against the aortic arch. During the hurried dissection of the aortic arch in an attempt to control bleeding, blood loss exceeded our ability to replace it, and the patient lost all vital signs. Each time the patient was resuscitated the massive bleeding recurred, and after 20 minutes he had fixed, dilated pupils, so further efforts were abandoned.

At postmortem examination, there was a deep ulceration within the esophagus that conformed exactly to the metallic tab of a pop top. There was also a large perforation of the esophagus into the region of the aortic arch, although no direct communication could be demonstrated with the aorta. Presumably the sharp irregular tip of the metal strip had eroded through into one of the great vessels or perhars a bronchial vessel. The foreign body was not obtained from the gastrointestinal tract at the time of autopsy, although retrospective review of the chest roentgenograma taken several days before showed a metallic object in the esophagus behind the aortic arch that conformed in outline to a metal pull tab.

COMMENT

Thin strips of aluminum that become lodged in the esophagus are particularly difficult to detect roentgenographically unless they are looked for specifically.[3] Flat objects such as coins invariably become oriented transversely in the esophagus since this represents its greatest diameter.[4] In children, most objects that do not pass the esophagus become impacted at the thoracic inlet or above the aortic arch where the esophagus overlies the vertebral column. Thus, the outline of foreign bodies in this portion of the esophagus is projected over the image of the vertebrae in routine posteroanterior or anteroposterior chest roentgenograms.

Alexander et al have shown that absorption of x-rays by a substance is roughly proportional to its density. Thus, fat is less dense than water, and small shards of glass with a density of 2.4 to 2.8 may not be detectable roentgenographically when imbedded in tissue. Aluminum with a density of 2.7 has much the same radiodensity as glass, so that the pull tabs, which are made of aluminum 0.2 mm thick, show only a faint shadow on an ordinary roentgenogram. In the lateral projection, a pull tab in the esophagus presents 14 mm of aluminum in its greatest diameter, so that recognition should be facilitated. Viewing this portion of the esophagus without interference from projection of the arms and shoulders takes special effort in positioning the patient.

Since many of the ingestions or aspirations involving toddlers are not witnessed by an adult, the history obtained by the first physician to see the child may not suggest a foreign body. However, persistant respiratory symptoms and any change in eating habits should be evaluated by posteroanterior and lateral chest roentgenograms with inspiratory-expiratory views if indicated. The neck and nasopharynx should be included in all such examinations. If these are normal and there is no evidence of mediastinal abscess or free air, a contrast study of the esophagus using thickened barium will frequently show plastic, fish bones, or an aluminum foreign body lodged in the esophagus.

The metal strip from a pop top is usually bent into a hook shape as it is removed from the can. When the ring separates from the bent metal strip, it leaves a serrated edge and two sharp corners. Thus, if diagnosis is delayed, these sharp edges will perforate the esophagus and cause mediastinitis or erode into the mediastinal vessel. Safety pins lodged in the esophagus have caused aortic arch perforation and acute cardiac tamponade,[3] but since they are made of spring steel, they are more readily identified roentgenographically than are aluminum pull tabs. All parents must be cautioned about the hazard of discarded pull tabs just as they are now about the hazards of the open safety pin left within an infant's reach during a diaper change.

[From the Defenders of Wildlife, June 1975]

DEADLY THROWAWAYS—PLASTIC SIX-PACK BINDERS AND METAL PULL TABS DOOM WILDLIFE

(By Penny Ward)

A big brown pelican is cruising Florida's coastal salt flats hunting for food. He dives at a shadow in the water, snaps at it, and in a moment finds his prey choking him. It somehow wraps around his neck, then loops over his bill. In panic, the pelican flies back to his roost in the mangroves and claws at his adversary. Soon his foot is entangled. The pelican continues to fight, but in a little while he is dead, strangled by his mysterious antagonist.

The pelican mistook a plastic six-pack can binder for a fish. He became another wildlife victim of an unthinking and uninformed person, who probably tossed the plastic trash into the water without knowing it could harm a wild animal.

Wild creatures are beginning to suffer the fallout of our burgeoning solid waste litter. The "throwaway" beverage container is the chief villian. "No-deposit, no-return" litter grows about eight percent annually. Last year some three billion throwaways ended up on our roadsides and recreation areas. Even our most pristine reserves have become the final resting places for millions of easy-to-tote containers and their by-products, the flip-top pull-tabs and plastic six-pack binders.

While humans see this litter as an aesthetic blight, animals see it as a possible source of food. "The big problem with plastic can binders is that grazing and wading birds are curious and nibble or dive at them," says Frank Kenney, of the U.S. Fish and Wildlife Service. "They manage to tangle them over their heads, a foot gets involved, and they strangle in the ensuing fight."

The tame, curious brown pelican—already a candidate for the endangered species list—is among the most vulnerable to such entrapment. But many states have recorded similar deaths among other types of waterfowl. Aside from the pelican, the most common victims are gulls, ducks, and geese.

If entanglement doesn't strangle the bird, it may starve to death. Dr. Martin Wiley, a Maryland wildlife biologist, describes the plight of a seagull he saw in Chesapeake Bay. "The bird had the plastic rings jammed between the mandibles of his bill and stretched over the back of his head. He could fly, but of course he couldn't eat. I watched him for days but couldn't get close. I knew he was doomed."

Some entangled animals may be able to function, but they become social outcasts. Michigan biologists found a Canada goose with plastic rings merely threaded loosely over his neck. Though he was healthy, the rest of the geese on the lake picked on him unmercifully. The gander was eventually caught and the rings removed, but it was too late to solve his marital problems. His mate and goslings had found the trash decoration so bizarre that they had abandoned him.

Small birds have similar problems with the little pull-tab rings from beverage cans. Some species find them attractive as nesting materials. A member of Washington, D.C.'s Audubon Naturalists Society tells of a cardinal found dead with a pull-tab ring jammed over its face. She thinks that the bird was partially blinded and died of exposure or exhaustion.

These sparkling little rings are also attractive to fish—in fact, some fishermen use them as spinners ahead of bait. Biologists in Michigan and California have discovered fingerling trout girdled by pull-tab rings. They theorize the fish struck at the shiny rings, missed, shot through and got stuck. In both cases the trout were about six inches long. Miracles of growth, the fish were still quite active when discovered, though the rings were slowly cutting their bodies in half.

Bigger fish sometimes swallow the rings, which they perceive as food or as aggravating intruders in their territories. Pull-tabs are occasionally discovered by sportsfishermen in the stomachs of panfish, trout, salmon, and other fish which "strike," as opposed to bottom feeders which "taste." The ring may just ride along harmlessly inside the fish, but if pushed into the digestive tract, it can fatally lacerate or impact the system. (Interestingly, major hospitals across the U.S. report pull-tabs showing up in human stomachs, inadvertently swallowed by a person who'd dropped the tab into the can. They are difficult to detect by X-ray and often require major surgery to remove.)

All grazing animals domestic and wild, accidentally eat bits of trash. Ranchers who lease state or federal lands which permit public recreation are particularly concerned about the dangers litter poses to their herds—dangers often revealed during autopsy. E. P. Harvey, general manager of a large family ranch operation which includes five wildlife refuges in the Southwest, has for many years studied the problem. "Domestic animals will chew, taste, smell, and investigate all sorts of things," Harvey says. "They'll eat nails, pull-tabs plastic items, small can lids, wire, bones, and plastic bags." Harvey says that while ingested litter rarely kills an animal unless the object punctures the digestive tract or impacts the bowel, the trash diet leaves the animal in poor physical condition.

"We know a good deal about domestic animals ingesting harmful objects, but little about wildlife," Harvey says, "From observation, however, we know wildlife is interested in the same things as domestic animals, so we can assume the results are similar."

The beverage container itself—steel, aluminum, or glass—creates special hazards. Broken bottles and cans cripple livestock and wildlife. Horseback riders hesitate to ride in road ditches for this reason.

While wild animals are more alert and cautious than their domestic counterparts, rancher Harvey says that in some instances deer and antelope put their feet through beverage cans. When the hoof breaks through, the sharp edges can cut off the blood supply, crippling the animal or causing an open wound. "The lameness may lead to death by predation or severe weather, or the wound can become the target of fatal insect infection."

Perhaps these litter-related tragedies don't comprise a major threat to wildlife, yet the examples recorded are only the tip of the iceberg. The incidents are symptoms of a deteriorating environment. The condition of our wildlife is an index of the quality of our own lives.

A growing threat to animals, litter is already a plague to humans. Our wayside litter amounts to as much as four million tons per year, and we spent $200 million per year to retrieve it. About 35% of the total, 1.4 million tons, is made up of throwaway bottles and cans. And it compounds every day because glass and aluminum virtually never break down in the environment. The litter not only clutters our roadsides, but it defaces our most pristine areas. An outdoorsman who feels he's exploring an area where no one has trod is likely to find an empty beer can that dictates otherwise. Some remote backpacking trails glitter with bottles, cans, and pop tops.

Believing that what we can't see won't hurt us, some people have turned our lake and river bottoms into dumps. In 1972, Dan Carleson, a fishery biologist for the Oregon Game Commission, made a series of dives to survey the bottom of that state's serene and beautiful Diamond Lake. He found a underwater nightmare. Carleson calculated that the lake bottom was strewn with 44,500 empty beverage containers.

And Carleson could only count bottles and cans which were visible. Silt has a tendency to slowly bury its garbage. "We found that as our knees and swim fins sank into the ooze we bumped into a tremendous amount of litter that settled into the bottom," Carleson said. Commenting on Carleson's report, the editor of the Oregon Game Bulletin lamented, "It appears that at the rate we're going, Diamond Lake could become a landfill."

This garbage, settled into lake and stream bottoms, causes frequent injuries to swimmers and waders. It also presents road hazards to fish. Fish have accidents too, but they are seldom discovered or recorded. A few years ago a biologist for the Oregon Game Commission found a beer can containing about 50 dead hatchling trout in the Rogue River. He theorized the trout either were attracted by their blurred reflections in the metal, or perceived the dark hole in the can top as shelter. Once they followed the leader inside, they became lost in the crowded darkness and suffocated.

A fisherman at Oregon's Unity Reservoir last winter hauled out a three-pound rainbow trout wedged tightly in a broken beer bottle. And a Michigan fisherman hooked a

tormented 21-inch pike which was being slowly decapitated by a six-pack binder encircling its body.

Nowadays litter creates more than an aesthetic barrier between human beings and nature. It creates physical barriers in the forms of barbed wire, locked gates, and no-trespassing signs. The Pennsylvania Fish Commission reports, "Litterbugs are largely responsible for posting by private landowners along our streams and lakes." The story is the same in other states—more and more land is being closed to public access as landowners lose patience with those who litter their property.

Litter is the most obvious sin throwaways commit against our society; it isn't the greatest. More serious sins are the wanton waste of our energy and resources. Last year Americans used over 60 billion disposable beverage containers. The amount of electrical and fossil-fuel energy squandered in manufacturing these throwaways is staggering. According to studies based on 1972 figures—when we used eight billion fewer containers than last year—our throwaways cost enough energy to heat two million three-bedroom homes in the mid-Atlantic states for eight months. In other terms, the throwaways used enough energy to satisfy the annual electrical needs of 9.1 million people. In comparison to a returnable container system, in which a bottle makes about ten round trips between consumer and bottler, our throwaway system costs the equivalent of five million gallons of gasoline per day. That means, in effect, that the equivalent of 4½ ounces of gasoline is wasted in making each 12-ounce container. The figures for aluminum cans are more shocking still: To use an aluminum can, we waste the energy equivalent of more than half the can's capacity in gasoline.

In 1972 beverage container production required two million tons of steel, 6.2 million tons of glass, and 575,000 tons of aluminum. This use accounts for 45 percent of all glass and 8 percent of all aluminum production in the country, and is the biggest single demand on our glass and aluminum supplies. While world supplies of these resources are not critically short, we depend on foreign countries for 33 percent of our iron ore, and 84 percent of our bauxite. In these politically troubled times, such dependency is dubious.

The convenience of throwaways isn't free. Consumers pay the price. With a disposable container we actually pay three times. Once when we purchase it, once when we dispose of it, and once to have it laid to rest.

Beverages in throwaways are as much as 40 percent more expensive than drinks in returnable/refillable bottles. According to the beverage industry's own figures, 56 percent of the cost of a container of beer is the container itself. Americans spend about $1.5 billion per year for the throwaway luxury, but because of price-marketing procedures in many stores, they're not apt to be aware of it. For example, eight throwaway bottles of soda may be marked $1.61. Eight equivalent returnables may also be marked $1.61, but the consumer will get back 40 cents, or 25 percent of the purchase price, when he returns the bottles.

Even after it has been purchased, the throwaway keeps on costing. Once the beverage container is emptied, there it is—a throwaway to be thrown away. Beverage containers make up the most rapidly growing category of waste in the national trash can. They comprise about seven percent of the total of our garbage, second only to newspapers. (Garbage means solid waste thrown in trash cans as opposed to waste which becomes litter.) EPA projects that at current rates Americans will toss out 11.3 million tons of beverage containers in 1976. If the cost per ton to collect and dispose of solid waste remains stable, getting rid of all those bottles and cans will cost us nearly $200 million annually by the Bicentennial.

We are the world's leading garbage-producing nation. New York, for example, creates more garbage than London and Tokyo combined. While New York's' population rose only 1.5 percent since 1960, its garbage production rose 42 percent. We are running out of space for all that garbage. A 1973 survey by the National League of Cities revealed that nearly half our cities will run out of refuse landfill capacity by 1978.

The throwaway came to us about 15 years ago, in an age of opulence. Its initiation into society accompanied big gaudy cars and gasoline wars. The term energy shortage hadn't been coined. Our resources appeared never ending, and national environmental concern was still many years off.

But today big gaudy cans and gasoline wars have left the scene, and many people think the throwaway should be likewise. In recent years over 350 bills to regulate beverage containers have been introduced in Congress, or at state and local levels. Oregon, Vermont, and South Dakota already restrict throwaways. Several other states are close to passing bills. Scores of cities and counties have passed such legislation, which at all levels has been upheld in court tests.

The Oregon bottle bill was enacted in late 1972. It required a mandatory five-cent deposit on beverage containers, and banned pull-tab rings. Oregon's success with the bill prompted Republican Senator Mark Hatfield to introduce federal legislation requiring a mandatory deposit and banning of pull-tab rings. The bill (S. 613) would be phased in nationally over a three-year period.

Hatfield's bill is rapidly gaining support, but it is bitterly opposed by the steel, glass, aluminum, and container industries, along with soft drink bottlers and brewers. Fearing the inconvenience and possible loss in profits, these groups spend millions each year to fight container legislation.

The manufacturers say that such legislation will raise prices, lower consumption, create unemployment, and fail to reduce litter. Certainly the change would create initial logistical problems for industry. The net result, however, appears worth the effort. Oregon reports that beverage prices have risen since 1972—but they've risen everywhere, largely due to increased sugar prices. Oregon's beverage prices are in line with those of neighboring Washington state, which does not yet have a bottle bill. Beer and soft drink sales in Oregon continued to climb after the law was enacted. Significantly, Oregon also reports the shift to returnables resulted in a net gain in employment. While there was a shift in the types of jobs, the move created more total jobs in industries. In fact, Maryland's Council of Economic Advisors recently projected that if Maryland returned to returnables, there'd be a net increase of 1,500 jobs generating $18.5 million in personal income.

Both Oregon and Vermont report a heartening decrease in litter following container legislation. Oregon initially reported beverage container litter down 80 to 90 percent, and recently reported total litter has dropped as much as 46 percent. Lake Diamond may not become a landfill after all. Vermont's Agency of Environmental Conservation reports that even opponents of their bottle bill now agree that legislation has greatly decreased beverage-related litter along that state's roadsides.

The Vermont agency reports that the opposition attempted to cloud the litter reduction issue by counting containers placed in roadside trash receptacles along with highway litter, and comparing the tally with pre-bottle law statistics which counted only roadside litter. Despite statistical games, reason dictates people are much less likely to throw away something of specific value than something intended to be thrown away.

The industries opposing container legislation point to recycling and cleanup campaigns as alternatives. Recycling, however, does not yet offer sufficient monetary reward to be successful. Only half a cent is usually offered for cans, the more recyclable of the two container types. Only 15 percent of all aluminum cans made it back to recyclers last year. The statistics for glass are worse. There are only about 100 glass recycling centers in the entire U.S. Old glass is only worth about $20 a ton, and takes more money and energy to recycle. The expense and logistics of hauling materials in for recycling has dampened the volunteer enthusiasm which sprung out of Earth Day movements. In too many cases, cities and charity organizations which sponsored recycling campaigns wound up losing money.

Certainly recycling centers are growing as cities begin to realize there's money and energy in municipal trash. And recycling does save energy and resources. When the EPA examined the various energy requirements of nine beverage container systems, it found that the pull-tab aluminum can, with a 15-percent rate of recycling, was ranked ninth, the worst, for delivering 1000 gallons of beer. A returnable/refillable glass bottle system was ranked first.

Recycling is most valuable as a complement to a system which produces less waste in the first place. A return to returnables is in fact the ultimate in recycling. It places a significant rather than a token bounty on containers. A deposit container which is extravagantly discarded becomes someone else's nickel. And when a ten-trip returnable comes to the end of its journey, it can then be recycled.

Clean-up campaigns, like recycling, are also valuable follow-ups, but they will not eliminate litter by themselves. Two of the largest national campaigns are "Keep America Beautiful" and "Pitch In." KAB is sponsored largely by beverage container industries and their suppliers, along with retail food distributors and fast food chains. "Pitch In" is sponsored by the American Brewers Association. While any clean-up effort is to be praised, these industry campaigns are no more than we might expect from the initiators of the problem. And although both organizations claim to work toward litter reduction, they actually lobby against legislation to eliminate throwaways.

Industry argues that litter is a behavioral problem which can be solved through education. Yet it's difficult to imagine anyone who has not been exposed to antilitter propaganda. In fact, containers themselves now bear a message reading "Please Don't Litter." But the problem increases. Without nipping waste production in the bud, our litter problem won't go away.

Proponents of beverage container legislation are winning inch by inch. Several recent surveys at both state and national levels indicate that citizens overwhelmingly favor returning to returnables. Their chances of doing so voluntarily are slim, since in most areas very few beverages are available in returnable bottles.

Although concerned citizens view container legislation at state and local levels as a step in the right direction, they believe the most logical and desirable legislation is Hatfield's Senate Bill 613. A federal law would create national uniformity and eliminate a series of drawn-out battles. In the minds of many, it's an idea whose time has come.

Opponent industries will suffer some pains as a result of change, but it's difficult to

imagine that these corporate giants won't land on their feet. Manufacturers might well do better to spend time and money on positive efforts to facilitate the move to a returnable system. They could create a short, squatty space-saving bottle, standardized for use by more than one distributor. The label would still identify the product, and the standardization would solve sorting and distribution problems.

Several franchise bottlers have recently voluntarily switched to returnables, and realized increases in sales and profit. Joyce Beverages in Chicago made the switch in 1973. During the first year, sales of Joyce's Orange Crush were up 87 percent.

A 7-UP bottler recently stated in a beverage industry newsletter, ". . . if by our own volition, we got rid of the pull-top can and throwaway bottles, we'd make fortunes. While at corporate levels beverage industries still reject the idea, local franchised pioneers of the switch are pleased with the results.

It's unlikely many of us will resent the switch to returnables, given what we've to gain. This is, after all, the only planet we have. Its condition is a good index to the quality of our lives. Our fellow creatures—the birds, animals, and fish—must rely on our intelligence and rational behavior to protect their world and ours.

Mr. HATFIELD. In conclusion, Mr. President, I would like to offer a quote from the industry's own publication, Beverage World:

The returnable system is proving to be the energy saver and litter deterrent that the environmentalists preached it would be.

It is my hope that the 97th Congress will show the courage to pass this bill. We can no longer afford to continue our waste ethic. I ask that the Beverage Container Reuse and Recycling Act appear at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD as follows:

S. 709

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Beverage Container Reuse and Recycling Act".

FINDINGS AND PURPOSES

SEC. 2. Congress finds and declares that:

(1) The failure to reuse and recycle empty beverage containers represents a significant and unnecessary waste of important national energy and material resources.

(2) The littering of empty beverage containers constitutes a public nuisance, safety hazard, and esthetic blight and imposes upon public and private agencies unnecessary costs for the collection and removal of such containers.

(3) Empty beverage containers constitute a significant and rapidly growing proportion of municipal solid waste, disposal of which imposes a severe financial burden on local governments.

(4) The reuse and recycling of empty beverage containers would eliminate these unnecessary burdens on individuals, local governments, and the environment.

(5) A uniform national system for requiring a refund value on the sale of all beverage containers would result in a high level of reuse and recycling of such containers.

(6) A national system for requiring a refund value on the sale of all beverage containers would result in significant energy conservation and resource recovery.

(7) A national system for requiring a refund value on the sale of all beverage containers would be anti-inflationary and help create jobs in areas of commerce.

(8) A national system for requiring a refund value on the sale of all beverage containers would be inexpensive to administer because of its self-enforcing nature.

DEFINITIONS

SEC. 3. For the purpose of this Act the term:

(1) "beverage" means beer or other malt beverage, mineral water, soda water, or a carbonated soft drink of any variety in liquid form and intended for human consumption;

(2) "beverage container" means a container designed to contain a beverage under pressure of carbonation;

(3) "refundable beverage container" means a beverage container which has clearly, prominently, and securely affixed to, or printed on, it (in accordance with section 4) a statement of the amount of the refund value of the container;

(4) "consumer" means a person who purchases a beverage in a beverage container for any use other than resale;

(5) "distributor" means a person who sells or offers sale in commerce beverages in beverage containers for resale;

(6) "retailer" means a person who purchases from a distributor beverages in beverage containers for sale to a consumer or who sells or offers to sell in commerce beverages in beverage containers under pressure of carbonation to a consumer. The Administrator shall prescribe such regulations as may be necessary to establish what person is a retailer with respect to the sale of beverages in beverage containers under pressure of carbonation to consumers through beverage vending machines;

(7) "Administrator" means the Administrator of the Environmental Protection Agency;

(8) "commerce" means trade, traffic or transportation—

(A) between a place in a State and any place outside thereof,

(B) within the District of Columbia or any territory of the United States, or

(C) which affects trade, traffic, commerce, or transportation described in subparagraph (A) or (B); and

(9) "State" means a State, the District of Columbia, the Commonwealth of Puerto Rico, or any territory or possession of the United States.

REQUIRED BEVERAGE CONTAINER LABELING

SEC. 4. No distributor or retailer may sell or offer for sale a beverage in a beverage container under pressure of carbonation unless there is clearly, prominently and securely affixed to, or printed on, it (in accordance with regulations prescribed by the Administrator) a statement of the amount of the refund value of the container, such amount being not less than 5 cents.

RETURN OF REFUND VALUE OF BEVERAGE CONTAINERS

SEC. 5. (a)(1) If a consumer tenders for refund an empty and unbroken refundable beverage container to a retailer or distributor who sells (or has sold at any time during the period of three months ending on the date of such tender) a brand of beverage which was contained in the container, the retailer or distributor respectively shall promptly pay the consumer the amount of the refund value stated on the container.

(2) If a retailer tenders for refund an empty and unbroken refundable beverage container to a distributor who sells (or has sold at any time during the period of three months ending on the date of such tender) a brand of beverage which was contained in the container, the distributor shall promptly pay the retailer (A) the amount of the refund value stated on the container, plus (B) an amount equal to two cents (2 cents) per container to help defray the retailer's cost for handling. This payment may be adjusted by the Administrator, following evaluation and public comment, to reflect the true cost of handling beverage containers.

(b) The opening of a refundable beverage container in a manner in which it was designed to be opened and the compression of a metal refundable beverage container shall not, for the purposes of this Section, constitute the breaking of the container if the statement of the amount of the refund value of the container is still readable.

RESTRICTION ON METAL BEVERAGE CONTAINERS WITH DETACHABLE OPENINGS

SEC. 6. No distributor or retailer may sell or offer for sale a beverage in a metal beverage container a part of which is designed to be detached in order to open such container.

PREEMPTION OF STATE AND LOCAL LAW

SEC. 7. (a) Except as otherwise provided in this Section, no State or political subdivision thereof may establish or continue in effect any law respecting a refund value of beverage containers sold with a beverage under the pressure of carbonation to the extent the Administrator determines the law is inconsistent with this Act.

(b) No State or political subdivision thereof may, for the purposes of determining the amount of any tax imposed by such State or subdivision on the sale of any refundable beverage container, take into account any amount charged which is attributable to the refund value of such container.

(c) Subsection (a) does not prevent a State or political subdivision thereof from establishing or continuing in effect any law respecting a refund value on containers other than for beverages.

PENALTIES

SEC. 8. Whoever violates any provision of Section 4, 5(a), or 6 shall be fined not more than $1,000 for each violation.

EVALUATION AND TECHNICAL ASSISTANCE

SEC. 9. The Administrator shall monitor, before and after the effective dates of Sections 4(a) and 6, the rate of reuse and recycling of beverage containers, and shall evaluate and report to Congress annually at the end of the first four years after the date of the enactment of this Act thereafter as the Administrator sees fit on the impact of the provisions of this Act on—

(1) conservation of energy and material resources;

(2) resource recovery and the reduction of solid waste and litter; and

(3) the economy.

CONSULTATION ON EMPLOYMENT DISLOCATION

SEC. 10. The Administrator shall advise and consult with the Secretary of Labor on steps that the Secretary might take, through existing authorities, to identify and provide assistance to individuals whose employment may be adversely affected by this Act.

EFFECTIVE DATES

SEC. 11. (a) Except as otherwise provided in subsections (b) and (c), this Act shall take effect on the date of its enactment.

(b) The provisions of Sections 4, 5, and 7 shall apply with respect to beverage containers sold or offered for sale in interstate commerce on or after two years after the date of enactment of this Act.

(c) The provisions of Section 6 shall apply with respect to beverages in beverage containers sold or offered for sale in interstate commerce on or after one year after the date of enactment of this Act.

(d) The provisions of Section 7(a) shall preempt State and local laws to the extent to which they are inconsistent with provisions of this Act only on and after the respective effective dates of such provisions.

By Mr. DURENBERGER (for himself, Mr. BOREN, Mr. CHAFEE, Mr. DANFORTH, and Mr. PERCY):

S. 710. A bill relating to a Fishing Tackle Excise Tax; to the Committee on Finance.

FISHING TACKLE EXCISE TAX

Mr. DURENBERGER. Mr. President, it is an honor and a privilege as the senior Senator from Minnesota, the land of 10,000 lakes (actually closer to 15,000 for you geography buffs), to rise today to introduce the fishing tackle excise tax deferral bill. It is a pleasure to have Senator BOREN of Oklahoma, a land of somewhat fewer lakes but which still has some mighty fine fishing, as a cosponsor of this legislation. This bill would change the date of the collection of the excise tax on fishing tackle.

Presently, fishing tackle manufacturers voluntarily pay an excise tax on the rods, reels, artificial lures, creels, et cetera, they produce. The moneys collected go to the Federal aid to fish restoration program, commonly known as the D–J fund, which is used for a variety of environmental purposes. The manufacturers agree wholeheartedly with the uses of the tax but would like to see a more balanced schedule of collections.

This industry is highly seasonal but tries to maintain a consistent level of employment by granting dating terms to vendees. The vendees tend to be small bait and tackle shops, which pay the manufacturers after they have sold the fishing tackle. Payment occurs on an average of 4.4 months after the time of shipment.

Treasury Department regulations require a manufacturer to deposit the excise taxes on a semimonthly basis 9 days after the close of the period involved if total tax liability exceeds $2,000 for any month in the preceding calendar quarter. The fishing tackle manufacturers, who are 97 percent small businesses, must arrange expensive short-term financing to cover these taxes until the vendees send payment.

Virtually all of the fishing tackle manufacturers support the tax. It is the schedule of collections that is so burdensome. The original 10-percent excise tax was passed with the manufacturers' support in 1952 and reendorsed in 1964.

The D–J fund has provided $279 million to the States for conservation and fish restoration. Those funds have allowed State fish and wildlife agencies to construct 264 new lakes, develop new management techniques, protect fish from various pollution sources, and provide public access to 777,000 acres of lakes and habitats. Obviously, the industry has enlightened self interest in preserving our natural environment that meshes with the public good.

It is also in the public good for employers to provide stable, year-round jobs. The present Treasury regulations encourage highly seasonal employment causing disruptions in the lives of many individuals and unemployment costs that are avoidable.

The bill I have proposed today would defer the payment of this excise tax for a maximum of 180 days and a minimum of 90 days. All excise tax payments would be due and payable at the end of the quarter immediately following the quarter when shipment was made except for the fourth quarter shipments for which the excise tax will be paid as usual in order to avoid any revenue or budgetary effects on the D–J program.

The Government will lose only minimal interest income on this proposal, but it is much more equitable to those who voluntarily pay this tax to move toward regulatory reform. In fact, the Regulatory Flexibility Act directs us to find ways to reduce Government regulation of small business. This is a classic case where we can apply that principle. The alternative is to watch the economic burden mount on these small business people, their employees and then on the thousands of bait and tackle shops served by this industry. I urge you to join me in supporting this measure.

I ask unanimous consent that the bill be printed in full in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 710

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That a bill to amend Section 6302 (relating to mode or time of collecting tax) by redesignating subsection (d) as subsection (e) and by inserting after subsection (c) the following new subsection:

"(d) Time for Payment of Manufacturers Excise Tax on Rods, Creels, etc. The tax imposed by section 4161(a) (relating to manufacturers excise tax on rods, creels, etc.) shall be due and payable.

"(1) in the case of articles sold during the quarter ending December 31, on March 31,

"(2) in the case of articles sold during the quarter ending March 31, on June 30,

"(3) in the case of articles sold during the quarter ending June 30, on September 24, and

"(4) in the case of articles sold during the quarter ending September 30, at such time as the Secretary may by regulations prescribe."

Effective Date. The amendment made by subscription (a) shall apply to articles sold on or before the first day of the first calendar quarter beginning after the date of the enactment of this act.

By Mr. DURENBERGER:

S. 711. A bill to amend the Internal Revenue Code of 1954 to provide for inflation adjustments; to the Committee on Finance.

ADJUSTMENTS TO TAX RATES TO PROVIDE FOR INFLATION

Mr. DURENBERGER. Mr. President, today I am introducing a bill to take inflation out of the Internal Revenue Code by indexing the individual income tax, the capital gains tax, and corporate income tax brackets and depreciation at 85 percent of the Consumer Price Index.

Tax indexing is nothing more than a windfall profit tax on the Federal Government. It proceeds from the philosophy that any windfall created by inflation should remain with the taxpayer as a buffer against rising prices, rather than passing to the Federal Government. And this is a sound philosophy.

Under the pressure of double-digit inflation, the present tax system has demonstrated built-in inequities and an inherent tendency to fuel the inflationary cycle. Individuals receiving cost of living wage increases are penalized by a tax system that simply thrusts them into higher brackets, and often suffer actual losses in real dollar purchasing power.

For example, suppose a single worker earned $20,000 taxable income in the year of the last tax cut, 1979. If the inflation rate continues at about 10 percent and the worker receives an annual cost-of-living adjustment, he or she will be making almost $52,000 in 1989. However, to match the aftertax purchasing power of the 1979 income, the worker would need a salary of $68,000 because "bracket creep" has pushed him or her into a much higher tax bracket. Even though annual cost-of-living adjustments kept pace with inflation, our progressive tax rates have pushed the worker into a much lower standard of living. The Federal Government, meanwhile, has collected a $16,000 windfall.

Lower income families suffer disproportionate tax increases because of the erosion of the personal exemptions and standard deduction—the mechanisms for protecting the lowest income taxpayers.

Without indexing, the present tax system guarantees progressive erosion of real income, as it spurs inflationary psychology. Taxpayers end up falling behind the rise in living costs, forcing them to rob their savings and investments to feed, clothe, and shelter their families. Since 1965 the average worker has had no increase in real aftertax spendable earnings. Extra effort is taxed at record rates. Workers have substituted leisure, early retirement, and nontaxable fringe benefits for added work and added pay.

Our so-called tax cuts in recent years have not kept pace with inflation, especially if we include social security taxes. The marginal taxes taken out of each cost-of-living increase have reached amazing levels. Even middle-income taxpayers now face tax rates of 40 to 50 percent on each additional dollar earned.

These so-called tax cuts have been an election year vote-getting ploy. President Reagan's 3-year program of tax cuts, which I cosponsored, takes away this political tool. In fact, the President's program removes that tool of incumbents for two election-year cycles, 1982 and 1984.

Permanent tax reform through indexing eliminates this vote-getting ploy for good. And permanent tax reform is desperately needed in our country. More than anything else, we need to build some predictability into our tax system, and the bill I am introducing today would do this. If we had had such predictability over the last 20 years, we would not have the economic problems we have today.

In the absence of indexing, the tax system inevitably makes Government the prime beneficiary of inflation. For each 1 percent rise in the Consumer Price Index, Federal tax receipts rise by approximately 1.5 to 1.9 percent. This process cuts deeply into savings and investment, disrupting the balance of the economic system as a whole. It also permits Government to profit from annual tax increases without the necessity of congres-

sional actions—a paradox in this era of increasing demand for Government accountability. It is, in effect, a 1980 version of taxation without representation.

Tax increases should neither be hidden nor automatic. Unless Congress chooses otherwise, the inflation dividend should remain in private hands where it can be saved, invested, or used to mitigate the human hardships of inflation.

By contrast, our present system allows Parkinson's second law—expenditures increase to meet income—to operate to the fullest. In fact, after our decades of deficits, one could certainly say that Parkinson's law is operating more than to the fullest.

Implementation of an indexing system in nine States, including Minnesota, has shown that the tough decisions on spending can and will be made when revenues are not rising by inflation each year. Politicians will be accountable when the choice is to reduce spending or raise taxes. This was borne out in a recent study on the effects of State indexing laws by the Advisory Commission on Intergovernmental Relations, a permanent council established by Congress in 1959. The study found that in each of the three Midwestern States that had adopted indexing—Minnesota, Wisconsin, and Iowa—the tough budget decisions were made rather than raising taxes.

I ask unanimous consent that the summary of this study, showing the positive results from the State indexing experience, be inserted in the RECORD at the conclusion of my remarks.

Capital gains are another area where the tax code levies a tax on illusory gains due to inflation. Capital gains have been eroded by inflation to such an extent that most reported gains are really losses when adjusted for inflation. In a study done for the National Bureau of Economic Research by Martin Feldstein and Joel Slemrod analyzing 1973 tax returns, the authors found that individuals paid taxes on $4.5 billion in nominal capital gains made from the sale of stock. But after adjusting for increases in the Consumer Price Index since the stock was purchased, the study found that the sellers actually had a real capital loss of nearly $1 billion. And this was before the tremendously high rates of inflation that we have been experiencing in the past several years.

Another study by the National Bureau of Economic Research reported that the effect of inflation with the existing tax law was to raise the 1977 tax burden on corporate income by more than $32 billion. This is an amount equal to 69 percent of the real aftertax income of the nonfinancial corporate sector.

The bill I am introducing today has four components: First, individual brackets, the personal exemption, and the zero bracket amount are adjusted annually to reflect 85 percent of the percentage increase in the Consumer Price Index for the current year ending September 30, over that for the year ending September 30, 1980.

The 85-percent figure is that used by the State of Minnesota in its indexing system. This gives the Government some flexibility in budgeting without putting an undue burden on the taxpayers.

Second, the tax brackets for corporations are also adjusted at 85 percent of the amount by which the GNP deflator for the preceding calendar year exceeds the GNP deflator for calendar year 1980. Presently, the first $25,000 of taxable income is taxed at 17 percent, the next $25,000 at 20 percent, the third $25,000 at 30 percent, and the fourth $25,000 at 40 percent, and all income above that at 46 percent.

Third, for purposes of determining gain or loss on the sale of capital assets such as stock, tangible personal property, and real estate, the basis of the property is adjusted by 85 percent of the increase in the Consumer Price Index from the date of purchase.

Fourth, for purposes of determining the allowance for depreciation, the annual deduction is adjusted for 85 percent of inflation or replacement cost of the asset, whichever is lower.

Mr. President, let us as politicians be accountable for tax increases; let us take away the Government's windfall. While addressing our immediate economic problems, I urge my colleagues to examine this bill as a powerful tool in meeting our economic problems in the long range.

Mr. President, I ask unanimous consent that the bill and a summary be printed in the RECORD.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 711

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—INDIVIDUAL TAXES

SEC. 101. ADJUSTMENTS TO INDIVIDUAL TAX RATES.

(a) GENERAL RULE.—Section 1 of the Internal Revenue Code of 1954 (relating to tax imposed) is amended by adding at the end thereof the following new subsection:

"(f) ADJUSTMENTS IN TAX TABLES SO THAT INFLATION WILL NOT RESULT IN TAX INCREASES.—

"(1) IN GENERAL.—Not later than December 15 of each calendar year, the Secretary shall prescribe tables which shall apply in lieu of the tables contained in subsection (a), (b), (c), (d), or (e) with respect to taxable years beginning in the succeeding calendar year.

"(2) METHOD OF PRESCRIBING TABLE.—In prescribing any table under paragraph (1) for any calendar year which shall apply in taxable years beginning in succeeding taxable years, the Secretary shall—

"(A) increase—

"(i) the maximum dollar amount on which no tax is imposed under such table, and

"(ii) the minimum and maximum dollar amount for each rate bracket for which a tax is imposed under such table,

by the cost-of-living adjustment for such calendar year,

"(B) not change the rate applicable to any rate bracket as adjusted under subparagraph (A)(ii), and

"(C) adjust the amounts setting forth the tax to the extent necessary to reflect the adjustments in the rate brackets.

If any increase determined under subparagraph (A) is not a multiple of $10, such increase shall be rounded to the nearest multiple of $10 (or if such increase is a multiple of $5, such increase shall be increased to the nearest multiple of $10).

"(3) COST-OF-LIVING ADJUSTMENT.—For purposes of paragraph (1), the cost-of-living adjustment for any calendar year is a percentage equal to 85 percent of the percentage (if any) by which—

"(A) the Consumer Price Index for the calendar year exceeds

"(B) the Consumer Price Index for calendar year 1980.

"(4) CONSUMER PRICE INDEX FOR ANY CALENDAR YEAR.—For purposes of paragraph (3), the Consumer Price Index for any calendar year is the average of the Consumer Price Index for the months ending in the 12-month period ending on September 30 of such calendar year.

"(5) CONSUMER PRICE INDEX.—For purposes of paragraph (4), the term 'Consumer Price Index' means the Consumer Price Index for all-urban consumers published by the Department of Labor."

(b) DEFINITION OF ZERO BRACKET AMOUNT.—Subsection (d) of section 63 of such Code (defining zero bracket amount) is amended to read as follows:

"(d) ZERO BRACKET AMOUNT.—For purposes of this subtitle, the term 'zero bracket amount' means—

"(1) in the case of an individual to whom subsection (a), (b), (c), or (d) of section 1 applies, the maximum amount of taxable income on which no tax is imposed by the applicable subsection of section 1, or

"(2) zero in any other case."

SEC. 102. COST OF LIVING ADJUSTMENTS IN AMOUNT OF PERSONAL EXEMPTIONS.

(a) GENERAL RULE.—Section 151 of the Internal Revenue Code of 1954 (relating to allowance of deductions for personal exemptions) is amended by striking out "$1,000" each place it appears and inserting in lieu thereof "the exemption amount".

(b) EXEMPTION AMOUNT.—Section 151 of such Code is amended by adding at the end thereof the following new subsection:

"(f) EXEMPTION AMOUNT.—For purposes of this section, the term 'exemption amount' means, with respect to any taxable year, $1,000 increased by an amount equal to $1,000 multiplied by the cost-of-living adjustment (as defined in section 1(f)(3)) for the calendar year in which the taxable year begins. If the amount determined under the preceding sentence is not a multiple of $10, such amount is a multiple of $5, such amount shall be increased to the nearest multiple of $10)."

SEC. 103. ADJUSTMENTS IN WITHHOLDING.

(a) IN GENERAL.—Subsection (a) of section 3402 of the Internal Revenue Code of 1954 (relating to requirement of withholding) is amended by inserting after the third sentence the following new sentence: "The Secretary shall, not later than December 15 of each calendar year, prescribe tables which shall apply in lieu of the tables prescribed above to wages paid during the succeeding calendar year and which shall be based on the tables prescribed under section 1(f) which apply with respect to taxable years beginning in such succeeding calendar years."

(b) PERCENTAGE METHOD OF WITHHOLDING.—Paragraph (1) of section 3402(b) of such Code (relating to the percentage method of withholding), is amended by adding at the end thereof the following new sentence: "The Secretary shall, not later than December 15 of each calendar year, prescribe a table which shall apply in lieu of the above table to wages paid during the succeeding calendar year and which shall be based on the exemption amount (as defined in section 151(f)) which applies to taxable years beginning in the succeeding calendar year."

(c) WITHHOLDING ALLOWANCES BASED ON

ITEMIZED DEDUCTIONS.—Paragraph (1) of section 3402(m) of such Code (relating to withholding allowances based on itemized deductions) is amended—

(1) by striking out "$1,000" and inserting in lieu thereof "the exemption amount (as determined under section 151(f) for the taxable years beginning in the calendar year)"; and

(2) by striking out subparagraph (B) and inserting in lieu thereof the following:

"(B) an amount equal to the zero bracket amount applicable to such individual."

SEC. 104. RETURN REQUIREMENTS.

(a) Clause (i) of section 6012(a)(1)(A) of the Internal Revenue Code of 1954 (relating to persons required to make returns of income) is amended by striking out "$3,300" and inserting in lieu thereof "the sum of the exemption amount and the zero bracket amount applicable to such an individual".

(b) Clause (ii) of section 6012(a)(1)(A) of such Code is amended by striking out "$4,400" and inserting in lieu thereof "the sum of the exemption amount plus the zero bracket amount applicable to such an individual".

(c) Clause (iii) of section 6012(a)(1)(A) of such Code is amended by striking out "$5,400" and inserting in lieu thereof "the sum of twice the exemption amount plus the zero bracket amount applicable to a joint return".

(d) Paragraph (1) of section 6012(a) of such Code is amended by striking out "$1,000" each place it appears and inserting in lieu thereof "the exemption amount".

(e) Paragraph (1) of section 6012(a) of such Code is amended by adding at the end thereof the following new subparagraph:

"(D) For purposes of this paragraph—

"(i) The term 'zero bracket amount' has the meaning given to such term by section 63(d).

"(ii) The term 'exemption amount' has the meaning given to such term by section 151(f)."

(f) Subparagraph (A) of section 6013(b)(3) of such Code is amended—

(1) by striking out "$1,000" each place it appears and inserting in lieu thereof "the exemption amount",

(2) by striking out "$2,000" each place it appears and inserting in lieu thereof "twice the exemption amount", and

(3) by adding at the end thereof the following new sentence: "For purposes of this subparagraph, the term 'exemption amount' has the meaning given to such term by section 151(f)."

SEC. 105. EFFECTIVE DATES.

(a) The amendments made by sections 101, 102, and 103 of this title shall apply to taxable years beginning after December 31, 1981.

(b) The amendments made by section 103 of this title shall apply to remuneration paid after December 31, 1981.

TITLE II—CORPORATE TAXES

SEC. 201. ADJUSTMENTS TO CORPORATE TAX RATES.

(a) GENERAL RULE.—Section 11 of the Internal Revenue Code of 1954 (relating to tax imposed) is amended by adding at the end thereof the following new subsection:

"(e) ADJUSTMENTS IN CERTAIN DOLLAR AMOUNTS SO THAT INFLATION WILL NOT RESULT IN TAX INCREASES.—

"IN GENERAL.—Not later than December 15 of each calendar year, the Secretary shall prescribe dollar amounts which shall apply in lieu of the dollar amounts contained in subsection (b) with respect to taxable years beginning in the succeeding calendar year.

"(2) METHOD OF PRESCRIBING DOLLAR AMOUNTS.—The dollar amounts which under paragraph (1) are to apply in lieu of the dollar amounts contained in subsection (b) with respect to taxable years beginning in any succeeding calendar year shall be prescribed—

"(A) by increasing the minimum and maximum dollar amounts for each rate bracket for which a tax is imposed under such table by the gross national product deflator adjustment for such calendar year, and

"(B) by not changing the rate applicable to any rate bracket as adjusted under subparagraph (A).

If any increase determined under subparagraph (A) is not a multiple of $10, such increase shall be rounded to the nearest multiple of $10 (or if such increase is a multiple of $5, such increase shall be increased to the nearest multiple of $10).

"(3) GROSS NATIONAL PRODUCT DEFLATOR ADJUSTMENT.—For purposes of paragraph (1), the gross national product deflator adjustment for any calendar year is a percentage equal to 85 percent of the percentage (if any) by which—

"(A) the implicit price deflator for the gross national product for the calendar year, exceeds

"(B) the implicit price deflator for the gross national product for calendar year 1979.

"(4) GROSS NATIONAL PRODUCT DEFLATOR FOR ANY CALENDAR YEAR.—For purposes of paragraph (3), the implicit price deflator for the gross national product for any calendar year is the average of the implicit price deflator for the gross national product for the quarter ending in the 4-quarter period ending on September 30 of such calendar year.

"(5) GROSS NATIONAL PRODUCT IMPLICIT PRICE DEFLATOR.—For purposes of this subsection, the term 'implicit price deflator for the gross national product' means the first revision of the implicit price deflator for the gross national product published by the Secretary of Commerce."

SEC. 202. EFFECTIVE DATES.

The amendments made by section 201 of this title shall apply to taxable years beginning after December 31, 1981.

TITLE III—CAPITAL ASSETS

SEC. 301. ADJUSTMENTS TO BASIS OF CAPITAL ASSETS.

(a) IN GENERAL.—Part II of subchapter O of chapter 1 (relating to basic rules of general application) is amended by redesignating section 1024 as section 1025 and by inserting after section 1023 the following new section:

"SEC. 1024. INDEXING OF CERTAIN ASSETS FOR PURPOSES OF DETERMINING GAIN OR LOSS.

"(a) GENERAL RULE.—If an indexed asset is sold or exchanged in a taxable transaction, for purposes of determining gain or loss on the transaction (but for no other purpose) the indexed basis of the asset shall be substituted for its adjusted basis.

"(b) INDEXED ASSET.—

"(1) IN GENERAL.—For purposes of this section, the term 'indexed asset' means—

"(A) stock which is common stock or possesses most of the attributes of common stock,

"(B) tangible personal property, and

"(C) real property,

which has been held for more than 1 year and which is a capital asset or property used in the trade of business (as defined in section 1231(b)).

"(2) CERTAIN PROPERTY EXCLUDED.—

"(A) IN GENERAL.—The term 'indexed asset' does not include stock in—

"(i) an electing small business corporation (within the meaning of section 1371(b)),

"(ii) a regulated investment company (within the meaning of section 851(a)),

"(iii) a real estate investment trust (within the meaning of section 856(a)),

"(iv) a foreign corporation, and

"(v) a personal holding company (as defined in section 542).

"(B) COLLAPSIBLE CORPORATION.—In the case of a sale, exchange, or distribution to which section 341(a) (relating to collapsible corporations) applies, such transaction shall not be treated as a sale or exchange of an indexed asset to which subsection (a) applies.

"(c) INDEXED BASIS.—For purposes of this section—

"(1) INDEXED BASIS.—The indexed basis for any asset is—

"(A) the adjusted basis of the asset, multiplied by

"(B) the applicable inflation ratio.

"(2) APPLICABLE INFLATION RATIO.—The applicable inflation ratio for any asset is the percentage equal to 85 percent of the percentage arrived at by dividing—

"(A) the CPI for the calendar month in which the sale or exchange takes place, by

"(B) the CPI for the calendar month in which the holding period of the asset began.

The applicable inflation ratio shall not be taken into account unless it is greater than 1. The applicable inflation ratio for any asset shall be rounded to the nearest one-tenth of 1 percent.

"(3) CONSUMER PRICE INDEX FOR CALENDAR MONTH.—The Consumer Price Index for any calendar month is the Consumer Price Index for all-urban consumers for such month. In the case of any month for which there is no Consumer Price Index for all-urban consumers, the Secretary shall, by regulation, prescribe an index which is similar to such index.

"(d) TAXABLE TRANSACTION.—For purposes of this section, the term 'taxable transaction' means a sale or exchange in which gain or loss is recognized in whole or in part to the person disposing of the asset.

"(e) SPECIAL RULES.—For purposes of this section—

"(1) TREATMENT AS SEPARATE ASSET.—In the case of any asset, the following shall be treated as a separate asset:

"(A) a substantial improvement to property,

"(B) in the case of a corporation, a substantial contribution to capital or a substantial reduction in capital,

"(C) in the case of a transaction in which gain or loss is recognized only in part, that portion of the asset to which the recognized gain or loss is property attributable, and

"(D) any other portion of an asset to the extent that separate treatment of such portion is appropriate to carry out the purposes of this section.

"(2) ASSETS WHICH ARE NOT INDEXED ASSETS THROUGHOUT HOLDING PERIOD.—

"(A) IN GENERAL.—The applicable inflation ratio shall be appropriately reduced for calendar months at any time during which the asset (or the predecessor asset) was not an indexed asset.

"(B) CERTAIN SHORT SALES.—For purposes of applying subparagraph (A), an asset shall be treated as not an indexed asset for any short sale period during which the taxpayer or the taxpayer's spouse sells short property substantially identical to the asset. For purposes of the preceding sentence, the short sale period begins on the day after the substantially identical property is sold and ends on the closing date for the sale.

"(3) SECTION CANNOT INCREASE ORDINARY LOSS UNDER SECTION 1231.—To the extent that (but for this paragraph) this section would create or increase the net ordinary loss to which the second sentence of section 1231(a) applies, such second sentence shall not apply. The taxpayer shall be treated as having a long-term capital loss in an amount equal to the amount of the net ordinary loss to which the preceding sentence applies.

"(f) SALES BETWEEN RELATED PERSONS.—

"(1) IN GENERAL.—This section shall not apply to any sale or exchange between related persons.

"(2) RELATED PERSONS DEFINED.—For purposes of this section, the term 'related persons' means—

"(A) persons bearing a relationship set forth in section 267(b), and

"(B) persons treated as single employer under subsection (b) or (c) of section 414.

"(g) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary or appropriate to carry out the purposes of this section."

(b) CLERICAL AMENDMENT.—The table of sections for part II of subchapter O of chapter 1 of such Code is amended by striking out the item relating to section 1024 and inserting in lieu thereof the following:

"Sec. 1024. Indexing of certain assets for purposes of determining gain or loss.

"Sec. 1025. CROSS REFERENCES."

SEC. 302. EFFECTIVE DATE.

The amendments made by section 301 of this title shall apply to dispositions after December 31, 1981, in taxable years ending after such date.

TITLE IV—DEPRECIATION

SEC. 401. ALLOWANCE ONLY OF REPLACEMENT COST STRAIGHT LINE DEPRECIATION AND OTHER CONSISTENT METHODS OF DEPRECIATION.

(a) IN GENERAL.—

(1) USE OF CERTAIN METHODS AND RATES.—Subsection (b) of section 167 of the Internal Revenue Code of 1954 (relating to depreciation) is amended to read as follows:

"(b) USE OF CERTAIN METHODS AND RATES.—The term 'reasonable allowance', as used in subsection (a), shall include (but shall not be limited to) an allowance computed in accordance with regulations prescribed by the Secretary, under any of the following methods:

"(1) the replacement cost straight line method, and

"(2) any other consistent method productive of an annual allowance which, when added to all allowances for the period commencing with the taxpayer's use of the property and including the taxable year, does not, during the first two-thirds of the useful life of the property, exceed a total of such allowances which would have been used had such allowances been computed under the method described in paragraph (1).

Nothing in this subsection shall be construed to limit or reduce an allowance otherwise allowable under subsection (a)."

(2) LIMITATIONS ON USE OF CERTAIN METHODS AND RATES.—Subsection (c) of section 167 of such Code is amended by striking out ", (3), and (4)".

(3) REPEAL OF SPECIAL RULES.—Subsections (f), (i), (j), and (l) of section 167 of such Code are hereby repealed and subsections (g), (h), (k), (m), (n), (o), (p), (q), (r), and (s) of such sections are redesignated as subsections (f), (g), (h), (i), (j), (k), (l), (m), (n), and (o) respectively.

(4) REPLACEMENT COST STRAIGHT LINE METHOD.—Subsection (e) of section 167 of such Code is amended to read as follows:

"(e) REPLACEMENT COST STRAIGHT LINE METHOD.—For purposes of this section, the term 'reasonable allowance' as used in subsection (a), when computed under the replacement cost straight line method for any period, means an allowance for such period equal to—

"(1) a percentage the numerator of which is the number of months in such period and the denominator of which is the number of months in the useful life of the property with respect to which the allowance is claimed, multiplied by

"(2) the lowest of—

"(A) an amount equal to the basis of such property, adjusted in accordance with an index, under regulations prescribed by the Secretary which reflects 85 percent of any increase from the preceding period in the value of such property by reason of inflation.

"(B) the cost (determined at the end of such period) to the taxpayer of purchasing property identical to such property,

"(C) the cost (determined at the end of such period) to the taxpayer of reproducing such property, or

"(D) the cost (determined at the end of such period) to the taxpayer of purchasing property which performs functions equivalent to the functions provided by the property for which the allowance is claimed."

(5) ADJUSTED BASIS FOR DETERMINING GAIN.—Subsection (f) of section 167 of such Code (as redesignated by paragraph (3)) is amended to read as follows:

"(f) ADJUSTED BASIS FOR DETERMINING GAIN.—Notwithstanding any other provisions of this subtitle, under regulations prescribed by the Secretary, for purposes of determining the gain on the sale or other disposition during the taxable year of property with respect to which the deduction under subsection (a) is allowable for such year, the adjusted basis on such property shall be equal to—

"(1) the amount so allowable with respect to such property for such year, multiplied by

"(2) the number of years of the useful life of such property with respect to the taxpayer for which such deduction was so allowable to the taxpayer."

(b) Technical and Conforming Amendments.—

(1) ADDITIONAL FIRST-YEAR DEPRECIATION ALLOWANCE FOR SMALL BUSINESS.—

(A) ESTATES.—Paragraph (5) of section 179(d) of the Internal Revenue Code of 1954 (relating to definitions and special rules) is amended by striking out "167(h)" and inserting in lieu thereof "167(g)".

(B) ADJUSTMENT TO BASIS; WHEN MADE.—Paragraph (9) of section 179(d) of such Code is hereby repealed.

(2) AMORTIZATION OF REAL PROPERTY CONSTRUCTION PERIOD INTEREST AND TAXES.—

(A) RESIDENTIAL REAL PROPERTY.—Paragraph (4) of section 189(e) of such Code (relating to definitions) is amended by striking out "section 167(j)(2)(B)" and inserting in lieu thereof "paragraph (6)", and by striking out "section 167(k)(3)(C)" and inserting in lieu thereof "section 167(h)(3)(C)".

(B) RESIDENTIAL RENTAL PROPERTY DEFINED.—Subsection (e) of section 189 of such Code (relating to amortization of real property construction period interest and taxes) is amended by adding at the end thereof the following new paragraph:

"(6) RESIDENTIAL RENTAL PROPERTY.—The term 'residential rental property' means, with respect to a taxable year, a building or structure if 80 percent or more of the gross rental income from such building or structure for such year is rental income from dwelling units (within the meaning of section 167(h)(3)(C)). For purposes of the preceding sentence if any portion of such building or structure is occupied by the taxpayer the gross rental income from such building or structure shall include the rental value of the portion so occupied."

(3) EFFECT ON EARNINGS AND PROFITS.—Paragraph (2) of section 312(k) of such Code (relating to effect of depreciation on earnings and profits) is amended to read as follows:

"(2) EXCEPTION.—If for any taxable year a method of depreciation was used by the taxpayer which the Secretary has determined results in a reasonable allowance under section 167(a), and which is not a method allowable solely by reason of the application of section 167(b)(2), then the adjustment to earnings and profits for depreciation for such year shall be determined under the method so used (in lieu of the replacement cost straight line method)."

(4) CARRYOVER IN CERTAIN CORPORATE ACQUISITIONS.—Paragraph (6) of section 381(c) of such Code (relating to items of the distributor or transferor corporation) is amended by striking out ", (j), and (k)" and inserting in lieu thereof "and (h)".

(5) DEDUCTION FOR CONTRIBUTIONS OF EMPLOYER TO AN EMPLOYEE'S TRUST OF ANNUITY PLAN AND COMPENSATION UNDER A DEFERRED-PAYMENT PLAN.—

(A) IN GENERAL.—Subparagraph (C) of section 404(a)(1) of such Code is amended by striking out "section 167(1)(3)(A)(iii)" and inserting in lieu thereof "subsection (h)".

(B) DEFINITION OF CERTAIN SERVICES.—Section 404 of such Code is amended by adding at the end thereof the following new subsection:

"(h) CERTAIN COMMUNICATIONS SERVICES.—For purposes of this section, the services described in this subsection are telephone services, or other communications services if furnished or sold by the Communications Satellite Corporation for purposes authorized by the Communications Satellite Act of 1962 (47 U.S.C. 701), if the rates for the furnishing or sale of such services, as the case may be, have been established or approved by a State or political subdivision thereof, by any agency or instrumentality of the United States, or by a public service or public utility commission or other similar body of any State or political subdivision thereof."

(6) SPECIAL RULES FOR CREDITS AND DEDUCTIONS.—Subsection (e) of section 642 of such Code (relating to special rules for credits and deductions) is amended by striking out "167(h)" and inserting in lieu thereof "167(g)".

(7) GAIN FROM DISPOSITIONS OF CERTAIN DEPRECIATION REALTY.—

(A) APPLICABLE PERCENTAGE FOR ADDITIONAL DEPRECIATION AFTER DECEMBER 31, 1975.—Clause (iii) of section 1250(a)(1)(B) of such Code (relating to applicable percentage) is amended by striking out "167(k)" and inserting in lieu thereof "167(h)".

(B) APPLICABLE PERCENTAGE FOR ADDITIONAL DEPRECIATION AFTER DECEMBER 31, 1969, AND BEFORE JANUARY 1, 1976.—Subparagraph (B) of section 1250(a)(2) of such Code (relating to additional depreciation after December 31, 1969, and before January 1, 1976) is amended by striking out "167(j)(2)(B)" and inserting in lieu thereof "189(e)(6)" and by striking out "167(k)" and inserting in lieu thereof "167(h)".

(C) ADDITIONAL DEPRECIATION ATTRIBUTABLE TO REHABILITATION EXPENDITURES.—Paragraph (4) of section 1250(b) of such Code (relating to additional depreciation defined) is amended by striking out "167(k)" each place it appears and inserting in lieu thereof "167(h)".

SEC. 402. EFFECTIVE DATE.

The amendments and the repeals made by section 401 of this title shall apply to taxable years beginning after the date of the enactment of this Act.

[Shannon, John and Lucke, Robert of the Advisory Commission on Intergovernmental Relations, "State Experimentation With Indexed Income Taxes—Early Results," November 28, 1980]

SUMMARY

The indexation of income taxes for inflation can be judged a success because it has scored well on three key tests in actual state operation.

1. The political accountability test: By preventing taxpayers from being pushed into higher tax brackets by inflation, full indexation both eliminated tax windfalls and strengthened political accountability.

2. The tax equity test: By preventing unlegislated shifts in tax burdens among classes of taxpayers, full indexation both maintained the integrity of the progressive tax structures and shielded low income taxpayers from disproportionate tax hikes.

3. The fiscal discipline test: By slowing down the rapid growth in income tax receipts, indexation has both forced state policymakers to take a harder look at their expenditure priorities and has provided the Post Proposition 13 era with a "moderate" way to check the growth of the public sector.

The success of these indexation experiments does not necessarily insure rapid adoption of the indexation idea in other states. This cautious outlook is based on two factors which have inhibited the spread of the indexation idea. First, the 1980 economic downturn has substantially reduced the growth in receipts from all major state taxes. In so doing, the recession has provided opponents with an opportunity to blame indexation for the budget squeeze currently experienced by several of the indexation states. This criticism fails to recognize that these budget deficits were caused primarily by the detrimental effects of the recession on all major tax yields—not by indexation.

The second barrier to indexation is the clash in value systems. The two primary virtues of indexation—the strengthening of political accountability and fiscal discipline—collide head-on with the politician's instinct for survival and desire for fiscal flexibility. This clash of values was recently underscored by a lieutenant governor who was about to become governor. After listening to a legislative witness make the case for indexation of the state income tax, this official confided privately to the witness, "There's no question about it, indexation is a sound public policy. Our state should index its personal income tax." And then with a wink he added, "I just hope we don't get it until after I leave the governor's office." To paraphrase Shakespeare, fiscal truth is often uttered in political jest.

Despite these barriers, indexation appears to be an idea whose time has come—only a dramatic and permanent drop in the rate of inflation could reduce its attractiveness as an instrument of fiscal accountability.

By Mr. BRADLEY (for himself, Mr. WEICKER, and Mr. JOHNSTON):

S.J. Res. 46. Joint resolution declaring "United States Tennis Association Day"; to the Committee on the Judiciary.

U.S. TENNIS ASSOCIATION DAY

Mr. BRADLEY. Mr. President, I send to the desk a joint resolution, requesting that President Reagan authorize and proclaim May 21, 1981, as "U.S. Tennis Association Day" in order to commemorate the 100th anniversary of the founding of the United States Tennis Association on May 21, 1881.

The U.S. Tennis Association was the first national organization in the United States dedicated to amateur tennis. In light of the fact that for the past century the U.S. Tennis Association has provided a great service to this country by encouraging individual personal fitness, through amateur athletics, I respectfully encourage my fellow colleagues to support this joint resolution.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 46

Whereas personal fitness is valuable to the health of individuals as well as to the health of the nation; and

Whereas organized, amateur athletics are effective in encouraging individual participation in sports and encourage personal fitness; and

Whereas the United States Tennis Association was the first national organization dedicated to amateur tennis, and one of the first amateur athletic associations in the world; and

Whereas amateur athletics should be encouraged for the good of the nation, and the United States Tennis Association, as a long time organizer of amateur athletics, is deserving of the support of the President: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to proclaim May 21, 1981 as "United States Tennis Association Day" to commemorate the one hundredth anniversary of the founding of the United States Tennis Association on May 21, 1881.

ADDITIONAL COSPONSORS

S. 8

At the request of Mr. DOLE, the Senator from Kansas (Mrs. KASSEBAUM) was added as a cosponsor of S. 8, a bill to amend the Internal Revenue Code of 1954 to clarify the standards used for determining whether individuals are not employees for purposes of the employment taxes.

S. 20

At the request of Mr. SASSER, the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of S. 20, a bill to amend title 18 of the United States Code to prohibit the robbery of a controlled substance from a pharmacy.

S. 23

At the request of Mr. DOLE, the Senator from Kansas (Mrs. KASSEBAUM) was added as a cosponsor of S. 23, a bill to amend the Internal Revenue Code of 1954 with respect to the special valuation of farm property for purposes of the estate tax.

S. 29

At the request of Mr. LUGAR, the Senator from Utah (Mr. GARN), the Senator from Iowa (Mr. JEPSEN), the Senator from North Carolina (Mr. HELMS), the Senator from Utah (Mr. HATCH), and the Senator from Texas (Mr. TOWER) were added as cosponsors of S. 29, a bill to repeal the Federal requirement of incremental pricing under the Natural Gas Policy Act of 1978.

S. 160

At the request of Mr. SCHMITT, the Senator from South Dakota (Mr. PRESSLER) was added as a cosponsor of S. 160, a bill to authorize the Secretary of Agriculture to convey certain National Forest System lands, under specified conditions, to direct the Secretary of Interior to certify survey monuments within 180 days, and for other purposes.

S. 195

At the request of Mr. GOLDWATER, the Senator from Indiana (Mr. QUAYLE), and the Senator from Virginia (Mr. WARNER) were added as cosponsors of S. 195, a bill to incorporate the U.S. Submarine Veterans of World War II.

S. 270

At the request of Mr. D'AMATO, his name was added as a cospsonsor of S. 270, a bill to amend the Communications Act of 1934 in order to encourage and develop marketplace competition in the provision of certain radio services and to provide certain deregulation of such radio services, and for other purposes.

S. 307

At the request of Mr. COCHRAN, the Senator from Nebraska (Mr. ZORINSKY), and the Senator from Louisiana (Mr. JOHNSTON) were added as cosponsors of S. 307, a bill to amend the Internal Revenue Code of 1954 to exempt from the windfall profit tax oil produced from interests held by or for residential child care agencies.

S. 321

At the request of Mr. BENTSEN, the Senator from Delaware (Mr. ROTH), and the Senator from Maine (Mr. MITCHELL) were added as cosponsors of S. 321, a bill to amend section 265 of the Internal Revenue Code of 1954 with respect to the deduction, by certain financial institutions, of interest paid on deposits of public funds where those deposits are secured by tax-exempt obligations.

S. 329

At the request of Mr. PELL, the Senator from New Jersey (Mr. WILLIAMS) was added as a cosponsor of S. 329, a bill to amend the Internal Revenue Code of 1954 to provide a credit against tax for certain home heating costs.

S. 351

At the request of Mr. WALLOP, the Senator from Iowa (Mr. JEPSEN), and the Senator from Louisiana (Mr. JOHNSTON) were added as cosponsors of S. 351, a bill to amend the Federal Mine Safety and Health Amendments Act of 1977 to provide that the provisions of such act shall not apply to the surface mining of stone, clay, and sand work.

S. 407

At the request of Mr. ABDNOR, the Senator from South Dakota (Mr. PRESSLER) was added as a cosponsor of S. 407, a bill to authorize a study of the feasibility of Federal development of the water resources of the I'Santi Unit of the Missouri Riven Basin located on the Flandreau Santee Sioux Reservation, South Dakota.

S. 409

At the request of Mr. JOHNSTON, the Senator from North Dakota (Mr. ANDREWS), and the Senator from Nebraska (Mr. ZORINSKY) were added as cosponsors of S. 409, a bill to provide specific standby authority to deal with petroleum supply interruptions, and for other purposes.

S. 475

At the request of Mr. DURENBERGER, the Senator from California (Mr. CRANSTON) was added as a cosponsor of S. 475, a bill to amend the Internal Revenue Code of 1954 to clarify the definition of specially defined energy property for purposes of the investment tax credit.

S. 545

At the request of Mr. ABDNOR, the Senator from South Dakota (Mr. PRESSLER) was added as a cosponsor of S. 545, a bill to authorize a study of the feasibility of Federal development of the water resources of the Little White River Unit located on the Rosebud Sioux Indian Reservation, South Dakota.

S. 568

At the request of Mr. ARMSTRONG, the Senator from New Mexico (Mr. SCHMITT) was added as a cosponsor of S. 568, a bill

to amend the Federal Mine Safety and Health Act of 1977.

S. 574

At the request of Mrs. KASSEBAUM, the Senator from New Mexico (Mr. SCHMITT) was added as a cosponsor of S. 574, a bill to amend the Internal Revenue Code of 1954 to allow the estate of a decedent a deduction for certain bequests of interests in property used in farms or other trades or businesses, and for other purposes.

S. 653

At the request of Mr. THURMOND, the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of S. 653, a bill to amend title 28 of the United States Code to modify habeas corpus procedures.

S. 683

At the request of Mr. DOLE, the Senator from Oregon (Mr. PACKWOOD) was added as a cosponsor of S. 683, a bill to amend the Internal Revenue Code of 1954 to encourage economic growth through reduction of the tax rates for individual taxpayers and acceleration of capital cost recovery of investment in plant, equipment, and real property.

SENATE JOINT RESOLUTION 20

At the request of Mr. SASSER, the Senator from Michigan (Mr. RIEGLE), the Senator from Georgia (Mr. NUNN), the Senator from California (Mr. CRANSTON), the Senator from Michigan (Mr. LEVIN), the Senator from Minnesota (Mr. DURENBERGER), and the Senator from Kentucky (Mr. HUDDLESTON) were added as cosponsors of Senate Joint Resolution 20, a joint resolution to designate the month of April 1981 as Gospel Music Month.

SENATE CONCURRENT RESOLUTION 5

At the request of Mr. LUGAR, the Senator from California (Mr. HAYAKAWA), the Senator from Nebraska (Mr. EXON), the Senator from Ohio (Mr. METZENBAUM), the Senator from Wisconsin (Mr. KASTEN), the Senator from New York (Mr. D'AMATO), and the Senator from Florida (Mr. CHILES) were added as cosponsors of Senate Concurrent Resolution 5, a concurrent resolution expressing the sense of the Congress with respect to the imprisonment and treatment by the Government of the Soviet Union of Dr. Viktor Brailovsky, and for other purposes.

SENATE RESOLUTION 87

At the request of Mr. HEINZ, the Senator from Arizona (Mr. GOLDWATER), the Senator from Nebraska (Mr. ZORINSKY), and the Senator from Arizona (Mr. DECONCINI) were added as cosponsors of Senate Resolution 87, a resolution expressing the sense of the Senate that the Congress not enact legislation to tax social security benefits, and for other purposes.

SENATE RESOLUTION 93—RESOLUTION AUTHORIZING PRINTING OF ADDITIONAL COPIES OF A REPORT OF THE SPECIAL COMMITTEE ON AGING

Mr. HEINZ (for himself and Mr. CHILES) submitted the following resolution; which was referred to the Committee on Rules and Administration:

S. RES. 93

Resolved, That there shall be printed for the use of the Special Committee on Aging the maximum number of copies of part 1 of its annual report to the Senate, entitled "Developments in Aging: 1980", which may be printed at a cost not to exceed $1,200.

AMENDMENTS SUBMITTED FOR PRINTING

IMPROVEMENT OF NATION'S AIRPORTS AND AIRWAYS

AMENDMENT NO. 7

(Ordered to be printed and referred to the Committee on Commerce, Science, and Transportation.)

Mr. CANNON (for himself and Mrs. KASSEBAUM) submitted an amendment intended to be proposed by them to the bill (S. 508) to provide for the improvement of the Nation's airport and airways system, and for other purposes.

● Mr. CANNON. Mr. President, today Senator KASSEBAUM and I are introducing an amendment to S. 508, the Airport and Airway System Development Act of 1981, which will provide badly needed relief to U.S. and foreign citizens traveling into the United States by air.

Last summer at Los Angeles International Airport, passengers waited in excess of 4 hours to get through customs lines, and this summer is expected to be worse. In Miami the average time to clear customs is 2 hours, and likewise at several of the JFK terminals 2 to 3 hours is not unusual. In addition, some of these waiting lines in the terminal are encountered after an hour spent in the airplane on the ground waiting for an aircraft gate position to come open. My colleagues and I believe that such passenger inconvenience is neither acceptable nor necessary.

Frankly, I find the term "inconvenience" as a description of what we are doing to our incoming international travelers entirely too mild—"harassment" would be much more accurate. And, as one who is interested not only in the Nevadans being harassed by these procedures but also the international travelers attracted to our Nevada tourist destinations, I am committed to working on a change in our archaic screening procedures. Further, the administration's proposed cuts in the Customs Service budget make this change in procedure even more imperative if we do not want the lines to make still another quantum jump in length.

The Customs Service has historically rejected the suggestions of adopting up-to-date, statistical methods of screening as opposed to giving every single incoming passenger a cursory and incomplete examination. This is analogous to auditing every citizen's tax return as the method of finding tax evaders. If the Customs Service methods were used by the IRS we would still be auditing returns from the 1940's.

This amendment would require an experiment at five major airports with an internationally proven method of statistical screening. It also would require the establishment of one preclearance station in Europe in order to ease the passenger volume at U.S. airport inspection points. The total cost of these experiments would be less than $700,000 and would be taken out of the airport and airway trust fund which enjoys a $3.7 billion surplus, part of which was contributed by an international departure tax of $3 per person.

The following is a specific description of the screening method we would require:

This bill would establish a pilot program for preclearance of passengers and baggage entering the United States by air from Europe, and for inspection of passengers and baggage by sampling techniques at U.S. gateway airports.

The dual channel or red/green system is a simplified customs control which enables customs authorities to improve the flow of passenger traffic at international airports and to deal efficiently with the increasing number of passengers without reducing the effectiveness of the control and without a corresponding increase in the number of customs staff.

The system will allow the passengers to choose between two types of channels:

First. One (green channel) for passengers having with them no goods or only goods which can be admitted free of import duties and taxes and which are not subject to import prohibitions or restrictions; and

Second. The other (red channel) for other passengers.

Each channel will be clearly and distinctively marked so that the choice between them can easily be understood by passengers.

Passengers must be sufficiently well informed to choose between the channels. For this purpose it is important:

First. That passengers be informed about the functioning of the system and about the descriptions and quantities of goods they may have with them when using the green channel. This may be done by means of posters or panels at the airport or by means of leaflets available to the public at the airport or distributed through tourist agencies, airlines, and other interested bodies; and

Second. That the route to the channels be clearly signposted.

The channels will be located beyond the baggage delivery area so that passengers have all their baggage with them when choosing their channel. Moreover, the channels shall be so arranged that the passenger flow from that area to the exits from the airport is as direct as possible.

In the green channel passengers shall not be subject to any customs formalities but the customs will make spot checks according to statistical models and personality "profiles" developed by the service; in the red channel passengers shall accomplish the formalities required by the customs.

Clearance of individuals is substantially quicker—including those passengers who elect to enter the red channel or who are among the small control sample chosen for interview by Customs officials in the green area. Greatest benefit is to the vast majority of passengers who

might least expect difficulties at the customs clearance point. These include bona fide tourists and business travelers who are least likely to exceed customs concessions.

Queueing and general waiting time is reduced creating favorable impressions on visitors, especially those arriving in an airport for the first time.

Customs authorities in those countries which have adopted the dual-channel system believe further advantages will accrue to passengers as more countries adopt the Customs Cooperation Council standards bringing greater understanding of the procedures.

Introduction of the dual-channel system brings immediate benefit to States who receive large and growing numbers of international passengers since growth in passenger traffic can be contained without a proportionate increase in customs staff.

Longer term benefits include the dual-system believe that control over illegal imports is, if anything. enhanced by the procedures followed since selective examination enables greater concentration to be placed on those passengers likely to attempt customs evasions.

Mr. President, I ask my colleagues support for this amendment and end our harassment of the international travelers entering the United States.●

NOTICE OF HEARINGS

SUBCOMMITTEE ON TAXATION AND DEBT MANAGEMENT

Mr. PACKWOOD. Mr. President, the Subcommittee on Taxation and Debt Management of the Senate Finance Committee will hold a hearing at 10 a.m. on Monday, March 16, 1981. I have scheduled four bills for the hearing. The four bills are:

First. S. 483, introduced by Senators CANNON and LAXALT, to exempt certain State-regulated wagering from the 2-percent Federal excise tax on wagering;

Second. S. 502, introduced by Senators MOYNIHAN and WALLOP, to exempt qualifying foreign pension plans from the 30-percent withholding tax on foreign investments in the United States;

Third. S. 565, introduced by Senator STEVENS, to increase the dollar limit for the moving expense deduction; and

Fourth. S. 352, which I introduced, to assure that the Federal political contributions income tax credit applies to contributions to a political organization whether used for or against candidates.

The purpose of this statement is to briefly explain the issues raised by these bills. This may help you chart the progress of tax legislation before the Taxation Subcommittee. It also helps assure greater public awareness of tax bills coming before hearings.

EXEMPTION FROM WAGERING EXCISE TAX FOR WAGERS REGULATED BY STATES—S. 483

S. 483, introduced by Senators CANNON and LAXALT, exempts wagers authorized by State law from the 2-percent Federal excise tax on wagering. It also exempts persons authorized by State or local law to engage in the business of accepting wagers from the $500 occupational tax.

Under present law, a 2-percent excise tax is imposed on the amount of certain wagers. In addition, an occupational tax of $500 per year is imposed on persons in the wagering business.

Senators CANNON and LAXALT believe that application of this tax to State regulated wagering makes it more difficult for licensed wagering operators to compete against unlicensed or illegal operators. They also believe that elimination of the tax in these cases would not hamper law enforcement because of continued State regulation.

The Senate Finance Committee approved the provisions of this bill twice in 1980. However, it was not enacted.

The Joint Committee on Taxation has estimated that this bill would reduce budget receipts by $3 million in fiscal year 1981, $14 million in fiscal year 1982, increasing gradually to $20 million in fiscal year 1986.

TAX EXEMPTION FOR FOREIGN PENSION PLANS—S. 502

S. 502, introduced by Senators MOYNIHAN and WALLOP, exempts certain foreign pensions from U.S. tax. The principal effect of the bill is to exempt foreign pension plans from the so-called 30-percent withholding tax applicable to certain foreign investment in the United States—unless the 30-percent rate is reduced by an income tax treaty.

In addition, the bill permits life insurance companies to exclude from income the current earnings of qualifying foreign pensions, and also to eliminate any capital gains tax on assets held in a separate account.

The sponsors of the bill believe that enactment of the bill would help increase investments by foreign pension plans in the United States. The bill is also intended to treat bona fide foreign pension plans more like pension plans qualifying under U.S. law.

The bill includes several restrictions to assure that tax exemption is restricted to bona fide pension plans. First, the assets of the foreign pension plan would be required to be segregated from the assets of the employer maintaining the plan. Second, the foreign pension plan would be required to be exempt from taxation, or qualify for a reduced rate of taxation, in its home country. Third, the foreign pension plan would have to be maintained to provide benefits to employees who are primarily nonresident alien individuals.

Like U.S. pension plans. foreign pension plans would be subject to the tax on unrelated business income if S. 502 is enacted.

The revenue loss from S. 502 is not yet available. It will be added to the March 16 hearing record.

MOVING EXPENSE DEDUCTION—S. 565

S. 565, introduced by Senator STEVENS. liberalizes dollar limits applicable to replacing a personal residence in connection with the moving expenses deduction.

Internal Revenue Code section 217 permits employees to deduct certain moving expenses in connection with beginning work at a new location. This includes the cost of moving household goods, and traveling expenses for the employee and his or her family.

It also includes up to $1,500 ($4,500 for foreign moves) for house-hunting expenses and temporary living expenses (up to 30 days). Additionally, it includes up to $3,000 (reduced by the amount of house hunting expenses and temporary living expenses) for certain costs of selling the old residence, settling the old lease, buying a new residence, or acquiring a new lease. For foreign moves, a $6,000 limit is substituted for the $3,000 limit.

S. 565 changes the dollar limits applicable to the portion of the deduction related to replacing the residence. For expenses relating to the sale or purchase of a home, the limit is raised to the applicable maximum reimbursement for Federal employees, now $12,000.

For expenses relating to the cancellation or acquisition of a lease the limit would be $2,500, less qualifying costs of purchasing a new residence.

The $12,000 and $2,500 limits apply to both foreign and domestic moves under S. 565.

S. 565 retains the $1,500 limit applicable to house-hunting expenses and temporary living expenses.

The revenue effect of this bill is not yet available, but will be entered into the March 16 hearing record.

POLITICAL CONTRIBUTIONS TAX CREDITS FOR EXPENDITURES AGAINST A CANDIDATE—S. 352

S. 352, which I introduced, in effect reverses a position taken by the Internal Revenue Service in letter rulings in Februray 1980. Those rulings held that the 50-percent Federal political contributions income tax credit is not available for "negative" campaign expenditures.

The letter rulings were based on Internal Revenue Code section 41(c)(1)(B) which, in part, provides that the political contributions tax credit is available for contributions to political organizations "* * * to further the candidacy * * *" of individuals for nomination or election.

The Internal Revenue Service has interpreted this to deny the political contribution tax credit for "negative" campaigns. In my opinion, this interpretation is not based on congressional intent, will discourage citizen participation in political campaigns, and will protect well-ensconced incumbents from some public scrutiny.

For example, one effect of the ruling is to block availability of the tax credit for contributions to be used to start a fund for the purpose of which is to build public opinion toward an alternative to an unopposed incumbent.

S. 352 deletes from section 41 the language that the contribution be used to further a candidacy.

The American Civil Liberties Union of New York, the Chamber of Commerce of the United States. and the National Conservative Political Action Committee favor this bill.

ADDITIONAL STATEMENTS

WE MUST PROTECT SOCIAL SECURITY BENEFICIARIES

● Mr. SASSER. Mr. President, last week I joined 29 of my colleagues in sponsoring Senate Resolution 87, expressing the

Senate's disapproval of proposals to tax social security benefits. I am taking this opportunity to outline my reasons for lending my support to this worthwhile legislation.

Forty-six years ago, when Congress enacted the Social Security Act of 1935, a tax equivalent was already figured into the benefits payable to eligible recipients. The Internal Revenue Service has since 1941 considered social security benefits as nontaxable income. But there are several more convincing reasons—very human reasons—why social security benefits should not be taxed.

Elderly Americans currently pay 10 percent of all personal income taxes. That is 11 percent of the population, Mr. President, paying one-tenth the tax burden; clearly the Nation's senior citizens are carrying their fair share of the burden. On the average, the American worker's postretirement income is one-half to two-thirds of preretirement earnings. Over three-quarters of our retired population receives income from the social security system, with as many as one-fifth that number wholly dependent on social security benefits.

Perhaps more importantly, senior citizens are hit hard by inflation. The consumption patterns of retired persons are not substantially different after 65 than in the preretirement years, and in fact the elderly spend proportionately more of their income on food, housing, and medical expenses than younger households. In the 4 years between 1972 and 1976, the percentage increase in the cost of food, fuel oil, housing, medical care, and hospital charges—services heavily utilized by the older population—rose at a faster pace than the overall Consumer Price Index for the same period.

Therefore, Mr. President, it is important to remember who we will protect by passing this resolution. We will be protecting the senior citizen who cannot afford to pay taxes on his or her postretirement benefits. We will be protecting the men and women who, after a lifetime of hard work, cannot be asked to shoulder an additional, unfair share of the Nation's tax burden. We will be protecting those unable to protect themselves against the very real income erosion caused by tax increases. And we will be sending a clear message that the Senate will not stand idly by and forget the hard work and contributions of millions of workers to the social security system.

I am pleased to be an original cosponsor of Senate Resolution 87. I am confident that the Senate will give its early approval to this resolution, and take this small step to protect all social security beneficiaries.●

THE ANNUAL REPORT OF THE JOINT ECONOMIC COMMITTEE

● Mr. JEPSEN. Mr. President, in the past 2 years, the Joint Economic Committee issued consensus reports. The Republicans on the JEC were proud to have helped forge these bipartisan reports because we believed then and believe now that their "supply-side" approach represented the best method for stopping inflation and getting our economy moving again.

This supply-side view was eloquently stated by the committee chairman, Senator LLOYD BENTSEN, in his introduction to the 1980 JEC report:

> The past has been dominated by economists who focused almost exclusively on the demand side of the economy and who, as a result, were trapped into believing that there is an inevitable trade-off between unemployment and inflation. America does not have to fight inflation during the 1980's by periodically pulling up the drawbridge with recessions that doom millions of Americans to unemployment.
>
> The Committee's 1980 report says that steady economic growth, created by productivity gains and accompanied by a stable fiscal policy and a gradual reduction in the growth of the money supply over a period of years, can reduce inflation significantly during the 1980's without increasing unemployment. To achieve this goal, the Committee recommends a comprehensive set of policies designed to enhance the productive side, the supply side of the economy. The Committee also recommends a targeted approach to the Nation's structural economic problems and deemphasis of macro-economic fine tuning.
>
> The Committee recommends that fully one-half of the next tax cut be directed to enhancing saving and investment in the economy. Traditionally, tax cuts have been viewed solely as countercyclical devices designed to shore up the demand side of the economy. The Joint Economic Committee is now on record in support of the view that tax policy can and should be directed toward improving the productivity performance of the economy over the long term and need not be enacted only to counter a recession.

In its past reports, the Joint Economic Committee blazed a new trail in economic thought by showing how the old economics has failed to solve our economic problems, that these outdated demand-side policies actually were a major cause of our economic problems and how a new supply-side approach aimed at stimulating economic growth could whip stagflation.

In this year's report, the primary goal of the Republicans was to build on those consensus reports; to improve the state of the art of supply-side economics. To accomplish this goal and to contribute substance rather than rhetoric to the national debate, the Republicans specifically addressed two major critcisms of a supply-side solution to our economic problems. To wit, that gradual reductions in the money supply will increase interest rates and across-the-board, personal, marginal tax-rate cuts are inflationary.

This 1981 JEC Republican report shows that these criticisms are part myth, part ignorance and part political confusion.

We believe that the Democrats on the Joint Economic Committee have abandoned the supply-side approach which formed the basis for consensus in the past. The Democrats have chosen instead to endorse thoroughly discredited monetary policies of fine tuning and easy money, fiscal policies to redistribute income and stimulate aggregate demand, and Government allocation of credit and other scarce resources. Stagflation has been the inevitable result of these policies in the past. We cannot endorse them now.

The 10 Republican members of the Joint Economic Committee have decided unanimously to issue our own report. We cannot sign the Democrat report. It largely affirms tried and false approaches and does not build on the 1979 and 1980 consensus reports of this committee. We recognize that it contains some constructive suggestions. However, on the whole, its recommendations are counterproductive, and its underlying logic is flawed.

Instead, the Republican members of the committee have in our report built on the committee's past consensus emphasizing saving, capital formation, slower money growth, and supply-side tax cuts. We believe that our views are right for America at this critical juncture. Let the reader judge.

I submit, for printing in the RECORD, "Republican Views on the 1981 Economic Report of the President."

The material follows:

REPUBLICAN VIEWS ON THE 1981 ECONOMIC REPORT OF THE PRESIDENT

Republican recommendations

The Nation's chief economic goal must be to increase economic growth. It is through economic growth that we can best assure economic stability and opportunity for all.

The Nation's economic ills have been the result of bad economic policies, not external shocks of defects in our free enterprise system.

We propose the following economic package to boost employment, productivity and growth and to lower inflation:

Across-the-board reduction in personal marginal income tax rates;

Business tax and depreciation reduction;

Targeted incentives for saving and investment; and

Reduction in Federal Government spending as a percentage of gross national product.

Departures from the target path of money growth to offset credit market fluctuations, supply shocks or changes in velocity simply result in higher interest rates, worse inflation and make it more difficult to implement a rational monetary policy.

A fiscal policy that aims at reducing the tax barriers to saving and production, that causes a shift of many nontaxable assets from tax exempt into taxable venture and is accompanied by reductions in the spending and borrowing burdens of government is not inflationary.

Special incentives for personal saving are absolutely necessary, especially in times of high inflation, in order for the saving rate to at least reach its historic level.

Inflation is basically the result of too great an increase in the money supply relative to the growth of goods in the economy. Beginning immediately, we must gradually reduce the rate of growth in the money supply.

A strong dollar, stability in our balance of payments and a more competitive American economy can best be achieved by stopping inflation and increasing productivity and growth.

In an effort to facilitate world trade, we should expand our Nation's export base, reduce the tax burden on U.S. workers abroad, reconsider the application of extra-territorial anti-trust laws and increase direct investment abroad. In addition, we should strengthen the capabilities of the IMF, including the disciplining of member nations which follow irresponsible domestic policies.

All government regulations should accomplish their statutory objectives in the

most cost-effective manner. When there are alternative options for achieving a particular regulatory goal, the least costly way should be adopted unless an overriding statutory goal requires the adoption of a less cost-effective alternative.

Congress and the Executive Branch should begin immediately to develop a regulatory budget to encourage government agencies to reduce the costs of regulations and provide additional incentives for agencies to develop cost-effective regulations. A regulatory budget would supplement the annual fiscal budget to give the public, Congress and the President a more comprehensive view of the Federal Government's command over resources for public purposes.

I. THE IMPORTANCE OF ECONOMIC GROWTH AND THE DECLINE OF AMERICAN PRODUCTIVITY

As the 1980's begin, the list of national priorities is lengthening: Inflation and interest rates are too high. They must be reduced. The Nation still is too dependent for its energy upon insecure foreign sources. Energy dependence must be reduced. Unemployment, and particularly minority unemployment, remains high and has debilitating effects on the social and economic condition of the country. Unemployment must be reduced. And while the poverty rate has been cut in half since the mid-1960's, the number of persons actually in poverty has risen. Poverty must be reduced. In addition:

Events in Afghanistan, Iran, Poland, and elsewhere have driven home the need for a renewed commitment to national defense. We must find the resources to meet this commitment.

In spite of vigorous environmental, health and safety initiatives, more remains to be done. We must find the resources for orderly protection and improvement of the environment, and the health and safety of all Americans.

The Nation's infrastructure—its highways, bridges, harbors, and waterways—are in various stages of decay. The process of erosion must be reversed.

Foreign competition is not only increasingly aggressive, it is increasingly effective. This competition must be met.

The answer to these problems is faster economic growth. The economy's growth has slowed in recent years. Continued slow growth will widen the gaps that have opened in recent years between expectations and realizations, particularly for minorities. As a result, a divisive struggle for income shares, which always threatens, could occur. This would be tragic. All Americans have a far greater interest in the size of the economic pie than in any feasible distribution. More rapid economic growth will transform dreams into realities, and national priorities into achievements.

Demands upon the Nation's resources are growing. These demands will tax our ingenuity and our resolve. They will stretch to the limits the Nation's productive capacity. If they are to be satisfied, economic growth must be accelerated, resources cannot be squandered, and the productivity of America's workers must rise.

Herein lies the rub: Productivity is not rising. It is falling. In 1980, output per manhour fell by 0.3 percent. In 1979, productivity declined by 0.4 percent. Without increases in productivity, real standards of living cannot be raised, it will be difficult to reduce inflation, interest rates, unemployment and poverty, to become less energy dependent and more competitive internationally, to rebuild the Nation's infrastructure, clean up the environment, improve health and safety, and improve our defense capability.

No nation can tolerate declining productivity growth—let alone absolute declines in productivity—for very long. To the obvious costs of output not produced and wants unsatisfied must be added to the potentially more costly effect of increased animosity among the Nation's diverse interest groups. As economic growth slows, struggles for bigger shares of a shrinking economic pie can cause inflation to accelerate, and will cause resource misallocations and still slower growth, more unsatisfied demands, increased animosity across and within income groups, and among labor, business, farmers and Government. In short, declining economic growth feeds on itself: Slow economic growth engenders even slower growth.

During the period from 1948 to 1979, real GNP has grown at a 3.5 percent annual rate. Growth of the Nation's stock of plant and equipment has made the most important contribution to GNP growth, followed by productivity and employment growth. According to testimony before this Committee, 1.6 percentage points of the 3.5 percent growth rate are accounted for by the growth of physical capital; 0.8 percentage points are attributable to the growth of employment, and 1.1 percentage points are explained by productivity enhancing developments.

Since 1974, real GNP growth has fallen to a 2.9 percent annual rate. Given the role in economic growth of productivity increases, and of underlying increases in the amount of capital and labor employed, this should come as no surprise. Since 1974, the growth rate of physical capital has declined in each of the economy's four major sectors relative to the 1948 to 1974 period. In the private domestic business economy—the most broadly defined sector—the annual growth rate of physical capital declined from 2.4 percent during the 1948 to 1974 period to 1.8 percent after 1974.

These changes in the growth rate of capital have played a major part in the decline in the growth of labor productivity noted above. And together, the productivity decline and the decline in the rate of capital accumulation have brought about reductions in the growth rate of output in three of the economy's four major sectors.

The only sector in which the output growth rate increased is farming. Declines in the output growth rate in the other three sectors occurred in spite of employment growth. Employment growth accelerated in the private domestic business economy, and in nonfarm, nonmanufacturing industries. In the case of manufacturing, employment growth was positive, but slower than the 1948 to 1974 rate.

The proximate cause of the decline in U.S. economic growth is no mystery. Slow growth of the Nation's capital stock is the core problem. If the capital stock had grown faster, productivity growth could have been sustained, and the expanding labor force would have been more easily accommodated. Had the economy grown since 1974 at a 3.5 rather than a 2.9 percent annual rate, real GNP, in 1972 dollars, would be $52 billion higher than it is today, real per capita income would be 3.5 percent higher, and the trade-offs which we now face among social, defense, and other programs would be less severe and easier to face. Simply stated, we have lost a full year's normal real growth in just six years.

Behind the productivity and growth decline

What explains the recent decline in the accumulation of physical capital? The answer is simple: Private investment and saving have been discouraged, both directly and indirectly, by bad economic policies.

Bad monetary policy has played a role; monetary policy which has not focused systematically on reducing the growth rate of the quantity of money. In their efforts to "fine tune" aggregate demand and restrict interest rate movements, the monetary authorities have underwritten the price explosion that has eroded real incomes, real cash flows, and the real rate of return on saving and investment. We have had the worst of all possible monetary worlds: We have had to live with increasingly volatile procyclical swings both in the growth rates of the monetary aggregates and in interest rates. These swings have greatly increased uncertainty. Moreover, the swings both in money growth and interest rates have been occurring around rising trends in both and, of course, in inflation as well. If nothing else had been wrong, it would be easy to see how both saving and investment would have been discouraged, and how investment and saving decisions would be increasingly biased toward short-term payoffs, and away from the objective of long-term economic growth and security.

But this is not all that was wrong in recent years. If monetary policy has been bad, fiscal policy has been perverse. On the one hand, the tax burden on working people and businesses has become oppressive. Inflation-induced bracket creep has reduced greatly real after-tax returns to personal effort, saving and investment, risktaking and entrepreneurship. For example, a married person, filing a joint return, with $16,001 taxable income in 1967 and the same real, inflation-adjusted income in 1980 ($35,920), was taxed at the margin by the Federal Government at 28 percent in 1967, and 43 percent in 1980. This increasing tax burden has transferred real resources to the Federal Government, and away from the private sector. In addition, depreciation allowances based upon historical rather than current costs have understated expenses and overstated profits, resulting in a rising corporate tax burden and a further transfer of command over resources to the Government.

The transfer of control over resources has been exacerbated by Federal activity in the credit markets. Total Federal borrowing—the sum of Federal borrowing and federally assisted, off-budget borrowing—rose from $24.4 billion in 1974 to $124.4 billion in 1980. This represents a compound annual growth rate of 31.2 percent! Moreover, total Federal and federally assisted borrowing has increased as a percent of the total funds raised by the nonfinancial sector in other ways—through the sale of debt securities, other forms of borrowing, and through the sale of corporate equities. Indeed, the Federal share of funds raised increased from 16 percent during the 1960's to 25 percent during the 1970's and climbed to 28 percent in 1980. In short, the allocation of funds raised in the financial markets is increasingly biased against pure private investment by the double-edged sword of Federal borrowing and federally assisted borrowing.

On- and off-budget Federal borrowing has inexorably increased Federal Government domination over the Nation's resources. The same is true of Federal off-off-budget or regulatory activity. In just 15 years, the regulated sector of the economy has increased from roughly one-tenth to about one-fourth of GNP. The regulatory mandates which have driven this extraordinary growth of regulatory activity impose both direct or compliance, and indirect costs on the economy. From the evidence available, compliance costs are currently running at more than $100 billion per year. The indirect costs—while difficult to measure—include higher product prices and reduced output and employment growth because of the necessity of meeting regulatory initiatives. Whatever the magnitude of these costs, they represent a hidden cost of regulatory mandates; a hidden cost whose effects include the displacement of discretionary, private spending.

There is little doubt that regulatory mandates generate benefits. However, the direct and indirect costs of securing these benefits ought to be minimized. This is nothing more than good economics and common sense. To achieve this result will require that de-

sign standards be abandoned in favor of performance standards and that, in general, least-cost methods of achieving regulatory goals be sought.

It is clear that the volume and growth rate of Federal on, off, and off-on-budget activity is too high. It also is clear that tax rates are too high. By discouraging work effort, saving and investment, risktaking and entrepreneurship, these expenditures impart a consumption, antisaving bias to the economy; a bias that cannot be reconciled with faster economic growth.

Federal spending policies have been equally debilitating. As the recipient of inflation-driven tax windfalls—windfalls deriving from tax bracket creep, and from decreases in the purchasing power of the public's holdings of coin and currency and the Federal Government's debt obligations—the Federal Government gains command of resources which the private sector could have used to finance the purchase of new plant and equipment, and other, productivity enhancing investments. The Government does not use its windfall gains in such ways. Rather, it allocates an increasingly large share of its receipts—76 percent in 1981—to so-called "uncontrollable" outlays. The bulk of these outlays are transfer payments intended to enable recipients to maintain consumption patterns in the face of rising prices. Obviously, the poor, the sick, the elderly and the unemployed should be helped. However, a large part of the expenditures which have been made to help them in recent years would not have been necessary if inflation and unemployment had been lower, and economic growth faster. In turn, bad economic policy—monetary, fiscal and regulatory—accounts for a major part of the economy's poor performance.

Reversing the decline of productivity and growth

The way to move up to a faster growth track is clear: The monetary and fiscal policy levers must be pushed in the right direction and kept there; specifically, monetary policy should be put on "slow" and fiscal policy on "go." An anti-inflationary, pro-growth strategy must include the following initiatives:

A steady reduction in the growth rate of the money supply;

An across-the-board reduction in personal marginal tax rates;

Reduction in business tax rates and depreciation reform;

Targeted incentives for saving and investment;

A reduction of Federal Government spending as a percent of GNP;

A reduction of off-budget borrowing by the Federal Government, and

A reduction in the regulatory burden on the private sector.

Inflation and interest rates will come down when and only when the Federal Reserve forgets about fine tuning, abandons any vestiges of "accommodation" by an interest rate targeting policy, and focuses instead on steady reductions in the growth rate of the money supply. It is equally imperative that we recognize that both personal and business marginal tax rate reductions are in order, and cut them. Business tax rate reductions are necessary to help offset rising energy and other input prices, to increase investment, risktaking and entrepreneurship, and to stimulate current output and employment. Personal marginal tax rate reductions and additional saving incentives are needed to prevent or at least slow bracket creep, to encourage work effort, saving, and a reduction of installment debt. The new personal saving, coupled with a reduction in installment debt will permit financing of additional investment (on top of that financed by new business saving).

The strategy of reduced money growth and personal and business marginal tax rate reductions is fundamentally anti-inflationary and pro-growth. Steady reductions in money growth will reduce inflation and inflationary expectations. Erosion of inflationary expectations will itself help reduce inflation. It will do so by decreasing anticipatory buying in expectation of continued high inflation. In addition, the erosion of inflationary expectations will pull down long-term interest rates relatively quickly. This will stimulate long-term investment and growth. For their part, permanent business tax rate reductions will reduce both current and future production costs, and increase the profitability of investments generally. Production and growth will increase as a result.

Business tax reductions will have desirable effects, both in the short and in the long run. In the short run—where plant and equipment is fixed—business tax reductions either slow the rate of increase, or actually reduce, costs of production. If large enough, business tax reductions can more than offset the upward pressure on costs coming from rising input prices; in particular, rising energy prices. In this event, business tax reductions would reduce costs, increase quantity willingly supplied at any given price, and thereby stimulate both current production and employment. As for the long run—where plant and equipment are not fixed—permanent business tax rate reductions can reduce the cost streams associated with investment projects. Given projected revenue streams, it follows that more projects will become economic, and investment will be stimulated. Thus, in both the short and long runs, rate reductions stimulate output, employment, and investment.

While business tax rate reductions will stimulate supply, personal marginal tax rate cuts will stimulate both demand and supply. Demand will rise via the positive effect of tax rate cuts on real disposable incomes. Supply will rise because of the positive effect of marginal tax rate cuts on real after-tax rates of return to personal effort and saving.

There can be no doubt that the absolute amount of saving will rise as a result of a personal marginal tax rate cut. While it has been decreasing, the saving rate is still positive. Therefore, some portion of the increase in real disposable income will be saved. Moreover, because they will increase after-tax return to saving, personal marginal tax rate cuts will impel an increase in the propensity to save out of disposable income. However, in these inflationary times, still greater incentives to save are needed. Inflation has reduced the saving rate in recent years, and there is now urgent need for additional saving to fuel faster economic growth. This need leads us to recommend additional saving incentives. These extra incentives should aim at increasing additionally the after-tax rate of return to saving and should center around steep reductions in the marginal tax rates on interest and dividend income. If these cuts are made, saving will rise to at least its historic level and will provide a major source of the financing needed to get the economy growing at a faster rate.

Whether marginal tax rate reductions induce additional work effort depends upon whether increases in real after-tax returns to effort are effective catalysts to additional effort. We believe they are. This reflects our judgment that the work ethic is not dead: Reward work better, and people will work harder, longer and smarter. Tax work, and people will substitute leisure and/or "underground" or untaxed activities.

To complement the strategy of slower money growth and reduced personal and business marginal tax rates, we commend, as absolutely necessary, an accompanying reduction in the burden of the Federal Government on the private sector. When tax rate cuts are combined with reductions in Federal spending, on- and off-budget borrowing, and a rational regulatory policy—one that recognizes that, whatever the benefits of regulation, its direct and indirect costs must be minimized—the heavy hand of Government will no longer prevent the economy from moving to a faster growth track.

The result of this monetary-fiscal-regulatory package will be growth in real incomes and jobs, a reduction in inflation and interest rates, an expansion of resources to clean up the environment, an increase in our competitive effectiveness, a greater ability to meet our defense needs, a declining share of GNP being commanded by Government, and the disappearance of the "zero sum society."

II. MONETARY POLICY

A proper monetary policy is crucial to the achievement of reduced inflation and interest rates, improved living standards, and economic stability. A proper monetary policy is not difficult to define. It is one that is focused on the long run and tailors money growth so that it is "commensurate with the economy's long-run potential to increase production."

This is what Congress asked the Federal Reserve to do in passing House Concurrent Resolution No. 133 in 1975 and again in passing the Federal Reserve Reform Act of 1977 and the Full Employment and Balanced **Growth Act of 1978. In adopting this guide**line, Congress expressed its sense that this would "promote effectively the goals of maximum employment, stable prices, and moderate long-term interest rates." Money growth had accelerated above the guideline in the decade before 1975. Unfortunately, it accelerated further from 1975 to 1980.

The facts, in brief, are these: From 1955 to 1964, average annual money growth, measured by the percentage change in M1B from the prior year, was 1.94 percent. It jumped to 5.55 percent in the 1965 to 1974 period and to 6.62 percent from 1975 to 1980. (In essence, M1B equals coin, currency and checking deposits in commercial banks (old M1) plus automated transfer service (ATS) accounts, negotiable order of withdrawal (NOW) accounts, and share drafts in all depository institutions. M1B closely measures the Nation's means of carrying out its transactions.)

In association with these long, high jumps in money growth, we have experienced rising inflation, volatile interest rates around a rising trend, lower real GNP growth, reduced productivity increases, generally higher unemployment and growing use of resources to cope with inflation rather than to improve living standards. These are the legacies of a faltering fiscal policy and over-regulation. Our poor economic performance is also the result of allowing the quantity of money to grow faster and faster; not every year but, by and large, during the past 17 years. Pertinent data are set forth below:

TABLE II-1.—MONEY GROWTH AND SELECTED MEASURES OF ECONOMIC PERFORMANCE (1956-80)

	1955-64	1965-74	1975-80	1977-80
M1B growth (yearly percentage change)	1.94	5.55	6.62	7.40
GNP deflator (yearly percentage change)	1.99	4.80	7.52	7.66
90-day T-bill rate (yearly average)	2.77	5.50	7.48	8.51
Real GNP growth (yearly percent change)	3.63	3.40	2.93	3.32
Output per hour, private business sector (yearly percent change)	3.04	2.07	1.13	.30
Unemployment rate (yearly average)	5.36	4.62	7.04	6.51

Clearly, we must reduce money growth, and we must do it now. We cannot, as some suggest, wait until inflation unwinds be-

fore we do so. If we wait, we will underwrite permanent inflation at increasingly intolerable rates. As shown by the data assembled above, over long periods, the rate of inflation tends to match the rate of increase in the quantity of money. More important, the latter tends to lead. Measured over four-quarter periods, the rate of inflation follows in the wake of earlier money growth. In the post-Korean War period, the lag has averaged eight quarters. Reasons for the lag include regulatory delays, contractual rigidities, and rigidities involving advertised and "established" prices.

The evidence warns against waiting until inflation unwinds before reducing money growth. The lesson, in short, is that if we do, it will not. Specifically, money growth must be reduced over a period of time to a level commensurate with our economy's long-run potential to expand production and maintain full employment at zero inflation. These are the goals of the Full Employment and Balanced Growth Act of 1978. They will not be achieved unless money growth is decelerated. Using M1B as our measure of money, and year on year changes as our measurement standard, one sensible guideline is 6 percent growth in 1981, 5½ percent in 1982, and 5 percent in 1983 and 4½ percent in 1984. These guidelines are meant only as an example of the gradual reduction in M1B growth which is required to stop inflation and promote economic stability, growth, and low interest rates.

We urge the Federal Reserve to announce this or some other declining track for M1B growth as soon as possible. The announcement will enable the Congress and, more importantly, financial market participants and the public at large to monitor the Federal Reserve's performance as the record unfolds. By this time next year, assuming the union of promise and performance, monetary uncertainty will be significantly reduced with salutary impact on both the level and volatility of interest rates. Furthermore, current expectations for long-run inflation, averaging 10 to 12 percent per year, also will be reduced as M1B growth is decelerated. In turn, this will produce a major break in long-term interest rates even before inflation breaks. In time, short-term rates will follow.

Given meaningful, yet not drastic, deceleration of money growth, a proper fiscal policy and regulatory reform (as discussed in subsequent chapters), we believe it is not unrealistic to expect the rate of rise of the GNP deflator to fall to 7 to 8 percent next year, to 5 to 7 percent in 1983, to 4 to 6 percent in 1984, and to 3 to 4 percent in 1985.

In setting forth this objective for monetary policy, we reject the contention that there is some "core" or "underlying" rate of inflation which is independent of money growth. Sustained inflation is not an inertial process which converts unpleasant outside shocks into a wage-price spiral. It is not "one darn thing after the other." It is "the same thing over and over again." The recurring event, as shown by the evidence assembled and mapped in Chart 1, is excessive money growth.

Objections considered

It will be objected that the world is too complex and full of surprises for the Federal Reserve to adhere to a pre-set decelerating M1B growth track. It will be argued that the Fed will have to deviate from any such path (1) to keep order in credit markets, (2) to accommodate supply shocks, and (3) to compensate for changes in money demand and the velocity at which M1B circulates. We consider these objections below.

Keeping Order in Credit Markets

Many fear that, unless the Federal Reserve keeps order in credit markets, interest rates will rise much higher than even today's historically high rates and bring on another recession. They favor resisting upward pressures on interest rates even at the cost of allowing money to grow faster than desired over the long-run. We reject this counsel. It assumes that increases in money growth will reduce interest rates generally when, in fact, history demonstrates that the opposite is true.

Historically, increases in money growth have operated directly to decrease interest rates. However, this direct effect is both short-lived and trivial. It is followed within three to six months by increases in interest rates which ultimately (in about two years) equal (in percentage terms) the increase in money growth. If the Fed were to increase M1B growth by way of trying to prevent interest rates from rising (as it unfortunately has so often in the past), it would buy at most a few months of so-called order in credit markets. We would then pay for this by living for years in a higher interest rate environment. Although it is tempting to focus on the next few months, rather than upon the long run, it is a mistake to do so.

Throughout the past four years, the Federal Reserve was urged repeatedly by the Administration and others to increase the rate of money growth in order to reduce interest rates. Looking backward, it is clear that this advice was wrong. We should have reduced M1B growth ½ to 1 percent a year after 1976 (when it grew 5.56 percent) instead of increasing it to 7.53 percent in 1977 and 8.16 percent in 1978. Inflation could not have reaccelerated if we had. By accelerating money growth, the Fed avoided the higher interest rates it was trying to prevent for only a few months, but engineered a subsequent prolonged period of skyrocketing interest rates. The 90-day T-Bill rate averaged 4.93 percent in the second half of 1976 and 4.99 percent in the year as a whole. It fell to an average of 4.72 percent in the first half of 1977 and to a low of 4.54 percent in May. By July, 1977, it averaged 5.15 percent and it has climbed much higher since then.

SUPPLY SHOCKS

Supply shocks have two macroeconomic impacts. One is a temporary reduction in the growth rate of the Nation's output of goods and services; the other a temporary bulge in the general rate of inflation. Other things equal, the two must balance in the sense that total spending on all goods and services will be unaffected, even though spending on the particular goods and services immediately involved may rise or fall depending on the demand elasticities for these goods and services.

For example consider the devastating supply-side shock that occurred in late 1973 and 1974 when OPEC raised the price of oil and, for a time, the Arab nations embargoed shipments of oil to the United States. We had to make do, during the embargo at least, with less oil and we had to pay higher prices for it both during and after the embargo. The price rise made a non-trivial amount of the Nation's plant and equipment permanently non-economic overnight. As a result, real GNP growth was decreased and GNP inflation increased; both, however, only temporarily. Estimates provided in a recent study by the House Subcommittee on Domestic Monetary Policy indicate that the 1973 to 1974 OPEC oil supply shock reduced real GNP growth about 4 percentage points below what it otherwise would have been in 1974 and raised GNP inflation about 8 percentage points that same year. These estimates are close enough in absolute value to be considered as balancing with respect to total spending on GNP goods and services.

Droughts and other supply shocks produce the same results. All operate to reduce temporarily overall real GNP growth and raise GNP inflation. Nothing can be gained from trying to change these results by increasing money growth.

Increasing money growth above a pre-set target growth to accommodate supply shocks and somehow soften their blows can only add to inflation. It will not make up for the direct reduction of supply. Nor will it make it profitable to operate plant and equipment that has been rendered noneconomic by the shock. It will only increase prices more than they would otherwise rise—the price of the product immediately impacted by the supply shock as well as prices in general.

On the other hand, it also would be wrong to drop money growth below targeted growth in response to the sudden surge of inflation which accompanies the supply shock. The surge will pass. Dropping money growth to resist it will only exacerbate the temporary shock to output.

In this regard, it is well to remember that in 1973 and 1974, the Federal Reserve allowed—or caused—a sharp break in money growth. M1B growth plunged from 7.93 percent in the four quarters ending with the second quarter of 1973, preceding the OPEC oil embargo, to 3.55 percent in the four quarters, after the embargo, ending with the first quarter of 1975. (Velocity was not a problem at the time as shown by the fact that, between these same endpoints, the four-quarter rate of rise in the velocity at which M1B turns over into GNP goods and services fell only slightly, from 3.21 percent to 2.62 percent.) Together, the drop in money growth and the oil supply shock decreased real GNP growth from 5.46 percent in 1973 to —1.39 percent in 1974. Part of that decline could have been avoided without doing violence to the long-term fight against inflation if the decline in M1B growth had been limited to 2 or 3 percentage points during the period instead of being allowed—or caused—to fall nearly 5 percentage points.

Changes in velocity

Many, including both Federal Reserve spokespersons and critics of the monetary authorities, argue that the velocity at which M1B turns over each year into GNP goods and services is unstable. They counsel that the Fed must be prepared to lean against the winds of increases or decreases in the rate of rise of velocity by moving M1B growth below or above the pre-set target as the new velocity "trend" dictates. We cannot accept this counsel. We reject it because, although the rate of rise of M1B velocity is quite erratic measured from one quarter to the next (and even from one year to the next), it has been remarkably stable over the long run; that is, since the Korean War. Measured from one three-year period to the next, yearly average percentage changes in M1B's velocity ranged between 1.62 percent and 4.00 percent in the post-Korean War period. Pertinent data are set forth below:

TABLE II-2.—M1B AND ITS VELOCITY

[Yearly percentage changes]

Period	Velocity	M1B	Period	Velocity	M1B
1956-58	3.00	0.97	1968-70	1.62	5.55
1959-61	3.90	1.32	1971-73	2.74	7.04
1962-64	3.45	3.13	1974-76	4.00	5.02
1965-67	3.41	4.25	1977-79	3.56	7.81
12-yr average	3.45	2.42	12-yr average	2.97	6.35

In 1980, velocity increased 2.6 percent. The data indicate that neither our economy's recent instability, nor the accelerating inflation that has been its principal manifestation, can be attributed to changes in velocity's rate of rise. They also indicate the danger of trying to lean against perceived changes in velocity's "trend" rate of rise based on quarterly or even yearly information. The data show that, in the past, these changes have not lasted. Thus, were the Fed

to compensate for a sudden slowdown in the rate of rise of M1B's velocity for one or even a few quarters by accelerating M1B growth, it would court faster inflation. This is so because, as the growth of M1B accelerated, its impact on spending and prices would be reinforced by the return of the rate of rise of velocity to its historic trend.

We recognize that the future may be different than the past. The trend rate of rise of velocity may slow as NOW accounts spread. However, we caution against anticipating this event, based on data for less than three to six years. Before raising money growth to compensate for any observed slowdown in the rate of rise of M1B's velocity, the Fed should wait long enough to make sure the slowdown is permanent.

In the same way it would be a mistake to reduce money growth "below target" to offset a perceived speed-up in the rise of velocity until sure the speed-up is permanent. In this regard, a temporary speed up is likely in the wake of a tax cut.

The Final Objection

In the final analysis, real GNP growth is unaffected by money growth. However, in the short run, decreases in money growth will, other things the same, decrease real growth. We recognize this but reject counsel to keep money growth high in consideration of this effect. To do so would keep inflation and interest rates high and require, in time, accelerating, money growth and thus higher and higher inflation and interest rates. The end result of this course of action would be a calamitous boom-bust cycle.

If we want to stop inflation and reduce interest rates, we must reduce money growth as part of the overall strategy described in Section One. There is no other way. Fortunately, the short-run decrease in real growth which reducing M1B growth will bring, other things the same, can be minimized and possibly even avoided entirely. Other things need not stay the same. In particular, new fiscal policies can be put in place which will propel economic growth upward while at the same time, our recommended monetary policy is damping inflation. We turn now to the new fiscal policies to be put in place.

III. FISCAL POLICY

Decelerating money growth will in time eliminate inflation. The Nation must recognize that it will take a period of years, not months, for inflation to slow substantially. Many warn that the transition to stable prices will be hard. However, the bumps can be smoothed in advance. A properly coordinated fiscal policy can make the transition from a stagnant, inflationary economy to a robust, non-inflationary economy more certain and less painful. The elements of such a fiscal policy would include:

An across-the-board reduction in personal marginal income tax rates;

Business tax and depreciation reform;

Targeted incentives for saving and investment;

A reduction in Federal Government spending as a percentage of gross national product; and

A reduction in off-budget borrowing and spending by the Federal Government.

It is unfortunate that the national debate over fiscal policy has centered around whether tax cuts, by themselves, could reverse the economy's poor performance. This is unfortunate because it has been evident for some time that tax cuts would be accompanied by reductions in government spending and borrowing. In the past, this Committee has made it clear that supply-side tax cuts must be accompanied by reductions in government spending. The last election campaign saw both candidates support reductions in the growth of taxes and government restraints on the economy. President Reagan made no secret of his plan to propose a fiscal package including major spending cuts as well as marginal tax rate cuts. The question of whether tax cuts alone could turn the economy around was never a meaningful, operational issue and today definitely is moot.

Nonetheless, there is considerable controversy about the proposal to cut marginal personal income tax rates across the board. Those opposed deny that such a cut would have significant positive impact on productivity and real growth, and assert that it would be inflationary. Their arguments require us to evaluate how across-the-board personal marginal income tax rate cuts will impact on the economy. In this evaluation it is useful to distinguish between the direct effects on markets for goods and services and the effects which some say we must expect as a result of credit market changes that will be induced by such tax cuts.

Direct effects of reducing personal marginal income tax rates

Our view is that, directly, across-the-board personal marginal income tax reduction will increase productivity and real growth substantially and will not increase inflation. The effect on real growth is unambiguous. It is a logical deduction from *both* demand and supply-side economics. In demand models, tax reduction increases demand which pulls up supply. In supply models, supply is increased directly. President Kennedy recognized this in his 1963 Economic Report when he stated, "Only when we have removed the heavy drag our fiscal system now exerts on personal and business purchasing power and on the financial incentives for greater risk-taking and personal effort can we expect to restore the high levels of employment and high rate of growth that we took for granted in the first decade after the war."

However, the direct inflationary impact of across-the-board personal marginal income tax cuts cannot be determined by logical deduction from economic theory. On the demand side, personal income tax rate cuts will stimulate spending, and could thereby add to inflationary pressures. On the supply side, personal marginal tax rate cuts will impel additional work effort and production, and thereby operate to slow the rate of rise of prices. The question is which of these effects dominates. It is our view that the supply effect does. In addition, we want to stress that our fiscal policy program calls for spending cuts—which may reduce demand somewhat—and special incentives for saving and investment. These incentives, which are aimed at substantially reducing the marginal tax rate on *all* savings income, will help shift individual activities toward saving and away from consumption. Consequently, we can expect an extra large part of the personal tax cut and the income it generates to be used to increase supply (saving and investment) as opposed to demand (consumption).

In summary, then, we believe that the direct impact of across-the-board personal marginal tax rate cuts will be to increase real growth without increasing inflation.

Credit market effects and their changes

Those opposed to enacting across-the-board cuts in personal marginal income tax rates fear that, unless government spending is cut dollar-for-dollar with the cut in taxes, there will be either a catastrophic collision in credit markets or abandonment of the attempt to reduce money growth. In this view, faster inflation would be the necessary result. The argument contains a kernel of truth. It would have validity if the purpose of cutting taxes were to increase consumption. A tax cut such as a tax rebate, which does not alter relative prices or marginal incentives would produce a collision in credit markets or accelerating inflation. The linkage is as follows:

1. The rebate increases the Federal deficit.

2. An increase in the deficit increases Federal borrowing.

3. This leads to "crowding-out" in credit markets, putting upward pressures on interest rates. Chaos results, unless the Federal Reserve relieves the pressures by accelerating the growth of money, which in time would increase inflation and, ironically, interest rates.

We need not fear such a collision and cannot allow such fear to prevent us from reducing personal marginal income tax rates across the board. Spending cuts which, as stated earlier, are an integral part of our fiscal policy program, need not be made dollar-for-dollar with the tax cuts. By way of clarification, we provide the following description of how marginal rate cuts will be financed in major part by feedback from economic growth induced by the cuts themselves and by corollary changes in after-tax interest rates.

Funding the Tax Cuts

There will be some actual revenue increases resulting from the tax reduction itself. This is indisputable. Expansion of the Nation's economic base and real GNP will cause the tax revenues of all levels of government to rise more than they would without the expansionary effects of the reduction in personal marginal tax rates.

1. Reflows from higher economic growth. Even in the short-run—when plant and equipment are fixed—there will be some stimulation of real economic growth and employment, yielding additional tax revenues. The major part of this reflow will come from taxes already in place (adjusted for the cut in rates) on the incremental real GNP induced by the tax cuts.

2. Reduction in the underground economy. In recent years there has been much research done on the socalled underground economy; that is, on economic transactions that are not taxed. Estimates of the size of the underground economy range between $100 billion and well over $200 billion. Much of this economic activity is said to result from high marginal tax rates on individuals and businesses—employees, employers and self-employed persons working for cash "off the books," and the like. Clearly, it is not unreasonable to assume that an across-the-board reduction in tax rates will generate some new tax revenue, at the expense of the underground economy. This is because the incentive to cheat the system will be much diminished.

3. Reduction in tax deductible consumer borrowing costs. Across-the-board personal marginal income tax rate cuts will raise consumer after-tax borrowing costs. For example, for persons in the 40 percent tax bracket, under present law, a 10 percent tax rate reduction will raise borrowing costs nearly 7 percent. For such persons, each dollar of interest received by the lender now costs the borrower, after-taxes, only 60 cents ($1 less 40 percent of $1). After a 10 percent tax rate reduction, it will cost the borrower 64 cents, or 6.7 percent more than presently. A 30 percent tax rate reduction will raise after-tax borrowing costs to 72 cents for each $1 borrowed, or 20 percent more than presently. We do not doubt that these changes will reduce both household borrowing for consumption purposes and interest deductions on personal tax returns. The latter will provide an additional increase in tax revenues.

4. Reduction in tax-shelter investments. About a third of all taxpayers itemize deductions, and about 5 percent of all taxpayers are in the 50 percent tax bracket or above (counting only Federal income taxes). These individuals have a powerful incentive to seek tax-sheltered investments. If one's income is taxed on the margin at more than 50 percent, it is more profitable to save a dollar in taxes than to earn a dollar of "unearned" income. As a result, the existing tax structure has led to a proliferation of investment advisors, tax lawyers, accountants

and others whose job it is to help high income people avoid taxes. By and large they reduce their clients' taxes and the presumption is that the more powerful the incentive to avoid taxes (i.e., the higher tax rates are) the more tax liabilities are reduced. Closing "loopholes" is not apt to help much in this regard and may not be cost effective.

On the other hand, if marginal tax rates are reduced, the relative attractiveness of investments in tax-sheltered investments is also reduced. For example, after the Kennedy tax rate reduction of 1963 the proportion of gross private domestic investment channeled into housing declined from 35.4 percent of total investment in 1963 to 33.5 percent in 1964, 29.8 percent in 1965, 25.5 percent in 1966, and 25.4 percent in 1967. This was due to the fact that the decline in marginal tax rates from the 1964 tax rate cuts reduced the tax advantage of home ownership, making other investments relatively more desirable.

Since 1967, the interaction of inflation and the steep progressivity of the personal tax structure has sharply increased the attractiveness of "consumption assets." like housing, relative to "production assets."

Clearly, some revenue reflow will result from personal marginal tax rate reduction because people will reduce their use of tax-sheltered investments and increase investment in more productive investments, the income from which is taxable.

5. Reduction in nonproductive investment. Inflation and excessive taxation together have produced the phenomenon of nonproductive investment in such things as gold, paintings, rare stamps, antiques, etc. The advantage of such "consumption investments" is that they tend to hold their value during periods of inflation while producing non-taxable pleasure for their owners. As long as a capital gain is not realized it is not taxed. This is why the capital gains tax is such a harmful tax. It encourages people to hold on to assets which, aside from the tax break, yield lower returns from alternative investments. Because of the tax, they cannot afford to sell them, especially during a period in which much of the capital gain is due solely to inflation.

In this connection, the latest data from the Office of Tax Analysis strongly reinforces the view that, in the case of capital gains taxes, a cut in the tax rate very nearly paid for itself the first year. Prior to the 1978 capital gains tax cut, the Department of Treasury estimated that it would "cost" $2.6 billion in lost revenue in 1979. The data now show the actual revenue loss to have been a mere $100 million. Indeed, it is possible that when the final tax return figures are examined, even this loss will be eliminated.

In short, much of the investment in recent years in art objects and other nonproductive or "consumption assets" has been fueled by tax considerations. When it becomes relatively more desirable to put one's money elsewhere because of a reduction in tax rates, there will be an "unlocking" of capital in these "consumption investments," which will produce tax revenue for the government and free-up capital for productive investment in business plant and equipment.

For this reason, we support further reductions in the capital gains tax, such as that which would result from a reduction in the highest personal marginal tax rate from 70 percent to 50 percent. Under current law, this would automatically reduce the maximum capital gains tax rate from 28 percent to 20 percent.

Increased Saving

The present tax system makes it twice as costly to save as to consume. We are taxed both on the money we save when we earn it and when that money earns interest. Therefore, an across-the-board reduction in income tax rates would remove two disincentives to save which, in turn, will help to finance the tax rate cuts. As Dr. Charles Walker told the Committee, an across-the-board personal marginal income tax rate reduction would boost saving for several reasons. Dr. Walker said:

First, the disposable income of many of the nation's thriftier individuals and families would be increased, thereby enlarging the pool of funds from which they can save. Second, and also highly important, the after-tax rate of return on each additional dollar saved would increase sharply, thereby giving a significant boost to the incentive to save.

In addition to the incremental personal savings which will be forthcoming, there will be substantial incremental business savings. Undistributed profits will rise with real GNP. Also, to the extent that depreciation allowances are liberalized, saving will rise by the same amount. This is true by definition, since business depreciation allowances are a major component of gross national saving.

Finally, because incentives to save are greatly reduced in times of high inflation, our fiscal package calls for special incentives to stimulate saving. Across-the-board tax rate reductions and depreciation reform with specific saving incentives, such as splitting earned and unearned income and taxing each at the lowest tax rate, would further increase national saving even in periods of high inflation.

The point is that increased saving induced by the tax cut will not only help build our Nation's capital base, leading to increased employment, growth, and, therefore, tax revenue in the long run, it also will help finance the static deficit arising from tax rate reduction.

The additional saving and new tax revenues which will be generated by economic growth induced by tax rate reductions and saving incentives mean that we will not have to choose between a collision in financial markets or inflation. Private investors will not be crowded out of credit markets because there will be a larger pool of funds available to finance the tax rate reduction program. Thus, the pressure on the Federal Reserve to monetize that debt will be minimal and shortlived, allowing it to set and hit lower money growth targets and thereby to stop inflation and reduce interest rates.

An Illustration

For fiscal year 1982, the Administration proposes to reduce personal taxes by $44.2 billion and business taxes by $9.7 billion, the latter by liberalizing depreciation allowances. A conservative estimate is that over the next few years the fiscal year 1982 tax cuts will increase yearly GNP by about $92 billion. (The additional tax cuts planned for later years will further increase GNP.) As a result of this expansion of real GNP, the tax revenues of all levels of government (Federal, State and local) will increase by $30 billion and saving (personal and business) by $6 billion. Adding these sums to the $9.7 billion direct reduction in business taxes and corollary increase in business saving, we estimate that less than $10 billion of the $53.9 planned fiscal year 1982 tax cuts remains to be financed. We believe that this gap will be funded easily by the increased saving which will result from the after-tax interest rate effects of personal marginal tax rate reductions and targeted saving incentives, plus tax reflows from—

Reduced tax deductible consumer interest charges;

Reduction of the underground economy;

Reduced tax sheltered investment; and

Liquidation of investments in art objects, precious metals and the like.

In other words, there is no reason to believe private investment will be crowded out. Indeed, we believe private investment will be stimulated. The combination of marginal tax rate reductions on personal income, business depreciation reform, and some form of targeted saving incentive would, in our view, induce a sufficiently large increase in saving to close the budget gap ($10 billion in the illustration), with enough left over to create a substantial number of new sources of investment capital.

Spending cuts

In a static framework, spending cuts and tax cuts have offsetting effects on the budget deficit. In a dynamic world they do not. In our view, it is not necessary to plan static spending cuts which will exactly equal the static tax cuts that are planned. The planned marginal tax rate reductions will increase real GNP more than the spending cuts will decrease it. This is because marginal tax rate reductions will increase personal effort, savings, investment, entrepreneurship and risktaking. Judicious spending cuts need not decrease effort, saving, investment, entrepreneurship and risktaking: some spending cuts might, but others will actually increase them.

President Reagan has proposed a broad array of spending cuts to accompany the tax cuts. At first glance, some program cuts will hurt some people. However, in this regard, an expanding economy improves the political climate in which such legislated cuts in spending can be made. When there is full employment and growth, the need for special programs to aid this sector, that industry, these workers and those business firms is less urgent.

Moreover, it is important to recognize that tax cuts not only produce additional saving and revenue reflows to the government, they also lead to automatic spending cuts.

In a stagnating economy it is almost impossible to make significant cuts in Federal spending, which is made up largely of entitlement programs. When the economy stagnates, people become unemployed and real standards of living decline, causing individuals to make claims on government services. When an individual is employed, he or she is a source of government revenue; when the person is unemployed, he or she becomes a consumer of government revenue, through such programs as unemployment compensation, trade adjustment assistance, food stamps, etc. Thus, an increase in unemployment reduces government revenue even as it causes an increase in spending. It is estimated that a one percentage point increase in the national unemployment rate "costs" the Federal Government $25 billion per year.

The converse also is true. An expanding economy will provide jobs for the unemployed and higher living standards for many now in need. People will go off unemployment rolls, off food stamps, off welfare and will become taxpayers rather than tax consumers. Thus, a reduction in tax rates will partially pay for itself by causing automatically a reduction in spending.

Finally, we want to stress that if money growth is decelerated in a meaningful but not drastic way, as we recommend in Chapter II, inflation will decelerate in time. As it does, and even in anticipation of the event, interest rates, especially long-term interest rates, will decline. Reduction and, ultimately, elimination of the inflation and uncertainty premiums from interest rates will save the Treasury tens of billions of dollars in interest costs every year.

Off-Budget Spending Cuts

We can also help to finance the tax cuts by reducing the Federal Government's off-budget activities. The Federal deficit for fiscal year 1982 was estimated by the Carter Administration to equal $27.5 billion. However, total Federal and federally-assisted borrowing will be $126.8 billion. The deficit

accounts for only about 21 percent of total Federal borrowing. Clearly, any cuts that can be made in Federal borrowing, loan guarantees, and Federal agency borrowing will have the same positive effects on credit markets and interest rates as a cut in spending.

In conclusion, we strongly support a coordinated program of tax cuts for individuals and businesses, and reductions in Federal spending and borrowing, including off-budget borrowing, to get the economy moving forward again, while gradually slowing money growth to stop inflation and reduce interest rates.

The equity issue

Many assert that across the board personal marginal tax cuts are unfair; that they will cut the taxes of the "rich" too much and the taxes of the "poor" too little. In fact, they will scale down all tax rates, and the scalar is the same for all individuals.

In this regard, it is important to recognize that, since 1967, inflation-induced bracket creep has greatly increased the tax burden of middle- and upper-income persons despite some legislated tax cuts. It would be wrong from the standpoint of equity, as well as counterproductive from the standpoint of the economy, not to correct past bracket creep by scaling marginal tax rates down across the board. For the record, some pertinent data are presented in Table III–1.

TABLE III–1.—TAX RATES ON SAME REAL TAXABLE INCOME (1967 AND 1980)

1967 taxable income	1980 equivalent inflation-adjusted taxable income	Marginal percentage tax rates		Average percentage tax rates	
		1967	1980	1967	1980
$1,000	$2,245	15	zero	14.0	zero
$4,000	$8,980	19	18	15.5	9.8
$8,000	$17,960	22	24	17.3	15.3
$12,000	$26,940	25	32	18.8	19.5
$16,000	$35,920	28	43	20.4	23.6
$20,000	$44,900	32	43	21.9	27.5
$24,000	$53,880	36	49	23.2	31.0
$28,000	$62,860	39	54	25.4	33.8
$32,000	$71,840	42	54	27.1	36.3
$36,000	$80,820	45	54	28.7	38.3
$40,000	$89,800	48	59	30.4	40.1
$44,000	$98,780	50	59	32.0	41.8

The proposed across-the-board marginal tax rate cuts will tend to restore the progressivity of the tax code which existed in 1967 before inflation distorted it.

IV. THE INTERNATIONAL ECONOMY

The United States operates in an open world economy. This means that steps taken by the Federal Government for domestic economic policy reasons have rapid international effects and vice versa, steps taken for international reasons have rapid domestic effects. The linkages between domestic economic policy and the international economy take place primarily through the foreign exchange markets. Exchange rate changes affect investment, trade flows and the balance of U.S. international payments. In turn, changes in trade flows and the balance of payments often impede domestic policy responses. In the past, some of these responses have been destabilizing domestically.

The international economy is a far different system from what existed a decade ago. The introduction of floating exchange rates in 1973, the sophistication of today's foreign exchange market traders, and the increased mobility of international capital have removed old constraints but placed new ones on domestic economic policy. Under the new systems, domestic policy initiatives can quickly translate into a rise or a fall in the dollar exchange rate before the initiatives themselves have had a chance to take effect in the U.S. economy. Because of the new "openness" in the international economic system, domestic economic policy must be formulated taking into consideration its international effects.

Designing domestic economic policies to promote international economic stability

We believe that our monetary and fiscal policy recommendations described earlier in these views will also serve the international economic objectives of a strong dollar and a stable balance of payments. This is because foreign exchange traders will interpret the policies we are recommending as a sign that the United States at long last is determined to halt the dangerous inflationary trends which have characterized the Federal budget, monetary policy, and the economy over the past decade, and weakened the dollar internationally. The dollar is firming in all exchange markets due to a new confidence in the U.S. economic policy. In turn, this makes it easier to implement the tough domestic policies which we are recommending and which closely parallel those of the new Reagan Administration. It means, for example, that as we unwind inflation and reduce government spending, domestic interest rates can fall without the flight from the dollar that might otherwise accompany a reduction in interest rates. In short, fortunately, we can promote both domestic and international economic stability with the same domestic policies. The key is that these policies must be believed capable of stopping inflation and, in time, prove to be so capable.

Notwithstanding our optimism about the international economy, there are two major areas where the course of events will require a careful U.S. response.

International policies which will promote domestic economic growth and stability

Trade Competitiveness

The progress made in the past two years toward defining the components of a competitive trade policy, as reflected by recommendations made by the Congress, the Executive Branch and by organizations such as the President's Export Council, needs to be followed up immediately with action to ensure that the hard-fought consensus does not evaporate in a constantly shifting international competitive environment. Recent statistics provide little reason to cheer.

The massive 1980 merchandise trade deficit of $26 billion (c.i.f.), while reflecting modest improvement over 1979, was much too large. The 1980 manufactured goods trade surplus can be largely attributed to business cycle and lagged exchange rate effects from the 1978 period and does not reflect any significant improvement in competitiveness of U.S. manufactured goods. Similarly, the surplus in the current account, although welcome, was due in substantial part to accounting changes affecting retained earnings of overseas subsidiaries. It is not a reason for complacency.

Indeed, for a more accurate assessment of our relative competitive posture, it is best to consider the U.S. share of world exports of manufactured goods. This statistic shows a steady decline throughout the 1970 to 1979 period—from 21.4 percent in 1970 to 17.4 percent in 1979. Further, in an era in which international competitivenes is increasingly defined in terms of the home market, U.S. manufactured imports as a share of domestic manufactured goods production have risen to 20 percent in 1979, a 428 percent increase over 1960.

The competitive climate of international commerce demands an aggressive spirit in the private sector as well as in government to deal with the realities of the marketplace. Notwithstanding recent achievements within the GATT to eliminate many tariff and nontariff barriers to free trade, including unfair export incentives, it is still a less than perfectly competitive world in which U.S. producers and consumers must compete. It is for this reason that the "business as usual" mentality must give way to a more realistic perception by business and government of what is required to compete at home and abroad.

Several issues involving incentives and disincentives to trade were addressd inconclusively by Congress in the past year. In our view, they warrant renewed attention. Among these are: legislation to establish export trading companies, a concept which should prove useful in expanding the Nation's export base; legislation reducing the tax burden on U.S. employees stationed overseas; a reconsideration of the extraterritorial application of U.S. antitrust laws, with special note as to how such application deters U.S. companies from seeking new markets; a rational clarification of the accounting and business procedures standards of the Foreign Corrupt Practices Act.

It is critical at this important juncture that the Federal Government improve the climate for U.S. firms' direct investment abroad and the increased export of services. U.S. foreign direct investment, while providing an efficient allocation of capital, also has promoted U.S. competitiveness and served to accelerate exports to overseas manufacturing facilities. Such direct investment also serves a development function by providing needed capital and technology to the developing areas of the world.

Output of the service sector currently accounts for 30 percent of U.S. exports, 70 percent of U.S. jobs, and 65 percent of our gross national product. As the U.S. economy becomes increasingly service oriented and as our balance of payments becomes increasingly reliant on service export earnings, the lack of internationally agreed codes of conduct on such trade will become more costly to U.S. international competitiveness. Similarly, a lack of updated agreement on safeguards, especially in a period of global high unemployment and slow growth, bodes poorly for efficient resolution of trade disputes in the future.

The advances made by the recent Multilateral Trade Negotiations (MTN) Agreements toward a more liberal trading system will contribute to growth in world trade and result in fewer contrived trade impediments and enhanced welfare for all participants. However, it is critical for the trade negotiation process to continue to pursue multilateral agreement respecting service industries and a meaningful safeguards code.

International finance

At the present time, non-oil developing countries are encumbered by a set of pressures which carries potential dangers for the world financial system. First, the dramatic increase in the price of crude oil over the past two years has added to the energy bill of those nations. According to the U.S. International Development Cooperation Agency, these countries are now paying $67 billion a year for energy imports which cost only $32 billion in 1978. The projected figure for 1985 is $124 billion.

Second, interest rate increases have added to the cost of financing development. Estimates of the Agency for International Development indicate that the *increase* in interest costs over the past two years has accounted for an additional $13 billion in current account deficits for the non-oil LDC's.

Third, the slowdown in growth among developed countries has decreased the hard currency foreign exchange earnings which the LDC's might have earned by exporting to developed countries. This helps explain why the total current account deficit of non-oil LDC's increased from $36 billion at the end of 1978 to $79 billion for 1980.

Fourth, new financing for non-oil LDC's is expected to grow slowly. This is because official financing is suffering from budget constraints; at the same time, private financing is coming up against the limits that lenders believe to be the prudent ones for exposure to financial risk in these countries. As a group, the non-oil LDC's suffer twice the world average inflation rate. Their external debt has climbed faster than their ability to pay it off. They are in hock to the rest of

the world to the tune of $300 billion. Their bill for energy, a consumable item, is being paid increasingly by loans rather than by the foreign exchange earnings from exports. Partly as a result of this, the debt service of these poorer countries has climbed both absolutely and as a percentage of their GNP.

The international banking system has relieved many of the pressures afflicting non-oil LDC's in recent years. In fact, more than half of the official debt of non-oil LDC's now is owed to private lending sources. This so-called "recycling" process, from the surpluses of OPEC countries, through the banking system of the developed nations to the financing needs of the non-oil LDC's, has become a major aspect of international finance. Preliminary data suggest that all financing needs can be met in 1981. The same data, however, indicate that there may be problems later on. In the final analysis, these problems can only be resolved by the non-oil LDC's themselves. However, the United States can assist two ways: First, by strengthening the capabilities of the International Monetary Fund to reduce pressures on the world monetary system (e.g., disciplining nations that follow irresponsible domestic policies) and second, by working through diplomatic channels to enlist the cooperation of oil exporting countries.

V. GOVERNMENT REGULATION

During the past 15 years the Federal Government has increasingly relied on regulation of the private sector to channel resources toward such public goals as a cleaner environment, safer workplaces, less hazardous consumer products and equal employment opportunities. These programs usually impose significant compliance costs on businesses which are then passed on to consumers through higher prices.

Many government regulations, particularly those affecting health, safety and the environment, have contributed significantly to the overall well-being of the vast majority of American consumers and workers. We would not turn back the clock, because many regulatory policies have produced substantial benefits for the public.

However, regulatory programs impose heavy costs and burdens on business (and ultimately consumers) and, until recently, these costs have been almost entirely ignored in setting regulatory policy. It is time we took a hard look at the cost side of this equation.

One measure of the dimension of the problem was provided to the Committee by Murray Weidenbaum in a study that put the 1979 private sector compliance costs at $97.9 billion, and the agency administrative costs at another $4.8 billion. That $97.9 billion was 6 percent of personal consumption expenditures in 1979. Though it would be difficult to ferret out the precise marginal costs imposed by regulation, it is universally acknowledged that regulation has both a direct effect and an indirect effect on prices. The indirect effect comes through the reduction in productivity due to diversion of talent and resources from productive purposes to government paperwork and the diversion of capital expenditures to meet Federal regulatory requirements.

As with many new and rapidly growing government programs, problems have developed with regulations and their impacts. One major problem involves the measurement of benefits and costs. The current techniques for measuring these benefits and costs are not very sophisticated and need further development. As a result, the benefit goals of many regulations are set with little regard to cost. Much of the fault for this lies with Congress, as some laws call for regulations to be put in place without requiring that costs or benefits be weighed, while other laws actually prohibit the consideration of costs.

In addition, the recent proliferation of regulations and lack of coordination among regulatory agencies have often resulted in regulations which are duplicative, conflicting and excessive. Witnesses appearing before the Committee have provided examples where compliance with one regulation requires violation of another. This not only puts businesses in unnecessary jeopardy, both legally and financially; it also reduces respect for the law and the Federal Government. Small businessmen are often hardest hit by the morass of conflicting and duplicative regulation because they cannot afford the necessary legal advice.

Cost-effective regulation

Regulatory programs should attempt systematically to consider costs and benefits whenever possible. As noted, a cost-benefit test for government regulations, as desirable as it is in theory, does create some problems in practice.

However, for most regulatory programs, such computations are not necessary to reduce regulatory-imposed waste and inefficiencies. Congress, in enacting regulatory programs, generally presumes or sets a level of benefits to be achieved, just as it does with spending programs. The benefit level is not, and should not be, determined by the administering agency. Rather, the agency should be charged with achieving the congressionally mandated goals at the least cost. This eliminates the need to measure benefits and instead focuses on costs, which can be more accurately measured.

We believe that a cost-effectiveness requirement would be the simplest way of assuring that regulatory goals are achieved at the lowest possible cost and with the least waste of resources. We believe a cost-effectiveness rule would be a more effective way of controlling regulatory costs without reducing the benefits of regulatory programs than would a cost-benefit test.

Regulatory budget

The current regulatory process fails to recognize that the goals of regulatory programs must be balanced rationally with other national objectives. The achievement of any objective, public or private, involves the use of resources that could be used for several purposes. The more resources that are devoted to one purpose, the less such resources are available for others. Even if all regulations were internally cost effective, the problem of balancing resources for regulatory purposes with resources for other purposes would still exist. This balance could best be accomplished through a regulatory budget.

Prior to the rapid growth of social regulatory programs, the present fiscal budget was generally adequate to show the impact of government on the economy. Almost all the activities of the Federal Government involved direct spending, in the form of purchases or transfers or direct taxation, and these showed up in the budget. By adding to these the financial commitments (through loans, guarantees, and insurance) of some 14 "off-budget" agencies, one could get a fairly clear picture of the government's influence on the economy.

But with the recent rapid growth of the new regulatory agencies—the Occupational Health and Safety Administration, the Environmental Protection Agency, the National Highway Traffic Safety Administration and many others—the fiscal budget no longer conveys a complete picture of government's impact on the economy. Most of the economic effect of regulation is hidden, since government-required private sector spending for auto safety, mine safety, pollution control and consumer protection, plus the attendant paperwork costs, do not appear in the government's budget figures. They are cloaked in what might be called "off-off-budget" spending, required of the private sector to comply with Federal regulation.

A clear example of the need for a budget showing the economic impact of regulation on the society may be seen in the environmental regulation of electric utilities. The massive cost of a smokestack scrubber to achieve cleaner air is passed on directly to consumers who pay higher utility bills as surely as they pay taxes. But the Federal budget fails to show these higher prices. It also fails to show the higher prices consumers pay because of economic regulation by such agencies as the Interstate Commerce Commission, the Civil Aeronautics Board, and the Federal Communications Commission. The costs and benefits of both social and economic regulations should be more clearly available to policy-makers and to the public.

If these costs were minor, their omission from the budget would not be a serious problem. But they are not minor, and they are growing. It is important, therefore, that the Budget Act of 1974 be amended to require that Congress annually establish a regulatory budget, along with the fiscal budget, to set a limit on the costs of compliance each agency could impose on the private sector in any one year. The timetable and the process provided for developing a regulatory budget should be similar to those governing the fiscal budget concurrent resolution.

A regulatory budget would constrain the regulatory agencies to limit the compliance costs that their regulations impose. It would certainly make the agencies more conscious of those costs. But it would have other important effects as well. A regulatory budget, along with the fiscal budget, would provide a more accurate picture of the Federal Government's total impact on the economy, allowing Congress to determine how much of the Nation's output is to be devoted to public uses. It would make possible a better balance between regulatory programs and traditional government spending programs. It would enhance the protection of the public's health and safety by requiring that the Federal Government establish consistent priorities in pursuing regulatory objectives.●

AN AWARD-WINNING NEW JERSEY REALTOR

● Mr. WILLIAMS. Mr. President, it is with great satisfaction that I call to my colleagues attention a recent award given to a gifted and talented realtor in New Jersey, Mr. Joseph J. Murphy.

Mr. Murphy was honored by the Board of Chosen Freeholders in Bergen County, N.J., for his fine work at renovating historic dwellings in New Jersey and making them useful as office buildings. A copy of an article from the Jersey Business Review describes Mr. Murphy's work in greater detail, and I ask that it be printed at the end of my remarks.

Mr. President, as the ranking minority member of the Senate Banking, Housing, and Urban Affairs Committee, I am always interested in innovative work being done by people in the housing and real estate field, and I am especially proud that I have such a fine success story in New Jersey to call to my colleagues attention.

The article follows:

MURPHY RECEIVES COMMENDATION

SADDLE RIVER.—A Certificate of Commendation from the Bergen County Board of Chosen Freeholders has been presented to Joseph J. Murphy of Saddle River, Realtor and builder, by Freeholder Joan Steinacker of Ramsey.

The award, which is "in grateful appreciation for faithful and distinguished performance of duty and for service to the people

of the County of Bergen," was signed by each of the Freeholders.

In ceremonies at the antique farmhouse and one time Inn which is now the location of the Murphy Realty/Better Homes and Gardens' corporate and main office at 69 East Allendale Avenue in Saddle River, Steinacker commended Murphy for his contributions in repairing, revitalizing, refurbishing and preserving old buildings by converting them to magnificent offices without losing their historic identities.

"If not for concerned individuals such as Joseph J. Murphy, who invest enormous amounts of their own money, time and energy to preserve and maintain these buildings, they might otherwise deteriorate or be destroyed. With neglect these buildings could be left to become 'eyesores,' but with money, know how and a love of our American heritage, Murphy and other dedicated business leaders are preserving the architectural history of our area. They are doing this at no expense to the taxpayers, which could otherwise be a costly, government project," Steinacker added.

Although Murphy does not own the historic building that houses his corporate and main offices at Barnstable Court in Saddle River, he has spent some $100,000 to repair, refurbish, improve and put it into mint condition. The one time Inn, which was built by Dutch craftsmen of the area in 1837, was a popular place for farmers to meet. Despite it being in a run down, neglected condition, Murphy invested in its improvements. Today the Murphy Realty/Better Homes and Gardens' corporate and main office enables visitors to Northwest Bergen County to take a trip back to early America.

AN EARLY CAREER START

Born, raised and educated in Bergen County, Murphy is one of the most phenomenal success stories in New Jersey business.

Unlike many others who started in real estate as their second or third careers, Murphy decided to become a Realtor during his college years. With a concentration of real estate courses, Murphy, who was one of the school's top basketball, track and soccer stars, received his B.S. in Business Administration degree from Fairleigh Dickinson University in 1964. Upon graduation he began his career with the one time Beir-Higgins agency, in a tiny building that was located next door to the antique farmhouse and legendary Inn that is now his firm's corporate and main office. Today June Higgins, widow of the late Dick Higgins, Murphy's mentor, is a member of his sales staff in the company's main office.

Returning to school while setting new records in the real estate profession, Murphy received his MBA degree in finance from Fairleigh Dickinson in 1968. He started Murphy Realty in 1971 in the historic red farm type building that was once a foundry across the tiny wooden bridge at Barnstable Court in Saddle River with a staff of two sales people. Today that building, just two doors away from the main office of Murphy Realty/Better Homes and Gardens, is one of the nine branch offices which is staffed by 125 full-time sales professionals.

Murphy, his wife, Fran, and their three children, have a continuous "love affair" with Saddle River. In addition to helping countless numbers of families to discover and enjoy new lifestyles in the northwest and Pascack Valley areas of Bergen County, Murphy has helped many motivated men and women find financial security in the real estate industry.

AN OPTIMISTIC OUTLOOK

With the rest of the nation facing a lag in new home construction, inflationary costs, increased unemployment and high interest rates, Murphy has been optimistic about the real estate industry and the economy in general. At Burning Hollow at Saddle River, a 250-acre subdivision where Murphy is building 100 custom, luxury homes, hundreds of jobs will be provided over a five-year period. Additional construction jobs are also being provided at Brookledge Farms in the Allendale subdivision where he is building custom homes on a 15-acre subdivision.

The Murphy Realty Commercial Division in Montvale has helped create more jobs in Bergen County by attracting new business firms to locate here. In doing so, it has also helped lower taxes in different communities by bringing in prestigious and quality ratables.

A conservationist with a special concern for the environment, Murphy has made it a policy to protect and preserve trees, shrubs, streams and other natural settings when constructing new homes.

He has established a special Retirement Department at Murphy Realty/Better Homes and Gardens to provide free counsel and advice on housing problems to retirees and senior citizens.

As a community service he recently sponsored a free seminar for pre-retirees and older Americans which featured experts on taxes, consumer frauds, Social Security, new careers, estates, wills and trusts, and housing as well as on retirement life in general.

THE VA BUDGET: READJUSTMENT COUNSELING

● Mr. CRANSTON. Mr. President, I have indicated on a number of occasions that I intend to give President Reagan all of the support that I can as he undertakes the very difficult task of reducing Federal spending in an attempt to reduce inflation and bring our economy under control. I will fulfill this commitment—to the extent that it is possible to do so—even with respect to programs of particular interest to me. I realize that, for the proposed cutbacks to have effect in the manner intended, they must be substantial and widespread.

It is with this attitude, Mr. President, that I approach any proposed cutbacks of the Veterans' Administration budget. During my 12 years in the Senate, first as chairman of the Veterans' Affairs Subcommittee of the Labor and Public Welfare Committee and later on the Veterans' Affairs Committee, including service as the committee chairman for 4 years and now as ranking minority member, I have been deeply involved with issues affecting our Nation's veterans, most particularly with issues affecting Vietnam-era veterans and general VA health-care matters, especially the need for adequate staffing in VA health-care facilities. I believe that I have enjoyed considerable success in my efforts to improve and expand veterans' benefits. I thus have a strong personal concern as the VA budget comes under scrutiny.

In this regard, I am willing to consider reductions where they can be made fairly. Veterans' programs are not sacred cows. Veterans, like everybody else, are badly hurt by inflation and should share in some of the burden of Federal cutbacks.

But there is a big difference between veterans' programs and other government programs.

President Reagan wants to return many responsibilities to State and local control. I favor much of that approach. But, clearly, that cannot apply to our obligation to veterans. That is a fundamentally national obligation and national responsibility—just as are national defense and foreign policy. Indeed, veterans' programs are an inseparable cost of past wars.

For many VA programs—especially those that are designed to help Vietnam veterans—if the Federal Government does not do what needs to be done, no one will.

So, I am prepared to work with the committee chairman, my good friend from Wyoming (Mr. SIMPSON), and the President to identify those portions of the VA budget that can sustain cutbacks without impairing the independence or integrity of the VA, especially its health-care system, or lowering the quality of its health-care or other services.

Mr. President, despite my resolve in this regard, there are several cutbacks in the VA budget proposed by the administration that I cannot and will not support and which I will fight to have restored to the agency's fiscal year 1982 budget. First and foremost is the proposal to eliminate entirely the VA's program of readjustment counseling as of September 30, 1981.

Mr. President, this is one place where I must draw the line. We fought for 8 years until finally we were successful in the last Congress in enacting a law for VA readjustment counseling for Vietnam-era veterans. This is one clear program for which there is no substitute. If the VA does not do it, no one will. In its first full year of operation, the readjustment counseling program, through its 91 storefront vet centers, has proven its effectiveness in assisting Vietnam-era veterans who need help.

Mr. President, I went into significant detail on the VA's readjustment counseling program in my remarks on February 6, 1981, in conjunction with the introduction of S. 458, the Vietnam-Era Veterans' Readjustment Amendments of 1981. Those remarks appear at pages 2024 through 2032 of the RECORD, so I will not repeat that detail at this point. Rather, I will simply note my very firm belief that the VA's readjustment counseling program has been a remarkable success to this point and that there is a real and continuing need on the part of far too many Vietnam-era veterans for the services provided through the program. If this administration cannot somehow find in the budget the $31.4 million proposed by the previous administration to support this very important effort of great meaning to these veterans, then we as a country are in far worse shape than I—or, I believe, the President—ever imagined.

Mr. President, President Reagan has been eloquent in his remarks concerning Vietnam veterans, both as a candidate and, more recently, when he awarded the Medal of Honor to M. Sgt. Roy P. Benavidez, U.S. Army, in ceremonies at the Pentagon on February 24, just 2 weeks ago. At the Medal of Honor ceremony, he said:

> There's been little or no recognition of the gratitude we owe to the more than 300,000 men who suffered wounds in that war.

I believe that the need for recognition

of the gratitude we owe extends to all of the approximately 2.8 million men and women who served in the Vietnam theater, whether they suffered physical wounds or not. For many of these veterans, the disregard or, in some cases, the active disdain that greeted them on their return from service left them "wounded" in a very real sense. We should make every effort to heal all of the "wounds" from that period, including the pain that is rooted in our society's failure to provide adequate recognition of those who served in the military when they were called to do so.

Mr. President, awarding a Medal of Honor to one Vietnam veteran for his incredible valor in the face of enemy action is a commendable step to take to recognize Vietnam veterans so as to further the needed healing process—but the impact of such action is very limited. I believe the debt we owe to these veterans demands that we act directly to insure that they will continue to be provided needed assistance by extending the readjustment counseling program and not shutting forever the doors of the 91 Vet Centers now in operation. We need to send a signal to the entire Vietnam-era-veteran community that their sacrifices have not been forgotten and that the people of the United States, through their elected officials, remain ready to meet the continuing needs that result from military service during the Vietnam era.

Mr. President, I will work with the administration to find ways to cut Federal spending, including concurring in certain reductions in the VA's budget. I will not, however, accept a proposal to eliminate this vital program for Vietnam-era veterans. My friend from Pennsylvania (Mr. EDGAR), who serves on the Veterans' Affairs Committee in the other body, very aptly described the effect that cutting the VA's readjustment counseling program would have on those veterans who need the services provided through this program. As Mr. EDGAR noted—

> If the President intends to keep a "safety net" under those in true need so as to insure that they are not harmed by budget cutbacks, the elimination of this program leaves a gaping hole in that net for those Vietnam-era veterans who have as yet been unable satisfactorily to reconcile their service experience and return to civilian life.

Mr. President, in an article in the Washington Post on March 4, 1981, the reporter noted that President Reagan "has been a constant rhetorical supporter of those who served in Vietnam." I hope that the President's commitment to these veterans and the others who served during that era transcends rhetoric and is translated into concrete action. One strong way to show such real concern would be by reversing his proposal to eliminate the readjustment counseling program for Vietnam-era veterans and, rather, insuring that it is adequately funded and staffed in fiscal year 1982 and supporting extension of the eligibility period for this program.

Mr. President, in discussing this proposed cut, it is important to note the size of the program that is being targeted for elimination. As I indicated earlier, the administration is apparently claiming savings of 552 full-time-equivalent-employee—FTEE's—positions and $31.4 million in savings by cutting out the readjustment counseling program. I find it particularly ironic that such savings might be claimed because the program is currently only using 346 FTEE's and the fiscal year 1980 cost of the program was approximately $9 million. In fact, because of what I believe—and the Comptroller General and the VA itself agree—is illegal action on the part of the administration, the readjustment counseling program is not at its presently authorized personnel strength of 522 FTEE's. My remarks on this situation, which is the result of the present executive branch hiring freeze being applied to the three VA health-care accounts in violation of section 5010(a)(4) of title 38, United States Code, appear at pages S1785 through S1790 of the daily edition of the RECORD for March 3, 1981.

Mr. President, the storefront vet centers are a sound investment and a major symbol of our desire to help Vietnam veterans. Far too many Vietnam veterans still have feelings of alienation and rejection—intensified recently by the comparison between the welcome home they did not get and the welcome home our Iran hostages received. They doubt our national commitment to them.

It is enormously insensitive and plainly ill advised to propose to eliminate the single most visible program for Vietnam veterans.

I firmly believe that Congress will reject any such proposal. I will do everything I can to see to that.

In fact, I am delighted to report to my colleagues that the Veterans' Affairs Committee today voted 8 to 4 to adopt a budget amendment I offered with the Senator from South Carolina (Mr. THURMOND) to continue the readjustment counseling program at least through fiscal year 1982 at the fiscal year 1981 program level of $25 million and to accommodate the extension of eligibility for the program at least through fiscal year 1982, as I have proposed in S. 458.

This action, coupled with the comparable action taken by the House Veterans' Affairs Committee, Tuesday, greatly brightens prospects of solid congressional support for this program throughout the budget and legislative processes.

Although the budget markup today contained much bad news for veterans, this reaffirmation of commitment to this vital program is a ray of light in an otherwise dismal day for veterans.●

DR. ROGER PAYNE IS AWARDED THE ALBERT SCHWEITZER MEDAL

● Mr. TSONGAS. Mr. President, recently I was honored to present the Albert Schweitzer Medal of the Animal Welfare Institute to Dr. Roger Payne, who accepted it on behalf of himself and his wife Katherine Payne. Dr. Payne's acceptance speech beautifully expressed their love of all living things. Mr. President, I ask that the text of his thoughtful, sensitive statement be printed in the RECORD.

The statement follows:

STATEMENT ON ACCEPTING THE ALBERT SCHWEITZER MEDAL

In Argentina, where we have been studying white whales for the past 11 years and from which I have recently returned, I saw an interesting new use for whales—only this time it was a consumptive use, a use for them in their dead state.

Some years ago a sei whale appeared in our bay. For several days our hydrophones picked up its low calls in the distance, surely one of the most mysterious and eerie sounds on this planet. And then the calls stopped, and a few days later we had word that the whale had died and was ashore many miles from camp. So we mounted an excursion and saved the skeleton. We trucked all the bones back to whale camp and stored them along the back of the beach out of reach of the ocean waves that once had borne their owner. The bones are still there awaiting a voyage to the Smithsonian. But the skull was too large to go down the steep road that descends the cliffs to the bay and so it now lies alone in the desert out of sight of the sea, surrounded by bushes.

Last month I paid the skull a visit to see how it was faring and as I was gazing in awe at the "decay of that colossal wreck" I thought I saw something move. It is appeared momentarily in a window at the base of the skull—the so called foramen magnum, the passageway through which the spinal cord communicates with the brain. A few moments later I saw it again; it was the face of a mouse. She had built her nest in the braincase of the whale—a much more exotic consumptive use for a whale than any we humans have concocted. I felt too that it was a noble transaction between a mouse and a whale. In exchange for the shelter that had once housed the whale's vaunted and enigmatic mind, the lady mouse had filled that now vacant chamber with a whole brood of smaller, more compact intelligences and then stuffed in a hatfull of twigs and grass to make up for any shortfalls we might otherwise have perceived.

Could the mind of the mouse possibly comprehend what an extraordinary sanctuary she had selected for her nest? Inside the allegory filled cave of the whale's skull could she imagine sunless worlds beneath the sea, filled with slowly wheeling galaxies of phosphorescence; or 6,000 mile migrations; or towering icebergs? No matter, it was good, solid housing. I don't fault the mouse's use of the skull, because, after all, she chanced upon it quite by accident. But it is curious how mundane even the most exotic uses are to which mammals, ourselves included, put whales. It is as if we had a lapse of spirit and could not figure out how to profit from cultures other than our own. At least our own species is now reaching tentatively out in efforts to contact the people of the sea; whether it can be done before we develop some new consumptive use remains to be seen.

"What happens to beasts will happen to man. All things are connected. If the great beasts are gone men would surely die of a great loneliness of spirit."

That remarkable statement (made in 1884 by Chief Seattle) expresses exactly what I sense will be the greatest loss, "when the great beasts are gone," when we are condemned to live in the unspeakably boring world of our own creation forever. In Argentina I have felt each year a great loneliness of spirit when the whales leave the bay and the bay returns to silence and emptiness. It is hard to convey that feeling but when the whales are there and our days are spent watching them breaching, spouting, swim-

ming, courting, sailing, pushing and shoving—all at their majestic, glacial pace—or when I see them suspended and floating in the shallows, great cloud-like beings moving only a yard or so each hour, drifting with currents too slow to perceive, my spirits soar and I am moved in a way that nothing which is smaller can ever move me.

And then comes the day—usually in mid December—when I awaken and look out across the bay and see nothing. They are gone—they have departed in the night and I am left behind. Immediately the bay loses its mystery, its allure. It is no longer unique but just like any other bay, and rather a drab one at that. I feel peevish and irritated, nothing seems quite right. I sink back and become mired in the annoying detail of life. What I feel, I suppose is "a great loneliness of spirit."

It is because whales are such grand and glowing creatures, because they are "commensurate with man's capacity for wonder" that their deaths for commerce degrade us so. It will confound our descendants. We are the generation that searched on Mars for evidence of life but couldn't rouse enough moral sense to stop the destruction of even the grandest manifestations of life on earth. In that sense we are like the Romans, whose works of art, architecture and engineering inspire our awe but whose traffic in slaves and gladiatorial combat we find mystifying and loathesome.

Because whales now have so many advocates and have taken on an international lustre, they have also attracted opponents among those from whom they might usually expect support. We are told we are wasting too much time on such a glamorous species while myriad lesser known ones cry out for attention. And that is of course partly true . . . But there is a vastly practical reason for focussing one's efforts on saving a major species. This is because if one wishes to save the apex of a pyramid, he must save the whole pyramid. If we can set aside enough of the oceans to ensure a viable whole population, we will be able to ensure an abundance of everything on which the whales feed and through which they swim. The whale then truly becomes the king of the seas. The world of man having realized the importance of saving the king saves all of his subjects because the king has existence only inasmuch as he has subjects; much as the whale has existence only inasmuch as it has the rest of the pyramid that supports it.

The irreducible minimum ecosystem is a food pyramid with a single ultimate predator on top. But it is a doomed ecosystem unless enough such pyramids are preserved to ensure the perpetuity of the ultimate predator. The only way to achieve this is to ensure the success of many pyramids, which means we must set aside large sanctuaries—the larger the better. In this sense a whale does not exist apart from its pyramid. It is *one* with the pyramid—it *is* the pyramid. It is much the same with kings. The word king **defines an office, not a given individual.** A king who has lost his subjects and has been dethroned has no meaningful existence. He is like anybody else—lost in the crowd and soon forgotten. It is therefore a good strategy, I feel, to focus on animal and plant kings and to guarantee their kingdoms—just what we have learned not to do in human societies.

While on the subect of kings and pyramids I want to look at the entire world of intersecting, interlocking, interacting, interlacing pyramids—the whole of life on earth. Years ago the concept was advanced that integrated animal societies which are made up of individual organisms such as ant colonies are in fact a single entity or "superorganism" as it was labelled. It now seems reasonable to many of us that a totality of organisms and super organisms combine to create a super-super-organism—the whole of life on earth. The elements of this super-super-organism though individually mortal are collectively immortal, and the laws that govern them are natural laws.

It is to this immortal oneness—to the totality of life—that I find myself praying. Would it therefore be outrageous to call these mortal elements that become immortal and are interconnected each to every other, God? And to call the immutable laws that explain them God's laws? When I make this deduction several things fit immediately into place: The rage I feel when species are destroyed is understandable, for the destruction of any element in the totality is a blow struck directly at the God I worship. It also lays to rest the myth of the two cultures, the so-called dichotomy between arts and sciences.

It points out that through science (and not just through faith) we learn about God—that as a means of knowing the works of God science can be superior to faith. For it allows us to beat a direct path to God, always staying on course and never being diverted no matter how slowly we make progress. In fact, it suggests that rather than being at odds with religion, science could be its strongest ally. One might even say that as a means of understanding the works of God, science is what religion has been praying for.

I have long felt that the love of all life on earth (a concept that is interchangeable with the word conservation) needs to be written into our religions—is in fact overdue to become a religion in its own right. Should this come to pass this religion will have science at its root. We should not fear that process or feel that science is somehow an inadequate base upon which to build religions. On the contrary science can provide insights as deep (perhaps deeper) than those that come through faith. Science can uplift the soul, give our spirit wings and teach it how to soar.

In my own experience I have found that at their best the revelations of science are as uplifting, as inspiring, as the best of art. Though I am not a card-carrying artist, I am a cello-carrying musician and have at several periods of my life spent more time playing chamber music than I have doing science. And, although there is nothing I have enjoyed more than music, it is only honest to admit that even the quintessential **ecstasy of, for example, the slow movement** of opus 59 No. 1 (or the entirety of the late Beethoven Quartets) does not exceed the sense of wonder I have felt when contemplating black holes or drifting continents, **or replicating molecules, or the spontaneous origin of life, or even, dare I say it,** whale songs.

In fact these discoveries, when you place them alongside religion and music, have a certain oneness. They are distinct creations of different intellects all housed inside an overarching intelligence called life-on-earth. In this sense they are like those mice growing up inside the overarching apse of the whale's skull.

I have taken this detour concerning science because I wished to set the role of science in conservation into a new light. We have long recognized its essential value for resolving conflicts over how a species shall be managed (for instance, how quotas shall be set). But that is just its journeyman's duty. We cannot ever hope to inspire any major changes in how species are viewed, and hence treated, unless we can inspire our own species with the magnitude of what will be lost if we fail to act.

The only route we can use to make the kinds of discoveries that will inspire us to action is through science—the best means man has yet devised to learn about the cosmos. If we can fire the imaginations of the human world on behalf of non-human life, we can inspire a constituency for the wild world which will not accept jury rigs and bandaids to cure what is in fact massive hemorrhaging from rampant greed, but will instead rise roaring to its feet and demand the rights of all life on earth.

If mankind can progress that far and recognize that it is not the master of ceremonies but just another pretty face among a million other beguiling species, and that all us species have bit parts—crucial bit parts albeit—and that it is no disgrace to limit oneself to a well played bit part, then the show can go on. If this ever comes to pass we will be living in a more enlightened world and will not be facing the prospect of dying from loneliness of spirit.●

THE REAGAN ADMINISTRATION'S APPROACH TO DRUG ABUSE

● Mr. BIDEN. Mr. President, I am profoundly disturbed by what President Reagan had to say about drug abuse at his press conference in Washington last Friday.

Despite mounting and uncontradicted evidence that a flood tide of "new" heroin is already lapping at our shores—evidence summarized in a report I issued almost a year ago—the President's remarks suggest that he plans to revive the ineffective domestic "war on drugs" futilely declared by President Richard Nixon nearly a decade ago. The "taking the customers away from the drugs" President Reagan gave as the primary goal of his drug-abuse program was also a prime goal, and the principal failure, of the Nixon program.

Put very simply, on the basis of more than a decade's experience of attempting to battle illegal drugs in the streets of American cities, in American high schools and even junior high schools, or on the campuses of American colleges and universities—it just does not work.

Despite the acknowledged difficulties of defending our shores and borders against the influx of illegal drugs, it has proved much more difficult, and it makes much less sense, to focus our drug-control efforts on what inevitably proves at best to be a street-by-street and campus-by-campus rear-guard action. If Mr. Reagan sees trying to halt illegal drugs at our borders as carrying water in a sieve, trying to contain those same drugs when they have reached the streets is like trying to seal off the contagion of a plague by burning the bodies of the dead. Invariably, it becomes a policy of identifying the victims without doing anything to eliminate the source of the disease itself.

It makes much better sense, and it has proved to be much more effective, to halt the flow of illegal drugs at their source or enroute toward our shores, before they find their way into the veins of young Americans, blighting their lives and their futures with a habit extraordinarily hard to overcome.

It was just those drug programs aimed at drying up trafficking at its source which have been most effective at combating drug abuse here at home. Cooperative programs with the governments of Turkey and Mexico to provide

alternative sources of income to poor farmers, as well as the pinching off of illegal drug exports from the so-called "Golden Triangle" of Southeast Asia, were responsible for the decline in heroin addiction and drug-related deaths in United States during the mid-1970's.

But, having won some of those key battles, we now find ourselves in renewed danger of losing the war on drugs.

The major source of the world's illegal production of opium from which heroin is derived, has shifted in the past 2 years from the jungles of Southeast Asia to the traditionally unpoliced and now even more unstable tribal areas of Southwest Asia, specifically in Pakistan, Afghanistan, and Iran. Already harvested and on the way to the illegal drug markets in Western Europe and the United States is the largest opium crop ever cultivated anywhere.

New drug-trafficking routes have been established through Iran, Turkey, Greece, and even Communist Eastern Europe, where some evidence indicates that Romanian Government agencies have been involved in transactions trading guns for illegal drugs, which are then forwarded to the lucrative markets of the West.

Similarly, new clandestine laboratories for processing opium into the much more easily transportable and much more profitable heroin are being set up, especially in Sicily—and there is ample evidence that a new "Sicilian Connection" with the crime families of the United States is already pouring illegal heroin into the streets of American cities.

Although the outlines of this international distribution and processing system for illegal drugs has become ominously clear, we have made only the barest beginning at efforts to disrupt it—and there is nothing speculative about its effects on American communities and American youth.

The purity of street heroin in the United States has been steadily increasing for the past year, reflecting the early impact of a flood tide that has by no means reached its crest. Drug addiction among American youth is again significantly increasing, and with it the volume of drug-related crimes and drug-related deaths.

The price of heroin on the streets has been dropping, and crimes committed by addicts have been increasing. A recent study by the Temple University Medical School reports that a group of 243 addicts were responsible for committing crimes 176 days a year; the same group said they had committed a half-million crimes during an 11-year period, mostly thefts and burglaries. If the Temple study's findings are remotely valid, the social and economic costs of the crimes committed by the Nation's estimated 600,000 heroin addicts must be truly astronomical. Even more impossible to assign any rational value to are the deaths resulting from heroin addiction, and they are increasing. New York City reports that drug-related mortalities there increased by 25 percent last year.

And while the first effects appeared on the innercity streets of east coast communities, the ravages of this "new heroin" has not been confined to those crumbling neighborhoods long oppressed by the traffic in illegal drugs. The more affluent middle-class youth of suburban communities have increasingly become the preferred market for drug pushers, and traces of southwestern Asian heroin are already appearing in southwestern and west coast American cities.

If we fail to turn back this growing tide, no city, no community, no neighborhood in America will escape its effects—and a bitter 10-year history has taught us again and again that once the battleground arrives next door the war simply cannot be won, and all our children become its potential victims.

More than enough of our youth have already suffered death and devastated lives from drug abuse—and there is more than enough evidence that the threat we face today from international drug trafficking is far greater than any we have faced before—to make the prospect of not merely adding but multiplying new victims among our young people everywhere simply, and totally, unacceptable, especially if it results from misdirected, uncoordinated and underfunded drug-abuse programs.

Little as I can agree with the direction the President has charted, I think I can understand some of his reasons for it. There has been no single or more protracted frustration in the whole history of our national life than we have experienced in attempting to deal with drug abuse. Even as more and more of our youth have been destroyed by illegal drugs, it has become more and more difficult to get rid of them. Indeed, the enormous new supply of heroin already flowing around the world is yet another discouragement heaped on those we have already endured.

But we must not sacrifice another generation of young Americans to our frustration and discouragement. We must not let the flood of illegal drugs sweep unimpeded through our communities while we concentrate on throwing liferings to the relatively few young people who may benefit from the kind of educational program the President has described. Obviously, we need to educate our youth about the dangers of drug abuse. Obviously, wherever we can, we should take customers away from the pushers who infest our streets and campuses. But, just as obviously, such programs are likely to be effective only among middle-class youth, and not all of them by any means, while doing little or nothing for the children of blue-collar and inner-city families.

If we do that, the best we can hope for is the illusion of victory, while the disease continues to fester unabated at the roots of our society.

I am afraid, too, that Mr. Reagan may be suffering from rather than profiting from his experience as Governor of California. He admits frankly that his proposed national program is based directly on what he apparently feels was a successful program in that State. But the fact is that, whatever success he may have enjoyed as Governor, drug abuse was never eradicated in California, nor did California or the rest of the country face in those days a threat remotely on the scale of that which we face now from the burgeoniing poppy fields of Southwest Asia.

The only thing worse than failing to learn from experience is learning the wrong lessons and trying to build a policy upon them. I fear that is just what Mr. Reagan would now have us do as a Nation, and the consequences of such a mistaken policy would be a national tragedy.

And I am afraid, finally, that the President's laudable and politically popular drive to reduce the costs of Government—a reduction we all know is necessary—may in the case of drug abuse be leading us into a tragically false economy that in the end will prove to be fearfully expensive, not only in tax dollars, but even more in the suffering and death it may impose on the young people of America, their families, and their communities.

Costly Government has indeed become too expensive for our citizens to bear—but if there is anything we cannot afford, it is to be pennywise and pound foolish with the lives of our youth.

I must say that I am as surprised as I am disturbed by the apparent intention of the President to deemphasize international cooperation and coordination of programs to dry up illegal drug trafficking at its source—surprised, because I asked for and got commitments for the support of just such programs from three of his principal cabinet officers at their confirmation hearings.

Secretary of State Haig, Attorney General Smith, and CIA Director Murphy, all in reply to my direct questions, agreed that heading off drugs before they reach our shores should be a high priority of the new administration, along with greater emphasis on taking the profit out of drug trafficking here at home. In fact, they not only agreed in principle, but also indicated they would favor joining me and others in talks aimed at establishing and implementing those priorities.

It is no secret that, despite some reservations about all three of those nominations—and in the case of Mr. Smith, some very strong reservations—I voted to confirm their appointments to a very large degree because I understood that to be a commitment to mount and go forward with a major effort to deal with what I firmly believe to be the best solution to a problem that is second only to the economy among our domestic concerns.

It is my earnest hope that, before proceeding beyond his remarks last Friday, the President will consult closely and carefully with those three Cabinet officers, the Directors of the FBI and Drug Enforcement Administration, police and narcotics officials around the Nation, and others with long experience in dealing with drug abuse. Unless I am much mistaken, I believe they will tell him that if we choose to make our homes, streets, and classrooms the primary battleground in our fight against drug abuse—and especially in the fight against illegal trafficking in heroin—we will have already lost the war and that no family or community in America will be immune to the disastrous consequences of our choice.

If the President will do that, and if he

will lead us in an all-out fight to turn back the tide of new heroin before it drowns our young people, I pledge to him all the support and assistance I can give as a U.S. Senator, as an American citizen and as the father of young children. It is a fight I have already begun to wage with all the resources at my command, and a fight I mean to carry on.

Accordingly, while I entreat President Reagan to commit his undisputed abilities to lead as well as the unparalleled power and prestige of his great office to combatting the international traffic in illegal drugs on the same global scale at which it operates, I will nevertheless call upon his officers to keep their commitment to that struggle, as I will call upon my colleagues in the Senate and the American people to support that struggle with the commitment and the resources it demands.

Over the next few weeks, I will spell out on the floor of the U.S. Senate what I believe those demands are and how I believe they can best be met, both here at home and abroad. I will not offer my program as the last word on combatting drug abuse, but rather as what I hope will be the beginning of a productive dialog with my colleagues and the Reagan administration on the absolute necessity of doing everything we can do to turn back that fatal tide before it innundates our youth, our families, our cities and our society.

Mr. President, I ask that the initiatives section containing the recommendations of my report on the Sicilian connection issued last September be printed in the RECORD.

The material follows:

IX. INITIATIVES

Will the International Drug Trade ever be completely wiped out? . . . "not in my lifetime." (Mathea Falco, Assistant Secretary of State for International Narcotics Matters, responding to a reporter's question in U.S. News & World Report, December 25, 1979.)

This report documents the existence of a substantial new threat to the United States, if not the entire West. This country is about to face a massive influx of Southwest Asian heroin, which, if unchecked, will feed a large heroin addict population and cause a concomitant rise in street crime and related social disarray. Indeed, it is arguable that if we do not disrupt the new Sicilian Connection, we may face a heroin epidemic and a crime wave reminiscent of what this country experienced in the early 1970's.

While recognizing the severity of this potential threat, this report also makes a strong case for candor and caution in suggesting policies and initiatives to cope with the international traffic in heroin. Assistant Secretary of State Mathea Falco's conclusions, grim as they are, are thoroughly consistent with the findings of this report. There simply are not any short-term, politically realistic solutions to the problem of heroin addiction in this country. The major disruptions in international trafficking which have occurred in the last decade have been largely influenced by fortuitous events: a drought in Asia, the Soviet invasion of Afghanistan, a drought in Mexico.

That observation is not meant to suggest that carefully considered international initiatives involving cooperating governments like Mexico and Turkey cannot successfully take advantage of fortuitous events. However, it is absolutely essential that the American people understand that the growing of opium, whether by the Pathans in Pakistan or the Turks in the Afyon Province of Turkey, and the trafficking and processing of the heroin in parts of Turkey, by the Kurds in Iran or by the Sicilians and Corsicans in the Mediterranean, often reflect deep-seated problems of poverty, political insurgency and political instability. These are not problems which our foreign policy can solve in a single year, a single decade or perhaps even in this century.

Indeed, quasi-official complicity in the heroin trade that hinders resolution of the international problem (e.g., as is alleged about the Bulgarian agency, KINTEX) may not be subject to unilateral action at all. We must develop an international strategy to "manage" this problem, exploiting as best we can the political and environmental conditions in a particular growing or transshipment area. In the long run, we should seek a system of multilateral initiatives—a world strategy—which will permit us to exploit fortuitous events when and where they occur. When a drought occurs in Southwest Asia, the U.N. can move in adequate income substitution programs to encourage farmers to give up opium cultivation. The mass emigration of the Pathan poppy farmers caused by the Afghan war creates an opportunity for income substitution. Of course, bilateral arrangements with the various producing and transshipping countries can strengthen whatever multilateral initiatives we develop.

The recommendations that follow are necessarily tentative. They are intended to serve more as an agenda for further discussion—in the context of investigative hearings in the Criminal Justice Subcommittee planned for the late summer—and not as a final set of policies. The recommendations fall into five basic categories: (a) dampening U.S. demand for heroin; (b) developing a more coherent federal strategy; (c) strengthening the Justice Department's response to organized crime; (d) developing a more coherent long-term international strategy, and (e) adopting a set of bilateral initiatives aimed at stopping Southwest Asian heroin at production and transshipment points.

A. DAMPENING U.S. DEMAND FOR HEROIN

The American people must understand that the best way to disrupt the international trade in illegal drugs is to reduce the illegal demand for heroin in the United States. It is hard to disagree with the Turkish officials who argued that, "so long as illicit demand continues, illicit production will definitely be carried on . . ." It is this powerful, insatiable demand that makes the same heroin worth a few thousand dollars in Southwest Asia worth a quarter of a million dollars on the streets of New York. Such staggering profits make international trafficking worth almost any risk and render it practically invulnerable to law enforcement. As long as all the heroin needed by America's addict population can be supplied from a hundred square miles of land beyond any government's control, we must recognize that, inevitably, we will waste much rhetoric, foreign aid and political prestige demanding action of governments that they simply cannot deliver. Therefore, the first two recommendations pertain to reducing demand:

Recommendation I: The Congress should resist efforts to reduce the amount of Federal money now available to State and local governments for treating heroin addicts.

The recent budget-cutting fever in the Congress has threatened the 90,000 treatment slots provided by the Department of Health and Human Services to State and local governments. Cutting back funding for treatment slots at a time when we are faced with a major new heroin threat risks smoothing the way for the wave of Southwest Asian heroin.

Recommendation II: The abolition of the Law Enforcement Assistance Administration, although unavoidable within the context of the current effort to balance the budget, should not be carried out in such a manner as to undercut effective criminal justice programs designed to treat addicts who commit street crimes.

The Treatment Alternatives to Street Crime (TASC) program, developed by LEAA in 1972, has proven itself effective at identifying and then treating criminals with heroin addiction problems. Other results of the TASC program are a direct reduction in the incidence of street crime committed by heroin addicts as well as a substantial reduction in the demand for heroin in those cities where TASC has been implemented.

B. DEVELOPING A MORE COHERENT FEDERAL STRATEGY

The next recommendation concerns the central role of the Federal Government in coordinating a national and international strategy for combatting international trafficking.

In 1972, Congress mandated the development of an annual strategy statement by the Executive Branch concerning drug abuse. The Strategy Council on Drug Abuse at the White House is charged with the development of that strategy, and the National Narcotics Intelligence Consumers' Committee is an interagency unit established to digest the intelligence upon which the strategy is based. The role of these two interagency bodies must be seriously reexamined. Although each has provided significant information and advice, overall performance and impact have been somewhat uneven.

For example, although both played an important role in identifying the threat of Southwest Asian heroin, neither has provided particularly forceful leadership in developing a specific Federal strategy for responding to that threat. There is strong evidence to support the contention made by two members of the Council that it is not particularly well-respected in the Federal Government as a forum for developing a coordinated strategy. The strategy itself is so general and vague that it is probably not a meaningful guide to agencies. A similar criticism might be leveled about the National Narcotics Intelligence Consumers' Committee, especially that the intelligence information it disseminates is not taken seriously by high-level decision makers. Certain administration officials argue that the rigor of the analysis performed by the Committee is not always adequate to result in useable information.

Recommendation III: Congress should consider establishing a legislative charter for an interagency narcotics coordinating body with a director appointed by the President subject to advice and consent of the Senate. The Director should have authority to review the budget of, set the priorities for, and resolve conflicts between the agencies involved in narcotics prevention and control. The Director should have the authority, after consulting with the Director of the Central Intelligence Agency, to levy collection requirements on the intelligence community. The Director should be required to issue an annual strategy statement that is both public and classified that provides specific direction to the relevant agencies.

C. STRENGTHENING THE JUSTICE DEPARTMENT'S RESPONSE TO ORGANIZED CRIME

The Sicilian Connection will be as sophisticated as any of the major trafficking networks we have confronted in the past. As a recent GAO report pointed out, we are dealing with merchandising systems of immense size and complexity. The National Narcotics Intelligence Consumers' Committee estimates that annual illicit drug sales exceed $45 billion, which, for illustration, is six times the gross revenue of the whole A&P

grocery chain. A recent Treasury Department report explained that A&P requires 3,000 stores, 100,000 employees and $200 million in working capital. Clearly, heroin trafficking networks moving billions of dollars worth of Southwest Asian heroin are likely to be large and complex. Recent DEA intelligence suggests that Sicilian systems for merchandising heroin in the U.S. may involve dozens, if not hundreds of individuals and transactions measured in the hundreds of thousands of dollars.

Although DEA produces the best intelligence on organized crime and its involvement in narcotics trafficking, recent Criminal Justice Subcommittee oversight hearings indicate that the agency and its parent, the Department of Justice, are not well prepared to meet the threat of a sosphisticated new Sicilian Connection. A recent report by GAO correctly concluded that the Federal program directed at major drug trafficking networks is "not effectively carried out." GAO blamed "lack of expertise, little overall direction, shifting priorities, and legal obstacles."

As suggested earlier in this report, DEA and the Justice Department generally have achieved, as one Justice official admitted, a "dismal record" in attacking the financial empires and the merchandising networks of the illegal drug trade. That is a primary reason why major violators can preserve their networks and resources and, in some cases, continue to operate them from prison. The Subcommittee on Criminal Justice will conduct further hearings on the subject of financial investigations in the summer of 1980.

Recommendation IV: It is absolutely essential that the Federal government give immediate attention to more effective investigation of financial assets and more effective use of the tools Congress has given the Executive Branch in the Criminal and Civil Forfeiture Statutes.

Recommendation V: The General Accounting Office's recent recommendation concerning DEA's use of itelligence in operational law enforcement, especially as it pertains to the Central Tactical (CENTAC) program, should be given very serious consideration by both DEA and the Congress. It is absolutely essential that DEA develop a more effective strategy for using its resources and its intelligence against major organized crime networks.

By its very nature, traditional organized crime is highly centralized and very difficult to penetrate. And, as the GAO recently pointed out, DEA is not proficient in conspiracy investigations. As recent Criminal Justice Subcommittee hearings have indicated, DEA delegates to local offices management of its major investigations, even those with complex interstate and international components. Rarely are investigations managed at headquarters, which ought to have a broader range of information available on any particular conspiracy. DEA should be developing highly sophisticated and centralized strategies at its Washington headquarters, directing the best talent available at this new Sicilian Connection.

DEA personnel abroad are generally very competent and effective government officials. While centralization of investigative management is, as mentioned above, a worthy goal, one questions the wisdom of reductions in DEA presence in Europe, as recently mandated by OMB. This seems especially contradictory at a time when the United States is asking West Germany, England, France and Italy to increase their international narcotics control efforts.

Recommendation VI: DEA presence in Europe should not be reduced but rather increased, and to the extent possible, working conditions and salaries of DEA personnel abroad should be at least made competitive with other foreign service personnel of equal rank and stature.

D. DEVELOPING A MORE COHERENT LONG-TERM INTERNATIONAL STRATEGY

In terms of international initiatives, the United States must invest its energies primarily in developing a multilateral program which will create the realistic hope of ending illicit opium production. That multilateral program must begin with some modest initial measures such as those proposed at the NATO meeting last fall and incorporated in the following three recommendations.

Recommendation VII: A serious effort should be undertaken to develop a better international data base on the exact dimensions of narcotics abuse in all countries in the world, especially in the industrialized West. A determined effort should be made to get all NATO allies to join the United States in its initiative to the Organization for Economic Cooperation, and Development to create an internationally respected base of data on the magnitude of the drug problem facing each country.

The United States must recognize that economic development in the under-developed regions of the world, especially in politically troubled areas like the Northwest Provinces of Pakistan, the Kurdish areas of Iran, and parts of Eastern Turkey, probably provides the ultimate solution to the illicit growth of opium. However, we must be exceedingly careful that economic development not exacerbate the problems we are trying to resolve (e.g., irrigation projects are extremely important, but not if newly arable land is used for opium cultivation).

Recommendation VII.: The American foreign policy establishment should make a more serious effort to pursue our government's proposal to the Development Assistance Committee of the Organization for Economic Cooperation and Development to include narcotics control as a factor in bilateral and multilateral assistance programs. The United States has proposed that such assistance programs should deliberately exclude opium production from irrigation projects and other agricultural programs they sponsor.

The centerpiece of any truly international effort must be the United Nations. The most important United Nations instrument in this area is the Fund for Drug Abuse Control (UNFDAC). Its nonpolitical nature has been especially useful in formerly nonaligned Afghanistan, as well as in traditional law enforcement, crop substitution and research in South Asia and other opium-producing areas of the world. A recent study conducted by the Bureau of International Narcotics Matters at the State Department concluded that, besides West Germany and the United States, contributions for narcotics control assistance are "modest". With respect to such efforts and assistance in Southwest Asia, they are non-existent.

Recommendation IX: The United States should be more aggressive in asking other Western countries to increase contributions to the Fund, and encouraging the World Bank and other multilateral development banks to support narcotics control-related development assistance.

The State Department's Bureau of International Narcotics Matters has done exceedingly well on its limited budget. However, we agree with the tenor of recent GAO criticism of that office's failure to develop a general strategy on international initiatives.

Recommendation X: The Bureau of International Narcotics Matters should develop a comprehensive strategy paper on all matters described above, but in particular, on how other Western allies might join together in an international war against illegal drugs.

The General Accounting Office suggests the convening of a conference of high-level representatives from victim countries, primarily NATO countries. The French have been particularly leery about participating in such NATO-based initiatives and still prefer the European program proposed by former President Georges Pompidou. The so-called Pompidou group excludes the United States and has not been particularly effective in curbing the recent European heroin epidemic. However, discussions with Italian and German officials indicate that interior ministers from those two countries and other European countries are meeting regularly. European cooperation is evidently not only possible but becoming a fact.

Recommendation XI: The United States should take advantage of the present environment of cooperation in Europe, and if possible, attempt to join in a Western European conference on the subject. There should be at least four items on the agenda of such a conference:

1. Identification of source and transhipment countries with which individual participants might develop bilateral arrangements to curb illicit activity. For example, the French or the Swedes might be able to accomplish more with the Iranians than we could.

2. Development of initiatives which would curb heroin laboratory and transhipment activity in European countries, especially Italy and France.

3. Assessment of the drug treatment and data collection needs of Western European countries and pooling information on these subjects.

4. Exploration of joint initiatives which might be undertaken to freeze assets held by international traffickers or to halt sizable international cash transactions by the traffickers.

E. BILATERAL INITIATIVES IN COUNTRIES WHERE SOUTHWEST ASIAN HEROIN IS PRODUCED OR TRANSHIPPED

Pakistan is a primary source country for Southwest Asian heroin. Bilateral assistance from the United States or any other victim country or multilateral assistance by the U.N. or any other agency, would be useful in facilitating enforcement of President Zia's recent opium-growing ban. U.S. relations with the government of Pakistan and use of government A.I.D. money to assist in enforcing the ban had been complicated until recently by the $400 million military aid package for Pakistan proposal by the United States in response to fear of Soviet invasion of Pakistan. Since that arrangement stalled, the Pakistanis have actually been more interested in a talking with the U.S. government about bilateral aid arrangements in the narcotics field.

At present there is a general prohibition on using A.I.D. money in Pakistan for most purposes because of the so-called Symington Amendment, which prohibits sending funds to countries developing nuclear weapons. However, there has always been an exception to that rule for narcotics control. Therefore, the Senate Foreign Relations Committee and the State Department have been working on amendments to the Foreign Assistance Act that would provide additional funds for rural development and narcotics control on the assumption that such money might be used in the Northwest Frontier Province where most of the opium is grown.

Fear of disrupting the proposed military aid package with the Pakistanis and an attitude of general fiscal restraint led the Administration to propose no additional expenditures of A.I.D. monies in Pakistan for this fiscal year. This occurred despite Assistant Secretary of State Mathea Falco's testimony before the Foreign Relations Committee on March 14, 1980, that control of Southwest Asian heroin at its source is a number one priority.

However, the investigation underlying this report revealed an accumulation of a considerable amount of American A.I.D. counterpart funds in Pakistani bank accounts. Under the Symington Amendment, those funds cannot be spent for any purpose other than narcotics control. In the recent mark-up of the Foreign Assistance Act, the Senate Foreign Assistance Act, the Senate Foreign Relations Committee authorized the expenditure of up to $10 million of the accumulated funds for rural development in Pakistan to provide substitute income for opium-growing Pathan farmers. The money could be used for rural development projects such as road building—a sorely needed improvement in the Northwest Province areas of Pakistan. In simple terms, Pathan farmers who otherwise would be growing opium for income would build roads instead.

Apparently, the Pakistani government has expressed interest in using the funds for that purpose. Of course, this would only be a short-term solution to the general problem of finding substitute sources of income for members of the Pathan tribal groups who otherwise have no ready source of cash income. A permanent solution will obviously require great patience and commitment from the United States over a number of years to resolve the underlying economic and social problems—but a new U.S. heroin epidemic is imminent, and short-term measures are crucial to combatting it.

Recommendation XII: The Congress should enact the amendment to the Foreign Assistance Act authorizing expenditure of $10 million in counterpart funds in Pakistan. The State Department should move swiftly to develop a plan with the Pakistanis to implement an income substitution program in the Northwest Provinces.

Turkey is the first non-source victim country in the Southwest Asian heroin trail. We are satisfied that a sophisticated law enforcement and diplomatic program by our government and the government of Turkey might have a substantial impact.

I agree with DEA agents in Turkey who state that the primary goal of DEA's operation in Turkey and its liaison with the Turkish National Police should be to identify major traffickers as they leave for Western Europe. Furthermore, there is clear consensus that some effort should be made with Turkish customs to gain more effective control over the exports leaving from Istanbul airports, seaports, trainyards and across the other major land arteries through Istanbul.

Recommendation XIII: DEA should continue to work vigorously with Turkish National Police to fill the large intelligence gaps concerning trafficking in the rural areas we have identified in this report and with Turkish customs to increase its effectiveness in Istanbul.

The local militia force in Turkey primarily responsible for security in rural areas, known as the Jandarma, is potentially an important part of efforts to halt trafficking in the Turkish countryside—particularly if DEA and the Turkish government make greater efforts to sensitize them to the narcotics problem.

Recommendation XIV: I agree with DEA and Turkish officials that there should be greater emphasis on developing the Jandarma's narcotics control capability. Also, the ability of the Jandarma—especially its airwing—to monitor leakage from legal opium production into illegal use as well as the extent of illicit opium cultivation should be upgraded.

The Balkan Countries and Greece may be the most important transhipment points for Southwest Asian heroin to both Western Europe and the United States. The role of the customs agencies in Bulgaria, Yugoslavia and Greece is of critical importance. The Yugoslavs have been doing an outstanding job—with the largest seizures of Southwest Asian heroin by any European country. However, the allegations concerning the possibly sinister role of the Bulgarian KINTEX organization are indeed disturbing. The effectiveness of Greek customs at the Yugoslav, Bulgarian and Turkish borders and at the Volos ferry from Syria is also a matter of deep concern.

Recommendation XV: The Senate Intelligence Committee and the Foreign Relations Committee should query the intelligence community and the State Department on the most recent information on the role of the KINTEX in gun and drug smuggling with the Kurds and elsewhere in the Middle East. If there is substance to the allegation, an intensive diplomatic initiative ought to be undertaken to thwart that activity. One possibility might involve the Turks who are developing bilateral narcotics initiatives with the Bulgarians and have alleged in international forums that there is a traffic in trading guns for heroin among insurgent groups in Turkey.

Recommendation XVI: If a solidly documented DEA report establishes the role of Greece as a transit point for Southwest Asian heroin en route to the clandestine laboratories in Italy and France, a permanent DEA presence should be established in Athens to help the Greeks improve their customs operation.

Italy has assumed increasing importance in the connection between the poppy fields of Southwest Asia and the streets of American cities and towns. As in Ankara, the DEA office in Rome is of extremely high professional competence and has an excellent relationship with the host government. Indeed, the DEA office in Rome may enjoy a closer working relationship with the Interior Ministry than does our diplomatic corps. In fact, the State Department narcotics coordinator for Rome does not seem to take an interest in his responsibilities and he did not even meet with Congressional staff during the recent visit. This matter should receive the immediate attention of Ambassador Gardiner and the Bureau of International Narcotics Matters.

The effectiveness of the Rome DEA office was evidenced recently by the very large laboratory seizures in San Remo and Milan. Discussions with DEA, State Department and Italian officials clearly indicate that the Italians are taking this problem seriously. They are committing substantial resources to reorganizing their narcotics treatment capabilities. They are also seriously considering suggestions made by our government and outside experts that their law enforcement operations be reorganized along the lines of the U.S. government's DEA in order to more effectively combat the illicit narcotics trade—especially the Sicilian organized crime link to the United States.

Such a reorganization would assist DEA in filing some of the obvious intelligence gaps acknowledged by DEA officials. For example, we still do not know exactly how Southwest Asian morphine base is getting to Sicily, the location of the major heroin laboratories in Sicily, or the modus operandi of the trafficking to the United States.

Recommendation XVII: The Italian government should again be approached about sending a high-level delegation to the United States to see how DEA is organized and how we might help them reorganize their drug enforcement operations. In the course of those discussions and through our DEA office in Rome, we should continue trying to fill the three intelligence gaps described above.●

REPEAL OF SECTION 222, COMMUNICATIONS ACT OF 1934—S. 271

● Mr. GOLDWATER. Mr. President, I am pleased to report that yesterday, March 11, 1981, the Committee on Commerce, Science and Transportation overwhelmingly adopted S. 271, a bill I sponsored, that would repeal section 222 of the Communications Act of 1934. As reported by the committee, S. 271 would permit the Federal Communications Commission (FCC) to authorize Western Union to enter the international record market.

The Communications Subcommittee held hearings on this bill on February 18, 1981. Commissioner Anne Jones, testifying for the FCC, said that:

> S. 271 is a good bill that would enhance the process of making both domestic and international telecommunications markets more innovative, more productive, and more responsive to users.

The Commerce Committee acted expeditiously on this measure. This reflects its belief that section 222 has outlived its usefulness. It was important in 1943 when it was adopted. Competition in the modern telecommunications environment, however, makes section 222 an artificial and unnecessary barrier to effective competition in the international arena.●

THE PROBLEM OF EX-POWS

● Mr. BAUCUS. Mr. President, we have recently experienced the heart-warming and deeply felt celebration of the return of our hostages held so long and so cruelly by the Iranians. I cannot express too strongly how pleased and relieved I feel over this event.

Nonetheless, I believe it also touches our conscience in another way. Many other Americans have gone off to distant lands to fight for our country, some in exceedingly unpopular wars. Their return has been met at times with equal relief and gratitude, but at other times with indifference and even hostility. Those who have most closely approximated the position of our ex-hostages from Iran have been ex-prisoners of war from our other conflicts.

These individuals often suffered unbelievably as a result of that captivity. The effects of that captivity are often still seen today, sometimes close to 40 years after the event.

There is legislation before the Veterans' Affairs Committee which will study these problems. I want to take this occasion to express my interest in this legislation and to say that I will look forward to the recommendations of that committee following hearings on the proposed measures. It is time we take note of any possible unfairness or neglect ex-POW's have suffered over the years.●

PRESIDENT REAGAN'S TAX CUT PACKAGE

● Mr. PACKWOOD. Mr. President, I am delighted to join in cosponsoring President Reagan's Economic Recovery Tax Act of 1981, introduced Tuesday, March 10, by Senator DOLE and 45 other Senators. That bill is S. 683 in the Senate, and H.R. 2400 in the House of Representatives.

The President is committed to achieving enactment of urgently needed taxing and spending cuts. Through the economic recovery plan announced Febru-

ary 18, 1981, and this Economic Recovery Tax Act of 1981, he is leading the way to meeting these goals. I look forward to working with the President and his administration in helping to shape the proposals, and in helping to win prompt congressional action on the spending and taxing proposals.

The President has proposed important spending and tax cuts. The leadership of the House and Senate has agreed to approach the more difficult spending cuts first. I support this approach.

However, there is a most urgent need for incentive to encourage savings, thrift, productivity, exports, and job creation.

The depreciation liberalization proposed by President Reagan is an excellent example of a productivity-boosting tax cut. It encourages new investment by simplifying and liberalizing depreciation deductions. This will help revitalize our aging industrial facilities, boost productivity, increase the real wage of the American worker, and help make us more competitive against foreign producers.

Several additional proposals should be considered to further our economic revitalization.

Congress should enact spending and taxing cuts that address the commitments made by President Reagan and the Republican Party in 1980. I look forward to working with the administration and other Senators in helping with this process. We have an uncommon opportunity to enact overdue legislation to make promise a reality.●

TELL THE MILITARY EXACTLY WHAT YOU WANT

● Mr. BIDEN. Mr. President, with enormous new military spending being proposed by the Reagan administration and new assignments already being made or foreseen for U.S. military forces, we would do well to heed the admonition published today in the Washington Post by Gen. Maxwell D. Taylor, one of the most distinguished military leaders in our history.

The President, General Taylor says, "should require evidence of how major military requirements relate to the protection of specific national interests and to the support of the foreign policy he expects to carry out," but he goes on to say that "no such linkage between foreign and military policy has ever been effected in the past."

This is precisely the argument some of us on the Foreign Relations Committee have been making for several years, Mr. President, and we could hardly ask for greater authority than General Taylor brings to his support of this critically important coordination of our policies. General Taylor was Army Chief of Staff during the Eisenhower administration and chairman of the Joint Chiefs of Staff during the Kennedy and Johnson administrations. His credentials, both as a military man and as a statesman, are beyond question.

If we are to maintain and exercise our national power consistently and effectively in the best interests of the United States, General Taylor's advice must not go unheeded.

Mr. President, I ask that General Taylor's remarks be printed into the RECORD.

The remarks follow:

TELL THE MILITARY EXACTLY WHAT YOU WANT

(Maxwell D. Taylor)

At a time when President Reagan is asking sacrifice and greater efficiency in the civil sectors of government, he would be well advised to display equal toughness in examining the military policy recommended by the Pentagon. To do so, he should require evidence of how major military requirements relate to the protection of specific national interests and to the support of the foreign policy he expects to carry out. Thus, he could verify the correlation of military with foreign policy before committing himself to the vast new military programs, consisting largely of high-priced weaponry, now being pressed upon him.

No such linkage between foreign and military policy has ever been effected in the past. A recent example of failure of policy correlation was the sudden proclamation last year of the Carter Doctrine in response to the Soviet invasion of Afghanistan. With little warning, the armed forces found themselves responsible for the defense of the Persian Gulf region, barren of bases and allies and practically on the doorstep of the Soviet Union. The Department of Defense is still struggling to give some credibility to the political decision by shifting naval forces needed elsewhere to the Gulf while touting the creation of a Rapid Deployment Force. The latter, to date, consists only of several hundred officers and men, a few contingency plans and a couple of robust interservice feuds.

As it takes a fresh look at our overall foreign policy today, the Reagan administration has a precious opportunity to demand from Defense a clear and timely military policy consistent with its major political objectives. But the civil leaders must be ready to give the military specific guidance of a sort generally lacking in the past.

For maximum utility, such guidance should clearly outline the major tasks the armed forces would be expected to perform in the next five to 10 years. In the case of the strategic forces, it would likely reaffirm their primary task as the deterrence of a Soviet strategic attack on us or our allies. But what kind of forces would produce this deterrent effect? The guidance might properly prescribe that adequate forces be able to destroy certain specific Soviet target systems under certain stated conditions with a minimum acceptable percentage of probability. On the other hand, it might revert to the fallacy of seeking parity with the Russians in numbers of weapons.

For the general-purpose (non-nuclear) forces, it would no longer suffice to say, as in the past, merely that they should be able to fight one-and-one-half or two-and-one-half wars simultaneously without indication of where and how long they would be expected to fight without benefit of major reinforcement.

In NATO, the immediate question is how to offset the increase in the strength of the Warsaw Pact and, in so doing, how to obtain a larger military contribution from our allies. Our military chiefs will need to know to what extent, if any, they should plan to modernize NATO weaponry despite allied coolness to the idea and whether to consider a further increase in our own forces currently deployed there. In the latter connection, they need to know what percentage of our current combat strength can be safely committed to this area beyond an ocean that our Navy may not be able to control.

In the Middle East, the first question to answer is whether the Reagan administration adheres to the Carter Doctrine unchanged and expects the Pentagon to give it military meaning. If so, what level of defense is desired—a military presence merely to show the flag, or a tripwire force big enough to force the Soviets to attack and face the possibility of unpredictable escalation? Or will the eventual goal be a major defensive front comparable to that currently in Western Europe? In any case, where will the trained manpower come from to provide combat-sustainable forces without a return to peacetime conscription?

Because of the costs involved, the military planners should receive guidance as to the level of readiness to be required of operational forces. It will not do to say merely that all forces should be ready to fight anywhere at any time but, rather, that specified task forces should be ready to go to certain places in an order of priority. A trained combat unit in the United States has little timely value without the ships and aircraft to move it to its destination overseas and a supply line to forward it munitions, supplies and loss replacements. Task readiness of this sort requires carefully coordinated interservice planning—something we have done imperfectly in the past.

In addition to these longstanding threats in Europe and the Middle East, there are new conditions arising worldwide affecting our interests that a new military policy must recognize. Three are particularly important: the growing dependence of the economy on access to overseas markets, the instability and turbulence resulting from excessive population growth in many Third World countries of vital interest to us and the dangers to our citizens and our overseas assets of international terrorism. To cope with the foregoing, our military leaders are entitled to know what role the armed forces will be expected to play where and under what conditions.

With comprehensive guidance of the sorts I have mentioned and a presidential mandate to produce and maintain forces capable of the tasks indicated, the Department of Defense should be able to produce an appropriate policy and force structure. If so, the results could be extraordinary.

For the first time, we would have an appropriate linkage of foreign and military policy and, at the same time, a sound basis for justifying military needs.

We would have established task-readiness as the measure of military sufficiency and, in so doing, rejected the fallacy of matching numbers with the Russians.

The armed forces would be protected from their innate inclination to prepare for the kind of war they would prefer to fight.

In due course, the president would regain a voice in international councils strong enough to ensure the close attention of all present—especially the Russians.●

THE CHURCH WE LOVE IS BEING USED

● Mr. BAUCUS. Mr. President, as I was reading the Washington Post last Sunday, I came across a thoughtful and powerful editorial by my colleague from Vermont, Senator LEAHY. It is worthwhile reading for every Member of Congress, especially as we confront fundamental social and moral issues in the coming years.

Mr. President, I ask that the Leahy editorial be printed in the RECORD.

The article follows:

[From the Washington Post, March 8, 1981]

"THE CHURCH WE LOVE IS BEING USED"

(By PATRICK J. LEAHY)

During the past two years, the Catholic Church in the United States and extemely conservative Christian evangelical groups like the Moral Majority have formed a de facto political alliance. That alliance will ultimately benefit right-wing goals while diminishing many of the positive gains in justice, compassion and human dignity made with the help of the Catholic Church during the past few decades. Many of the Catholic laity—myself included—are increasingly concerned that the church we love is being used in a dangerous way.

Throughout this century, the Catholic Church has been in the forefront of efforts to improve health care, strengthen civil rights laws, provide fair and decent housing, ensure safe working conditions and adequate wages and guarantee religious tolerance.

The Catholic Church has also maintained steadfast opposition to abortion. Instructing its membership on the moral issues of abortion is the church's right and, many would say, its duty. The church, however, has done more than instruct. It has also sought legal strictures on abortions. In moving from the moral to the political arena, the church has allied itself with those who would turn aside nearly all that the Catholic leadership and laity have stood for in this century.

As a result of this alliance, the "prolife" movement has become a stalking horse for the right. In a sincere belief in the respect for human life, many Catholics have been manipulated by far-right political action groups that run counter to the social teachings of the church. Monsignor George Higgins wrote in the Jesuit magazine America last fall that Catholics "should be aware that the church's respect-life agenda includes a wide range of social justice issues and that in the vast majority of cases the political program of the New Right is virtually the antithesis of the church's position."

Indeed, the contrast between the two groups on most issues is striking. For example, last year the U.S. Catholic Conference said, "The primary responsibility of the state is to serve the common good. It has a responsibility to adopt economic policies to ensure that essential needs of all its people are met. These include adequate shelter, health care, education and access to necessary social services." In his presentation before the Republican Party Platform Committee, Bishop Thomas Kelly, also of the U.S. Catholic Conference, voiced the support of the church for the United Nations, human rights, strategic arms control and international economic assistance to the poorest nations of the world. Such positions are part of my heritage as an American Catholic.

Yet, these programs and policies of social concern are under attack by the Moral Majority—the so-called Christian right. I have never understood what is "Christian" about the religious shock troops of the radical right. Christian teachings, I thought, included compassion for the weak, support for the poor, aid for the hungry and love for all mankind. Instead, I hear that to be a Christian, to take a "moral" position, legislators must vote for major reductions in federal programs, vote against the Department of Education and declare that a threat to Taiwan is also a direct threat to the security interests of the United States. I am told that, as a Christian, I must be against affirmative action for women and laws restricting child abuse by parents. To be moral, I must support unlimited military spending and oppose the strategic arms limitation treaty.

Of course, these are not divinely authorized Christian positions, but they are part of the radical right agenda. The veneer of Christian morality is part of a strategy, again according to Higgins, "to establish a New Right political apparatus that conceals the political economic program of the right wing and focuses on the social issues that have an emotional appeal to groups that have traditionally voted for progressive candidates." The point is made openly by Paul Weyrich, executive director of the right-wing Committee for the Survival of a Free Congress: "The New Right is looking for issues that people care about, like gun control, abortion, taxes and crime. They're emotional issues, but that's better than talking about capital formation."

It is clear that the New Right has had success with this strategy, and the rationalizing necessary to excuse the odd-couple alliance becomes more tortured and distressing daily. I heard one apologist explain the difference in outlook between the church and the right on the issue of nuclear weapons control. He said there was nothing irreconcilable about the church's strong support of arms limitation and the right-wing call for increased nuclear arms because the "ultimate goal was world peace"!

Through the efforts of the right's effective single-issue groups, notably the "pro-life" movement, many compassionate and, yes, "Christian" congressmen have been defeated. This is a shortsighted approach for the Catholic community. Father Theodore Hesburgh, president of Notre Dame University, assessed the damage: "We have witnessed the fact that political candidates who agree 95 percent with Catholic principles of social justice in most issues of public policy have been defeated by their opposition on this one issue and have been replaced by candidates who, agreeing superficially on the issue of abortion, disagree with us on almost every other issue bearing on justice and equality."

I am reminded of the lines from "A Man for All Seasons." Sir Thomas More asks Roper, his former student, to justify his disregard for the law in attempts to gain political goals.

"What would you do?" More asks. "Cut down a great road through the law to get after the Devil?"

"I'd cut down every law in England to do that," young Roper answers.

"And when the last law was down," More retorts, "and the Devil turned around on you—where would you hide, Roper, the laws all being flat?"

Today, the church is dangerously close to aiding single-issue groups—whether intentionally or not—in cutting down so much of what it has stood for in the past. If the right wing, through manipulation of single-issue politics, continues to defeat elected officials who support progressive steps, there will be no one left in government to shelter those broad values of compassion and justice the church has endorsed.

Both as a Catholic and as a legislator, I hope many in the hierarchy of our church will soon reevaluate this course. From conversations with my fellow Catholics across the country, I know a growing number share the same concern.●

EXPORT TRADING COMPANIES—VI

● Mr. HEINZ. Mr. President, I would like to bring to the attention of my colleagues the testimony of J. Hallam Dawson, president of the Bankers' Association for Foreign Trade and the Crocker National Bank in San Francisco, before the International Finance and Monetary Policy Subcommittee on February 18. Mr. Dawson discussed the worsening position of the United States in the international marketplace and emphasized the urgent need for export trading company legislation like S. 144 to improve that position. Mr. Dawson also detailed the numerous contributions which banking organizations can make to the success of export trading companies and the obvious practicality of permitting banks to have equity positions or control of ETC's.

Mr. President, I ask that Mr. Dawson's testimony be printed in the RECORD at this point.

The testimony follows:

PREPARED STATEMENT OF J. HALLAM DAWSON, FEBRUARY 18, 1981

Mr. Chairman and Members of the Subcommittee:

My name is J. Hallam Dawson and I am President of the Bankers' Association for Foreign Trade. I am also President of the Crocker National Bank of San Francisco. I am accompanied today by the Association's Counsel, Gary M. Welsh of the Washington law firm of Prather, Seeger, Doolittle, & Farmer.

The Bankers' Association for Foreign Trade ("BAFT") was founded in 1921 by a group of banks whose purpose was to expand their knowledge of international trade and to develop sound banking services and procedures in support of trade. Today, BAFT's voting membership of 151 U.S. banks include virtually all of those having significant international operations. The Association also includes as non-voting members 97 foreign banks maintaining offices in the United States, and thus embraces many of the major international banks of the world.

BAFT is pleased to have this opportunity to express its strong support for S. 144, "The Export Trading Company Act of 1981," because the promotion and support of U.S. exports has been one of BAFT's fundamental priorities since its inception. We would also like to commend you, Mr. Chairman, and the Members of the Subcommittee for taking such prompt action on this legislation in the 97th Congress.

In this prepared statement, I would like to address four major topics that have surrounded this legislation since its inception in the last Congress; namely, (1) the need for export trading companies (ETCs) to stimulate U.S. exports, (2) the contributions that banking organizations can make to their development and organization, (3) the ways banking organizations might choose to participate in ETCs, and (4) possible public policy concerns over controlling investments by banking organizations in ETCs.

THE NEED FOR U.S. EXPORT TRADING COMPANIES

The nub of our trade problem was aptly summarized by the Joint Economic Committee in its 1980 Economic Report:

"[I]t is not only the oil bill that concerns American policymakers.

"Nearly all other nations recognize the link between international trade and domestic prosperity. The United States has been slow to adjust to the competitive world of trade. We have tended to view foreign trade as a luxury rather than a necessity. In the meantime, the U.S. market has become the target of integrated, well-financed, and highly successful efforts by our competitors."

The challenge is thus clear. More U.S. firms must export and, to do so, they must be given the means to meet highly-sophisticated foreign trade competition. S. 144 is directed precisely at these most crucial problems.

First, to involve more U.S. firms in exporting, they must be given both the opportunity and the means to export. Export trading companies will be able to provide to small and medium-sized businesses the export know-how and financial resources necessary to carry on a successful export business.

Second, to be competitive in export markets, U.S. firms must be relieved of the ex-

port barriers and disincentives that the U.S. imposes from within and which often serve to benefit our competition and make exporting more difficult than it need be. Among the most important barriers are those which have artificially compartmentalized various segments of the export process and effectively blocked development of U.S. export trading companies in response to natural market forces. S. 144 is a strong step toward reducing or modifying a number of these barriers.

Included among these barriers to the formation of export trading companies are certain legal restrictions established over sixty years ago which have prevented U.S. banking organizations from participating in the development of U.S. export trading companies. In fact, we would call to the Subcommittee's attention the rather anomalous situation under present law, whereby a foreign bank doing business in the U.S. may invest in a foreign trading company that exports to the U.S., and certain types of U.S. banking organizations may invest in foreign trading companies that buy and sell goods abroad, but a U.S. banking organization may not invest in a U.S. export trading company that buys U.S. goods for the purpose of exporting them abroad.

In other words, the line separating banking and commerce frustrates the development of U.S., but not foreign trading companies. For reasons I will shortly discuss, BAFT supports section 105 of S. 144 because it moves that line to a point where it will do the most good for U.S. exports and the U.S. economy, without compromising more fundamental concerns about the separation of banking and commerce within domestic markets.

Third, it is vital to our future foreign trade growth to establish trading companies that can facilitate the joint export on U.S. goods and services. United States service industries are facing increasingly stiff government-supported foreign competition. An export trading company will be able to combine the talents of large and small U.S. firms producing complementary goods and services and put together a complete export package better able to meet both foreign demands and foreign competition. It will be able to export a complete textile mill, or complete construction project—not just individual pieces of machinery.

THE CONTRIBUTIONS WHICH BANKING ORGANIZATIONS CAN MAKE TO THE SUCCESS OF EXPORT TRADING COMPANIES

In general, we believe the strength of S. 144 is its reliance on the ingenuity, productivity and efficiency of the American business and financial community. Instead of mandating a particular form of trading company or imposing an inappropriate foreign model on U.S. industry, S. 144 leaves it up to the U.S. private sector to develop what is likely to be a highly diverse group of trading companies—some large, some small, some owned by a single firm, some jointly-owned, some with bank participants, some owned entirely by nonbanking organizations, some formed around particular industries, and some formed for particular markets. The best way to improve U.S. competitiveness is by deregulating instead of regulating, by promoting rather than burdening U.S. business.

We live in a highly competitive international environment and we must be prepared to modify barriers or restrictions imposed under vastly different economic circumstances that now only serve to frustrate our broader national interests. Among these restrictions are legal provisions which prevent U.S. banking organizations from investing in firms, such as U.S. export trading companies, that engage in export trade or in providing export trade services.

The restrictions derive principally from the Edge Act of 1919, and they were based on a concern that U.S. export trade might somehow become dominated by one or two large trading companies involving a few industrial giants and the relatively few banks engaged at that time in trade financing. These restrictions thus bear little relation to today's highly competitive world of international trade, and the internationalization of trade financing. In particular the days when a relatively few money-center banks did most of our trade financing are ancient history. As indicated by the scope of our membership, hundreds of banks—both domestic and foreign—are aggressively competing in trade financing across the country.

We thus support section 105 of S. 144 which would give Edge Corporations, banks, and bank holding companies the opportunity to invest in export trading companies, including firms that engage only in providing export trade services. We believe it is important that banking organizations be permitted to invest in export trade service firms, as well as export trading companies, because many banking organizations, including many smaller and regional banks, would like the opportunity to expand their range of trade services without necessarily having to invest in a trading company that buys and sells goods. This would thus enable banks to present to their customers a more complete, integrated package of services that would facilitate and promote exports.

In support of our endorsement of section 105, I would like to take this opportunity to highlight a few of the important contributions which banking organizations can make to the success of U.S. export trading companies, and thus to the improvement of U.S. export performance.

First, the United States banking system reaches virtually every U.S. business, including especially small and medium-sized U.S. businesses. United States banking organizations can thus provide an important introductory link between trading companies and U.S. businesses seeking to export their goods or services. In this regard, U.S. banks already play an important role in introducing Eximbank, FCIA and other programs to businessmen throughout the country. There is no better way to reach U.S. business than through the banking system.

Second, in today's world, the finance component of an export transaction is sometimes its most crucial element. A trading company must therefore be able either to provide or arrange for appropriate trade financing. Bank participation in a trading company will expand its capabilities to put forward realistic financing options.

Third, bank participants can help trading companies penetrate markets abroad and can provide U.S. export trading companies with the knowledge and experience crucial to meeting foreign competition. Many U.S. banks have substantial international networks that reach into every major export market and which form a tremendous reservoir of talent and experience for a trading company. For example, foreign branches and affiliates of U.S. banks have a detailed knowledge of local economic conditions, government policies, and business practices which would take a de novo trading company years to develop on its own, and which knowledge is crucial for competing abroad.

Fourth, larger U.S. banking organizations often have highly developed and technologically sophisticated operations and communications possibilities for processing trade transactions. Smaller banking organizations can also avail themselves of these capabilities through their correspondent banks.

Lastly, bankers have risk assessment and control procedures and general management processes than can contribute to the development of financially-sound, well-managed, and reputable U.S. export trading companies.

WAYS OF BANK PARTICIPATION IN ETC'S

From our discussions in the banking community, we see a number of possibilities for bank participation which can be as varied as our banking system and economy.

Some banking organizations may join together to form an ETC. For example, S. 144 permits bankers' banks—banks owned by a number of small banks—to form an ETC. An ETC owned by a number of banks from the same region could provide a significant export stimulus to the area.

An ETC owned by a number of banks from different regions could stimulate the export of goods and services from throughout the country. For example, a banking organization with strong Far East relationships could join with another banking organization with strong South American relationships, thus expanding the worldwide export capabilities of a jointly-owned ETC.

Some banking organizations will prefer to organize and form their own trading companies. The regional bank may form such an ETC to give its smaller customers the one-stop service they need to enter the export market. A money-center bank may form such an ETC to assist in facilitating trade with China, Eastern Europe or other areas where barter or so-called counter-trade elements may be required due to the lack of U.S. dollar exchange.

Some banking organizations may join with nonbank firms to establish an ETC, either on a permanent or one-shot basis. For example, a banking organization, an architectural firm, a construction company and a steel fabricator could form a "one-project" ETC to bid on a foreign tender. Or a bank might join with an export management company or freight-forwarder to organize an ETC that would provide an opportunity for the more efficient combination of their essentially complementary services.

Some banking organizations may use the opportunity to integrate and expand the types of trade services they already provide their customers. For example, an export finance subsidiary of a banking organization could better meet foreign competition on behalf of U.S. exporters if it could take title to goods in the course of a transaction instead of having to proceed through other intermediaries, an activity denied U.S. export finance subsidiaries in the past.

I would note that this list is intended as suggestive only. Nevertheless, I think it is useful because it indicates the wisdom of S. 144, which would permit banking organizations to make controlling investments with prior agency approval.

PUBLIC POLICY CONCERNS OVER CONTROLLING INVESTMENTS BY BANKING ORGANIZATIONS

We believe it clear from our discussions within BAFT and the banking industry that banking organizations interested in S. 144 view it solely as a means for expanding the types of international trade services they can provide to U.S. business in order to promote U.S. exports, and not as a means for investing in or combining with U.S. business in contravention of our basic policies separating domestic banking and commerce.

THE ZAIBATSU CONCERN

First, S. 144 only permits banking organizations to invest in ETCs, and limits any such investments to five percent of the banking organization's capital and surplus. An ETC must be principally engaged in exporting and facilitating the exportation of goods and services produced in the United States by unaffiliated persons. A bank-owned ETC may not engage in securities activities prohibited to its banking organization shareholder and is specifically prohibited from engaging in agricultural production activities.

Second, the strict limits on the amount

of funds that a banking organization can lend to and invest in a trading company affiliate—a combined limit of 10 percent of the banking organization's consolidated capital and surplus—ensure that a bank-controlled ETC would not have the resources to become a Zaibatsu-like conglomerate even if it had the ability to do so—which, as pointed out above, it does not.

Third, the requirements for antitrust clearance under the Webb-Pomerene provisions and the banking agencies' authority to disapprove any investment over $10 M having adverse competitive considerations ensure against any combinations of bank and/or nonbank ownership of an ETC that would have deleterious competitive effects in the U.S. or on U.S. trade.

Interestingly, we have found competitive concerns raised in the ETC context similar to concerns raised about bank involvement in Small Business Investment Companies and I would like at this point to quote from a report issued by this Committee in 1976 recommending legislation, which was approved, permitting banks to acquire up to 100 percent of the stock of an SBIC:

"Section 108 of the bill would permit banks to own 100 percent of the voting common stock of a Small Business Investment Company. In 1967, the Small Business Investment Act was amended to prohibit a bank from acquiring 50 percent or more of the voting equity securities of an SBIC. The provision, which was initiated in the House, was provoked by concern over the 'monopolistic potential' of commercial banks in the SBIC program, although there was no evidence of abuse.

"The SBIC industry and SBA have been actively working to bring more private capital into the program. Although many banks have expressed interest in the program, it is frequently difficult to find compatible coinvestors with sufficient assets. A bank's exposure is limited by law to a maximum investment of 5 percent of capital and surplus. Allowing banks to control or wholly own a license would serve to encourage financial institutions which are interested in the sound development of the SBIC program and would increase the amount of capital available for small business investment."[1]

As in the SBIC case, we see no opportunity for a Zaibatsu-like monopolistic potential in our export trade, and believe that legislating on the basis of such unproven concerns, especially in light of the substantial protections already included in S. 144, would have the principal effect of discouraging bank participation and thus the expansion of small and medium-sized business exports.

SAFETY AND SOUNDNESS CONCERNS

S. 144 contains comprehensive safeguards that carefully limit and control possible banking organization exposure in export trading company investments. These limitations are at least equal to and often exceed those that currently apply to other permissible bank, bank holding company, or Edge Act Corporation investments.

First, as noted above, no banking organization, except an Edge Act Corporation not engaged in banking, may invest more than five percent of its capital and surplus in the stock of one or more ETCs. This five percent limit is well within other recognized prudential limits in our banking laws.

Second, no banking organization can in the aggregate and on a consolidated basis invest and lend more than ten percent of its capital and surplus in or to an ETC. This ensures that the financial limitations of section 23A of the Federal Reserve Act apply to all banking organization/ETC investments, irrespective of whether the ETC is a majority-controlled affiliate. In contrast, bank-sponsored REITs have always been considered outside the limitations of § 23A. This provision thus puts a total prudential cap on exposure to a controlled or non-controlled ETC.

Third, the name of an ETC cannot be similar in any respect to that of a banking organization investor. This prohibition ensures against public confusion between a banking organization and an ETC affiliate and thus avoids the types of problems that arose in the REIT area.

Fourth, a banking organization must terminate its ownership of an ETC if the ETC takes speculative positions in commodities. This protects against an ETC affiliate's engaging in non-productive, purely speculative activities that could put a banking organization's investment at risk. In this regard, this provision will effectively require any banking organization investor to ensure that there are adequate internal controls in an ETC against speculation.

Fifth, S. 144 specifically prohibits a bank from making preferential loans to an ETC in which it has an equity interest, including to any customer of such ETC. The language of the prohibition parallels that in the Financial Institutions Regulatory and Interest Rate Control Act of 1978 (FIRICA) on insider loans, and is thus a type of prohibition regularly enforced by bank examiners and the bank regulatory agencies.

Sixth, the banking agencies are given clear authority to require divestiture of any ETC investment that may constitute a serious risk to a banking organization investor. Again, this parallels powers which the Federal Reserve was given under FIRICA over other bank holding company investments.

While there are additional regulatory safeguards provided over controlling investments which I will discuss next in focussing on the control issues, BAFT believes the above limitations, restrictions and controls are appropriate and, in the aggregate, ensure against any exposure beyond traditional prudential limits for either non-controlling or controlling investments.

REASONS FOR PERMITTING CONTROLLING INVESTMENTS BY BANKING ORGANIZATIONS

Permitting banking organizations to make controlling investments subject to the limitations included in S. 144 should not increase risks or potential competitive or conflicts of interest problems, but, as indicated in the Committee's Report last year on S. 2718 (at pp. 10–11), should actually serve to reduce them:

A banking organization with a controlling investment is in a better position to protect its investment and regulate risk exposure. In this regard, many U.S. banking organizations have a policy in their international operations of favoring controlling investments, because equity control ensures operational control and hence better risk management. In this regard, if S. 144 were amended to prohibit controlling investments by banking organizations, it would not in any way change a banking organization's ultimate risk exposure of five percent of its capital and surplus for any investments in ETCs, and ten percent of its capital and surplus for loans and investments in ETCs. What such amendment would do is make it more difficult for a banking organization to protect its investments and loans to an ETC.

Some banking organizations may only want to organize an ETC for limited purposes *e.g.*, to assist in certain project financing, to export from a local region or to a specific trade area, or to merely expand their range of export trade services. Permitting controlling investments thus encourages the formation of smaller, independent trading companies, with less Zaibatsu-like combinations between banking and industry.

A banking organization may find that conflict of interest problems are minimized when it has control. A banking organization with many export customers may not want to join with any one or two customers in an ETC, but may want to set up its own independent ETC.

An ETC controlled by a banking organization would have no unfair competitive advantage over other ETCs or ETCs with minority bank participation. S. 144's restrictions on total loans and investments and preferential lending are across the board and pertain whether a banking organization has either a minority or majority participation.

In addition to these reasons for permitting controlling investments, it must be noted that S. 144 contains extensive safeguards in the case of controlling investments to protect against unwise risk exposure.

Any controlling investment, even if less than $10 million, must be approved by a bank regulatory agency.

No group of banks can acquire more than 50 percent of an ETC without prior agency approval.

The agencies could disapprove any application for investment where, in their judgment, export benefits are outweighed by adverse banking factors.

The agencies can impose conditions and limitations on controlling investments to limit a banking organization's financial exposure or prevent possible conflicts of interest or unsound banking practices.

The agencies can examine banking organization-controlled ETCs and use cease-and-desist authority to enforce any and all requirements imposed under the law.

The effect of these safeguards is to make it clear to all concerned that a bank cannot attempt an unwise rescue operation of an ETC, that it must deal with its affiliate on an arms-length basis, and that the ETC must ultimately stand or fall on its own.

CONCLUSION

I hope this statement proves useful to the Committee and we would like to express our willingness to work with your staff on any aspects of this legislation where our further input may be of assistance.●

[1] S. Rep. No. 94–420, 94th Cong., 2d Sess. 8–9 (1976).

HONORING AMBASSADOR RICHARD N. GARDNER

● Mr. D'AMATO. Mr. President, Richard N. Gardner, a native of New York City, and a distinguished diplomat and scholar, recently left his post as our Ambassador to Italy. Dick Gardner served his country with wisdom, vision, and dignity. Through his office he has brought a broader understanding of American foreign policy to the Italian Government and to its people.

These accomplishments are set out well in an article appearing in the Italian newspaper, Il Giornale.

Mr. President, to recognize the many accomplishments of Ambassador Gardner for his country, I ask that the IL Giornale article be printed in the RECORD.

The article follows:

From [I] Gioranale, Feb. 18, 1981

GREATER U.S.-ITALIAN UNDERSTANDING

Today Italians have a much clearer conception of U.S. policy than they did four years ago. No one today believes, as the leadership of the Christian Democratic Party did in 1977, that Washington would tacitly consent to a government which included the Communist Party. Gardner's successor will find everything in order, no skeletons in the closet. Gardner's motto: "Be silent before

speaking." His retort to Feltrinelli's widow: "I do not think that you and I mean the same thing by 'intellectual' ".

On page one, Box: Gardner, the outgoing U.S. ambassador achieved his goal in Rome: there is better understanding between Italy and the U.S. Gardner plans future visits to Italy.

Rome. Richard N. Gardner, outgoing U.S. ambassador, is a person who does not like to say goodbye. He will leave his official residence, Villa Taverna, on the 27th of this month. This does not mean he will not return to Italy, however. He will come back this April to spend two months as visiting professor at the European University. He will stay in Settignano at the Villa "I Tatti," once Bernard Berenson's *de luxe* retreat. Nor does a return to his chair in law at Columbia University after four years as Carter's representative in Rome mean an end to his interest in politics.

"I find that alternating study with active political life has many advantages. It gives practicality to the theorist and depth to the politician. Moreover, this assignment to Rome represents my second experience in active political life. From 1961 to 1965, during the Kennedy and Johnson Administrations, I was Deputy Assistant Secretary of State for the United Nations. Since I'm only fifty-four years old, it's quite possible that I may return to government a third time sometime in the future, after a reasonable interval for research and teaching."

In talking about himself, Gardner limits himself to the above statement. He does not yet know whom Reagan will name as his replacement, but he wants to leave everything in order for his successor, all accounts up to date, no outstanding debts and no heritage of skeletons in the closet. One thing is certain: as a result of what Gardner has achieved in these four years, his successor will be spared the uphill battle that faced Gardner when he became ambassador on March 17, 1977. Italians now have a much clearer conception of U.S. policies than they did at the beginning of the Carter administration. There is greater awareness on the part of the U.S. of the importance of Italy's role in Western politics than was the case in 1977.

Prime Minister Forlani was one of the leaders Reagan telephoned immediately following his inauguration. The humiliating days of Guadaloupe, where a Western summit that did not include Italy was held in January, 1979, are now a thing of the past. Gardner protested vehemently to Washington, which, in turn, pointed an accusing finger at France. In any case, that insulting nonsense was not repeated. And everyone has been effectively disabused of the idea that the American ambassador might receive instructions to turn a blind, convincing eye to vaunted "openings".

A GREAT MISUNDERSTANDING

This happened in Gardner's case. His arrival was preceded by the questionable approval of Communists and their sympathizers, as it happened, on both sides of the Atlantic. Right after Carter announced Gardner's appointment as ambassador to Italy, a Sulzberger story in the New York Times spoke of the open admiration Sergio Segre, Italian Communist Party authority on foreign affairs, had expressed for Gardner's openness, modernity and intelligence. Sulzberger's article gave the impression that Gardner and Segre had met more or less privately, an unorthodox and significant contact made unofficially prior to Gardner's becoming ambassador. This all occurred while the "historic compromise" between the Christian Democrats and the Communist Party seemed to be in the offing, that Communist participation in Italy's government would become reality within a matter of months.

What actually happened was that both attended a banquet in New York in honor of a large delegation of parliamentarians of all Italian parties, headed by Giulio Andreotti. It included the Italian Communist Party as well as ultra right wing parties. At that time, however, it seemed unnecessary to pursue the matter of who or what Gardner really was. Otherwise it would have been easy to verify that in the Fall of 1968 Columbia's rebellious students had labelled him a warmonger, chalking "pig" on the classroom door and obstructing classes by student picket lines.

The misunderstanding was compounded by the Carter administration's wavering on the question of "Eurocommunism." The record has now been set straight. And when the entire story is made public, we will see how important a role Gardner played in convincing Washington of the dangers involved in playing with words or diluting them by illadvised silences. A twelve-page memorandum signed by Carter on March 12 is locked in Gardner's strongest safe. It spells out the criteria which are to govern the carrying out of Gardner's mission. Gardner has been both conscientious and resourceful in observing these criteria, which he helped formulate. But for several months, Washington did its best to insure that the most important criterion remained unspecified.

ANTAGONISM

The rules (set out in the above memorandum) state that the U.S. is—as might be expected—opposed to Communist participation in the governments of its NATO allies, though at the same time, it would not interfere in their allies internal affairs. The reason for this is that Communists and Eurocommunists in these countries remain firm in their preferential relationship with the Soviet Union, an imperial power heading an alliance directly opposed to NATO. However, consideration for the French Social Party (and in particular for Mitterand) which was at the time an electoral ally of the Communists, caused the Carter administration to refrain from specifically pronouncing its opposition to Communist participation in Western governments.

This was what brought about the belief on the part of the principal leaders in the Christian Democratic Party, from Zaccagnini to Moro to Galloni, that the United States would tacitly consent to Communist participation in government. Gardner understood the situation. He flew to Washington and convinced the National Security Council not to mince words in stating the U.S. position. This resulted in the January 12, 1978, declaration by the Department of State on Communist participation in the governments of NATO allies. "We do not favor Communist participation and would welcome a decline of Communist influence in the countries of Western Europe."

The enthusiasm with which Rome's radical chic had showered Gardner, quickly evaporated. At a buffet dinner in a Rome penthouse, Mrs. Feltrinelli, widow of the publisher/bomber, said to him, "Gardner, you've lost the intellectuals." To which the Ambassador replied: "I'm afraid that by intellectual you and I mean two vastly different things, Mrs. Feltrinelli."

Ambassador/Professor Gardner set himself a heavy schedule of speeches which took him to cities throughout Italy—he averaged about forty speeches a year—the intent being to explain his ten-point "Strategy of Cooperation". His talks averaged half an hour, and an hour or an hour and a half were spent in open debate with the audience, with no limitations set on topics.

Gardner, the diplomat and professor, and his comprehensive way of looking at U.S.-Italian relations, emerges from the ample file of newspaper coverage of these speeches. He is willing to guide his interviewer through the thick file, which must be integrated with political material selected from the embassy, such as the "blue books," on the activity of the Italian Communist Party which the Ambassador sent to Washington every six months. This "Gardneriana" consists only of subtle points of emphasis. A cushion in his living room has a Venetian saying embroidered on it. (His wife, Danielle Luzzato, is of Venetian origin.) "Perma de parlar, tasi." Before speaking, be silent.

SERVANTS OF THE CIA

Relations with Italian parties? The attention given Craxi's Socialists is natural—though in principle he is impartial to all. They unhesitatingly gave full expression to their independence from the Communists when, in the Fall of 1979, they opted in favor of European security and the installation of Cruise missiles in Italy.

Terrorism, and its probable support by Warsaw Paci secret services? The Italian Communist Party wants proof. In January 1979, however, at the Genoa funeral of Red Brigades' victim, Guido Rossa, the Communists felt free to brandish placards reading "Away, Away Servants of the CIA" without feeling the need for proof. Nor did "moderate" Giorgio Amendola furnish proof to back up his December 30, 1979, statement in *Unita'* that "international powers are seeking to destroy the democratic republic in order to reduce Italy to the role of a gigantic aircraft carrier in the conflict-riddent Mediterranean."

The direction of the Italian Communist Party? Something is certainly happening. There is, unquestionably, internal conflict, and it is possible that pro-Soviet members (Cossutta?) were responsible for revealing Brezhnev's threatening letter to Berlinguer on the position the Italian party took on the Polish question. But the view held by Gardner on the eve of his departure can be seen in one of his recent speeches. "The real debate is between those who see European and American security as inextricably linked, and those who believe that safety lies in neutrality, equidistance and what is actually a process of Findlandization which, in objective terms, can only result in a Europe under Soviet hegemony."

DANILO GRANCHI.●

SENATOR MATHIAS' STATEMENT ON U.S. INTERESTS IN THE DEVELOPING WORLD

● Mr. CRANSTON. Mr. President, our distinguished colleague, Senator MATHIAS, recently addressed the congressional staff forum, a bipartisan group of House and Senate staff, on the problems of the developing world and what the U.S. stake is in helping to find solutions to these problems.

Senator MATHIAS presented a clear-headed, discerning analysis of the problems and why the United States has a strong interest in seeking answers. What it boils down to is that our own economic and military security interests are advanced by stable development of Third World nations. U.S. aid efforts have consistently proven to be directly beneficial to the United States. Every dollar that the United States contributes to multilateral development programs generates $3 spent on U.S. goods and services. It does not take a genius to understand that that is a good investment.

But we must look beyond the immediate cause and effect of foreign aid and realize as Senator MATHIAS said that:

It is urgent that the American people clearly understand that a world in which 57 people die of starvation every single minute

of every hour of every day is not a safe place to pursue the American dream.

It is not a safe place, period. I completely agree with Senator MATHIAS that "we should be able to see beyond our own parochial interests to the wider world whose future is so intimately, so inescapably entangled with our own."

Senator MATHIAS has focused on a very critical issue in this statement and in the hearings that he is holding in the Foreign Relations Committee, which will be of great benefit to us in the Senate as we grapple with the very difficult budget choices that we face. In our effort to balance the budget and meet the needs of our own people, we cannot forget our neighbors, our fellow human beings in other nations.

Mr. President, I ask that Senator MATHIAS' statement be printed in full in the RECORD at this point.

The statement follows:

AVOIDING A WORLD THAT IS: "RED IN TOOTH AND CLAW"

Thank you for inviting me to inaugurate the 1981 Congressional Staff Forum on Food and International Development. I am delighted to have a chance to discuss the United States' interests in the problems of developing countries in the 1980's with a group which can have considerable influence on how the Congress serves those interests.

I have been personally involved with development questions for many years as a member of the Foreign Operations Subcommittee of the Appropriations Committee.

In recent years, as the problems mounted and as America's will to confront them seemed to slacken, I began to want to participate more directly in foreign policy formation than was possible through the appropriations process, powerful though that process is. So, when I had the opportunity to join the Foreign Relations Committee at the beginning of this Congress and to become Chairman of its Subcommittee on International Economic Policy, I welcomed the opportunity.

My switch from the Appropriations to the Foreign Relations Committee raised a few eyebrows and a lot of speculation. But it shouldn't have.

The reason for my choice was very simple, very fundamental: I felt that if the richest, most powerful nation on earth couldn't get its economy and the global economy moving in directions that would benefit humanity, then the prospects for achieving peace, or justice, or stability anywhere in the world, including the United States, would go down the drain.

On the other hand, if we could inject some vision into our foreign policy, if we could make some of the urgent, global decisions that have been pushed under the rug for so long, if we could get Americans thinking and moving in the right direction, then a miraculous future was within our reach.

I joined the Foreign Relations Committee because I wanted to see the United States of America reach out and grasp that miraculous future. And I am here tonight for the same reason. Great causes require powerful proselytes. I hope by the end of this evening to have made some, because we have already begun to move and we need your help.

This morning the Subcommittee on International Economic Policy completed the second of two days of hearings on "The U.S. Stake in the Global Economy". Perhaps some of you had a chance to attend them. If so, you know that the Subcommittee heard wide-ranging views from some very distinguished experts.

A staggering number of complex topics were covered, including, among others, the external debt of developing countries; the prospects for renewable energy resource development and conservation; the grave economic and national security implications of our heavy dependence on foreign mineral resources, and the intertwined problems of population and development. Needless to say, we couldn't do justice to any one of these subjects in two days, much less to all of them. But we made a start.

Based on the testimony we heard, I believe two generalizations can safely be made. First, the U.S. stake in the global economy, and in the developing countries in particular, is much greater and is increasing far more rapidly than the Congress and the country as a whole realize. Second, actions taken—or not taken—by the United States and other major countries in the next couple of years will determine the global economic condition well into the next century.

Both conclusions may be somewhat unwelcome—they will complicate our lives and demand efforts we would all prefer not to have to make. But I think they are inescapable.

Let me elaborate a little on the nature of our stake in the global economy. A number of developing countries are of vital importance to the United States for military security reasons alone. Turkey and Thailand are two obvious examples. The nations of the Middle East are of major importance because of the oil we import from the Persian Gulf and because of our special concern for the States of Israel and Egypt and the effort to widen the circle of peace in that region. Recent developments in the Caribbean and Central America have reawakened us to the importance of military security in our own hemisphere. For a long time, Naval strategists have warned us to pay close attention to the Strait of Malacca and the Cape of Good Hope and now we've begun to listen.

It's obvious that if you were to try to draw up a short list of the developing countries which are vital to us simply to secure our defenses against the Soviet Union and our access to oil supplies, the list would be anything but short. And, at that, it would not begin to reflect the vast complex of our national security interests.

Consider, for example, the strategic implications for the United States of the non-energy mineral resources of the developing countries. Our industrial economy is critically dependent on imports of a growing number of minerals.

Representative James D. Santini, Chairman of the House Subcommittee on Mines and Minerals, testified at our hearings that we import over 50 percent of our needs for 24 of the 32 minerals designated as "strategic and critical". He warned us that "without a continued supply of mineral imports, our entire industrial base would be shattered and our defense capability would be crippled". And he wasn't exaggerating.

Some of our mineral imports come from South Africa, Canada and Australia, but a large share of our present mineral and raw material imports (and a larger share of future imports) comes from developing countries.

Secretary of State Alexander Haig, testifying in the House Interior Committee last year, described attempts by the Soviet Union to gain influence in a host of developing countries in Africa, the Middle East and South and Southeast Asia. He concluded that the era of the "resource war" had arrived. I don't go quite that far, but it is obvious that the United States can not afford to neglect the development needs of mineral rich nations.

Access to secure supplies of minerals and raw materials at relatively stable prices is only one facet of the American economic stake in developing countries. Few people realize it but the United States currently sells 40 percent of its manufacturing exports to developing countries. These countries form the fastest growing market for U.S. exports, expanding at a rate of 20 percent a year, compared to 15 percent for U.S. exports to developed countries. The developing countries are also major purchasers of U.S. agricultural commodities and will inevitably become better customers as their populations expand. In turn, we import 50 percent of the goods they manufacture.

Unfortunately, the growth prospects for developing countries are not rosy. The escalating oil prices that have us strapped, have many developing nations on the ropes. This year, developing countries will pay $60 to $70 billion for imported oil, and run a combined current account trade deficit of $80 billion. The oil-importing developing countries now owe $300 billion in long-term public debt to the rest of the world.

Here's how that affects us: Private commercial bank loans are the largest single source of developing country borrowings, and U.S. banks hold 40 percent of total private bank loans to non-OPEC developing countries. Brazil alone owes U.S. banks $14 billion.

Diminished growth prospects, combined with debt servicing requirements, could force some developing countries to adopt drastic measures. They could throw up new barriers to U.S. exports or dump their products on the U.S. market as governments become frantic to raise hard currency to repay debts. Bank loans would have to be rescheduled—some might be repudiated—diminishing the earnings prospects for U.S. banks and other investors.

I do not mean to imply that these events are inevitable. I do suggest that the United States has a major economic interest in the growth prospects of developing countries and the harshness of the choices between financing and economic "adjustment" which are forced upon them. When you analyze the facts, you cannot help but agree with the Overseas Development Council that "the growth and progress of the poor countries are essential to our own economic well-being".

America's security is also threatened by runaway population growth. As General William Westmoreland has pointed out very convincingly, excessive population growth throughout much of the developing world is contributing to popular frustration over failure to achieve improved economic well-being. As the poor migrate from the rural areas, they form vast urban powder kegs—in many developing countries, huge numbers of unemployed youth constitute the recruitment pools for terrorists and political extremists.

The Subcommittee hearings included the most sobering testimony on the interaction between poverty and population, and the effects of both on the earth's finite resources. The Global 2000 Report, issued in July after three years of research by more than a dozen government agencies, was equally sobering. It found the earth's resources severely strained through reckless exploitation to meet the economic demands of a growing world population.

The Report projected a world in the year 2000 of 6.35 billion people, faced with a litany of woes: a wider gap between rich and poor; no increase in food consumption for most people; high fuel costs and shortages of fuelwood; loss of much of the world's farmland to erosion, salinization and urbanization; shortages of fresh water; a 40 percent reduction in tropical forests; extinction of 20 percent of the species of plants and animals now living; increased acidity of rain and snowfall; rising carbon dioxide levels in the atmosphere and decreasing ozone levels in the stratosphere; and a dangerous and expensive scramble by nations to secure dwindling stocks of energy and mineral resources.

The world depicted by the Global 2000

Report would be "more vulnerable to disruption than the world we live in now". It would seriously threaten the political and economic security of the United States. It would be a Hobbesian world: "red in tooth and claw".

It would be a serious mistake to dismiss Global 2000 as just one more in a series of gloom and doom studies. The stunning fact about Global 2000 is that it is based on conservative assumptions: "that the policies of governments and private companies stay much as they are today; that the technological advance continues at the same rate as in recent years, with no revolutionary breakthroughs; and that major wars and other catastrophes do not intervene".

Global 2000, in other words, assumes business as usual. It will all come to pass, as Conservative Columnist James J. Kilpatrick points out: "If we fail to heed the clear warnings of this study—if we fail to take sensible actions now . . ."

The good news is that we can rewrite this bleak scenario, if we do act now. Not only can the worst be averted, but real improvements in the human condition could be attained by the year 2000.

The heart of the challenge before us is to find ways to break the vicious circle of poverty, soaring population growth and erosion of the earth's resource base. The United States cannot meet this challenge alone; no nation can. Just as we depend upon our allies to meet the Soviet military challenge, we must seek broad international cooperation to overcome the threats to our environment and resources.

But, because we have the most to contribute to success, and the most to lose to failure, we should take the lead in organizing cooperative action on controlling population, on developing renewable energy resources and on increasing food production and improving distribution. And we can do so with confidence, happy in the knowledge that we are pursuing a course of enlightened self-interest.

Clearly, President Reagan has come into office with a mandate to get our inflation-ridden economy back on its feet and to strengthen our national defense. How he should go about this task is where the mandate becomes cloudy.

Conventional wisdom in the Administration call for sizeable cuts more-or-less across the board to get federal spending under control and it calls for increased investment in defense. This means, of course, cuts in foreign aid and international economic programs. And that is where I get off the train.

The case for U.S. support for development in the poor countries is compelling, both on economic security and military security grounds. Scrimping here would be as dangerous as scrimping on defense.

The Administration's proposals, it seems to me, reflect a deep-seated misperception about U.S. foreign assistance spending. The myth dies hard that foreign aid gives money away to ungrateful foreigners with little or no return to the United States. Actually, it is demonstrable that every dollar the United States contributes to multilateral development programs generates three dollars spent on U.S. goods and services.

The hearings we held this week on "The U.S. Stake in the Global Economy" were the opening salvo in a battle to dispel the idea that U.S. support for development is the work of bleeding hearts and do-gooders. It is urgent that the American people clearly understand that a world in which 57 people die of starvation every single minute of every hour of every day is not a safe place to pursue the American dream.

In the process of dispelling the miasma of misperception that keeps us from assuming our global responsibilities, we might even come to recognize that what we must do for selfish reasons, we ought to do simply because it is right.

Certainly if we are indeed "the last best hope of earth," as Abraham Lincoln called the United States, we should be able to see beyond our own parochial interests to the wider world whose future is so intimately, so inescapably entangled with our own.●

CAPITAL PUNISHMENT

● Mr. JEPSEN. Mr. President, I have long felt that capital punishment is justified for certain heinous crimes. When it is plain that the perpetrator of a murder has thought through what he or she is doing and decided to go ahead and kill, that person ought not to be allowed to live and possibly threaten other innocent people in the future.

In today's Washington Post, George Will has an excellent and thoughtful column in support of capital punishment. Mr. Will (who once opposed capital punishment so vigorously that he initiated a campaign which resulted in Connecticut commuting its first death sentence) used the Steven Judy case to argue that capital punishment can be a significant deterrent. He says that, in certain cases, refusing to execute killers amounts to refusing to prevent the deaths of innocent persons. This refusal thus becomes an immoral act in itself.

"Capital punishment," Mr. Will states, "is indeed horrible." But in some cases, he adds, to refuse to do otherwise results in even more horrible circumstances.

Mr. President, I ask that Mr. Will's column be printed in the RECORD in its entirety.

The column follows:

THE ONLY POSSIBLE PUNISHMENT

(By George F. Will)

According to his lawyer, Steven Judy was intelligent, witty and kind in conversation but had "this thing about beating up women." The story of how Judy did his thing should stir doubts in those opponents of capital punishment whose minds are not closed as tight as eggs.

Judy, who was executed March 9 by Indiana, committed his first rape when he was 13. Pretending to be selling Boy Scout raffle tickets, he forced his way into a woman's house, raped her, stabbed her more than 40 times (hard enough to break his knife), smashed her on the head several times with a hatchet and cut off her thumb. Miraculously, she survived.

Such is the criminal incompetence of America's criminal justice system, Judy was on parole in Illinois (he had served just 20 months for viciously beating a stranger—a woman) and was free on bond in Indiana (the offense was armed robbery; the bond was just $750, in spite of his lurid record) when he committed what he says was his 13th rape. It certainly was his last.

Pretending that his car was disabled, he got a passing motorist to stop. He raped her, killed her, then drowned her three small children in a creek. He never expressed remorse, and advised the jury to impose the death sentence, lest he someday be released and kill again.

Until recently I opposed capital punishment, categorically, in writing and actions. (I initiated the campaign that culminated in Connecticut's first commutation of a death sentence.) However, the categorical nature of my position—I believed that evidence was irrelevant—certainly was wrong. And I may have been wrong on the issue itself.

One of two serious arguments for capital punishment is that it almost certainly can be a significant deterrent of significant crimes. If that is so, then refusing to execute killers in certain kinds of cases amounts to refusing to prevent the deaths of innocent persons, and is clearly immoral.

There now is sophisticated research that strongly suggests a deterrent effect. Furthermore, the principal argument against the deterrent effect is weak. The argument is that in most jurisdictions where capital punishment has been abolished there has been no immediate, sharp increase in what had been capital crimes. But in those jurisdictions, the actual act of abolition was an insignificant event because for years the death penalty had been imposed rarely, if at all. Common sense—which deserves deference until it is refuted—suggests that the fear of death can deter some premeditated crimes, including some murders.

The second powerful argument for capital punishment concerns a need for moral symmetry between crime and punishment. A society practices self-indulgent humanitarianism when it spares the likes of Judy in order to spare itself the unpleasantness of contemplating and administering capital punishment. The visceral reaction most humane people have against capital punishment actually is relevant to the case for that punishment.

Capital punishment is indeed horrible. That is why it can deter, and why, deterrence aside, it is a proper expression of virtuous sentiments. In his book, "For Capital Punishment," Walter Berns argues that the purpose of punishment and dramatic poetry can be similar:

"Capital punishment, like Shakespeare's dramatic and Lincoln's political poetry . . . serves to remind us of the majesty of the moral order that is embodied in our law and of the terrible consequences of its breach. . . . The criminal law must be made awful by which I mean awe-inspiring, or commanding 'profound respect or reverential fear.' It must remind us of the moral order by which alone we can live as *human* beings, and in our day the only punishment that can do this is capital punishment."

Whether the authority to impose the ultimate punishment serves the expressive and teaching function that Berns correctly assigns to the law suggests an empirical question. But his position is plausible. And in a society suffering an epidemic of murder and other serious crime, the burden of proof is on opponents of capital punishment.

Rather than dispatch that burden with evidence and argument, many opponents simply assert the impropriety of the sentiments that Berns wants the law to teach by expressing. Part of the program of liberalism involves making people feel ashamed of sentiments essential for a decent society—sentiments such as anger about crime, and the desire for vengeance against criminals. Those are virtuous sentiments when grounded in a sense that the important laws express more than calculations of social utility. Those laws express a natural, life-enhancing moral order.●

THE HOBBS ACT

● Mr. EAST. Mr. President, the basic function of government is to protect its citizens from violence. Government loses its reason for existence if it fails to fulfill this fundamental duty. Unfortunately, labor violence is a reality in today's American workplace. The effect of robbery, extortion, and arson on innocent employees and employers is accentuated by a judicially created rule that pre-

cludes the Federal prosecution of a special group of criminals. During the course of labor disputes union members who commit robbery, extortion, and arson in interstate commerce are currently exempt from Federal prosecution solely because they are union members.

Therefore I commend the senior Senator from South Carolina and the junior Senator from Utah and join them as principal cosponsors of S. 613, a bill offered to amend the Hobbs Act. If adopted, this bill will clearly and rightfully make all acts of extortion and violence committed in interstate commerce a Federal offense, regardless of whether the perpetrator of such acts is a union member. The sole purpose of this bill, Mr. President, is to subject union members to the same rule of law that applies to every other citizen of this country.

The Hobbs Act is a Federal criminal statute which on its face prohibits all violence and extortion that obstructs interstate commerce. This interpretation of the act is supported by the statute's legislative history. The Hobbs Act was passed in response to a Supreme Court ruling interpreting the original anti-racketeering law of 1934. The 1934 act specifically forbade violent and coercive conduct in interstate commerce. However, the 1934 act also contained a statutory exemption from prosecution available to those individuals who used force to obtain "the payment of wages by a bona fide employer to a bona fide employee."

In *United States* v. *Local 807, Teamsters*, 315 U.S. 521 (1942), the Supreme Court emasculated whatever effectiveness the 1934 act had as a tool against labor violence by broadly construing the act's statutory exemption from prosecution. The Court held that violent conduct by a union member could not form the basis for a Federal indictment if the member was arguably attempting to obtain higher wages by such conduct. Under the Court's reasoning, where a union member's end was to achieve higher wages, any means used by the member to achieve that end were allowable for purposes of avoiding a Federal criminal indictment.

Congress reacted to the Local 807 decision by passing the Hobbs Act in 1946. In omitting from the new law any statutory exemptions from prosecution, Congress clearly expressed its intention to reverse the "end justifies the means" analysis used by the Supreme Court in Local 807. Stated the bill's sponsor, Congressman Hobbs:

> Crime is crime, no matter who commits it; and robbery is robbery and extortion is extortion, whether or not the perpetrator has a union card.

Until 1973, anyone familiar with the language and history of the Hobbs Act would have reasonably concluded that it was a Federal offense for union members to obstruct interstate commerce by committing acts of violence while pursuing union objectives. However, in *Enmons* v. *United States*, 410 U.S. 396 (1973), the Supreme Court held that the Hobbs Act was not violated where union members used violence and extortion to achieve legitimate union objectives. In so ruling, the Court resurrected the end justified the means analysis formerly used by the Court in the Local 807 decision and thereafter rejected by the Congress upon the passage of the Hobbs Act. Writing for a four-member dissent, Justice Douglas argued that the use of violence, even to achieve so-called legitimate union objectives, was plainly prohibited by the Hobbs Act and that the statute ought to be so construed.

The bill I have proposed in conjunction with the Senator from South Carolina and the Senator from Utah, is designed to redress the effect of the majority decision in Enmons and conform the law to the original congressional intent. The bill does not in any way undercut the right of employees to choose union representation or engage in peaceful picketing. Other Federal statutes do not permit criminal conduct to go unpunished based upon the criminal's motivations or identity. The rule of law should be no different for those who impede the free flow of commerce by acts of extortion and violence during labor disputes. Government has failed to perform its basic function when criminals go unpunished because they have been accorded preferred treatment by a majority in either the Congress or the Supreme Court.●

MEDIATION IN EL SALVADOR

● Mr. PELL. Mr. President, I call the attention of my colleagues to an editorial on El Salvador which recently appeared in the Providence Journal. It reports an effort to promote a negotiated settlement rather than have the United States involved in attempting to impose a military solution. This reflects what I have been saying ever since the decision to send military assistance was announced in January. This article discusses a plan to have Willy Brandt act as a mediator. Whether it is this idea that is finally adopted or one calling for OAS mediation, or perhaps one whereby the democratic states of the region would move the waring factions to the negotiating table, the political approach in the end is the only one that has a chance of success.

I ask that the editorial be printed in the RECORD.

The editorial follows:

EL SALVADOR: AN URGENT CEASE-FIRE AND THEN ONWARD TO A SETTLEMENT

An encouraging turn of events in El Salvador: the government and leftist guerrilla groups reportedly have agreed to seek a political solution to their differences. Negotiation, rather than the bloody civil war that has torn that country for the last two years, is in everybody's best interests. Most especially, it is in the interest of the suffering Salvadoran people.

Pending confirmation, Washington should be prepared to put a hold on its recently announced commitment to send arms and military advisers to the tiny Central American country.

The reason for beefing up military aid to El Salvador was to help the ruling junta stop the flow of arms from Soviet-bloc countries to Marxist-leftist guerrillas. These newspapers supported that move—reluctantly—on the basis of documented proof that Soviet Russia and its satellites were shipping arms into El Salvador.

While the military-dominated regime has been all too slow to institute reforms and give the Salvadoran people some hope for a decent life, a Soviet-dominated Communist government is not an acceptable substitute. When told of what was happening, President Reagan acted as he should have, and as President Kennedy did in the Cuban missile crisis two decades ago.

His quick response, following shortly after the failure of the guerrillas' "final offensive" in January, may very well have contributed to the decision of the guerrilla leaders to seek a negotiated settlement.

Be that as it may, a representative from Socialist International, a group that advocates socialism through non-violent means, has offered Washington the mediation services of former West German Chancellor Willy Brandt, the father of West Germany's "Ostpolitik." To have such a skilled political negotiator acting as the disinterested third party in mediating the Salvadoran struggle would be a godsend. It would allow the United States to move off center stage and play a supportive economic, rather than a high-profile military, role with all the risks that involves.

But before pulling its military punches, the administration will want reassurance on several points. First, that President Duarte and the guerrilla leaders are serious about the proposed negotiations. As evidence of their good faith, both sides should agree to a cease-fire while the talks go on. Continuing murderous attacks by either the government's security forces or the rebels would augur little hope for bridging the wide gulf between the Salvadoran right and left.

And, of course, any moratorium on Washington's military aid commitment should be predicated on a cessation of the flow of Communist-bloc arms to the Salvadoran rebels.

Finally, Washington must recognize that, commendable as is Socialist International's desire to seek a nonviolent solution to a bloody civil war, that organization has a self-proclaimed bias toward one side. Its executive director and spokesman revealed that bias when he referred to the Revolutionary Democratic Front (FDR) as the "legitimate representative of the Salvadoran people."

According to U.S. intelligence reports, the F.D.R. was set up in Havana in May, 1980 by a group of guerrilla leaders who met with Fidel Castro and created the front to disseminate propaganda abroad. The FDR, the Unified Revolutionary Directorate and the Farabundo Marti People's Liberation Front reportedly make up the hardcore Marxist leadership of the revolutionaries.

That is not quite synonymous with the luckless and landless peasantry for whom they claim to speak, and it is certainly far apart from the moderates—the middle-class, the small business people, the civil workers—who made up most of the 10,000 victims killed in terrorist attacks last year.

Out of such unpromising stuff, the best Washington can hope for is an uneasy settlement by Salvadorans and for Salvadorans, in which neither it nor Moscow plays a dominant role. And to maintain what will probably be a not very satisfactory resolution, Washington should be prepared to pay a heavy price in economic support.●

TAX CUTS, INFLATIONS, AND INTEREST RATES

● Mr. JEPSEN. Mr. President, in recent weeks a number of critics of the Reagan economic program have argued that the proposed tax cuts will be inflationary

unless exactly offset by spending cuts. While I favor significant budget cuts, I do not believe that our success or failure in being able to enact all the spending cuts that have been proposed should deter us from moving forward on the Reagan tax cut program.

Recently, Dr. David Meiselman, one of our Nation's most distinguished monetary economists, specifically addressed the question of whether tax cuts are inflationary. He concluded that it is Federal Reserve policy which is the essential element in inflation and not fiscal policy. In other words, tax cuts in and of themselves are never inflationary unless the Fed reacts to them by increasing the quantity of money. On the other hand, tax cuts such as those proposed by President Reagan can be anti-inflationary because they will lead to an increase in the quantity of goods and services produced and increase personal saving.

I, therefore, respectfully submit Dr. Meiselman's testimony to those who incorrectly fear the inflationary impact of President Reagan's economic program, and I ask that it be printed in the RECORD.

The testimony follows:

TAX CUTS, INFLATION AND INTEREST RATES

There is widespread agreement on the desirability, indeed, necessity for reduced inflation, lower interest rates and more economic growth. Moreover, there is also a growing consensus that taxes are too high and that many Federal Government spending programs either return too little for the costs involved or are inappropriate altogether.

Despite general agreement that slowing inflation is crucial to improve equity and economic performance, there is still much disagreement among informed public spirited citizens and public officials of good will how to slow inflation, and similarly, what effects tax and budget cuts will have on inflation, interest rates and economic growth.

The Joint Economic Committee is to be commended for conducting these Hearings on the question whether tax cuts are inflationary. This is in the best J.E.C. tradition of trying to bring the best of rigorous, nonpartisan technical analysis to bear on important public policy issues. I am grateful for and welcome the opportunity to present my views and hope that they will help to dispel some of the current confusion on the relationship of tax cuts to inflation and interest rates.

The relationship between tax cuts and inflation appears to be one of the most misunderstood in current public policy discussions. The connections between tax cuts and inflation, and tax cuts and interest rates, also seem to be misunderstood and misinterpreted by financial markets. Most of what we hear about the presumed connections between reducing tax rates and the effects of the rate reductions on inflation and on interest rates is simply wrong. In many respects, the flawed analyses stem from applying an invalid Keynesian theory which overlooks both the central rule of monetary policy in the inflation drama as well as the impact of taxes on output.

I will present several related propositions about inflation, fiscal policy and interest rates. Where possible I will also present some of the evidence supporting these propositions. I will then summarize some of their implications for current issues, especially the impact of tax cuts and budget cuts on inflation, interest rates and economic growth. I regret that I cannot go into great detail in this brief presentation, but I will be pleased to make them available to this Committee.

I deal first with inflation. Inflation occurs when the quantity of money expands faster than output. This relationship may well be the most extensively tested proposition in all of economics, with few, if any, exceptions. The quantity of money controls aggregate demand, and there is a close connection between the nominal stock of money and nominal gross national product, which is the best measure of total spending. Output, aggregate supply, depends on other factors, such as available inputs of labor, capital, raw materials, and the state of technology as well as the incentives to put them to efficient use.

Both money and output affect prices. The relationship between prices and the ratio of money to output is very close. The close relationship between prices and the ratio of money to output does not mean that, in principle, tax policy has no bearing on the level of prices. Given this dependable relationship, it is important, in analyzing the impact of public policy proposals on inflation, that we ask how the proposed change will affect either (1) the stock of money, or (2) output. Ignoring either the monetary or the output consequences means that we are likely to be in serious error.

Let me first deal with output, the supply side of the central relationship explaining inflation. Changes in tax rates, or other provisions of the tax code, will affect inflation if these changes alter output. Tax increases that penalize saving and investment or discourage work result in lower output and thereby in higher prices. It makes no difference whether such tax increases are explicitly legislated by Congress or whether effective tax rates are implicitly enacted by money-induced inflation which pushes individuals into higher tax brackets or causes businesses to pay taxes on fictitious profits that result from the requirements of mandated historic cost accounting.

Because different tax changes may have different impacts on output, one should not lump together all tax increases or decreases. Instead, careful analysis of the effects of proposed tax changes on output is essential. (In the past, and to this day, most tax analysis is flawed because it focuses on presumed aggregate demand effects and largely ignores supply.) Tax rate reductions that lessen the disincentive effects of the tax system will cause output to increase. For a given stock of money, more output results in lower prices. Thus, supply enhancing tax cuts lead to lower prices. In turn, lower prices lead to lower market interest rates.

For example, consider some of what follows from adoption of faster depreciation. Initially, some businesses may pay less tax to the Federal government. Business cash flow rises, and before anything else takes place, Treasury receipts fall. Treasury borrowings rise, but these are fully offset by reduced borrowing. Interest rates stay the same.

But, because there is now more incentive for capital formation, business will invest more and produce more. Increased output will make prices lower than they would otherwise be, the inflation premium component of market interest rates will decline, causing interest rates to fall. The increased post-tax rate of return on business investment will lead to an increase in real or inflation-adjusted interest rates. Because the inflation premium is by far the major factor in current record-high interest rates, it is likely that market rates would end up lower and real rates would end up higher as a result of the faster capital recovery provisions.

Increased output and increased real income will provide some of the saving to finance the capital expansion. In addition, and perhaps no less important, higher post-tax returns will also induce more saving.

Of course, another way of increasing post-tax returns on saving further is to reduce marginal tax rates. At the present time, the post-tax return on saving for many, if not most, of us is negative. Little wonder we save and invest so little and why most families have abandoned financial markets for rug dealers and diamond merchants to provide for their futures or to protect capital. Lower nominal interest rates and higher post-tax real rates would not only involve more saving, but more saving would be channeled into financial markets and thereby to private capital formation. This is also the prescription for battered financial markets, and for so many of our endangered financial institutions. This is also why I support tax reduction on personal as well as business income and assets.

The invalid Keynesian theory predicts the exact opposite effects. Essentially ignoring the supply consequences of tax changes, it associates tax increases with reduced aggregate demand, and thereby lower prices. Similarly, Keynesian analysis associates tax reductions with increased aggregate demand, and thereby higher prices. Despite the seeming plausibility of these Keynesian assertions, and the widespread belief in their validity, there is essentially no evidence to support these assertions, especially when the effects of money and output are taken into account.

I have run a series of statistical tests to see if, after making allowances for money and output, there was any discernable or dependable relationship between changes in tax rates and inflation. I found little. To the best of my knowledge, many other researchers have come to similar conclusions. This should not be surprising. Given the close relationship of money per unit of output and the price level, there is little left for other factors to explain.

I will spare you the agonies of facing correlation and regression statistics at this point, but I will submit them for the record. Suffice to note for now that in examining the relationship between prices on the one hand and essentially the ratio of real high employment revenues to potential real G.N.P. as a measure of tax rate shifts, I found a weak but positive connection between tax rates and inflation. Higher tax rates seem to be associated with higher prices! The multiple regression is

$$\text{Log prices} = \underset{(10.29)}{5.39} + \underset{(60.13)}{1.07}\,(\log M_2 - \log \text{output}) + \underset{(1.44)}{0.17}\,(\text{log high empl. rev.} - \log \text{prices} - \log \text{real potential GNP})$$

$\bar{R}^2 = 0.9956$

(T values in parenthesis).

I may add that there is some evidence that Federal government expenditures have an independent impact on inflation. Thus, budget reductions would help to slow inflation.

Along the same lines, I also examined whether the size of the deficit affected inflation. It turns out that, again, money and output explain almost all of the price level experience since at least 1960. When debt in the hands of the public is introduced as a separate variable it does show a small and statistically significant impact on the price level. However, the effects are so small that it is clear that the deficit is a minor actor in the inflation drama. For given money and output, the main determinants of inflation, it takes about a 10 percent change in the national debt in the hands of the public to change the price level by 1 percent. Thus, with about 700 billion dollars of the national debt held by the public outside government trust accounts and the Federal Reserve, a 70 billion dollar deficit in one year, none of which ends up in government accounts, would contribute about one month's inflation at current rates! Clearly, although the effects of the deficit are not trivial, the size

of the deficit is not the major factor in the inflation scenario.

I did similar calculations using the M_{1B} measure of money, and the results are essentially the same as those I have just described for the M_2 measure of money.

Even though the deficit per se may not be the crucial factor in inflation the way the deficit is financed is central to any understanding of the inflation process. If a deficit is financed by selling government bonds to the Federal Reserve, the resulting increase in the supply of money reduces the value of money, which is to say, inflation results. Alternatively, if the deficit is financed by selling bonds to the public, no such inflationary increase in money takes place. To be sure, real interest rates may rise in order to induce the public to buy the additional bonds, but unless there is an increase in inflation this rise in interest rates is bound to be small. The major factor in high and rising interest rates is the large inflation premium which is built into all interest rates at the present time. Thus, any attempt to lower interest rates by simply printing new money to buy additions to the national debt ends up by causing interest rates to rise, not fall.

It is widely believed that deficits somehow cause the Federal Reserve to increase the money supply. Deficits are seen as placing some great "burden" on the Federal Reserve. To lighten this "burden," the Federal Reserve creates some money and buys bonds.

The Federal Reserve is not required by law to monetize the deficit. Indeed, the spirit of the law explicitly prohibits the Federal Reserve from doing so; witness the restrictions on direct sales of debt by the Treasury to the Federal Reserve. Of course, the loophole is that the Federal Reserve can buy outstanding debt rather than new debt. Because there is essentially no difference between new bonds and old bonds, the results of buying old debt are the same as monetizing new debt. Bank reserves and the monetary base increase. Money expands. Inflation results. Instead of interest rates being lower, interest rates end up higher. Indeed, this suggests that the Congressional mandate to the Federal Reserve should essentially be, "Just don't do something. Stand there!"

Although this hypothetical mechanism potentially connecting deficits and inflation is well known, the existence of a possible link between deficits and the money supply does not settle the empirical question, whether, in fact, the Federal Reserve and the monetary mechanism do systematically respond this way to budget deficits.

It turns out that there is little if any connection between budget deficits, or changes in the federal debt, and changes in the money supply! Still another Emperor with no clothes.

The results are essentially the same if the gross federal debt is used or if the data are adjusted to exclude holdings of the Federal Reserve itself. It also makes little difference if the old M_2 measure of money is used. If the Federal Reserve has created too much money, as it certainly has for at least the past 15 years, the Federal Reserve cannot legitimately blame poor fiscal policy for the shortcomings of monetary policy. Not only is there no legal or practical need to monetize public debt, the Federal Reserve has not systematically done so. Apparently the Fed monetizes private as well as public debt.

Even if federal deficits have not been primarily responsible for our inflation or for poor monetary policies, many people, including many financial experts, believe that deficits are a major factor causing high interest rates. Their reasoning is that deficits drive up interest rates because the Treasury adds to the supply of debt instruments, thereby decreasing prices of bonds, and driving up interst rates.

Again, it turns out that there is no connection between changes in interest rates and changes in the national debt. It makes no difference whether we use gross debt or debt adjusted to exclude debt held in trust funds or by the Federal Reserve.

This may seem to fly in the face of fundamental economic laws of supply and demand. How can it be that an increased supply of bonds doesn't lead to a fall in bond prices, higher interest rates, tight credit and so forth?

The answer to this apparent paradox is found in two places. The first is the distinction between nominal and real interest rates. To be sure, if everything else is held constant, increased Treasury borrowing would cause interest rates to rise. This would be an increase in real, or inflation-adjusted, interest rates. However, the major factor shaping interest rates, especially in recent years, is the inflation premium, not real interest rates. Thus, rapid, unpredictable and erratic changes in money are the chief factors driving up market rates, not increases in the public debt. Everything else is not held constant. To be sure, more public debt does tend to drive up real rates, but real long-term rates are now in the area of 2 to 3 percentage points of the long bond yield of close to 13 percent. The remaining 10 percent or so is the inflation premium.

The second factor is that the U.S. Treasury is only one among many factors in the supply and demand for funds. Although the U.S. Treasury is often the largest single borrower, Treasury operations alone cannot explain the entire supply and demand picture. This is why interest rates fell in 1975 and 1976 at the very time that the Federal government ran record budget deficits and the U.S. Treasury sold even more bonds than at the height of World War II.

My analysis also explains why countries such as Japan and Germany, where deficits are a significantly higher fraction of G.N.P. than the United States, have slow inflation, more growth, more saving, lower interest rates and higher real interest rates than in the United States. Money has increased more slowly and smoothly in those two countries than in the U.S., and neither country penalizes saving and investment as severely as we do.

It should be noted that the effects of taxes and expenditures are not symmetrical. Increased governmental expenditures usually use up resources and typically leave fewer resources for the private sector. If resources are used less efficiently in the public sector than in the private sector, overall efficiency falls. Even if the same number of people are at work, total output is less useful, less valuable. This is the equivalent of a fall in output. I believe that we are well past this point at the present time in most areas of government expenditures. This is the major reason for shrinking the public sector in order to make possible a larger pie for U.S. citizens. This may be why, in my regressions, higher expenditures tend to be associated with more inflation.

Regarding taxes, there is certainly an important and legitimate role for taxes in the financing of needed government services. If more resources are to be channeled into the public sector, higher taxes depress private sector activity, thereby freeing resources and making them available for the public sector. However, it would seem that tax rates have already become so high—largely because effective rates have been driven up by money-induced inflation rather than being explicitly legislated by Congress—that the private sector is already too depressed for our own good. Moreover, the depressive effects of high and rising tax rates have differentially depressed capital formation and risk taking more than consumption and reduced work effort more than leisure.

High taxes have worked all too well in curtailing private sector activity. Instead, we need a reduction in taxes, especially those taxes that discourage investment, saving, risk taking and work.

High taxes do not reduce prices and do not fight inflation. High taxes do reduce output, employment and economic growth. It is time to stop punishing ourselves in the hope that pain itself will cure our problems. Masochism is not the remedy. Budget cuts, tax cuts that lessen disincentives, regulatory reform, and above all, a slow and stable rate of growth of money are the necessary components and the cure for our serious inflation and high interest rate ills.

Finally, the desirable effects of well designed tax cuts and budget restraint, however beneficial in themselves, can easily be nullified by monetary growth that is fast, rather than slow, and erratic rather than stable. The best possible monetary policy cannot undo the waste and unemployment caused by excessively burdensome taxes, bloated federal budgets, and regulation gone wild. In this sense, monetary policy, or the Federal Reserve alone, cannot do the whole job by itself. But unless the Federal Reserve pursues a non-inflationary monetary policy of slow, stable and predictable growth of money, inflation will follow. Inflation-caused waste and distortions will remain with us. Legislated tax rate and budget reductions will be undone again. Interest rates will remain high or go higher. Promised growth will falter. The program will fail. I fear to think where some of our citizens will venture to turn next.

I trust that the Congress will meet its responsibilities to help get the country moving ahead once more.●

DEREGULATION OF BROADCASTING INDUSTRY

● Mr. D'AMATO. Mr. President, today I am joining my distinguished colleague Senator HARRISON SCHMITT in cosponsoring Senate bill 270, which will further deregulate the radio broadcasting industry.

This bill is consistent with President Reagan's program to reduce the size, scope, and influence of the Federal bureaucracy, which in so many cases, is far too involved in every aspect of American life. These regulations often provide no benefits to the public, are costing billions of dollars in administrative costs, and are causing undue inconvenience for business and industry.

It is my understanding that the Federal Communications Commission already has voted to deregulate the radio industry administratively. However, statutory relief is needed to insure that deregulation is carried out more swiftly.

The radio communications industry is healthy, and it is highly competitive. There are more than 8,500 radio stations in this country, which serve virtually every taste and need of the public. It is unnecessary, and in fact, counterproductive for the FCC to engage in a supervisory role over how these stations operate on a day-to-day basis. So long as these businesses are unduly controlled, they never will be able to exercise the creativity that comes in a free market competitive environment.

Mr. President, this bill also puts the onus on the FCC to report to the Congress each year on its review of rules, regulations, and policies, and its elimination of those which are unnecessary.

In addition, the FCC will report to the Congress to the extent to which the Agency has promoted competitive, new, and diverse sources of radio programing.

It is my pleasure to cosponsor this bill, and I urge other Senators to join us in the spirit of regulatory reform and fiscal restraint.●

IMPORT RESTRAINTS

● Mr. LEVIN. Mr. President, today's Washington Post carried a front page story detailing the internal debate taking place in the administration relative to the desirability of seeking to negotiate an import restraint agreement between the United States and Japan.

The debate, Mr. President, has attracted a good deal of attention because it is a highly visible symbol of the administration's commitment to the entire concept of "reindustrialization." But I suggest that there are equally important, even though much less visable, debates taking place which the Congress has got to attend to as well.

As an example, I call the attention of my colleagues to a very small article in today's Post; an article which was hidden in the "roundup" column of the business section. It reads as follows:

France is planning to spend $200 million on research and development of a new fuel-efficient car, a presidential spokesman said yesterday. The project, part of the government's energy-saving drive, aims at developing a car engine which would consume no more than three-quarters of a gallon of gas per 60 miles, spokesman Jean-Marie Poirer said after the weekly cabinet meeting.

Mr. President, at the same time that the French Government is investing $200 million in this program, the Reagan administration is proposing the elimination of the cooperative auto research program (CARP) which the Congress decided to fund at meaningful levels just last year.

We have an auto industry which has experienced record losses in the last year and faces record investment needs in the next 5 years. We have a Government which is still debating, despite the evidence of the harm done by imports, whether or not they should even consider seeking voluntary restraint. And we have a Government which is determined to cancel a meaningful program designed to help the auto industry produce more fuel efficient cars—cars which would help us achieve our twin goals of energy independence and economic recovery.

Mr. President, I find the dichotomy between the actions of the French Government—a government willing to impose restraint on imports and provide research assistance to its domestic industry—and the actions of our Government—which cannot decide if it wants import restraint and decides not to fund basic auto research—to be disturbing. But it goes a long way toward explaining why Renault now controls American Motors and why Japan has passed America as the largest producer of cars in the world.

Mr. President, I want to see the highly visible import issue resolved; and if the administration does not resolve it quickly or correctly, I hope Congress will, by passing some form of the Danforth-Bentsen import-quota bill. But I also want the administration and the Congress to recognize that Government has got to work with the industry on other issues as well; issues like basic resear.h which could produce the kind of technological advances which help both the industry and the country.

That is the task we face in the weeks and months ahead. And what we have to recognize is that other countries and other governments have already answered the questions the President is still trying to form and embarked on a course of action. We certainly have to follow them on that path—and we have to do so now before they have gone so much further than we have that we cannot catch up.●

CASEIN IMPORTS

● Mr. BOREN. Mr. President, last week the Senate Agriculture Committee approved legislation which would remove the requirement that the Secretary of Agriculture increase milk price supports on April 1. During the markup of that legislation, Senator MELCHER offered an amendment to limit the importation of casein into the United States. Unfortunately, the amendment failed on a tie vote.

Some people may wonder what casein imports have to do with the price of milk and the dairy price support program. The answer is quite clear. Casein is a substitute for skim milk in the manufacturing of food and feed. In 1980, the United States imported over 152 million pounds of casein which, in effect, displaced upward of 4 billion pounds of domestically produced skim milk. If domestic supplies had been used instead of foreign casein, the Government cost of the dairy program could have been reduced by $329 million and the U.S. trade balance would have been improved by over $140 million. In short, casein imports are adding to the dairy surplus, hiking up the costs of the price support program, and denying U.S. dairy producers a market for their products.

During our consideration of dairy price supports in the Agriculture Committee, I was shocked to learn that we are continuing to import casein from the Soviet Union. It is absolutely incredible that the U.S. Government, on the one hand, denies our farmers access to the Soviet market, while on the other hand, we keep our markets open to the Soviets. I am sure that the dairy farmer in my State who also raises wheat questions whose economic interest the U.S. Government is looking out for.

Just last year, we imported from the Soviet Union approximately 1.3 million pounds of casein at a cost of close to a million dollars. This million dollars could have rightly gone to the U.S. farmers. The amount may be small but an important principle is involved. How can we possibly defend our Government's current policy?

If the Reagan administration is not going to lift the grain embargo, I believe that we should halt the importation of Soviet casein, as a matter of fairness. This is the least we can do for our farmers who have already suffered an unfair burden as a result of American foreign policy. Why should we be benefiting Soviet farmers and ignoring our own? ●

THE EXECUTION OF STEVEN T. JUDY

● Mr. LEVIN. Mr. President, last Monday morning Steven Judy got his wish and was executed for the brutal murders of Terry Lee Chasteen and her three children.

Whether society is improved by granting Judy his death wish and engaging itself in savage spectacles is an altogether different question.

Relative to that subject, I submit for the RECORD an article from the Washington Post dated March 10, 1981, and an editorial from the New York Times dated March 8, 1981.

The articles follow:

[From the Washington Post, Mar. 10, 1981]

RAPIST MURDERER STEVEN T. JUDY GETS HIS FINAL WISH—EXECUTION

(By Bill Prochman)

MICHIGAN CITY, IND.—The state of Indiana gave Steven T. Judy almost everything he wanted on his last night—prime rib, lobster tails, sour cream on his baked potato, a phone call from an old girlfriend in Texas that warmed his heart and 2,800 volts of electricity that stopped it.

Only the four beers—Stroh's, he had requested—were held back. But the state made up for that by shooting him full of tranquilizers just before the end early today.

After the injection, Judy, a twisted man who laughed about being dealt a bad hand by the world and laughed just as richly about dealing the same cards back randomly to society, walked the last six steps to Old Betsy, Indiana's medieval-looking electric chair.

A black veil was taped to his forehead, shrouding his face. A metal skullcap covered his shaved head. Electrodes were attached to his head and ankles, the wires leading out in a direct line to the Northern Indiana Public Service Co. substation so the lights wouldn't dim at 12:07 a.m.

Other such precautions were taken. Most electric chairs have leather restraining straps for the wrists. Indiana uses metal bands, having learned from other states that some men react so violently to the power surge their arms rip upward through the leather in one last thoughtless protest.

Neither the state nor Judy wanted that. So it was all over in less than two minutes—a 10-second jolt of 2,300 volts hitting him seven minutes after midnight, a 20-second charge of 500 volts added shortly afterward for good measure. The prison doctor left him sitting in the chair 4½ minutes before going in to pronounce him dead at 12:12 a.m.

Bob Carr, who became Judy's foster father after Judy was released from the mental institution to which he had been committed at age 13, watched from the other side of the Death House window.

Carr had known the background—a kid first arrested at 10 for molesting a woman and then finally committed three years later after talking his way into another woman's home by pretending he was a Boy Scout selling raffle tickets. He raped her, stabbed her 18 times until the knife broke, then went into the kitchen for a hatchet and hit her four more times in the head. She lived—after brain surgery, open-heart surgery and her own stint in a mental hospital.

That victim later testified at the trial that brought Judy to the electric chair—for the rape-murder of a young woman and the killing of her three children.

After the execution, Bob Carr was trying to be fair to everyone involved.

"I think it was well executed," said Carr, meaning no pun. "They did it real special. I could tell it was a tremendous amount of voltage moving through his brain. He was unconscious in seconds."

Still, it wasn't easy, watching.

"His body jerked and he reared up," Carr said. "His fingers clutched and he tightened up."

The worst part was the smoke, the wisp of smoke.

"You could see the smoke out of the top of his head. Then about 20 seconds later, his body kind of relaxed."

Fifteen minutes after that, the word got outside the prison, where a mixed crowd of several hundred had kept a six-hour vigil in the freezing night. The scene at the gates to Indiana's walled fortress was alternately bizarre, ghoulish, touching, American.

Early on a small group of neo-Nazis from Chicago showed up, uniformed and holding "Death to Judy" signs. They moved off when the church people came with their candles, their guitars, their prayers and their signs that said God doesn't want it this way.

Judy, 24, was the fourth man to die since the moratorium on capital punishment was lifted four years ago. Throughout the United States, there are 32 prisoners on death row. So the scene at the gate of the Indiana State Prison became a forum, of sorts, on the death penalty. It was an awkward forum—but in a way the ultimate test of the wisdom of death for death's sake—because Judy not only wanted to die but threatened to rampage on if he ever got out.

"Suicide is not the issue here," argued Henry Schwarzschild, who came from New York to represent the American Civil Liberties Union, a foe of capital punishment. "What is involved here is the state's right to homicide. Who would think our political leaders would follow the wishes of a sick and destructive killer?"

Gene McWilliams, an Indianapolis salesman who brought a van here to serve as a headquarters for a pro-death penalty group called Protect the Innocent, couldn't fathom that reasoning. If it had been his wife, his kids who had been killed, he said, he'd throw the switch himself. He said it was time to start worrying about the victims, not the criminals.

As midnight neared, the mostly quiet crowd became increasingly restless.

"Are we going to see the body?" a candle holder shouted at the state trooper guards in a bad attempt at sarcasm. "We want to see his head. On a platter." The troopers, unimpressed all evening with candles, glared back, apparently further convinced the world was filled with wierdos.

Just after 12:12 Brian Murphy, a 21-year-old student from Notre Dame, stopped by on his way home from a basketball game. "Boy, this is strange, this is awful," Murphy said. "This is the toughest question of all. Is it right or wrong? My church says it's wrong. I just don't know."

Murphy wasn't the only one who couldn't find the answer here. Even Judy, the man who wanted to die, didn't seem to have it. He had provoked and challenged the state, reveling in the final attention he was getting.

At his trial he boasted of 13 rapes, 50 armed robberies, countless burglaries. He went into such detail about the final murders that several jurors became ill.

He had taken young Terry Lee Chasteen and her children to the edge of White Luck Creek near Indianapolis on the morning of April 28, 1979. He told the jury how he raped the woman, strangled her in front of the screaming children and threw her body into the creek. Then he throttled the five-year-old and threw her in, then the four-year-old, then the two-year-old.

He told the jury he'd do the same thing to them if he got the chance. Kill me, he told them.

Only at the very end, minutes before the voltage hit him, did he show the slightest hint of remorse.

"I don't hold no grudge," were his last words. "I'm sorry it happened."

Forty-eight hours earlier, however, at a prison press conference, he said he wasn't losing any sleep over it.

At that time he also was asked the ultimate question: Does the death penalty serve as a deterrent to violent crime?

"No," Judy replied. "Well, it may, for a short period after that. But if someone is going to kill somebody, they don't think about a death penalty later on."

[From the New York Times, Mar. 8, 1981]

DEATH WISH

Steven Judy is a 24-year-old construction worker from Indianapolis. In the spring of 1979 he stopped to help, or so she thought, a woman stranded with a flat tire. Instead, he further disabled the car and offered her and her three young children a lift. She was raped and strangled; the children were tossed in a creek where they drowned.

If Judy is electrocuted tomorrow, as scheduled, the State of Indiana runs no risk of executing the wrong man—which takes care of one argument against capital punishment. Nor does Judy think his punishment is cruel and unusual: he has taken to citing Bible passages that indicate his fate is appropriate. And to make sure that no one extends to him the humanity he denied his victims, he has refused to support an American Civil Liberties Union petition for clemency. His contempt for life, it seems, is absolute.

But though his death may be, so far as one can gauge such imponderables, no loss to society, the manner of his dying is a blow to civilization. To civilize is not only to nurture cultural and technological developments but to advance morality and justice out of a primitive state. By that definition, the United States is a civilized country. Mr. Judy is, for whatever reason, a barbarian. A civilized country can afford to deal with people like him in other, wiser ways. What it cannot afford is the return to the club implicit in responding to his brutality with the like. To endorse execution, however understandable the impulse, is quite simply to come down to his level.●

DEATH OF MARY K. RANDOLPH

● Mr. GLENN. Mr. President, I join my Senate colleagues today in offering profound sympathy to Senator RANDOLPH on the loss of his beloved wife, Mary. Particularly in these times when the media is rife with stories about failed marriages and unseemly escapades among political families, the Randolph's 48-year marriage stands as a shining example of how love can be—even in the vortex of Washington.

Indeed, Mary Randolph thrived on the political life; or more properly perhaps, she thrived on the opportunities that such a life presented for serving those who are less fortunate. A former social worker in her native West Virginia, Mrs. Randolph was a close friend of Eleanor Roosevelt and for many years was an active volunteer in numerous civic and social groups, including the Boys Club and the Florence Crittenton Home. Her genuine humanitarianism was a true inspiration—and was formally recognized in 1979 when she was awarded an honorary doctor of public service degree from Salem College in West Virginia.

We will miss Mary Randolph and our lives were enriched for having known her. Perhaps her husband can find comfort in the words of the great Greek philospher, Aeschyius, who once observed: "Take heart. Suffering, when it climbs highest, last but a little time." May those words prove prophetic for my dear friend, JENNING RANDOLPH.●

ORDER FOR RECESS TOMORROW UNTIL TUESDAY, MARCH 17, 1981

Mr. BAKER. Mr. President, I ask unanimous consent that, when the Senate convenes on tomorrow, Friday, March 13, in accordance with the order previously entered, it immediately stand in recess until the hour of 12 noon on Tuesday, March 17, 1981.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR CERTAIN ACTION TOMORROW BY SENATORS AND COMMITTEES

Mr. BAKER. Mr. President, I ask unanimous consent that, on Friday, March 13, 1981, between 9 a.m. and 3 p.m., Senators be permitted to introduce bills, resolutions, and statements, and that committees be authorized to file reports.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR THE SECRETARY OF THE SENATE, THE VICE PRESIDENT, THE PRESIDENT PRO TEMPORE, AND THE ACTING PRESIDENT PRO TEMPORE TO TAKE CERTAIN ACTION TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that during the recess of the Senate over until Friday, March 13, and Tuesday, March 17, 1981, messages from the President of the United States and the House of Representatives may be received by the Secretary of the Senate and appropriately referred, and that the Vice President, the President pro tempore, and the Acting President pro tempore be permitted to sign duly enrolled bills and joint resolutions.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR PROXMIRE AND SENATOR EAGLETON ON TUESDAY, MARCH 17, 1981

Mr. BAKER. Mr. President, I ask unanimous consent that, on Tuesday next, after the recognition of the two leaders under the standing order, there be special orders in favor of the distinguished Senator from Wisconsin (Mr. PROXMIRE) not to exceed 15 minutes in length, and, following that, a special order in favor of the distinguished Sena-

tor from Missouri (Mr. EAGLETON) for not to exceed 15 minutes in length.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, may I inquire, was Senate Resolution 92, Calendar Order No. 36, previously adopted by the Senate, reconsidered and laid on the table?

The PRESIDING OFFICER. The answer is it was.

Mr. BAKER. Have all four of those resolutions been reconsidered and laid on the table?

The PRESIDING OFFICER. The answer is "Yes."

PERMISSION FOR TEST PHOTOGRAPH OF SENATE CHAMBER

Mr. BAKER. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 94) to permit a test photograph of the Senate Chamber.

Mr. DODD. Mr. President, reserving the right to object, and there will be no objection, this has been cleared by the minority leader. There are no objections on the minority side.

Mr. BAKER. I thank the acting minority leader.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution was agreed to as follows:

S. RES. 94

Resolved, That paragraph 1 of rule IV of the Rules for the Regulation of the Senate Wing of the United States Capitol (prohibiting the taking of pictures in the Senate Chamber) be temporarily suspended for the sole purpose of permitting the National Geographic Society to photograph the Senate Chamber on March 18, 1981, while the Senate is not in session.

SEC. 2. The Sergeant at Arms of the Senate is authorized and directed to make necessary arrangements therefor, which arrangements shall provide for a minimum of disruption to Senate proceedings.

PROGRAM FOR TUESDAY, MARCH 17, 1981

Mr. BAKER. Mr. President, the Senate will shortly go into recess until the hour of 11 a.m. tomorrow. Immediately after convening the Senate on Friday, it will stand in recess until the hour of 12 meridian on the Tuesday following. At that time, it will be the intention of the leadership to ask the consent of the Senate to proceed to the consideration of Calendar Order No. 32, S. 509, a bill to amend section 201 of the Agricultural Act of 1949. Members should be on notice that this bill probably will require a rollcall vote or rollcall votes. It is not planned that a vote will occur on any matter of substance prior to the hour of 1 p.m. on next Tuesday. It is our hope and expectation that we can complete the work of the Senate on this calendar item before the conclusion of that calendar day.

Mr. President, the balance of the Senate schedule for that day is uncertain at this time. We shall take up such matters as may then be eligible on the Calendar of General Orders or the Executive Calendar and such other matters as may be cleared on both sides of the aisle.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate go into executive session for the purpose of considering two items on the Executive Calendar.

There being no objection. the Senate proceeded to the consideration of executive business.

DEPARTMENT OF LABOR

The PRESIDING OFFICER. The clerk will state the nomination.

The assistant legislative clerk read the nomination of Albert Angrisani, of New Jersey, to be Assistant Secretary of Labor; and then the nomination of T. Timothy Ryan, Jr., of Virginia, to be Solicitor for the Department of Labor.

Mr. HATCH. Mr. President, the Labor and Human Resources Committee, of which I am the chairman, support the nominations of Albert Angrisani to be Assistant Secretary of Labor and T. Timothy Ryan, Jr., to be Solicitor for the Department of Labor.

It is a fortunate day when individuals of this quality and this stature can be presented to the Senate for the positions for which they are nominated. They are individuals of extraordinary ability and talent for which the country will be grateful. They have come through the Labor Committee scrutiny without problems and with confidence. I recommend them to the Senate and recommend that their nominations be overwhelmingly approved.

Mr. DODD. Mr. President, reserving the right to object, I shall not object. These nominations have been cleared by the minority leader and, as I understand it, there is no objection from the minority.

Mr. BAKER. I thank the acting minority leader.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. DODD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has granted its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL TOMORROW, FRIDAY, MARCH 13, 1981, AT 11 A.M.

Mr. BAKER. Mr. President, I know of no other business to come before the Senate. If there is no other need for time in this period for the transaction of routine morning business, I move, in accordance with the order previously entered, that the Senate stand in recess until 11 o'clock tomorrow morning.

The motion was agreed to, and, at 6:07 p.m., the Senate recessed until tomorrow, Friday, March 13, 1981, at 11 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate, March 12, 1981:

DEPARTMENT OF LABOR

Albert Angrisani, of New Jersey, to be an Assistant Secretary of Labor.

T. Timothy Ryan, Jr., of Virginia, to be Solicitor for the Department of Labor.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

EXTENSIONS OF REMARKS

HEALTH MAINTENANCE ORGANIZATIONS

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. WAXMAN. Mr. Speaker, I am pleased to announce that on March 11, 1981, Mr. GRAMM and I introduced H.R. 2480, the Health Maintenance Organization Amendments of 1981, and today Mr. GRAMM and Mr. PEPPER joined with me in introducing legislation to change the way medicare and medicaid reimburse health maintenance organizations (HMO's).

I am also pleased to announce that on March 18 and 19, 1981, the Subcommittee on Health and the Environment will conduct hearings on these two bills.

Our purpose in introducing these bills is to promote the continued growth of strong, competitive HMO's. For almost a decade, the Federal Government has fostered the development of HMO's because such entities deliver quality medical care at predictable and reasonable costs. This policy has been followed by Republican and Democratic administrations alike and has enjoyed similar bipartisan support in the Congress.

As used most generally, the term health maintenance organization describes an entity which provides specific health services to its members for a prepaid, fixed payment. In one respect, this arrangement is like a traditional health insurance program in the fee-for-service system. A monthly payment insures some portion of the costs of health services which a subscriber may incur during a period of time.

However, an HMO is different from the fee-for-service system and traditional health insurance programs in at least three respect. First, it is different in its approach to payment to providers of health care services. In an HMO, providers are at risk and are not reimbursed for each of the services they provide, as physicians in the fee-for-service system generally are.

Second, HMO's can be distinguished from a traditional health insurance program in the fee-for-service system by either providing directly or arranging to have provided those services specified in the HMO subscriber contract. A member of a Blue Cross/Blue Shield plan or other private health insurance plan in a fee-for-service arrangement does not have services provided by the plan. Rather, the member secures his own provider or providers whom the plan might then pay.

Finally, a member of an HMO plan most often is allowed to choose his own physician within the plan. However, the member is not allowed, except under circumstances of medical emergency, to seek care from physicians or other providers outside the plan.

These aspects of the HMO concept provide the HMO a capacity and a financial incentive to control the utilization of health services so as to reduce overall health care costs.

The term health maintenance organization includes two basic HMO models: first, the prepaid group practice model, and second, the individual practice association or medical care foundation model.

In both models, the HMO receives periodic payments of fixed amounts in return for the services it provides to HMO members.

Under the group practice model, however, most medical services are provided by physicians who are members of a group practice. Such physicians may be either employees of the HMO or members of a separate entity which contracts with the HMO to provide medical services to HMO members. Physicians in these arrangements are paid in a variety of ways—the two most common being either by salary, or as a group where the HMO pays the group fixed payments per member each month.

Under the individual practice association or IPA model, physicians in a community, generally a county, or group of counties, contract with the HMO to provide medical services out of their private offices, which can be either solo or group practices. Physicians in IPA's are generally paid on a modified fee-for-service basis with retrospective adjustments based on performance by the HMO and the individual physician. In other words, the fewer expenses incurred by the HMO by the end of the year, the higher the income is likely to be for physicians at that time.

Without question, the Federal HMO policy of assisting the development of these organizations has borne significant fruit. Today, HMO's are moving into the mainstream of health-care delivery in the United States, providing comprehensive medical care on a prepaid, fixed cost basis to 9.2 million Americans. Between 1970 and 1980, the number of HMO programs has increased from 39 to 242. Of the 242 operational HMO's, 120 are federally qualified. These 120 HMO's have a membership of over 6 million persons.

Much of this organizational growth can be credited to the investment of Federal resources in HMO's. The congressional mandate, as expressed in Public Law 93-222, sought to demonstrate the extent to which the HMO approach to health care can be transplanted to new environments, with new participants putting it into operation. But, as significantly, the Federal commitment also spurred private HMO development that has led to the creation of many prepaid health plans and the expansion of existing plans. These plans are sponsored by commercial health insurors, major corporations, physician groups, hospitals, and labor unions.

Congress has maintained a close watch over HMO development for several reasons. HMO's, in a documentable fashion, have proven to be an effective counterweight to the soaring cost of health care and the Congress has sought to nurture this promising trend. HMO's offer consumers a new choice which they can choose voluntarily. Lastly, in enacting the original HMO law, the Federal Government took on a complex new role—that of stimulating the creation of new businesses that were deemed to serve the public interest. A consequence of this close scrutiny has been two extensions of the Health Maintenance Organization Act of 1973, the most recent of which was in 1978 with enactment of Public Law 95-559.

With the act expiring September 30, 1981, the time has come for Congress to examine anew this law in the light of current circumstances. Tight budget constraints which face all Government programs also must be applied to the HMO program, as effective as it has been in meeting a critical public need. Increased flexibility in the act also seems called for so that HMO's can compete more effectively with the traditional health delivery system. At the same time, it is very important that Congress look beyond this act and consider reforms of medicare and medicaid policies which have greatly restricted the numbers of individuals who have enrolled in HMO's. It makes little sense for Government to invest tax dollars in HMO's and then not take full advantage of their cost-effective ways through policies which prevent full medicare and medicaid participation.

HMO's have demonstrated in a variety of settings and in different geographical areas that they are capable of delivering quality medical care for a price that is predictable and significantly less than comparable care pro-

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

vided in the fee-for-service sector. An examination of the economic incentives which drive an HMO sheds light on why these organizations have been able to offer a quality product for a reasonable price.

President Nixon underscored the appeal of this set of economic incentives in his health meassage of February 18, 1971, and this appeal remains as true today as it was a decade ago:

Under traditional systems doctors and hospitals are paid, in effect, on a piece work basis. The more illnesses they treat—and the more service they render—the more their income rises. This does not mean, of course, that they do any less than their very best to make people well. But it does mean that there is no ecomomic incentive for them to concentrate on keeping people healthy.

The evidence supports the claim that HMO's are attractive as a means for cost control because they alter the usual economic incentives in medical care and give providers a stake in holding down costs. Studies have found that the total cost of medical care—that is, premium plus out-of-pocket costs—for HMO enrollees is lower than it is for comparable people with conventional insurance coverages. The lower costs are clearest for enrollees in HMO group practices, where total costs are from 10 to 40 percent below the costs of conventional insurance enrollees.

Most of these cost differences have been found to be the result of hospitalization rates lower than those of conventionally insured populations. And these lower hospitalization rates are due almost entirely to lower admission rates.

For example, the last national HMO census of prepaid health plans noted that for 1979 the inpatient hospital utilization rate for all HMO plans was 412 days per 1,000 members per year. This compares to an average of about 730 days per 1,000 Blue Cross enrollees nationally in 1978.

In addition, physician visits per member per year for all HMO plans averaged 3.4, and total health plan encounters, including those with the HMO's nurse practitioners or physicians assistants, per member per year for all plans averaged 4.5 in 1979. The national average was about 5 physician visits per person per year.

CONSUMER SATISFACTION

In a national survey of the public, HMO members and potential members, Louis Harris & Associates, Inc., found that HMO's are well regarded by most of their members and the concept is appealing to individuals who are generally unfamiliar with this delivery concept. The Harris poll, published in July 1980, said:

HMO's get good marks from most of their members. The great majority of HMO members are very or somewhat satisfied with the health care services that they and their family have used in the last few years. Furthermore, the percentage of those who are "very satisfied" with their health care services is somewhat higher among HMO members (57 percent) than among either eligible nonmembers (53 percent) or the general public (52 percent).

While most HMO members say that the performance of their HMO's has been about what they expected (58 percent), fully 31 percent say that they are better than they had expected, and only 7 percent say they are worse.

Word-of-mouth reports by HMO members to nonmembers also tend to give a favorable impression of HMO's. Fully 45 percent of nonmembers who know members of HMO's say that these members have spoken favorably about their HMO, while only 13 percent say that they have spoken unfavorably.

The overwhelming majority of HMO members expect to renew their membership. Only 3 percent of current members say they probably will not renew, and many of these say they will leave because they will no longer be eligible for membership (for example, they plan to move away).

Many reasons are given by members to explain their satisfaction with their HMO's, but in many cases, these replies are also given by nonmembers to explain their satisfaction with their current health care. However, there are several aspects of HMO membershps which are especially appreciated by members and which differentiate their attitudes from those of nonmembers. In particular, HMO members are more satisfied than nonmembers with:

The cost (both the total cost and the cost to themselves) of their health care services.

The availability of doctors and medical services 24 hours a day, 7 days a week.

The availability of preventive health services.

Having a wide range of health care services available in one place.

The convenient location of their HMO's (for them).

One other benefit of belonging to an HMO is a greater degree of confidence—or at least less uncertainty—in knowing precisely what benefits are available as part of current health plans and where to go to obtain them. Members are substantially more likely than nonmembers to feel that they know a great deal about the benefits available to them.

MEDICARE

Under present law, our elderly citizens have no incentive to join an HMO because they do not share in the savings which accrue to Government as a result of the efficiency of such organizations. Thus, as a part of our effort to recraft the Government's policies toward HMO's we are introducing a bill that would remedy this current flaw in our current medicare program. The same bill—with regard to medicare—was passed by the House of Representatives in the 96th Congress.

To older Americans, the traditional health care system is a vital, but bewildering assortment of medical specialties, hospitals, nursing homes, claim forms, and unplanned expenses, No one can erase the physical, psychological, and economic problems imposed by advancing age but the medical care system can move to deal more equitably and effectively with the health problems which place such heavy burdens on older Americans.

Currently, HMO's with medicare contracts elect between cost and risk-based reimbursement. When we pay on the basis of costs, there is no reward to the HMO for being efficient, no reason for HMO's to seek actively to enroll medicare beneficiaries, and little incentive for beneficiaries to seek out economical delivery systems. Under the current risk reimbursement formula, HMO payments are calculated retrospectively, thus limiting their ability to budget. Also, enrolled beneficiaries do not necessarily gain from their choice of an efficient HMO since any savings are shared exclusively by the HMO and the Government. Therefore, beneficiaries have little incentive to seek out efficient delivery systems. Not surprisingly, both the number of HMO's with medicare contracts and the number of enrolled beneficiaries are small.

In my judgment, an organized system of care like that provided through an HMO is an effective way to serve our elderly citizens. The advantages of receiving quality health care in a single location on a fixed and predictable basis are pronounced. HMO's provide a comprehensive system of care through a single access point 24 hours a day, 7 days a week. Typically, all diagnostic and specialty service are provided at the same site, as our pharmacy services. In addition, an HMO provides the elderly with total protection against illnesses of a catastrophic nature, virtually eliminates medicare paperwork and also does away with the assignment problem where physicians bill beneficiaries directly.

The Health Care Financing Administration has funded seven demonstrations to test the basic concepts that are incorporated in this bill. In three of the demonstration sites, the Marshfield, Wis., Clinic, the Fallon Clinic in Worcester, Mass., and the Kaiser Foundation Health Plan, in Portland, Oreg., all three plans have enrolled and are providing services to substantial number of medicare beneficiaries. In successfuly marketing to medicare beneficiaries, the plans called into question the conventional view that the elderly are unwilling to change physicians. The message seems to be if the incentives are structured properly, the elderly are willing to sign up for a program that rewards their choice of a cost-effective delivery system.

The benefits offered medicare beneficiaries in the Portland, Oreg., site are impressive. The Kaiser plan there has enrolled 7,600 medicare beneficiaries. These individuals were offered four benefit packages, the least expensive of which cost the beneficiary nothing in out-of-pocket costs. Kaiser arrived at this price in the fol-

lowing way. Today, medicare's average adjusted per capita cost (AAPCC) on a monthly basis in the Portland metropolitan area is $119.33. Kaiser receives 95 percent of that total to provide the A and B medicare benefit package to each of its members who are enrolled in the demonstration. Kaiser's adjusted community rate (ACR)—its monthly estimated cost for providing the A and B benefit package adjusted for this population—is $94.60.

The difference between 95 percent of the AAPCC and the ACR, in other words, $19.05, is returned to the beneficiary in several forms. One, the medicare consumer cost-sharing requirements are totally covered and, two, additional benefits are provided that go beyond the A and B benefit package. These benefits include preventive health services like physical examinations and immunizations, physical therapy, and all emergency care.

For a small monthly charge, medicare beneficiaries can select from three other benefit plans. For $6 a month, beneficiaries receive prescription drugs, eyeglasses, and hearing aids. For $9.61 per month, beneficiaries receive total dental care, including examinations, cleaning of teeth, fillings, dentures, and other prosthetic devices at no charge when prescribed and obtained at Kaiser-Permanente dental facilities. For $15.81 a month, beneficiaries can receive all of the above—prescriptions, glasses, hearing aid coverage, and total dental care.

Prepayment removes the incentive to overserve and replaces it with an incentive to reduce unnecessary hospitalization and maintain health. In 1976, for example, hospital-days per 1,000 persons age 65 and over totaled 4,121 in the United States. In the Kaiser-Permanente program, the age/sex adjusted rate for the over-65 population was 1,945 per 1,000 members.

We have reached, I believe, a critical threshold in the HMO movement where HMO's are demonstrating that they can compete effectively and serve as a real alternative to the traditional fee-for-service system. HMO's have proved to be an effective mechanism for altering the usual economic incentives in medical care so as to reduce overall health care costs.

I believe there remains an important role for continued Federal involvement in HMO development. The bills we are introducing will encourage and promote this development.●

LINDA PAGE, SOMEONE SPECIAL

HON. WILLIAM H. GRAY III

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. GRAY. Mr. Speaker, recently a young woman of immense talent burst on the national sports scene, stealing headlines and erasing one of the tallest, proudest records in Philadelphia athletic history.

On February 13, Linda Page led her Muriel Dobbins High School teammates to a 131 to 38 victory over Mastbaum Tech. On that day, Linda scored 100 points in 32 minutes and erased Wilt Chamberlain's name from the Philadelphia public school record books.

Linda's 100-point game was not a fluke. During her brilliant career at Dobbins, she has scored more than 50 points seven times, including scoring outbursts of 61 points twice and an 87-point production during this season which she has capped with her magical 100-point game in mid-February.

Her coach, Mr. Tony Coma, calls her "a scoring machine. Everytime she puts the ball up, I expect it to go in. She is the best shooter I have ever coached—and I coached Earl Monroe."

Linda has been named the most sought after high school athlete in the country. Yet, through all the media attention Linda seems to have kept priorities in order. She has managed the herculean task of being an instant celebrity. Jet magazine ran a story about her and the Philadelphia legend, Wilt Chamberlain. Through it all, Linda has maintained a normal lifestyle. She has a boyfriend, maintained family ties, and kept up with her schoolwork. Now, Linda faces the hardest decision of her life, choosing from the literally hundreds of college scholarship offers.

Mr. Speaker, on behalf of the Second Congressional District of Pennsylvania and the entire city of Philadelphia, I would like to salute Linda Page on her outstanding career at Dobbins High School and enormous contributions to women's athletics. Linda's future is in front of her and we wish her nothing but success.●

EDWARD BROOKE DEFENDS THE LEGAL SERVICES PROGRAM

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. FRANK. Mr. Speaker, Edward W. Brooke, the distinguished former Senator from the Commonwealth of Masschusetts, has written an article defending the Legal Services Corporation which appeared in the March 9 edition of the Washington Star. As a former attorney general of Massachusetts and as a lifelong advocate of the poor and dispossessed, Senator Brooke speaks with knowledge, conviction, and compassion on this very critical issue.

As we all know, the President has proposed to eliminate what is perhaps the most justifiable program funded by the Federal Government—the Legal Services Corporation. Without the legal assistance provided by the dedicated attorneys of this program, the poorest and most vulnerable members of our society will be denied access to basic justice. Without Legal Services the phrase, "Equal Justice Under Law," which appears above the entrance to the Supreme Court, will be a mockery. Without funding from the Legal Services Corporation, the President, I am sure, is fully aware that State and local governments will be unable or unwilling to carry on legal service programs.

Senator Brooke has joined the growing number of persons from the President's own party in standing up for legal services. He points out that this program responds effectively to the President's professed and oft-repeated concerns for making Government work for the people, minimizing paperwork and eliminating unnecessary bureaucracy, eliminating waste, fraud, and abuse, and for providing local control.

Mr. Speaker, I commend the Senator's perception and courage in his defense of legal services. I ask my colleagues to consider his words carefully in making a judgment on the continuation of this much needed program.

A copy of the article follows:

LEGAL SERVICES: GOVERNMENT AT ITS BEST

The president and the Congress, in their rush to reduce federal spending, risk terminating one of the most successful public efforts for the poor—the civil legal services program.

As a U.S. Senator, I represented hundreds of thousands of poor people primarily in Massachusetts but elsewhere across the nation, too, who got legal help through the program. I also served on the Appropriations Committee that annually reviewed and approved funding for the national Legal Services Corporation, which is the congressionally created private nonprofit organization that funds over 300 local Legal Services programs in every part of the country.

The civil legal services program has had a profound and lasting effect on the lives of the poor. Operating through no-frills neighborhood offices, talented, committed and grossly underpaid attorneys and paralegals give poor individuals and families a chance to use, and occasionally to alter, our legal system.

The results are dramatic. In Massachusetts, for example, the elderly poor, people with serious illness, tenants whose landlords don't pay bills have been protected against arbitrary utility shutoffs this winter, because of Legal Services.

JOBS, HEALTHY CHILDREN

There are better job incentives for welfare mothers and more possibility for long-term stable employment, because of Legal Services. The chances of little children being poisoned by lead paint in their houses and apartments has greatly been reduced because of Legal Services.

Of all the programs the federal government now supports, Legal Services should be one that Ronald Reagan would rush to

defend. It would be difficult to find another public effort that responds so effectively to the president's repeated concerns:

"Making government work for the people." No one in this country is more subject to government regulation than the poor. Their jobs, food, shelter and incomes are affected by daily decisions of local, state and federal bureaucrats and lawmakers. A major part of Legal Services' work is making that system responsive to their clients by cutting through red tape and minimizing interference in their personal lives.

"Minimizing paperwork and eliminating unnecessary bureaucracy." The Legal Services Corporation is the model of administrative efficiency. Overhead costs are less than 3 percent of its total budget. Its application procedures are simple: It does not require a single page of paperwork from state or local officials. Money is appropriated by Congress and flows immediately and directly to those who provide legal services to the poor.

"Eliminating waste, fraud and abuse." Legal Services lawyers are law enforcement officers for the poor. They have repeatedly and successfully challenged mismanagement of public programs and bureaucratic violations of statutes designed to benefit and protect their clients.

"Local control." Legal Services is not run from Washington. Poverty lawyers work for private nonprofit organizations, with boards of directors composed of local attorneys, clients and other interested citizens. Program design, management, and priorities are locally determined. They vary significantly from one community to another, according to local needs and circumstances.

Legal Services is not a big money item and the real presures on the president to "get Legal Services" are not budgetary. They are political. Our legal system is an adversarial one. It generates controversy. That seems particularly true when it is used effectively for the poor.

TAKING ON THE POWERFUL

The great bulk of Legal Services involves routine matters that never attract any interest beyond the parties immediately involved. However, poverty lawyers have taken on some of the most powerful private and public interests on behalf of their clients. They have successfully challenged unsafe labor practices of corporate agriculture on behalf of seasonal farm workers. They have put a stop to unfair credit practices that unjustly robbed the poor of their meager income. They have required warranties of habitability from slum landlords. And they have forced state and local officials to comply with federal law.

That aggressive representation of poor clients has created powerful political enemies. From the beginning, they have tried to undermine and destroy the program. They had their last best chance in the early '70s, when Howard Phillips was appointed to OEO to dismantle Legal Services. Those same opponents, mobilized through the National Committee to Defeat Legal Services, are intent on getting President Reagan to pick up their banner.

DISTINGUISHED SUPPORTERS

But Legal Services has influential friends as well. In spite of the rhetoric of some extremists this is not a program of some radical fringe. Much of the impetus for its creation in 1965 came from the American Bar Association and the leadership of distinguished Americans like Lewis Powell, now a Republican-appointed Supreme Court justice. It has always enjoyed bipartisan support in the Congress.

It is not insignificant that my views and those of the respected conservative commentator, James J. Kilpatrick, come together in support of Legal Services. It will not be often, I suspect, their our views on political issues so converge. There can be little room, however, for thoughtful conservatives, liberals and moderates to disagree on an issue so fundamental to a society based on law.

The final decision on Legal Services will have minimal budgetary consequences one way or the other. It will have a lasting human impact for the poor, and major consequences for the system of justice in this country.●

CONGRESSIONAL VIGIL ON SOVIET JEWRY

HON. MILLICENT FENWICK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. FENWICK. Mr. Speaker, I would like to take part in the Congressional Vigil for Soviet Jews, in the hope that our efforts here in Congress can help the cause of the many families and individuals in the Soviet Union who wish to emigrate to the free world.

I call the attention of this body, and all who follow its proceedings, to the plight of Vladimir Vinnik, an electronics engineer from Leningrad, his wife Emma, a physician, and their 15-year-old son, Vadim. The family, which would like to go to Israel to reunite with Emma's 71-year-old mother, has recently received its third refusal for an exit visa. Interestingly, in December, the boy, Vadim, had a symbolic proxy bar mitzvah with an American boy in this area through the efforts of the Washington Council on Soviet Jewry.

I hope that our efforts can have some positive effect on Soviet human rights policy, and I commend the gentleman from Maryland, Mr. BARNES, for chairing the Congressional Vigil for Soviet Jews this year.●

NO EVENHANDEDNESS IN SPENDING CUTS FOR WATER PROJECTS

HON. FLOYD J. FITHIAN

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. FITHIAN. Mr. Speaker, I speak today of an area in the budget about which President Reagan and Mr. Stockman have been strangely quiet. It is the area of spending on water projects. Not only has the administration been quiet, they have failed to require this program to undergo the cuts which would have been required if the evenhandedness were applied across the board.

An editorial in the March 2, 1981, Chicago Tribune lays out this issue with remarkable clarity. What we might say in addition to the editorial is that we ought to have a better system for distinguishing between good projects and projects which are not cost-benefit defensible. I do not personally favor throwing the baby out with the bathwater, but clearly there are many projects which could not stand the light of day if we looked at them on their merits.

I attach the Chicago Tribune editorial for the enlightenment of my fellow Members of the House.

[From the Chicago Tribune, Mar. 2, 1981]

UNTOUCHABLE PORK?

President Reagan has sent his budget-cutters to find another $6 billion to remove from the 1982 budget. We have a suggestion where they can find some handsome savings: water projects. While David Stockman and Company were slashing everything else right and left, they somehow overlooked the $4.5 billion the federal government spends every year on assorted dams, canals, locks, and other water-related ventures. Mr. Reagan's plans call for cutting not a nickel from water project funds for 1981 and only a token $95 million next year. Even with that reduction, spending on water projects would be 6 per cent higher in 1982 than this year.

Any administration that can't find some fat in $4.5 billion worth of pork just isn't trying. Left unscathed in the Reagan budget are such fiscal and environmental disasters as the infamous Tennessee-Tombigbee project (more than $200 million in 1982, $3 billion before it's finished), the Central Arizona Project ($195 million and $2 billion), and the Bonneville unit of the Central Utah Project ($71 million and $1.6 billion). By the estimate of the Coalition for Water Project Review, merely cutting the most obvious waste could save more than $700 million next year and $1 billion in each of the succeeding four years.

The reason none of these were cut back or eliminated is politics. Jimmy Carter's initial honeymoon with Congress ended the day he released a "hit list" of 19 blatantly indefensible projects, and relations got even chiller when he followed it with a list of 14 more. Unfortunately President Carter didn't get what he wanted on most of the projects. Not only that, he never managed to dispel the ill will the episode created on Capitol Hill. When Hill critics complained that Mr. Carter never learned how to get along with Congress, they usually meant that he never accepted the wasteful water projects that powerful members use to keep federal money flowing into their districts.

But if President Reagan is purchasing congressional amity by keeping silent on these projects, he is paying too high a price. The failure to make any but the most trivial reductions makes a mockery of his much-touted willingness—nay, eagerness—to prove his even-handedness by making every favored constituency feel the same pain. It looks more than a little callous to trumpet the urgency of cutting food stamp payments and Medicaid while blithely throwing money down these ratholes.

No doubt the President is considering more than just congressional relations. Anyone looking at a map showing which states Mr. Reagan won last November can easily figure out why he has shied away from cutting the budget for water projects. Most of them are located in the South and

West. The Sunbelt states are fond of complaining about federal programs to salvage the decaying cities of the Frostbelt. Fair enough. But one rarely hears them acknowledge the huge subsidy the Sunbelt gets in these water projects. In fact, one big spur to the anti-Washington sentiment in the West was Carter's threat to reduce the flow of federal dollars.

The leaders of the "Sagebrush Rebellion" are not against federal handouts—only against the "interference" that sometimes comes with them. But if the President is serious about making everyone share the pain, he can hardly justify leaving the water projects practically untouched. Mr. Reagan has asked the Northeast to accept its share of the sacrifice. He should give the Sunbelt the same opportunity.●

PENNSYLVANIA: 300 YEARS OF PROGRESS

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. CLINGER. Mr. Speaker, beginning March 14, Pennsylvanians will celebrate the 300th anniversary of the founding of the Commonwealth of Pennsylvania. Those 300 years mark the development of the United States from its infancy as a dependent colony to maturity.

Pennsylvanians can take pride in the role our State has played in the development of our Nation. Known as the Keystone State, Pennsylvania earned its title by providing vital access to undeveloped areas lying west of the Alleghenies.

The factors that led to Pennsylvania's key role in the expansion westward of our Nation and the rise of our Commonwealth as an industrial force in the Nation remain prime concerns that will continue to shape Pennsylvania's path in the future.

Then, as now, transportation was a vital link in the Nation's development and the ability of Pennsylvania to provide transportation in the early 19th century is one reason the Commonwealth earned the title of the "Keystone State."

By 1932, Pennsylvania led the Nation in improved roads, having more than 3,000 miles. Pennsylvania's Conestoga wagon became the typical transport of westward-moving pioneers, and the National Road passing through southwestern Pennsylvania was a main western highway.

By 1840, the groundwork for Pennsylvania's industrial greatness had been laid. Foundries, rolling mills, and machine shops became numerous, and by the Civil War, Pennsylvania rolled half the Nation's iron. I believe that the location of the State, its rich resources, and the enterprise of its citizens may be considered the basic reasons for this industrial advance.

The industrial expansion which was evident in 1860 continued unabated until the Keystone State emerged as second in population among the States. Although Pennsylvania has fallen back somewhat because of the continued development in the South and West, Pennsylvania still maintains its basic strengths with a skilled work force and considerable mineral resources in coal, petroleum, natural gas, and cement.

From March 14, 1981, to April 2, 1983, Pennsylvania will celebrate the tercentenary of its founding. May this period be used not only to reflect on our history but also to project toward our future.

As Pennsylvania contemplates an economic resurgence, the importance of its location—and the need to maintain an efficient transportation system—cannot be overestimated. For Pennsylvania to continue as the Keystone State, the link must be provided between what must be a growing international trade with our allies and the resources that will be produced in Pennsylvania and the inner regions of the Nation.●

TOM LILLICO, A UNIQUE INDIVIDUAL

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. RUDD. Mr. Speaker, I would like to share with my colleagues a eulogy for a great man from Arizona, Tom Lillico. The statement is written by the Arizona Republic's sports director, Verne Boatner.

Tom Lillico was an important figure in the sports world, but also had a great influence on Arizona politics and government actions. But more important than these contributions, Tom was a beautiful person who left his imprint on everyone who came in contact with him. I wish you all could have known this unique individual.

The article follows:

ASU "MONSTER" BORN IN LATE 1930's

(By Verne Boatner)

When I returned from a week out of town, I found a note on my desk.

" 'Blind Tom' Lillico died while you were away," it read.

I had even missed the funeral.

He must have had a premonition of death. I only wish that I could have been that clairvoyant at the time.

As was our custom built over many years, we met for lunch several weeks ago.

It had been a while. I had put him off several times. But the last time he called, his voice was so insistent that I could not refuse. It was not like him to press.

"I've got something for you," he said, so I returned to the car and collected the tools of my trade.

"One condition," he said, after ordering a round of drinks. "I don't want any of this printed as long as I'm alive."

I was convinced then that one of the wittiest guys I knew was setting me up, as he had so often, for one of his tall tales.

"As you know," he began, "I've spent the greater part of 50 years working for the betterment of sports at Arizona State."

How well I knew.

When I arrived on the Arizona scene in the early '60s, Tom Lillico already was a legend.

His fame, or in certain circles I suppose it would be termed infamy, centered on a 1937 escapade he engineered that resulted in spiriting three of Arizona's top high school players—Walt Ruth, Wayne Pitts and Rex Hopper—off the University of Arizona campus and into the ranks of Arizona State College's football team in Tempe. It was the dawning of football respectability at the sleepy teacher's college on the banks of the Salt River.

A three-sport star at ASC, Lillico returned in 1937 as graduate manager of athletics (equivalent to athletic director today). He served in that post, with time out for World World II, until July 1, 1949.

He also was state chairman of the March of Dimes, a baseball scout for the Brooklyn Dodgers, state sports representative for the National Polio Foundation, an unsuccessful candidate for a state Senate seat, and the mastermind behind the statewide drive (settled during an election) that raised ASC to university status in 1958. In short, he was a "doer" that many called on.

"I admit I bent a few rules when I was head of ASC athletics," he said. "But there weren't that many rules in those days, and they weren't that iron-clad.

"But I don't like what I see out there today. We've created a monster that has brought shame on our university.

"I gave a few starving country boys from the Depression era a chance for a college education. Back then, college was for the well-to-do.

"But we turned out—and when I say we, I also include NAU (Northern Arizona University) and the UofA—athletes who later became the leaders of this state. I defy you to go into the smallest hamlet in this state and not be able to find a community leader who doesn't owe a debt to those puny work-scholarships we handed out. They were country boys who would never have gotten off the farm except for people like me.

"But you see what Arizona State is doing today? Taking a token 5 percent—maybe—of Arizona kids. You realize who the hell's paying for those universities? You and me.

"Whizzer (Wilford) White's been called the greatest football player in the school's history. But he wouldn't get a second look if he was coming out of high school today. He'd have to go to some place like Cal Poly-Pomona. Why, his son Danny wouldn't have gotten a scholarship if some of us old-timers hadn't raised hell.

"But those coaches out there today claim Arizona kids aren't good enough to play for them. But have you noticed they're good enough to play everywhere else in the country?

"We've got a huge athletic department with so many people nobody can remember their names. I ran an athletic department with $2,500. What have they got, $3 million, 4, 5? Nobody knows, because they keep it a secret. I'd love for (President) Reagan to send me in there and say, 'Cut out the deadwood.'

"And those coaches, with 15 assistants and all kinds of contacts. They've got to chase off to New Jersey or Illinois, check in

to the fanciest hotels, wine and dine the high school coaches and—if they aren't too hung over the next day—maybe go out to the schools and look at some film. They end up bringing in players who should never be in college, and they have to cheat to keep them there.

"And once those kinds leave college, what do they ever give back to this state? How many Arizona kids did they deprive of a college education? You try to tell me, with 150 schools in Arizona, that I can't get 22 players who can play with anybody in the U.S.?

"Bull . . .! I did it 40 years ago. And I had damned little to offer them then."

Two or three days later, he called me.

He was having second thoughts about what he had said. He was afraid it might offend some old friends.

We talked it out. I mollified him, but I'm not certain I completely convinced him that his true friends wouldn't mind.

That's the reason I've wrestled with my conscience for the last couple of weeks.

I finally decided to write it.

I think he would have wanted it that way.●

IN HONOR OF ANTHONY KELLER'S RETIREMENT FROM THE CONNECTICUT COMMISSION ON THE ARTS

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. MOFFETT. Mr. Speaker, I would like to take this time to express my great admiration and esteem for Mr. Anthony Keller, who will be retiring this March 17 from the Connecticut Commission on the Arts as its executive director. He will be turning the reins of the commission over to a most able successor, Mr. Gary Young, so patrons of the arts in Connecticut can rest assured of the continued high caliber work of the commission. But the great efforts of Mr. Keller well deserve commendation.

In the 15 years that Mr. Keller acted as director to the commission, he instituted a great number of programs for the benefit of the arts in Connecticut. As a former board member of the American Council for the Arts, and a State representative on boards and panels of the National Endowment for the Arts and the Assembly of State Art Agencies, Mr. Keller brought considerable expertise to bear on his work. With a $2 million annual budget, Mr. Keller promoted such projects as the development of a monthly statewide calendar of cultural activities, a retrospective on 300 years of Connecticut architecture, a dance company-in-residence program, and an artists-in-schools project. Perhaps most importantly, Mr. Keller was the prime mover of the first economic impact study of the art industry in Connecticut.

The State of Connecticut has blossomed under the arts tutelage of this gifted man and his loss is our loss, in the deepest sense.●

ESTATE TAXES ALTERNATE VALUATION DATE

HON. ROBIN L. BEARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. BEARD. Mr. Speaker, I am today reintroducing a bill which would alleviate an inequity in the Internal Revenue Code relating to the valuation of property for estate tax purposes.

Under existing law, the estate of a decedent may elect to use an "alternate valuation date" for purposes of computing the value of the estate for estate tax purposes. The alternate valuation date is the date 6 months after the date of death. This rule, which had its origin in the economic decline of the 1930's, is intended to prevent the inequity of imposing the estate tax on the date of death value of property, if that value declines shortly after the date of death.

One problem with the existing law is that the alternate valuation date may be used only if it is elected on an estate tax return that is filed within the prescribed time. This rule applies even where there is reasonable cause for the failure to file the return within the prescribed time. Thus, under existing law, if the estate tax return is just 1 day late, and even if the delay is due to reasonable cause, the estate may not use the alternate valuation date.

The effects of this provision of the Federal estate tax law are illustrated by the case of the estate of one of my Tennessee constituents. In this case, Mr. Speaker, the value of the estate declined severely during the 6 months following death, yet the alternate valuation date election was denied because the return was filed late. The estate's return could not be filed on time because the estate's coexecutor required open-heart surgery 1 month before the return was due, and no one else could accumulate the information necessary to file the return on time. As a result, the amount of death tax due is actually double the amount which would be due if the election of the alternate valuation date were applicable.

I do not believe that this harsh result serves any legitimate policy of the tax law. The alternate valuation date is intended to and should apply if the decedent's property has severely decreased in value, even if, for some reason, the return is filed late. Accordingly, this bill would permit an estate to elect the alternate valuation date on a late return. The bill would not, however, change any of the existing penalties for the late filing of a return.

Similar bills were introduced in the House and Senate and considered by the 96th Congress. While there was unanimous agreement that the rule of current law was wrong and should be changed, there was some disagreement over the appropriate effective date of this change in law. As introduced, the bill provided relief from the harsh consequences of current law for estates of decedents dying before the date of enactment even if the tax return was filed late.

The Treasury Department did not object to providing relief for estates of decedents dying in prior years. However, the Treasury Department was not satisfied with the transitional rule in the form in which it was proposed because many estates which were unfairly treated under the current law would not have been able to qualify for relief. On the other hand, the Treasury Department did not want to provide relief to all the estates of decedents dying prior to the date of enactment because such a broad rule would have caused great administrative problems. Thus, in order to overcome the Treasury Department reservations, it was necessary to find a rule that would be fair to as many estates as possible, without raising difficult problems of administration.

In response to the concerns of the Treasury Department, the bill as introduced today contains a modified effective date provision. I believe the effective date provision is fair and that it will not give rise to administrative difficulties. The effective date of the amendment to the alternate valuation date provision is, generally, for decedents dying after the date of enactment. However, estates of decedents dying before the date of enactment will be entitled to elect to apply the new rule provided that the statute of limitations for making adjustments in estate tax is still open. Assuming the statute of limitations is still open and the executor makes an election under section 2032(c), in accordance with this new legislation, the statute of limitations will remain open for 2 years in order to permit the Internal Revenue Service to audit the estate and propose any necessary adjustments to the estate's tax liability.

I am informed that, in addition to the estate of my constituent, there are several other estates which would be benefited by the effective date of the new bill. Although the total number of estates which could be benefited by the effective date provision is uncertain, because of the special nature of the alternate valuation date election provision it is likely that the total number of estates affected in prior years would be very small. Clearly, then, the effective date will not give rise to difficult administrative problems.

During the 96th Congress, I know many supported a retroactive effective date. Certainly, the circumstances of the estate of my constituent present a strong case for such a rule. The procedural requirements of the estate tax law were not complied with because the coexecutor had open-heart surgery and an estate tax return could not be prepared and filed on time. For this minor procedural deficiency under these extreme circumstances, the estate tax rule of current law imposes an unreasonable burden which nearly doubles the amount of estate tax that would otherwise be due.

I am hopeful that, with the change in the effective date provision, the Treasury Department will support the legislation during the 97th Congress.●

THE MEANING OF A FAMILY

HON. EDWIN B. FORSYTHE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. FORSYTHE. Mr. Speaker, in conjunction with National Family Week of 1980, the South Jersey congregations of the Church of Jesus Christ of Latter-Day Saints and the Suburban Newspaper Group sponsored an essay contest on the topic "What My Family Means to Me."

I am extremely gratified to inform you that one of the two winning essays in this contest was written by Miss Carolyn Hoppe, a senior at Moorestown High School, located in my own hometown of Moorestown, N.J.

At a time when the family, the keystone to our entire social fabric, is increasingly under pressure from many outside forces in our society, I would like to bring to the attention of my colleagues in the House the insights provided by Miss Hoppe into the give and take of family development.

I strongly agree with Miss Hoppe's assessment that having a strong family life provides a sturdy foundation for the rest of one's life. I feel Miss Hoppe's essay is an encouraging sign that—contrary to popular perceptions—the American family is alive and well and still provides us with our best hope for the future.

The essay follows:

WHAT MY FAMILY MEANS TO ME

(By Carolyn Hoppe)

My family is the most precious gift I have. I cherish them above all things. I spend more time with them than I do with anyone else.

At home I am among people who understand and know me best. I feel a great sense of self-worth, they make me feel important. With my family I feel secure, needed and wanted.

There is great happiness and joy in belonging to a family. A sense of belonging to a group—not being alone, being loved by family members, loving other family members, having a place at the table, having a place to sleep, using family property, sharing joys and sorrows with family members who care, having someone to care for me when I am ill. These are all privileges of being in a family.

We as a family work together, play together, learn together and worship together in love and harmony. My family has made me what I am in all aspects.

From them I have learned to develop my personality. I have learned many good qualities. I have learned to be sensitive to others, to give of myself, time, and talent. I share with my family things I have learned.

Home is the place I have gained the most. I learn by their example of love, and affection, respect, and trust. Because I feel good about my family, I can feel good about myself.

My parents have provided me with experience to help me grow to have a life of my own. My sisters and brothers also have an influence upon my life. They contribute to the atmosphere of our home.

Not only do they influence me, but I also influence them. We all help each other. It is a give and take process.

My family has given me everything I have ever wanted and needed and so much more! I feel so blessed to have such a special family to teach and support me. Having a strong family helps me to have a sturdy foundation for the rest of my life.

My family is not perfect, but we strive together to become better. We know the family is an extremely important unit and we try to build that unit up.

I am very proud of my family, for what they represent, who they are, and all they have given to me. They are the most important part of my live and will be forever.

Often I regret the day when I shall have to leave them. One day I shall add another link to that chain, and have a family of my own. The family is a vital function for it prepares the way for one's own life and place in the world.

For all these reasons my family is important. They made me what I am, they taught me to have wisdom and values, they gave me all that I have.

I am so grateful to have such a family who cares.●

SOUTH AFRICA'S PACE PROJECT

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. RHODES. Mr. Speaker, if one relies entirely on certain newspapers for a perspective of South African life, one might gain the impression that it is static, rooted in the rigidities of the original apartheid system, a system all Americans wish to see progressively and peacefully ended.

In a recent interview President Reagan observed that many South Africans themselves, black and white, were committed to that same objective, and deserved the encouragement of the United States. In this connection, the employment of blacks in South Africa and their equal treatment by American companies doing business there have an important relevance. And it seems to me, Mr. Speaker, that in part due to the applicability of the so-called Sullivan principles—a set of labor arrangements and employment practices worked out by Rev. Leon Sullivan of Philadelphia and voluntarily implemented by many U.S. firms located there—and in part to the natural extension to the South African scene of American attitudes and practices, U.S. companies have indeed shown the way in which all business endeavors in South Africa can contribute to the enhancement of black skills and opportunities.

A key example is the PACE project supported by members of the U.S. Chamber of Commerce in the Johannesburg suburb of Soweto. This project involves the construction and maintenance of a private school, emphasizing commerce and trade curricula, which will serve at the outset to train hundreds of young blacks to fill the growing technological needs of the rapidly industrializing South African economy. It is a project which has received the enthusiastic endorsement of such black African leaders as Zulu Chief Gatsha Buthelezi, Dr. Motlana, Bishop Tutu, Soweto's Mayor Thebahali, and many others. Recently, the newly appointed headmaster, Rex Pennington, and his vice principal, Senior Master Oswald Mtshali, visited the United States to examine methods of bilingual teaching which might be adopted to serve their multilingual student population. While in Washington, Mr. Pennington and Mr. Mtshali—a distinguished Zulu poet—spent some valuable time in our Department of Education. They were given leads with respect to ongoing projects of mutual interest, and visited many parts of the country, including my favorite State. An article describing that visit in the Phoenix Gazette may be of interest to the House and I ask that it be inserted at this point in the RECORD.

[From the Phoenix Gazette, Feb. 3, 1981]

SOUTH AFRICAN PAIR SEES BILINGUAL CLASS IN ACTION

(By Don Warne)

Their students speak Zulu, Xhosa, Tswana, Sotho, Venda, Tsonga and Pedi.

Headmaster Rex Pennington and Senior Master Oswald Mtshali must teach the youngsters English.

So they left South Africa and stopped at several American cities—including Phoenix, where they observed a Phoenix Union High School District class where English is taught as a second language.

"We will open the first private school for blacks," said Pennington. "Our students come from different tribes and speak little or no English."

The school, outside Johannesburg in the black Soweto District, is being sponsored by the American Chamber of Commerce in South Africa—an organization composed of giant U.S. firms with operations there.

The American corporations are providing much of the money (six-million rand, equiv-

alent to $7.5 million) to finance construction of the Pace Commercial College, to open in June.

The CofC also sponsored the trip of Mtshali and Pennington to New York, Washington, St. Louis, Phoenix and Israel. In the latter country they will delve into how immigrant Jews learned Hebrew in a hurry.

Pennington retired from a post of headmaster of a private, white school and accepted the Pace assignment because "I had given my entire career to privileged whites and wanted to help disadvantaged blacks."

Mtshali, a Zulu educated at New York's Columbia University, observed that "blacks are part and parcel of South African society . . . We have a share of developing the economy of the country."

There is a terrible shortage of skilled manpower in South Africa's mushrooming economy and the Pace school will teach blacks such things as the computer sciences, typing, accounting, math and business management.

The grades will be eight through 12 and Mtshali said, "It is anticipated many will go on to college and become leaders in society. South Africa currently has no blacks trained in management."

Pennington said the firms which formed the American CofC "told us they can absorb all our graduates."

One thing the visitors learned here is how Linda Bacon teaches Hispanics, Vietnamese and others how to get started in English through sign language and looking at pictures in what resemble children's coloring books.

Mtshali said he was glad to get out of chilly St. Louis into the Arizona sunshine.●

CUBA SI, YANQUIS NO

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. DERWINSKI. Mr. Speaker, the Suburbanite Economist newspaper is a daily publication serving the south suburban area of Chicago. In their March 1 edition, the Economist editorialized on the recent foreign policy developments regarding Mexico and our other Latin American neighbors. The editorial follows:

CUBA SI, YANQUIS NO

President Lopez Portillo of Mexico had a pleasant meeting with Ronald Reagan before the latter's inauguration as president of the United States, and pundits said the relationship would mean closer ties between us and our neighbor to the South.

The first test came a few days ago when U.S. representatives tried to meet with Lopez Portillo to explain our opposition to the arms being supplied leftist guerrillas in El Salvador by Cuba and other Communist nations.

Mexico's president declined to meet with the American delegation and instead assigned a low-ranked underling who made it clear that Mexico did not go along with the U.S. stand on El Salvador.

Then Lopez Portillo made it even clearer. He went out of his way after signing a trade agreement with Cuba to express his country's continuing close friendship with Castro, a deliberate snub to Reagan and the United States.

We have tried to be good neighbors with Mexico, sending hundreds of thousands of our tourists there and buying great quantities of Mexican goods, including oil and natural gas, at the same time we are providing homes and jobs to several million Mexicans who have fled their homeland for economic and other reasons.

Friendship is a two-way street. Will Lopez Portillo continue to give us the cold shoulder as did his predecessor, Echevarria?

We hope not. Lopez Portillo and others in the Mexican government should realize that friendship with the Yanquis is more to their benefit—and to the benefit of peace in this hemisphere—than ties with Cuba.

Cuba no, Yanquis si would be a much better attitude.●

CANADIAN RETIREMENT SAVINGS PLANS

HON. WILLIAM R. COTTER

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. COTTER. Mr. Speaker, I have developed legislation to provide a tax incentive for working men and women to save for their retirement through an expansion of the indiviudal retirement account system. I introduced this legislation on March 5, and explanation of which is contained on page H804 of the RECORD.

The Treasury Department has argued against an expansion of IRA's because they believe most of the benefits go to the upper class. In this connection I asked the Library of Congress to prepare a study of the Canadian personal registered retirement savings plan—RRSP. I believe a fair reading of the study indicates that a restructed IRA system which brings it closer to the RRSP system would significantly increase participation in IRA's in the United States by the middle class. Due to its length, I will place only excerpts from the study in the RECORD at this point.

REGISTERED RETIREMENT SAVINGS PLANS

Registered Retirement Savings Plans (RRSPs) were introduced in Canada so that self-employed individuals and other workers not covered by a pension plan could be encouraged to save for their retirement. Beginning in 1957, these individuals were eligible for a tax deduction for contributions made to an RRSP and could defer income taxes on their contributions and any interest, dividends, and other income produced by their savings. Money withdrawn from a matured RRSP is taxed as ordinary income. However, the individual is usually in a lower income bracket at retirement and therefore the amount of income tax ultimately paid is usually less.

The maximum allowable contribution into an RRSP was initially set in 1957 at 10 percent of earned income or $2,500, whichever amount was less. Workers already covered by a pension plan could also set up an RRSP. The limit for these persons was set at the lesser of 10 percent of earned income or $1,500, minus any employee contribution made to their employer's plan. These limits were raised in 1972, to the lesser of 20 percent or $4,000 for self-employed and other non-covered persons, and the lesser of 20 percent or $2,500 for employees covered by a pension plan. Ceilings on RRSP contributions were again raised in 1977. Presently, nonparticipants in an employer-sponsored pension plan—whether employees or self-employed—may contribute 20 percent of earned income up to a maximum contribution of $5,500 per year. (This also applies to a pension plan member whose employer does not contribute on his behalf in any year.) Employees who belong to a non-contributory pension plan are permitted to contribute only the lesser of 20 percent of earned income or $3,500 into an RRSP. But if they belong to a contributory plan, that amount is reduced by their pension plan contributions—together they cannot exceed $3,500. Practically all public employees and about half of the private sector employees make contributions to their employer's plan.

The contributions and earnings on a matured RRSP may be used to purchase a life annuity. However, in response to pressure from the Consumer Association of Canada, holders of RRSP's are no longer forced to buy annuities from insurance companies. Assets may also be transferred to a Registered Retirement Income Fund (RRIF), out of which there must be paid out each year an amount equal to the value of the fund at the beginning of the year divided by the number of years from the annuitants' age to age 90.

Contributions to an RRSP may be made only until age 71. Contributions made within 60 days of the end of a tax year may be deducted from that year's income. The purchaser of an RRSP may withdraw money from a plan (or plans) before it has matured. Although the amount withdrawn would be included as taxable income in the year withdrawn, there is no tax penalty for early withdrawal. If the individual leaves the money in his plan and converts it to a life annuity no earlier than age 65, however, he receives the first $1,000 of annuity and pension benefits tax free.

A matured RRSP can be converted into one of various available life annuities. These include straight life annuities which pay a monthly benefit until the purchaser dies, period certain annuities which pay benefits over a specified period of time (up to a maximum of 15 years), and joint life annuities which pay equal benefits until the death of the last spouse.

If the purchaser dies before the RRSP has matured, a spouse who is claimed as a beneficiary may accept the proceeds and pay income tax on the lump sum, buy an annuity and pay income tax on the amount received each year, or transfer the assets into a new RRSP. If the beneficiary is an estate, income tax is paid on the lump sum. Other named beneficiaries have the option of receiving the full sum of the RRSP at once, or withdrawing smaller amounts each year.

UTILIZATION OF REGISTERED RETIREMENT SAVINGS PLANS

Statistics Canada publishes information showing the utilization of RRSP's. The data show that RRSP's have become extremely popular as increasing numbers of Canadians are becoming aware of their advantages. In the 1973 tax year some 785,000 individuals contributed $992 million into this retirement savings vehicle; two years later in 1975, the numbers increased to a little over one million persons whose aggregate contributions reached $1.5 billion. In 1976, 1.3 mil-

lion persons contributed a record high $2.1 billion, emphasizing the growing importance of RRSP's in Canada's overall retirement income system.

In 1976, about 1.3 million of the 12.3 million tax returns filed by Canadians claimed a tax deduction for a contribution to an RRSP—an overall utilization rate of about 10.5 percent. As could be expected, those tax filers in the higher income brackets participated at a much higher rate than lower income earners. These taxpayers would be more likely to have surplus income for savings and would have more to gain because of their higher marginal tax rates. About 32 percent of the tax filers in the $20,000–24,999 income range and about 52 percent in the $25,000 and over range contributed to an RRSP. However, fairly significant participation rates were found in the $10,000–14,999 range (11.9 percent) and $15,000–19,999 range (20.8 percent). Not only were the participation rates higher as earnings increased, but the average amount contributed increased. While the overall average contribution was $1,638, the average contribution in the $25,000 and over range was $2,978—almost three times as large as in the $10,000–14,999 range ($1,053).

Table 1 not only shows the RRSP utilization rate by various income brackets (column 1), but also the percent distribution of both the number of actual contributors (column 3) and the amount of contributions (column 6). For instance, the table shows that 11.9 percent of the tax filers in the $10,000–14,999 range made contributions to an RRSP. These tax filers represented 23.4 percent of all RRSP contributors but accounted for only 15 percent of all contributions. On the other hand, 51.5 percent of the tax filers in the $25,000 and over bracket contributed to an RRSP. These same tax filers represented 23.6 percent of all RRSP contributors but accounted for 42.9 percent of all RRSP contributions. Note that in 1976 the maximum amount that could be contributed by a self-employed individual or an individual not covered by an employer pension plan was $4,000, and $2,500 for a participant covered by an employer plan.

TABLE 1.—UTILIZATION OF REGISTERED RETIREMENT SAVINGS PLANS IN CANADA BY INCOME BRACKET, 1976

[Total contributors to RRSP's]

Income brackets	Percent of tax filers with RRSP contribution	Contributors	Percent of all contributors	Average contribution	All contributions (dollars in thousands)	Percent of all contributions
Under $2,000	0.2	3,162	0.2	$358	$1,132	0.1
$2,000 to $2,999	.4	3,696	.3	430	1,589	.1
$3,000 to $3,999	.7	5,822	.5	342	1,991	.1
$4,000 to $4,999	1.4	10,960	.8	397	4,351	.2
$5,000 to $5,999	2.2	15,976	1.2	554	8,851	.4
$6,000 to $6,999	3.3	24,302	1.9	659	16,015	.8
$7,000 to $7,999	4.2	30,326	2.3	676	20,500	1.0
$8,000 to $8,999	6.2	41,110	3.2	784	32,230	1.5
$9,000 to $9,999	7.5	46,203	3.6	823	38.025	1.8
$10,000 to $14,999	11.9	302.090	23.4	1.053	318,101	15.0
$15,000 to $19,999	20.8	304,420	23.6	1,344	409,140	19.3
$20,000 to $24,999	31.7	198,807	15.4	1,796	357,057	16.9
$25,000 and over	51.5	304,474	23.6	2,978	906,724	42.9
Total	10.5	1,291,348	100.0	1,638	2,115,706	100.0

Source: Pension Plans in Canada, 1978. Statistics Canada.

SUMMARY AND CONCLUSION

Canadian experience with their Registered Retirement Savings Plans may give an insight into how similar tax incentives might be utilized in the United States. While the Canadian RRSP program dates back to 1957, the Individual Retirement Arrangements available in the United States have had a more recent and more modest beginning. When the RRSP program first began in Canada, the contribution limit was set at $2,500. IRA's, however, have remained at the $1,500 contribution limit ever since the program became operational in 1975. Moreover, IRA's are available only to individuals not covered by an employer sponsored pension plan. In Canada, however, covered workers have always been eligible.

Proposals to increase the IRA contribution limits in the United States or to permit individuals already covered to also save for retirement thru an IRA were generally not endorsed by the Carter administration. The chief reason cited by the Treasury Department for not supporting an expansion of tax incentives for retirement savings was the potential greater utilization of an expanded program by high income earners. In this regard the Treasury Department produced the following table on IRA utilization. Table 4 shows that for those with $50,000 or more income, over half of those eligible are estimated to utilize an IRA, whereas the overall utilization rate of individuals with income below $20,000 was less than 5 percent.

TABLE 4.—INDIVIDUAL RETIREMENT ACCOUNTS, 1977: ESTIMATE OF UTILIZATION RATE BY INCOME CLASS

Adjusted gross income class	Numbers in millions: Number of returns with salaries and wages[1]	Estimated number of taxpayers with salaries and wages[2]	Estimated number of taxpayers eligible to use IRA's[3]	Estimated number of IRA's[4]	Utilization rates (In percent)
Under $5,000	20.1	20.7	17.6	0.04	0.2
$5,000 to $10,000	16.5	19.0	13.3	.18	1.4
$10,000 to $15,000	13.0	17.5	10.5	.35	3.3
$15,000 to $20,000	10.7	16.3	7.4	.40	5.4
$20,000 to $50,000	15.8	24.9	6.2	1.35	21.8
$50,000 and over	1.1	1.4	.4	.21	52.5
Total	77.2	99.8	55.4	2.53	4.6

[1] Unpublished data from 1977 tax returns.
[2] Includes 2 spouses when both have salaries and wages.
[3] Excludes person covered by public or private retirement systems.
[4] Allows for two individual retirement accounts on some returns. Based on number of forms 5329 filed. Some of these accounts received no deductible contributions during 1977.

Source: Office of the Secretary of the Treasury, Office of Tax Analysis, March 27, 1979.

The 4.6 percent overall IRA utilization rate in Table 4 is much lower than the 10.5 percent RRSP utilization rate shown in Table 1. Moreover, there is a much higher utilization rate among middle income Canadian workers which is shown by the following comparison, drawn from Tables 1 and 4.

Income class	Utilization rates: IRA	RRSP
$10,000 to $14,999	3.3	11.9
$15,000 to $19,999	5.4	20.8

●

OVERSEAS WORKERS' TAX RELIEF ACT

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. DOWNEY. Mr. Speaker, there are currently thousands of Americans working at selling or supplying American goods and services around the globe. However, because of a short-sighted aspect of current U.S. tax law, there are fewer and fewer Americans being employed by American enterprises overseas every year.

The President's Export Council, in a report dated December 5, 1979, concluded that the replacement of U.S. citizens by foreigners in overseas jobs has resulted in a sharp loss of American business abroad. This loss of business to foreign competition has reduced the number of U.S. jobs and increased our balance-of-payments deficit while gaining relatively little for the Treasury in additional tax revenue—about $500 million.

Large corporations, and to an even greater extent, smaller U.S. businesses overseas simply cannot afford to maintain American citizens in positions abroad because of the noncompetitive way in which Americans working abroad are taxed. It is cheaper to hire foreign nationals, who are naturally more inclined to favor the purchase of non-American equipment and services with which they may be more familiar. Would a British manager or a Turkish drilling foreman or a French procurement specialist be likely to order American-made components, replacement parts or servicing?

To address this problem I have recently introduced H.R. 2113, the Overseas Workers' Tax Relief Act, which provides for an off-the-top income exclusion of $50,000 for all Americans working overseas. This exclusion would rise to $65,000 after 2 consecutive years abroad.

There are other measures pending in the House which offer larger exclusions or exclude all foreign earned income, but the legislation I have proposed is aimed primarily at groups such as business agents and managers, construction workers, sales representatives, teachers, engineers, oil drillers, and other midlevel American workers

serving in positions overseas. These are the groups that would benefit most from a $50,000 to $65,000 exclusion. My bill is not aimed at six-figure executives in Paris or Rome, though they fill a vital role and they would also benefit proportionally from the increased exclusion. It is the middle-income overseas worker who is being priced out of the market by our present system of taxation.

If we are serious about increasing America's trade share in the international marketplace, we must alter the existing tax law as it applies to overseas workers in order to remove the present financial disincentive to the employment of American citizens by American enterprises overseas. I would invite my colleagues to join me in removing this long-standing barrier to American export growth.

GRAIN EMBARGO MUST CONTINUE

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. DERWINSKI. Mr. Speaker, it is my strong personal feeling that the grain embargo imposed upon the Soviet Union must be continued. In fact, I believe that we should consider increasing the embargo on a number of items which we now continue to supply to the Soviet Union. This point has a relationship to the Soviet Union's aggressive activities in Latin America, Africa, and Asia.

I wish to insert an article by columnist Allan C. Brownfeld, which appeared in the February 24, Anaheim, (California) Bulletin, on the subject of the Soviet grain embargo. This article follows:

GRAIN EMBARGO MUST CONTINUE

(By Allan C. Brownfeld)

During the presidential campaign, Ronald Reagan criticized President Carter for imposing a grain embargo upon the Soviet Union in response to Moscow's invasion of Afghanistan. He said it was unfair to American farmers and should be lifted.

Reagan's criticism of the grain embargo was one of the low points of his campaign. He, Sen. Edward Kennedy and the other candidates were bidding for farm votes and took Jimmy Carter to task for one of the few actions he took during four years in office to show displeasure with mounting Soviet aggression.

The argument that either the farmers or any other group of Americans have an inherent right to trade with the enemy is, of course, fallacious. Unfortunately, many in our business community have been all too willing to follow Lenin's prescription and sell the Soviet Union the rope with which to hang us.

Now, as president, Ronald Reagan must decide whether to keep his political promises to the farmers or to maintain the grain embargo. Other than some self-serving spokesmen for farm states—including the new Secretary of Agriculture—there are few voices to be heard in support of lifting the embargo. The reasons for keeping it are, on the other hand, compelling.

The fact is, contrary to Reagan's statements on the campaign trail, that the grain embargo is indeed hurting the Soviet Union. It is not a failure, as those who urge lifting it tell us.

Soviet officials from Leonid Brezhnev down acknowledge that food is now in short supply in the Soviet Union. Brezhnev noted recently that the country was having grave trouble "supplying the cities and industrial centers with such foodstuffs as milk and meat." The grain embargo forced the Soviet Union to pay premium prices and to accept inefficiencies in transportation as Soviet buyers scrambled to make up the deficit by purchases in other, often more distant, parts of the world.

Experts at the Department of Agriculture expect the grain embargo to have an effect on Soviet meat supplies in 1980 and 1981. In particular the feedgrain shortage could make it impossible for the Soviets to meet their overly optimistic five year plan for meat production. A decline in meat consumption could force the Soviet government to import more meat from Western producers. This, in turn, would significantly raise the cost of feeding the Soviet population. Such purchases would require the expenditure of scarce foreign currencies earned by the Soviets on the world market.

A report issued by the Heritage Foundation notes that, "There could be far reaching ramifications in the high prices the Soviets will have to pay for alternative grain supplies and greater imports of meat. U.S. intelligence sources, using price data not usually released by world grain companies, have testified that the Soviets were forced to spend at least $1 billion more in premium priced grain than they would have paid for American grain in 1979. Spending this additional hard currency on grain and meat could force the Soviets to forego imports of other goods and technologies. . ."

The reasons for keeping the embargo, however, go far beyond the question of how effective it has been. By lifting the embargo we would send the Soviets a message which is the opposite of the one President Reagan and Secretary of State Haig have been issuing rhetorically. We would be telling them that, despite the fact that Soviet troops remain in Afghanistan, despite continuing Soviet expansionism in Angola, Mozambique, Ethiopia, Nicaragua, El Salvador—the list is a long one—there will be "business as usual" with Washington. Such an action will tell the Soviets far more about real U.S. intentions than any number of harsh statements.

Upon leaving his post in Moscow, U.S. Ambassador Thomas J. Watson Jr., stated that, "Until the Soviets demonstrate some willingness to behave as the international community indicated it thought they should behave, I believe we should stay where we are with the actions we took." He said that he would prefer the U.S. to link an end to sanctions with a "political settlement in Afghanistan" that included the withdrawal of Soviet forces "with due dispatch." Watson said: "I don't want you to think that I think the trade thing has been completely effective. But I still think that what we've done was right."

Similarly, former Deputy Secretary of State Warren Christopher says: "The grain embargo was imposed with two purposes in mind: First, to keep pressure on the Soviet Union to withdraw from Afghanistan and, second, to show the Soviets that they will have to pay for that kind of brutal agression. I think we ought to continue the embargo in order to emphasize the price the Soviets are paying for their actions in Afghanistan."

The real question is not precisely how effective the embargo has been but, instead, as the Heritage Foundation study states, ". . . whether or not the U.S. wishes to continue to extract a price from the Soviet Union in response to the invasion of Afghanistan, and as leverage against unanticipated Soviet actions in Poland." The answer is inescapable: the Embargo should be continued!●

VIETNAM-ERA VETERAN JOB TAX CREDIT ACT OF 1981

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. APPLEGATE. Mr. Speaker, I am honored to take the floor today in order to introduce a bill which I believe is severly needed to correct one of the great inequities of our time. It has been almost 6 years since the fall of Saigon, South Vietnam, and the official exit of American troops from that part of Southeast Asia. While the Vietnam war may have ended then, it did nothing to help the returning veteran readjust to civilian life.

We have all heard of the many problems these young people, who answered the call of their country, experienced upon their return to the States: Cases of drug abuse, severe psychological problems, and an attitude by many civilians about the war itself. But another problem faced them, also: unemployment. Granted, these individuals were entitled to reclaim the job they had left before going into military service, but in most cases, these young people were either not working to begin with when drafted, had just left school, or just did not have a skill that could be utilized in the job market.

Unemployment among Vietnam veterans has been and remains staggering. According to figures released by the Bureau of Labor Statistics of the U.S. Department of Labor, 469,000 Vietnam veterans between the ages of 25 and 39 were unemployed in January of this year. This compares with 270,000 unemployed Vietnam veterans just 1 year earlier. This unemployed group falls primarily in the 30 to 39 age bracket. At the average age of 34, these individuals have wives and families to support. Sixty percent or more are ineligible for the GI bill because the 10-year delimiting period which restricts the use of benefits has passed for them. CETA public service jobs are not a viable alternative, especially in

light of proposed cuts in fiscal year 1982.

Many of these unemployed veterans would not be unemployed if their military service had not delayed their entry into the labor force. They were the last hired and the first laid off or fired. I believe it is time that we, as a nation, put the war behind us and pursue a program that will reverse the inequity and that will, in turn, restore these peoples' integrity and provide incentives to them to be a productive member of society.

There is currently on the books a law that provides a tax credit to employers who hire certain Vietnam-era veterans. However, this program is due to expire on December 31, 1981, and it is full of complicated criteria that determines whether or not employers can take advantage of this program. Oftentimes, it is this verbiage that discourages prospective employers. While the intent of this program is good, it does not go far enough and must be continued. Therefore, I am today introducing legislation that will resolve these deficiencies.

My bill, the Vietnam-era Veteran Jobs Tax Credit Act of 1981, provides for a 3-year extension, until December 31, 1984, of the basic program now in existence. Further, it will increase from $6,000 to $10,000 the amount of salary paid to a qualifying veteran by an employer on which a tax credit can be taken by the employer. Under my bill, the employer would be eligible for a tax credit of 50 percent on the first $10,000 paid to a qualifying veteran in his first year of employment, and a 25 percent tax credit on the first $10,000 paid during the second year of employment. Therefore, an employer could receive combined tax credit of up to $7,500 for the 2-year period of employment of a Vietnam-era veteran. This credit would apply to any employer who hired any Vietnam-era veterans, not just so-called economically disadvantaged veterans of this era. I chose to drop this terminology because under current law, an unemployed veteran who is seeking a job may not be a member of an economically disadvantaged family as is currently required; thus, he would not be able to take advantage of this program. Also, my bill increases the maximum age of the veteran for eligibility under this program from 35 to 40 years of age.

From the economic point of view, my bill, if passed in current form, would provide the incentive for employers to hire significant numbers of Vietnam-era veterans, thus providing an overall increase in the revenue to the Federal coffers, in spite of the credit given. There would be less unemployment compensation, general assistance, and food stamps paid out. We will have helped establish more people as productive working citizens with goals and objectives and something for which to strive and continue to work.

Mr. Speaker, this is a good bill that will result in tremendous benefits to a large group of people with little or no cost to the Government. It is one that both Democrats and Republicans can support without being inconsistent in any way in other votes on the economic proposals that will confront us this year. This bill is needed and I hope, therefore, that you can support me on it.●

SUBJECT: MICHAEL McDERMOTT BULK AND FOREIGN MAIL CENTER

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. GUARINI. Mr. Speaker, I have introduced a bill to designate the New York Bulk and Foreign Mail Center at Jersey City, in my district in New Jersey, as the "Michael McDermott Bulk and Foreign Mail Center."

Often legislation of this type is cast aside as having no significance other than the aggrandizement a Congressman receives from his district for introducing legislation of this type. As I introduce this legislation for the second time here in Congress let those who think this know that they are mistaken. They are mistaken because this piece of legislation is aimed at a higher plateau, the issue of safety in our Nation's post offices.

Michael McDermott lost his life in an industrial accident at the New York Bulk and Foreign Mail Center on December 15, 1979. Mrs. Christine McDermott, the widow of the New Jersey born postal worker, listened for 2 days at hearings held in the Hudson County Administration Building as witness after witness testified on the dangerous conditions at the mail center.

At the time of the hearings in early January 1980 I vowed to bring a reminder to the American public that safety in the workplace goes beyond the issue of productivity to the very issue of life and death itself. The renaming of this center in Michael McDermott's memory will serve as a perpetual reminder of the unsafe working conditions that caused his death and are responsible for countless injuries to other postal employees.

After Michael McDermott's death and the subsequent hearings on the operations at the mail center approximately $1 million was spent to upgrade the machinery utilized in the mail processing operations in another Postal Service episode of locking the gate after the horses escape. However, during 1980 two more postal workers in other parts of the country were mangled to death in conveyor belts that lacked safety devices.

During the last session of Congress the House of Representatives passed a bill which would allow OSHA to play an important role in insuring the safety of our postal workers. Unfortunately, this much needed piece of legislation failed to come to the Senate floor for a vote. In the name of Michael McDermott and those countless others who have been injured working for the Postal Service we must strive to see the completion of the legislative action on this most important and immediate concern. Further delays will only cause further tragedies.

We must have legislation guaranteeing a safe workplace for postal workers. The continued blind adherence to production enhancement over personal safety must stop. The renaming of the bulk mail center for Michael McDermott will serve as a grim reminder of the consequences of such a policy. I urge my colleagues to support me in my effort, and the effort of the American Postal Workers Union led by its determined and outspoken general president, Moe Biller, to rename the foreign mail center in Jersey City as the "Michael McDermott Bulk and Foreign Mail Center."

With your permission Mr. Speaker, I would like to include in the RECORD an excellent article which appeared in the Wall Street Journal on January 7 of this year. This well-researched article by Joann S. Lublin came on the 1 year anniversary of the opening of the hearings I held on Michael McDermott's death:

POSTAL WORKER DEATHS AND INJURIES PROMPT DEMANDS FOR GREATER SAFETY

(By Joann S. Lublin)

WASHINGTON.—The U.S. Postal Service prides itself on moving the mail, no matter what.

But this credo leads to unsafe work conditions, outside investigators say, and may have contributed to the deaths of three postal workers using mechanized equipment. Postal executives say the service has a "strong safety program," but they concede it hasn't always been adequately carried out by lower-level supervisors.

The fatalities have led to congressional hearings and heightened the concern of postal unions about the hazards of Postal Service employment. The independent agency's 673,000 employes suffered 57,672 injuries in 1979, giving the Postal Service an occupational injury rate that is one of the federal government's worst and more than twice as bad as private industry's.

A NEW THREAT

About 15 postal workers die annually in job-related accidents. Vehicle mishaps have typically been the cause. When a conveyor belt crushed Jersey City, N.J., mail handler Michael McDermott on Dec. 15, 1979, the death was the first due to the recently introduced mechanized mail processing. Last November, two other employes were crushed to death in accidents involving mechanized equipment.

The Postal Service's safety problem is taking its toll in more than lost lives and limbs. Worker compensation payments have more than doubled since 1975, and worker compensation liability totals $800 million. "It's costing them an absolute fortune to be unsafe," says an expert. "And the public is paying for it, either in taxes or in the price of the mail."

Employe morale and labor relations also are suffering. Postal unions intend to make safety a top priority when contract negotiations begin in late April.

BARGAINING GOALS

"We shall not sit idly by while our members are struck down by machinery," says William Burrus, executive vice president of the 250,000-member American Postal Workers Union, the biggest of three main postal unions. The APWU president, Moe Biller, says safety demands will include: better equipment maintenance and a "clearer statement" of employes' right to refuse to work under unsafe conditions.

The three fatalities also may prompt Congress to pass a union-backed bill that would toughen federal supervision of postal working conditions. The bill, which passed the House but died in the Senate last year, would let the Labor Department's Occupational Safety and Health Administration bring criminal charges against postal managers and conduct more surprise inspections than it can currently.

Senior postal officials insist such powers aren't necessary. The Postal Service's injury record has improved in the last three years, "so we're headed in the right direction," says Carl Ulsaker, a senior assistant postmaster general. Since the McDermott death, he goes on, top management has stepped up its commitment to safety with expanded management-labor safety committees and training at all levels, more nurses, doctors and safety engineers and quicker attention to equipment repair.

SECOND TO NONE

Postmaster General William Bolger has said he sets "no budgetary limits" to create a safety program "that is second to none." In the fiscal year ended Oct. 31, 1979, the Postal Service spent $48.4 million on safety and health, nearly half of which went for weekly employe talks on safety. But Mr. Bolger concedes he can't drastically reduce the number of work injuries quickly. "We're dealing with a bunch of human beings in this world, and human beings make mistakes, deliberate and otherwise," he says.

Safety experts disagree, blaming the Postal Service's poor accident record on management's failure to give safety the same priority as moving the mail. According to Occupational Safety and Health Administration investigators, a lax safety attitude seems to have had a role in Mr. McDermott's death at a Bulk Mail Center, one of 21 big parcel-processing facilities nationwide.

An OSHA investigation determined that several safety devices had been deliberately removed or disconnected from the conveyor belt in which he was caught. The devices, a bumper guard and a jam relay, would have switched off the belt, but they weren't being used, to maintain productivity in the mail-glutted center. Employers told a congressional hearing that bulk mail management was aware of the problem, which existed on other belts, but hadn't corrected it. "Is this what a life is worth at the Postal Service? A sack of mail?" asks Christine McDermott, the employe's widow.

HAZARDS GALORE

Besides the Jersey City facility, OSHA inspected bulk mail centers in four other cities last winter. It uncovered thousands of serious and "less than serious" hazards—inadequate machine guards, exposed wiring and a lack of guardrails and protective gear for employes. The safety violations reflected an attitude that "the mail must get through," the Labor Department agency concluded.

Du Pont Co. carried out a broader assessment of the Postal Service's safety program last summer—and reached similar findings. Either because they lack training or accountability, line supervisors don't accept responsibility for safety, Du Pont said in a $174,417 report commissioned by the Postal Service.

Du Pont safety consultants found local safety efforts "are either weak, ineffective or not followed." They suggested numerous remedial steps, including adoption of a philosophy that postal managers "make safety equal to productivity" and that all injuries can be prevented.

SLOW PROGRESS

Despite these investigations and Mr. Bolger's subsequent actions, union leaders say workers who complain about unsafe conditions continue to be ignored or harassed. The slow correction of defects may have been a factor in the Nov. 6 death of Los Angeles mechanic's helper Reymundo Lara. He became entangled in a moving conveyor belt after first failing to turn it off at a switch 85 feet away. But three months earlier, the post office's safety officer had proposed installing cutoff switches on the doors of wire cages entered by employes such as Mr. Lara in order to clean conveyor belts. (Newer cages have such devices; older ones lacked them.)

"It's just clear that the (Bolger) program isn't really being put into effect out in the field," says Michael Hudson, staff director for Democratic Rep., Mickey Leland of Texas, who has held hearings on postal safety. The Postal Service's Mr. Ulsaker differs, saying the switches weren't added before the Lara death because local management didn't view the deficiency "as a hazard of imminent danger; we had had that equipment for 30 years without injuring people."

The Postal Service isn't "callous about safety," the senior assistant postmaster general asserts. However, he says, "We do have a system in which every day 300 million pieces come in and have to be moved. . . . We can't say, 'Hey fellows, just because we've slipped in the safety business, you have to make it higher priority to moving the mail.' "●

PERCEPTIONS OF THE REAGAN ECONOMIC PROGRAM

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. DANNEMEYER. Mr. Speaker, not unexpectedly, controversy is beginning to brew over the President's economic recovery package. Some folks believe the tax portion of the proposal is inappropriate; others believe that we should cut programs other than the ones they have a particular interest in, and still others argue the question of who should bear the burden of budget cutting. However, these arguments notwithstanding, most Americans recognize the time has come for positive steps to curb the rise of inflation, interest rates, and unemployment and, in the absence of any other comprehensive alternative, they want action on the President's proposals. The difficulty, if there is one, is that there are some Members of the majority party of this House who do not seem to realize just how pervasive this feeling is.

If further evidence of the depth of public sentiment were necessary, it came to me a few days ago in the form of an open letter to the California congressional delegation from a California member of the Democratic National Committee. The author, who was deeply involved in the campaign of the 1972 Democratic nominee and who has been very active in Americans for Democratic Action, not only writes in support of the President's program but warns against obstructionism and persuasively argues that the program clearly represents the thinking and wishes of the American people. That being the case, she concludes, Democrats as well as Republicans ought to give it a chance.

As one who can particularly empathize with the inner struggle that must have preceded the sending of that letter, I believe its significance cannot be understated. If grassroots Democrats are willing to go on the record, at the risk of their political careers, in favor of the President's program, then their elected Representatives in Congress should give it every benefit of the doubt.

Mr. Speaker, so that my colleagues can see the text of this letter for themselves, I insert it in the RECORD at this point:

FEBRUARY 20, 1981.

Hon. WILLIAM DANNEMEYER,
Fullerton, Calif.

DEAR CONGRESSMAN DANNEMEYER: I am a liberal Democrat whose bona fides include: membership on the DNC serving my second term, membership on the DNC Finance Council and the California Advisory Council. I was Senator Eugene McCarthy's National Finance Co-Chairman in 1968. I was a director for many years of the Americans for Democratic Action. I am a substantial and generous fundraiser and giver.

Given this background, I nevertheless urge you to generously support President Reagan in his attempts to stabilize our nation's economy. Not to do this but to simply dig in our heels and obstruct the President's attempts is non-productive in every sense.

The Democratic Party has always represented the majority of the people of the United States. Lately, we have not been representing them as they desire. The election of President Reagan was overwhelming. Surely voters are telling us something.

I'm writing about the realities that Democrats—and the Democratic Party—must face up to if we are to remain an effective politi-

cal institution in the next decade. In the face of our largest electoral vote loss since 1936 and our inability to retain control of the United States Senate, we cannot remain deaf to the voter's message.

I think it is that they need what President Reagan proposes—an end to inflation, an end to government spending on unnecessary and often foolish projects. Help for the truly needy and help for the middle class. Help for Americans who have worked hard all their lives to establish a solid, decent base for their old age.

Obviously, in the meantime, we must develop our own programs. Programs, let us hope, that are so coherent and so useful to the people of this country that we will win the Presidency, the Senate and the House next time. We must try to make America the fair, honorable and decent place all of us want it to be. We cannot persist in the outdated methods of throwing money at every problem until the money itself is worthless.

Our economy is overwhelmed with special projects many of which are non-essential, extravagant pork barrels or simply inane. We can no longer afford to let special interests, however well intentioned, erode away our substance, pride and decency. Let us remember that before we are Democrats we are Americans.

We owe our constituents support of our President's economic plan.

Therefore, I urge you as strongly as I can, to help, not hinder, the people's will and the President's efforts.

Cordially yours,

JUNE OPPEN DEGNAN.●

HOUSE JOINT RESOLUTION 181—A CONSTITUTIONAL AMENDMENT TO BALANCE THE FEDERAL BUDGET

HON. FLOYD J. FITHIAN

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. FITHIAN. Mr. Speaker, I have recently introduced House Joint Resolution 181, a joint resolution proposing a constitutional amendment to balance the Federal budget—an amendment which recognizes the need to balance the budget while remaining reasonably flexible to meet potential recessions as well as human and national security needs.

The Federal budget has been balanced in only 8 of 35 years since the Second World War and only once since 1961. During the 1970's, budget deficits have substantially increased, averaging over $38 billion per year.

The turbulent economy of the 1970's has been escalating inflation, at times even in double-digit figures, soaring interest rates, rising Government spending, and a shrinking amount of capital formation funds. The purchasing power of the dollar has been more than cut in half since 1967. Sluggish economic growth coupled with unfavorable trade balances and a disastrously weakened dollar in foreign money circles have been disruptive forces in the economy. By balancing the budget in a reasonable and flexible manner it might be possible to stabilize the economy, encourage economic growth, and bring more discipline to our economic priorities.

A constitutional amendment for a balanced Federal budget has won the overwhelming support of the American people. Assorted public opinion polls demonstrate that more than three-fourths of the American people support a constitutional amendment. At present at least 33 States have requirements for a balanced budget. In addition, at least 22 States have urged Congress to adopt a balanced budget and 30 States have requested a constitutional convention for the purpose of drafting a balanced budget amendment. If 34 States petition for a constitutional convention, an unprecedented and unpredictable convention may result. The time for Congress to act is now—now, before such a convention is thrust upon the Nation. It is imperative that the Congress be more responsive to the desires of the American people for fiscal restraint, spending limitations, and a balanced budget. Congress can do this, and the American people insist that it be done.

The escalation of Federal spending in the 1970's, combined with mounting billion-dollar deficits and rapid inflation, has stimulated numerous proposals to balance the budget both in the 97th Congress and in previous years. Some mandate a balanced budget, but require a systematic repayment of the national debt. Some require the imposition of an income surtax to raise whatever additional revenues may be necessary to balance the budget. Some place a ceiling on Government expenditures, providing that appropriations shall not exceed 33⅓ percent of the average national income of the previous 3 calendar years. Some link increased Federal spending to the percentage increase in the gross national product. Some restrict an unbalanced budget only to times of war or national emergency, providing little or no flexibility. Some allow an unbalanced budget whenever the Congress, by a two-thirds vote, deems it necessary.

Each of these proposals has some merit and scattered support around the country. After a comprehensive review of the various alternatives, I am proposing a different approach—a realistic but flexible proposal to balance the Federal budget while combating recession and meeting human and national security needs.

Since I believe that the Constitution should not contain statute like verbiage, the language of my amendment is succinct and deals only with a balanced budget. It is not tied to repayment of the national debt or to tax and spending programs per se. It centers the budget authority with the Congress, giving it the power to estimate revenues and expenditures.

House Joint Resolution 181 proposes a constitutional amendment to balance the budget, except in times of war or a state of national emergency as declared by a two-thirds vote in the Congress. It allows a budget deficit of up to 2 percent of the revenues projected by the Congress in any given year but provides that this temporary deficit be fully repaid within 5 fiscal years. Upon ratification of this amendment, there would be a 3-year delay in implementation to allow the Government adequate time to make the necessary economic adjustments required to balance the budget. This amendment constructively deals with the basic problem of deficit financing and does so with the reasonableness and flexibility required of so fundamental a change in our Constitution.

This flexible constitutional amendment does not require a balanced budget in every fiscal year but allows the Congress to make critical decisions on a yearly basis. Flexibility is an essential ingredient of the budget process due to the extreme difficulties in calculating revenues in any given year. Economic circumstances fluctuate frequently, resulting in increases or decreases of anticipated revenue, and Congress must have the constitutional flexibility to deal with such fluctuations to meet pressing human needs or maintain national security.

This amendment contains an important ingredient which other proposals have not considered. By allowing a 2-percent deficit in any given fiscal year, without a declaration or war or national emergency, this constitutional amendment has a built-in flex clause that permits the Congress to adjust the Federal budget to changing economic conditions or accommodate shortfalls in anticipated revenues. Under the provisions of this flex clause, the amendment would have permitted a budget deficit of over $10 billion in fiscal year 1980. From 1946 to 1970, only 3 years—1946, 1959, and 1968—had budget deficits larger than $10 billion. Only in the 1970's did the Nation almost consistently pile up huge deficits. During the 1980's the budget receipts and outlays will increase sharply and the 2 percent fixed flex clause will allow deficits larger than $10 billion if needed.

The flex clause is not, however, a loophole by which Congress could substantially increase Federal deficits and defeat the ultimate purpose of balancing the budget. The most critical aspect of the flex clause is the payback proposal. Under this amendment, any deficits accumulated under the 2-percent deficit provision would have to be paid back by including them as budget obligations within the 5 succeeding fiscal years. Thus, the Federal Government assumes the ultimate responsibility to put its own fiscal house

in order and balance the budget. By allowing 5 years, it provides the flexibility to adjust to recessions or other economic consequences without declaring a national emergency. If the Nation were to face a severe 1930's-type depression, it would, however, be a national emergency subject to the provision permitting deficits upon two-thirds vote of the Congress.

The payback provision of the flex clause will provide a reasonable structure by which the executive and legislative branches must exercise self-discipline and make the necessary decisions to cut outlays and/or increase revenues. The 5 year time period is certainly enough time for Congress to make these critical decisions.

The flex claused could be implemented by a majority vote in Congress and would not require a two-thirds or three-fourths vote. Consequently, a small minority of one-third plus one could not thwart the will of the majority, and the Congress could vote this temporary deficit it it were deemed necessary.

This constitutional amendment with a built-in flex clause would neither disrupt the existing congressional budget procedures nor require alteration of the Budget Act. It could be implemented simply. The annual vote on the second budget resolution could serve as the final congressional determination on a balanced Federal budget. By majority vote, the Congress could favor a deficit in a given year. Consequently, the second budget resolution could serve as the device to implement this proposed constitutional amendment.

This amendment also has another degree of flexibility. Some amendments require immediate implementation, a process which is probably impracticable. This amendment provides for its implementation within the third fiscal year after ratification by the States, thus allowing an adequate adjustment time. The time needed to pass both Houses of Congress with the required constitutional majority and secure ratification by three-fourths of the States, plus the 3-year implementation delay, would give Congress and the President adequate time to adjust to the concept of living within our national means.

This amendment also plugs a major loophole neglected by other constitutional proposals. By utilizing the term total expenditures of government, as opposed to a budget term like outlays, the amendment includes both on-budget items and off-budget items. Off-budget items were created in 1973 and showed an additional deficit of $60 million that year. By 1975, the total had skyrocketed to $8.1 billion and jumped to $14.2 billion for 1980. These figures undoubtedly will continue to climb throughout the 1980's unless remedial action is taken.

Except for the Board of Governors of the Federal Reserve and foreign transactions of the Exchange Stabilization Fund, all other off-budget agencies should be included in the budget process and expenditures for them ought to be included in the total expenditures of Government. Consequently, the Postal Service, the Rural Electrification Administration, the Rural Telephone Bank, the U.S. Railway Association, and others would again be included as part of the Federal budget. This amendment, therefore, would prevent the situation in which agencies and programs could be transferred on and off the budget. It enables the American people to get a truer picture of what their Government is really spending.

In addition, this amendment confirms the existing budget procedure of treating capital expenditures and military public works as part of a unified budget and prevents the adoption of a separate capital budget, a procedure many States have followed to give the appearance of a balanced budget.

Many critics argue that it is not possible to balance the Federal budget while providing the necessary human and national security needs. Others consider such a proposal a throwback to the horse-and-buggy days of President McKinley. Still others dismiss it as a conservative, even right-wing proposal not feasible in the post-World War II era. I differ strongly with these assumptions.

One does not have to look too far back into history to find a courageous political leader who achieved balanced budgets in turbulent times and who met not only the human needs of the era but implemented numerous national security programs. The leader is a man I greatly admire—President Harry Truman. During the Truman administration the United States went through a difficult postwar economic adjustment period with social and economic turmoil and great inflation. In the area of foreign affairs, the United States under Truman undertook the rebuilding of Europe via the Marshall plan, provided international security by creating NATO, provided the wherewithal to fight the Korean war, dealt with the Soviet threat, enlarged our role in China, and undertook some far-reaching domestic programs. Despite these obstacles, President Truman did balance the budget during 4 of his 7 years in office. Between 1946 and 1952 Truman actually showed a total budget surplus of more than $2 billion. If President Truman could balance the budget while meeting human and national security needs in difficult, turbulent times, so can we. With discipline, courage, and the will to address a reordering of our national priorities, today's leaders, I believe, can achieve this goal. It is my hope that the passage of this constitutional amendment will provide a structure by which future leaders will act responsibly to curb excessive spending and balance the Federal budget. We as a nation cannot continue to mortgage the future by simply piling one deficit upon another. Reason, sanity, and fiscal responsibility must prevail.

BUDGETS DURING THE TRUMAN ADMINISTRATION[1]

Year	Deficit	Surplus
1946	−$15,856	
1947		$3,862
1948		12,001
1949		603
1950	−3,112	
1951		6,100
1952	−1,517	
Total	−20,485	22,566

[1] Figures are in millions of dollars.

I am hopeful that the Government will conduct a disciplined analysis of priorities and make the courageous, though unpopular, decisions necessary to balance the budget. When opinions differ on the merits of program X or project Y, it is easily expedient to compromise by funding both and piling up the deficit. This trend must be reversed if the Nation is to achieve a balanced budget.

In conclusion, the amendment I have recently introduced will establish a reasonable means of balancing the Federal budget while providing flexibility to deal with shifting economic circumstances, human needs, and national security. It will create a structure by which Government can make a disciplined analysis of expenditures and revenues, perhaps on a program-by-program basis, and make the courageous decisions necessary to balance the budget

I urge my colleagues to support this measure, and I especially urge my colleagues on the Judiciary and the Budget Committees to hold indepth public hearings on this important constitutional amendment. The text of the resolution follows in the RECORD.

HOUSE JOINT RESOLUTION 181

Joint Resolution proposing an amendment to the Constitution of the United States to limit the expenditure of Government funds during any fiscal year to the total revenue of the Government as projected by the Congress for such year

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, to be valid only if ratified by the legislatures of three-fourths of the several States within seven years from the date of its submission by the Congress:

"ARTICLE

"SECTION 1. Except as provided in section 3, the total expenditure of Government funds during any fiscal year shall not exceed the total revenue of the Government as projected by the Congress for that fiscal year.

"SEC. 2. The provisions of section 1 shall not apply with respect to any fiscal year during any part of which the United States is in a state of war declared by the Congress pursuant to section 8 of article I of the Constitution or any fiscal year during which the Congress, by a vote of two-thirds of each House, adopts a joint resolution stating that a national emergency requires the suspension of the application of section 1. This joint resolution shall not be effective unless approved by the President.

"SEC. 3. The total expenditure of Government funds during any fiscal year may exceed the total revenue of the Government as projected by the Congress for that fiscal year by two percent of the total revenue of the Government as projected by the Congress for that fiscal year.

"SEC. 4. If the total expenditure of Government funds during any fiscal year exceeds the total revenue of the Government for that fiscal year, the resulting deficit shall be extinguished by the end of the fifth fiscal year after the fiscal year in which that deficit occurs.

"SEC. 5. If the total revenue of the Government during any fiscal year exceeds the total expenditure of Government funds for that fiscal year, the resulting surplus shall be deemed revenue of the Government for the following fiscal year.

"SEC. 6. As used in this article, expenditure of Government funds shall not include any expenditure for the redemption of bonds, notes, or other similar obligations of the Government, and revenue of the Government shall not include any revenue derived from the issuance of bonds, notes, or other similar obligations of the Government.

"SEC. 7. The Congress shall have power to enforce this article by appropriate legislation.

"SEC. 8. This article shall take effect on the first day of the third fiscal year beginning after the date of the adoption of this article."●

IN SUPPORT OF LITHUANIA'S FREEDOM

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. ROSENTHAL. Mr. Speaker, with Soviet violations of the 1975 Helsinki human rights accords growing more numerous and offensive in recent months, it is important to take note of those who bravely stand up to Soviet oppression.

The determination and perseverance of the Lithuanian people enjoys the admiration of free people everywhere. I note that February 16 marked the 63d anniversary of the establishment of the Republic of Lithuania, when after German occupation and devastation during World War I, a sovereign Lithuanian homeland was founded.

Alas the independence of this Lithuanian state lasted only 22 years, as the 1939 Molotov-Ribbentrop Pact enabled the Soviet Union to occupy and annex Lithuania in 1940.

Our Government has rightfully never recognized the Soviet annexation. Soviet control of Lithuania has resulted in a systematic repression of Lithuanian culture, language, and religious preferences.

The more than 1 million Lithuanian Americans appreciate the liberties of life in this country that many of us often take for granted. We must join in reaffirming our commitment to the principles set out in Helsinki which the Soviet Union, as a signator, chooses to violate.

Suppression of Lithuanian identity may be attempted by the Soviet Union. In response to these attempts, I take this opportunity to salute the Lithuanian peoples pursuit of freedom and courageous expression of their heritage.●

A TRIBUTE TO THE UNION DE MUJERES AMERICANAS, CAPITULO DE PUERTO RICO, AND ITS DYNAMIC PRESIDENT, MRS. CARMEN LOCKHEIMER

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. LENT. Mr. Speaker, I would like to direct the attention of my collegues to the fact that this date, March 12, 1981, marks the 25th anniversary of a truly remarkable organization, the Union de Mujeres Americanas, Capitulo de Puerto Rico. The celebration of this significant landmark for this outstanding organization of Western Hemisphere women is being guided by a most remarkable woman, Mrs. Carmen Lockheimer, of Puerto Rico, who is concluding a tremendously successful term of office as president of the organization.

Mr. Speaker, I insert the following material:

THE UNION DE MUJERES AMERICANAS, CAPITULO DE PUERTO RICO

The UMA Capitulo de Puerto Rico was founded in October 1955 by a handful of selected women who, as United States citizens, desired to forge a link with their Central and South American sisters with a view toward promoting better understanding of public affairs and women's enlightening participation throughout the Americas. Their Puerto Rican organization has grown to a membership of more than three hundred fifty women in San Juan and Ponce.

The UMA is dedicated to solidarity, friendship and improved relations with the women of the Western Hemisphere. In addition, its aims are directed to the improvement of cultural, civic, political, social and economic status for the women of the Americas. It also endeavors to make a serious contribution to the attainment of peace based on education, tolerance and justice. The UMA Capitulo de Puerto Rico constantly strives to bring to public acclaim the many outstanding accomplishments of the Puerto Rican women. And, for the past twenty years it has worked and fully cooperated with the United Nations in programs designed toward the betterment of the women of Latin America.

The UMA Capitulo de Puerto Rico has been in constant collaboration with the many Latin American dignitaries who visited Puerto Rico on official missions. To further interchange of activities and related progress in hemispheric women's affairs guest speakers have been brought into Puerto Rico from UMA organizations in Guatemala, Peru, Colombia, Venezuela and other western hemispheric countries. A few years ago the convention of the presidents of the UMA organizations of Central and South America was hosted in Puerto Rico. Mr. Jose A. Mora, at the time secretary of the Organization of American States, has distinguished the UMA, in Puerto Rico, with his presence.

In pursuit of constructive and informative participation in public affairs, UMA, in Puerto Rico has conducted forums on inheritance tax and labor laws, women's voting and political rights.

In 1963, UMA instituted "The Woman of The Year in Puerto Rico" project. This resulted in ex-Mayoress Doña Felisa Rincon de Gautier, of San Juan, being selected as "The Woman of The Americas", a few years ago. The activity has been given recognition by The General Federation of Women's Clubs of the United States.

Annual scholarships are given to worthy students in pursuit of international law and Latin American and foreign relations. Cultural exchanges have been promoted through literary competition. UMA has participated in Public Hearings held by the Senate of Puerto Rico in relation to amendments to the "Electoral Law", "The Status of Puerto Rico", etc.

UMA of Puerto Rico founded a chapter in the Dominican Republic and was honored by the then President Joaquin Balaguer. And, a regional chapter was installed and continues functioning very successfully in the southern City of Ponce, Puerto Rico.

UMA has taken Puerto Rican folklore and culture to many of the states in the continental U.S. and Central and South American countries thus making it possible for the people of those countries to get to know something about Puerto Rico, its government, freedom of speech, religion, culture, press and its wholesome relation with the United States of America.

UMA has done much philanthropic work in Puerto Rico's hospitals, schools, etc.

UMA has done much to point up the true value and power of the Puerto Rican woman in every aspect of life.

In the interest of human and civil rights of women, UMA dispatched a manifest with thousands of signatures demanding fair treatment for the Cuban women in prison, in Cuba, because of political reasons and the support of all of the UMA organizations in Latin America was enlisted in this effort. An annual meeting was instituted in 1966 with our Cuban sisters, in exile, in Puerto Rico.

For the UMA de Capitulo de Puerto Rico Twenty-fifth (Silver) Anniversary celebration on March 12, 1981, Mrs. Lockheimer has invited as the guest of honour and the principal speaker, The First Lady of Costa Rica, Doña Estrella Zeledon de Carazo. The First Lady is also a member of the directorate of UNESCO, representing all of Central America. Doña Zeledon de Carazo will address the UMA of Puerto Rico on Women's Rights in Costa Rica. During her stay in

Puerto Rico, The First Lady of Costa Rica will stay at The Governor's Mansion, La Fortaleza, as the guest of Governor Carlos Romero Barcelo and Mrs. Romero Barcelo. A cocktail party and reception will be given in her honour by Governor Barcelo.

Mr. Speaker, Union de Mujeres Americanas (UMA) of Puerto Rico is to be congratulated for its many successes and noted accomplishments over the past 25 years. Also to be congratulated is its president, Mrs. Carmen Lockheimer. This unusual woman of great ability and talent in public affairs has displayed great ability and talent in directing the activities of this fine organization. I know my colleagues will join me in wishing her well in her future activities, and in expressing our hope for continued progress and success for the UMA of Puerto Rico.●

CHARTER DAY

HON. JAMES K. COYNE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. JAMES K. COYNE. Mr. Speaker, it is my privilege this morning to rise in commemoration of the 300th anniversary of the granting of Pennsylvania's colonial charter by King Charles II to William Penn. Saturday, March 14, has been declared "Charter Day" throughout the Commonwealth of Pennsylvania.

It gives me great pleasure, Mr. Speaker, to point out to my colleagues that Pennsbury Manor in Morrisville, Pa., is the only extant residence of William Penn that has been clearly documented by Pennsylvania historians. Pennsbury has magnificently preserved William Penn's legacy.

Moreover, Mr. Speaker, I feel obliged to point out that 1981 marks the 300th anniversary of the founding of Bucks County, Pa. Bucks County is one of the most distinctive and historic places in this country. Its colonial heritage, dating back to the days of William Penn, has been beautifully preserved. I consider it an honor to represent such an area in Congress.

This Saturday evening, the Pennsbury Society of Bucks County is sponsoring a dinner in honor of our Commonwealth's Tricentennial. It is my extreme privilege, Mr. Speaker, to have been extended an invitation to Saturday evening's banquet at Pennsbury. There are very few places in this country, Mr. Speaker, where history occupies a greater level of consciousness than in Bucks County, Pa.●

F-15 EQUIPMENT SALE TO SAUDI ARABIA SHOULD NOT BE ALLOWED

HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. McGRATH. Mr. Speaker, last weekend the Reagan administration announced its intention to sell to Saudi Arabia sophisticated equipment to enhance the offensive capabilities of the F-15 jet fighter. I am deeply concerned by the proposed sale, and on March 10 joined my New York colleague, NORMAN LENT, in sponsoring House Concurrent Resolution 90, to disapprove the sale of this equipment.

Only 3 years ago, the Congress approved the original sale of F-15's to Saudi Arabia because it was given written assurances by the Carter administration that equipment such as fuel tanks and bomb racks, which give the F-15 an offensive capability, would not be offered to Saudi Arabia. To provide any new weapons systems to Saudi Arabia at this time would present a serious credibility problem for our Government.

While the proposed sale has many implications, I want to touch on only two of my concerns. First, the Saudis have described this sale as a test of friendship for them. This rings a familiar bell, since the original sale was described in much the same way. But it appears that friendship with Saudi Arabia can be equated with appeasement. The Saudis remain a firm opponent of the Camp David accords, and has in fact been a leader in the Arab world urging a Jihad against Israel and economic sanctions against Egypt. Further, Saudi Arabia has done little to act as a moderating force in OPEC. In the past 3 years, imported oil prices have doubled. If friendship is supposed to be a two-way street, I fail to see how we are benefiting from the current arrangement.

Further, the sale of this equipment will not enhance the security of Saudi Arabia, which currently faces no legitimate external threat. What it will do is further jeopardize the security of Israel. Israel relies on air superiority for its survival. The potential use of enhanced F-15's, with the capability of striking anywhere in Israel, will dangerously complicate Israel's defensive problems. It will have to stretch its air force and divert some of its aircraft from other essential missions to defend against the possibility of Saudi air attacks.

Obviously, the Arab world is currently in a state of turmoil, but this situation cannot be expected to continue indefinitely, and we may eventually regret this sale.

I can understand the interest of this administration in cultivating friendly relations with Saudi Arabia, which is potentially a moderating influence in the Middle East. What I do not understand is why we must continue to fall into the same traps as in the past. We have nothing to show for the F-15 sale of 1978, and the most recent add on will not contribute one iota to the promotion of our national interest, and it will clearly add an additional threat to our most solid ally in the Middle East, Israel.

I hope my colleagues will join me in preventing this serious foreign policy mistake.●

ECONOMIC RELATIONS WITH JAPAN

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. RUDD. Mr. Speaker, the Honorable Paul Fannin, a good friend, former U.S. Senator from Arizona, and prior to that, Governor of Arizona, distinguished citizen of our country, has testified before the Senate Finance Committee.

This great American has traveled from Phoenix, of his own expense and volition, to express his views of the severity of this country's economic conditions and our association with the Japanese Government, who may need encouragement in creating a more equitable trade agreement with the United States. The Senator has noted Japan's failure to assume a fair share of its defense spending as well as its refusal to negotiate an orderly marketing agreement with our country. He has indicated the serious imbalance of trade between our Nation and Japan, and the course of action we should undertake to rectify this.

In view of Paul Fannin's great contributions to our country, and the tremendous breadth of experience he has had as an elected official, I would like to include his remarks delivered to the Senate Finance Committee.

Mr. Chairman, Members of the Finance Committee: As I will illustrate later in my remarks, I believe the United States will subsidize the Japanese Government in the next year by sixty billion dollars or more.

Back over the years, while their country was becoming a world-wide leader in the electronic industry, the steel industry, and becoming the largest ship-builders in the world as well as builders of more cars than any other nation, it is my opinion that the United States subsidized Japan with several hundred billion dollars.

This has been done by the United States assuming most of what should have been Japan's fair share of defense expenditures for the maintenance and increased building of a military complex for the protection of the countries of the free world. Since the early sixties, Japan's economy has been in a position to allocate a larger share of their GNP than have most of the NATO nations,

including the United States, but as you know, has only devoted a small percentage of their GNP compared with the NATO countries.

Japan, being relieved of the principal part of their fare share of defense obligations, has been able to have lower taxes for individuals, business and industry, and to give special concessions on interest rates, along with many other inducements for the promotion of manufacturing, expecially on items to be exported. This savings has been a great factor in their steel, ship-building and other industries, having such a rapid and successful growth.

For about ten years of my tenure in the U.S. Senate, I was involved with our Japanese trade relationship. In that connection, my work outside the Senate was with American corporation executives who were promoting exports, with our State Department, the Japanese Embassy officials in Washington; and in Japan as a Congressional Delegate where we were trying to get Japanese cooperation for more equitable trade and tariff regulations.

Although I devoted considerable time on this subject before becoming a member of the Finance Committee, most of my work on this problem was in connection with the Finance Committee which was responsible for Tariff and import quota, reciprocal trade agreements and revenue matters generally. I quote from a speech made by me on the floor of the Senate on January 26, 1973.

"In the years just after World War II the United States was so dominant in world trade that we could virtually ignore foreign economic relations. Political relations were foremost in the minds of our government leaders and we could afford to be generous in trade agreements.

"The situation began to change by the mid-1950's, and it should have been evident by the 1960's that trouble was ahead. The Kennedy Round of Trade Negotiations was supposed to ease trade problems, but it only compounded them as far as the United States was concerned. We demolished our barriers to imports, but got nothing in return.

"In 1971, we had our first trade deficit of the century. In 1972 our trade deficit plunged even deeper and continued downward." I made many other statements on this subject on the Senate floor, in Finance Committee meetings and to various groups in Arizona and other states.

As a result of this lack of awareness and concern, our government did not seriously challenge discrimination against U.S. goods in Foreign Markets. We tolerated the closed economy of Japan, and at the same time, we maintained a substantial open-market policy on imports of goods into America.

I'm not taking away from the greatness of Japanese industries or their workers. Again, I am saying, we have, and are still subsidizing Japan, Inc., by relieving them of financing their fair share of the free world defense including their own defense.

Auto manufacturing is the bloodstream of our nation's economy, creating one out of every twelve manufacturing jobs in addition to being one of the largest purchasers of basic materials.

As our automobile factories decrease in production capabilities so does our potential defense effort in time of war.

Chrysler is a large producer of tanks and other defense materials, as are the other automotive companies.

A good percentage of our war production during World War II came from these companies and the conversion to war-time production of these plants would be only a fraction of the time it would take to build new factories.

This committee is to be commended for holding these hearings to determine what can be done to assist in maintaining a healthy automotive industry in our nation and still be fair with other nations that are importing cars into this country.

Since presently about 80% of our car imports are from Japan, they are creating our most immediate problem. Part of the time while I was in the Senate, the shoe was on the other foot. The Japanese were fighting to keep American cars from being shipped into their country. At that time I observed the hopelessness of getting American products into Japan if the Japanese government did not want them to compete with their manufactured products and I understand that circumstance still prevails today, even in the automotive industry.

Now they say, "We do not have any tariff on American cars shipped into Japan" but I know your committee has determined all the other requirements on car imports including modifications, so realize we pay a tremendous penalty in exporting cars to Japan.

In the early seventies I was a member of a Congressional delegation meeting in Tokyo with the Japanese government and business leaders to discuss trade and tariff regulations. As one of the spokesmen for the Senate members, I asked if the Japanese would assist the United States in correcting the inequities in the General Agreement on Tariff and Trade Schedules on United States exports of cars into Japan. Their answer was a firm "No." They stated that they were satisfied with the provisions.

Why wouldn't they like the stipulations which gave them full access to our markets for a 4½% tariff going down ½% a year with their tariff at that time being 17½% base with an additional charge on each American car for weight, wheel base, motor size, etc. Bringing the total import fee to 100% or more usually doubling the price of even a medium size car.

The world situation has changed dramatically since we negotiated agreements with Japan. Thirty years of varying degrees of prosperity have changed the world order. The commitments made and responsibilities assumed by the United States for an overwhelming share of the defense of the free world is no longer a viable solution to actual defense requirements. Events in recent years and more pointedly in recent months clearly illustrate the necessity of the other free nations of the world to carry heavier commitments.

In regard to Japanese responsibility to share in the defense of the free world and their own nation, I quote excerpts from a speech I made in the Senate on May 15, 1975, speaking on defense commitments of the free world nations. "We've had a relationship with Japan that has been in effect since World War II. This relationship has proved the ability of the victor to assist a nation that has gone down in defeat in making an almost unbelievable come back. Japan was a devastated nation, but one with great determination; and they have made an industrial comeback that has been the envy of the world. We have participated in that endeavor, being the greatest foreign contributor to their efforts in making this remarkable recovery."

"But we have a responsibility to the American people to recognize the responsibility that the Japanese have to our nation."

"This relationship of complete dependence must cease, and the Japanese must accept the burden of defense which their productive economy can sustain."

When Japan was getting their exports booming, they were spending less than ½ of 1% of their Gross National Product on defense, whereas the United States was spending from 5 to 9.3% of our GNP. In the seventies we averaged about 5.5% while Japan was still spending only around ½ of 1% until late in the decade when they claimed they worked up to 9/10 of 1% of GNP in 1979.

As I understand—in the United States 1981 budget ending September 30, 1981, we will spend 5.5% or more of our GNP on defense. The total budget amount for 1981 will be about $650 billion with over $170 billion for defense if present projections hold. This does not include the U.S. billions spent in the Middle East and other areas of the world that affect the oil lanes on which the Japanese are even more dependent than the United States.

The 1980 reported Japanese budget ending April 1, 1981, provided for total expenditures of $202.8 billion with defense expenditures at $10 billion, including one billion for supporting U.S. forces in Japan.

The Carter budget submitted for 1982 is approximately $740 billion with defense spending listed at approximately $180 billion. In the new Reagan budget, reported defense expenditure will be near $220 billion, or about 7% of our GNP. That is, of course, dependent on Congressional approval.

The reported contemplated Japanese budget for their fiscal year ending April 1, 1982, will be $223.8 billion with defense expenditures as reported, being around $12 billion, or about 1% of Japan's GNP.

This indicates that just our increases in defense spending will amount to over four times their total defense budget.

Japan has one-half the population of the United States, a GNP of approximately 40% the size of the United States with a budget that was running about ⅕ the size of the United States. I feel that Japan has an obligation to have a defense budget of at least ⅕ the size of that of the United States.

On that basis they should have a defense expenditure next year of not $12 billion but over $70 billion.

This year if Japan equaled economically troubled Great Britain's 5% defense expenditures as a percentage of GNP, the free world's defense budget would increase by 20%.

Following is a comparison of some of the free world nations in regard to the percentage of their defense expenditures as to their GNP:

For the year 1979:	*Percent*
United States (plus)	5
Great Britain	4.7
Turkey	4.5
Belgium	3.5
West Germany	3.4
France	3.3
Canada	1.8
Japan	0.9

Russia's defense expenditures are estimated to be averaging about 15% of their GNP.

Senator Orrin Hatch, shortly after coming back from participating in the October 1980 Tokyo Conference to Commemorate the 20th anniversary of the United States-Japan Mutual Security Treaty, reported the following from speeches of two former Japa-

nese Defense Agency Chiefs. Former Defense Chief Asao Mihara stated, "The Japan-United States security system actually has played a decisively important role as a pillar of freedom, peace, security and prosperity for Japan for nearly thirty years. Under the security-treaty system, the Japanese people were able to fully exercise their national energy concentrating their efforts, first on recovery from World War II and then on the development of our economic strength and attaining the status of a great economic power, becoming the country with the second highest industrial production in the free world."

Mihara said there was no mutualness in the current security treaty since although the United States was obligated to defend Japan, Japan was not required to do the same. "This may have been permissible when Japan's economy was only one-tenth that of the United States, said Mihara, "But today, when the ratio is one to two the treaty needs to be revised."

Another former Defense Agency Chief, Shin Kanemaru, said, "Japan's defense capabilities should not be determined by arbitrarily mathematical formulas such as the current government policy restricting defense expenditures to 1% of the GNP."

Kanemaru also said that the "Japanese defense posture is so weak it can not be considered a fighting force," and urged the nation to improve drastically its defense forces.

Japan should heed the words of its own defense ministers.

American Ambassador to Japan, Mike Mansfield, had some success in getting Japan to build up their defense budget and I praise him for that great effort. But still it's just a start, and we must insist that more be done . . . many times as much.

One of the leaders of Japan, Heigo Fujii, a Vice President of Nippon Steel Corporation had this to say back in the early seventies, when he wrote an article in a book titled Japan and Current World Affairs. I quote: "Defense spending now requires only 8 to 9% of Japan's national budget and until some years ago there was almost no defense spending by Japan at all. It was because Japan was able to divert the greater part of its capital accumulation to both public and private investment that it was able to achieve such a rapid economic growth."

"To the best of our knowledge it was, unfortunately, Japan that started the Pacific War, and, as a result paid a great price . . . and lost. If the United States, which has paid the greatest sacrifices since Pearl Harbor had demanded half of Japan's territory or even the island of Kyushu; Japan, under the conditions existing at the time the war ended was in no position to say "No." However, the United States did not seek any territory whatever. Instead, America provided 3½ billion dollars worth of economic aid to Japan, and earnestly cooperated in Japan's economic reconstruction. At the same time the United States abetted Japan in setting up the new system called Democracy in Japan. All this made possible the economic growth Japan has achieved today."

No longer can we accept excuses of the Japanese Constitution or obsolete treaties prohibiting a defense buildup. The freedom of all Western countries is at stake with Japan one of the most vunerable to Russia's powerful navy and air forces.

Whatever needs to be done to enable Japan to meet their fair share of the free world's defense must be rapidly accomplished.

If we had subsidized Chrysler to the extent of 15 to 20% of their budget, as we have subsidized Japan and its industries, Chrysler would be prosperous today.

What are my conclusions as to the actions that should be taken to keep many of the leading manufacturers of our nation from bankruptcy and to give equitable treatment to the Japanese during these troubled times when the very survival of the free world is threatened?

Number One: Immediately Japan and the United States should negotiate an orderly marketing agreement as a temporary measure. If the Japanese refuse to act with fairness in this regard, we must at once cut back on their imports and insist on changes in GATT to protect our interests.

Number Two: Within three years the defense expenditures of the Japanese should equal the average of the NATO Countries on a GNP basis. The NATO countries and Japan should equal the United States is defense spending on an equitable formula basis within five years.

Number Three: The failure of Japan to increase their defense expenditures on a fair and equitable basis comparable to the NATO nations will result in a continuance of the United States subsidy to their economy. Therefore, if the Japanese insist their industries have the unfair advantage over our industries, we must follow the lead of other nations in drastically reducing their imports that are flooding our markets.●

NATIONAL CENTER FOR PERSONAL COMPUTERS IN EDUCATION

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. DOWNEY. Mr. Speaker, during the past 4 years there has been a revolution in digital computers which has resulted in rapidly diminishing costs, size, and weight with simultaneous dramatic increases in capability and reliability.

This new technology has presented educators with a new tool, personal computers or microcomputers which are lower in cost—by as much as a factor of 10—and have ever increasing reliability and flexibility of particular benefit to handicapped, housebound, and special students.

I believe that the United States should be in the forefront in making full use of the latest developments in microcomputer technology to enhance our educational system at all levels. For this reason, I have introduced a bill to establish a National Center for Personal Computers in Education. This center, which would be located, staffed, and administered under the auspices of the Secretary of Education, would serve as a pilot project as well as research and reference for educators throughout the United States. This is a 3-year, $4 million project. I believe our investment would receive a maximum return in benefits to the American educational system.

At the International Federation of Information Processing held last year in London on computer aided learning (CAL) many American experts came away with the strong feeling that the United States is in imminent danger of losing its position of leadership internationally in this field.

The following is a quote from a letter I received from a leading American scientist in the field, Dr. Ludwig Braun, regarding this international conference:

> Every nation represented (even small ones like Denmark, Holland, and Sweden) has made a national commitment to support use of computers in education. Most already have established national centers for this purpose. France has a program it calls, "10,000 Micro-computers in schools," which was initiated earlier this year. They are placing microcomputers in their schools at government expense and already have 1,500 teachers trained to use them, with a program in place to train 1,000 additional teachers each year.

Great Britain, despite that country's current economic difficulties, recently committed $25 million to setting up a National Center for Computers in Education in order to keep up with the efforts being made by other European nations in this important area. I think we are all aware that the Japanese are not neglecting this area of education. Even the Soviets are fully aware of the important computer technology must play in every phase of their economy in the future. In fact, contrary to what we might think, and contrary to what commonsense would lead us to believe, it is only the United States among the major industrial nations of the world that is not moving ahead rapidly with a program to assimilate computers into our schools.

A National Center for Personal Computers in Education would be the first step in a catching-up process for the United States. With a center for advising educators from across the Nation on microcomputer hardware, educational courseware, teaching and training methods, and special programs for special students and the particular needs of various school districts, we will begin to move forward in this vital area. This type of project cannot be undertaken without Federal help. I hope to find support for the national center from among my colleagues with a sincere interest in education, science, and the future of the American economy.●

MISGUIDED CUT IN CETA JOBS

HON. WILLIAM H. GRAY III

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. GRAY. Mr. Speaker, the Reagan administration has announced that not only does it want to eliminate

funding for the Comprehensive Employment and Training Act (CETA) in fiscal year 1982, but it wants to rescind and defer more than 30 percent of CETA's 1980 funding.

The impact of this cut, Mr. Speaker, will be staggering. In my home city of Philadelphia, the 1980 fiscal year cuts mean that approximately 3,000 men and women will have to be given sudden layoff notices. In other urban areas, the story is much the same.

Like most of my constituents, Mr. Speaker, I fully appreciate the need and obligation to spend Federal money in a responsible manner. We need to attack fraud, waste, and abuse wherever it exists in the budget. But in the case of the CETA program, we have a mechanism which is helping to make jobholders and taxpayers out of former tax users. Given the current economic conditions under which these CETA employees will have to seek new employment, given the new expenses which we are likely to be burdened with as a result of the unemployment created by these layoffs, and given what so far has been the total absence of a belt-tightening plan in other segments of the Federal budget, particularly in defense, I would suggest that the Reagan cut in CETA is a prime example of terribly mistargeted and unwise budget cutting.

I wanted to take this opportunity, Mr. Speaker, to share with my colleagues an article from the March 6 edition of the Philadelphia Inquirer which tells what this cut in CETA means in human terms.

The people described in this newsstory have real hopes and real commitment to improve their lives, Mr. Speaker. Their CETA job, however, means even more to them than just the fulfillment of such hopes. Their job is their very survival—and I think we must keep this stark fact in mind as we consider the cut proposed by the Reagan administration.

If the administration believes that any fraud or waste exists in CETA, then it has a responsibility to work with the Congress to find ways to eliminate such fraud and waste—rather than making a blind, wholesale elimination of the total program. I know that many of my colleagues and I stand ready to work with the administration to rectify any abuses which might exist. But we cannot in good conscience stand by silently while the very existence of people in our districts, and the very health of our cities, is threatened by such misguided cuts as this one in the CETA program.

[From the Philadelphia Inquirer, Mar. 6, 1981]

ON JAGGED EDGE OF BUDGET AX—SCHOOL JOBS ON LINE FOR SOME IN CETA

(By Rick Nichols)

William Mobley—sweeping the lunchroom—is 56, a sometime handyman and roofer's helper, with the scars to prove it, whose oil heater at home has been broken for two years.

Solomon Fulton—refereeing recess scuffles in the gym—is 23 and dressed in dove gray shoes, a shiny new belt and neat corduroys. He was on welfare until last month. He completed the work for a degree in health and physical education from Lincoln University in May.

Mobley and Fulton were working yesterday at Bartlett Elementary School, 11th and Catherine Streets, wondering how much longer they will have a public service job that, a Mobley said, "just about keeps my nose above the water."

It could be a matter of weeks.

Their jobs—janitor's helper and nonteaching assistant—are among 1,100 federally subsidized positions in the Philadelphia School District that could vanish by the end of March if the Reagan administration has its way, officials here announced Wednesday.

The jobs are funded under the federal Comprehensive Employment and Training Act (CETA), a favorite target of conservatives and a program that Reagan has promised to trim radically. About 3,000 jobs in Philadelphia alone could be lost if the Reagan budget-cutting plan is accepted by Congress.

In the schools, CETA workers monitor halls, haul out trash, mop floors, wash walls, patrol entryways, supervise playgrounds, type and answer phones for administrators and keep tabs on attendance. About 250 of the workers paid with federal money help out with custodial chores.

Mobley is one of them. He sweeps up and bags trash after the school's three lunch periods.

"Reagan's friends, Frank Sinatra, what do they care about the price of food?" said Mobley resting a gray stubbled cheek on the side of his push-broom. "Now he's (Reagan) sending money to San Salvador, and I need windows."

Mobley, who owns a modest rowhouse on Titan Street, has been working in the lunchroom for about 13 months, five hours a day, five days a week. He makes about $4 an hour and takes home about $100 a week. It is not much, Mobley said, "but it's the only thing I got."

Since his wife gave up her maid's job with the University of Pennsylvania a few years ago because of wrist problems, finances have been close to the edge for the Mobleys. The couple's oil heater has been broken for two years, and they keep warm with heat from a gas stove, an electric space heater and extra layers of clothes.

Such was not always Mobley's plight. After dropping out of high school and serving two and a half years in the Navy, Mobley worked for years as an electrician's helper, a laborer, a self-employed house painter and, finally, a roofer's helper.

Life was not easy, but the ends met. Then, on Dec. 15, 1978, he was badly scalded on his face and upper arms after slipping on a patch of hot tar. After recuperating, he parted ways with his employer.

He tried papering roofs with a friend. Business was not good. He applied to the city for work as a sanitation employee, but was not hired. He applied for a job at General Electric, but was passed over.

For Mobley, who had been working regularly since junior high school, it was a depressing time. "Every time you turned around," he said, "there was some bill collector threatening you. It's nerve-racking to have someone pounding on the door."

Then 13 months ago, he got the CETA job that, with his wife's pension, provides the couple with just enough to scrape by on. He thinks that Reagan is misguided. "He don't want you on welfare," Mobley said, "and he don't want you to work."

For Solomon Fulton, the nonteaching assistant, employment has been a fact of life. He shares an apartment now with his sister and her two children at 15th and Dickinson Streets.

He is a trim, well-spoken, well-muscled young man who looked ill at ease dodging snowballs and jump-ropes in the cold rooftop gym at Bartlett. "You, my man," he shouted, pointing to a youngster. "Stop that."

He is due in at 8 a.m. each day to help supervise the breakfast program.

Fulton began working Jan. 26. So far he has received only one full week's paycheck of $273.50 take-home pay for 40 hours' work at $4.25 an hour.

One day Fulton said he would like to go back to college, earn an advanced degree, perhaps teach for awhile and, if things turn out right, become an athletics director at a small college. For now, things have turned out wrong.

He said Lincoln University, where he completed his degree requirements last year, will not forward his transcript to the city schools' personnel department—where he would like to apply for a teaching job—because he owes $388 on his college bill. "Things would really get rolling if I could pay off my debt," he said.

After more than two years on welfare—he received $172 a month—he does not have much of a nest egg. He had been counting on the CETA job for 18 months, he said, and had planned to pay off his bills with the money.

He said his efforts to find other work through employment agencies had been unsuccessful. "Why just leave people high and dry?" he said. "I understand that Reagan is trying to fight inflation, but this struck me as being unfair coming about so suddenly."●

CONGRESSIONAL STAFF

HON. WENDELL BAILEY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. BAILEY of Missouri. Mr. Speaker, we are all aware of the incredible and almost unbelievable rate of growth in both the staff levels and the appropriations of the committees of the House in the last few years.

I do not think anyone here can realistically argue that this is not a partisan issue before us.

The American citizens made a loud and resounding cry for reduced Government spending when they went to the polls last November. We, the Members of Congress, now have an unqualified obligation to meet the demands of the electorate and set an example for all of the Government.

The growth of the committees has exploded out of control and is rapidly reaching the point of being forever uncontrollable and unaccountable. We have the opportunity to act now to

trim the fat out of our own system by reducing the size and cost of committee staff in the House.

I urge Congress to establish a firm priority in efforts to reduce the size of its committee staffs and appropriations, bring this escalating bureaucracy under control, and in effect get its hand out of the public cookie jar. How can we expect the American public to make sacrifices in the battle to regain economic stability if the Congress itself refuses to contribute to the cause?●

NATIONAL NUCLEAR PROPERTY DAMAGES INSURANCE ACT OF 1981

HON. ALLEN E. ERTEL

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. ERTEL. Mr. Speaker, public health and safety continues to be jeopardized around Three Mile Island 2 years after the accident. The cleanup of the damaged TMI-2 reactor is still 5 to 9 years away from completion; 700,000 gallons of radioactive water remain in the reactor building and more accumulates daily. The walls and equipment within the building are highly radioactive. The reactor core, with its damaged fuel, is still in place. The hazard to the public will not go away until TMI-2 is cleaned up. To make matters worse, the danger to the public grows every day. The systems maintaining the present cold shutdown at TMI-2 have gone without maintenance for 2 years. Should these systems fail, the reactor could again go critical and our ability to bring it back under control will be reduced.

On Monday, March 9, the Nuclear Regulatory Commission approved the programmatic environmental impact statement for TMI-2 cleanup. This was a major step in permitting the cleanup to go forward. In fact, one of the conclusions of this PEIS was:

> Until TMI-2 is largely decontaminated, there is a small probability (which increases with time) of uncontrolled releases of radioactivity to the environment. Decontamination of the plant and disposal of the wastes will eliminate this possibility for potential harm to the public and workers at TMI * * *. The staff therefore concludes that the full cleanup of the facility must proceed as expeditiously as is reasonably feasible, consistent with ensuring public health and safety and protecting the environment.

While most people agree that we need to get on with the TMI-2 cleanup to protect public health and safety, it is not clear how the cleanup will be paid for. Current cleanup cost estimates range from $1 to $1.3 billion. Metropolitan Edison—Met Ed—the operator of TMI, had the maximum available insurance on the plant—$300 million. This money will probably be exhausted next year. Where the additional $700 million to $1 billion will come from is unknown today.

Met Ed and its parent General Public Utilities Corp.—GPU—have stopped dividend payments on common stock. TMI-1 and TMI-2 have been removed from the rate base. Met Ed's customers' bills have increased 50 percent to pay for replacement power. All of the company's assets have already been pledged to receive bank loans which have, so far, kept the utility from going bankrupt. The Pennsylvania Public Utility Commission—PAPUC—has taken the position that ratepayer will not pay for the TMI-2 cleanup. Simply stated, after the insurance money runs out, there will not be any money to clean up TMI-2.

The Pennsylvania congressional delegation recognized these serious cleanup financing problems last fall and created a delegation task force to make recommendations on how the cleanup of TMI-2 should be funded. Today I am introducing legislation developed by the task force over the last 6 months. The legislation has two important features. First, it provides for a sharing of the TMI-2 cleanup costs. Second, it insures that we do not face identical problems when another accident occurs.

During the course of the task force's work we have been asked on several occasions why we simply do not let the utility go bankrupt if it cannot pay for the cleanup itself. In fact, I started out asking this very question. It has become clear, however, that there are compelling reasons why bankruptcy is not a viable option. First, bankruptcy does not in any way alter the need for money to clean up TMI-2, nor does it help identify a funding option. Second, bankruptcy would add litigation and other administrative costs onto the price tag. Third, bankruptcy could lead to service disruptions for the utility's customers as well as the potential for even higher replacement power rates. Fourth, there is no guarantee that a court-ordered receiver would be more competent than TMI's present managers; in fact, the Federal court would probably appoint the same people who run the plant today. Fifth, and most important, bankruptcy would probably delay the pace of the cleanup at TMI-2 which raises additional public health and safety hazards. Unfortunately, bankruptcy could worsen the situation and does not hold any solutions for cleaning up TMI-2.

Once it is understood that neither the company management nor its stockholders can internalize these cleanup costs, and once bankruptcy is rejected, we find ourselves faced with limited options. During the course of its work the task force reviewed six options including Federal loan guarantees, a purchase of TMI, a condemnation of TMI, a bonding approach, a mandatory liability determination mechanism, and an insurance option.

The final consensus of the task force centered on an insurance approach as the most sound, equitable, and feasible solution. This avenue has the additional benefit that it not only deals with the financing of the TMI-2 cleanup, but it also addresses the serious deficiencies which exist in the insurance available for all nuclear powerplants. By also dealing with the latter, the task force opted to work to insure that the problems facing TMI, and the people in the area, will not be suffered by others in the future in the event of another accident. Few now contend that there will not be future accidents and it would be shortsighted of us not to address the generic problems highlighted by the accident at Three Mile Island.

Specifically, the legislation I am introducing today would establish a national nuclear property damages insurance program designed to supplement the currently available insurance. This program follows the model of a mutual insurance arrangement with annual premiums paid to a fund by all utilities operating nuclear reactors. Premiums would be established on the basis of the size and number of the nuclear reactors as well as the safety and performance experience of the individual utilities. Participation in the insurance program is mandated as a condition of receiving or retaining an operating license for the reactor.

If a utility has an accident in the future, this insurance would not be made available until all of the other commercially available insurance is exhausted, plus $50 million. Based on the insurance available today, this constitutes a deductible of $350 million.

For cleaning up TMI, the insurance program would initially provide up to 75 percent of the uninsured cleanup costs at TMI. When the cleanup is completed, GPU would be required to repay 50 percent of the money received from the insurance program over an extended period of time. This amounts to a nuclear utility industry loan to GPU of 37.5 percent of the cleanup costs and a grant for 37.5 percent of the costs.

It could reasonably be asked what burden this insurance program would place upon utilities throughout the Nation. One important feature of the legislation is that it does not intrude on the ratemaking authority of the State utility commissions. The State commissions have the flexibility to determine how the premiums will be paid for. One could argue that the absence of adequate insurance is the fault of utility management, and, as a consequence, premiums should be paid from earnings before dividends. Obviously, the State commissions also have

the authority to reflect the premium payments in the rates of the utilities' customers.

If the commissions pass through the premium payments, the impact upon ratepayers would vary from utility to utility. If there was such a thing as an average national ratepayer he would experience an increase in a monthly bill for 500 kilowatt-hours of 3 cents for as long as the premiums are collected. This figure is based on actual 1980 generation. Using 1981 projected generation this figure would drop to about 2.5 cents. Premiums would be collected until an insurance reserve had been created. At that time, premium collection could be either suspended until there was a future need, or they could be rebated at the end of each year. In addition, the interest collected on the insurance reserve could also be rebated.

In assessing this cost, it is important to understand what each utility might experience if TMI goes bankrupt—as it will if a cleanup financing mechanism is not put into place. While it is hard to make forecasts, it seems reasonable to assume that capital will be available to utilities only at higher interest rates to reflect the increased perception of risk. An increase of 1 percent in interest charges would cost many utilities tens and hundreds of millions of dollars, tenfold more than the payment of premiums as provided under this legislation. It is certain, that these higher interest charges will be reflected into the rates of all utilities' customers and will be far more burdensome than the payment of insurance premiums which also protects the ratepayers if a future accident occurs.

We have had the charge that nuclear power is heavily subsidized and the real costs of nuclear power are not reflected in the rates to utility customers. This legislation would set a precedent for more accurately reflecting the cost of nuclear energy. While no one is suggesting that this legislation would in any way alter the economics of nuclear generation versus coal, oil, or gas, the bill does recognize that these costs should be reflected.

I am encouraged that we will be able to move forward with this legislation. Among other things it will serve as the necessary vehicle to finally begin action to address the serious problems associated with the cleanup at TMI-2, while taking the lessons learned from the accident and develop a strategy to correct past deficiencies. I urge my colleagues to join with me on this legislation to protect the health and safety of the people living around Three Mile Island and the health and safety of people living near all nuclear reactors.●

ECONOMIC REVITALIZATION

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. HUBBARD. Mr. Speaker, my constituents and I occasionally differ on some views. However, I respect and appreciate their opinions. Here is one example where my constituent, Virginia Gieske of Madisonville, Ky., and I differ. Mr. Speaker, I submit an excellent letter from a conscientious constituent that deserves publication:

I am writing to express my opinion on President Reagan's economic plan and on the political climate in general in our country at present. I did not vote for Mr. Reagan, and I do not share his priorities. I think the "Robin Hood in reverse" assessment of his economic plan is a fair statement. As for the New Right movement in politics, it frightens me because it leaves me wondering whatever became of our ideals of social justice.

I hope you will have time to read an article by Father Richard McBrien, who is head of the department of theology at the University of Notre Dame. He expresses my feelings exactly about our current economic selfishness.

The so-called "Christian" groups who worked for the election of conservative congressman are appalling to me. What being for the arms race and against the Equal Rights Amendment and busing have to do with Christianity is beyond me. These groups have little or no understanding of Christian teachings and should therefore find other titles for themselves.

I am totally opposed to Reagan's proposed 30 percent across the board tax cut because it favors the wealthy. We do need tax relief. What is needed is to revise the tax tables to make allowances for inflation.

It was surprising to me to learn during the discussion of cuts in the food stamp program that we presently qualify for food stamps. Yet we pay a fair amount in federal income tax. For people in our salary range, it makes little sense to take so many of our tax dollars, funnel them through the federal bureaucracy, and then give a little back in benefits which would not be needed if we got tax relief. We do not receive food stamps and do not plan to apply unless our situation worsens (as through unemployment).

My husband works for a program which is funded through CETA. Therefore, under the Reagan plan, his job is to be eliminated. Both my husband and I have master's degrees, yet as the traditional liberal arts education becomes less and less marketable, we have problems in the job market. I do not work at present as we have two preschool children.

I am not seeking just to preserve my husband's job, though I would like that. What I would like is far more basic—a revitalization of true Christian ideals which means such things as working for social justice and having a genuine concern for the disadvantaged. We do not have this at present, and all of us are the poorer for it.

Sincerely,

VIRGINIA GIESKE.●

A STRONG VOICE IN SUPPORT OF ISRAEL

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. LENT. Mr. Speaker, I wish to call to the attention of those concerned over the critical situation in the Middle East a most thoughtful and perceptive discussion of this matter by one of our colleagues, my good friend and neighbor, the Honorable JOHN LEBOUTILLIER, who so ably represents the Sixth Congressional District of New York.

In a recent article in Newsday, Representative LEBOUTILLIER stresses the vital importance of a strong America to maintaining stability in the Middle East. His thoughts provide a most valuable and instructive background in considering the President's proposals for a stronger America. I urge my colleagues to give careful study to Representative LEBOUTILLIER'S article, which I insert at this point in the RECORD:

AS AMERICA GOES, SO GOES ISRAEL

Given the strategic realities of the 1980s, a vote for a stronger America is a vote for Israel.

The principal geo-strategic fact in the Mideast is the dependence of the western economies on Persian Gulf oil. Israel provides the United States with a unique strategic asset in the Mideast, preventing not only radical Arab attempts to destabilize and overthrow pro-western states on the Arabian peninsula, but also direct Soviet intervention.

American weakness, however, threatens to undermine this balance and place in jeopardy Israel's security. For the first time since her birth, the strategic balance in the Mideast favors the Soviet Union. Continued U.S. economic and military assistance to Israel will be required. But just as crucial is the need to strengthen American power in all its dimensions.

Since 1945, regional power relationships have reflected the U.S./Soviet military balance. It was America's stragic superiority that enabled President Harry Truman to force the Soviets out of Iran and Turkey and to end the Soviet-supported revolt in Greece. This same superiority made it possible for President Dwight Eisenhower to support the Shah of Iran against Mohammed Mossedegh and to project forces into Lebanon in 1958.

When President John Kennedy challenged Khrushchev in Cuba, it was overwhelming strategic superiority that made it possible for U.S. conventional forces to work their will. In 1964, President Lyndon Johnson dispatched a sharp note to Ankara warning of the implications of a possible Turkish invasion of Cyprus. As unchallenged leader of the western world, America carried authority and the peace was preserved. And, just as American strategic power forced England, France, and Israel to desist from their attack on Egypt in 1956, it was the U.S. nuclear shield that allowed the Israelis to prevail against Egypt, Syria, and

Jordan without Soviet intervention in the 1967 Six Day War.

The Yom Kippur War of 1973 saw a new reality emerge—a decline in American power. Following initial Egyptian successes, Israeli forces counterattacked and soon threatened to destroy the Egyptian Third Army. Faced with the prospect of a client's defeat, the Kremlin dispatched messages to the White House threatening Soviet action if the U.S. did not force Israel to cease its attack. To support this challenge, the Soviets moved 96 naval vessels into the Eastern Mediterranean and readied airborne divisions for direct military intervention in the region.

The United States, suffering from unstable domestic leadership and declining military capability, had no choice but to withdraw support and force Israel to draw back from its encirclement of the Egyptian army. This display of weakness on the part of the United States had immediate and far-reaching consequences for Israel's future security. After nearly 35 years of effort by the Soviet Union, the long-held western monopoly over the Mediterranean side of the region was finally crushed.

Britain's withdrawal "East of the Suez" and the Soviet construction of a "blue water" navy combined to make western dominance of the Persian Gulf highly problematical. Moreover, the opening of the Suez Canal shortened the entry point of the Soviet navy into the Indian Ocean by nearly 9,000 miles, thereby encouraging many western observers to call for negotiations between the United States and the Soviet Union on the demilitarization of the Indian Ocean as a means of countering obvious Soviet advances.

Buoyed by this display of power—and pressured by the Soviet Union—"friendly" Arab countries used the "oil weapon" against the West. This act greatly undermined western economies, reduced their total defense budgets, and gravely threatened the political unity of the Free World, as governments sought to curry favor with both the Arabs and the Soviets. To make matters worse, the existence of the Palestine Liberation Organization—nothing more than a terrorist group—was finally given legitimacy.

This decline of America as a world power continued unabated throughout the decade of the 1970s. Not only has the Soviet Union seriously challenged America's traditional superiority in tactical nuclear, tactical air, and naval forces, but it has also acquired a several-year "window of opportunity" during which the Kremlin will be able to count on a net advantage over the United States in strategic-nuclear forces.

Without question, a strong America is the sine qua non of Israel's security. Without an America confident in herself and in her role as the principal defender of the Free World, Israel cannot survive growing Soviet influence in the Mideast.●

FAIRNESS FOR DAIRY FARMERS

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. ROTH. Mr. Speaker, I would like to call my colleagues' attention to proposed legislation to eliminate the April 1, 1981, adjustment in the dairy price support program.

The chorus surrounding this debate has, in my opinion, obscured the voice of the average dairy farmer, on whose behalf I take the liberty of speaking.

The average dairy farmer in Wisconsin enjoys a modest income from work which requires the milking of his herd twice a day, 365 days a year. In the spring and fall, he plants, tends and harvests grains with which to feed his herd. An average herd in Wisconsin is 37 cows. The average dairy farm income is $20,000 to $25,000. The dairy farmer depends significantly on receiving a just return for his on-farm investments in order to remain a viable producer. He is a high school graduate, whose father was most likely a dairy farmer. His wife works alongside him, and he usually employs no outside labor to operate his dairy farm.

This man is not a conglomerate, an agri-business; a corporate entity who merits scrutiny merely as a result of the size and scope of his involvement in an industry. He is a small businessman by every definition of the word. He wants to retain his independence despite: First, rising costs; second, Federal policies which act as a disincentive to the small farmer, and third, misunderstanding of his life's work as a "rich man's" occupation.

This dairy farmer provides a sound base for Wisconsin's rural communities through tax dollars which provide local schools, roads and public services. His careful stewardship of the land makes his livelihood an environmentally desirable use of natural resources.

Mr. Speaker, reductions in the price support program must be viewed in terms of their long- and short-term effects on farmers' income and dairy markets. A reduction in the level of the support price to approximately 75 percent would mean a reduction of 80 cents per hundredweight; a 6-percent reduction in the farm milk price. This would cut farmers' return for milk in Wisconsin by $182 million or $4,000 per farm annually, or for a 6-month period $91 million or $2,000. This could mean that farmers would increase milk production to make up for the shortfall in cash flow. Dollars would be needed to cover rising production costs. A reduction in farm milk prices alone does not guarantee a reduction in milk production, and it may actually cause an increase in milk production.

Current enthusiasm for cuts in the dairy program is questionable when comparison is made of the contemporary price of dairy products with the cost of other consumer goods.

Using 1967 as a base year, or 100, the all food index on October 1980 had advanced by 162.4 points—dairy products for the same period advanced by 132.4 points—29.7 points less than the all food price index.

Dairy products are a good buy today, and a better buy than they were 10 years ago. In 1970 it took 10.3 minutes of work to purchase one-half gallon of milk. Today it takes 8.7 minutes. In 1970 it took 15.1 minutes of work to buy one-half gallon of ice cream. Today it takes 14.6.

I urge my colleagues to investigate alternative methods of reducing Federal expenditures. Four factors contribute to the increase in milk production: First, ample feed supplies at reasonable prices; second, low beef prices which have slowed culling rates; third, a high number of replacement heifers, and fourth, a lagging economy. This growth in production can also be attributed to the depressed state of other agricultural sectors, such as beef and grain production, which persuade farmers to highlight the dairy-producing aspects of their operations in order to remain competitive.

Mr. Speaker, I hope we will not cut dairy price supports simply to realize a short-term budget objective. Real reform must be carefully considered and include all American agriculture commodity support programs.

I know that dairy producers are more than willing to bear their share of Federal expenditure reform; however, we must avoid the temptation to make the dairy support program bear an unfair burden of budget cuts, thereby inflicting an unfair hardship on the average dairy farmer.

Rather, let us make an examination of legitimate reductions in the structure of all commodity support programs so that equity can be restored and the small producer—no matter what his commodity—can anticipate continuity from his Government, fair prices for his products, and incentive to maintain his productive capacity.

LOCAL OPTION FOR HANDICAPPED MASS TRANSIT

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. BEDELL. Mr. Speaker, in the 11th hour of the 96th Congress, we had the opportunity to place into law a measure which our constituents have been crying out for: Regulatory relief for local governments in administering Federal mandates. Unfortunately, our colleagues in the other body failed to pass what we in the House had passed. I am referring to our effort to get the Federal Government off the backs of local government in the implementation of section 504 of the Rehabilitation Act of 1973, which provides that no handicapped individual shall be denied the benefits of any program or activity receiving Federal funding. I am reviving the effort to provide flexibility in serving mass transportation needs of the

handicapped, and to state more clearly congressional intent in this resolve.

The Department of Transportation's regulations as applied have provided for only one way for communities to meet the transportation needs of the handicapped. The regulation as they have been applied stipulate that communities' transit systems must be made fully accessible—even though to do so may be very costly and may only benefit relatively few handicapped persons, as suggested by a Congressional Budget Office report. The regulations imply that conditions are uniform throughout the country and that what is feasible to serve the handicapped in one part of the country is just as feasible in another. Section 504 as applied by DOT regulations does not allow for local flexibility and fails to recognize that every State and city is different. Even if funding were available to make buses accessible to the handicapped, there would still be difficulties associated with loading and unloading the handicapped. For instance: the time it takes and the disruptive effects it has on schedules; the disparities in weather and geography in different parts of the country and the constraints these levy on the handicapped at a bus stop. Difficulties which have resulted in a low level of handicapped ridership.

Rigid application of the Department of Transportation's section 504 requirements could very well lead to a circumvention of congressional intent of 504. As I mentioned earlier, 504's intent is to provide transportation services to handicapped persons—an intent which I certainly support and will work to insure. Forcing communities to carry out DOT's regulations that require lift-equipped buses, which are not cost effective, could result in a reduction or elimination of service. Recent cost estimates for complying with the regulations as they relate to transit systems range from $6 billion to over $8 billion excluding inflation. Such extraordinary costs are a significant factor in evaluating the desirability of a full system accessibility requirement for all transit systems. Costs of this magnitude establish a goal which may never be reached.

Fortunately, this does not have to be the case if we allow the intent of Congress to transcend DOT's restrictive and myopic regulations. My bill would allow local areas to pursue locally adopted alternative approaches for meeting the transportation needs of the handicapped. These programs must be approved by the Secretary of Transportation if they are: First, developed in consultation with members of the local handicapped community and elected local officials; second, serve the same areas and charge fares no greater than those charged the general public; and third, provide service within 24 hours in the first 2 years and within 6 hours in 4 years. In addition, congressional oversight is provided to insure that implementation is in accord with congressional intent and purpose.

A Congressional Budget Office study concludes that a larger number of handicapped persons could be served at less cost by specialized door-to-door service. I call my colleagues' attention to the example of a community in my district which was effectively serving the transportation needs of the handicapped until DOT rules that the program was not following the intent of 504. The Sioux City, Iowa, experience with private carriers demonstrated that the handicapped can be transported much more inexpensively than by lift-equipped conventional buses. A local firm, Wheelchair Transportation Inc., in conjunction with the Sioux City handicapped community has developed a viable alternative for handicapped transportation that is more effective, more efficient, less costly, and preferred by the handicapped. Yet DOT says "no" to their efforts while at the same time recognizing the viability and success of the venture.

In implementing President Reagan's pledge to provide for more regulatory flexibility and more cost-effective government services, let us start here with a proven program. Last session, the House approved this plan and it has been endorsed by handicapped organizations, State and local officials, and transit operators. I urge my colleagues to again support this measure. The text of the bill follows:

H.R. —

A bill to amend the Urban Mass Transportation Act of 1964 relating to mass transportation to meet special needs of the handicapped, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 16 of the Urban Mass Transportation Act of 1964 is amended by adding at the end thereof the following new subsection:

"(d)(1) Any recipient of Federal financial assistance under this Act may submit a program respecting transportation of handicapped persons for approval by the Secretary. The Secretary, in consultation with the Architectural and Transportation Barriers Compliance Board, shall approve any program submitted under this subsection which the Secretary determines meets the requirements of this subsection.

"(2) The Secretary shall approve a program respecting transportation of handicapped persons who cannot reasonably use one or more modes of mass transportation service available to the general public under this subsection which—

"(A) provides that the recipient will provide transportation to such handicapped persons throughout the service area in which the recipient provides mass transportation to the general public;

"(B) provides that any requirement for preregistration for a service shall not place an undue burden on handicapped residents or handicapped visitors;

"(C) provides that, if the recipient charges a fare for transporting such a handicapped person, such fare will not be more than the fare charged by the recipient for transporting by mass transportation facilities and equipment a member of the general public a comparable distance;

"(D) provides that—

"(i) during the two-year period beginning on the date of approval by the Secretary of the recipient's program, the recipient will provide transportation to any such handicapped person upon request in less than twenty-four hours after receiving such request unless, in the case of a particular handicapped person, the handicapped person requests a longer period;

"(ii) during the two-year period beginning on the day after the last day of the two-year period referred to in clause (i) of this subparagraph, the recipient will provide transportation to any such handicapped person upon request in less than ten hours after receiving such request unless, in the case of a particular handicapped person, the handicapped person requests a longer period; and

"(iii) after the last day of the four-year period beginning on the date of approval by the Secretary of the recipient's program, the recipient will provide transportation to eligible handicapped persons upon request in less than six hours after receiving such request unless, in the case of a particular handicapped person, the handicapped person requests a longer period;

"(E) provides that the recipient will provide transportation to handicapped persons without regard to trip purpose;

"(F) provides that, where feasible, the recipient will also provide transportation, if requested by the handicapped person, to at least one person accompanying the handicapped person at a fare which is not more than the fare charged for transporting by mass transportation facilities and equipment a member of the general public a comparable distance; and

"(G) provides that the recipient will provide transportation to handicapped persons for at least the same time period for which the recipient provides mass transportation to the general public.

A recipient's program shall be deemed to meet the requirements of this paragraph with respect to a mass transportation corridor if the recipient provides accessible bus service in such corridor. The Secretary shall not approve a program under this subsection which does not comply with the requirements of this paragraph.

"(3) The Secretary shall not approve a program under this subsection unless (A) the community of handicapped persons for whom such transportation will be provided is consulted by the recipient in the development of such program, and (B) the program is developed in cooperation with responsible elected officials of local governments concerned.

"(4) A recipient may amend a program approved under this subsection if (A) the Secretary, in consultation with the Architectural and Transportation Barriers Compliance Board, determines that the program as amended complies with this subsection, (B) the amendment is developed in consultation with the community of handicapped persons for whom the transportation is being provided, and (C) the amendment is developed in cooperation with responsible elected officials of local governments concerned.

"(5)(A) The Secretary may not impose any requirements under this subsection which are in addition to the requirements set forth in this subsection respecting a program for

providing transportation of handicapped persons through facilities and equipment (other than facilities and equipment used by the recipient to provide transportation to the general public).

"(B) The regulations issued to carry out this subsection shall be kept to an absolute minimum.

"(6) If a recipient is complying with its approved program under this subsection, such recipient shall be deemed to satisfy the requirements of this section, the Architectural Barriers Act of 1968 (Public Law 90-480), and sections 502 and 504 of the Rehabilitation Act of 1973 as they relate to mass transportation of handicapped persons served under such program.

"(7)(A) If the Secretary makes a preliminary determination that a recipient with a program approved under this subsection is not complying with its program or with the requirements of this subsection, the secretary shall issue an order requiring the recipient to come into compliance.

"(B) If, after the ninetieth day following the date of an order under subparagraph (A) of this paragraph, the Secretary makes a final determination after notice and an opportunity for a hearing, that the recipient is not complying with its program or with the requirements of this subsection, the Secretary shall withhold not less than 25 per centum of the recipient's federal financial assistance under this Act until the recipient comes into compliance or agrees to take the necessary steps to achieve compliance.

"(8) Each recipient for which a program respecting transportation of handicapped persons is approved under this subsection shall annually certify to the Secretary that such recipient is complying with such program.

"(9) This subsection shall not apply—

"(A) to any new fixed rail system for the mass transportation of the general public which system is constructed after January 1, 1970, or to any other fixed guideway system constructed after the date of enactment of this subsection;

"(B) to the extension of any fixed guideway system for the mass transportation of the general public; and

"(C) to a replacement, major alteration, or major renovation of a station as part of a multiyear program for the replacement, major alteration, or major renovation of a usable segment of a fixed guideway system in any case in which the Secretary determines that in the replacement, major alteration, or major renovation of such segment it is technologically feasible, operationally practicable, and economically reasonable to make such station accessible or more accessible to handicapped persons, and that such replacement, major alteration, or major renovation (i) affects or could affect the accessibility of such segment, and (ii) has sufficient independent utility for the transportation of handicapped persons.".

SEC. 2. The appropriate authorizing committees of Congress shall conduct periodic oversight hearings on the effects of the amendment made by the first section of this Act, no less than annually for the first five years following the date of enactment of this Act, to ensure that such amendment is being implemented according to congressional intent and purpose. Such hearings shall include, for each such year, consideration of the effects of reducing the maximum amount of time in which service must be provided after request by a handicapped person under section 16(d)(2)(D) of the Urban Mass Transportation Act of 1964.

SEC. 3. Section 10723(b) of title 49, United States Code, is amended—

(1) by striking out "totally blind" in paragraph (2)(A) and inserting in lieu thereof "handicapped"; and

(2) by adding at the end of such section the following new paragraph:

"(3) For purposes of this subsection, an individual is handicapped if any mental or physiological disorder or condition or anatomical loss substantially limits such individual's ability to walk, see, hear, or learn.".●

A SALUTE TO THE WILLOW SPRINGS BEARS

HON. WENDELL BAILEY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. BAILEY of Missouri. Mr. Speaker, it is with a great deal of pride I tender this congratulatory address for the 12 members of the 1980-81 Willow Springs High School boys basketball team. The success of this group of athletes is unparalled in high school sports in my hometown of Willow Springs, Mo. The Bears on Saturday, March 7, 1981, reached the final game of the Missouri State class 2-A high school boys basketball championships. Although losing the title game to North Pemiscot County by a score of 51 to 49, the poise and discipline of these high school students excelled throughout the competition.

During the last 2 years, this group of basketball players have compiled a record of 55 wins and 8 losses. This record includes a third place finish in the Missouri State tournament in the 1979-80 season.

Mr. Speaker, in recognition of the Willow Springs Bears basketball team, I list below the names of the coaches, players, and managers of this superior team: Head coach, Gary Stanfield; assistant coach, Brent Colley; players: Joey Brasier, Steve Coatney, Ray Cook, Gary Godsy, Mark House, Matt James, Gary McElyea, Terry McElyea, Barry Newman, Darren Taylor, Tim Woodring, and Steve Worley; managers: Steve Bennett, Darren Brownfield, and Todd Cooper.●

NATIONAL FOREIGN LANGUAGE WEEK

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. BONKER. Mr. Speaker, as a member of the international education group formed by Representative LEON PANETTA, I would like to draw to the attention of my colleagues, National Foreign Language Week which was March 1 to 7.

Recognizing the need to correct Americans deficiency in international education, a Commission on Foreign Language and International Studies was established by Executive order on April 12, 1978. Upon reading their report, I was astonished to learn that 1 out of every 8 jobs in American industry and 1 out of every 5 jobs in American agriculture depend on international trade and yet only 1 in every 10 Americans can speak, read, or effectively understand any language other than English.

Johanna S. R. Mendelson, former director of the Joint National Committee for Languages, cogently expressed the need for foreign languages when she wrote:

A new direction for international education and foreign language studies has emerged among the educational priorities of the 80's. It is not a response to a single threat, but a recognition that America, to retain its national strength and vitality, will be faced with the challenges of economic interdependence, and political crises around the world, and whose solutions will require not the use of military might so much as a capacity to understand the languages and cultures of other global actors. Adding an international dimension to the current curriculum, courses in history, government, economics and foreign languages, will be enhanced by classes on international trade, agronomy, energy sources, and public health to mention just a few. The last decades of this century can require nothing less than an educational policy which recognizes these international needs, and chooses to deal with them as part of the priorities of this nation.

* * * foreign language training, and the study of international affairs, while long considered a basic educational priority, has never received adequate financial support or recognition as an essential component of school curriculum. At the same time, it grows more apparent that the ability to speak a foreign language and understand other cultures is an important tool in America's ability to conduct foreign policy, international trade and assess national defense. Language is a tool of communication, but it is also a source of cultural insight and understanding. Thus, the role of languages, and to Americans, the knowledge of foreign languages, will become increasingly important as the communication revolution continues to make information from other nations so accessible and as travel time to foreign countries is reduced so that the most distant foreign nation is only hours from our own frontiers.

Americans can no longer afford to live in an isolated world. As a world power and one which must become more competitive economically, our citizens must be equipped with basic language skills. One sure way to overcome existing cultural gaps between interdependent nations is to develop curriculums in our schools which encourage students to learn more about their neighbors, allies, and trade partners. This must be a national priority.●

WE CANNOT WORK TOO HARD TO IMPROVE SAFETY ON OUR HIGHWAYS

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. VENTO. Mr. Speaker, my colleague, Congressman JIM OBERSTAR, has been active in efforts to enact improved highway safety laws.

In February, Mr. OBERSTAR introduced H.R. 2052, legislation to improve the National Driver Register to assist the States in keeping bad drivers off the Nation's highways.

The February 1981 issue of Fleet Owner magazine profiled Mr. OBERSTAR and offered a summary of this legislation. I would like to share this informative and useful article with my colleagues in the House.

OBERSTAR: MAKING THINGS WORK

Even in the uncertain world of politics, it's a safe bet that the voters of the 8th District of Minnesota, which "stretches from the Canadian border clear down to the suburbs of the Twin Cities" knew exactly what they were doing when they returned Congressman James J. Oberstar (D-Minn.) to his fourth consecutive term in the U.S. House of Representatives.

Oberstar, who serves on the House Public Works and Transportation Committee and on the Merchant Marine and Fisheries Committee, is a gentleman who gets things done—quietly, deliberately, and always constructively. In fact, when an interviewer asks about his hobbies, he mentions working on repair and maintenance jobs around the house, splitting and sawing wood for the home fireplace with a bucksaw "that we just wrapped-up back in Minnesota and went from my father's farm to the airport, and brought it here," and of his great pleasure in the toil and rewards of gardening.

That same willingness to work for appropriate reward is being brought to bear on Rep. Oberstar's current legislative objective—the passage of a bill to modernize, speed up, and streamline the National Driver Register.

The NDR, which has been in existence in its old, clumsy, under-utilized form for more than two decades, was set up to provide a central listing of serious (and criminal) traffic offenders: ineligible drivers, drivers under suspension or revocation, drunk drivers, hit-and-run drivers, and drivers with other criminal traffic records. It also sought to list (and finally make illegal) the holding of multiple licenses from different states.

The old NDR collected such data from those states that wished to cooperate, and made it available to appropriate, authorized state licensing officials upon inquiry. Among its many disadvantages were: (1) at best, using the mails, an inquiring state had to wait two weeks or more for the data; (2) the data bank in Washington, administered by NHTSA, required constant updating from input by the various states; (3) by law, it could be employed by an inquiring state license authority only for the purpose of license issuance and renewal.

Back in 1977, Oberstar introduced a statute to try to bring the NDR into a more useful and effective state, but states' concern about cost, logistical problems, and individual prerogatives prompted postponement of the bill and a one-year DOT study of the entire problem.

With all that behind him, Congressman Oberstar sat amid the packing boxes and the bustling activity of his staff early last month and talked about the bill he will introduce now. (Thanks to his seniority, he has moved to a corner office in the Rayburn Building, but phone installations, placement of furniture and disposal of files still takes planning plus muscle.)

The new NDR, if the bill passes, will answer most of the complaints against the older version, and stands an excellent chance of eventually making the register an effective weapon against "the killer driver" (see "The Editor's Page" FO—1/81 and 5/80).

While the final draft was not yet written at the time of Fleet Owner's interview, the basics of the Oberstar bill will set up an online computer link among the 50 states and the NDR computer in Washington (with the help of federal funds); and eliminate the waste of duplicate (and possibly outdated) records in Washington by the institution of a "pointer" system that would direct an inquiring state to the state or states that had the requested data on file.

A minimum of data would appear in the Washington file: Name, state(s), social security number, and height, weight, and color of eyes.

Thus, a licensing authority in an inquiring state would ask the NDR computer for information on "John Doe." If the driver in question had convictions in one or more states for the designated offenses, the NDR computer would direct the inquiring state authority to the states that had reported having records on Mr. Doe. Time consumed: seconds, rather than weeks. Duplication of data and compilation of a "big brother" file: none. In fact, the Oberstar bill also provides for virtually immediate purging from the NDR list of names of drivers who have regained compliance with state laws.

That, too, says something about the way Oberstar works. He is and has been extremely conscious of any threat to individual privacy that might occur in the drafting of the bill. "Right now," he says, "It's getting a meticulous going-over by committee counsel to make sure it conforms to the federal privacy act." But he also notes, "It's hard to see how privacy is too great a question since we're dealing with people whose offenses are a matter of public—if not criminal—record."

Withal, Oberstar's experience includes acquaintance with the axiom, "Politics is the art of the possible." He planned to circulate the final draft to his colleagues on both sides of the aisle, and write to certain of his Congressional colleagues to invite co-sponsorship. "I see this as a completely bipartisan issue," he says.

The congressman, a genial, blond-haired man of medium height, comes by that broad view of life and politics honestly. While he's a small-towner ("I've been lucky, and done some things this boy from Chisholm never dreamed he'd do."), he was educated both here and abroad, and has lived in foreign cultures. He holds a bachelor's degree in political science from the College of St. Thomas, in St. Paul, Minn., and a master's degree in government from the College of Europe, in Bruges, Belgium, where he also minored in French. Those combined backgrounds led to a job in Haiti—teaching French and English—when he finished his schooling. Later, when he was about to leave for work in Africa on a Ford Foundation program, he stopped by the office of his congressman, Rep. John Blatnik, of the 8th District, in June 1963. Jim Oberstar didn't get to Africa that time. He joined the staff of Rep. Blatnik, subsequently became his administrative assistant, and, when the congressman retired, ran for his office (without regular party backing) and won.

Rep. Oberstar, who is a friend of Ken and Fran Nathanson, officers of "Citizens for safe drivers," a Washington-based organization that strongly and effectively campaigns for NDR, shares the Nathansons' concern for a more effective system.

"I wouldn't be surprised," he says, "to see the greatest benefit of the improved NDR come from its 'preventive' function. After all, if a driver with a bad record is asked by the fleet that is about to hire him to request his own records from NDR—and if he knows that the record will expose him—he won't be seeking a fleet driving job."

With regard to other transportation legislation, Oberstar also has some strong feelings.

Of the Motor Carrier Reform Act he says, "It's a major piece of legislation by the 96th Congress. Now, the challenge to the 97th Congress is to oversee its operation and conduct the oversight hearings we promised, and to make whatever adjustments that are proved to be necessary. After all, the act, like virtually every other act, is a series of compromises. We can't expect all those compromises to be equally desirable."

Of the state of highways: "I'm disturbed by the threatened cutbacks in the highway program that have been indicated by some members of the Reagan transition team. Our highways are the unique link that binds America, and their maintenance is a principal challenge to keeping both urban and rural America vital." Those highways, he points out, are also tied to the economic growth that the incoming administration seeks. He also notes that the Carter Administration withheld more than $1 billion of authorized highway funds of the $10 billion that exists in the Highway Fund.

While those concerns will occupy much of the congressman's time, he will also share it with his home and gardening work, and with his family. Jo, his wife, is a writer and mother of young Ted Oberstar, 12; Noelle, 11; Anne Thérèse, 7; and Monica, 5. Noelle, on a day off from school, was helping her father's staff move into the Rayburn Building office in early January. Dashing about in maroon corduroy slacks and yellow teeshirt, she went—with a total lack of self-consciousness—from courteous reserve as she was introduced to a stranger to the ebullience of a setter pup as she was invited to pitch in with the staff's unpacking chores.●

SUPPORT FOR MULTIPLE USE OF PUBLIC LANDS

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. RUDD. Mr. Speaker, the Federal Government controls over 80 percent of the land in the State of Arizona, and is thus our largest tenant. In concurrence with the President's commitment to reducing Federal control

over State and local matters, I believe the Federal Government should step back and heed the good advice offered recently by the State of Arizona Department of Mineral Resources Board of Governors. The board has unanimously urged the pursuit of a land management policy of multiple use, which I wholeheartedly support.

I wish to share their good advice with my colleagues at this point in the RECORD:

The resolution follows:

RESOLUTION

As a general principle, the Board of Governors of the Department of Mineral Resources supports multiple usage of any public land. Secondly, a mineral and water inventory must be taken before there are any permanent withdrawals into wilderness areas or any other restricted use areas.

Any proposal for withdrawal of public lands from multiple usage shall be supported by a sociological, economic impact statement, showing an analysis of the cost-benefit factors involved, and taking into account the effect on national security by the withdrawal of any potential strategic mineral resources.●

ANTI-SEMITISM IN ARGENTINA

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. HARKIN. Mr. Speaker, I would like to bring to the attention of my colleagues a recent article by Rabbi Morton Rosenthal, director of the Latin American Affairs Department of the Anti-Defamation League. He vividly reminds us of the continuing problem of anti-Semitism in Argentina and the inadequate human rights situation in that country.

I hope Rabbi Rosenthal's remarks will remain with us as the United States continues to grapple with the future of our human rights policy and the wisdom of supporting regimes as the one currently in Argentina.

I enter into the RECORD Rabbi Rosenthal's article "Argentine Anti-Semitism, Again" which appeared in the ADL Bulletin, the national publication of the Anti-Defamation League of B'nai B'rith in January:

ARGENTINE ANTI-SEMITISM, AGAIN

In the wake of the ominous resurgence of overt anti-Semitism in Argentina since July, 1980, there has been growing concern about the role and responsibility of the Argentine government in this sordid affair.

The outbreak of anti-Semitism, which paralleled similar events in Europe, followed a period of relative calm since October, 1979, when a bomb exploded at the Rabbi Guertzenstein Seminary causing considerable damage. Fortunately, the students were on vacation for the High Holidays, thus avoiding death and injury to many of them.

But after a nine month hiatus, a powerful explosion ripped through the O.R.T. Technical School in Buenos Aires during the first week of July. A second bomb, at the Bialik Central School, was found and deactivated. A month later, another bomb caused extensive damages to the Jerusalem Synagogue and its affiliated school. At the same time, numerous threats by telephone of bombs and of physical violence against individuals spread fear among members of the Jewish community. School principals were repeatedly forced to evacuate their students; fearful parents organized vigilante groups to stand 24-hour watch at Jewish school buildings.

D.A.I.A., the representative body of Argentine Jewry, appealed to public opinion and government authorities in an effort to halt the wave of terror. On July 9, it denounced the bombing of the O.R.T. school as a symptom of the recrudescence of "dark criminal forces of hatred and racial violence." On August 13, D.A.I.A. issued another public protest expressing "profound concern" over the escalating anti-Semitic violence evidenced by "a third bomb attack against Jewish schools in the short period of something more than one month."

In an urgent telegram, the D.A.I.A. asked the Minister of Education to guarantee the continuity of educational activity in Jewish schools. The Chief of Federal Police, who met with the Jewish spokesmen, promised to investigate the bombings. The D.A.I.A. leaders also asked that he halt the proliferation of anti-semitic and Nazi literature, which has become available at most bookstores and news stands in the capital.

Since the assurances of the police chief proved worthless, the Jewish leaders then secured an appointment with the Minister of Interior, General Albano Harguindeguy, who promised that the government would take steps to identify those responsible for the "attacks and threats against Jewish institutions" and to "avoid their recurrence." His assurances, however, also turned out to be of little value. Nobody was arrested. Nazi books remained on sale at the newspaper stands, and several serious incidents occurred in October.

In an act that D.A.I.A. denounced as "irrational violence motivated by a morbid anti-Jewishness," 70 tombstones were desecrated and destroyed at the Liniers Jewish Cemetery on October 20. A week later, Enrique Llamas de Madariaga, the host of the prime-time "Videoshow," used an interview with an Argentine Jew as a vehicle for spewing anti-Semitism over the airwaves. Through his questions and comments, he sought to portray the alleged moral defects of Jews by evoking the classic anti-Semitic stereotypes. The miserly Jew: "Why is it that Jews are so greedy?

. . . Why are there no poor Jews?" The disloyal Jew: "What are you first, Argentinian or Jew? . . . I don't know if there were as many Jews concerned for the victims of the earthquake in Argentina as contributed money during the Six Day War." The oppressing Jew: "Why don't you give land to the Palestinians? . . . For you Israel is the light; for me the Vatican. But the Vatican is not a belligerent state, like Israel."

The enormity of the anti-Semitic actions in recent months has evoked significant protest in the Argentine press. La Prensa, the country's most prestigious paper, stated: "We are forced to the conclusion that in our country we are experiencing a new outburst of Anti-Semitic activities such as we had sporadically in recent years." El Litoral of Santa Fe, in an editorial, called upon police officials "to halt the alleged and secret anti-Semitic plot . . . which is repugnant to popular sentiments and contrary to the institutional bases of the Republic." Clarin of Buenos Aires called for drastic reaction against such "racist expressions which sicken the Argentine consciousness."

IS THE GOVERNMENT RESPONSIBLE?

The Buenos Aires Herald has pointed to governmental responsibility for much of the anti-Semitism during the past four years. In an editorial on August 31 entitled "Disquieting Symptoms," it referred not only to the recent bombings of Jewish schools but to other anti-Jewish manifestations: the exclusion of Jews from positions of prominence, the fact that Jews in prisons are subjected to more severe mistreatment than Gentiles, and the fact that individuals stripped of their citizenship by the present government are mainly Jews. These facts, stated the editorial, are seen as "evidence of anti-Semitism in high official places."

La Presna's editorial cited governmental responsibility for "imprudent measures and actions, which neither rectify nor clarify, having emanated from official circles, causing us to be portrayed overseas in an equivocal attitude."

The Jewish weekly Nueva Presencia had a lead article on October 31, titled "Suspicious Impunity," which also linked the government to anti-Semitism. It alerted the Jewish community of Argentina to the potential danger of their being used as scapegoats for the severe economic and political crises the country is presently experiencing.

Objective analysis of the record during the past four years shows that the government has failed to prevent anti-Semitism when it could readily have done so or to punish those responsible for it. A prime example is the "Videoshow" broadcast, referred to above. It had been taped prior to broadcast on the government-owned station and submitted for approval to the government censor. Presumably it was also seen by Rev. Eduardo Vicente Miras, the priest appointed in August as "ecclesiastical counselor" to Channel 9, on which it was viewed. Nonetheless, the broadcast was made and Mr. Llamas de Madariaga was not charged with any wrongdoing. In the words of Rabbi Marshall Meyer of Buenos Aires: "I can think of no other country in the western world where such an interrogation could take place on the publicly-owned media—or, for that matter, on the privately-owned media either."

The problem is exacerbated by the proliferation of Nazi books, which help create a moral climate conducive to cemetery desecrations and other anti-Semitic activity. Only occasionally have the authorities reluctantly moved to ban the publication and sale of such books. It should also be noted that their efforts have been far less systematic and severe than those they have directed against leftist literature, which is not permitted to be sold in Argentina.

Less visible, but equally serious, is governmental complicity in what occurs behind prison walls and in security centers, where, generally immune to the light of publicity, Jews are singled out for special treatment. The ADL, Amnesty International, The Council on Hemispheric Affairs and other human rights groups have received first-hand confirmation of the fact that Jews are subjected to more inhumane treatment than are non-Jews.

One young man, for example, reported that in La Plata prison officials had apparently been indoctrinated in anti-Semitism as part of their training program. They frequently vented their anti-Jewish feelings

through vicious beatings and psychological abuse of Jews. On a certain occasion, an interrogator, he recalled, pulled out a swastika that had been hanging on a chain around his neck and dangled it in front of the young Jew's face, screaming: "We know you are Jewish, look who we are!"

Former prisoners report that large photos of Hitler, Nazi flags and music can be found throughout the state security system. Nazi methods are widely used to destroy the prisoners' self-esteem: "Whereas all the other prisoners were called by name, I was called 'la judia'" (the Jewess), related one of the survivors. Like many others, she asked that her name not be used because of fear of reprisal against family members still living in Argentina.

But not all who have emerged from the penal compounds have wrapped themselves in anonymity. Ana Maria Carreaga, a young non-Jewish woman, described her encounter with anti-Semitism in an Argentine concentration camp as something she would never forget. "Once we heard a dog barking in the corridor and someone ordering him back and forth and to wave his tail. We thought it really was a dog. But no, it was a human being, a young man who had to pretend to be a dog because he had committed the crime of being Jewish."

These events need to be viewed in the larger context of the international community's condemnation of Argentine human rights violations. The 10th General Assembly of the Organization of American States, meeting in Washington, considered, among other matters, the 266-page report of the Inter-American Commission on Human Rights documenting Argentina's dismal human rights record.

The Commission concluded that Argentine government authorities have violated human rights on a major scale "by means of the systematic use of torture and other cruel, inhuman and degrading treatment" and that they have "killed numerous men and women subsequent to their being placed in detention."

While in Argentina, the Commission made a special investigation of numerous allegations of anti-semitism which it had received. Although it found "no systematic overall policy of anti-Semitism by the Argentine government," the Commission concluded that, despite this, "Jews arrested by the authorities receive more severe treatment than do others."

The Argentine security forces take great pride in having successfully repressed acts of leftwing terrorism which were part of the social fabric in the 70's. Disinterested observers could anticipate that the now well entrenched security forces could effectively deal with rightwing acts of anti-Jewish terrorism.

Their failure to do so is additional evidence that the military government of Argentina, whether by acts of omission or commission, is responsible for anti-Semitism. Whether it will fulfill its duty to the Argentine Jewish community, by enforcing existing laws against anti-Semitism and fostering public recognition of Jews as full citizens of Argentina, remains a moot question.●

HAPPY 25TH ANNIVERSARY SALUTE TO ROSEMONT, ILL.

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. HYDE. Mr. Speaker, on Saturday, March 21, 1981, the village of Rosemont, Ill., will recognize officially its 25th anniversary at a gala celebration at one of the village's own monuments—the O'Hare Exposition Center.

Originally granted incorporation on January 20, 1956, the small municipality has used the talent and commitment of its residents and the foresight of its elected officials to become a model of efficient municipal management and a village that continually makes overwhelming progress.

In the past 25 years, Mayor Donald E. Stephens has guided the village from the days when it was only a homeowners' association plagued with floods on its tiny parcel of land, to become a major hub of convention, meeting, transportation, industrial, business, and entertainment activities—all located on 2½ miles of land resting between the city of Chicago and O'Hare International Airport.

Mayor Stephens and other village officials are to be applauded and commended for their outstanding service. Village trustees are unified in their dedication to progress. They include: Lorraine Clemmensen, board member for 8 years; Stephen Giles, Jr., board member for 22 years; Chester Kolaski, board member for 8 years; Hubert Langer, board member for 10 years; Steve Minale, board member for more than 9 years; and Leslie Scott, board member for 6 years.

The village's department heads are to be congratulated for their services: Toma G. Brashear, executive director, Rosemont/O'Hare Convention Bureau; Vito Corriero, superintendent, public works; Richard V. Drehobl, director, public safety; Deputy Mayor Anthony D. Esposito; James Freeman, manager, O'Hare Exposition Center; Ray Gold, finance officer; Jack Hasselberger, chief of patrol; Gary Hopkins, chief, fire suppression; Joe Rizzo, health officer; Anthony Rossi, village architect; August Sansone, purchasing coordinator; Isabelle Seib, receptionist; and Frances Stevens, village clerk.

Thomas J. Burko, village special counsel, and the law firm of Ancel, Diamond, Glink, Murphy & Cope, village legal counsel, have given the village outstanding service.

Also to be commended are the village's park board and school board members. Rosemont park board members include: President Ralph Dolce, Frank Bellissimo, Diane Frank, Camille Giuliano, and Jack Miller.

Rosemont's hardworking and effective school board members include: President Roger Kubitz, Mark Daly, Art Deutschman, Howard Lindberg, Scott Nelson, and Merlin Schultz.

The efforts of these dedicated public officials and many residents of the village have resulted in spectacular achievements for a town with a population of less than 5,000. These include:

Creating and making a success of the Nation's newest indoor stadium—the 18,000-seat Rosemont Horizon;

Creating and making a success of the award-winning 240,000-square-foot convention center—the O'Hare Exposition Center;

Constructing and administering an outstanding school—the Rosemont Elementary School, District 78;

Planning and building an expansive park district for the village which includes four parks, an Olympic-sized swimming pool, and a building with tennis and racquetball courts;

Planning and constructing a senior citizens complex, which includes eight buildings with 155 apartment units—rented to seniors at reduced rates, a 5,376-square-foot senior citizen recreation center, outdoor gazebos and landscaped walking areas, a recreational budget for the senior citizens club activities, and a new paramedic center located in the middle of the seniors' campus;

Plans for a new theater and a $31 million redevelopment project that includes a 1-million-square-foot shopping center which will create more than 6,000 new jobs, in addition to increased revenue, for the village.

In a day and age when we hear repeatedly of the myriad problems of many communities, we have in Rosemont a municipality with more solutions than problems. Rosemont has the lowest property tax in Cook County and plans to make it lower. Its assessed valuation is more than $100 million currently. Rosemont has an incredibly low crime rate among its residents—less than 1½ percent. Rosemont has guaranteed future income in the revenues which will be collected from its stadium, exposition center, and shopping center.

If a community or an institution can be said to be but the lengthened shadow of one man, then for Rosemont, that man is Mayor Don Stephens. His vision, his energy, and his faith have set a standard of excellence few can match.

Mr. Speaker, I know my colleagues join me today in saluting the village of Rosemont and Mayor Stephens for using ingenuity, imagination, and initiative to create an outstanding community. We wish Rosemont a very happy anniversary and many, many more years of prosperity and success.●

A CRITIQUE OF THE AUTOMOBILE INDUSTRY IN THE UNITED STATES

HON. ELWOOD HILLIS
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. HILLIS. Mr. Speaker, today Congressman WILLIAM BRODHEAD and I are releasing a report entitled "A Critique of the Autombile Industry in the United States: A report by the Congressional Auto Task Force." The report examines the auto industry over the last 10 years and in particular the events which led up to the near collapse of the industry in 1979 and 1980. The following is a summary of that report.

SUMMARY

During the last two years, the U.S. automobile industry has suffered one of its worst periods ever. This slump is obviously more than a cyclical downturn in automobile and truck sales which can be expected to occur periodically. Twenty-one hundred domestic car dealerships and 140 domestic supplier plants have gone out of business. Sales of U.S.-made cars and light trucks are at a 20-year low. Unemployment within the industry is near 200,000. Although some of this unemployment will be temporary, tens of thousands of jobs have been lost permanently.

Imports, particularly from Japan, have increased substantially and now account for over one out of every four cars sold in the U.S. The market penetration of imports has risen 10% in just two years (from 17.6% in 1978 to 27.3% in 1980). Further, the Japanese are in a position to not only hold their current share of the market, but to increase it even further in the next few years.

Profits of the four major U.S. manufacturers (GM, Ford, Chrysler, and AMC) have dropped sharply. The Chrysler Corporation has lost money in five of the last seven years and was able to avoid bankruptcy only through intervention by the federal government. Ford has failed to produce a profit from its U.S. sales since mid-1979. AMC has been able to survive only through substantial capital investment by Renault, which is owned solely by the French government. Even General Motors, the largest auto manufacturer in the world, lost money in 1980.

Perhaps the most alarming fact of all is that in 1980, for the first time in history, the U.S. was not the leading producer of automobiles. Last year Japan produced 3 million more units than the U.S.

To understand why the U.S. has lost its leadership in automobile production a careful review of the last decade is necessary. The 1970's saw a sudden and dramatic change in the entire worldwide automobile industry. In the early and mid-1970s, U.S. cars were being equipped with engines with displacements as large as 500 cubic inches. In 1970, gasoline sold for about 30¢ per gallon in the U.S.

Then, in October 1973, the OPEC nations flexed their muscles for the first time. The price of gasoline shot up to over 50¢ per gallon almost immediately. Gas shortages were common in many urban areas. Some states had to resort to "rationing" gasoline by allowing motorists to purchase gasoline only on even or odd days of the month—depending on the last digit of the license plate on the car.

By 1974, energy had become the most important issue facing the nation. President Ford urged Congress to develop a national energy policy. Unfortunately, speculation that the energy shortage was entirely contrived by the "Big Oil Companies" was increasingly accepted as fact.

In 1975, Congress passed its first major energy legislation: the Energy Policy and Conservation Act. That act is best remembered for two major provisions. First, it required that U.S. manufacturers increase the fuel-efficiency of cars. This was accomplished by establishing "fleet averages" for fuel efficiency. By 1985, U.S. manufacturers were to achieve a fleet average of 27.5 m.p.g.

The second major provision of the Act mandated the regulation of the price of petroleum and petroleum products. It was feared that, without federal regulation, oil companies would increase prices to artificially high levels and reap huge profits. The result, however, was to keep the price of gasoline artificially low and thereby encourage consumption.

As a result of the Energy Policy and Conservation Act of 1975, U.S. automobile manufacturers started a ten-year, multi-billion dollar effort to improve the fuel efficiency of cars. Yet the American consumer, reacting to low gasoline prices and ready supplies, continued to prefer the larger, less fuel-efficient cars.

The events of 1979–1980 can be explained as a confluence of many factors climaxing during this period.

In April 1979, the second major disruption of energy supplies occurred when Iran curtailed shipments of petroleum to the U.S. because of American support for the Shah, who had been overthrown in February.

Throughout 1980, the U.S. economy was in a recession. Unemployment rose, and interest rates and inflation reached record highs. The Consumer Price Index rose at a 20% rate in some months and interest rates set record heights, hitting a prime rate of 20% at one point. Consumer confidence and purchasing power dwindled.

It was not until the price of petroleum (and thus gasoline) was decontrolled in January 1981 that the U.S. government adopted a realistic policy toward the price of gasoline. Because the U.S. price of gasoline was kept below the world price, American consumers had lacked the necessary incentives to give up what had been a status symbol—the large fuel-inefficient automobile.

A second problem for the industry during the 1970's was federal regulation which forced automobile manufacturers to spend billions of dollars to improve the safety, pollution controls, and fuel-efficiency of the automobile. The cost of meeting all of the federally-mandated regulations reduced the profitability of the auto companies, particularly when sales began to fall.

Japanese auto manufacturers were able to take advantage of the changes in consumer demands because, in order to meet their own market conditions, they had already fully developed high-quality fuel-efficient cars. Further, due to higher productivity, a more favorable corporate tax structure, and stronger government support through the central bank of Japan, the Japanese have been able to modernize their manufacturing facilities more quickly than U.S. companies.

While the number of imported vehicles increased by 10% between early 1979 and 1981, almost all of that growth came from Japanese manufacturers.

Japanese manufacturers for years have enjoyed a substantial advantage over American companies in labor cost. While wage comparisons are difficult due to currency fluctuations and to the higher fringe benefits in Japanese auto manufacturing, the Japanese pay only slightly more than half what American auto workers are paid.

The Japanese have developed government policies which insure continued growth. Over the last decade, their growth in productivity has exceeded that of the United States. Therefore the growth of the automobile industry in Japan can be partly explained in terms of a more favorable economic environment.

As auto imports have increased since 1970, so has the number of Americans who depend on the import market for employment. Today there are tens of thousands of Americans who are employed in importing, selling, and servicing foreign-made cars and trucks.

The future of the U.S. auto industry is marked by uncertainty. With the situation in the Middle East remaining unstable, it is possible that events in that part of the world may lead to new shortages in gasoline and dramatic price increases. Regardless of what happens in the Middle East, the Department of Transportation estimates that the price of gasoline can be expected to increase (in current dollars) to over $3 a gallon by 1990. This will increase the demand in the United States for even more fuel-efficient automobiles.

The biggest change in the automobile industry in the 1980's may be in the production process. The internationalization of production facilities will mean that large corporations will mass-produce component parts in several countries. These parts will then be shipped to other nations for final assembly. By creating this global system of production, corporations will be able to meet local content requirements and take full advantage of economies of scale.

Through a combination of international production facilities and a worldwide demand for fuel-efficient cars, automobiles will become more homogeneous, with only slight differences between cars sold in Europe, Asia and the United States.

Any recommendations made to help the automobile industry, and to bring relief to its unemployed workers, should be directed toward meeting the goal of helping the U.S. auto industry to become competitive worldwide. U.S. manufacturers must be able to develop the design, the quality, the fuel efficiency, pricing structure to meet world standards. In order to accomplish this goal:

Federal environmental, safety and energy regulations must be examined and amended in order to balance the financial capabilities of the automobile industry with the capital requirements placed upon it in meeting those regulations, while still working toward the original goals of cleaner air and greater safety;

In the absence of a negotiated agreement, the U.S. should impose limits on the number of automobile imports coming into the country from Japan;

The federal tax code must be amended to encourage increased capital investments and faster amortization of capital business expenses;

Federal antitrust laws should be amended to allow U.S. automobile corporations to share newly-developed emission control, safety, and fuel-efficiency technology; and

Comprehensive programs to improve the economy must be enacted in order to im-

prove the confidence and purchasing power of the American consumer and reduce the cost of credit.

These recommendations will require a coordinated and comprehensive policy developed by the Congress and the Reagan Administration working with the auto industry and its unions.●

TRIBUTE TO TOM IORIO

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 11, 1981

● Mr. GARCIA. Mr. Speaker, I was not available earlier during the special orders regarding my good friend Tom Iorio. When I first came to Congress, Tom was a friend indeed. He guided me as it relates to understanding the significance of particular votes and generally guided me in the proceedings here in this Chamber.

As a fellow New Yorker, I am particularly grieved by his passing, and share with my fellow colleagues the sorrow so elegantly expressed earlier.●

CHILD NUTRITION

HON. SHIRLEY CHISHOLM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mrs. CHISHOLM. Mr. Speaker, chapter VII of the "Children's Defense Budget: A Response to President Reagan's Black Book" describes and analyzes the impact on the proposed budget reductions on the child nutrition programs. These programs include free lunches, snack programs at nursery schools and daycare centers, and reduced milk prices for schoolchildren.

A budget cut in child nutrition programs will eliminate many children who currently participate in the programs making them economically infeasible for most schools to operate.

Chapter VII is the final chapter in the Children's Defense Budget; and while groups such as CDF do not deny that the country has severe economic problems, many of these advocates of the poor maintain that the way to address the Nation's economic problems is not by eliminating programs so vital and essential to the well-being of our children. This is the point that CDF has tried to make in this budget and one that I hope my colleagues will keep in mind when deciding which of the many federally funded programs are expendable:

CHILD NUTRITION

Many poor children eat school lunch. In 1980, about 38 percent of all school lunches were served free to children whose families were below 125 percent of the poverty level ($10,270 annually). Another seven percent were served at reduced prices to children whose families fell between 125 and 195 percent of the poverty level.

Despite the Administration's claims that it is protecting children receiving free lunches, in reality all children now eating school lunches are threatened. The cuts proposed for the entire school lunch program are so deep that a number of schools may be forced to drop out of the program. In the process, needy children will lose access to school lunch. The proposed increase in costs to children of near poor working families will make school lunch prohibitive to many.

Cuts in the child care feeding program will diminish the food available to very young children in child care centers. It is difficult to claim that cutting close to $1 billion out of approximately $4.5 billion for child nutrition programs will not affect all recipients.

WHAT IS BEING PROPOSED BY THE REAGAN ADMINISTRATION

Proposed major cuts included	Estimated savings
1. A reduction of 37¢ a meal to support reduced-price meals.	Over $100 million.
2. A reduction of 18¢ a meal for "paid" meals served to children from families above 185 percent of poverty.	Over $400 million.
3. Expanding and making permanent $400 million in cuts that are now effective for FY'81 only, including 4½¢ in reimbursement reduction for free, reduced, and paid meals served at most schools, lowering eligibility for reduced-price meals, and adjusting reimbursement rates for inflation once a year rather than twice.	About $400 million.
4. Major reductions in reimbursement rates for child care centers participating in the Child Care Food Programs. Reimbursement rates in this program are tied to the school lunch reimbursement rates. When the school lunch rates are cut, so are the child care rates.	Uncertain.
5. Elimination of meal supplements (or snacks) from the Child Care Food Program.	About $65 million.
6. Verification of 10 percent of all applications for free and reduced price school meals by schools.	Uncertain.

WHAT IS THE IMPACT OF THE REAGAN ADMINISTRATION'S PROPOSALS

Schools may drop out of the program

Department of Agriculture studies show that each 1¢ increase in school lunch prices leads to a 1 percent drop-out of paying children. If large numbers of children drop out, the "unit cost" of producing each meal rises due to the loss of volume. Schools could then have significant difficulty in keeping their school lunch programs solvent. Consequently, numerous schools may be forced to drop out of the school lunch program if the Reagan Administration proposals are adopted. When schools drop out of the program, the poorer children are denied free meals.

Poor working families will suffer

The reduction of 37¢ a meal for reduced-price meals would be in addition to a 10¢ per meal reduction Congress implemented last session. The combined cuts would result in the price of school lunches to "near poor" children jumping from 10¢ before January 1, 1981 to about 60¢—a six-fold increase within one year. This will mean that some children simply leave the program. Other families will have to dig deeper into scarce resources so that their children can have lunches.

Child care center budgets will be slashed

Reimbursement for meals at many child care centers would be sharply reduced, including centers where a majority of the children are poor, since the rates are tied to those for school lunches. Support for meal supplements (or snacks), which constitute nearly half all meals served in child care centers and homes, would be completely eliminated. These snacks are nutritious, including milk or juice, bread, or similar items. Because young children cannot eat large quantities in one sitting, snacks are an excellent way to add important nutrients to their daily diet. Total elimination of all federal support for snacks will thus directly affect poor children and the centers serving them. Despite the Administration's claim that Head Start Centers will not be cut, this proposal would have a significant impact on their fragile budgets which also depend on the Child Care Food Program.

Administrative burdens for schools will increase

The proposal that schools verify 10 percent of all applications for free and reduced-price school meals would place major administrative burdens on schools without any evidence that it would save money. The Administration assumes a $75 million cost savings from this proposal despite past claims by the Department of Agriculture that such a proposal might actually increase costs.

Congress has just appropriated over $1 million for the Department to pilot test different approaches to verification to determine if it is cost-effective. It makes little sense to mandate verification before the tests are conducted.●

TRIBUTE TO THOMAS D. IORIO

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 11, 1981

● Mr. MAZZOLI. Mr. Speaker, I would like to join with my colleagues in the House of Representatives in paying tribute to Mr. Thomas D. Iorio, the former Deputy Sergeant at Arms of the House of Representatives, who died recently of lung cancer.

Tommy was more than a valued, loyal employee and officer of the House. Tommy was an institution.

He was always there to help when needed. He was particularly helpful to me during my early years in the House. He knew how the place operates and he was never too busy to give useful advice to a new Member.

His presence will be sorely missed by all of us who knew him and cherished his friendship.

I extend my deepest condolences to his family.●

BLUEPRINT FOR A HOUSE THAT WORKS: PART II

HON. TRENT LOTT

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. LOTT. Mr. Speaker, last Wednesday, March 4, I introduced House Resolution 100, the Committee Improvement Amendments of 1981, a package of seven House rules amendments aimed at making our committee system more efficient, manageable, and representative. I have since circu-

lated a colleague letter soliciting cosponsors, and will reintroduce the measure on April 15. In the meantime I direct the attention of my colleagues to my special order in the March 4 CONGRESSIONAL RECORD, beginning at page H785, in which I give a detailed explanation of my resolution and insert its text. I urge my colleagues to cosponsor this resolution.

Mr. Speaker, the central thesis behind my effort is that the congressional reform movement of the last decade has so dispersed powers in the House that we are today nearly powerless. With tangled committee jurisdictions, proliferating subcommittees, exploding staffs, and miniquorum and proxy voting rules, we are on the verge of legislative paralysis. Our House just does not work anymore. What is needed is a "Blueprint for a House that Works," a plan that will strengthen our committee system and make it possible for Members once more to carry out their legislative responsibilities in a conscientious manner. My committee improvement amendments address this problem by reducing the number of subcommittees and Member assignments, requiring fair party representation on committees, eliminating proxy voting and restoring majority quorums, strengthening our oversight procedures, eliminating joint referral of bills, and adopting an overall ceiling on committee staff at the beginning of each year.

Mr. Speaker, in this regard I was pleased to read the February 23 Time magazine "American Renewal" project. In its section, "To Reform the System," Time notes, as I have, that, "In fact, some of the problems afflicting the system today derive from various reforms undertaken—with the best of intentions—during the past decade." The article goes on:

These were primarily liberal reforms, designed to improve the way Presidents are elected and the way Congress deals with legislation. The chief target was "the bosses," the chief goal a more open political process. Only now that bossism has been largely overthrown can it be demonstrated that the party bosses performed a valuable function after all, that they were a corrupted form of a system known as representative democracy and that the new vogue for various forms of "direct" democracy could itself become undemocratic.

In its section on Congress, entitled, "The Cave of the Winds," Time recounts how our committee system has gotten so out of hand that, "there were 210 separate legislative entities in the House last year; out of 334 Democratic Members of the House and Senate, all but about two dozen were chairmen of something." The article goes on to note that congressional staffs have grown from 6,650 in 1960, to 17,700 last year.

I was especially pleased to note that Time recommended three changes that are included in my committee improvement amendments. To quote from the article:

The number of autonomous subcommittees should be sharply reduced, and so should the size of congressional staffs. The Speaker should be given the authority to designate one committee as primarily responsbile for a specific bill.

Mr. Speaker, while I cannot agree with all the recommendations made in the Time article, particularly the one advocating taxpayer financing of congressional election campaigns, I think the article is an excellent overall assessment of the current state of Congress. At this point I include those portions of the Time article relating to Congress and commend them to my colleagues' attention. The article follows:

[From Time Magazine, Feb. 23, 1981]

AMERICAN RENEWAL PROJECT

If there is one political belief that Americans cherish as an article of faith, it is the belief that their system of constitutional Government is the best ever devised by the mind of man. Yet an increasing number of citizens seem to share a contradictory view—that the system is not working. The evidence takes diverse forms. There are widespread demands for several differing constitutional amendments. And after the usual blizzard of declarations that every ballot is crucial, only 53% of the eligible voters went to the polls last November, the fifth voting decline in a row.

Opinion polls, the nation's favorite medium of public confession, document the erosion of Americans' faith in their system. Pollster Louis Harris has been asking over the years how many citizens believe in a series of statements like, "The people running the country don't really care what happens to you." The number who subscribe to this "index of alienation" has climbed steadily, from 29% in 1966 to 44% in 1972 to 58% today. The University of Michigan's Center for Political Studies asks opinions on similarly glum statements: "The Government is pretty much run by a few big interests . . . Quite a few of the people running the Government don't seem to know what they're doing . . ." The alienated again rise sharply, from 19% in 1964 to almost 60% today.

Just as Oscar Wilde once remarked that the youth of America is its oldest tradition, much the same could be said of complaints about the failings of the U.S. political system. George Washington grumbled that "the stupor, or listlessness with which our public measures seem to be pervaded, is, to me, matter of deep regret." Through all the criticism, the mere fact that the system has survived more than two centuries of turbulent change is the strongest possible evidence of its solidity. While the American way of Government has repeatedly stood accused of inefficiency, the best defense is that it was not designed for efficiency but for accommodation and consensus. That, indeed, is the key to its survival.

To some extent, the faults of the system can be blamed on the men charged with operating it. And perhaps their biggest failure lately has been the inability to formulate a coherent set of national priorities. The result: enactment of muddled programs because there are no clear objectives. Democratic Congressman Richard Bolling of Missouri, who hopes to establish later this year a bipartisan blue-ribbon committee on reorganization of the Government, believes that a new national consensus has been needed ever since the basic objectives and priorities began to blur about 15 years ago. That was the time, at the height of Lyndon Johnson's Great Society flourishes, when the polls began showing that increase in public alienation. "Lyndon Johnson forgot to ask for a tax increase to pay for the Viet Nam War," Bolling says wryly, "and that was the breaking point. In the absence of a broad overall concept, people retreated to their own interests. Society became fractionalized, and the interest groups exacerbated that. No President and no Congress can reorganize the Government now without a great deal of support from concerned citizens. Big Business and Big Labor also have to come together."

But even though some of the nation's problems derive from the questionable competence of its elected leaders, and even though some derive from the general uncertainty about where the U.S. should be heading, the fundamental question remains: If a first-class leader managed to reach the White House, and if he had a clear and persuasive view of the course he wanted to set, could he provide an effective Government? Or would "the system" doom him, as it doomed more than one of his predecessors, to a single term ending in bitterness and frustration?

CONSTITUTIONAL CURES

The creators of the Constitution never claimed that the document they drafted in Philadelphia in 1787 was immune to change. Not only did Article V authorize amendments by Congress and the states, but it also promised that whenever two-thirds of the state legislatures wanted to summon a new convention, they could rewrite the whole Constitution. Thomas Jefferson thought some such revision was needed once in every generation. "Alterations may at any time be effected . . ." added Alexander Hamilton in the 85th and last of the commentaries and cajolings that make up The Federalist. "The will of the requisite number would at once bring the matter to a decisive issue."

Alterations have indeed been effected, from the Bill of Rights (adopted in 1791) to the 13th Amendment abolishing slavery (1865) to the 26th and most recent Amendment (1971) lowering the voting age to 18.* The possibility of a new convention, however, has never been fulfilled. There have been attempts made—scores of them. In the early years of this century, 26 states petitioned for a constitutional convention to outlaw polygamy. In the past few years, 30 of the necessary 34 states have petitioned for a convention to require balanced budgets.

The founding fathers not only did not design a blueprint for the America of 1980 but had not the faintest idea what it would be like. Where the White House now stands, there were only a few empty meadows upstream from the barnyard where George Washington tried to breed new varieties of mules; Ronald Reagan's smog-filled Los Angeles was a tiny settlement of Spanish friars surrounded by thousands of miles of wilderness. The principal danger envisioned by

*There are fairly clear patterns. Of the twelve Amendments passed since 1870, six broadened the vote in various ways, three regulated technical aspects of the presidency, two began and then ended Prohibition and one permitted the progressive income tax.

those squires and merchants who had rebelled against King George was that of monarchy, and their remedy for that danger was the theory of checks and balances. "Ambition must be made to counteract ambition," said James Madison. The theory is reasonably sound, but as circumstances have changed and become more complex, the doctrine of separate powers can be partly blamed for the present imbroglio, a presidency unable to get any program through Congress unmauled and a Congress unable to get its wishes carried out by an entrenched bureaucracy.

Despite these shortcomings, however, radical surgery on the Constitution is not the answer. It is hard to imagine any major overhaul of the nation's fundamental charter that would not create more problems than it would solve. In fact, some of the problems afflicting the system today derive from various reforms undertaken—with the best of intentions—during the past decade. These were primarily liberal reforms, designed to improve the way Presidents are elected and the way Congress deals with legislation. The chief target was "the bosses," the chief goal a more open political process. Only now that bossism has been largely overthrown can it be demonstrated that the party bosses performed a valuable function after all, that they were a corrupted form of a system known as representative democracy, and that the new vogue for various forms of "direct" democracy could itself become undemocratic.

The founding fathers emphasized that the U.S. was a republic, which simply meant that they would bow to no king, but they had no intention of establishing a democracy, which most of them regarded as synonymous with mob rule. Thus they decreed that the President should be elected not by direct popular vote but indirectly by an Electoral College, and that Senators should be chosen by state legislatures (a method that was changed by the 17th Amendment of 1913). They did so not only because they feared the vicissitudes of what conservatives liked to call "the tyranny of the majority," but also because they wisely saw the values of circumspection and consensus. If every public issue can be submitted to an instantaneous plebiscite—a utopian (or nightmarish) possibility that cable television has now made technically possible—then there is little time and little impetus for thoughtful debate, for the analysis of dangerous consequences, or for the conciliation of opposing minorities. All of these are necessary for the formulation of policies that truly serve the public interest. All of them can best be achieved by a process known as intermediation, in which various groups of citizens and various layers of Government have an opportunity to shape and influence the raw expression of public opinion. This was one of the major purposes that the political parties once served, and that is why their influence needs to be restored in the presidential elections, in the operations of Congress and throughout the governmental process. The whole process depends on the building of coalitions; otherwise, the only rule of politics becomes the rule of every man for himself—the exact opposite of the purpose for which Jefferson said governments are instituted.

Though any alteration of the Constitution should be regarded with extreme caution, there is much else that needs to be done. Indeed, there is hardly a single element in the U.S. system that could not benefit by some serious scrutiny, some re-evaluation, some alteration.

THE CAVE OF WINDS

Most efforts to rationalize or reform the workings of Government come to an end, of one sort or another, in the wilderness of Congress. It was here, and not in the presidency, that the authors of the Constitution established the basic powers of Government. When Andrew Jackson first stated the modern notion that he represented the people, ex-President John Quincy Adams, who had been elected to Congress, shouted back from the floor of the house: "No, we are the representatives of the people!" The Constitution gives congress not only the basic authority to levy taxes and make war but also the power to reorganize—or refuse to reorganize—both the Administration and itself.

Congress has repeatedly given away its powers to importunate Presidents, then tried to snatch them back. In the Gulf of Tonkin Resolution of 1964, it told Johnson he could take any action he chose in Southeast Asia; in the War Powers Act of 1973, it told Nixon that he could not use force anywhere without its approval. All congressional efforts to assert executive authority, however, run afoul of the fact that a bicameral legislature of 535 members has difficulty making up its collective mind, particularly in tricky questions of foreign policy. Individually, too, the legislators are often vulnerable to local pressures—an outcry from Greek constituents agitated about the Turks, or New England trawlermen worried about fishing boundaries off Canada.

As with the presidential election process, a series of liberal reforms has made the problem considerably worse. Twenty-five years ago when the seniority system was supreme, Congress was ruled by a coterie of committee chairmen, many of them Southern, most of them aged and conservative, all of them proudly determined to have their own way. For all its occasional abuses, this system gave Congress a certain coherence; the White House knew whom to deal with, and the legislative leaders could speak for the membership. Today the chairmen are named by the party caucus and have to answer to their committee members—and therefore have little authority over them. Another of the reforms, however, decreed that each committee should have at least four subcommittees with independent chairmen and independent staffs. Result: there were 210 separate legislative entities in the House last year; out of 334 Democratic members of the House and Senate, all but about two dozen were chairmen of something. A related problem: the congressional staffers, accountable to nobody outside their own committees, have nearly tripled, from 6,650 to 17,700, since 1960. Their powers have grown proportionately. Smart lobbyists know that it is often as important to cultivate these virtually unknown administrative assistants as the Senators and Congressmen for whom they work, for it is the assistants who formulate many of the measures placed before the harried legislature. (The total of bills passed by the last Congress: 736.)

All the myriad subcommittee chairmen nourish dreams of getting on television, for the reforms that have brought direct democracy to the presidential process have had no less effect on Congress. Every Congressman must root around in the cabbage patch to finance campaigns that can easily cost $1 million,* and members of the House have to run every two years—which means, in effect, campaigning continuously.

Having raised their own money and defined their own issues, the new legislators arrive in Washington with understandably little loyalty to a President or party leaders who contributed less to their victories than did the host of new political action committees unleashed by the campaign reforms. Indeed, the organization to which they pay the greatest heed may well be the lobby or pressure group back home that used its money and its mailing lists to provide the decisive votes—and may do so again within a year or so. "We've got a different kind of person in the House today," says Congressman David Obey of Wisconsin, chairman of the Democratic Study Group. "Members today won't tolerate discipline. Campaign funding is dispersed and decentralized. We're being eaten alive by the single-issue groups."

The consensus of congressional leaders is that neither the House nor the Senate has the stomach for undertaking any drastic revision of the recent reforms. Still, there is considerable agreement on some things that need changing:

Federal campaign funding should apply to congressional races. All the arguments against fat-cat financing of presidential candidates apply much more strongly to congressional candidates. They have a harder time raising money and they are far more vulnerable to pressure groups. Federal financing seems a workable solution. And here, as in the presidential campaign, a portion of the federal funds should be funneled through the party organizations.

The leadership needs reinforcement. House Speaker Tip O'Neill inherited some of the powers that once belonged to the committee chairmen, but throughout the Carter Administration he had a hard time mobilizing the support for any presidential program. Here, too, the key question is money. The congressional leadership should have a strong say about how the parties reward cooperative Congressmen with federal campaign funds.

Procedures should be streamlined. The number of autonomous subcommittees should be sharply reduced, and so should the size of congressional staffs. The Speaker should be given the authority to designate one committee as primarily responsible for a specific bill. Overlapping responsibilities (the classic example: 83 committees deal with energy bills) should be eliminated.

Congressmen should serve longer terms. The Constitution makers were right in believing that the House should be closely responsive to the voters, and that the simplest way of assuring this was to have frequent elections. But the expense and effort of running for re-election are now so considerable that a term of four years instead of two is more reasonable. This would also help with another problem: Congress should plan further ahead so there is greater continuity of policy.

*The most expensive campaigns last year: in the Senate, Indiana's Birch Bayh spent $2.8 million losing to Dan Quayle ($2.1 million); in the House, California's Robert Dornan spent $2 million to win re-election against Carey Peck ($500,000).

It can be argued that such a change in congressional terms, which would require a constitutional amendment, should be accompanied by a limitation on the numoer of terms a Congressman may serve. (A one-term limit was informally imposed during the 19th century and nearly forced Abraham Lincoln from office.) The advantage of this would be the end of the notion that Congress itself is a profession or lifelong vocation. But it is probably still wiser to let the voters decide when their Representative should be retired.

ONE STEP TOO FAR

In most discussions of governmental reform, there is usually at least one voice urging that the U.S. should abandon the superannuated mystique of the separation of powers and adopt some form of the parliamentary system. That view has been vigorously presented by Carter Counsel Lloyd Cutler. In a speech delivered to the University of Texas Law School and published in Foreign Affairs, Cutler argued that the U.S. President "does not have the power to legislate and execute his program," and that only the parliamentary system enables a victorious party to "form a government."

Under the parliamentary system, a prime minister is chosen by the majority party in the legislature, which must then support the most important elements in his program. If the parliament balks at supporting the prime minister, a new government must be formed, either from within the parliament or by a new election. That system makes both a prime minister and his political party clearly responsible for all governmental policies, and it gives voters a fairly clear choice of whether to support the government or change it.

Almost every constitutional democracy established since World War II, including those launched under American auspices, has relied on this model more than on the U.S. system. But these nations have all found, in due course, that the parliamentary system also has its problems: it tends to create unstable, multiparty coalitions, and thus a relatively weak executive; and it offers no mechanism for correcting the malfunctioning of parliament itself. The French, after a chaotic swirl of 26 powerless parliamentary Cabinets in 13 years, junked the Fourth Republic in order to create the more American-style "presidential regime" proposed by Charles de Gaulle. It is a hybrid of this type that Cutler suggests. Specifically, he offers as an agenda:

(1) That the President and members of the House be elected to simultaneous four-year terms on an unsplitable ticket. This idea, which has been urged by Representative Jonathan Bingham of New York, would theoretically tie the legislators more closely to the winning President, but the benefits remain problematic.

(2) That the President draw 50% of his Cabinet from Congress, and that these appointees retain their congressional seats. Having officials in both branches of Government, now forbidden by Article I, Section 6 of the Constitution, would "tend to increase the intimacy between the Executive and the legislature and add to their sense of collective responsibility." Dual service, however, would also split the loyalty and therefore the effectiveness of the Cabinet-Congressmen.

(3) That the President be authorized to dissolve Congress once in his term, and call for new congressional elections. Congress similarly might be authorized to demand a mid-term presidential election. Either measure would greatly increase the instability of the system.

These suggestions have generally been regarded as impractical, both because of their nature and because of the number of constitutional amendments involved. The most fundamental objection, though, is to the parliamentary system itself, which works much better in a homogeneous state of moderate size than in a continental nation of increasing diversity. Congress, in particular, is so unwieldy that it is hardly in a position to take on increased executive responsibility, and presidential power needs to be reinforced, not vitiated. Basically, the road to improvement lies in making each branch work more effectively, not in blurring the distinctions between them.

A slightly less drastic step is the frequently heard proposal to limit the President to one six-year term. "No sooner does a President get into the White House than he begins thinking and acting for his re-election," says former Treasury Secretary William E. Simon, who is now engaged in a foundation study of presidential and congressional terms. "The net result of all this is to penalize the country as far as taking the tough decisions that will benefit the national interest." The argument is not persuasive. It is a misguided attempt to depoliticize the White House, to turn the President into a kind of civil servant, when the essence of governmental power is and should be political. More specifically, the question is: If a President is governing well, why force him out after just one term, and if he is doing poorly, why keep him in office for six years rather than four?●

TRIBUTE TO GLADYS SPELLMAN

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 3, 1981

● Mr. PANETTA. Mr. Speaker, I would like to take this opportunity to pay tribute to our former colleague, Gladys Noon Spellman.

Gladys was one of the most engaging and intelligent Members of this body, and it is tragic that her career has been cut short at such a young age. Her work on the Post Office and Civil Service Committee, which was of such vital importance to her constituents, was outstanding, and we will miss her knowledge in this and other areas.

While Gladys remains extremely ill at this time, I know that I express the feelings of each of my colleagues when I hope and pray for her rapid recovery. It is certainly going to be difficult for her congressional district to replace her, and we will miss her a great deal. But when Gladys recovers, we will expect to see her here often visiting her old friends.●

SPECIAL ORDER FOR THOMAS IORIO

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 11, 1981

● Mr. RUSSO. Mr. Speaker, it is with a great sense of loss that I pay final tribute to Thomas D. Iorio. What a fine gentleman he was.

The Italian American community in particular has lost a great friend who made us very proud of our heritage. His kindness, his consideration in addition to his professional achievements added to his stature. My own memory of Tom was his patience and his willingness to help bewildered young freshmen Congressmen, as I once was, to find their way around. He took the time to show you the ropes, to be concerned about you.

Through the years Tom's concern and dedication made him an outstanding Deputy Sergeant at Arms as well as a fine human being to know. We will miss him and his family has my deepest sympathy.●

SENATE—*Friday, March 13, 1981*

(Legislative day of Monday, February 16, 1981)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

The PRESIDENT pro tempore. Under the previous order, the Senate stands in recess until 12 o'clock meridian, Tuesday next.

RECESS UNTIL TUESDAY, MARCH 17, 1981

Thereupon, at 11:01 a.m., the Senate recessed until Tuesday, March 17, 1981, at 12 o'clock meridian.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. JEPSEN:

S. 712. A bill to further local and State efforts to conserve, protect, and enhance the Nation's soil, water, and related resources for a sustained agriculture, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. SASSER:

S. 713. A bill to amend the Internal Revenue Code of 1954 to provide a refundable tax credit to an employer who pays compensation to an employee for a period during which the employee is participating in Armed Forces training; to the Committee on Finance.

S. 714. A bill to amend the higher Education Act of 1965 to increase the eligibility of members of the military Reserves and of the National Guard for basic educational opportunity grants by $500; to the Committee on Armed Services and the Committee on Labor and Human Resources, jointly.

S. 715. To amend title 10, United States Code, to reduce from 60 to 55 the age at which a member of the Armed Forces may retire for nonregular service and to provide for such a reduction in the retired pay of such a member who retires before the age of 60 as may be necessary to avoid any additional cost to the United States; to the Committee on Armed Services.

By Mr. NUNN (for himself, Mr. CHILES, and Mr. SASSER):

S. 716. A bill to amend the Federal Property and Administrative Service Act of 1949 to permit State and county extension services, and any State agricultural experiment station, to obtain excess property from the United States; to the Committee on Governmental Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. JEPSEN:

S. 712. A bill to further local and State efforts to conserve, protect, and enhance the Nation's soil, water, and related resources for a sustained agriculture, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

SOIL CONSERVATION ACT OF 1981

● Mr. JEPSEN. Mr. President, I am pleased to introduce the Soil Conservation Act of 1981. This bill is meant to accomplish several objectives vital to this Nation's conservation efforts: restore vitality to our conservation efforts; bring about full cooperation among local, State, and Federal Governments, agencies, and programs; encourage and maintain voluntary participation by farmers and ranchers; provide adequate incentives to promote widespread voluntary participation; and maintain fiscal responsibility. In other words, I am hopeful that such a program, once enacted, would bring about more bang for the bucks.

Mr. President, conservation of our croplands and rangelands is nothing more than the wise and prudent use of our productive lands, so that these lands can keep producing for us and our friends and allies around the world in the years to come. Unfortunately, we have not been able to conserve these lands at a rate necessary to sustain current production levels. This is not the fault of the private farmowner or operator. I am positive that with the proper advice supplemented by educational projects and adequate incentives, 99 percent of all farmers and ranchers would conserve the soil because they love the land.

In today's marketplace, however, where many struggle just to get by, a landowner has to make an extra special financial effort to conserve his land for future generations. Land is eroding today at a tremendous rate. Studies indicate that we are losing 4 billion tons of topsoil per year on non-Federal lands; half of that involves cropland. That is way above the level at which soil can be replaced through natural processes.

Several weeks ago, I introduced a bill which provides conservation tax credits for those landowners or operators who voluntarily install and maintain conservation practices on their lands. The bill I am introducing today is an addition to the voluntary participation concept, and the proposals in it are ones which should be presented to the Senate for discussion. I am not wedded to every aspect in the bill, but I am hopeful that these provisions will provide a forum for healthy discussion on the future of our conservation programs during farm bill hearings before the Senate Agriculture Committee March 20. The four titles of the Soil Conservation Act of 1981 are as follows:

Title I, which authorizes the Secretary of Agriculture to target conservation assistance in areas of the country that have been identified as having serious erosion problems. The Soil Conservation Service initiated the practice this year, and it is imperative that we encourage them to continue targeting areas where conservation needs are most severe.

Title II, which establishes a program of matching grants for local conservation activities so that every county can establish its conservation priorities and expand its sources of assistance. Over the past few years, many States as well as local communities have intensified their interests and investments in soil conservation. In my opinion, local communities are better able to measure the needs of local landowners, who are anxious to become involved in conservation programs. Under this title, the matching grants would be handled by a board composed of soil and water conservation districts and county agriculture stabilization and conservation committees.

In the past, these two committees have proven to be extremely capable in dealing with a wide range of conservation questions within their boundaries by channeling State and Federal information and assistance to people who need it, and helping to set priorities for conservation assistance programs. Title II of the Soil Conservation Act recognizes the good work and existing capabilities of these two committees. At the same time, it would provide greater coordination between these important groups in the future. The grants would fund noncapital expenditures in furthering the objectives set forth in a board's long-range program and annual work plan.

Many people interested in and supportive of the grants concept are unsure whether these grants should be handled by this type of board or a State soil conservation agency. I hope a fruitful discussion about these differences will emerge during the conservation farm bill hearings.

Title III authorizes the Secretary to continue the resource conservation and development program. The program allows States, local units of government, and local nonprofit organizations both the technical and financial assistance necessary to operate and maintain land and water conservation programs. Presently there are some 200 ongoing R.C. & D. projects. Title III would give the Secretary specific legislative authority to continue the program while targeting projects more specifically related to natural resource concerns.

Title IV authorizes the USDA to accept the services of conservation volunteers. Many individuals in the United States are committed to helping resolve natural resource conservation issues in their community, on either a State or national level. However, the USDA cannot accept this voluntary

service because of liability problems and because volunteers might be used to displace USDA employees. Title IV provides the necessary liability protection for volunteers and employment protection for USDA. It would result in more conservation on the land and provide satisfying voluntary service for many Americans.

According to Mark 4: 28:

The earth bringeth forth fruit of herself, first the blade, then the ear, after that the full corn in the ear.

This was true in Biblical times, it is true today, and it should be true hundreds of years from now. There is, however, an important point to remember. The land the Bible refers to, the land where agriculture first developed at least 7,000 years ago in the fertile valleys between the Tigris and Euphrates Rivers, is fertile no more. I can attest to its ravishment. Last year I visited this land which once held so much promise during a tour of the Middle East. Why are Egypt's lands now so impoverished? The people overgrazed and overused their lands, causing the rivers to fill with silt. The river waters entered the aquifers which were so desperately needed to irrigate the land; they clogged up, and the lands are cracked and spoiled today. We need to learn a lesson from history here. We need to learn that the time to conserve our future is now.

Granted, our technology is more advanced today than it was in the days of ancient Egypt. However, even though the United States has the best agriculture technology in the world, the best fertilizers, herbicides, and the most modern equipment, the basic and most important ingredient for providing abundant food to feed a hungry world is good soil.

We need to raise public awareness about the relationship between our export capabilities and the conservation of our productive agricultural base. The farm bill of 1981 provides us with an excellent opportunity to do exactly that. Hopefully, the Soil Conservation Act of 1981 will aid in this discussion.●

By Mr. SASSER:

S. 713. A bill to amend the Internal Revenue Code of 1954 to provide a refundable tax credit to an employer who pays compensation to an employee for a period during which the employee is participating in Armed Forces training; to the Committee on Finance.

S. 714. A bill to amend the Higher Education Act of 1965 to increase the eligibility of members of the military Reserves and of the National Guard for basic educational opportunity grants by $500; to the Committee on Armed Services and the Committee on Labor and Human Resources, jointly.

S. 715. To amend title 10, United States Code, to reduce from 60 to 55 the age at which a member of the Armed Forces may retire for nonregular service and to provide for such a reduction in the retired pay of such a member who retires before the age of 60 as may be necessary to avoid any additional cost to the United States.

INCENTIVES AND PROTECTION FOR THE NATIONAL GUARD AND RESERVES

● Mr. SASSER. Mr. President, we hear a great deal these days about the need to improve the defense readiness of this country. But the rhetoric seems to focus on the more popular subjects—the B1, the MX, the Rapid Deployment Force, and the like. Unfortunately other defense issues tend to get shoved aside as the media concentrates on these other subject areas.

But, I would remind my colleagues that it is often the less popular defense issues that we need to bring into focus. I would like to discuss one of these issues today—the role of our Nation's National Guard and Reserve Forces.

All too few people realize the importance of our Nation's Guard and Reserve. In the Army, for instance these elements make up 53 percent of all the combat battalions and 60 percent of the combat service support units. It is simply a military reality which has been expressed often by the Army Chief of Staff that the Active Army could not successfully be committed to a wartime task in Europe without the assistance of combat and support forces of the National Guard and Reserve.

Despite the major role assigned the Guard and Reserve, however, defense policies of the last 10 years have shortchanged this vital element of our national defense.

In 1970, then-Secretary of Defense Melvin Laird outlined a new "Total Force Policy." An integral part of this post-Vietnam policy was to be a substantial improvement in the readiness of the Guard and Reserve so these elements could assume a larger role in our national defense. In the succeeding years, however, while the Guard and Reserve were assigned these expanded tasks, defense budgets failed to properly equip these elements for the new combat role. And so today, the Guard and Reserve is ill prepared to fight, burdened with aging equipment and material shortages.

For instance, the Guard and Reserve are short 386 tanks necessary for deployment; short 3,000 trucks; short 570 artillery pieces; short 2,300 personnel carriers. Similar shortages and deficiencies exist in the Air Guard and Naval Reserve.

In my opinion, Mr. President, there is no more important defense priority than equipping our National Guard and Reserve units. We must get on with the job; each year these procurements are delayed it will only cost the taxpayers more.

But, Mr. President, equipment is not the only area of high priority. We must provide incentives and policies which will enable us to secure and retain the necessary manpower for the Guard and Reserve. Last year the Congress passed several measures designed to improve National Guard and Reserve strength. But all elements of the Guard and Reserve are still 150,000 personnel short of wartime requirements. Simply we must do more to provide for incentives for service.

Today, I am introducing three bills which would provide some additional incentives and protection for members of the National Guard and Reserves. These bills are identical to the measures introduced in the House by the distinguished gentleman from Iowa, Mr. BEDELL.

The first bill would increase the eligibility of members of the Guard and Reserve for basic educational opportunity grants by $500. This will provide an added higher education incentive for guardsmen and reservists. The second bill provides authority to reduce the retirement age from 60 to 55. This bill should assist in the retention of personnel. The last bill provides a tax credit to an employer who pays compensation to an employee who is away for annual training with his unit. This measure provides an incentive for improved participation in the Gaurd and Reserve.

Mr. President, I have touched on only a few of the issues affecting the readiness of our Nation's Guard and Reserve. I believe it is urgent that we begin to reequip these forces for the task which they are assigned. In addition we must improve the ability of the Guard and Reserve to attract and retain the necessary personnel. I hope that the approach I have outlined today will provide a small first step toward these goals.●

By Mr. NUNN (for himself, Mr. CHILES, and Mr. SASSER):

S. 716. A bill to amend the Federal Property and Administrative Services Act of 1949 to permit State and county extension services, and any State agricultural experiment station, to obtain excess property from the United States; to the Committee on Governmental Affairs.

FEDERAL SURPLUS PROPERTY ACT AMENDMENT

○ Mr. NUNN. Mr. President, I rise today to introduce legislation on behalf of myself, Senator CHILES, and Senator SASSER which I believe will correct an inadvertent oversight in existing law. During the course of the 94th Congress, we passed legislation to consolidate and update the Federal surplus and excess property programs. This legislation was ultimately enacted as Public Law 94–519 "to establish an orderly, efficient, and fair system for distributing by donation Federal surplus personal property to public and nonprofit institutions for uses of a public character." In general, I believe that this reorganization of the manner in which the Federal Government disperses its property has been successful; however, as this legislation was being developed, an inadvertent omission was made which should be remedied. It was not the intent of Congress to exclude the Agricultural Extension Service from acquiring excess property. We found no clear evidence that would support a specific intention by Congress to deny the

Extension Service the right to acquire excess property.

Since being established by Congress to disseminate agricultural information throughout the United States, the State extension services have been viewed as an educational arm of USDA. They operate from funds appropriated in the Federal budget for this specific use with matching funds provided by the State and local governments. Until the enactment of Public Law 94–519, the State extension services have been utilizing Federal excess property in increasing amounts each year. Since formal access was established by the General Services Administration in 1966, it had become a reliable and valuable source of supplies and equipment which supplemented the annual Federal appropriation.

Over the last several years, the State extension services obtained Federal excess property at rate exceeding an average of $6 million in inventory value annually. The loss of access to this property has had the same effect as a reduction in the annual appropriation to the U.S. Department of Agriculture for conducting educational programs in agriculture, home economics, rural development, and consumer affairs. Now a larger portion of the appropriate funds must be used to purchase items previously obtained from Federal excess property. We agree that in the strictest sense the Agricultural Extension Service is not a Federal agency, nor should it be considered as a grantee. In fact, the Extension Service is the educational agency of the U.S. Department of Agriculture and serves as the national office for the U.S. Cooperative Extension Service System.

The national system includes a Cooperative Extension Service by that name, or "Agricultural Extension Service" at each of 52 land-grant universities, and staffs in nearly all U.S. counties. The name "cooperative extension" derives from financial and administrative arrangements involving three levels of Government—Federal, State, and county.

Through this unique network of Federal-State-county relationships the Agricultural Extension Service conducts educational programs of significance in achieving local, State, and national goals. Within the nationwide system, research results of the land-grant universities agricultural experiment stations, and USDA research agencies are directed toward solving problems of the American people.

Since State extension services are neither Federal agencies, nor grantees, Public Law 94–519, as it is presently written, does not recognize their unique relationship with USDA. The net effect of this omission has been to deny continued access by these offices to federally owned property for use in approved official programs of the U.S. Department of Agriculture. Instead, such property is being donated to the State agencies for surplus property where it is subsequently given to State and local agencies and certain nonprofit organizations.

I wish to point out that I have also included the agricultural experiment stations in this bill as desirable participants in the Federal excess property programs.

The experiment stations, pursuant to the Hatch Act of 1887, conducts field research into agricultural crop and soil problems, as well as aiding in the development of new, hybrid crops.

The research findings of the experiment stations are disseminated to the public through the Extension Service. As such, the programs of the Extension Service, and the experiment stations, have become an intrinsic and valuable part of the life of rural America.

The desire to acquire Federal excess property by the Agricultural Extension Service, and the agricultural experiment stations, is an important concern. To help assure the ongoing successes of these two fine programs I ask for the enactment of this proposed bill to amend Public Law 94–519 which will cost no Federal dollars and will restore the excess property utilization program as we originally intended.●

ADDITIONAL COSPONSORS

S. 139

At the request of Mr. HATCH, the Senator from North Dakota (Mr. ANDREWS) was added as a cosponsor of S. 139, a bill entitled the "Comprehensive Health Care Reform Act."

S. 140

At the request of Mr. HATCH, the Senator from North Dakota (Mr. ANDREWS) was added as a cosponsor of S. 140, a bill to provide for a national blood program, and for other purposes.

S. 234

At the request of Mr. HATCH, the Senator from Utah (Mr. GARN) and the Senator from North Dakota (Mr. ANDREWS) were added as cosponsors of S. 234, a bill to amend the Public Health Service Act to encourage the establishment of home health programs and to amend the Social Security Act to provide expanded coverage of home health services under the medicare and medicaid programs.

S. 348

At the request of Mr. HATCH, the Senator from South Carolina (Mr. THURMOND) and the Senator from Utah (Mr. GARN) were added as cosponsors of S. 348, a bill to authorize a youth minimum wage differential under the Fair Labor Standards Act of 1938 and for other purposes.

S. 443

At the request of Mr. DANFORTH, the Senator from Maine (Mr. COHEN), the Senator from Idaho (Mr. MCCLURE), the Senator from Utah (Mr. GARN), and the Senator from Nebraska (Mr. ZORINSKY) were added as cosponsors of S. 443, a bill to clarify the limits of the authority of the Department of Education.

S. 517

At the request of Mr. BENTSEN, the Senator from Texas (Mr. TOWER), the Senator from Missouri (Mr. DANFORTH), and the Senator from North Dakota (Mr. BURDICK) were added as cosponsors of S. 517, a bill to amend the Clean Air Act to provide for further assessment of the validity of the theory concerning depletion of ozone in the stratosphere by halocarbon compounds before proceeding with any further regulation of such compounds, to provide for periodic review of the status of the theory of ozone depletion, and for other purposes.

SENATE JOINT RESOLUTION 20

At the request of Mr. SASSER, the Senator from Kansas (Mrs. KASSEBAUM), the Senator from Maryland (Mr. SARBANES), and the Senator from West Virginia (Mr. RANDOLPH) were added as cosponsors of Senate Joint Resolution 20, a joint resolution to designate the month of April 1981 as "Gospel Music Month."

SENATE JOINT RESOLUTION 28

At the request of Mr. HATCH, the Senator from South Carolina (Mr. THURMOND), the Senator from Montana (Mr. MELCHER), the Senator from Rhode Island (Mr. PELL), the Senator from New Mexico (Mr. DOMENICI), the Senator from Iowa (Mr. GRASSLEY), the Senator from California (Mr. HAYAKAWA), the Senator from Pennsylvania (Mr. SPECTER), the Senator from Tennessee (Mr. SASSER), the Senator from Virginia (Mr. WARNER), the Senator from Pennsylvania (Mr. HEINZ), and the Senator from Ohio (Mr. METZENBAUM) were added as cosponsors of Senate Joint Resolution 28, a joint resolution designating the week beginning March 8, 1981, as "Women's History Week."

SENATE RESOLUTION 95—SUBMISSION OF A RESOLUTION RELATING TO THE MULTILATERAL REDUCTION IN EXPORT SUBSIDIES

Mr. DANFORTH (for himself and Mr. BENTSEN) submitted the following resolution which was referred to the Committee on Banking, Housing, and Urban Affairs:

S. RES. 95

Whereas the expansion of exports by the United States benefits both our domestic economy and our national security;

Whereas export financing by the Export-Import Bank of the United States has increased our exports and has helped make American products competitive with those of other nations;

Whereas some foreign countries have engaged in unfair export financing subsidization to promote the purchase of their exported goods, including the use of mixed credit financing packages where foreign aid is used to supplement official export credits to achieve rates below those which can be charged by the Export-Import Bank;

Whereas although the United States and other nations have engaged in painstaking, lengthy negotiations to restrain credit competition and the use of export subsidies, such unfair practices still persist; and

Whereas the President of the United States,

in order to promote a healthy national economy, has proposed cuts in federal spending, including the financing authority of the Export-Import Bank; be it therefore

Resolved, That it is the sense of the Senate that the President of the United States should immediately undertake to ensure that United States exports will not be at a competitive disadvantage by bringing other nations into parity with the proposed financing authority of the Export-Import Bank;

That it is also the sense of the Senate that the President of the United States should engage in such discussions and negotiations as are necessary to conclude promptly international agreement on the reduction of the use of export subsidies and bring to an end unfair export subsidies by other nations; and

That it is also the sense of the Senate that in the event negotiations and discussions to end discriminatory and unfair export subsidy practices by other nations are unsuccessful, the President of the United States should consider the use of other measures, as necessary, to achieve competitive parity with other major exporters.

● Mr. DANFORTH. Mr. President, today Senator BENTSEN and I are introducing a Senate resolution which is of great importance to our Nation's future as an exporter. The purpose of the resolution is to express the sense of the Senate that President Reagan should take the steps necessary to encourage the reduction of export subsidies around the world and, in particular, to bring other nations into parity with the United States in the area of international export financing.

In recent years, exporting nations all over the world have engaged in an escalating credit war. The official credit agencies of exporting countries aggressively compete with each other to offer the best possible credit terms to the customers buying their country's exports. This credit competition leads directly to inflationary and costly subsidization of exports.

The United States, represented by the Department of Treasury and the Export-Import Bank, and 21 other nations are pursuing negotiations under the auspices of the Organization for Economic Cooperation and Development (OECD). These negotiations have been lengthy and progress has been slow. The negotiations seek, among other things, to improve and update the established credit arrangement which sets interest rate floors and limits on loan maturities. We are also negotiating for international agreement that the credit arrangement will be periodically reviewed and adjusted fairly as economic conditions change.

Last December the negotiations broke off without agreement on the crucial issue of the international interest rate floors for exports. The United States, Canada, Japan, and a number of European nations favor a system which would reflect more realistically changes in the international credit market. However, a small group of other nations lead by France are unwilling to accept such necessary reforms to the current system.

There are, of course, other issues outstanding, but the negotiations essentially come down to the search for a way to establish internationally accepted guidelines for the extension and notification of credit terms for exports. This search is extremely important. In the last several years, we have seen a more liberal use of mixed credit financing packages by foreign official credit agencies, where foreign aid is blended with official export credits. This further complicates the export financial picture. Mixed credit financing packages directly inject geopolitical objectives into the international export-import market in a manner which, in the long run, will almost certainly have a detrimental effect on all nations.

The President's economic recovery program includes cuts in the lending authority of the Export-Import Bank, representing unilateral action by the United States to reduce the Bank's authority to finance exports to foreign countries. The resolution I am introducing today would express the sense of the Senate that the President should make every effort, through the OECD negotiations and otherwise, to bring the export financing practices of other countries in line with those proposed to be implemented for the Export-Import Bank.

Unfair export subsidization and the growing tendency to use export subsidies as a tool of foreign policy work to the disadvantage of us all.●

NOTICES OF HEARINGS

COMMITTEE ON THE BUDGET

● Mr. DOMENICI. Mr. President, the Senate Budget Committee will meet to mark up a second revised budget resolution for fiscal year 1981, incorporating fiscal year 1982 reconciliation instructions during the week of March 16–20. The opening session will begin at 2 p.m. in room 6202 of the Dirksen Senate Building and will run until 10 p.m. that evening. For the remainder of the week, the committee will meet from 10 a.m. until 10 p.m., also in room 6202.

For more information, contact Mr. Bill Stringer of the Budget Commitee staff at 224–0538.●

SUBCOMMITTEE ON FEDERAL EXPENDITURES, RESEARCH, AND RULES

● Mr. DANFORTH. Mr. President, the hearings previously scheduled by the Subcommittee on Federal Expenditures, Research, and Rules of the Committee on Governmental Affairs to identify the Federal programs, laws, and regulations which impose the greatest paperwork burdens on the American people have been rescheduled to begin at 9:30 a.m. on March 18, 1981. The hearings were scheduled at 10 a.m. on March 18. They will be held in room 3302, Dirksen Office Building.●

SUBCOMMITTEE ON ENERGY RESEARCH AND DEVELOPMENT

● Mr. DOMENICI. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of public hearings before the Subcommittee on Energy Research and Development on the Department of Energy authorization for fiscal year 1982.

The hearings will be held in room 3110 of the Dirksen Senate Office Building as follows: Monday, March 23 at 10 a.m., fossil and environment; and at 2:30 p.m., solar and conservation; Monday, March 30 at 2:30 p.m., magnetic fusion, inertial fusion, geothermal, electric energy systems, nuclear materials security and safeguards; Wednesday, April 1 at 2 p.m., nuclear programs; and Friday, April 3 at 2 p.m., U.S. Synthetic Fuels Corporation, alcohol fuels. Testimony will be received from administration witnesses.

For further information regarding these hearings, you may wish to contact Mr. Paul Gilman at 224–4431.●

ADDITIONAL STATEMENTS

SVEN E. WIIK ELECTED TO NATIONAL SKI HALL OF FAME

● Mr. ARMSTRONG. Mr. President, a resident of Colorado, Sven E. Wiik, was elected to the National Ski Hall of Fame on February 28, 1981. From the time of Mr. Wiik's arrival in the United States in 1949, few persons have had a greater impact on the skiing sport than he.

As the ski coach at Western State College in Gunnison, Colo., for 19 years, he helped at least 12 members of his teams qualify to represent this Nation in Olympic and FIS competition. A dozen coaches working with young skiers in high schools, colleges, and community programs around the country developed their knowledge of and love for the sport while working with Mr. Wiik at Western State College. It was also at WSC that he helped gain the NCAA's acceptance of skiing as an intercollegiate sport.

Sven Wiik has also served in many capacities for the Rocky Mountain Division of the U.S. Ski Association and continues to serve as a director of the Steamboat Springs Winter Sports Club junior cross country program, which he helped start in 1958. At his Scandinavian lodge in Steamboat Village, he still conducts his Thanksgiving Cross Country Clinics, which he started in Gunnison and Crested Butte in 1957.

His achievements include service on the U.S. Olympic Ski Games Committee, the Olympic Organizing Committee for the Lake Placid Olympics, and the NCAA Ski Rules Committee. He was a coach of three different U.S. ski teams in international competition and still operates the Werner Mountain Training Center in Steamboat Springs.

Mr. President, I commend the U.S. Ski Association for its very wise selection of Sven E. Wiik for its Hall of Fame and am

proud to call his accomplishments to the attention of my colleagues.●

THE CRISIS IN EL SALVADOR

● Mr. KENNEDY. Mr. President, by the end of this month we will have 78 American military personnel in El Salvador. As the Reagan administration announces a second $25 million military assistance package to this embattled country, more and more Americans are disturbed by the unqualified support for El Salvador's ruling junta—even if it is cast in the light of East-West competition in the Central American arena.

Before more American lives and dollars are committed, the people of the United States deserve to be fully informed about the reality within El Salvador and the implications of a course that sees a military solution to the political crisis there. Therefore, I urge examination of the two-part series of articles by Karen DeYoung appearing Sunday and Monday, March 8 and 9, in the Washington Post, which provide a thoughtful background on the current crisis in El Salvador, and our involvement in it.

Mr. President, I ask that Karen DeYoung's two-part series of articles from the Washington Post be printed in the RECORD.

The material follows:

EL SALVADOR: A SYMBOL OF WORLD CRISIS

(By Karen DeYoung)

On the morning of Oct. 15, 1979, a group of young Army officers in El Salvador informed their president and commander-in-chief, general Carlos Romero, that he had until 3 p.m. to turn over the government and leave the country. The ultimatum spelled Romero's doom and an embryonic foreign policy crisis for the United States.

Romero consulted the U.S. Embassy, his headquarters and regional commanders. Finding he had no support, the general and his aides packed their bags and were gone without a shot being fired.

Three days later a new government composed of two relatively unknown Army colonels and three civilians presented itself to the Salvadoran people and proposed a bargain. After nearly five decades of right-wing military dictatorship and domination by the rich, they pledged radical changes in the country's "social and economic structures," political pluralism and an "immediate end" to military corruption and repression of the left and peasantry.

In return, this new junta asked only "patience, understanding" and the confidence of the Salvadoran people.

Thousands of miles to the north, middle-level State Department officials, who had feared an imminent takeover of the Central American republic by leftist guerrillas, breathed easier. The Carter administration issued a statement pronouncing itself "encouraged."

Today, 16 months after that relatively obscure event, the tropical backwater that Spanish Catholics named after "The Savior" is the front line in the world's principal power struggle. Two successive U.S. presidents have made it a leading foreign policy symbol, and many Americans, their concern over little-understood wars in little-known lands reawakened, are beginning to fear their sons may be asked to die on its volcanic slopes to preserve freedom in the Western world.

With a suddenness that has stunned many in this country, Ronald Reagan and Alexander M. Haig Jr. have defined El Salvador's insurgency as a conflict with global meaning, asserting that Cuban adventurism and "international terrorism" have created a crisis in America's "front yard" that must be confronted. U.S. allies have been put on notice that El Salvador is the first important test of their willingness to cooperate with Reagan.

White House officials, while denying that the new administration was looking for an early crisis to show its toughness, agree that El Salvador's problems provided a "fortuitous coincidence" for just such a demonstration. El Salvador, these officials say, is "the first step" in a conscious effort to "repair" America's image abroad and to project a determination to control world events in a way that the Carter administration did not. The Soviets, the Cubans and the Palestine Liberation Organization are all targets of American actions in El Salvador now.

For Jimmy Carter El Salvador was a different kind of testing ground, one that exposed the multiple, often conflicting sides of a policy that will likely be remembered as both the best and worst of his administration. El Salvador was a place where Carter could prove that abusive governments did not deserve United States friendship or support, and that improvements in the way they treated their people brought U.S. praise and aid.

With the repressive Romero regime gone, El Salvador became a country where the United States would demonstrate it could tolerate, even encourage, the kinds of reforms proposed by the left. If El Salvador's government could be pushed into preempting the best of what the left had to offer in terms of economic and social equity, the theory went, those who wanted to seize power for the left would have little to offer except communist authoritarianism, violence and international isolation.

Carter's stress on reform and Reagan's on combatting international terrorism are different reflections of a new domino theory, Central American-style. Each version represents a response to U.S. political realities as much as they reflect what is going on in El Salvador. This two-part report will examine both sets of realities in the light of the importance the new U.S. administration has attached to a crisis it says it inherited from its predecessor.

Perhaps by the very obscurity of El Salvador—the fact that its problems had been left to fester for a half century—it provides a near textbook case for testing both the reformist tendencies of the Carterites and the counterinsurgency techniques Haig seems to favor. The stakes are not oil or mineral wealth, of which El Salvador has none, nor are they U.S. private or government financial investment, of which it has little. At issue are geography and politics. El Salvador is close, in the U.S. front yard, and, traditionally, in its sphere of influence.

THE JUNTA

El Salvador is a land of superlatives, most of them negative. Wedged into the Pacific coast, it is the smallest and most densly populated country on the American mainland. It is also one of the poorest nations in the hemisphere, and its political history is one of the bloodiest. As conservative, upper-class Salvadorans never tire of reminding newcomers to their battles, El Salvador was the site of "the first Bolshevik revolution in the Americas."

By most accountings, more than 30,000 lives were lost when the Army cracked down on that 1932 uprising, peasants, led by local Communists launched a disastrous revolt against landowners—then a group of 14 rich and ruling families who ran the country as a virtual feudal state. The event, and its outcome, wrote the script for the current Salvadoran drama that took more than 10,000 lives—among them thousands of peasants as well as guerrillas, soldiers and some of the best and brightest the country had to offer—last year. Today, the principal actors are largely the same: an entrenched landowning class with a stridently anticommunist armed forces to defend it, and a repressed peasantry with its largely self-appointed communist-based defense squad.

It was only in the late 1960s and early 1970s that a new group of players began to take increasingly important roles. The Catholic Church, long a powerful ally of the landowners, suddenly became a spokesman for the poor. A class of civilian politicians, most of them moderates or left of center, emerged to challenge the political power of the military. More recently, foreign powers began to take more than passing interest.

The biggest surprise, in the Salvadoran context, was that a group of young military officers began to see that their country was a socioeconomic version of the bubbling volcanoes that dot its landscape.

The ultimatum that drove Romero from the shady, breeze-filled presidential palace that perches on the only hill in the sun-scorched capital of San Salvador brought to power a five-man junta that held precisely such views. Their outlook had been formed in a decade of turmoil, in which unprecedented presidential victories by civilian candidates in the 1972 and 1977 elections had been overturned by a military establishment that had been accustomed simply to rigging the elections for its own candidates. But president Arturo Molina, an Army colonel, and his successor, Romero had been increasingly obliged to use force as a means of putting down public protest.

Groups of leftist guerrillas had formed, and had launched a wave of bombings, kidnapings and direct attacks against military installations. Increasingly, their efforts were backed on a political level by a broad spectrum of striking industrial and peasant unions, professionals and intellectuals. Right-wing paramilitary squads backed by the military, and the military itself, answered the left in kind with a wave of repression against peasants, the church and politicians.

In the United States, which had long backed the military with weapons, training and recognition of its political legitimacy, first the Congress and then Carter were up in arms over something they called human-rights abuses. An Organization of American States human rights team that visited El Salvador in 1978, reported in January 1979 that government security and paramilitary organizations were responsible for the deaths of "numerous persons," as well as for acts of physical and psychological torture and inhuman imprisonment in secret dungeons.

But these were relatively minor annoyances compared to the shock wave that hit Central America's military governments in July 1979, when Nicaraguan president Anastasio Somoza, the regional right-wing patriarch who was considered a favored U.S. son, was overthrown by a popular insurrection led by guerrillas of the Sandinista National Liberation Front.

Not only did the left win a military victory in Nicaragua, it proceeded to throw thousands of members of the Nicaraguan National Guard, once thought an invincible force, into prison. And the U.S. president said it was all right by him.

"What happened in Nicaragua was the force behind the coup in El Salvador," said one former Salvadoran government official with close connection to the young officers' group. "The officers saw what happened to the National Guard. They didn't want to risk a confrontation with the left. And they were scared of Carter."

In a different sense, it was Nicaragua that also brought the United States right into the Salvadoran political thicket in a way that continues to entangle Reagan. Somoza's fate clearly suggested to Washington policy makers that Romero was on the endangered species list as well.

Although the State Department hotly denied U.S. involvement in Romero's overthrow, observers in Washington and San Salvador noted that little happened within the American-trained Salvadoran military without the United States knowing, and approving, in advance. While it was willing to live with a leftist government in Nicaragua, according to State Department officials at the time, the Carter administration was not prepared to countenance a similar takeover in El Salvador, and was convinced the only way to avoid it was to get rid of Romero and what he and the military establishment represented there.

In one three-week period before the Salvadoran coup, William Bowdler, a U.S. diplomat who had served as Carter's chief troubleshooter in Nicaragua, visited Romero twice. Viron P. Vaky, then the State Department's top expert on Latin America, made at least one unpublicized trip to San Salvador. Both took a hard line with the general, strongly advising an immediate political opening to the nonviolent left and center, substantial advancement of presidential elections scheduled for 1982, and changes in the country's economic and social structures and strong action against human-rights abuses perpetrated by government forces.

But there were some things Romero—the tenuous head of a fearful and bickering hierarchy of high-level officers, low-level assassins and large vested interests in the private economic sector—could not change, and others that he would not.

Sitting in the heavily fortified U.S. Embassy several days after the coup, then-ambassador Frank Devine allowed that "we, like everybody else, were aware that some changes were coming."

The young, reform-minded officers, primarily captains and majors in the Army, plotted well. They consulted not only the United States, but the powerful Jesuit community of leftist intellectual priests, and the office of San Salvador archbishop Oscar Romero, a leading human-rights advocate unrelated to the deposed general of the same name. Reluctant to take power themselves, they named two ostensibly like-minded colonels, Jaime Abdul Gutierrez and Adolfo Arnoldo Majano, to lead the junta.

To prove their pluralistic intentions, they appealed to some very specific civilians to join. Guillermo Ungo, head of the small social democratic National Revolutionary Movements and the 1972 vice presidential candidate, was brought in to represent the "Popular Forum." An alliance of 14 political and union organizations, the forum included both the dominant opposition Christian Democratic Party and the National Democratic Union, the recognized legal front of the Salvadoran Communist Party.

To represent the church and the intellectuals, Roman Mayorga, rector of the Jesuit-run local branch of the University of Central America and an eloquent human rights spokesman, was added. The junta was rounded out with Mario Andino, a local businessman who represented the least conservative faction of the private sector.

In the abstract, it seemed a dream team. But within a week, the issue that had brought Carter's attention to El Salvador in the first place—human rights—would show that the new junta was too divided, and too weak, to make the changes that would win it credibility and a chance to survive.

Among the touchiest issues of the day in El Salvador were charges by the Catholic Church and human-rights groups that hundreds of persons had been secretly arrested for political reasons by the Romero government and its predecessor. Many, it was charged, were being held in secret jails; most had been tortured and some were dead.

Romero had consistently denied having any political prisoners at all. But it was indicative both of the dubious quality of his denials and the good will of the new government that the first decree issued by Majano and Gutierrez ordered the release of "all" political prisoners—a number they did not specify—and the punishment of those armed forces members who illegally arrested, tortured or killed them.

Eight days later, the junta announced that it could produce no prisoners, and junta members, with great embarrassment, told families looking at least for confirmation of the deaths of those known to have once been in the hands of the security forces that they could not help. Later, Gutierrez told reporters that he was concerned about the supposed prisoners, but that the government also had "other priorities," in particular the continuing attacks from the leftist guerillas that, even as he spoke, were going on in a slum outside the capital.

Ungo told reporters he was "worried."

THE MILITARY

There are many Salvadorans, particularly those who initially had faith in the new government, and later lost it and joined the left, who say that the battle for peaceful democratic change in their country, and avoidance of civil war, was lost in those first two weeks.

The young captains and majors had thrown out of the country not only Romero, but all of the Army's generals and most of its colonels. But, according to many informed observers at the time, the captains, imbued with a sense of command structure and a rigid view of their own institution, were "afraid" to take over themselves.

In addition to Majano and Gutierrez, they left a number of other colonels, some of them garrison commanders outside the capital, in positions of command. At the time, the most objectionable of the colonels, in the view of government civilians, was newly appointed Defense Minister José Guillermo Garcia, a onetime presidential hopeful during Romero's reign.

Perhaps more importantly, in hindsight, they left the Salvadoran security forces virtually untouched.

To understand military mindset and repression in El Salvador, and to make sense of current, bewildering charges and countercharges of death squads, paramilitary forces and "who is killing whom," one must go back to the maze-like system of military bodies that is peculiar to that country. In this maze also lies either a success or a disaster for Reagan's determination to show that U.S. military aid is a key to defeating guerrilla infiltration and subversion in Central America.

The Army, a force of about 7,000 men, is technically charged only with defending the country's borders from external aggression. At the same time, there are also a number of separate police bodies known collectively as the "security forces."

Chief among them is the National Guard, an institution whose structures and functions are modeled on those of the Spanish Civil Guard. Where most of the soldiers in the Army are draftees and their current commanders are young products of the Salvadoran military academy, the rank and file in the National Guard are older career men. Most of them have served since the days of the dictatorship when they were given a free hand to keep order and mount domestic military operations in the name of fighting communism.

Their garrisons are dotted throughout the country, in areas where, to greater and lesser degrees, their commanders operate virtual fiefdoms of control.

The National Police is a smaller organization primarily providing police functions within urban areas, but in some parts of the country, controlling smaller villages. In addition, the Treasury Police have broad investigative authority and wide opportunities for graft.

Under the old, now ostensibly disbanded system of military rule, according to Salvadoran sources close to the military, each of these bodies also had a wide system of informers and paid thugs among the civilian population, as well as death squads, under the direct order of the executive's office of intelligence, to eliminate troublemakers and suspected subversives.

Far-flung security units, often out of touch with any central command structure, tended in many cases to operate virtually as the personal police forces of local landowners, the ultimate economic power behind the military throne. They were, and in some cases continue to be, more accountable to them that to their superiors in San Salvador.

The frail command structure and conflicting loyalties in the Salvadoran armed forces are a problem frequently cited by U.S. military officials working with them. An example last summer illustrates the possibility that a large U.S. military program might only make the problems worse. Eight workers of an agricultural cooperative, organized for peasants under the new government's land-reform program in a place called El Penon, were shot to death.

According to area residents, National Guard troops—apparently out of loyalty to the former landowner whose plantation the reformist government had seized, dislike of the reforms themselves or a belief that agricultural reformists were leftists—entered the cooperative in the early morning and murdered its entire leadership. Later, the local Army unit, which was friendly to the cooperative leaders and some of the agrarian reform officials, came to the farm to protect its inhabitants—most of whom had fled in fear.

Subsequently, other killings occurred, and both the local National Guard and the Army began to demand protection money from the peasants of the cooperative. The killing has slacked off.

Although the U.S. government under both Carter and Reagan has argued its military aid is necessary to better train the Salvadoran armed forces, there has been "very little" progress in teaching it not to kill noncombatant civilians, according to another recent U.S. ambassador in El Salvador, Robert E. White.

In testimony two weeks ago before a congressional subcommittee in Washington, White argued against sending more U.S. armaments there and said that "the greatest disadvantage" El Salvador's struggling government now has "weighing it down are the excesses of the security forces."

According to informed Salvadoran sources, the death squads of each of the security forces remains intact, under the direct control of the Army. The remaining vestiges of the old system of diffused authority and separate powers, these sources say, also allow the highest government levels to retain what a U.S. official calls "deniability" of the worst military abuses. Asked if he thought Defense Minister Garcia ordered, or knew of, their activities, the official said, "I just don't know."

Whatever military values the United States wishes to instill in the Salvadoran armed forces will have to overcome decades of their own training. Boot camp manuals used at least until the time of Romero's departure describe, in primitive drawings and language, the subversive tendencies of young people

with uncombed hair, and priests who wear local peasant clothing rather than the traditional collar or cassock.

For years, as the United States trained the Salvadoran officer corps, they were taught that their primary function was to prevent the spread of communism. Suddenly, under the Carter administration, as one high-level Salvadoran intelligence officer said just before the coup, "doesn't think we know how to make reform at the same time."

"We will have democracy," he said, "but a lot of people will have to die here first."

The process of reforming the armed forces under the new government has been additionally complicated by the emergence of a wide variety of so-called right-wing extremists elements—freelance death squads ostensibly up for hire to the highest bidder. The extreme right first became visible in 1977, when a clandestine group calling itself the "White Warriors' Union," believed at the time to be an offshoot of the right-wing "White Hand" movement begun in Guatemala in the 1960s, threatened to execute all Jesuit priests if they did not leave El Salvador by a stated deadline.

The deadline passed, and nothing happened. But in the intervening years, other groups emerged under other names, with real victims. In numbers that increased daily, the dead are found alongside rural roads and on city street corners, often with a group's initials carved on their mutilated bodies or placards strung around their necks.

According to White, and other analysts, the extreme right is financed from Miami and Guatemala City by wealthy Salvadorans who fled the country under the new government, who dislike its socialist reforms and who hope to regain what they have lost by inciting chaos, economic ruin and an eventual right-wing military coup. Their ostensible leader is former major Roberto D'Aubuisson, second in command of Army intelligence before he became one of the few such officers to be ousted along with Romero. D'Aubuisson, in public statements inside and outside El Salvador, denies any connection with the extremist death squads and says merely that he wants the civilians out of the government.
